INTRODUCTION

The educational community is becoming increasingly aware of the need for materials which are both bilingual and bicultural. This publication describes such materials. It also lists evaluative instruments which can be useful in making assessments of children who come from families whose basic language is Spanish. The final section includes reference sources and bibliographies which should prove useful to the special educator who is working with children for whom English is a second language.

The publication is adapted from the work of Mrs. Carmen Diaz, a graduate student at the University of Kansas. Mrs. Diaz has graciously consented to permit the University of Kansas Special Education Instructional Materials Center to make this material available to special educators through the SEIMC network.

Children born into families where English is not the primary language face a handicap in most schools throughout the United States. Such children frequently have problems with communication and find it difficult to adapt to and function in the school setting. Too, the values of their own sub-culture are not utilized in the instructional materials found in the typical school system. Consequently, these children frequently develop poor self-concepts, and their problems are compounded.

Think, then, of the double jeopardy faced by the non-English-speaking child with a handicapping condition! At present we do not have much in the way of materials specifically designed for the handicapped Spanish-speaking child. This document should help make special educators aware of some of the materials which do exist.

Purpose: Materials designed to develop proficiency in Spanish Language Arts skills -- listening, speaking, reading, and writing; provide opportunities for children to use the language in meaningful situations; provide speaking practice that will lead to spontaneous and extemporaneous use of the Spanish language.

COMMENTS:

The material includes a set of five booklets, a teacher's guide and a parent booklet. All materials are in Spanish except the parent booklet; it is in Spanish and English. It has a complete dictionary of foreign words, phrases, and idiomatic expressions.

The five booklets are a set of mimeographed sheets with exercises for teaching the alphabet, vowels, consonants and phonics of the language in preparation for reading and writing. The stories are about a variety of subjects. They are based on the background experiences of the child and culturally relevant. The print used is large and each booklet contains many black and white drawings which can be colored by the child. Many poems, proverbs, and games are effectively used to motivate the child and help him acquire a feeling for the rhythm of Spanish speech.
The teacher's guide is in Spanish. It has complete planning activities to motivate reading and may be easily adapted to the class needs.

The booklets are mimeographed sheets stapled together. This may not be entirely satisfactory for first-grade pupils.

PUBLISHER: Name: Teaching Aids Institute  
Address: 12848 Weber Way  
Hawthorne, Calif. 90250

FORMAT: Instruction book and Cassette tapes

DESCRIPTION:

Grade level: 1-16

Major curricular area: Language Arts - aural-oral development in certain English sounds

Culture: English

English text

Purpose: Designed to teach the student to hear and produce three types of pronunciation distinctions in English which he does not have to make in his own Spanish language.

COMMENTS:

Excellent for teaching and learning English as a second language. A general lesson plan allows in its procedure for listening, identifying, repeating, spelling but limited reinforcement. The types of pronunciation distinctions included in tapes are: b/v; ch/sh; t/ th; d/dh; though/dough; s/z.

The repetitious procedure used by the speaker to give instructions could be distracting to the listener.

The use of more exercises applying the sounds and more word examples representing the sounds in structural patterns and drills could be profitable.

Understanding meanings and reinforcement could have been served if vocabulary examples had been used in sentence forms.

Voices of the speakers are clear and linguistically accurate.

Length of silent spaces too short to allow for repetition.

Strongly recommended for students learning ESL and for students with limited skills in English pronunciation.

English text with instructions in Spanish

Purpose: Teaching English as a second language with emphasis on teaching phonics and reading.

COMMENTS:

There are six different examples given for each sound in the textbook and workbook, yet one word per sound is repeated on the tapes. It would be very helpful to the child if all six words had been pronounced in order to allow for more repetition, drill, and reinforcement of vocabulary.

The instructions, in Spanish, might be too lengthy for grade level intended. The child must retain too many concepts and grammar rules before he is allowed to listen to the example and the specific exercise which stresses the sound being taught. The child is also told in the instructions to follow the printed word simultaneously while repeating the oral exercises.

Not enough time is allowed for repetition of utterances. Also the same lesson moves too rapidly from vowel sounds to consonant sounds.
Some of the vocabulary the narrator uses to give instructions may be redundant and monotonous.

The material includes a teacher's guide and lesson plans.

Written language is taught with the use of personal experience story methods.

Some very good recommendations and suggestions are given; an extensive bibliography is included.

COMMENTS:

This book of short poems and rhymes has attractive illustrations
which display strong cultural relevancy with its colorful brown

It is written in a pattern similar to the English version of

useful utterances as well as the nonsense syllables of this book
will hopefully make drill, imitation, and memorization of phonics
of the Spanish language simpler for the user of the text.

It should be enjoyable reading for the native speaker of the
language as well as for a youngster learning a second language.
It has a tremendous potential for vocabulary and cultural enrichment.

FORMAT: Paperback storybook

DESCRIPTION:

Spanish text
Purpose: Read aloud book

COMMENTS:

The book has evidence of planned progression of presentation. It may seem somewhat dull for intermediate and advanced readers yet too difficult for elementary level. The vocabulary used may be too difficult for the levels mentioned.

The literal translations may place the material out of context and content. For example, the title, The Playground (Afuera) would usually be translated as "El Patio de Recreo," instead of Afuera, which means "outside."

The verb tenses used may be quite difficult for the readers. The book contains no marginal notes, aides or glossary of foreign words, phrases, idioms, or expressions.

The print is large and easily legible. The illustrations are attractive, colorful and relevant for U. S. culture. The scenes are up-to-date.

COMMENTS:

There is limited planned progression of presentation. The vocabulary and verb tenses used may be too difficult for some readers.

There are some obvious errors, e.g., the word *porque* is used throughout the book. The meaning of this word is "because" and the word needed is "¿por qué?" - two words, meaning "why?" There are questions asked but no answers provided.

There are no notes to help students; no literary or cultural references; no glossary of foreign words, phrases, idioms, or expressions.

The print is large and easily legible; the illustrations are attractive and relevant to U. S. culture; the scenes are up-to-date.

Purpose: Read aloud book

COMMENTS:

The book begins every page by asking a question instead of the logical progression of statement to question. There may be too much space wasted by printing one or two lines per page.

The grammatical structures and verb tenses used may be too difficult for child readers. There is a grammatical error in verb form of the infinitive "divertir". The infinitive of the verb means to enjoy oneself. The book uses the form "estás divertiendo" and the correct verb spelling of the gerund when used in the progressive tense should have been, "estás divirtiendo".

Some of the vocabulary used may be irrelevant. The translations may be too literal thus changing the context and content of the material.

There are no marginal notes or cultural references; no glossary of foreign words, phrases or idioms.

COMMENTS:

The authors develop an interesting and useful curricula in Social Studies. The model curricula in this study is designed as a supplement to the Social Sciences Education Framework for California Public Schools.

This report was designed to reach children in a bicultural setting. Teachers using this source would want to be sensitive to the historical and cultural background of the Mexican American students in their classrooms.

There is no reference made of the Spanish. If a teacher needs guidance in presenting this valuable material in Spanish, this report would not be too helpful. She would, of necessity, have to be proficient in the Spanish language in order to present the material of the report to her Spanish-speaking students.

The report has helpful lesson plans; drawings with cultural relevancy; suggestions for activities that go beyond the lessons, and a helpful glossary.

DESCRIPTION:

Curricular area: Formal Developmental program of foreign language study - Spanish

Culture: Bicultural

Spanish text

Purpose: A formal and structured course for teaching Spanish to non-Spanish-speaking beginners

COMMENTS:

Hablan Los Niños is a structurally, organized, audio-lingual, first year course of study of basic concepts and vocabulary. There are 70 lessons taped in cassettes.

Hablan Más Los Niños is taped in 6 cassettes. First year concepts are presented in greater depth, and structure is given much emphasis through drills and conversational situations. In both books, the age and interest level of the child are appropriate. However, there may not be sufficient pause allowed for repetition drills after the model has spoken.

"La Primera Fonética" provides a phonics base for pupils. Lessons and procedures for teaching are given in English. The instructions to the children are in English placing unnecessary emphasis on translation from one language to another.

"Mi Primera Fonética" is a workbook with perforated worksheets.
Ya Se Leer is the first reader and provides twenty short, easy poems and jingles. The stories are written simply and in the present tense. Each lesson shows planned progression and begins with a short review of the previous lesson in preparation for the work that is to come.

Spanish text

Purpose: This material is part of a formal and structured course for teaching Spanish to non-Spanish-speaking beginners.

COMMENTS:

This material is taken from Lesson 31 of the reader by the same author; it emphasizes listening and speaking skills for preparing the student to read. The film has bright, attractive pictures of the farm, the farmer and his family and many farm animals. The vocabulary used is excellent for preparing the student in oral expression. Excellent reinforcement is attained by the use of pictures of the animals, their physical features and names.

Vocabulary words are presented at the beginning and progress to complete simple sentences.

The material is linguistically accurate with emphasis on U. S. culture. It is recommended for the bilingual/bicultural child; child learning Spanish as a second language; Spanish-speaking child with limited skills in Spanish.

Teachers using this material must be proficient in Spanish.

A child having limited background of experiences -- an urban child who has never seen a farm, eaten turkey on Thanksgiving, etc., would have some difficulty understanding this material.

Spanish Curricula Development Center Field Guide 1972-73

AUTHOR: Dade County Public Schools

PUBLISHER: Name: Spanish Curricula Development Center
Address: 1120 Washington Ave.
Miami Beach, Florida  33139

FORMAT: Mimeographed materials

DESCRIPTION:
Grade level: Primary
Curricular area: Spanish Language Arts; Social Science;
                    Science/Mathematics; Fine Arts
Also useful in: Spanish as a second language studies
Culture: Southeast
Bilingual text - Spanish/English
Purpose: Designed to help meet the growing need and demand
         for curricular resource materials for bilingual
         education. Develop materials at the primary level
         for Spanish-background populations throughout the
         nation.

COMMENTS:
The materials are produced by the Spanish Curricula Development
Center and piloted in local bilingual programs, then revised and
prepared for distribution to other bilingual projects serving as
field trial centers in various parts of the country. The field
trial centers provide feedback to the SCDC on their use of the
curricula kits and the modifications they recommend for revised
and regional editions.

There are forty-eight kits planned, sixteen for each of the first
three grades. They include teachers' guides which present suggested
activities for five instructional strands in Spanish; assessment
activities; and audio-visual support materials to facilitate the
implementation of the activities suggested for each strand.
Strand 1: Spanish Language Arts – Vernacular
Strand 2: Social Science
Strand 3: Science and Mathematics
Strand 4: Fine Arts
Strand 5: Spanish as a Second Language

The sixteen kits for Primary one are organized around four basic themes: classroom, family, school and community. Four questions are asked in each thematic context: who are we, what our needs and wants are, what our resources are, and how we use our resources.

To increase the curricula's relevance to the target population for whom the materials are being designed, the Center utilizes the feedback of other schools and sources.

It is also designed to extend the language that Spanish-dominant children bring from their homes. Throughout, it recognizes and develops respect for regional variations in language.

It is impossible to discuss fully all the material included in the strands and kits in this paper because of their length. However, there is much valuable and very useful material which teachers in a bilingual program can use.
