Presented are the guidelines of an Alaskan educational program for native and nonnative rural families of preschool hearing impaired children. The program is described as involving initial identification of the handicapped child, residence for 1 week by the family (at no cost) in a demonstration home in Anchorage at which time parents are instructed in ways to stimulate language development as a part of daily life, home visits, and teacher training. Discussed are program objectives (such as increase in language stimulation through home activities), functions and suggestions for staff members, and facility requirements. Provided in the section on identification and planning are a list of agencies to contact, and referral forms. Outlined is the one week program at the demonstration home. Included are ways to bring in language, a list of recommended toys, recommended content for teacher discussions with parents, forms for recording receptive and expressive language evaluation, and a yearly report form. Also outlined are guidelines for the home visits (at 3-month intervals). Guidelines for the family education aide, a listing of appropriate media materials, and sample idea sheets which illustrate teaching techniques for parent use are given. Samples are also provided of a total communication handbook (with illustrations of Eskimo life style) and forms for use of video tapes. Program staff are seen to serve a community resource in rural areas. A final section notes teacher training functions of the program and lists reference articles suitable for parents on file with the program. (DB)

INTRODUCTION
INTRODUCTION

The Family Education Program was designed to meet the needs of families in rural Alaska who have preschool deaf children. It was designed by a team of professionals with varying experiences in deaf education—

Helen D. Beirne, Ph.D., speech & hearing pathology
Jean Berglund, M.A., teacher of the deaf
Marion D. Bowles, B.S., speech & hearing therapist
Nancy Laughbaum, B.S., teacher of the deaf
Michaele Powell, M.A., teacher of the deaf

Before the onset of the program, the needs of the state were studied through meetings with various agencies involved with hearing impaired children in the state. The design of the program was enhanced by discussions with Native Alaskans from various areas of the state.

During the first two operational years of the Family Education Program, these guidelines were compiled. The success of the program depends on flexibility at meeting the individual needs of each family. The forms are meant to be revised each year as use determines changes. Activities, articles and Idea Sheets are continually being added and new materials are replacing outdated ones.

The media referred to in this guide was developed through a Bureau of Education of the Handicapped grant to the Alaska Treatment Center for Crippled Children and Adults, Inc., 3710 East 20th Avenue, Anchorage, Alaska 99504. The following media can be obtained from the aforementioned address:

Give Him the Word By Marion D. Bowles

Handbook on Total Communication

Total Communication Video Tapes
(27 tapes, with accompanying lessons to be used with the "Hand Book")

Idea Sheets for Language Development

Filmstrips - "Ear Care For Alaskan Children"
"Otitis Media in Alaskan Children"

Curriculum For Preschool Hearing Impaired Native Children by Roseanne Keller

Small Talk
(20, 12 minute video tape programs with accompanying lessons for speech and language development in preschool children)

Helen D. Beirne, Ph.D.
Project Director
OUTLINE OF

FAMILY EDUCATION PROGRAM
FAMILY EDUCATION PROGRAM

OUTLINE

I. Identification and Planning.

A. Notification of all agencies involved in identification, education and/or referral.
   1. Dissemination of Family Education Program brochures, and Give Him the Word.
   2. Contact agencies personally.

B. Child Referred - verbally, written, telephone.
   1. Letter to public health nurses and teachers.
      a) Program explanation.
      b) Is Family Education Program appropriate for child?
      c) Additional information.

   2. Response from public health nurses.
      a) Child does or does not need Family Education Program.
      b) If no response, write again or call.

   3. Obtain Medical Referral - Public Health Services
      Alaska Department of Health
      Private Physician

   4. Family Contacted - Program explained by - letter
      visit by teacher
      or public health nurse
      phone.

   5. Response from family or agency.

   6. Public health nurse, teacher contacts or social worker
      Family travel arrangements.

   7. Agency assistance - Bureau of Indian Affairs
      Alaska Native Medical Center
      Child Study Center
      Transportation.

   8. Week program arrangements made.
      a) Check house.
      b) Contact agencies involved with child.
      c) Make appointments.
II. Demonstration Home.

A. Family arrives in Anchorage.
   1. Transfer to Demonstration Home.
   2. Living quarters orientation.

B. Weekly Activities.
   1. Case history.
   2. Observe family interaction.
   3. Overview of week - Notebook given for Idea Sheets, articles and pictures.
   4. Discussions.
      a. Hearing loss and audiology.
      b. Records: i. "How They Hear"
         ii. "Getting Through"
      c. Filmstrip: "How We Hear"
      d. Tape on research: Dr. McCay Vernon
   5. Test Parent's Hearing - child observes.
      a. Lipreading.
      b. Speech.
      c. Manual communication.
      d. Deaf education.
   7. Sign Language Lessons (if parents interested)
   8. Reading materials given to parents.
   9. Teacher works with child.
      a. Demonstration teaching.
      b. Speech and language evaluation.
      c. Conditioning games.
   10. View video tapes of other family interaction.
   11. Discussion of hearing aid care and use.
   12. Make video tape of home activity (micro teaching).
   13. Visits:
      a. Alaska Treatment Center - preschool deaf class.
      b. Denali and Fairview Elementary Class Hearing Impaired.
      c. Possible integration of child or siblings.
      d. Alaska Treatment Center - parent class.
      e. Audiologist - Alaska Treatment Center  
         Alaska Native Medical Center
      f. Hearing aid dealer - earmold fitting.
      g. Another parent of deaf child.
      h. Physicians -  i. Pediatrician
         ii. Otolarynologist
         iii. Ophthalmologist
         iv. Dentist
      i. Director of Anchorage Borough Deaf Program.
      j. Deaf adult.
      k. East High Senior High Deaf Program.
MEDICAL TREATMENT & TRANSPORTATION

This program does not provide medical treatment or transportation but both can usually be provided by cooperating agencies.

THE PROGRAM

The parents will have an opportunity to visit pre-school deaf classes as well as elementary and high school deaf classes. If the child is already in a pre-school program such as Headstart, the teacher will be encouraged to accompany the family to Anchorage for training in how to work with the child. Supplementary training can be obtained by Headstart teachers through Alaska Methodist University and University of Alaska.

Under provisions of:

The Handicapped Children's Early Education Assistance Act
Public Law 90-538
The purpose of the Prol.Fam is to provide information to families of hearing impaired pre-schoolers. To help the deaf at an early age begin developing language concepts.

To initiate speech development.

To improve communication by use whatever hearing the child has with a hearing aid.

To eliminate early foster home placement of children.

Provide constant contact with the parents by letter, phone calls, and video tape so that they may conduct meaningful experiences for their child.

The teacher of the deaf in charge of this program will attempt to visit the family in their home prior to the family coming to Anchorage. Due to weather and geographical location this is not always possible. Eventually she will visit every home.

Living Accommodations

In the Demonstration Home the parents and children will live in the same home as the teacher. The teacher of the deaf in charge of this program is the only adult in the home.

Eligibility: No Child is too young. This federally funded program provides for pre-school Native hearing impaired children, however in cooperation with the Alaska Treatment Center the same program is available to NON Native pre-schoolers.

The parent and child will live in the Demonstration Home at no personal cost.

Home Visits

HOME VISITS

The teacher of the deaf in charge of this program will attempt to visit the family in their home prior to the family coming to Anchorage. Due to weather and geographical location this is not always possible. Eventually she will visit every home.

Living Accommodations

In the Demonstration Home the parents and children will live in the same home as the teacher. The teacher of the deaf in charge of this program is the only adult in the home.

Eligibility: No Child is too young. This federally funded program provides for pre-school Native hearing impaired children, however in cooperation with the Alaska Treatment Center the same program is available to NON Native pre-schoolers.

The parent and child will live in the Demonstration Home at no personal cost.

Home Visits

Video Tape: Self Evaluation for teacher and parents.

Home Visits

Purpose:

The purposes of the program is to provide information to parents of deaf children regarding the deaf child's development and to answer any questions parents may have about the deaf child's development and education.

Home Visits

Eligibility: No Child is too young. This federally funded program provides for pre-school Native hearing impaired children, however in cooperation with the Alaska Treatment Center the same program is available to NON Native pre-schoolers.

The parent and child will live in the Demonstration Home at no personal cost.

Home Visits

Video Tape: Self Evaluation for teacher and parents.

Home Visits

Purpose:

II. Demonstration Home - Continued.

14. Visits by:
   a. Public health nurse.
   b. Social worker.

15. Home Activity - Examples:
   a. Putting groceries away.
   b. Reading stories.
   c. Getting drink of water.
   d. Playing games.
   e. Making lunch.
   f. Making a bed.

16. Field Trip Experiences - Examples:
   a. Zoo.
   b. Lion's den.
   c. Matanuska Maid dairy.
   d. Jonas Bros. museum.
   e. Downtown shopping.
   f. Russian Jack park - sledding.
   g. Local parks.
   h. Top of Penney's parking ramp.

C. Evaluation:

1. Child's language, physical, social and emotional development.
2. Psychological.
3. Family interaction.
4. Report of Week Program to agencies.
5. Evaluation of Week Program by parents.

III. Home Visit - Approximately 3 months later.

1. Pre correspondence.
   a. Public health nurse.
   b. Teacher.
   c. Parents.

2. Trip.

3. Village contacts (personally).
   a. Family.
   b. Teachers.
   c. Medical Doctors.
   d. Social workers.
   e. Head Start - teachers and aides.
   f. Preschool programs.
   g. Council president.
   h. Village health aide.
   i. School principal.
III. Home Visit - Approximately 3 months later - Continued.

4. Home Education.
   a. Discussion of child's progress.
   b. Parent education review.
   c. Observe child and re-evaluate.
   d. Use and care of hearing aid.
   e. Family activity - video tape, Polaroid.
   f. View video tapes.

5. School Education.
   a. Observe child.
   b. Demonstration teaching (class and tutoring).
   c. Video tape interaction.
   d. View video tape.
   e. Inservice with teachers.

6. Community Education.
   a. Grandparents/relatives.
   b. Family education aides.
      i. Train in use of video tape.
      ii. Home activities.
      iii. Forms.
   c. Language development discussion for all parents.
   d. Video tape for all parents.

7. Follow-up.
   1. Home visit evaluations by parents.
   2. Send video tape, idea sheets, prescribed home activities.
   3. Evaluation questionnaire to participating agencies.
   4. Progress reports.
   5. Record keeping.

IV. Media Production. (Samples provided in "Media" section of Guideline.)

   A. Video tape lessons in Total Communication.
   B. Hand Book on Total Communication.
   C. Idea Sheets for Language Development.
   D. Home Activity sheets.
   E. Education Course Syllabus - Ed. 694, University of Alaska - "Methods and Materials in Education of Hearing Impaired"

V. Community Resource.

   A. Family Training Resource - Assist agencies in planning Family Education Program.
   B. Foster Placement - Information and contacts.
   C. Assist students interested in Special Education.
   D. Home visits in Anchorage.
   E. Follow-up on suspected hearing impaired children.
VI. Teacher Training

A. University of Alaska course for teachers who have hearing impaired children in their class -
   1. Information on educational implications of hearing impairment.
   2. 10 week practicum with hearing impaired child.
B. On-site in-service meetings.
C. Demonstration teaching.
D. Articles sent on request.
E. Participation in teacher education workshops.
OBJECTIVES
OBJECTIVES

I. To provide information and education concerning:

A. The effect of the type and degree of hearing loss and age of onset on their child's language development.
B. The child's lack of an auditory monitoring system.
C. The importance of early and consistent auditory amplification.
D. The importance of language stimulation through lipreading, auditory training and total communication if used.
E. Realistic goals for the child.
F. What is available educationally to the hearing impaired child in Alaska.
G. The proper functioning and maintenance of a hearing aid.
H. How often and how to contact the audiologist and hearing aid dealer.
I. Making relatives and others in the community aware of the implications of hearing impairment.

II. To effect appropriate attitude changes, including:

A. Accepting the child as a functioning family member with the same privileges and responsibilities as other siblings.
B. Expecting normal behavior.
C. Accepting the hearing aid as a necessary prosthesis for their child's hearing impairment.
D. Increasing effective interaction with child.
E. Setting appropriate limits for the child.

III. To increase proper hearing aid use through:

A. Encouraging child's wearing of aid daily.
B. Making sure aid is functioning properly each day.
C. Learning to "trouble shoot" aid problems.
D. Seeking immediate repair of aid when necessary.

IV. To increase language stimulation through home activities in the following areas:

A. Auditory Training.
   1. Increase auditory awareness by pointing out sounds in the child's environment.
   2. Increase auditory attention by specific auditory training games.
   3. Increase auditory discrimination by specific auditory training games.

B. Lipreading.
   1. Increase visual awareness of verbal communication by encouraging "looks" at the face.
   2. Increase visual attention by keeping child's attention on face (lengthening "looks").
   3. Increase visual discrimination by specific lipreading games.
   4. Increase verbal interaction with child.
   5. Learn conditions for good lipreading situation.
IV. To increase language stimulation through home activities in the following areas: - Continued.

C. Language Development.
   1. Learn to select appropriate language and use it repeatedly until child understands.
   2. Become aware of child's known vocabulary and language development.
   3. Introduce new language meaningfully.
   4. Record child's progress.

D. Interaction and Communication.
   1. Increase interaction of family members with child.
   2. Increase effectiveness of communication through gestures or illustrations when necessary.
   3. Encourage "fair play" with siblings and friends.
STAFF AND PHYSICAL FACILITIES
I. **FAMILY EDUCATION COORDINATOR (PROGRAM TEACHER) - FULL TIME**

A. **Teacher's Role:**

1. **Build rapport.**
2. **Able to discuss child and family needs.**
3. **Give information.**
4. **Receive information (from parents and child).**
5. **Observe and listen.**
6. **Inspire mother to work at home with her child later.**
7. **Follow through with home visits, correspondence and continued information until child is enrolled in an appropriate educational program.**
8. **Keep records of children.**
9. **Correspond with other agencies concerning particular children and stimulate their interest.**
10. **Know statewide community resources for a hearing impaired child.**

B. **Ideas for Program Teacher:**

1. **Constantly give examples and demonstrations to and ask questions of parents.**
2. **When family comes in, check the services available to them in their area.**
3. **At the end of the day write a brief summary for yourself and the family.**
4. **Let the mother observe the child at play and think of ways she could use language with him.**
5. **Work with them in places other than the home. (Ex: park, store, on a walk, in the yard, etc.)**
6. **Teach child respect of people and materials.**
7. **Give suggestions of ways other children can help and feel important.**
8. **Show a movie during the week.**
9. **Learn about language used for cleaning skins, fish, fishing equipment, drying fish, etc.**
10. Mother must teach child how to get along in his village. She has to work harder because he has to be better. Stress his culture. Tell him about Alaska. Suggest using Alaskan magazines. Tell stories, teach rhythm and dancing.

11. Make bread one day if mother makes her own bread at home.

12. Make suggestions for father and other children to use at home.

13. Have a nutritionist come and talk to the family.

14. Have Director of Special Education Program talk to family about schooling.

15. Invite deaf adults to come talk with the families.

16. On the first day, keep the child with the mother as much of the time as possible.

17. Show mother different ways of using one toy.

18. Father socializes with games and activities. Mother provides understanding.

19. Places to write - Rainbow Series (refer to back of curriculum Guide #11 and Supply's Book #9)

20. Recognize good qualities the child already possesses.

21. Have parents suggest language for a picture.
   a. Check length of sentences.
   b. Language appropriate?
   c. Are they thinking quickly?

II. MEDIA COORDINATOR - FULL OR PART TIME

A. Media Coordinator Role:

1. To develop media necessary for serving program families.
   - instructional video tapes.
   - Idea Sheets.
   - prescribed activities for families.

B. Assist Family Education Coordinator (Program Teacher) in carrying out the program.
III DEMONSTRATION HOME AIDE - PART TIME

A. Aide's Role:

1. To know how to feed in language to a deaf child.
2. To learn about a hearing aid.
3. To be a teacher rather than just a babysitter.
4. To meet the plane when a family comes in or take the family to the airport.
5. To escort families to the Native Medical Center, grocery store, drug store, laundromat, etc.
6. To work with the child while the teacher is working with the parents and when the parents go to special meetings or visit schools.
7. Not to give any advice to the families.
8. To check Demonstration Home before and after the visit and organize supplies.

IV SECRETARY - FULL TIME

A. Secretary Role: To serve the Family Education staff.

V CONSULTANTS - PART TIME

VI VIDEO TAPE SPECIALIST - FULL OR PART TIME

A. Video Tape Specialist Role:

Cameraman.
FACILITIES

I DEMONSTRATION HOME

A. Purpose: To provide a home type of atmosphere in which to work with families of deaf children.

B. Design:
   1. Size - consider the largest family you expect to serve.
   2. Furnishings - The basic necessities for living for one week. Look at a furnished motel to get ideas and perhaps add.
   3. Atmosphere - Consider a cross-cultural atmosphere making a comfortable setting for all families.
   4. Facility - Individual home, apartment or furnished motel.
   6. Food - Purchased individually with each family after their arrival due to variance in tastes.

C. Educational Activities:
   1. Use home for most discussions with parents to provide a relaxed atmosphere.
   2. All home activities demonstrations by teacher or parents.
   3. Child evaluation, case history, listening to records and audio tapes.

II OFFICE

A. Large Office for Family Education Coordinator with ample activity storage space for equipment and supplies.

B. Office for Media Production activities with ample storage space for media equipment and supplies.

C. Rented studio for Video Tape Production.

D. Secretary Office with space for supplies.
IDENTIFICATION AND PLANNING
AGENCIES & PEOPLE TO CONTACT IN THE

STATE OF ALASKA

1. Public health nurses, school and private nurses.
2. Social workers.
3. Physicians - private, public and military.
4. Psychologists.
5. School principals.
6. Heads of special education programs.
7. Teachers of the deaf.
8. Alaska State Housing Authority.
10. State Department of Education.
11. Communicative Disorders Section of State Department.
12. Speech therapists.
13. Audiologists
16. Preschool programs.
17. Day nurseries.
18. Air Force and Army bases in Alaska, Navy and Coast Guard also, doctors, teachers and nurseries.
20. Universities.
22. Adoptive agencies.
23. Hospitals.

REFERRAL FOR FAMILY EDUCATION PROGRAM
FOR
PRESCHOOL HEARING IMPAIRED CHILDREN

Name of Child_________________________ Birthdate_________________________

Address______________________________

Father's Name________________________ Telephone_________________________

1. What behavior by the child seemed to suggest a hearing loss as observed by:
   - Parents____________________________
   - Physician__________________________
   - Nurse______________________________
   - Other______________________________

2. When was hearing loss first suspected? ______ Apparent cause: ______

3. Has the child had a hearing evaluation? ____________ If so, when__________
   (yes-no)
   - Who did the evaluation______________________________

4. Describe child's language abilities. How does he communicate?
   __________________________________________________________________________________

5. Does the child appear to have other problems? Please describe____________________
   __________________________________________________________________________________

6. What professionals or agencies are involved with this child and his family?
   __________________________________________________________________________________

7. Comments: ________________________________________________________________________
   __________________________________________________________________________________

Name__________________________

Date__________________________ Position__________________________

Agency_________________________
DEMONSTRATION HOME

WEEK PROGRAM
WEEK PROGRAM

I. FIRST DAY

A. Meet family at plane.

Things to discuss with family enroute to Demonstration Home:

1. Trip to Anchorage
2. Family still at home.
3. Impressions of Anchorage.
4. Did you forget something you really need?
5. Describe home community.
   - How many people live there?
   - What do most of the people do for a living?
   - Are there many houses around your house?
   - How many live in your home?
   - Do you have electricity and running water?
   - What type of food do you like to eat?
   - Do you have any dogs?
   - Do your relatives live near?
   - Do you have a snow machine?
6. What does your husband do for a living? (fish, hunt, trap, carve, etc.)
7. What is his day like? (Does he spend much time with the children?)
8. What is your day like?
9. What are your children's days like?
10. Church - how do you explain this to your child? (Say grace with your eyes open, looking at your child. Explain that you love God. We thank God for our food. How would you explain this to your other children?)
11. How often is the child with you? (Interaction or parallel activities.)
12. What does he like to play with?
13. What time of the day is the child most receptive?
14. What do you expect and want from this program?
B. **Demonstration Home Orientation**

1. Discuss physical layout and furnishings - utensils, linens
   - swimming pool
   - laundry room
   - office

2. Explain utilities and appliances - stove, burners and oven
   - sink, hot and cold water
   - refrigerator, freezer
   - vacuum cleaner
   - iron and board
   - telephone, leave phone numbers

3. Discuss emergency escape in case of fire - use of fire extinguisher

4. Discuss neighborhood - store, park

5. Discuss week plan

C. **Make Shopping List**

1. Shop for groceries

2. Take children along and take advantage of experiences for language exposure.

D. **Leave Reading Materials** - articles, Idea Sheets, etc.

E. Any questions?

II. SECOND DAY

A. **Case History**

1. Fill out form

2. Fill out Release Form (for information and pictures)

3. Observe family interaction

B. **Test Parents' Hearing** - child observes

1. Have parent follow the same procedure of responding as the child will be required to do for his hearing evaluation. (i.e.: dropping blocks into a container.)

2. Discuss parents audiograms with them.
IV. Outside Sounds:
1. Airplanes
2. Motors
3. Generators
4. Thunder
5. Horns-car, bike
6. Bells
7. Sirens
8. Motor scooters
9. Guns
10. Road equipment
11. Trucks -- cars -- snowmachines
12. Trains
13. Boats
14. Dogs barking
15. Hammering, handsaw, electric drill
16. Garbage trucks
17. Street cleaner
18. Ice cream truck
19. Sounds of work shop
20. Garage door
21. Roller skates
22. Lawn mower
23. Garden hose, when water is running
DISCUSSIONS WITH PARENTS

I. Speechreading (Lipreading)

Before you give a definition, ask the mother what she thinks speechreading or lipreading means. (How does she think her child is able to understand?)

Speechreading (lipreading) is the ability to understand spoken language by watching a speaker, without fully hearing or without hearing at all.

A. Speech has several forms. You can understand it by:

1. Listening.
2. Watching speech.
4. Situational clues, for example:
   a) Facial expression (eyes, eyebrows, mouth).
   b) Gestures (eyes, head, hands, body).
   c) Objects.
   d) Person talking (Example: Doctor in his office).
   e) Place conversation is held (Example: The bathroom).
   f) Time of day, daily schedule.
   g) Action that occurred before (Example: reprimanding for wrong deed).
   h) Action taking place at that time.
   i) Need of the present situation.

II. Reminders Related to Language Output.

The following suggestions have been compiled in order to help your child have the best conditions for Speechreading.

A. A child cannot look at you and the object at the same time. Bring the object near the side of your face, or hide it and bring it out after you have spoken.

B. Be on your child's level whenever possible. You should avoid the distortions which result when the child sees your face from an odd angle. (Example: standing (twice as tall as child) see upper lip; bending over - see lower lip). The view a child has of an adult easily explains why he often draws an adult with long legs, a small body and a tiny head. Demonstrate proper and improper level.

C. Secure the child's attention before talking to him.

D. Ways to get a child's attention:
   1. Call his name.
   2. Come around in front of him and get down to his level.
   3. Hide object, close box, etc. Bring unexpected object into view.
   4. Bring object near your face.
   5. Stop your motion.
   6. Put your hand on the child's hand -
      a) to stop his motion.
      b) to make him aware you want his attention.
   7. When giving him an object, hold on to it until he looks up.
   8. If reading a book, close the book or have it facing you, or turn it over on your lap while talking.
   10. Be expressive.
II. Reminders Related to Language Output. - Continued.

E. Do not pull the child's face around to get his attention. Instead, put your hands on his, stop your motion, gently tap his hand or shoulder, etc.

F. Be expressive when you talk. (Example: smile).
   1. Ham it up a little.
   2. Fix expression to what you are saying and how you feel.
      (Example: If angry, don't smile.)

G. Speak clearly but without extreme exaggeration. Don't have a broad smile when you talk.

H. Be interested in what you are talking about so the child will be interested.

I. Talk naturally, preferably at a moderate rate of speed. Don't break up words. Keep a normal speaking rhythm.

J. Say one phrase or sentence at a time.
   1. Be brief and to the point.
   2. Long complex sentences are often too much for young deaf children.
   3. You can have a language filled environment without having it stimulating and meaningful.
   4. Single words are appropriate at times.

K. Emphasize the key word in a sentence. It will usually come at the end of the sentence. (Example: Get your coat! or Where are your shoes!) Repeat the key word or phrase when necessary.

L. Repeat or rephrase an idea when necessary.

M. Avoid ah's, m's, er's and coughs. These are meaningless and confusing to the lipreader.

N. Gear language to what you would give a hearing child.

O. Keep the home environment, the activity and the language natural.

P. Close your mouth before you talk and pause on the last syllable.

Q. Have the light on your face, not the child's. Avoid standing in front of a window or with the sun in your child's eyes.

R. Take distance into consideration when talking to your child.
   Two to ten feet seems to be the optimum distance.

S. Physical factors which interfere with the effectiveness of your conversation with your child.
II. **Reminders Related to Language Output** - Continued.

S. Physical factors, etc. continued.

1. Hands.
2. Movement of the body (avoid large physical movements or gestures while talking to child.)
3. Movement of the head.
4. Lowering of the head.
5. Cigars, cigarettes, pipes, chewing gum. You hear yourself talking perfectly well while you are smoking or chewing. Your child is primarily conscious of the major movements involved in chewing, or smoking.
6. Long hair obscuring view of the face (keep back behind ears.)
7. Dangling earrings or necklaces.
8. Beards and mustaches (make sure lips are clearly visible.)
9. Sunglasses (cut off eye contact).

T. Watch yourself in the mirror as you speak. Be aware of "invisible" words, (egg, cake) - homophemes, and things that could interfere with lipreading.

U. Homophemes (words which look alike - baby/bye-bye, red/green) occur all the time. Rephrase or reword the sentence, if the lipreader is confused.

V. Lipreading is different to a deaf person than it is to you when you watch television and turn the volume down. You have a strong language background to draw from. A hearing impaired child does not have this foundation. You can feel what it is like to lipread by trying to lipread a foreign language, but even then you have an established verbal language with which to compare it.

W. The child at first cannot tell when you are saying words, or sentences or where one word ends and another begins. That is one reason to repeat key words after the end of sentences or phrases.

X. Remember, lipreading is physically fatiguing. Take this into consideration when you have been talking for any length of time to your child. Do not expect your child to do what you would not expect a hearing child of the same age to do.

Y. Be considerate of your child. Do not come up behind him and tap him on the shoulder unless he realizes you are there. This can be very frightening. Go around where he can see you and get down to his level.

Z. When talking with your child, stop your movement while you are talking, then continue your action when finished (Example: if walking, stop, talk - then continue, or washing, stop, talk - then continue to wash.)
II. Reminders Related to Language Output - Continued.

AA. Stop and explain to your child what you are talking to your husband about so your child feels included. Also, remember, abrupt changes of the subject can be confusing to the hearing impaired child.

BB. Encourage your child to participate in group activities. He should be considered as part of a group both at home and at school. Be expressive when you talk, but avoid exaggeration (smiling widely when talking, etc.)
   a. Ham'it up a little.
   b. Fit expression to what you are saying and how you feel.
   c. Be interested in what you are talking about.

CC. When a guest is at the dinner table, seat the child directly opposite the guest if possible. At other times, seat the child between the parents at the dinner table. If there is a window in the dinning room check to make sure the child is not seated facing the window.
DISCUSSIONS WITH PARENTS

I. Language

There must be INPUT before OUTPUT. Remind parents of this daily. A hearing child hears language hundreds of times before he experiences expressing it. A deaf child must see the language many more times before he can use it to express himself.

Language has to be meaningful and useful.

Expect language from your child.

Capitalize on what the child is interested in and build from there.

Model, pattern and expand the child's language.

Remember natural language.

Do not work with the child if you or he is not in the mood, is upset, sick, on a tight time schedule, or during a confusing time of the day.

A. The different Ways a Child Has to Learn a Word.

Example: "C A T"

1. Imitate speech movements.
2. Speechread (lipread).
3. Have the concept of various "cats".
4. Write in manuscript.
5. Read printed word (hand written and in books).
6. Write in cursive.
7. If he is learning signs, fingerspelling or cued speech, he has to learn it in that form.
8. The sound of the word with a hearing aid.
9. Recognize picture of "cat".
10. Identify real "cat".
11. Recall word.

B. Children Must Learn To:

1. Listen to and see what is said.
2. Understand.
3. Imitate (gross speech—gradually good speech).
4. Use speech meaningfully.

II. Activities for Developing Language.

A. Inner Language.

A child needs to know how to think, reason and imagine. Let him make decisions, dramatize, guess and use his imagination.

B. Games.

1. Have a surprise in a bag. "What do you think I have?"
   Really make the child think.
II. Activities for Developing Language - Continued.

B. Games - Continued.

2. Hide the pea game.

3. Draw a shape. Let him turn it into a picture.

$$\bigcirc \quad \text{into} \quad \bigtriangleup$$  

A circle into Ice cream cone.

4. Tell a story. Let him think up the next part.

5. Pretend stories.

7. Let child decide on color of socks or amount of food he will eat.

8. Show child a picture, ask the child how the person feels, what happened before, etc.

9. Ask questions.

C. Suggested Books.

Let's Imagine Thinking Up Things  
Let's Imagine Thinking Up Places  
Sesame Street Books

III. Teaching a Specific Word - Lipreading.

Object: (airplane, car, etc.)

Concept: What is the object? Is it a toy? What is it's shape? If possible, relate the object to the real thing. (For example, a play airplane to a real one.)

Purpose: To teach the child the word "airplane". To help the child develop the skill of speech reading. To provide experience in auditory training. To induce speech.

Lesson: Tell the child the name of the object. This is a _______. Hold the object close to your face and say the name of it. Repeat the name of the object as much as possible during the lesson. Make complete sentences or phrases.
IV. Verbal Matching - Concept Expansion (Go from concrete to abstract)

A. Real objects to real objects or replicas.
   Be sure the child knows what the object is and it's use.

B. Real object to picture.

C. Picture to picture.

D. Picture to written word.

E. Written word to written word.

V. Books.

A. What to watch for when choosing a book.

   1. Clear pictures.
   2. Pictures that help tell the story and stimulate thinking.
   3. Uncluttered pages with preferably only one picture per page.
   4. Pictures at least realistic.

B. Three ways of looking at a book.

   1. Alone.
   2. In mother's lap or across from her, but the child has the control of the book and looks up when he wants to.
   3. Parent holds and tells the story to the child while the child watches.

C. Explanation of how to present the story. (John Tracy Clinic Correspondence Course I-32).

   Suggestions: 1. The child can sit on the arm of the couch with mother facing him.
   2. Let the child become part of the story.
   3. Have parent tell a story to child at bedtime each night while staying in the house.
Times to Bring in Language Throughout the Day

I. A Child's Day.
   
   A. Waking Up.
      
      1. Put hearing aid on.
      2. Tie shoes from his side.
      3. Comb hair.
      5. Self respect. (Show him how nice he looks.)

   B. Grooming, washing, bathroom, toilet training, changing diapers.

   C. Time for school.

   D. Playtime (use play telephone).

   E. Tea time. (Make placemats with child and print name tags on mats.)

   F. Play dress-up.

   G. Put toys away, clean toy chest.

   H. Art activities.

   I. Nap time.

   J. Bedtime.

   K. Walk.

   L. Going outside (get your coat, etc.) (pulling wagon, riding trikes, etc.)

   M. Daddy is coming home.

   N. Accidents.

   O. Story time.

   P. Time with special pets, animals and toys.

   Q. Dancing to music.

   **NOTE:** Don't let your child play alone all the time. He is developing language when he is interacting with someone. But some times, your child needs time to himself to create, explore and imagine.
Times to Bring In Language Throughout the Day (continued)

II. Mother's Day:

A. Getting dressed.
   (putting on make up, setting hair).

B. Make beds or change linens.

C. Meals.

D. Cooking.
   (make shake-a-puddin, Jello, etc.).

E. Sewing.

F. Baking.

G. Snack time.

H. Make jello, cookies, toast, ice cubes, etc.

I. Setting and clearing the table.

J. Wash, rinse, dry and put away dishes.

K. Clean house, closet or drawer: sweep, vacuum, pick-up, dust, wash windows, mop, wash woodwork, polish furniture.

L. Preparation for shopping.

M. Shopping.

N. Put groceries away.

O. Sort washing, wash, dry, fold and put away clothes.

P. Outings to zoo, park, farm, picnic, etc.

Q. Trip to store.

R. Go on a trip.

S. Ride in the car.

T. Watch television.

U. Clock time (make a clock out of paper plates. Match to real clock).

V. Cleaning out pocket books.

W. Packing or unpacking.

X. Planned accident (drop spoons, etc.).
Time to Bring In Language Throughout the Day - Continued

III. Father's Day.

A. Shaving (Make child a razor out of a match box covered with foil and a string for a cord.)

B. Breakfast and other meals.

C. Leaving for work.

D. Coming home from work.

E. Reading.

F. Chores: Carrying garbage, washing car, gardening, mowing lawn, painting, building, snow machine, lighting fire, cutting and stacking firewood.

G. Polishing shoes.

H. Preparing and storing meats.

I. Riding bikes together, taking walks, rough-housing.

J. Feeding the dogs.

K. Clean yard.

L. Shovel snow.

Father has his own way with the child.

His own way is not necessarily the mother's. She should make suggestions, but let him have his own way of working with the child. Variety is good. We do not want the child to be too rigid or too dependent on any one person or method.

IV. Ideas to Use Around the House.

A. Shoe bag hung low so child can match and put his shoes away.

B. Pictures of clothes or toys taped when the objects belong in drawers or shelves.

C. Scrapbook of objects, experiences, etc.

D. Special traveling toys for times when child will have to ride for long periods of time.

E. Picture dictionaries (Have two of each kind so you can cut up one.)

F. Catalogues.

G. Match pack card games.
IV. Ideas to Use Around the House (continued)

H. Sesame Street Books.
I. Water toys to play with in tub, sink or basin.
J. Make snow ice-cream.
K. Build snowmen.
L. Use of instamatic camera.
M. Snapshots.
N. Calendars to explain about birthdays and special events.
O. Paper clock to explain the concepts of time.

V. Manners.

A. Table Manners - Expressions to be Used.

1. Thank you.
2. Please.
3. Excuse me.
4. More, or More ______ please.

B. Behavior.

1. Folding the napkin.
2. Burping.
3. Sloppiness.
4. Silverware.
5. Playing with food.
7. Ask for more rather than reaching across the table for it.
8. If you don't care for certain foods.
VI. Mealtime.

A. Give the language for the food.

"Here's some meat."  "Do you want a little bit or a lot?"  Tell him the name of each food so he'll learn the language.  "Here is some salad."  "Do you want a little bit or a lot?"  Let the child make some decisions on the size of the servings.

B. Make comments throughout the meal about the food.

"It's hot."  "That's good."  "The milk's all gone."

C. If you keep the food a little out of reach, he will have to ask for it. When he points to what he wants, give him the language and expect vocalization. Once he knows the language, expect, but do not force it from him.

Trick:  (1) If you pour just a little milk at a time, he'll have to ask for more.
         (2) Hold the dish before giving it to the child.

D. Don't bypass the deaf child and ask the others to pass the food. Ask the deaf child too.
A. Play.

- popper
- boats
- cars
- trucks
- airplanes
- barn
- doll and blanket
- broom and mop
- pounding bench
- whistling train
- bucket and shovel
- hangar (airplane)
- push toys
- pull toys
- cardboard boxes
- animals

(pan & spoon)

b. Educational Toys.

- string beads (spools, straws, macaroni, buttons.)
- building blocks.
- puzzles.
- wooden train.
- hundred cars for $1.00
- Tupperware shape ball.
- plastic milk bottle.
- number sorter.
- number concept games/Fisher Price clocks.
- All by himself/herself books.
- pop beads.
- Playschool poker chips.
- small doll house.
- Playschool triangle board.
- magnetic letters (upper case & lower case).
- bathtub toys.
- clutch ball.
- tea set.
- hearing aid doll.
- Lincoln Logs.

C. Art Supplies.

- crayons.
- playdough (clay or dough)
- glue or paste.
- tape.
- paint.
- finger paint.
- charcoal.

(* - Can be made at home easily.)

D. Assortment of Records and Books.
END OF THE WEEK SUMMARY

1. You are a mother first. We are not here to help you become a teacher, but rather a mother who helps her child by bringing in language in everyday situations.

2. Home life is of foremost importance. Try not to change it into a school or to fit it around the hearing impaired child. The other children are just as important, and need your attention too.

3. Your child is a child first (with the same basic needs as a hearing child) and a hearing impaired child second. Be aware of normal child development.

4. Be careful not to attribute all of his behavior to his hearing loss.

5. You will receive advice on how to help your child from many sources. Listen, then do what you think is best. Remember who is speaking, their knowledge of your personal situation and of hearing impairments. You know your child better than anyone else. Remember, you will always receive criticism from someone.

6. Work with your child the way that is best for you and him. (Don’t feel that you must follow all suggestions of that you have to be like another person. Feel free to adapt ideas to your own approach.)

7. Do not try to do everything at once. Do what you feel is most important and do it well. Gradually work up to more and more QUALITY rather than QUANTITY.

8. The key to working with your child is to be natural - in language, voice and expression. Keep language and expectations geared to what you would give a hearing child of the same age.

9. Try to put yourself in the child's place -- emotionally, physically, and communicatively.

10. Try not to interrupt the child's natural home activities while bringing in language.

11. Talk about what your child is interested in rather than what you are concerned with at the time.

* 12. In order to be learned, language must be meaningful and useful to the child.

* 13. There is a difference between expecting and forcing language. Expect but do not force it. Example: Wait for him to say "more" before you pour him more milk. He doesn't have to say it, but if he doesn't try, then - no milk.

14. One must have language input before output. (Impression before expression.)

15. Keep a notebook of your child's language development and of any incident you feel is worth noting. (It helps on days when you feel discouraged.)

16. Keep in close contact with your child's teacher, therapist or public health nurse. (You may want to keep an experience notebook to reinforce the same language at school and at home.)
17. Be careful of clinic hopping and of advertisements. If you hear about something new regarding deafness, ask a professional (ear specialist, audiologist, teacher of the deaf, etc.) you trust about it. If it is something good, the professional will want to know about it. If it is something bad, the professional will want to alert other parents to beware of it.

18. If you decide to use Total Communication or Cued Speech, remember to also expect your child to use speech, encourage the use of the hearing aid, develop listening skills and expect him to lipread. Always use speech with signs and/or fingerspelling and expect it back.

19. Give your child a chance to develop by giving him some responsibilities (putting toys away, feeding the dog, carrying dishes from the table, making his bed, etc.). Make sure the task is something you feel comfortable about having him do and is within his limits. Give him a chance to develop his special abilities and interests. Give him a chance to feel independent by letting him complete tasks alone. (This will help him build self-confidence.)

20. Don't allow members of the family to cater to his handicap. (Don't let them baby him, give into him, over indulge him or over protect him. Example: Giving the last piece of dessert to him or bringing him a special toy just because he is deaf.)

21. Don't give your child a choice when asking a question unless you are willing to accept and respect his decision. (Don't say, "Do you want to go to bed?" unless you are willing to let him stay up if he says "No.")

* 22. If you treat him as handicapped, he may become handicapped. He has a hearing impairment. The handicap is what we as teachers and parents place on him by limiting his activities and by underexpecting from him. If you treat him differently, he may act differently.

* 23. Be as consistent as possible with your child. He must know what to expect from you and believe that you do what you say. If you are not consistent with him, he will not respect your decisions and will test you more often. (Example: mealtime, bedtime, playtime, putting away time.)

24. Fit your expression with what you are saying.

25. Be sure to have your child's eyes checked. Do not just assume your child has good eyesight because he has to primarily depend on it.

(* - Most important points.)
I hereby give the Alaska Treatment Center Staff permission to obtain and use audiological, medical, and educational data on my child and to take and use pictures of my child and our family.

I also give the Alaska Treatment Center Staff permission to use videotape pictures of my family for viewing by groups of teachers, doctors or other professionals or parents interested in the education of the deaf.

Parent or Guardian

Witness
1. **Family Data:**

1. Name of child _______________________________ Sex __________________
2. Child's birthday: Month _______ Day _______ Year _______
3. Give name and address of parents or guardians: Relationship _______
   
   Name ____________________________________________
   
   Mailing address: __________________________ City __________ Zip ______
4. Give directions to home: ____________________________

5. Child's address; Street/s/ox __________________________ City __________ Zip ______
6. Are the parents separated or divorced? yes ____ no ____
7. Name and Address of parents if different from above:
   
   Name __________________________ Street/s/ox __________________________
   
   City __________________________ Zip ______
8. Is the child adopted, or a foster child? __________________________
9. Home telephone __________________________ or, neighbor's phone __________________________
10. What is Father's work? __________________________ Mother's work? __________________________
11. Who should be notified in case of an emergency while parents and child are attending the program in Anchorage? Name __________________________

   Address __________________________ Phone __________________________
12. What language is spoken in the home?
13. List the names and ages of other children in the family (use another sheet of paper if necessary)

________________________________________  
________________________________________  
________________________________________  
________________________________________  
________________________________________  

14. Other persons living in the home?

Name________________________ Relationship________________________

________________________________________  
________________________________________  
________________________________________  

15. Are the child's parents deaf? If so, give cause.

Father________________________ Mother________________________

16. In the families of the parents, are there any deaf or hard of hearing relatives? yes____ no____ List causes________________________

17. Has the child been examined by an otologist (ear doctor)? yes____ no____ If yes, give doctor's name________________________

18. Was the child born with a hearing loss? yes____ no________
At what age was the hearing loss first noticed?________________________

19. Do you know the cause of the child's hearing loss? yes____ no____
If yes, describe________________________

20. Has the child had a hearing test? yes____ no____

21. When was the child's hearing first tested?__________ Where____
How old was the child?__________ What were the results?__________

Was a hearing aid recommended? yes____ no____ If yes, kind is it?

________________________ When did the child begin using it?____

________________________ Have there been any problems with the hearing aid? yes____
no ___ If yes, describe ________________________________

Date of last hearing test __________________________ Where? __________________________

Results __________________________________________

22. When did your child get his last earmolds? ______________________________

How many hours a day does your child wear his aid? __________________________

Does it seem to help him? yes ___ no ___ If yes, in what ways? __________________________

23. Do you think your child is deaf? yes ___ no __________________________

24. Do you talk to your child in words; _________ phrases; _________

gestures; _________ pointing; _________ all of these? _________

25. Do others understand the child's speech? yes ___ no __________________________

26. Does the child speak in single words _________ or phrases? _________

27. List the words that the child says that you understand __________________________

28. How does the child act near the following sounds?

Fire siren __________________________ Airplane __________________________

Doorbell or telephone __________________________

Voices __________________________ Dogs barking __________________________

Door slam __________________________ Car horn __________________________

Snowmobile __________________________ Boat motor __________________________

TV/ Radio/ Phonograph __________________________

List other sounds the child reacts to __________________________

29. At what age did the child...

Sit up without help? _________ Walk without help? __________________________

Eat with a spoon or fork? _________ Drink from a glass? __________________________

Dress himself? __________________________ Ask to go to the toilet? __________________________

30. Is the child completely toilet trained? yes ___ no __________________________
31. Does the child dress himself? yes no Feed himself? yes no
32. Does the child have any sleeping problems? yes no If yes, describe
33. Does the child have any eating problems? yes no If yes, describe
34. What do you do if the child won't eat?
35. Does the child wet his bed—Often yes Sometimes no Never no
36. Does the child have any particular fears? yes no If yes, describe
37. Does the child use mostly his right hand or his left hand? Or, does he seem to use either hand equally as well?
38. What are the child's favorite things?
39. Does the child nap? yes no If yes, when? how long?

II. MEDICAL INFORMATION:

40. Pediatrician or Family Doctor's name
Address Phone
41. Has the child had his eyes checked? yes no If yes, when? 
Results
42. Before the birth of the child...
Did the mother have German measles, or any virus or cold during the first three months of pregnancy? yes no
Any other illnesses during the pregnancy? yes no If yes, what kind
Did the mother have any disturbing experiences or accidents during the pregnancy? yes no If yes, what were they?
Was the Rh Factor a problem? yes no
Did the mother use any kind of drugs during her pregnancy? yes no If yes, what were they?
Were there any problems during the birth of the child? yes no
43. If yes, what kind of problems?

[Blank]

Other place

Who delivered the child? Dr. __________________________ Name of person other than a doctor and qualifications (i.e., midwife, health aide) if any

Was the birth of the child premature? yes no If yes, how far along was the pregnancy at the time of birth? ______ months. How much did the child weigh?

Was delivery induced? yes no Was labor prolonged? yes no

How long did the labor last?

What kind of anesthetic was used?

Were instruments used? no yes

Was it a breech birth? yes no Was the cord around the child's neck? yes no

Was the birth Cesarean Section? yes no

44. Were there any problems immediately following the birth of the child? yes no If yes, what kind?

Was the child blue? yes no

Were there any feeding problems?

Was the baby jaundiced? yes no

Did the baby have convulsions? yes no

Was the baby weak? yes no

45. Has the child had any surgery? yes no If so, what kind of surgery and when was it performed?

46. Has the child had ear problems? yes no If yes, how often?

Explain the kinds of problems he has had

47. Did the child have any illnesses with long periods of fever shortly after birth? yes no If yes, explain

48. Please note illnesses which the child has had and provide dates if at all possible.

spinal meningitis diphtheria

rheumatoid arthritis smallpox

scarlet fever measles (kind)

mumps chicken pox

encephalitis whooping cough

convulsions (how many times?)

epileptic seizures (how often)

other contagious diseases, illnesses or injuries:

Is the child presently on any kind of medication? yes no

If yes, list type and dosage

49. Has the child had any trouble with balance or coordination? yes no

If yes, explain

50. Describe any physical problems other than deafness that the child may
have, and any corrective devices (glasses, hearing aids, braces etc.,) that he is using.

51. List any allergies the child may have.

Medications ____________________ Foods ____________________

______________________________ ________________________

Other (hayfever, insects, animals etc,) _______________________

III. SCHOOLING

52. Has the child been in any school or clinic? yes ______ no ______

If yes, list: School or Clinic __________________________ Address _______

______________________________ Name of teacher ________________

Date ____________ If child has attended more than one school or clinic
please attach the same information in each case.

53. Individual tutoring: Where ____________ How often ____________

Name of tutor ____________ How long was the child seen by the

the tutor? ____________ years ____________ months ____________ weeks

54. Describe the things members of the family have done to help the child

at home. __________________________ __________________________

______________________________ __________________________
1. Write the words that your child already knows and check under the appropriate areas.

2. As your child learns new words, write:
   a. the date that you noticed your child imitate the word
   b. the date he first begins to understand the word when you say or sign it
   c. the date he expresses the word by himself and you understand him

II. LANGUAGE DEVELOPMENT - Expressive

1. Vocalizes Articulation. 
   Voice 
   Rhythm & Stress. 
   Intonation. 

2. Imitates speech movements. 

3. Gestures to express needs. 

4. Vocalizes to get attention. 

5. Vocalizes with purpose (uses language). 

6. Expresses intelligible words. 

7. Can express 10 words. 

8. Can express 20 words. 

9. Can express 30 words. 

10. Can express 40 words. 

11. Expressive vocabulary over 50 words. 

12. Uses two word phrases. 

III. AUDITORY TRAINING 

1. Conditioned to respond to sound. 

2. Uses aid all the time. 

3. Child wants aid on. 

4. Aid properly maintained. 

5. Responds to environmental sounds. 
   List: 

6. Increased vocalization with aid. 

7. Child complains when aid is inoperable. 

8. Attends to voice. 

9. Discriminates between speech and environmental sounds. 

10. Is aware of source of environmental sounds.
III. AUDITORY TRAINING - Continued.

11. Discriminates between different familiar sounds.

12. Discriminates between different language patterns.

IV. WRITTEN LANGUAGE

1. Can make controlled lines on paper.

2. Can copy symbols.

3. Can trace letters and numbers.

4. Can copy letters and numbers.

5. Can copy written language.

6. Initiates written language.

V. READING READINESS

1. Has learned to discriminate like and different objects.

2. Has learned to discriminate like and different pictures.

3. Has learned left to right orientation.

4. Has learned to discriminate like and different symbols.

5. Can recognize printed alphabet.

6. Can recognize name in writing.

7. Is aware of printed words as language.

8. Can recognize simple words.

9. Can read: ____________  ____________  ____________
TEST I - Object Identification.

Procedure:

A. Present four of the following objects:
   car, airplane, snowmobile, boat, table, chair, fish, dog, cat, bunny, baby doll, button, brush, comb, toothbrush, cup, fork, spoon, candy, ball.

B. Ask identification of each of two objects from each group (six trials). Use language as follows throughout the test:
   
   Show me ______________________.

   Where is ______________________?

   Point to the ____________________

C. Record results as follows throughout the test:
   
   Which objects were identified?
   
   Which language seemed to be understood?

TEST II - Numbers.

Procedure:

A. Present five blocks of uniform color and size.

B. Demonstrate identification of number by scooping four blocks toward self after saying "four".

C. Ask identification of: one; three; two.

D. Record results.

TEST III - Picture Identification.

Procedure:

A. Present three of the following pictures:
   boat, car, airplane, bed, table, chair, TV, dog, fish, house, girl, boy, mother, father, baby.

B. Ask identification of one picture by gesture.

C. Record results.
II. Not so obvious: (continued)

9. Movie projector
10. Coffee-pot percolating
11. Hair dryer
12. Toaster
13. Kitchen exhaust fan
14. Teakettle

III. Controlled Noises--Noises that You can Make:

1. Toilet flush
2. Running water
3. Cupboard door shutting
4. Drawer shutting
5. Pushing chair, or toys across floor
6. Lid on pan, or bowl with spoon
7. Voices-laughing, coughing, crying, singing
8. Popcorn popper
9. Footsteps
10. Dropping objects
11. Pots and pans
12. Musical instruments-drums, piano, harmonica
13. Knock on door
14. Hit cans together
15. Snap on highchair
16. Toys that make noise
17. Garbage can
18. Electric tooth brush
SOUNDS IN THE ENVIRONMENT

Daily Sounds to Draw Your Child's Attention To

Do not try to tune your child in to all the sounds at once--just a few meaningful ones at a time.

I. Obvious:
   1. Vacuum cleaner
   2. Radio
   3. Record player
   4. Television
   5. Electric mixer
   6. Washer
   7. Dryer
   8. Telephone
   9. Dishwasher
  10. Garbage Disposal
  11. Door bell
  12. Alarm Clock

II. Not so obvious:
   1. Sewing machine
   2. Refrigerator, turning on
   3. Eggbeater
   4. Heater, on and off
   5. Electric razor
   6. Air conditioner
   7. Timer on stove
   8. Typewriter
G. Material at Home for Games - Continued.

3. Objects -

- buttons
- dominoes
- clothespins
- paper clips
- checkers
- ping pong balls
- lima beans
- jelly beans
- M & M candies
- blocks
- beads
- pop beads
- marbles
- jewelry
- rocks
- plastic spoons
- small wooden spoons
- colored tooth picks
- marshmallows, raisins
- popcycle sticks
- tongue depressors
- party favors
- golf tees
- sticks
- macaroni

- nuts (shelled or unshelled)
- stickers
- cotton balls
- rings (plastic or curtain)
- pipe cleaners
- small Christmas balls
- crayons
- yarn
- bows and barrets
- curlers
- popcorn
- cookies
- cereal
- pennies
- playing cards
- nails, screws, bolts.
- balls
- paper clips
- empty spools
- bottle tops
- small pictures
- small balls of yarn
- drink stirrers
- straws
- pegs
- candy

String these objects: beads, macaroni, pop tops, life savers, paper clips, buttons, spoons, straws, cherries.

Child can play "take away" games, similar to "drop in" games.

H. Make blocks out of Milk Cartons.

I. Educational toys that can be used for Auditory Training.

Use any toy that has many responses available.

- stack toys
- shape toys
- water pump
- puzzles (if simple)
- milk bottle toys
- airplanes and hangar
- cars and garage
- dolls in doll house
- animals in barn
- creative blocks

J. Rewards.

Physical, expressive, verbal, candy, stickers, easter seals, peel off stickers, Christmas tape, book stamps, magazine stamps.

Have rewards be what the child likes.

K. Miscellaneous Home Activities to Stimulate Hearing.

- stories
- singing
- dancing
- finger plays
- rhythm instruments
- identifying voices - family
F. Ways to Keep Interest and Control.

1. Keep in control of all objects.

2. Use a set number of objects (6 or 8) and do not repeat the game at that sitting even if the child wants to.

3. Let the child know exactly what is expected of him.

4. Give him one response object at a time.

5. Have his and your movements be direct and precise.

6. Let him see you make the sound and do not move the soundmaker out of his sight until he is consistently accurate with sight. If he seems lost without sight go back to using touch and then sight.

7. Expect quick responses.

8. Keep the game interesting and within the child's physical and intellectual limits. (Beware of over-stimulating games.)

9. Be certain not to give clues through movements, eye blinks, timing, expressions. (Watch for mirror and window reflections.)

10. Speak as little as possible so the child will be able to concentrate on the sound being made.

11. Turn off any radio, television and record player when working on auditory training.

G. Material at Home for Games.

1. Sounds -
   - pan and spoon
   - radio
   - noisemakers
   - whistle
   - clapboards
   - handclap
   - musical toy
   - bell
   - piano

   - voice
   - box of rocks, rice, etc.
   - record player
   - squeaky toys
   - rattle
   - drum
   - hit two lids together
   - alarm clock
   - coffee can with marbles

2. Containers -
   - oatmeal box
   - cottage cheese carton
   - margarine bowls
   - clorox bottle
   - shoe box
   - yogurt container
   - Sucret box
   - coffee can
   - round containers (ice cream or chicken)
   - plastic milk bottles
   - plastic bags
   - paper bags
   - laundry bags
   - pillow cases

   - jar (slit top)
   - pots
   - plastic eggs (split)
   - egg carton
   - aspirin tins
   - buckets
   - babyfood jars
   - paper cups
   - nut cups
   - acoustical tile
   - styrofoam
   - glass
   - cup
   - basket
   - orange juice can
C. Conditioning Games - Continued.

9. Other ways to respond.
   Turn around, take objects out of or off of something, raise head, take a step, etc.

10. After a child can respond easily to auditory and visual sound:
   a) Hit the instrument behind the child's back. Make sure he responds quickly.
   b) If he fails to respond, bring the instrument out in front of him again (or try using a different sound).
   c) Don't give clues when the sound is made once the child knows what to respond to.
   d) When the child responds well, make softer and softer sounds.
   e) Change roles and let the child be the teacher.
   f) Make sure the child experiences success and is rewarded for his success.

   Note: If the child refuses to use the toys properly, take them away and bring them out another time.

D. Discrimination Between Sounds.

1. Things to discriminate between.
   a) Two instruments (drum and bell).
   b) Loud and soft.
   c) Fast and slow.
   d) Long and short.
   e) Vocalizations (animal sounds, vowels, etc.)
   f) Number of beats (start with the hand closed, have child raise a finger for each beat.)
   g) Single words - i. Go - Game.
      ii. One syllable versus two syllable words. (car vs. airplane).
      iii. Repeated syllables.
      iv. Names of members of the family.
      v. Different words.
      vi. Different phrases.
   h) High and low.
   i) Things around the house.
   j) Rhythm with the piano or record player.

E. Other Auditory Training Suggestions.

1. Singing
2. Nursery rhymes.
3. Finger play.
4. Say and clap hands to rhythm.
5. March to music and clap hands.
DISCUSSIONS WITH PARENTS

I. Auditory Training.
   A. Purpose
   The purpose of Auditory Training is to teach the child to make the most possible use of his residual hearing and to become aware of sound in his environment.

   The child must learn to - 1. Listen (tune in)
   2. Localize (where)
   3. Discriminate (difference)

   B. Three Basis Steps:
   1. Feel, Look and Listen.
      (TVA) Tactile (touch)
      Visual (sight)
      Auditory (hearing)
   2. Look and Listen.
   3. Listen.

C. Conditioning Games: (Conditioning should be left to the school program unless your child has not been conditioned to sound.)

1. Use an instrument that is fairly loud. (Example - drum, pan with a spoon).
2. Let the child play with the instrument if he is not familiar with it. 
3. Show him how many responses he is expected to make. Hand him one response object and have him hold it up to his ear in a "listening" position. Keep the other objects out of his reach. (Begin with 6 to 8 responses.)
4. Hit the instrument once and let him quickly drop the object into the container. If he does not respond, guide his hand.
5. Immediately respond to his action by clapping or giving him a very pleased expression.
6. Do not hit the instrument if he is daydreaming - wait until he listens.
7. Keep the game moving and optional - keep the game short. When the game is finished, put it away. It is better to stop while the child's interest is high than to wear him out by repeating the game. This will also encourage him to finish a game some other day when he really isn't quite so interested. He will know he will only have to play it one time.
8. Problems - a) If he doesn't know what to do.
   i. Mother can hold his hand and guide it to make the correct response. When he begins to take over action, let him.
   ii. A third person can help the child make the response or the mother and third person can play the game while the child watches.
   
   b) If he makes the wrong response.
      If possible, stop his hand before he drops the object into the container. If he has already dropped it, have him take it out and try again.
DISCUSSIONS WITH PARENTS

I. Development of Residual Hearing.

A. The child should wear his hearing aid every day, all day.

1. Discuss operation and care of hearing aid - also possible problems. Check the hearing aid at least twice daily, to make sure it is working properly. Make sure you check the batteries at bedtime, as this is the time of the day they may be running down if new batteries are needed. Clean the ear mold daily.

2. If he refuses to wear his hearing aid, find something he really enjoys playing with and let him do that only if he wears his hearing aid (Example: television or a musical toy).

3. Effect of distance on hearing aid reception.

Using a tape recorder, record speech - 1 ft. from microphone.

3 ft. from microphone.

6 ft. from microphone.

Play back and discuss.

II. Awareness to Sound.

A. Differentiate between listening and hearing.

We block out sounds unconsciously but hear them if we listen. Have parents take a noise inventory of their home.

1. Obvious.

2. Not so obvious.

3. What can make sounds.

4. Outside sounds.

Idea to help parents to learn to listen. Blindford parents and ask them to tell you the different sounds they hear.

B. Help the child to develop an awareness of sounds in the environment - especially speech. (Not all of them at once.) He has to learn to listen, localize and discriminate between sounds. Begin by showing him how the sound occurred and where it occurred. Use sounds that interest a hearing child.

1. Make the child aware of what makes noise and what does not.

2. When you make a sound, if he hears it, show him again what the sound was and how you make it.

3. If he does not hear the sound, draw his attention to the sound and make the sound again.

C. Be interested in the sound and pleased to hear it. Let him feel the object if possible, and if he will, put his ear up to it. The parent or teacher has to do this first with the child. You probably will not know if the child hears the different sounds but give him the opportunity to connect the meaning to what he either feels or hears.

Use a clue your child recognizes to call attention to sound (a hand to your ear).

PRE-VISIT CHECKLIST

1. Request money.

2. Set up appointments - make up Week Program.

   ___ otolaryngology examination.
   ___ audiology examination.
   ___ pediatric examination.
   ___ other medical or dental examinations.
   ___ school visits:
       ___ Denali.
       ___ Fairview.
       ___ East High.
       ___ Preschool - ATC.
   ___ integration of child and siblings.
   ___ teaching demonstration.
   ___ visit with Special Education Director.
   ___ testing:
       ___ psychological.
       ___ developmental.
       ___ speech and language.
   ___ filmstrip.
   ___ records.
   ___ films.
   ___ PHN visit.
   ___ BIA social worker visit.
   ___ parent visit.
   ___ deaf adult visit.
   ___ visit to signing class.
   ___ check video equipment.
   ___ check child's file.
   ___ contact other agencies involved.
   ___ arrange experience trip.
   ___ contact babysitter.

3. Check house.

   ___ beds.
   ___ general supplies.

4. Letter to parents.

   - Who will attend? Mother, father, child, siblings?
   - Ages of children?
   - Remember to bring child's aid.
   - Bring information on child's history.
   - Has the child had a hearing evaluation? When? Where?
   - Explain clothing necessary for Anchorage weather.
   - If any change in plans, let us know.
   - Give addresses and phone numbers - including teacher
     and/or aide's home.
   - Describe program.
   - Describe self or aide for airport identification.
   - Send copies of letter to other agencies.

5. Check transportation arrangements.
C. Summary – Cont'd.

Hearing loss, hearing aid (use, benefit, attitude)
maturity of child, speech and language, ability to communicate with family members, readiness for school.
Additional handicaps, possible problem areas, behavior.

4. Follow-up and assistance through other agencies.

5. Attitude at the end of the week.

D. Field Trip

E. Take Family to the Airport.
IV. FOURTH DAY

A. Earmold Fitting.
B. Home Activity.
C. Movie: Silent World, Muffled World.
D. Psychological Evaluation.
E. Meeting with Deaf Adult.

V. FIFTH DAY

A. Integration of Deaf Child and Siblings in Local Classes.
B. Audio-tape: Dr. Vernon - Implications of Hearing Loss and Communication
   React.
C. Educational Games - Discuss possibilities for homemade games.
D. Visit Deaf Classes - Denali & Fairview. Observe and react.
E. Visit with other Parents of a Deaf Child. Discuss: Hearing Aid Use.
   Language Development.
   Home Activities.
   Communication.
F. Plan Home Activities for Video Taping.
   Father activity
   Mother activity
   Sibling activity

VI. SIXTH DAY

A. Video Tape Home Activities.
B. View Video Tape (micro-teaching)
C. Summary of Week’s Activities and Follow-up.
   1. Attitudes at the beginning of the week. What happened during the week (events, reactions, focal points, parents primary concern.)
   2. Attitudes and behavior during the week (i.e. open, honest). What information and suggestions did they pick up, communication with the child.
C. Demonstrate Conditioning Game - child and parents participating.

D. Discuss: "Hearing Loss and Audiology"
   Filmstrip: How We Hear

E. Visit by Social Worker and/or Public Health Nurse.

F. Otolaryngology or Pediatric Examination.

G. Attend Parent Class.

III THIRD DAY

A. Visit Preschool Deaf Class

   During and after class visits, call attention to:
   1. Charts and other visual aids (speech, language, auditory training, lipreading)
   2. What makes it different from a hearing class?
   3. Speech, voice and language of children is different.
   4. Hearing loss - you can usually tell how severe the child's hearing loss is by his speech.
   5. Children are learning through different ways than in regular class.
   6. Why they need a special class.
   7. Why they wear hearing aids. (It's like putting on ears.) You can't measure a child's progress by his age, but rather when he started wearing a hearing aid.
   8. Auditory equipment - tell how it works and its advantages.
   9. How does the teacher communicate with the children?
   10. How do the children communicate among themselves?

B. Watch Video Tape of Another Family - interaction with their hearing impaired child.

   Discuss what techniques family uses to facilitate communication with the child.

C. Hearing Evaluation by Audiologist.

   1. Feedback by parents.
   2. Follow-up discussion with teacher.
   3. Records: How They Hear and Getting Through
   4. Discuss - Hearing Aid Care.

D. Discuss:

   1. Speech and Language Development
   2. Communication
   3. Deaf Education

E. Assess Speech and Language Development of the Child.
TEST IV - Colors.
   A. Present blocks of the following colors:
      blue, yellow, red, white, orange.
   B. Ask identification of blue and yellow.
   C. Record results.

TEST V - Foods.
   A. Present objects.
      apple, orange, milk carton or box, candy.
   B. Ask identification of orange and milk.
   C. Present pictures of the following foods:
      meat, fish, bread, water.
   D. Ask identification of water and bread.
   E. Record results.

TEST VI - Descriptive Words.
   A. Present large and small baby dolls and balls.
   B. Ask identification of each using language "biti" and "little".
   C. Record results.

TEST VII - Parts of the Body.
   A. Ask identification of mouth, nose, ears, eyes, foot.
   B. Record results.

TEST VIII - Clothing.
   A. Present boy or girl paper doll and the following clothes:
      pants, shirt, coat, dress, pajamas.
   B. Ask child to identify and put on two items.
   C. Record results.

TEST IX - Simple Directions.
   A. Ask three of the following activities:
      Can you jump? Open the door?
      Put the spoon in the cup. Put the fork on the table.
      Come here.
   B. Record results.
RECEPTIVE LANGUAGE EVALUATION - RESULTS

TEST I - Object Identification.

TEST II - Numbers.

TEST III - Picture Identification.

TEST IV - Colors.

TEST V - Foods.

TEST VI - Descriptive Words.

TEST VII - Parts of the Body.

TEST VIII - Clothing.
Results Continued

TEST IX - Simple Directions

Ideas taken from
Speechreading Test for Young
Children by: Delores S. Butt,
Ph.D., Volta Review - April/68

Child's Reaction To Test

1. How well and how long did child sit still during test?

2. How well did child attend to examiner's face?

3. Did child vocalize at all during test?

4. Other reactions:
## SUMMARY OF YEARLY REPORT – PARENT-INFANT PROGRAM

II. Please answer the following questions:

A. Arrangements.
   1. What improvements would you suggest for our demonstration home?

   2. Was the food purchased adequate for the week?

   3. Were transportation arrangements satisfactory?

B. Activities.
   1. What activities during the week seemed most helpful?

   2. What activities seemed least helpful?
II. Please answer the following questions - continued.

B. Activities - Continued.

3. What part of the weekly program do you feel could be omitted?

4. What other activities could we have included that would have been helpful to you?

C. Information and Attitudes.

1. What new ideas did you gain from the program in Anchorage?

2. Has your approach to your child's home training changed since your week in Anchorage? __ __ __ __ __ __ __ __

   Please describe:

3. Has your child's behavior changed in any way since your week here? __ __ __ __

   Explain:
II. Please answer the following questions - Continued.

C. Information and Attitudes - Continued.

4. What are your feelings about the value of video taping?

5. Would you be interested in coming to Anchorage for another week of education at a later date?

6. Do you have any additional comments about our Week Program in Anchorage?

(Family Interaction).

(Description of Child - Physical.

Social & Emotional.

Intellectual.

Communication Skills - Receptive Language.

Expressive Language.

Hearing.)

(Follow-up).
HOME VISITS
HOME VISIT

I. If possible, a home visit by the program teacher preceding the family's visit to the Demonstration Home is a good idea, to explain the Family Education Program to the parents. If impossible due to distance, time or weather, a public health nurse may be able to make the initial contact with the family.

II. Phone Call or Letter Prior to Home Visit.

Items to Discuss:

1. Is the child in school? Where? How often? Time?
2. Has the child had a hearing evaluation? When? Who?
3. Home address.
4. When can a home visit be made?
5. Directions to the home.
6. Teacher may be a little early or late.
7. Who is the public health nurse in the area?
8. Does anyone else work with your child? (Speech therapist?)

III. Prior to Home Visit:

1. Contact and make an appointment with the public health nurse for the day of the home visit.
2. Contact others in community who work with the family.

IV. Preparation for Home Visit:

1. Request per diem. (If over $100.00, transfer to travelers checks).
2. Plan trip itinerary.
3. Call travel bureau – order tickets. Also request excess baggage for Rover Camera, VTR and monitor.
4. Write letter to parents, telling them when you plan to come. Ask them to let you know if this is not convenient.
5. Contact public health nurse, teachers, physicians, social workers to arrange a meeting while you are in the area. (ref. physician, PHN, area PHN, area physician, audiologist, teacher, director of special education, social worker (BIA?), Head Start.)
6. Write for place to stay.
7. Check weather in area you plan to visit (are bush flights in operation?)
8. Pack –

Materials: Home Visit Reports
Child & Family Evaluations
Receptive & Expressive Language Evaluations
Articles, Idea Sheets, Books for family
Materials for home activity – tapes, games
Materials for talk with teachers and demonstration – transparencies, movies, records, tapes, overhead pens
IV. Preparation for Home Visit - Continued

Materials (continued)
Materials for talk with Family Aides
Camera and flash - film
Video camera, VTR and monitor
Fresh produce for teachers and family
Video tapes - blank and edited ones
Warm boots, mittens, hat, down parka, warm-up pants
Alarm clock and personal items
Flashlight
Tape for baggage (and twine)
Family Education Program album (see next page)
Articles, pictures and pages for parents and teachers
Brochures (Grant program and ATC)
Spiral notebook or paper
Records and movies
Visual aids
Lecture notes
Toys for children's activities
Materials for home visit
Reread file - pertinent information
Candy bars
Matches, Aspirin
Check book
Names of contacts

Personal Items: Stationery, address book, stamps, pen and pencil
Make-up, rollers, shampoo, comb, brush, mirror and spray
Hand lotion, cream, etc.
Toothbrush and toothpaste
Towel, wash cloth and soap
Pajamas or sleeping outfit and sleeping bag
Underwear - regular and longjohns
Wool socks, shoes and boots
Slacks and tops
Down parka, mukluks and warm-up pants
Hat, scarf, gloves and extras
Camera, film and flash bulbs, sun glasses

Food Items: crackers, sandwich spread, juices, fresh fruit, canned peaches, canned beans
V. Picture Album

The picture album should be sturdy with plastic covered pages. The kind of pages are not divided into sections is preferred. Put no more than two or three pictures on each page.

The purpose of the album is to help parents coming into the program know what to expect while in Anchorage.

In the album include the following pictures:

1. Demonstration Home - each room yard families and teachers at work

2. People who will be working with the family:
   Teacher
   Audiologist and a child being tested with earphones on
   Director and Assistant Director of Grant Secretary
   Aides
   Teachers of classes that will be visited Public health nurse or nutritionist

3. Places they will visit: Alaska Treatment Center Alaska Native Medical Center Public schools and classrooms Grocery Store Drug Store Laundromat Post cards - views of Anchorage and airports

VI. First Home Visit Schedule (Before coming to Anchorage)

1. Informal talk
   What has mother done so far? Observe her with the child. What material does she have? How much does she know? What kind of toy does the child play with, etc.?

2. Explain about the program. Demonstration Home, other parents, schedule, arrival, meals.

3. What to bring.

4. Fill out home visit form. (teacher)

5. Demonstration time: Give mother articles on deafness, find out what she wants help with.

6. Evaluation form (notes) and Home Visit Report. (cc: to all agency professionals involved with child).
VII Second Home Visit

1. Problems that have arisen.
2. What has worked, what has not and why?
3. Difference in child and home since before week in Anchorage.
4. New information for her to read.
5. Observe mother working with the child and give suggestions. (Video tape)
6. Evaluation form (notes) and Home Visit Report. (cc: to all agency professionals involved with child.)
Home Visit Evaluation by teacher

A. Physical Environment
1. Who lives in the home?
2. Describe home.
3. What does child play with?

B. Family Interaction
1. How did child react to teacher?
2. Parents' reaction during visit - warmth, genuineness.
3. Give examples of interaction between:
   a. mother and child
   b. father and child
   c. siblings and child
   d. others and child
   e. parents

C. Child's development
1. Motor development.
2. What development problems is family concerned about?
3. How does child react to frustration?
4. Other children to play with?
5. How does child communicate?
6. What speech?
7. What sounds is child aware of?
8. Describe hearing aid: condition
    use - which ear, what volume, how much worn
    problems

D. Treatment
1. Medical
2. Educational
E. Parents knowledge concerning hearing impairment.
   1. Hearing loss
   2. Language development
   3. Education
   4. What information needed?
   5. Acceptance of child's loss and awareness of child's needs.

F. What problems are parents most concerned with?

G. Other reactions during visit.

H. Summary:

Home Visit Evaluation

Please answer the following questions to help us evaluate our home visit program.

1. Did you find the home visit helpful? ____
   Why or why not?

2. What new ideas or information did you gain during the home visit?

3. How could we change the home visit to be of more help to you?

4. How many home visits would you like the teacher to make each year? ____
   How many hours would you like each home visit to last? ____

5. Was video taping done on the home visit? ____
   What are your feelings about the use of video taping?

6. What questions do you have now, after the home visit?
FAMILY EDUCATION AIDE PROGRAM
In rural settings the family has several alternatives after discovering their child is deaf, including the following:

1. To move to a city having special classes for the deaf.

2. To send the child to live in a foster home or residential setting while attending classes for the deaf, 10 months of the year.

3. To continue to live in home community and encourage teachers to seek special training and supplementary services and materials.

Depending on the degree of the hearing loss and other influencing factors, a decision is made.

For those families that do not move to the city and receive direct service through a program for the deaf, support can be continued through home visits, correspondence, teacher training and a Family Education Aide Program.

The purpose of the Family Education Aide Program is to provide regular (weekly) contacts with parents stimulating home activities for language development and to provide feedback to the Family Education Program staff.

The Family Education Aide should be able to read and write and should be recommended by individuals in the community as a dependable person who likes children and could work well with the family having the deaf child.

The Family Education Aide should receive at least one week of intensive training before the onset of the program. His training should include both observation and participation in family education activities. He should be entirely familiar with his responsibilities.
FAMILY EDUCATION PROGRAM

FAMILY EDUCATION AIDE PILOT PROGRAM

Time Required: ________ hours per week

Salary: $__________ per month

RESPONSIBILITIES:

- Special training sessions to learn about the needs of a deaf child and care for a hearing aid.
- Taking care of video equipment.
- Receiving activity and/or video tapes each week.
- Preparing materials for parent meeting.
- Meeting with parents (one 1 hr, home visit each week).
- Viewing video tape lessons with the family.
- Interpreting activity purpose to family.
- Filling out report.
- Returning report form and/or video tapes each week.
- Reporting needs of family.

SAMPLE PRESCRIBED HOME ACTIVITY

FAMILY EDUCATION PROGRAM FOR PRESCHOOL HEARING IMPAIRED

Home Activity 25

Activity: Numbered Lid Game

Purpose: To practice counting and recognizing numbers

Materials: 10 jar lids (which were painted in last week's activity), crayons

Words:
- one
- two
- three
- four
- five
- six
- seven
- eight
- nine
- ten
- turn
- over

Other Words Used: ____________________________

Preparation: Get materials together. Write one number (1-10) on the inside of each jar lid (on the inside that was painted last week).

Home Visit: Explain the purpose and the activity to the parents.
Do Activity:

Show the children the numbers printed in the jar lids. Count (say and sign) the numbers together.

Turn the lids so the numbers are facing down and mix them up.

One child turns over one lid and says the number written on the lid.

If it was not number 1, he turns that lid back over and someone else gets a chance to find number 1 by turning over another lid.

If it was number 1, it is left face up and another person turns over a lid in hopes of finding number 2. If it is not the right number, the lid is turned back down and someone else gets a chance until all ten lids have been turned up in correct order.

Turn the lids over, mix them up, and start the game over again.

Other Possibilities:

Turn lids so that the numbers are showing.

Have a child put them in order. Then the child puts 1 pencil in lid number 1, 2 erasers in lid number 2, 3 rocks in lid number 3, etc.

Discuss Activity:

Does Esther recognize more numbers? Yes

Can she count the right number of things into the right lid? Yes

Suggested Language:

"1, 2, 3, 4, 5, 6, 7, 8, 9, 10"

"Turn over one. Turn over two. Turn over three. Turn over four. Turn over five, etc."

"?"

"7 is not 1. Turn number 7 down. Who can find number 1?" "Your turn, Mary Lucy."

"1"

"1. Billy found 1. Who can find 2?" etc.

"Turn over lids. Mix the lids. Who can find number 1?"

"1"

"1, 2." "1, 2, 3." etc.

FAMILY AIDE EVALUATION

BY PARENTS

Please fill out by yourself. DON'T have the Family Aide help you.

1. Visits by _______ were _______.
   ___ very helpful.
   ___ somewhat helpful.
   ___ not helpful.

2. How often did _________ come
   to do a family activity with you?
   ___ once every week.
   ___ once every 2 weeks.
   ___ once every 3 weeks.
   ___ once every 4 weeks.

3. Did _________ show you some
   video tapes?
   ___ Yes
   ___ No

4. The video tapes were ________.
   ___ very helpful
   ___ somewhat helpful
   ___ not helpful

5. How could we be more helpful?

FAMILY AIDE EVALUATION
BY FAMILY AIDE

Please fill out this form completely, so we will know how to improve the Family Education Program.

1. How many hours each week did you spend as a "Family Aide"? _____

2. What problems did you have as a "Family Aide"?
   □ getting the family together?
   □ understanding the activity?
   □ explaining the activity to the parents?
   □ getting the parents to do the activity?
   □ getting the children to do the activity?
   □ filling out the weekly forms?
   □ more training needed?
   □ other problems - Explain __________________________

3. Did you have any problems with the video tapes or equipment?
   □ Yes, Explain __________________________
   □ No

4. Do you feel the activities have helped the children?
   □ Yes, Explain __________________________
   □ No

5. How could we improve our service to the family?

__________________________________________________
MEDIA PRODUCTION
MEDIA

In providing services to rural families where distance makes frequent contacts with professionals impossible, the use of media is essential. The following are samples of materials developed by the Early Education Grant project at the Alaska Treatment Center for use with rural families.

Idea Sheets for Language and Speech Development

Over 100 ideas for helping a hearing impaired child develop language are simply illustrated for clear understanding by those with a limited understanding of the English language. (See samples).

Give Him the Word

An informative booklet on normal language development and possible deviations, attempts to make communities aware of the importance of early identification.

Total Communication Video Tape Series

Twenty-seven, 20 minute video tape lessons in the use of sign language and fingerspelling, together with oral speech. 335 words which are included in Hand Book of Total Communication are introduced (10 to 15 words in each lesson). A series of lesson plans listing new vocabulary and practice sentences accompanies the video tapes.

Hand Book of Total Communication

A Beginning Vocabulary Reference for Deaf Children and Their Families has been designed to accompany the Total Communication Series of video tapes. This 350 page book represents each word on an individual page with an illustration of the concept, an illustration of the hand signal, and a manuscript presentation of the word. (See samples).

-1972-
LIPREADING

Stoop down to the child's level.

No

Yes!
Some words look alike

Beware of words which look alike on the lips.

If your child seems confused about what you are saying, watch yourself in the mirror as you say the word.

Don’t use your voice. Does it look like another word he might know?

bye bye
baby
mama

man
bat
mad
pat

boot
moon

green
red

meet
mean
LIPREADING

When talking to a lipreader

DON'T chew gum while you talk.

DON'T smoke when you talk.

DO trim that beard and mustache.

DON'T grin while you talk.
HEARING AID

It is your responsibility that he wear his hearing aid.

Is he wearing it everyday?

He needs it!
HEARING

Teach him to listen.

OUTSIDE SOUNDS

Listen! I hear an airplane!
As in moo, shoe, two, you, blue, moon, who, spoon, movie, and juice.

"00"
"PPP", "BBB", or "MMM"

As in baby, Mama, boy, man, bad, map, people, boat, purple, and cup.
SPEECH

"AH"

As in Mama, hot, stop, on, top, not, fox, pop, doctor, and box.
That's right, this is one of the many speech sounds not easy to see on the lips.
Every Time He Looks at You, Talk!

Objective: To help him become a better "listener."
To teach him to watch your face.
To help him want to talk with you.
To show him you are interested in what he is doing.

"You stacked the blocks."
Times to Bring in Language Throughout the Day

CHILD’S DAY

Good Morning!

Putting hearing aid on, getting dressed
Changing diapers, combing hair

Tie shoe
How pretty you look!

Self respect
Here’s some orange juice

Accidents
Snack time
Child's Day 2

Time with special animals and toys. Don't let him play alone all of the time, bring in language.

Daddy is coming home------
MOTHER'S DAY

Getting dressed
   Make beds or change linen

Meals, baking, making jello

Getting dressed
Setting and cleaning table
Wash, rinse, dry and put away dishes

Shopping,
   putting groceries away

Sorting laundry, wash, dry, fold and put away

Ride in the car.
Mother's Day continued

CLEAN HOUSE

- Broom
- Dust Pan
- Vacuum Cleaner
- Clean Windows
- Duster
- Pick up
- News
- Teddy Bear
Mother's Day continued

cleaning fish and game
tanning skins

Preserving and Canning
FATHER'S DAY

TOTAL COMMUNICATION LESSON NO. 9.

Signs are shown for the following words:

hurt  hair
sick   arm
nurse  leg
doctor hand
face   foot
eye    teacher
nose   book
mouth read
ear    preacher

After viewing the lesson, the picture sheets in the "Hand Book" will help as a reminder for practicing the signs.

Practice the following: (Sentences and/or phrases).

I hurt my ear.
The teacher read my book.
The preacher is at the church.
The priest walks to the store.
The doctor and nurse are sick.
Where is your brown book.
I have black hair.
My face is cold.
The doctor wants more coffee.

This lesson is to accompany "Total Communication video tape series available through - Alaska Treatment Center Early Education Asst. Grant 3710 E. 20th Ave. Anchorage, Alaska 99504
Please answer and mail back with the video tape.

TOTAL COMMUNICATION SERIES

Lesson

Date video tape was shown

Number of times it was watched

Number of people who watched

Who watched the video tape?

- □ Family aide
- □ Father
- □ Mother
- □ Brothers and/or sisters
- □ Neighbors and/or relatives
- □ Who?

Lesson:

- □ Understood how to make the new signs
- □ Practiced the sentences
- □ Video tape was broken
- □ Video tape quality was poor
  - □ hard to hear
  - □ hard to see
    - describe the problem

- □ Any other problems
  - describe the problem
EVALUATION OF "TOTAL COMMUNICATION" VIDEO TAPE SERIES

Please complete the questions and return to:

Early Education Grant Office
Alaska Treatment Center
3710 East 20th Avenue
Anchorage, Alaska 99504.

(Date)

1. The "Total Communication" video tape lessons were -
   Very Helpful
   Quite Helpful
   A Little Helpful
   Of No Help

2. The "Hand Book" Reference Manual was -
   Very Helpful
   Quite Helpful
   A Little Helpful
   Of No Help

3. The printed Lessons listing the new words and practice sentences were -
   Very Helpful
   Quite Helpful
   A Little Helpful
   Of No Help

4. What was good about the "Total Communication" Video Tape Series?

5. What did you not like about the "Total Communication" Video Tape Series?

6. How could it be improved?

7. Comments:
COMMUNITY RESOURCE
COMMUNITY RESOURCES

An important service of the Family Education Program is to act as a resource for problems or questions arising in the community regarding hearing loss. The staff should be available to discuss and meet with interested individuals and promote community education on the subject of hearing impairment.

When traveling in rural areas, the staff should provide educational programs in the evenings for the people in the community so that they become more aware of the implications of hearing loss. They should also seek out all health and educational professionals in the community to emphasize to them the importance of early identification.

In any community, there are children and adults who should be, but are not, receiving special educational services. These should be referred to the proper agency. Coordination of services and continued follow-up of all hearing impaired children and their families should be maintained.
TEACHER TRAINING
TEACHER TRAINING

The following methods of providing the regular teacher in the rural areas with assistance with the hearing impaired child have been utilized in the Family Education Program.

a) On-site teaching demonstration.
   (class or tutoring setting)
b) Peer training - teacher observes.
c) Education aide training.
d) Articles and reference materials.
e) Inservice meetings.
f) Correspondence course.
g) Video tape demonstrations.
h) Video tape lessons.
COURSE EVALUATION

Methods and Materials in Education of the Hearing Impaired

Semester ________________________

Instructor ________________________

Please complete this evaluation and return it with your FINAL.

1. Were the materials in the course relevant to your purposes?

2. How would you judge the amount of reading?

3. Was the course what you expected?

4. Please evaluate the materials used in the course as to their value:

   Value Scale

   Low | 1 | 2 | 3 | 4 | 5 | High

STUDENT OPINION OF TEACHING AND COURSE

COMPLETE CATALOG COURSE NO. (Abbreviation & Number—e.g., ANTH 312)  SECTION

Each of the items below deals with a characteristic of instructors or courses which students feel to be important. Indicate your response to each question by marking the appropriate number in the scale provided. The descriptive phrases supplied for each question give the values of the first and last numbers. Notice that there is no completely middle ground. If you don't feel strongly about a characteristic, use either 3 or 4 to indicate which was your tend to lean.

EXAMPLE:
How stimulating is winter? 

VERY BORING 1 2 3 4 5 6 VERY STIMULATING

In the above example you would circle: 1 if you feel it is very boring, 6 if you feel it is very stimulating.

PART I. CHARACTERISTICS OF THE TEACHER AND THE TEACHING

1. Is he helpful when students have difficulty? NOT HELPFUL 1 2 3 4 5 6 ACTIVELY HELPFUL

2. Does he appear sensitive to students' feelings and problems? UNAWARE 1 2 3 4 5 6 RESPONSIVE

3. Is he flexible? RIGID 1 2 3 4 5 6 FLEXIBLE

4. Does he make students feel free to ask questions, disagree, express their ideas, etc? INTOLERANT 1 2 3 4 5 6 ENCOURAGES STUDENT IDEAS

5. Is he fair and impartial in his dealings with the students? UNFAIR 1 2 3 4 5 6 FAIR

6. Is his speech adequate for teaching? UNINTELLIGIBLE 1 2 3 4 5 6 GOOD

7. Does he belittle students? BELITTLES 1 2 3 4 5 6 RESPECTS

8. Does he tell students when they have done particularly well? NEVER 1 2 3 4 5 6 ALWAYS

9. Does he dwell upon the obvious? DWELLS ON OBVIOUS 1 2 3 4 5 6 INTRODUCES INTERESTING IDEAS

10. Is he interested in the subject? SEEMS INTERESTED 1 2 3 4 5 6 SEEMS UNINTERESTED

11. Does he use enough examples or illustrations to clarify the material? NONE 1 2 3 4 5 6 MANY

12. Does he present material in a well-organized fashion? DISORGANIZED 1 2 3 4 5 6 WELL-ORGANIZED

13. Does he follow an outline? NOT AT ALL 1 2 3 4 5 6 VERY CLOSELY

14. Does he stimulate thinking? DULL 1 2 3 4 5 6 STIMULATING

15. Does he put his material across in an interesting way? DULL 1 2 3 4 5 6 VERY INTERESTING

16. Considering everything, how would you rate this teacher? VERY POOR 1 2 3 4 5 6 EXCELLENT

PART II. CHARACTERISTICS OF THE COURSE

1. Are the objectives of the course clear? UNCLEAR 1 2 3 4 5 6 CLEAR

2. Is the amount of work required appropriate for the credit received? TOO MUCH 1 2 3 4 5 6 TOO LITTLE

3. Is the assigned reading difficult? TOO EASY 1 2 3 4 5 6 TOO DIFFICULT

4. Are the tests fair? UNFAIR 1 2 3 4 5 6 FAIR

5. Are the grades assigned fairly? UNFAIRLY 1 2 3 4 5 6 FAIRLY

6. How would you rate the contribution of the textbook to the course? POOR 1 2 3 4 5 6 EXCELLENT

7. Considering everything, how would you rate this course? POOR 1 2 3 4 5 6 EXCELLENT

IF YOU HAVE ANY ADDITIONAL COMMENTS TO MAKE ABOUT THE COURSE OR THE INSTRUCTOR, YOU MAY MAKE THEM HERE OR ON THE BACK OF THIS PAGE.
EVALUATION
EVALUATION

Program objectives are written each year and progress evaluated every three months, with a final evaluation written yearly.

The evaluative measures utilized in the Family Education Program are included in each section.
