This bibliography contains 79 entries and is aimed primarily at persons seeking to do research on miscue methodology. It was compiled by a miscue research group at the University of Chicago and is as complete and inclusive as was possible at the time of submission. (Author/WR)
1973 Concise Miscue Bibliography by William D. Page

Miscue research, the psycholinguistic analysis of oral reading responses, is generating a growing body of documents. Persons seeking to do research based on miscue methodology will find this brief bibliography useful.

The bibliography, compiled by a miscue research group at the University of Chicago, is as complete and inclusive as possible at the time of submission. The compilers are aware that much work in miscue research is underway, and that many important documents having significant bearing on the topic are not included. This is a function of the feasibility of time use and not a reflection on the quality of materials not included. Acknowledgement is due to those who gave freely of their time to produce this bibliography. In particular, Francis Beck, Susan Marshall, Donna Recht, Gayle Squires, Barbara Theobald and Belinda Wolfson deserve signal appreciation for their efforts.
