This is the sixth of seven resource units for a twelfth grade course on value, conflicts and policy decisions. The topic for this unit is war and peace. The objectives are listed as to generalizations, skills, and values. The double-page format related objectives to pertinent content, teaching procedures, and instructional materials. This unit deals with the costs of war, with people's attitudes towards war, and with the causes of war. Pupils investigate the international system and the means which are used to resolve international conflicts, including the use of international agencies. The unit focuses on contemporary foreign policy issues in the United States as this country tries to preserve peace through power. Pupils study the pros and cons of current policies and proposals for change. Viet Nam is suggested as a case study for use in examining current issues. A teacher's guide for this course is SO 006 331; other units are SO 006 332, SO 006 333, and SO 006 335-338. (Author/KSM)
Grade Twelve
Unit: War and Peace

RESOURCE UNIT

These materials were developed by the Project Social Studies Curriculum Center of the University of Minnesota under a special contract with the Cooperative Research Division of the United States Office of Education. (Project HS-045).

1968
These materials were developed by the Project Social Studies Curriculum Center of the University of Minnesota under a special contract with the Cooperative Research Division of the United States Office of Education. (Project HS-045).

1968
OBJECTIVES

This unit should make progress toward helping students learn the following:

GENERALIZATIONS

1. War is a complex social process.
2. War is a major world problem.
   a. The world is a community of interdependent countries. Important happenings in one part of the world affect other parts.
   b. War has serious physical and psychological effects upon people in w -torn areas.
      1) Wars have an important economic impact upon people.
3. War seems to be the result of multiple, interrelated causes.
4. Perceived deprivation and the belief that such deprivation is not inevitable contribute to revolutionary and other protest movements.
5. Nationalism usually makes people prepared to divert resources and effort into channels in which they will make a maximum contribution to national goals.
6. Imperialism, and particula
do, the result of multiple, interrelated causes.
7. The International System mat as a series of dynamic
   a. There are many sources of power in dealing with

OBJECTIVES

make progress toward helping students learn the following:

6. Imperialism, and particularly attitudes of superiority by members of the imperialist country, give rise to feelings of frustration; when combined with the diffusion of nationalistic ideas from other countries, it helps give rise to feelings of nationalism.

7. The International System may be looked at as a series of dynamic power relationships.
   a. There are many sources of national power in dealing with other nations.
      1) Military capacity is an important factor in the development of national power but not the only one or even the dominant one.
         a) Military power as a means of national power depends upon the willingness to use it.
         b) Force as a means of national power depends not only on the effective proponderance of force but the possibility that its use may alienate the support of other nations.
2) Differences in population, resources, and economy may be reflected in differences in national power; that is to say, they are important bases or components of national power.

3) Industrial capacity and energy sources are important bases of national power.

b. In the international system, inequalities of power only invite the use of some form of coercion. The balance of power strategy is based on this premise.

8. National power may be brought to bear upon other nations through many channels and mechanisms: force, diplomacy, international law, international organizations; the choice among them depends on the nature of the goal, its importance, the effectiveness of the means, its acceptability, etc.

a. The instruments of national power are not mutually exclusive; a country may combine elements of collective security with balance of power concepts.

b. Struggle may bring together otherwise unrelated groups. Coalitions and temporary associations will result from conflict where primarily pragmatic interests of the participants are involved. (Nations pool their power behind common in varying systems of alliances."

c. Diplomacy, the bargaining and division of states over matters of interest, is most successful where there is relative equality of among the participants.

1) Compromise is most likely to occur where there is a relative equality of power, and there is something approaching a compromise in the decision.

9. Foreign policy considerations are by ideology, considerations of national self-interest, perceptions of power relationships between countries; expectations about how other nations view and domestic problems at home.

a. Each nation in the international System begins its relations with its own goals and strategies.

b. The process by which a nation forms its foreign policy is very much a part of its internal political process.

10. Executive decisions are limited by factors: permissability, available resources, available time, available
population, economy may be differences in; that is to say, important bases or national power.

of national power exclusive; a line elements of ity with balance

ng together other- roup. Coalitions sociations will liet where primarily

pragmatic interests of the participants are involved. (Nations may pool their power behind common goals in varying systems of alliances and combinations.)

c. Diplomacy, the bargaining and negotia- tion of states over matters of mutual interest, is most successful where there is relative equality of power among the participants.

1) Compromise is most likely to occur where there is a relative equality of power, and therefore something approaching a deadlock in the decision.

9. Foreign policy considerations are affected by ideology, considerations of national self-interest, perceptions of power relationships between countries, expectations about how other nations will act, and domestic problems at home.

a. Each nation in the international System begins its relations by setting its own goals and strategies.

b. The process by which a nation sets its foreign policy is very much a part of its internal politics.

10. Executive decisions are limited by many factors: permissability, available resources, available time, available
information, and previous commitments.

11. The International System has several means and mechanism for resolving conflict but none has been successful consistently in preserving peace.

a. Continued engagement in conflict tends to bring about the acceptance by both parties of common rules regulating the conduct of the conflict.

1) International law lacks the enforcement machinery of national law and thus is useful in resolving disputes only if the sovereign states involved agree to adhere to it.

b. Past and present international organizations have been successful in dealing with social, economic, and/or technical problems but have had limited success in political disputes and in providing for the collective security of their members.

1) International organizations created to date lack the universality of scope, legitimacy, and monopoly of sanctions associated with the concept of world government.

12. Each solutions to the problem based upon different assumptions the cause of war, the probability of total war, estimates of its feasibility, and value choices.

a. The policy of peace that has been criticized by those who advocate very different solutions to the problem of war.

13. Temperature is affected by distance from the equator, distance to water bodies, wind patterns, prevailing winds, air pressure, ocean currents, and physical features which block winds from certain directions.

14. Rainfall is affected by distance to water bodies of warm water, temperature, wind patterns, and physical features which block winds carrying moisture.

15. Vegetation is affected by rainfall, and soil.

16. Some things can be produced in one place than another because of differences in resources, transportation logistics to resources, access to markets, skills, etc.

17. People in most societies of people who live in other countries for goods and services; markets for their goods,
11. Each solutions to the problem of war is based upon different assumptions about the cause of war, the probability of total war, estimates of its destructiveness, and value choices.

a. The policy of peace through power has been criticized by diverse groups who advocate very different solutions to the problem of war.

12. Temperature is affected by the distance from the equator, distance from warm water bodies, wind patterns, including prevailing winds, air pressure systems, ocean currents, and physical features which block winds from certain directions.

13. Rainfall is affected by distance from bodies of warm water, wind direction, temperature, and physical features which block winds carrying moisture.

14. Vegetation is affected by temperature, rainfall, and soil.

15. Some things can be produced better in one place than another because of climate, resources, transportation routes, access to resources, access to markets, people's skills, etc.

16. People in most societies depend upon people who live in other regions and countries for goods and services and for markets for their goods.
SKILLS

1. Attacks problems in a rational manner.
   a. Is alert to incongruities, recognizes problems, and is concerned about them.
   b. Defines problems by isolating basic issues, defining terms, and identifying assumptions and values involved and the factual questions which need investigating.
      1) Defines problems by defining basic terms.
      2) Identifies basic assumptions.
      3) Identifies value-conflicts.
   c. Considers possible consequences of alternative courses of action.

2. Gathers information effectively.
   a. Identifies the main idea in oral, written, and visual material.
      1) Reads for main ideas.
      2) Draws inferences from tables.
   b. Gathers information effectively.
   c. Evaluates information and sources of information.
      a. Identifies and examines to decide whether he or
      b. Differentiates between causal, predictive, and questions and statements
         1) Distinguishes between inferences, and values
      c. Checks on the bias and of sources of information
      d. Detects various kinds
         1) Identifies words a which are intended
      e. Looks for points of agreement and disagreement among sources of information.
      f. Detects inconsistencies.
      g. Checks on the complete and is wary of generalization on insufficient evidence.
      1) Rejects all-none reasoning.
      2) Looks for causation other than those
      g. Checks on the complete and is wary of generalization on insufficient evidence.
      1) Rejects all-none reasoning.
      2) Looks for causation other than those

inferences from tables.
formation and sources

a. Identifies and examines assumptions to decide whether he can accept time.

b. Differentiates between descriptive, causal, predictive, and normative questions and statements.

1) Distinguishes between facts, inferences, and value judgments.

c. Checks on the bias and competency of sources of information.

d. Detects various kinds of persuasion devices.

1) Identifies words and phrases which are intended to persuade.

e. Looks for points of agreement and disagreement among sources of information.

f. Detects inconsistencies in material.

g. Checks on the completeness of data and is wary of generalizations based on insufficient evidence.

1) Rejects all-none (black-white) reasoning.

2) Looks for causative factors other than those mentioned in sources of information.
4. Uses effective geographic skills.
   a. Draws inferences from maps.

5. Organizes and analyzes data and draws conclusions.
   a. Applies previously-learned concepts and generalizations to new data.
   b. Identifies differences in data.
   c. Categorizes data.
   d. Tests hypotheses against data.
   e. Generalizes from data.
   f. Having studied the causes of the problem, examines the possible consequences of alternative courses of action, evaluates them in the light of basic values, lists arguments for and against each proposal, and selects the course of action which seems most likely to prove helpful in achieving the desired goal or goals.
   g. In considering situations calling for action, decides whether or not one should act upon the basis of a theory by considering the extent to which the theory seems verified and the risks of acting or failing to act.

ATTITUDINAL BEHAVIORS

1. Is curious about social data, behavior and wishes to read further in the social sciences.

2. Is committed to the free exchange of social attitudes and data, actively for different points of view and interpretations.
   a. Is committed to a free exchange of social attitudes and policy.

3. Values objectivity and desists from accepting interpretation of the evidence, recognizing the important role in the process of making decisions which problems which demand action.
   a. Respects evidence even if it contradicts prejudices and assumptions.

4. Evaluates information and substance of information before accepting generalizations and generalizations.

5. Is sceptical of the finality of generalizations and keeps them tentative, always subject in the light of new evidence.
geographic skills.

- Analyzes data and previous concepts to new data.
- Analyses differences in data.
- Hypotheses against data.
- From data.

- Decides whether or not to act in situations calling for action, evaluates them by considering the evidence, the theory seems most helpful in achieving the goal or goals.

or failing to act.

ATTITUDINAL BEHAVIORS

1. Is curious about social data and human behavior and wishes to read and study further in the social sciences.

2. Is committed to the free examination of social attitudes and data. Searches actively for different points of view and interpretations.

   a. Is committed to a free examination of social attitudes and public policy.

3. Values objectivity and desires to keep his values from affecting his interpretation of the evidence, although recognizing the important role of values in the process of making decisions about problems which demand action.

   a. Respects evidence even when it contradicts prejudices and preconceptions.

4. Evaluates information and sources of information before accepting evidence and generalizations.

5. Is sceptical of the finality of knowledge, considers generalizations and theories as tentative, always subject to change in the light of new evidence.
6. Is sceptical of theories of single causation in the social sciences.

7. Is sceptical of panaceas.

8. Feels a sense of responsibility for keeping informed about current problems.

9. Feels a sense of responsibility for taking informed action about problems confronting the nation.

10. Evaluates events and conditions in terms of their effects upon individuals as human beings.

11. Values institutions as a means of promoting human welfare, not because of tradition.

12. Attempts to identify, examine and clarify his own values and to work out a consistent value system.
OBJECTIVES

G. War is a complex social process.

S. Defines problems by defining basic terms.

OUTLINE OF CONTENT

I. War is a major world problem.

A. War has been an accepted process of nations since earlier.

B. War is a complex social process.

1. War is a political, legal, and social institution that is highly formalized and system of carrying on negotiations between collectivists by means of violence, fraud, propaganda, and national persuasion.

2. Today wars may vary greatly in goals, tactics, and objectives.

a. Categories usually include conflicts versus limited area nuclear and non-nuclear war and unconventional war; limited war.
OUTLINE OF CONTENT

ex social process.  1. War is a major world problem.
   A. War has been an accepted process in the relations of nations since earliest times.

ms by defining basic  B. War is a complex social process.

1. War is a political, legal, and sociological concept; it has no generally accepted comprehensive definition but may be defined as a social institution that is a standardized, highly formalized and systematized method of carrying on negotiations between two collectivists by means of violence, intimidation, fraud, propaganda and, on some occasions, national persuasion.

2. Today wars may vary greatly in scope, weapons, tactics and objectives of the participants.

   a. Categories usually include: world conflicts versus limited area conflicts; nuclear and non-nuclear war; conventional and unconventional war; limited and total war.

-1-
TEACHING PROCEDURES

Initiatory Activities

1. Begin this unit by telling students they are going to study the problems of war and peace. Then ask them to list on a sheet of paper as many wars as they know about and to indicate, if they are able, the approximate time span of each conflict. Make a composite list on the blackboard and ask students to generalize about the frequency of war and peace. Students should be helped to realize that before such a generalization can be made it is necessary to define the concepts of war and peace.

2. Students should attempt to define war. Aid them by asking questions which will develop a continuum of conflict that will include nuclear war, conventional war, limited wars, espionage, propaganda, trade restrictions, etc. Use the list of conflicts constructed in activity #1 to illustrate some of these types of wars.
b. It should be noted that social pressures may fit into more traditional organizational structures. It may escalate and entail new characteristics.

A. IS CURIOUS ABOUT SOCIAL DATA AND HUMAN BEHAVIOR AND WISHES TO READ AND STUDY FURTHER IN THE SOCIAL SCIENCES.

C. Wars have had a profound impact on dual men and nations.

G. The world is a community of interdependent countries. Important happenings in one part of the world affect other parts.

A. FEELS A SENSE OF RESPONSIBILITY FOR KEEPING INFORMED ABOUT CURRENT PROBLEMS.
b. It should be noted that a particular war may fit into more than one category, and it may escalate and thus change characteristics.

C. Wars have had a profound influence on individual men and nations.
3. Tell the class that there is a common sense saying that "War never accomplished any good for the world." Ask: Do you agree? Can you think of any scientific progress that seems to come about as a result of war or preparation for war?

Now find out if students are aware that most of the map of the present day world was shaped by war. If not, present them maps of the United States, East-West Germany, North South Korea, etc. to illustrate the point.

4. Ask students to begin collecting materials, cartoons, editorials, poems, etc., which illustrate how our culture feels about war. These materials could be used to construct a bulletin board or used with an opaque projector in a later teaching procedure.

5. Ask: Do you believe that war will greatly affect your lives? If students are reluctant to discuss this topic, initiate the discussion by reading John O'Halloran's letter to his father from Viet-Nam. Then ask the students how they think John's experience in Viet Nam will affect his life.
class that there is a common sense saying
"never accomplished any good for the world." If you agree? Can you think of any scientific that seems to come about as a result of war ration for war?

out if students are aware that most of the map present day world was shaped by war. If not, them maps of the United States, East-West Ger- rth South Korea, etc. to illustrate the point.

ts upon people in

main idea in oral,
ual material.

D. Regardless of the measure used, financial cost, proportion of military deaths per thousand, or numbers of people involved, war in the 20th century has become more costly to individuals and nations.
6. Now tell students that you are going to present them with a variety of materials and that they are to identify the major ideas in each of these materials and to evaluate each of the presentations in terms of effectiveness and bias. All of these materials are used to illustrate the conflicting feelings present in our culture concerning war.

a. Use the overhead or opaque projector to present data concerning financial and human costs of war to society. After students have generalized about the increasing cost and impact on society, ask: How might the use of tactical nuclear, chemical, and bacteriological weapons affect costs in the future?

b. Play the recordings: *Blowing in the Wind* and *What Have They Done to the Rain*. Ask students to identify *Wind* (Bob Dylan)
that you are going to present them of materials and that they are to identify ideas in each of these materials and to of the presentations in terms of effectiveness. All of these materials are used to conflicting feelings present in our culminating war.

verhead or opaque projector to present earning financial and human costs of war to. After students have generalized about the cost and impact on society, ask: How use of tactical nuclear, chemical, and ogical weapons affect costs in the future?

See Appendix. For additional data, see Wright, The Study of War.

recordings: Blowing in the Wind and What Done to the Rain. Ask students to identify Wind (Bob Dylan, Columbia).
S. Checks on the bias of sources.

G. War has serious physical and psychological effects upon people in wartorn areas.

S. Identifies the main idea in oral, written, and visual material.

S. Checks on the bias and competency of sources.

G. War is a major world problem.

S. Identifies the main idea in oral, written, and visual material.

S. Checks on the bias and competency of sources.

S. Identifies the main idea in oral, written, and visual material.

S. Checks on the bias and competency of sources.

A. Evaluates events and conditions in terms of their effects upon individuals as human beings.
c. Read or have students read from Michihiko Haihja's *Hiroshima Diary, August 6, 1945,*

d. Have student read "Hypothetical Thermonuclear Strike," by Leila Brown and Ruth Leeds. After students have discussed the effect of this hypothetical nuclear attack, present them with data that reveals how much more damage would occur today because of bigger and improved technology.

e. Present students with materials you have asked them to gather (see activity # 4) concerning our culture's ambivalent attitude toward war. Ask them to evaluate this material as they have the other material shown.

f. You might also wish to have pupils read some of the war literature from earlier wars to better understand the impact of the war upon human beings. Or they might read non-fiction books which present this impact.

G. War is a major world problem.

S. Defines problems by isolating basic issues, defining terms, and identifying assumptions and values involved and the factual questions which need investigating.

E. Today, the problem of war confronts people with an important conflict.

1. In the past, war has been undesirable, though acceptable, achieving change in the international system. Recent technological advances have fostered the belief that the victors in a total war. The destructiveness of total war is evident, experts seem to agree that the economic costs of such a conflict are extremely high and that the real danger that all mankind may be destroyed.

2. Although it seems that a majority everywhere desire peace, or to avoid total war, there is wide disagreement regarding how and in what circumstances war should be avoided.

a. At the present time the United States both possess military power to destroy all of the rest of the na...
E. Today, the problem of war confronts most people with an important conflict in values.

1. In the past, war has been regarded as an undesirable, though acceptable means of achieving change in the international world; recent technological advances in weapons have fostered the belief that there would be no victors in a total war. Though estimates of the destructiveness of total war vary, all experts seem to agree that the human and economic costs of such a conflict would be extremely high and that there exists a real danger that all mankind might be destroyed.

2. Although it seems that a majority of people everywhere desire peace, or at least to avoid total war, there is wide-spread disagreement regarding how and under what circumstances war should be avoided.

a. At the present time the Soviet Union and the United States both possess sufficient military power to destroy each other and all of the rest of the nations of the
7. After students have gathered data from above sources (or selected sources, depending upon teacher's judgment) and combined data sheets, conduct a discussion to establish: (a) that war is of major concern as evidenced by a wide variety of materials which deal with the problem, (b) which media were most effective and why, and (c) that the problem of war involves "a conflict of values."

8. Have students try to identify major elements of the problem, such as:

(a) the problem of avoiding total nuclear war by maintaining a large deterrent force.

(b) the problem of technological change and nuclear testing.

To develop the last point, it might be useful to have students read "Fall-out I Feel in my Bones" by Issac Asinov. If students are unfamiliar with the questions about developing an anti-ballistic missile defense and the spread of nuclear weapons, the teacher may find it necessary to have them read about this problem. An excellent article, concise and not too technical, may be found in the Foreign Policy Association's Great Decisions of 1967 entitled "The Spread of Nuclear Weapons."

(c) the problem of war by accident.

(d) the danger of limited conflicts like Viet Nam developing into total wars.

Do not thoroughly discuss these problems at this time but move on to a broader overview of the unit.
students have gathered data from above sources, depending upon teacher's judgment, combined data sheets, conduct a discussion: (a) that war is of major concern as by a wide variety of materials which deal problem, (b) which media were most effective and (c) that the problem of war involves "a of values."

ent try to identify major elements of the such as:

- Problem of avoiding total nuclear war by main- a large deterrent force.
- Problem of technological change and nuclear war.
- The last point, it might be useful to have read "Fall-out I Feel in my Bones" by Issac Asinov, "Fall-out I Feel in My Bones," in Rosenberg, ed., Mass Society in Crisis, pp. 329-339.

Although students are unfamiliar with the questions eloping an anti-ballistic missile defense and of nuclear weapons, the teacher may find it to have them read about this problem. An article, concise and not too technical, may in the Foreign Policy Association's Great De- f 1967 entitled "The Spread of Nuclear Weapons."

- Problem of war by accident.
- Anger of limited conflicts like Viet Nam de- ing into total wars.

orouglly discuss these problems at this time on to a broader overview of the unit.
world. It is generally assumed that each of these nations is deterred from using its weapons by the knowledge that the other nation possess the "second-strike" capability to destroy it. This condition is usually referred to as the "balance of terror."

b. The existence of this "balance of terror" has "created" several related problems.

1) The balance of terror does not appear to be stable. Each super power seemse eager to achieve a technological breakthrough that will shift the balance in its favor. This behavior has produced a costly armaments race and created a potential health danger as a result of weapon testing. Another factor which has a tendency to make the balance of terror unstable is the spread of nuclear weapons to other nations.

2) The existence of these weapons creates the possibility that total war may occur as the result of mechanical failure or accident.

3) Limited conflicts, such as the Viet Nam War, may be escalated into total war through fear and/or miscalculation.

c. Although people of the world value peace, recent world events seem to indi-

cate that they may val

ism. even more. The

whether war is ever just

even more. The "gut" issues of our
cate that they may value self-determination, freedom, justice and the "various isims" even more. The question of whether war is ever justified is one of the "gut" issues of our time.
9. Another means of getting students to identify the basic overall problems of war might be to give students an attitude scale concerning various problem areas. Discuss the class results, noticing points of agreement and disagreement.

10. Give students a more thorough overview of the unit by handing out a student unit in question form such as the sample one in the appendix. Ask the class to develop additional sub-questions under each topic. Impress on student that they may make suggestions for further study of additional topics -- at a later time if they have no suggestions at this time.

To aid in this overview and to appeal to the special interests of individual students hand out a list of suggested topics for individual students. Some sample projects:

a. An individual report on some aspect of the Viet Nam War -- i.e., The Diem Regime 1954-63 or Ho Chi Minh, his life work, or problems of dealing with guerilla warfare.

b. Debate on topic "Is U.S. Involvement in Viet Nam Justified?" or "Does Man's Nature Make War Inevitable?"
ans of getting students to identify the basic problems of war might be to give students an article concerning various problem areas. Discuss results, noticing points of agreement.

A more thorough overview of the unit by a student unit in question form such as the in the appendix. Ask the class to develop sub-questions under each topic. Impress on them that they may make suggestions for further study topics -- at a later time if they have none at this time.

This overview and to appeal to the special individual students hand out a list of suggestions for individual students. Some sample individual report on some aspect of the Vietnam War -- i.e., The Diem Regime 1954-63 or Ho Chi Minh, his life work, or problems of dealing with guerilla warfare.

A debate on topic "Is U.S. Involvement in Vietnam Justified?" or "Does Man's Nature Make War Inevitable?"
S. Defines problems by isolating basic issues, defining terms, and identifying assumptions and values involved and the factual questions which need investigating.

S. Identifies various kinds of persuasion devices.

G. War is a major world problem.

A. IS CURIOUS ABOUT SOCIAL DATA AND HUMAN BEHAVIOR AND WISHES TO READ AND STUDY FURTHER IN THE SOCIAL SCIENCES.

A. FEELS A SENSE OF RESPONSIBILITY

A. Discussion of the causes of a war is likely to be controversial. Viet Nam has been one of the issues in our society. Because the causes of the Viet Nam vary with the individual or group.
War seems to be the result of multi-interrelated causative terms, and identifying causes. Various kinds of persuasive world problems.

A. Discussion of the causes of a contemporary war is likely to be controversial. The War in Viet Nam has been one of the most controversial issues in our society. Because of this controversy, the causes of the Viet Nam War seem to vary with the individual or group making the
c. Construction projects related to the U.N. membership, organization and function.

Be sure to give students sufficient time and guidance so that the projects will be useful to the entire class.

Developmental Procedures

11. Show film *The Hole*. This is an animated cartoon which concisely introduces the problem of accidental war. Ask students what they feel is the message. Is it an effective media?

12. Read to the students the one-act play "Pilot Lights of the Apocalypse" or ask the students to play the various roles and read the lines. Compare the situation developed in this playlet to the situation in Dr. Strange-love and Fail Safe. Since both of these novels have been made into movies, students should be familiar with their basic plots.

13. To provide students with general background on the Viet Nam War, show the filmstrip, *Southeast Asia*. During the filmstrip have students develop questions concerning Viet Nam about which they would like to learn more. Discuss the filmstrip with the students, seeking to de-
tion projects related to the U.N. member-organization and function.

ATION BEFORE ACCEPTING 
AND GENERALIZATIONS.

analysis. However, the more objective inter-
pretations usually state that this war is the 
result of several related factors.
velop the basic concept that Viet Nam is a limited war.

Now tell students you are going to use the Viet Nam War for an in-depth study of a limited war and an effort to discover the causes of this conflict. Use the blackboard to compile the questions that students say they wish to have more information about. Pose additional questions to the class, if necessary, to bring the study into focus.

14. There are a wide variety of materials available about Viet Nam. There are several quite objective factual accounts which provide a student with a basic background on Viet Nam -- its resources, people, history and problems. The reading level of these materials ranges from roughly average junior high to the college level. Devote a portion of class time to the introduction of these books and other materials. If the teacher examines these books carefully, he will observe that they include journalistic accounts and critical analysis by foreign and domestic critics of our policies. There is even, for interested able students, a book written by a North Vietnamese communist leader called Primer for Revolt which deals with the communist take-over in Viet Nam.

Devote several periods to reading and research. Students may wish to do special reports on this topic. If they do, strongly recommend that they use more than one source of information. This is particularly true in the case of the use of personal experience accounts written by soldiers and journalists. Remind students to evaluate their sources in terms of bias and competency, completeness of data, etc.

Add new materials as they appear.
S. Applies previously-learned concepts and generalizations to new data.

S. Draws inferences from maps.

G. Temperature is affected by the distance from the equator, distance from warm water bodies, wind patterns, including prevailing winds, air pressure systems, ocean currents, and physical features which block winds from certain directions.

G. Rainfall is affected by distance from bodies of warm water, wind direction, temperature, and physical features which block winds carrying moisture.

G. Vegetation is affected by temperature, rainfall, and soil.

G. Some things can be produced better in one place than another because of climate, resources, transportation routes, access to resources, access to markets, people's skills, etc.

G. People in most societies depend upon people who live in other regions and countries for goods and services and for markets for their goods.
15. Review basic geographic facts about Viet Nam. Project maps on the overhead projector or opaque projector and ask questions designed to help pupils establish the shape, size, terrain, climate, vegetation, and population of the area. Also present basic economic data to the class. Help students understand that North and South Viet Nam are complementary economic units.
G. Imperialism, and particularly attitudes of superiority by members of the imperialist country, give rise to feelings of frustration; when combined with the diffusion of nationalistic ideas from other countries, it helps give rise to feelings of nationalism.

S. Applies previously-learned concepts and generalizations to new data.

G. Nationalism usually makes people prepared to divert resources and effort into channels in which they will make a maximum contribution to national goals.

G. Perceived deprivation and the belief that such deprivation is not inevitable contribute to revolutionary and other protest movements.

S. Identifies differences in data.
16. Briefly discuss the early history of Viet Nam. Do not get bogged down in details, but establish that this area's relationship to China was that of a vassal and that Viet Nam history tends to reveal an anti-Chinese feeling as well as an anti-French feeling.

17. Since students in this grade have already studied units on problems of developing societies and Africa, a brief review of the concepts of colonialism, imperialism, nationalism and traditional society, should be all that is needed to help students make the application of their earlier learning to the Viet Nam situation. Make sure students see the necessity for establishing these relationships. Be sure to help them understand how the impact of a French rule affected the people of Viet Nam and that the French had hoped to integrate this colony into the French Union.

18. Individual student reports on the life and times of Boa Dai, Ho Chi Minh and Diem may be the simplest and

system are often given as the political causes of war.

5. In 1940, Willard Waller, editor of War in the Twentieth Century stated that there are many complex social, economic, and political factors which have something to do with the causation of war. They set off processes of change in society which unite with one another to form the major processes of going to war. This process Waller called "War fever." Some recent research supports Waller's theory.

a. Conflict begins with certain crises between nations, "incidents" in which there is a clash of the power systems of two or more nations.

b. These incidents set off conflict; at first the conflict-resolving mechanisms of the international system are able to hold the conflict within bounds but unable to eliminate the problem.

c. Public opinion in each nation comes to regard the other as a potential enemy.

d. Then "new incidents arise."

e. Agencies which mold and/or control public opinion begin to favor war.

f. War fever develops and the belief becomes accepted that war is necessary and justifiable at this time.
g. Recent peace research port Waller's theory b may be a self-fulfilling mechanism which is def beliefs causing one to to what one expects to setting in motion even about precisely what o

6. At the present time, there are no accepted definitive theories.

G. War seems to be the result of multiple, interrelated causes.

A. IS SCEPTICAL OF THEORIES OF SINGLE CAUSATION IN THE SOCIAL SCIENCES.
g. Recent peace research has seemed to support Waller's theory by showing how war may be a self-fulfilling prophecy, a mechanism which is defined as a set of beliefs causing one to act according to what one expects to happen, thus setting in motion events which bring about precisely what one sought to avoid.

6. At the present time, there is no widely accepted definitive theory of war.

s to be the result of mul-
terrelated causes.

ICAL OF THEORIES OF SINGLE
N IN THE SOCIAL SCIENCES.
26. Give pupils the following questions used in a survey of the American people. However, do not give them the figures for percentages of responses by the American people until after they have compiled percentages for answers from their own class.

Do you have any doubts about the desirability of peace? (No, 81%)

I do not think there is any use in working for peace despite of the current international situation. (Yes, 94%)

If peace were established, could our country coexist successfully with communism?

always be wars? (Yes, 66%)

Complete the survey and figure out the percentages for each question. Then have the pupils compare their answers to those of the survey.
A. IS CURIOUS ABOUT SOCIAL DATA AND HUMAN BEHAVIOR AND WISHES TO READ AND STUDY FURTHER IN THE SOCIAL SCIENCES.

S. Applies previously-learned concepts and generalizations to new data.

S. Sets up hypotheses.

G. The International System may be looked at as a series of dynamic power relationships.

G. The International System has several means and mechanism for resolving conflict, but none has been successful in preserving peace.

G. National power may be brought to bear upon other nations through many channels and mechanisms: force, diplomacy, international law, international organizations; the choice among them depends on the nature of the goal, its importance, the ef-

nternational System has severa; and mechanism for resolvinglict but none has been success-consistently in preserving.

nal power may be brought to upon other nations through channels and mechanisms: force, macy, international law, inter- nal organizations; the choice them depends on the nature of oal, its importance, the ef-
Discuss any differences that seem significant. Then discuss this data to develop the concept of the self-fulfilling prophecy.

27. A pupil or the teacher might prepare a bulletin board display or series of cartoons illustrating the multi-interrelated nature of the causes of war.

28. To arouse student interest in the international system and how it "works", play one of the simulation games available. The Foreign Policy Assoc. game called Crisis is challenging and realistic but not too complex.

The usefulness of any simulation game depends upon the follow-up discussion. Be sure to discuss what has happened, encouraging student to set up hypotheses about the international system to be tested further as they continue the unit and to analyze previously-learned generalizations in the light of the game.
fectiveness of the means, its acceptability, etc.

G. There are many sources of national power in dealing with other nations.

G. Military capacity is an important factor in the development of national power but not the only one or even the dominant one.

G. Military power as a means of national power depends upon the willingness to use it.

G. Force as a means of national power depends not only on the effective propenderance of force but the possibility that its use may alienate the support of other nations.

G. Differences in population, resources, and economy may be reflected in differences in national power; that is to say, they are important bases or components of national power.

G. Industrial capacity and energy sources are important bases of national power.

G. In the international system, inequalities of power only invite the use of some form of coercion. The balance of power strategy is based on this premise.
 Foreign policy considerations are affected by ideology, considerations of national self-interest, perceptions of power relationships between countries, expectations about how other nations will act, and domestic problems at home.

The International System may be looked at as a series of dynamic power relationships.

The International System has several means and mechanisms for resolving conflict but none has been successful consistently in preserving peace.

National power may be brought to bear upon other nations through many channels and mechanisms: force, diplomacy, international law, international organizations; the choice among them depends on the nature of the goal, its importance, the effectiveness of the means, its acceptability, etc.

There are many sources of national power in dealing with other nations.

International organizations created to date lack the universality of scope, legitimacy, and monopoly of sanctions associated with the con-

Relationships within the International System are free bargaining relations involving the interaction of states which do not necessarily accede to the legitimacy of any authoritative constraint.

a. Though they vary greatly, states must possess four characteristic elements: people, a territory, a government, and sovereignty.

1) At the present time, states recognize no superior form of human relationships.

2) They are governed by self-interest.

b. Relations in the International System are complex and include elements of cooperation as well as of conflict.

c. Each state begins its relationship with other states by determining its goals and strategies, i.e., its foreign policy, which is influenced by the nature of its specific state and its re
licy considerations are ideology, considerations, self-interest, and power relationships. Expectations about countries, expectations about nations will act, and problems at home.

The International System may be as a series of dynamic relationships.

The International System has several mechanisms for resolving but none has been successfully in preserving power may be brought to other nations through means and mechanisms: force, international law, international organizations; the choice depends on the nature of its importance, the effects of the means, its acceptability.

There are many sources of national dealing with other nations. National organizations created for the universality of legitimacy, and monopoly of associated with the con- 1. Relationships within the International System are free bargaining relationships involving the interaction of sovereign states which do not necessarily accept the legitimacy of any authoritative conflict settling mechanism.

a. Though they vary greatly, all states must possess four characteristics: a people, a territory, a government and a sovereignty.

1) At the present time, states are the supreme form of human organization.

2) They recognize no superior authority and are governed by self-interest.

b. Relations in the International System are complex and include elements of cooperation as well as of conflict.

c. Each state begins its relations by determining its goals and strategies, i.e. its foreign policy. Foreign policy is influenced by the nature of the specific state and its relation to in-
29. Students may read Frankel, *International Relations*, chs. 1, 2, 4, and pp. 182-192 and write a short essay comparing the International System to the other "systems" they have studied. Or have a group of students present a symposium on the International System. Then have the students write the suggested essay. Read aloud one or two quite different essays or ditto them for pupils. Discuss.

In addition do several of the following:

a. Have a pupil prepare a chart to illustrate the International System. Compare with Sorauf's chart on our political system.

b. Hold a class discussion on national foreign policy goals. Ask: What are your personal goals? Do you think national goals are the collection of all individual goals, or are they something different? What are some national goals?

Have pupils try to identify the national goals which might affect our foreign policy. Find out if pupils agree on the relative importance they place on different goals. Ask: How will views of presidents on such goals be likely to affect foreign policy?
may read Frankel, *International Relations*, chs. 181 and pp. 182-192 and write a short essay comparing the International System to the other "systems" they died. Or have a group of students present a paper on the International System. Then have the teacher write the suggested essay. Read aloud one or two different essays or ditto them for pupils.

In addition do several of the following:

- A pupil prepare a chart to illustrate the International System. Compare with Sorauf's chart on the political system.

- A class discussion on national foreign policies. Ask: What are your personal goals? Do you think national goals are the collection of all individual goals, or are they something different? What are some national goals?

- Pupils try to identify the national goals which affect our foreign policy. Find out if pupils realize the relative importance they place on different goals. Ask: How will views of presidents on such goals be likely to affect foreign policy?
cept of world government.

G. Each nation in the International System begins its relations by setting its own goals and strategies.

G. The process by which a nation sets its foreign policy is very much a part of its internal politics.

S. Applies previously-learned concepts and generalizations to new data.

G. Foreign policy considerations are affected by ideology, considerations of national self-interest, perceptions of power relationships between countries, expectations about how other nations will act, and domestic problems at home.

G. Executive decisions are limited by many factors: permis-sability, available resources, available time, available information, and previous commitments.

G. In the International System, inequalities of power only invite the use of some form of coercion. The balance of power strategy is based on this premise.

ternational soceity.

1) National values, national power, public opinion, decision-making process, numerous factors affect development of foreign policy.

2) Foreign policy is always a unique interplay of a unique interplay and external factors.

2. The power relationships within the International System are unstable.

a. The origins of the present system can be found in the Peace Treaties which established several states capable of maintaining a balance of power among the system which existed from the Peace Treaty to the post-World War I era but, due in part to totalitarian ideologies and technological change, the previous era was never.

b. After World War I the balance of power changed from Europe to one but, due in part to totalitarian ideologies and technological change, the previous era was never.

c. Attempts to establish a national order following failed for the fundamental the Great Powers that re had been reduced to two the United States and th
In the International Society, a nation's relations by its own goals and strategies. by which a nation sets its foreign policy is very much a matter of internal politics.

Obviousl -learned concepts of new data.

Policy considerations are factors: ideology, consideration of self-interest, realizations to new data.

Policy considerations are ideological, considering the self-interest, expectations of power relationships entrapped, expectations of other nations will act, and c problems at home.

Decisions are limited by resources, available time, information, and previous decisions.

International System, influence of power only invite some form of coercion. of power strategy is its premise.

International Society.

1) National values, national interest, power, public opinion, and the decision-making process are among the numerous factors affecting the development of foreign policy.

2) Foreign policy is always the result of a unique interplay between domestic and external factors.

2. The power relationships within the International System are unstable and dynamic

a. The origins of the present system may be found in the Peace Treaty of Westphalia which established several major European states capable of maintaining an equilibrium of power among themselves. This system which existed from 1648-1914 is often called the balance of power system.

b. After World War I the balance of power system changed from European to a global one but, due in part to the advent of totalitarian ideologies and major technological change, the stability of the previous era was never restored.

c. Attempts to establish a new stable international order following World War II failed for the fundamental reasons that the Great Powers that really mattered had been reduced to two super-powers; the United States and the Soviet Union.
Are the domestic goals of our society compatible with our foreign policy goals in Vietnam? Can we fight war on poverty and the war in Vietnam at the same time?

c. Review what pupils have learned in earlier courses about ways in which domestic factors affected foreign policy decision-making. Discuss domestic factors which seem to be affecting policy related to the war in Vietnam.

d. Review the factors limiting executive decision-making as they relate to foreign policy decisions by nations.
G. Diplomacy, the bargaining and negotiation of states over matters of mutual interest, is most successful where there is relative equality of power among the participants.

G. Compromise is most likely to occur where there is a relative equality of power, and therefore something approaching a deadlock in the decision.

G. Continued engagement in conflict tends to bring about the acceptance by both parties of common rules regulating the conduct of the conflict.

G. International law lacks the enforcement machinery of national law and thus is useful in resolving disputes only if the sovereign states involved agree to adhere to it.

B. Diplomacy and international law, means of resolving conflict in the international system, have several and have enjoyed only limited success.

1. Diplomacy is the direct bargaining of nations over matters of mutual interest.

   a. It is not an instrument for total a state's foreign policy when they conflict with the interest of other states.

   b. Compromise is related to the power of the disputants, and it is most likely to succeed if there is a relative equality of power between the disputants and their supporters.

   c. Many social scientists maintain that the differences between the old and the new diplomacy are not relevant and the post-war bipolar system.

   d. Influenced by the revolution of anti-colonialism, imperialism, and the bipolar system to assume new characteristics, it is not clear as yet exactly the nature of the new system.
the bargaining and negotiation of nations over matters of mutual interest, is most successful if the participants is relative equality of power among the disputants and their supporters. Those who advocate diplomacy believe compromise is related to the relative power of the disputants; thus diplomacy is most likely to succeed where there is a relative equality of power among the disputants and their supporters.

b. Many social scientists make a distinction between the old and the new diplomacy. The differences between the old and the new diplomacy are not revolutionary but are significant.

d. Influenced by the revolutionary forces of anti-colonialism, imperialism, nationalism, and the bipolar order began to assume new characteristics though it is not clear as yet what is the exact nature of the new system.

B. Diplomacy and international law, the traditional means of resolving conflict within the international system, have severe limitations and have enjoyed only limited success.

1. Diplomacy is the direct bargaining and negotiation of nations over matters of mutual interest.

a. It is not an instrument for achieving in total a state's foreign policy objectives when they conflict with the national interest of other states.

b. Compromise is related to the relative power of the disputants; thus diplomacy is most likely to succeed where there is a relative equality of power among the disputants and their supporters.

c. Many social scientists make a distinction between the old and the new diplomacy. The differences between the old and the new diplomacy are not revolutionary but are significant.
30. Do several of the following to develop an understanding of diplomacy and international law.

a. A student may read and discuss the material in Frankel, chs 5 and 6. Then discuss the meanings and limitations of diplomacy and international law as conflict-resolving agencies.

b. Case studies that treat diplomacy and international law may be found in Stoessinger and Westin. These cases may be read and discussed by the entire class or reported on by individual students. Cases illustrate the distinction between old and new diplomacy and the limitations of diplomacy and international law in the resolution of international conflict.

c. Show the film Guilty or Not Guilty on the Nuremberg trials. Discuss the implications for the future of international law. Ask pupils to analyze the argument used by dissenters to war in Viet Nam that these cases clearly hold the individual responsible for carrying out immoral dictates of his nation-state.

Frankel, *International Power and Order*, p 179-211.

Stoessinger and Westin, *Power and Order*, p 179-211.

Film: *Guilty or Not Guilty* 20 min., Film Form
The following to develop an understanding and international law.

by read and discuss the material in 5 and 6. Then discuss the meanings and of diplomacy and international law as solving agencies.

that treat diplomacy and international found in Stoessinger and Westin. These are read and discussed by the entire class on by individual students. Cases il-

Ask pupils to analyze the argu-

dissenters to war in Viet Nam that clearly hold the individual responsible for out immoral dictates of his nation-
1) The new diplomacy is less secret than the old.

2) The diplomacy makes greater use of multilateral negotiation in addition to the more traditional bilateral negotiation.

3) Summit or personal diplomacy, though not new, has greatly increased in frequency.

2. International law consists of recognized and binding customs, treaties and conventions concluded by states and decisions of international tribunals.

a. Although the international system does not have the benefit of a legislature, there is a large body of international law. Since 1947 the United Nations has maintained an International Law Commission charged with promoting the progressive development and codification of international law.

b. As a system of law, international law lacks the enforcement machinery of positive national law and thus is useful in resolving disputes only if the disputants agree to adhere to it.

c. The evaluation of the significance of international law varies greatly.
   1) Some regard it as complete sham.
   2) Others claim that if lawyers were only given a chance they could craft a
d. The class should attempt to assess the problems involved in settling disputes such as the conflict in Viet Nam where each side seems determined to negotiate only from a "position of strength." To stimulate this discussion, the teacher might present the class with one of the many cartoons depicting the Paris Peace talks on Viet Nam.

e. Have a pupil prepare a chart or bulletin board comparing international law with national law. Use the display to establish the important differences between these two types of law.

f. Show the film David Schonebrun on Viet Nam -- How Did We Get In? This film offers suggestions concerning the solution of the Viet Nam problem.
Should attempt to assess the problems in settling disputes such as the conflict in which each side seems determined to win only from a "position of strength." To this discussion, the teacher might preface with one of the many cartoons depicting the Paris Peace talks on Viet Nam.

I suggest preparing a chart or bulletin board comparing international law with national law. Use this chart to establish the important differences between these two types of law.

Film: David Schonebrun on Viet Nam -- How in? This film offers suggestions concerning a solution of the Viet Nam problem. Film available from American Documentary Films, 33 min.
G. Struggle may bring together otherwise unrelated groups. Coalitions and temporary associations will result from conflict where primarily pragmatic interests of the participants are involved. (Nations may pool their power behind common goals in varying systems of alliances and combinations.)

G. Past and present international organizations have been successful in dealing with social, economic, and/or technical problems but have had limited success in political disputes and in providing for the collective security of their members.

A. IS SCEPTICAL OF PANACEAS.

S. Rejects all-none (black-white) reasoning.

S. Identifies basic assumptions.

C. More recently states have tried and institutionalized their role variety of international organizations.

1. Single purpose organizations. World War I sought to increase in the international System approaches: technical cooperation and collective security.

   a. The Universal Postal Union and other single purpose organizations were highly successful in dealing with technical problems.

   b. Collective Security organizations such as the Holy Alliance, and Conferences, which established new arrangements, were less successful.

2. The League of Nations and the United Nations differ from earlier organizations in scope and neither may be considered "ideal.

   a. The League of Nations, the purpose international organization struggled with the problems of the international system for decades before it failed.

   1) The League of Nations, basis of past experience.
May bring together other-ated groups. Coalitions ary associations will re-conflict where primarily interests of the partic-involved. (Nations may power behind common goals systems of alliances and ns.)

resent international or-s have been successful with social, economic, technical problems but have d success in political and in providing for the security of their mem-

AL OF PANACEAS.

1. Single purpose organizations founded before World War I sought to increase stability in the international System by two separate approaches: technical cooperation and collective security.

a. The Universal Postal Union, the International Union of Weights and Measures and other single purpose international organizations were highly successful in dealing with technical problems of mutual concern.

b. Collective Security organizations such as the Holy Alliance, and the Hague Conferences, which established machinery for arbitrating disputes and reducing armaments, were less successful.

2. The League of Nations and the United Nations differ from earlier international organizations in scope and purpose, but neither may be considered "world governments."

a. The League of Nations, the first multi-purpose international organization, struggled with the problems of the international system for more than two decades before it failed.

b) The League of Nations, founded on the basis of past experience, was not a
31. Do several of the following to develop an understanding of the role of international organizations in the International System.

a. Individual student may show chart of international organizations before World War I, briefly indicating their nature, duration, and degree of success. He should give the work of one organization in some detail by way of illustration. Discuss some of the organizations which are still in existence in terms of how they affect the American people.

b. Show the film World War I: Building the Peace. Discuss the origins of the League and review the causes of its failure.

c. Have student report on the success and failure of the League of Nations. Discuss reasons for failure with the class.

class.
world government but an agency for securing the continuous discussion of international problems by sovereign states.

2) The organizational structure of the League of Nations consisted of a council, an assembly, a Secretariat and special organizations to deal with economic, social and educational problems.

3) The League of Nations during its more than two decades of existence dealt with many types of problems and disputes.

a) The work of special organizations was highly successful.

b) The League dealt with several political disputes, some with success.

c) The final failure of the League of Nations was due to many factors; one of the chief reasons for its demise was the failure of its members to employ, respect and rely upon it in critical situations.

b. In 1945 the United Nations was established to maintain peace and security by methods of collective action, promote international cooperation for the solution of economic and social problems and
d. Show the film *We the People* which describes the founding of the United Nations at San Francisco or *Workshop for Peace* which has some beautiful shots of the U.N. building and does a highly satisfactory job on the organizational structure.
Films:  
- We the People
- Young Am., 3 min.
- Workshop for Peace, United Nations, 20 min.

*We the People* which describes the United Nations at San Francisco for Peace which has some beautiful U.N. building and does a highly job on the organizational structure.
c. The structure and role of the organs of the United Nations were similar to those of the League of Nations; the Uniting for Peace Resolution and the actions of the Secretary General have modified their functions, though the original Charter has not been formally amended.

1) There are six principal organs of the United Nations: The General Assembly; the Security Council; the Secretariat; the Economic and Social Council; the Trusteeship Council; and the International Court of Justice.

a) Many subsidiary organizations have been created to deal with economic, social, and medical and educational problems.

b) The validity of regional organizations, such as the Organization of American States, is also recognized in the United Nations Charter.
of the U.N. If you use the first film, discuss the point of view of the film maker. How optimistic was he about the chances for peace? What assumptions are made about the U.S. and the U.S.S.R. (Great Powers)?

e. An individual student might prepare and explain a chart comparing the organization of the League of Nations and the United Nations. Have class examine and then discuss: Do you think the U.N. structure provided much additional likelihood for peace? Why or why not?

f. Review what pupils learned in the unit on "The Underdeveloped Countries" about the work of specialized U.N. agencies. Discuss: How effective do you think they would be in promoting peace? Why?

If pupils did not study these organizations earlier, show films which deal with the work of some of the social-economic organizations. Compare these activities and "success stories" to those of the specialized agencies set up by the League of Nations.

Or you might have individual reports on some of these U.N. agencies.
If you use the first film, discuss the of view of the film maker. How optimistic was out the chances for peace? What assumptions de about the U.S. and the U.S.S.R. (Great l)?

That All May Learn, U.N. ASSEO, (or UNESCO).
Battle for Bread, U.N. ASSEO, (or FAO).
2) The Security Council was intended to have the "primary responsibility for the maintenance of international peace and security," but it has on several occasions been unable to act due to the veto power possessed by the permanent members. Therefore, on November 3, 1950, the Uniting for Peace Resolution was passed. It states in part that: "...if the Security Council, because of lack of unanimity of permanent members fails to exercise its primary responsibility in any case where there appears to be a threat to world peace, breach of peace or act of aggression, the General Assembly shall consider the matter immediately with a view to making appropriate recommendation to members for collective measures including in the case of a breach of peace or an act of aggression the use of armed force when necessary, to maintain or restore international peace and security."

3) Mr. Li and Mr. Dagornsenkjoeld while Secretary General of the United Nations did not confine their activities to administration but used this position in a political way to advance the cause of peace.

a) They intervened in debates, influenced agenda making, held conferences with delegations on pressing
g. Have a student give a report on "The Security Council: The Veto and the Superpowers". Or present a brief, informal lecture on the "power problem" and the U.N.

h. Have students read "Collective Security and the War in Korea". This case study is brief but raises problems for student analysis related to the effect of the United Nations' resolution on the collective security machinery of the United States and the effectiveness of the United Nations in matters involving collective security.

Or show the film The United Nations in Korea.

In the class discussion which follows, relate the onset of the Korean War to the simulation game of Crisis. Also compare it to the war in Viet Nam.

i. Have a student report on the career of a U.N. soldier, Major General Carl Van Horn. Discuss the success of U.N. "police actions" in the light of Van Horn's experience.

j. Have a student give a report on "The Secretary General: The American and Soviet Attacks on the Secretariat 1952 and 1960". Discuss the role of the Secretary General since the foundation of the U.N. Or an individual student might report on the life of Dag Hammarskjöld.

issues, made public speeches on current problems and offered suggestions in their reports to the General Assembly.

b) The political activities listed above antagonized the Soviet Union which since 1960 has sought to replace the Office of Secretary General by a commission of three members, one representing the Communist nations, one the West, and one the uncommitted countries. Each member could veto all important decisions.

D. The United Nations has been successful in dealing with social and economic problems but has had limited success in settling political disputes and providing for the collective security of its members.

1. Though overshadowed by the political and security affairs, United Nations organizations such as UNESCO, FAO, UNICEF and WHO working with economic and social affairs have affected the lives of hundreds of millions of people.

2. Since 1945, several disputes have been brought to the United Nations. The Palestine Question, the Race Problem in the Union of South Africa, Korea, the Suez Canal Crisis of 1956, the Hungarian Question, and the Congo Crisis of 1960 illustrate some of the U.N.'s more prominent successes
k. If pupils have not studied the Center's earlier courses, have individual students report on selected political disputes with which the United Nations has dealt such as: the Suez Crisis, Hungary, and the Congo Crisis. Have the class discuss the reports to determine the degree of success in each case and the apparent reasons for the success or failure.

If pupils have studied the earlier courses, merely review these incidents at this time and then analyze the degree to which the U.N. was successful in dealing with them.

1. Have a student prepare and present a map examining membership of the U.N. and the League. Ask: How nearly has the U.N. come to the goal of universal membership? Is this goal a necessary and realistic one?
The instruments of national power are not mutually exclusive; a country may combine elements of collective security with balance and failures.

3. The United Nations has limited success in dealing with the concept of world order.

E. Neither the League of Nations nor the United Nations has had the universality of legitimacy and monopoly associated with the concept of world order.

1. Although the membership of the United Nations is more inclusive than that of the League of Nations, not all of the nations are members.

2. The United Nations possesses the attributes associated with political entities: the power to pass laws, impose it on citizens and punish for the violation of its laws.

3. Although the United Nations possesses economic, diplomatic, and sanctions, it cannot make decisions without the consent of the major states of the world and relies upon free and open discussion and conciliation to set

G. The instruments of national power are not mutually exclusive; a country may combine elements of collective security with balance and failures.

IV. The contemporary foreign policy of the United States attempts to preserve peace and

A. Our present policy combine
and failures.

3. The United Nations has enjoyed extremely limited success in dealing with disarmament issues.

E. Neither the League of Nations nor the United Nations has had the universality of scope, legitimacy and monopoly of sanctions associated with the concept of world government.

1. Although the membership of the United Nations is more inclusive than the League of Nations, not all of the nations of the world are members.

2. The United Nations possesses virtually none of the attributes associated with sovereign political entities: the power to tax, to pass laws, to impose its will directly upon citizens and to punish individuals who violate its laws.

3. Although the United Nations does possess economic, diplomatic and limited military sanctions, it can not match the power of the major states of the world and normally relies upon free and open debate, mediation, and conciliation to settle disputes.

IV. The contemporary foreign policy of the United States attempts to preserve peace through power.

A. Our present policy combines elements of collective security with balance of national power.
m. Have the class form a model United Nations and discuss one of the following issues: (1) the admission of Communist China (if not done in eleventh grade course), or (2) financing peace-keeping operations. Or use some other current issue.

n. Read to the class or have them read "Abolish the United Nations" or "United Nations--A Blight on America." Have pupils make a list of important charges. Someone might also give a report on rightest criticism of the U.N., or review their criticisms from unit one if their viewpoint on the U.N. was explored in the unit.

o. To summarize this section of the unit, show the film U.N. in Revolutionary World. This film points out briefly what the U.N. is and is not, what it has done, and some of its short-comings.

Or read Gross, "United Nations Record and United Nations Dilemma."

32. Review basic elements of present U.S. foreign policy by having students read "The Western Response to the Challenge of Communism." This account traces briefly the development of policy and examines some of the
the class form a model United Nations and discuss one of the following issues: (1) the admission of Communist China (if not done in eleventh grade), or (2) financing peace-keeping operations. Have some other current issue.

Tell the class or have them read "Abolish the United Nations" or "United Nations--A Blight on the U.S." Have pupils make a list of important issues. Someone might also give a report on U.S. criticism of the U.N., or review their criticisms from unit one if their viewpoint on the U.N. was explored in the unit.

Summarize this section of the unit, show the film in Revolutionary World. This film points out what the U.N. is and is not, what it has done, and some of its shortcomings.

Read Gross, "United Nations Record and United Nations Dilemma."

of power concepts.

G. Foreign policy considerations are affected by ideology, considerations of national self-interest, perceptions of power relationships between countries, expectations about how other nations will act; and domestic problems at home.

A. IS COMMITTED TO THE FREE EXAMINATION OF SOCIAL ATTITUDES.

S. Identifies and examines assumptions to decide whether or not he can accept them.

B. This policy is based upon the assumptions about the nature of international system:

1. The power urge is inherent in states.

1. This policy calls for such of power that any potential be deterred from resorting

2. Collective security aspects include support of the UN, the development of regions, Europe, Asia and the Middle

1. The power urge is inherent in states.

a. Fundamentally, though the United Nations is an institution for implementing, rather than the organization, molds it.

b. The United States gives military aid to its allies, a policy of containment.

3. To maintain a favorable balance of power, the United States also has a costly defense establishment, a wide variety of weapons.
r concepts.

Policy considerations are
influenced by ideology, considerations of national self-interest, perceptions of relationships between countries, expectations about how other states may act, and domestic problems.

It is against this background that the United States has proceeded with its post-World War II foreign policy.

The United States calls for the concentration of power in the hands of a single nation. This power can be effective in deterring the potential aggressor from the resumption of war.

Collective security aspects of this policy include support of the United Nations and the development of regional alliances in Europe, Asia, and the Middle East.

1. The United Nations is viewed as an institution for implementing our policy rather than the organization which molds it.

2. The United States gives economic and military aid to its allies and "friendly neutrals" fundamentally to implement its policy of containment.

3. To maintain a favorable balance of power, the United States also has a large and costly defense establishment which includes a wide variety of weapons.

This policy is based upon the following basic assumptions about the nature of people and the international system:

1. The power urge is inherent in people and in states.
problems of our alliance system. Another brief reading that might serve the same purpose is that by Ross. Or show the film U.S. Foreign Policy in a Revolutionary World. You may wish to combine readings and the film and compare them with each other. (Be sure to draw upon what pupils learned in grade eleven and in the unit on Africa.)

33. Have an individual student report on the military aspect of our foreign policy. This report should include the problem of preparing for various types of conflicts and the problem of accidental war.

34. If the discussion has not already brought out the assumptions behind this power policy, ask pupils about the assumptions at this point. Perhaps ask each pupil to list them. Then compare lists and discuss. Ask: To what degree do you think you can accept these assumptions?
our alliance system. Another brief reading
to serve the same purpose is that by Ross. Or
may wish to combine readings and the film them with each other. (Be sure to draw

a Revolutionary World, In-
diana University.

Spanier, World Politics in
An Age of Revolution.
2. The power urge expresses itself as military power.

3. States operate in terms of self-interest as defined by power.

4. Hostility and conflict of interest are a normal part of the international system.

5. War arises out of these clashes of self-interest.

6. War can not be abolished but states can be deterred by counterpower.

7. The probability of nuclear war is moderate so long as we possess deterrent power.

8. The probability of aggression by Communist or other states without nuclear deterrence is high.

9. Sweeping changes in people or the international system is very unlikely.

10. The probability of serious disarmament in the foreseeable future is very low.

11. There is enough time under the present policy to find alternatives to nuclear war. Deterrence buys more time.

12. We should work for short run stability and hope for basic change in Communist societies.
S. Identifies and examines assumptions to decide whether or not he can accept them.

S. Identifies value conflicts.

S. Considers possible consequences of alternative courses of action.

G. The policy of peace through power has been criticized by diverse groups who advocate very different solutions to the problem of war.

G. Each solution to the problem of war is based upon different assumptions about the cause of war, the probability of total war, estimates of its destructiveness, and value choices.

S. Identifies and examines assumptions to decide whether or not he can accept them.

C. When applied to specific situations as Viet Nam, our policy has difficulties and limitations.

1. We need to establish a police force since we do not have sufficient police the entire world.

2. It is difficult to maintain policy and a private response to each.

3. Controlling the escalation that neither we nor our allies into an unlimited war.

4. Learning to live with difficulties and/or problems and a "garrison state" may restructure in our "way of life."

V. Our contemporary foreign policy is criticized by many groups.

A. The Forward Strategists accept assumptions and predictions of deterrence and/or peace. They feel that our policy should be cut. The Forward Strategists feel that nuclear violence is merely the tension of conventional violence.

1. We should accept the risks and seek to bring about Communist states.
cies and examines assumptions to determine whether or not he can accept them.

C. When applied to specific world problems, such as Viet Nam, our policy has certain inherent difficulties and limitations.

1. We need to establish a priority of interests, since we do not have sufficient power to police the entire world.

2. It is difficult to maintain enough flexibility in policy and arms to make the appropriate response to each situation.

3. Controlling the escalation of any conflict so that neither we nor our adversary is "forced into an unlimited war," is a serious problem.

4. Learning to live with the tensions, sacrifices and/or problems associated with the "garrison state" may require adjustments in our "way of life."

V. Our contemporary foreign policy has been criticized by diverse groups who advocate very different solutions to the problem of war.

A. The Forward Strategists accept the basic assumptions and predictions of our policy of deterrence and/or peace through power but feel that our policy should be victory-oriented. The Forward Strategists believe that nuclear violence is merely a quantitative extension of conventional violence.

1. We should accept the risk of total conflict and seek to bring about the downfall of the Communist states.
35. Have a class discussion regarding the problems of our present foreign policy in regard to specific problems (e.g., Berlin, Viet Nam, etc.) Analyze the assumptions behind current policy.

36. Do several of the following activities to develop an understanding of criticisms of our present policy.

a. Have the class read Herzog. Give students work sheets which require them to identify criticism made of our present policy, the assumptions of each group discussed, and their specific policy recommendations.

Or bring in a number of articles and books for pupils to read. Have class identify criticisms and counter-proposals and analyze assumptions behind each.)
Discussion regarding the problems of our foreign policy in regard to specific problems in, Viet Nam, etc.) Analyze the assumptions of our policy.

- of the following activities to develop an understanding of criticisms of our present policy.

- the class read Herzog. Give students work which require them to identify criticism of our present policy, the assumptions of the group discussed, and their specific policy recommendations.

S. Identifies value-conflicts.
S. Considers possible consequences of alternative courses of action.
S. Differentiates between descriptive, causal, predictive, and normative questions and statements.
S. Detects inconsistencies.

A. VALUES OBJECTIVITY AND DESIRES TO KEEP HIS VALUES FROM AFFECTING HIS INTERPRETATION OF THE EVIDENCE, ALTHOUGH RECOGNIZING THE IMPORTANT ROLE OF VALUES IN THE PROCESS OF MAKING DECISIONS ABOUT PROBLEMS WHICH DEMAND ACTION.

A. VALUES INSTITUTIONS AS A MEANS OF PROMOTING HUMAN WELFARE, NOT BECAUSE OF TRADITION.

A. RESPECTS EVIDENCE EVEN WHEN IT CONTRADICTS PREJUDICES AND PRECONCEPTIONS.

A. IS COMMITTED TO A FREE EXAMINATION OF SOCIAL ATTITUDES AND PUBLIC POLICY.

A. IS SCEPTICAL OF PANACEAS.

2. We must reject disarmament if not consistent with victory.

3. We should seek to build of North Atlantic share and this union will strengthen against Communist domination.

4. We should fear defeat by miltary means and this union will strengthen.

B. Another group of critics, the Experimentalists, challenge the premises, assumptions, and our present policy.

1. The Experimentalists hope to end the arms race, reduce the level of nuclear arms, establish world community feeling, and establish some form of world government for conflicts. The methods they propose are varied.

a. Many nuclear physicists advocate that we adopt a policy of minimum exchange to develop a new concept.

1. Advocates of minimum income tax.
2. We must reject disarmament proposals because they are not consistent with the goal of victory.

3. We should seek to build a strong integrated North Atlantic community because the nations of North Atlantic share our basic values and this union will strengthen our defense against Communist domination.

4. We should fear defeat by Communists as much, if not more, than a nuclear war.

B. Another group of critics, who may be called the Experimentalists, challenge the basic premises, assumptions, and predictions of our present policy.

1. The Experimentalists hope to find a way to end the arms race, reduce the existing level of nuclear arms, develop a degree of world community feeling and harmony of interests, and establish some form of regional or world government for resolving state conflicts. The methods advocated for achieving these objectives vary greatly.

a. Many nuclear physicists and other scientists advocate that we begin by adopting a policy of minimum deterrence and stress the functional approach and/or cultural exchange to develop the world community concept.

1) Advocates of minimum deterrence be-
b. A pupil might prepare a series of cartoons in support of or in criticism of the different policy positions.

c. A committee might prepare a series of bulletin board displays on "Which Road to World Order?"

d. Perhaps invite to class a series of speakers including both critics and supporters of current policy. Or have pupils interview such individuals and report back to class (perhaps in the form of role-playing the interview).
lieve that mutual annihilation is an automatic deterrent and that our present policy which seeks to make the deterrent credible at every level precludes arms reduction.

2) The functional approach aims to use our present technological knowledge and resources to eliminate world poverty, hunger, ill health and fear. They believe that when these goals are reached, the causes of war will be minimized.

b. Other scientists and social scientists feel that we should attempt to implement a plan of Graduated Reciprocation in tension reduction; seek to change the attitudes and ideas which Americans have about Communist societies; begin a policy of disengagement; or begin to study and plan how we may avoid the severe economic penalties that seem to be implicit in the policy of arms reductions; or some combination of the above proposals.

c. Groups which advocate the creation of world government, such as the American Association for the United Nations and the United World Federalists, may be considered Experimentalists.

1) All advocates of world government do not agree as to the type of government and methods of achieving it.
2) Perhaps the most widely known are the United World Federalists who wish to amend the Charter of the United Nations to create a limited, federal world government.

2. Experimentalists, though a heterogeneous group, make similar assumptions about man and the nature of international society. These assumptions, which differ sharply from those of advocates of our present policy, include the following:

   a. The power urge in man is not inevitable.

   b. War arises out of misunderstanding and habitual reliance on military systems.

   c. States can be made to see that their self-interest lies in the absence of military systems.

   d. Large deterrent forces produce fear and increase the threat of nuclear war which is already very high.

   e. We should make generosity the key aspect of our negotiations with Communist states. This will reduce fear and tension in the world.

   f. The risk of aggression by Communist states is low; therefore we can hedge against this eventuality with minimum deterrence.
g. Serious disarmament and sweeping changes in the state system can be achieved.

h. War can be abolished.

i. Since the habit patterns of people and states are deeply ingrained, we should move with deliberate speed.

j. If our present policies are continued, we will have nuclear war in the near future; therefore, we must work for a drastic change in the "war system" now.

3. The achievement of goals outlined by the Experimentalists will be difficult, but they agree we must experiment while there is time. These suggestions include the following:

a. We should offer one thousand of the most important Communists from underdeveloped countries a six month, all-expense-paid trip to the United States to win them over.

b. We should put in a nursery in the lobby of the United Nations.

c. We should buy obsolescent machinery from American factories and give it away.

d. Perhaps we might form a joint U.S.-U.S.S.R. international disaster corps.

f. We should be willing to accept an "unacceptable" disarmament proposal.

4. The proposals of the Experimentalists have been questioned by supporters of our present policy.

a. It is charged that proposals of the Experimentalists are really surrendering on the installment plan.

b. They claim that the Experimentalist assumption that much of the conflict between the United States and the Soviet Union is due to lack of understanding is false.

C. The Peace Movement, though split by a dozen rival doctrines and sects, is highly critical of our present policy.

1. The one principle on which members of the Peace Movement seem to agree is the efficacy of education and mass action for a warless world. Despite fragmentation, two major groups may be identified.

a. Survivalists are those who, regardless of their personal beliefs, are pragmatists about peace and the peace movement and hope to find a program that will be
e. Have pupils look at list of critics of foreign policy and try to group them into two groups. Compare the class' list with other people's groupings. Once more, analyze and discuss the assumptions of each group.
politically accepted. The development of world government and complete disarma-
ment are to be achieved by education, propaganda, and reason.

b. Pacifists are those who would use non-
violence to bring about revolutionary changes in human affairs. People in this group include those who would support unilateral American disarmament only if convinced that it was necessary, as well as those Anarchist and Pacifists who wish to abolish the nation-state.

2. Members of the Peace Movement accept many of the following assumptions and predictions:

a. There is no "natural" power urge present in man.

b. Military power is not a symptom of hostility but a cause of it.

c. War is a habit and can be abolished.

d. The risk of nuclear war at present is very high.

e. Nuclear disarmament is the only hope; if need be, disarmament should be unilateral.

f. The risk of Communist aggression is low, but we should be prepared to meet it with non-violent means.
g. Military power should be distributed in an international context.

3. The policies advocated raise certain basic questions:
   a. What is the relationship between pacifism and nationalism?
   b. Is any nation going to war, unless compelled to do so?
   c. What would be the effect of disarmament upon the world economy of the United Nations?
   d. Is non-violence an expression of genuine interests, or is it a facade for hidden motives?

4. To the above and other questions presented by supporters of the Peace Movement, it is the alternative to other approaches.

S. Identifies basic assumptions.
   A. Attempts to identify, examine and clarify his own values and to work out a consistent value system.
   A. Values objectivity and desires to keep his values from affecting his interpretation of evidence, although
g. Military power should be either centralized in an international institution or dispersed.

3. The policies advocated by the Peace Movement raise certain basic questions.

a. What is the relationship between personal Pacifism and national Pacifism?

b. Is any nation going to disarm unilaterally unless compelled to do so?

c. What would be the effect of unilateral disarmament upon the self-confidence and the economy of the United States?

d. Is non-violence an effective way to defend the interests one holds to be vital?

4. To the above and other questions, the supporters of the Peace Movement reply: "What is the alternative to our proposals?"
Culminating Procedures

37. Each student should write a brief report advocating his policy or model for the "solution" of the problem of maintaining world order. He should be sure to include the following:

a. His basic assumptions about the nature of man, war, etc.

b. His choice of values from among those involved in the value-conflicts related to the problems of war.
RECOGNIZING THE IMPORTANT ROLE OF VALUES IN MAKING DECISIONS ABOUT PROBLEMS DEMANDING ACTION.

S. Having studied the causes of the problem, examines the possible consequences of alternative courses of action, evaluates them in the light of basic values, lists arguments for and against each proposal, and selects the course of action which seems most likely to prove helpful in achieving the desired goal or goals.

S. In considering situations calling for action, decides whether or not one should act upon the basis of a theory by considering the extent to which the theory seems verified and the risks of acting or failing to act.

S. Generalizes from data.

G. War is a major world problem.

G. Wars have an important economic impact upon people.

G. War has serious physical and psychological effects upon people in torn areas.
and peace.

c. His predictions about the probable consequences of alternative courses of action and reasons for his predictions (citing of other non-normative statements).

d. The relationship of his predictions to his value choices.

Afterwards, compare choices and reasons for choices. Discuss: Are differences in alternatives chosen by members of this class due to differences in value positions or to differences in predictions about the probable results of certain courses of action? Does it matter whether the differences are over normative or non-normative questions? Why?

38. Perhaps repeat the attitudes scale used early in the unit. Compare results now with those earlier. Are there any changes? Why or why not?

39. Hold a class discussion which attempts to assess the seriousness of the problem of war and the adequacy of present and advocated policies. Discussion should seek to relate choices to values held by various groups.
A. IS SCEPTICAL OF THE FINALITY OF KNOWLEDGE; CONSIDERS GENERALIZATIONS AND THEORIES AS TENTATIVE, ALWAYS SUBJECT TO CHANGE IN THE LIGHT OF NEW EVIDENCE.

A. IS SCEPTICAL OF PANACEAS.

S. Identifies value-conflicts.

A. HAS A SENSE OF RESPONSIBILITY FOR TAKING INFORMED ACTION ABOUT PROBLEMS CONFRONTING THE NATION.

S. Tests hypotheses against data.
40. Hold an all-school assembly which attempts to dramatize the problem of war and the possible solution or solutions to it.

41. Or ask the class to prepare a summary of the unit for distribution to their parents and community leaders and invite written or oral responses.

42. Have the class examine the hypotheses they developed as the result of the simulation game. Ask: Do you wish to eliminate or revise any of these in the light of the data you have collected?
COSTS OF WAR

Cost of killing a man
in Caesar's time
3,000 in Napoleonic Wars
5,000 in American Civil War
$21,000 in World War I
$50,000 in World War II
$326,600,000 in World War II
$66,000,000 (est.) to June 1968 in Viet Nam War
$94,000 (est.) in Viet Nam War
$33,629 in Korean War
$22,000,000,000 in Korean War
$225,000,000 in World War I

Expenditures and Lengths of Conflict

U.S. Spent

WWI $25,800,000,000
WWII $326,600,000,000
Korean War $22,000,000,000
Viet Nam War $66,000,000,000 (est.)

Length of Conflict

WWI 19 months
WWII 44 months
Korean War 29 months
Viet Nam War 32 months to June 1968

Human Cost

U.S. Military Deaths

WWI 115,000
WWII 291,000
Korean War 33,629
Viet Nam War 23,500

Total Military Deaths

WWI 8.5 million
WWII 22 million
Korean War 225,000 (est.)
Viet Nam War 94,000 (est.)

Costs of War

QUESTIONS FOR UNIT STUDY

I. Why is war a world problem?

II. How can an individual find and support a usable solution to the problem of war?

III. What are basic criticisms which have been leveled against our contemporary policies?

IV. What is our nation's basic foreign policy in regard to war?

V. How have men and nations resolved conflicts in the past?

VI. How have men and nations resolved conflicts in the past?

VII. What are the various causes of war?
