The Drug-Abuse Research Instrument Inventory is a listing of instruments used in drug-abuse research which have been added to the Inventory essentially by searching all the relevant literature of the past ten years, and through spontaneous submissions from the field. The Inventory also includes references, descriptions, etc. Most instruments listed are those generally referred to as behavioral or psychological and are primarily of the paper-and-pencil variety. The Inventory is intended as an aid to researchers interested in locating appropriate measures of variables for drug-abuse studies or methodological work. The Inventory is divided into six sections: Attitudes; Measurement of Subjective and Objective Effects of Drugs; Differentiation and Characteristics of Abusers; Access and Extent; Education and Knowledge; Program-related and Evaluation. Cross-references to instruments in other categories appear at the end of each section. New editions of the Inventory and supplements are sent to the original sources for verification of the accuracy and completeness of their entries. Although most instruments pertain directly to drug abuse and its various aspects, a few instruments do not have drug oriented questions, but are general psychological instruments listed here because of their use in studies of drug use and abuse. (Author/MLP)
DRUG-ABUSE RESEARCH INSTRUMENT INVENTORY
(D-ARII)

Fourth Edition and Supplement

Rockville, Maryland 20852

June 1973
The Drug-Abuse Research Instrument Inventory was first compiled by Dr. Ferneau in 1968. The present edition of D-ARII and its Supplement were produced by Social Systems Analysts under contract No. HSM-42-72-215 to the National Institute of Mental Health. Dr. Ferneau was Project Director. Sherwin J. Feinhandler, Ph.D., was Project Administrator at Social Systems Analysts. Louise G. Richards, Ph.D., was Project Officer at the National Institute of Mental Health.
Introduction

The Drug-Abuse Research Instrument Inventory is a listing of instruments used in drug-abuse research which have been added to the Inventory essentially by searching all the relevant literature of the past ten years, and through spontaneous submissions from the field. A few instruments date back fifteen years. The Inventory also includes references, descriptions, etc. Most instruments listed are those generally referred to as behavioral or psychological and are primarily of the paper-and-pencil variety. The Inventory is intended as an aid to researchers interested in locating appropriate measures of variables for drug-abuse studies or methodological work. Duplicating service is also available from SSA. (See enclosed ordering procedures).

The Inventory is divided into the following six sections: Attitudes; Measurement of Subjective and Objective Effects of Drugs; Differentiation and Characteristics of Abusers; Access and Extent; Education and Knowledge; Program-related and Evaluation. Cross-references to instruments in other categories appear at the end of each section. In most cases, the items in each section are listed in the order in which they were added to the Inventory; i.e., the latest entries have the highest numbers and are found at the end of each section.

New editions of the Inventory and Supplements are sent to the original sources for verification of the accuracy and completeness of their entries.

Although most instruments pertain directly to drug abuse and its various aspects, a few instruments do not have drug oriented questions, but are general psychological instruments listed here because of their use in studies of drug use and abuse; i.e., sub-scales of the MMPI. A few instruments included are largely of historical interest.

New instruments are added to the Inventory upon receipt. Second- and later-generations of materials are especially welcomed, as are appropriate references, bibliographies and other relevant data.

Comments and suggestions are welcome from providers and users of the Inventory.
Annotated bibliographies dealing with measures pertaining to tobacco smoking and drugs (TM Reports No. 8 and 9) are available from:

ERIC Clearinghouse on Tests, Measurement, and Evaluation
Educational Testing Service
Princeton, New Jersey 08540

Drug Abuse Current Awareness System (DACAS)
National Clearinghouse for Drug Abuse Information
5600 Fishers Lane
Rockville, Maryland 02852

The Research Reference Files is an archive in alcoholism, similar to D-ARII, and is available from:

Ralph G. Connor, Ph.D.
Professor, Sociology
Eastern Washington State College
Cheney, Washington 99004

Researchers will also be interested in reviewing:

May be obtained from:

Washington, D.C. 20005
INSTRUCTIONS

1. The following model entry shows the format of each listing. Information appears in the order indicated where applicable.

MODEL ENTRY

001AAG Instrument Title (no. pp.).

Number of questions; type of question; how administered; instructions included; answer sheet used; content and/or usage; population; drug content; design features; anonymity; general information.

Where obtainable if not from D-ARII.

Reports: References

001BAG Instrument related with above in derivation or usage

001CAG Instrument related with above in derivation or usage

002-H General Psychological Instrument*

Reports: References

a.) See explanation of Inventory number on the following page.
b.) Refers to respondent anonymity
c.) Source location; full or up-to-date information on author is not always available.
d.) An asterisk will be found after the title of a general psychological instrument which is not available from D-ARII.
2. The Inventory Number consists of six characters: The first is the general category into which the instrument has been placed; the second and third are ordinal numbers within category; the fourth contains information concerning a derivational relationship to another in the same study (a blank fourth character will be changed to an "A" in the original entry if the same institution develops a modified instrument.); the fifth and sixth characters are coded for drugs covered by the instrument. The codes are:

1 - Heroin
2 - Cocaine
3 - Other Narcotics
4 - Narcotics in General
5 - Speed
6 - Other Stimulants
7 - Stimulants in General
8 - Barbiturates & Other Depressants
9 - LSD
A - Other Hallucinogens
B - Hallucinogens in General
C - Marijuana
D - Marijuana & Hashish
E - Tobacco
F - Exempt Substances
G - Drugs in General
H - Not Drug Related
I - Methadone
J - Alcohol
K - Prescription Drugs in General
L - Marijuana & Alcohol
M - Marijuana & LSD
N - Heroin & Drugs in General

FOURTH EDITION

February 1973
100. Attitudes.
(see also: Education and Knowledge.)

101-G Untitled Questionnaire (4 pp.).

15 questions; multiple-choice; mailed; demographic; opinions about drug taking and personal experience with drug taking; "Higher Education Students" (ages 16-24); all drugs; anonymous.

University of Leicester, Leicester, England.

102-G Student Questionnaire about Drugs (20 pp.).

145 questions; multiple-choice; group interview; 1 page instructions; for use with IBM answer sheet; demographic, incidence and attitudes, sources of information, prevalence and reasons for use; students grades 7-14; all drugs; anonymous.

Addiction Research Foundation, Toronto.
100. Attitudes (continued).

102AG Drug Survey (12 pp.).

105 questions; multiple choice; self-administered; 1 page of instructions; for use with answer sheet; high school students; all drugs plus a non-existent drug.

103AG Views of Drug Abuse
103BG Concerns about Drug Use

These instruments are sections of the 17-page omnibus "Community Environment Study" which also assesses drug and drug-abuse knowledge, etc.

New York State Narcotic Addiction Control Commission.

104-C Attitude Scale toward Smoking Marijuana (8 pp.).

20 attitude statements; self-administered; 1 page of instructions; attitude towards own marijuana use and use of marijuana by others; anonymous; respondent circles only those statements with which he agrees.

105-G Social Attitude Questionnaire (17 pp.).

89 questions; multiple-choice and true/false; also includes demographic and incidence items; all drugs.

Texas Research Institute, Houston.
100. Attitudes (continued).

106-G Youth ATD Survey (2 pp.).

20 questions; Likert scale; self-administered; attitudes towards drugs.
San Diego Probation Department.

107-G Drug Write-in (1 p.).

Connecticut Alcohol and Drug Dependency Division.

108-E University of Illinois Survey (8 pp.).

88 questions; multiple-choice, 5-point scale; 1 page of directions; for use with separate answer sheet; attitudes toward smoking; high school students; test-retest reliability: males - .85, females - .89, overall - .87.

Department of Health and Safety Education, University of Illinois.

109-GH Drug Opinion Survey (11 pp.).

108 questions; 6-point scale; self-administered; also includes 1 page demographic and 1 page information; yields score in 6 factor areas.

Harvard Medical School.

110-G Drug Education Opinion Survey (2 pp.).

20 questions; 5-point scale; separate answer sheet.
Wayne County Intermediate School District, Michigan.
100. Attitudes (continued).

111-GH Metropolitan Youth Commission Questionnaire (9 pp.).

77 questions; 4 and 5-point scale; "Designed to find out what different young people think of the world and their part in it."; anonymous.

University of Oregon Medical School, Department of Psychiatry.

112-G The Drug Abuse Questionnaire (4 pp.).

40 questions; 7-point scale; 1 page instructions; yields 9 mean factor scores; adaptation of the Alcoholism Questionnaire.

Harvard Medical School and Boston City Hospital.

113AG Student Survey on Attitudes towards Drugs (20 pp.).

113BG Attitudes about Drugs - Teacher Questionnaire (11 pp.).

A. contains 2 pages instructions and 1 page demographic data; includes multiple-choice questions as does B. which has 1 page for demographic material.

Mendocino State Hospital, Talmage, California.

114AG Drug Problem Attitude Inventory (1 p.).

12 questions; attitudes towards drugs, drug education, availability and communication preferences; teenagers; anonymous.

114BG Drug Problem Attitude Inventory (1 p.).

12 questions; revised edition.

Northwestern State University, Natchitoches, Louisiana.
100. Attitudes (continued).

115-G Untitled (4 pp.).

23 questions; attitudes towards treatment and experience with treatment; VA psychologists.

Veterans Administration Center, Biloxi.

116-H Semantic Differential Technique*

117-4 Attitudes toward the Nalline Test Instrument

6 negative and 14 positive Likert scale items; reproduced in the first reference below.

Illinois State University.

118-C Questionnaire on Marijuana (1 p.).

18 questions; 2 - 5-point scale; attitudes of psychiatrists towards marijuana use, laws, etc.

Lafayette Clinic, Detroit.

Measurement of subjective and objective effects of drugs.

201-H The Addiction Research Center Inventory (ARCI). (24 pp.).

550 questions; true/false; separate answer sheet; devised for investigation of drug effects.

Printed; hence must be obtained from:

Charles A. Haertzen, Ph.D.
Addiction Research Center
P.O. Box 2000
Lexington, Kentucky 40501

Bibliography (5 pp.) is available from D-ARII.

Subjective Effects of Psychedelic Drugs (2 pp.).

33 questions; 6-point scale and open-ended

Bibliography (2 pp.) and data tabulation (2 pp.) are available from D-ARII.

Reports:

Tachistoscopic Stimulation*

200. Measurement of subjective and objective effects of drugs (continued).

204-H Gottschalk Figure-Perception Test (EFT).*

205-H Free Association Test (FAT).*

206-H Mosaic Design Test*

207-H The Modified Word Association Test*

208-H Mednick Remote Association Test (RAT).*

Yale University, Department of Psychiatry.
300. Differentiation and characteristics of abusers.

301-H Lexington Personality Inventory (LPI).*

Used to differentiate hospitalized addicts from other social and clinical groups and to some extent, to separate the addicts themselves into socially relevant sub-groups or types. Contains over 50 sub-scales.

Must be obtained from:

Jack Monroe, Ph.D.  
Clinical Research Center  
Leestown Pike  
Lexington, Kentucky  40507

Bibliography (2 pp.) and manual (10 pp.) are available from D-ARII.

302-HG Personal Inventory (10 pp.).

220 questions; true/false; for use with separate answer sheet; used to decide addicts' acceptability for psychotherapy.

Addiction Research Center, Lexington, Kentucky.

303-HJ Inventory of Habits and Attitudes (IHA). (9 pp.).

200 questions; constructed as a matched form of the Personal Inventory (PI), (see 302 above), for use with alcoholics.

Addiction Research Center, Lexington, Kentucky.
300. Differentiation and characteristics of abusers (continued).

304-G Drug Abuse Interview Form (35 pp.).

224 item structured interview, used to divide according to degree of drug involvement.

Hillside Hospital, Glen Oaks, New York.

305-MJ Yorkville LSD Users Study (3 pp.).

Differentiation from non-users.

Addiction Research Foundation, Toronto.

306-H Adventuresomeness Scale (6 pp.).

129 true/false questions adapted from the Personal Opinion Survey for use with IBM answer sheet.

Pennsylvania State University.

307-H Situational Preference Inventory (6 pp.).

28 sets of 3 statements; self-administered; 1 page of instructions; designed to assess individual styles of social interaction (cooperational, instrumental, or analytic); has been used with marijuana smokers.

Harvard University.
300. Differentiation and characteristics of abusers (continued).

308-H MMPI sub-scale*

19 questions; used to differentiate drug addicts from matched non-addict controls.

Seton Hall University.

309-HG Dallas Interview (11 pp.).

72 item structured interview; investigates academic, social, familial and work background, and parental drug use, motivations for drug use, personal drug experience. Also has program evaluation aspects.

Dallas School District.

310-HG Untitled Questionnaire (23 pp.).

262 questions; multiple-choice; open-ended.

Nassau County Drug Abuse and Addiction Commission.

311-H4 Suitable for Treatment Scale (ST). (4 pp.).

74 questions; includes items from the Lexington Personality Inventory (LPI) (see item 301-H), "which discriminated persons found suitable for treatment from those found not suitable . . in two independent samples obtained by randomly splitting the original samples of ST's and NST's into two groups."

Reports: English, G. and Jones, R. Salient differences between internal and external standards for hospitalizing opiate addicts. Psychological Reports, 1972, 30, 7-11.

300. Differentiation and characteristics of abusers (continued).

312ACG Marijuana Research Project - First Year (30 pp.).

158 questions; self-administered; for computer use, "life history, social style, drug history and social adaptation of both marijuana users and non-users."

312BCG Longitudinal Marijuana Study - Second Year (14 pp.).

66 questions; self-administered; for computer use.

312CCG Longitudinal Marijuana Study - Follow-Up Questionnaire (14 pp.).

68 questions; self-administered; for computer use.

All printed; hence must be obtained from:

Norman Q. Brill, M.D.
Department of Psychiatry
Center for Health Sciences
University of California, Los Angeles
Los Angeles, California 90024

313-H 16 PF Questionnaire*

314-H Self-Report Inventory (Form R-3) (4 pp.).

48 questions; 5-point scale; 1 page instructions.

University of Texas.
Differentiation and characteristics of abusers (continued).

315-H MMPI*

Burke, E. and Eichberg, R. Personality characteristics of adolescent users of dangerous drugs as indicated by the Minnesota Multiphasic Personality Inventory. *Journal of Nervous and Mental Diseases*, 1972, 154, 291-298.

316-H Eysenck Personality Inventory*

317-H Leary Interpersonal Check-List*

318-H Alcoholic versus Addict Differentiation Factorial Scale (AAF)*

Developed from items in the short form MMPI.

Addiction Research Center, Lexington, Kentucky.
300. Differentiation and characteristics of abusers (continued).

319-H Antisocial Scale (Ant)*

Developed from items in the MMPI.

320-C UWM Student Survey - 1968

60 questions; described and reproduced in full in the first citation below. Not available from D-ARII.

321-G Drugs at York (4 pp.).

24 questions, many open-ended; demographic; report-title related questions plus those regarding environmental pressures and motives.

322-FG Social Data Form

Described briefly in the citation below.

Available only from:

R. S. Weppner, Ph.D.
Chief, Social Science Section
NIMH Clinical Research Center
Lexington, Kentucky

300. Differentiation and characteristics of abusers (continued).

323-E Inquiry on Smoking (3 pp.).

42 questions; 35 on a 5-point scale.

Purdue University.

324-HG A and A Scales (8 pp.).

32 questions; mixed format, primarily open-ended; extent of participation in street life, age of beginning, aspirations, anomie and alienation, commitment to becoming conventional and conforming.

University of Southern California.

325-E Smokers Self-Testing Kit (12 pp.).

55 questions; 2, 4, and 5-point scale; designed to help persons find out what they know and how they feel about smoking. PHS Publication No. 1904 (Revised), June 1969. (HSM) 72-7506, September 1971.

University of Michigan
Ann Arbor, Michigan 48104

404-G Student Survey

54 questions; self-administered; anonymous.

Carnegie-Mellon University.

405AFK Pharmacy Questionnaire (5 pp.).

Asks for: 1. sex and residence of purchasers of control drugs, 2. the name, form, strength and dosage of the drug, 3. name of prescribing physician; for retail and hospital pharmacies.

405BK Physicians Questionnaire (10 pp.).

28 questions, interview; demographic and other background.

400. Access and extent (continued).

Physicians Questionnaire (continued).

Sims, M. Psychoactive drugs prescribed by general practitioners for functional or emotional ailments. Canadian Family Physician, 1972, 18, 85-93.

Addiction Research Foundation, Toronto.

Untitled Questionnaire - Original (2 pp.).

Untitled Questionnaire - Follow-up (2 pp.).

A. 23 questions; multiple-choice and open-ended; for computer use; anonymous.
B. 20 questions; multiple-choice and open-ended, 1 question is a 5-point scale; for computer use; grades 7-12; tobacco; anonymous.

Rock Island, Illinois Public School System.

Marijuana Usage Questionnaire (109 pp.).

Multiple-choice, from initial experience to portion of weekly income spent on substance, also asks about other drugs.

Social History of Marijuana Users (66 pp.).

Multiple-choice; family's and respondent's past, present, and anticipated future.

Alienation Questionnaire (7 pp.).

56 questions, 5-point scale.

Medical Questionnaire (56 pp.).

Multiple-choice, total health history.

All are for use in:
400. Access and extent (continued).

407DH Medical Questionnaire (continued).

Addiction Research Foundation, Toronto.

408AG Inter-university Drug Survey (16 pp.).

Questionnaire investigating the extent and pattern of drug use among college students.

Printed; hence must be obtained from:

Inter-university Drug Survey Council
Administrative Center
Brooklyn College
Brooklyn, New York 11210

408BG Personal and Confidential Survey (2 pp.).

45 questions; multiple-choice; self-administered; students.

State University of New York at Buffalo.

409-7M Survey of Drug Use Patterns (2 pp.).

35 questions; addresses itself to: frequency of drug use, mood states of students at the time of drug use, age at first use and reasons for continuing or discontinuing drug use, attitudes toward drug use, plans for future drug use, and attitudes toward drug legislation, extent of alienation of the student, and classification data that included sex, age, marital status, academic year, field of concentration, living situation, religion, ethnic origin, parental income, and social class.
400. Access and extent (continued).

409-7M Survey of Drug Use Patterns (continued).

University of Colorado Medical School.

409AG Modification of Survey of Drug Use Patterns (9 pp.).

Includes added category of barbiturates.

Institute of Living, Hartford, Connecticut.

410-G Drug, Alcohol, and Tobacco Usage - Grades 3-8 (1 p.).

4 questions; use, past and present, of tobacco, alcohol, marijuana, LSD, and speed; any a problem?; what would like to know regarding drugs; anonymous.

Reed Union School District, California.

411AG Drug Abuse Questionnaire, Form CR-2 (8 pp.).

130 questions; mixed format; primarily for epidemiological purposes but also contains demographic and social data; knowledge; attitudes; anonymous.

411BG Drug Abuse Questionnaire: An Introductory Guide for Users (4 pp.).

For use with 411AG.

Report: DAC Research Note No. 7.

Drug Abuse Center, The Johns Hopkins Hospital.

412-G Health and Drug Survey (2 pp.).

Designed to obtain estimates of drug access and use in 7th through 12th grade levels. Tailored for 15-minute administration, rapid key-punching, and computer analysis.

University of Arizona.
400. Access and extent (continued).

413-G Drug Use Questionnaire (14 pp.).

88 questions; multiple-choice; 1 page instruction; separate answer sheet; demographic; attitudes; secondary school students; anonymous.

Texas Research Institute, Houston.

414-G Drug Survey Instrument (6 pp.).

77 questions; multiple-choice; 1 page instruction to school superintendent, 1 page instruction to teachers; includes non-existent drug; grades 7-12; anonymous.

Veterans Administration, Salem, Virginia.

415-G NOLA Drug Usage Survey (9 pp.).

86 multiple-choice, 2 open-ended; 1 page instructions; separate answer sheet; anonymous.

Loyola University.

416-G Student Drug Use Questionnaire (18 pp.).

102 questions; utilized in research investigating personality correlates of college student drug use.

Lehigh University.

417AG Drug Survey Questionnaire (9 pp.).

99 questions; multiple-choice; separate answer sheet; group administration; frequency of use; source; students; 61 classes of drugs; anonymous.

417BG Drug Survey Questionnaire Administration Instructions (6 pp.).

Timberlawn Foundation, Dallas, Texas.
Access and extent (continued).

418-G Oakland Drug Abuse Questionnaire (6 pp.).

424-BG Psychedelic Survey (4 pp.).

36 questions; multiple-choice; separate answer card; students; anonymous.

College of San Mateo.

425-G Untitled Questionnaire (4 pp.).

28 questions; 2 pages demographic; 8 drug classes investigated; asks for, e.g. "adamant non-users" of various drugs, types of ex-users, frequency, high school students, anonymous.

Pennsylvania State University.

426-HG Untitled Questionnaire (20 pp.).

42 questions; structured, branching interview; 1 page for interviewer evaluation; for use with prisoners.

Printed; hence must be obtained from:

Dr. W. Eckerman
Director, Center for Study of Social Behavior
Research Triangle Institute
P. O. Box 12194
Research Triangle Park, North Carolina 27709

427-G National Health and Medical Research Council Survey (17 pp.).

73 questions; multiple-choice; self-administered; identifies individuals at risk of becoming addicted, use by significant others, 8 types of drugs; school children; anonymous.

Department of Public Health, New South Wales.

428-G Untitled Interview Schedule (11 pp.).

Questions proposed in a manner leading up to respondent's own use of the drug; 4 sections: general use of drugs for nonspecific reasons; knowledge and attitudes about specific drug use, drug users, and laws regarding drug use; respondent's use of the 17 classes of drugs, and knowledge of use of others; and demographic data.
400. Access and extent (continued).

428-G Untitled Interview Schedule (continued).

University of Miami, School of Medicine.

429-DJ Student Interview (8 pp.).

47 questions: 4 background, 6 alcohol; others on marijuana and hashish use and selling, on marijuana laws, and on mescaline and LSD; anonymous.

Stanford University.

430-9 Inventory of Psychedelic Experience (89 pp.).

Designed to characterize the psychedelic group and its experiences; extent; use (usual dosages, frequency, settings, purposes of use, etc.).

New Jersey Bureau of Research in Neurology and Psychiatry.

431-G Medical Survey (17 pp.).

72 questions; includes 1 page of instructions; used to determine previous use of illicit drugs and associated attitudes toward treatment at an army installation.

Walter Reed General Hospital.

432-G Questionnaire on Drug Knowledge and Behavior (7 pp.).

6 questions; 1 page demographic data; first awareness of, first interest in for own use, information data about, first experiment with, first life-style adoption of, and when stopped for several drug classes.
400. Access and extent (continued).

432-G Questionnaire on Drug Knowledge and Behavior (continued).

Must be obtained from:
Ronald E. Kirkpatrick
American Technical Assistance Corporation
7655 Old Springhouse Road
McLean, Virginia 22101

433-G Untitled Questionnaire (24 pp.).
128 questions; primarily multiple-choice; college students; all drugs; anonymous.

University of Connecticut.

434-G Drug Use Questionnaire (12 pp.).
Primarily multiple-choice; uses branching; for key-punch; regarding use of marijuana, alcohol, tobacco, hallucinogens, and amphetamines: frequency and duration of use, circumstances surrounding initiation, and reasons for (dis)continuing use; anonymous.

Boston University Medical Center.

435-M Drug Usage Survey (10 pp.).
11 questions; multiple-choice; self-administered; 1 page instruction; college student use and attitudes towards LSD and marijuana; anonymous; also includes 2 follow-up letters, 2 pages on methodology, and a cover letter to students.

California Institute of Technology.
400. Access and extent (continued).

436AG  Untitled Questionnaire (3 pp.).
436BG  Observer's Report (2 pp.).

A. involves 1 page of instructions; anonymous; to investigate nation-wide non-medical drug use in Canadian transients and street people; B. asks for report of drug involvement of respondent and interview setting.

Loyola College of Montreal.

437-CG  Untitled Questionnaire (12 pp.).

67 questions; multiple-choice; grades 7-12; cigarettes to glue to heroin.

Moorhead State College.

See 610-G.

400. Addendum

500. Education and Knowledge.

(see also: Attitudes.)

501AG  A Programmed Learning Unit on Drug Abuse Education (PLUDRUG).

501BG  The Drug I.Q. Test

Two parallel forms; designed to assess information possessed in relation to the use of dangerous drugs. . . designed to complement, and to be used with PLUDRUG (see above).

Must be obtained from author:

Russell N. Cassel, Ed.D.
School of Education
University of Wisconsin
Milwaukee, Wisconsin  53201

502-G  Drug Information Quiz (6 pp.).

50 questions; mixed format; self-administered; separate answer sheet.

Catholic University of America.

503-G  Drug Information Inventory (5 pp.).

35 questions; multiple-choice and true/false.

As requested by the author: "This instrument will be provided by and can be used only with the written permission of:"

Richard B. Stuart
1065 Frieze Building
University of Michigan
Ann Arbor, Michigan  48104

504-G  The Drug Abuse Description Questionnaire (12 pp.).

36 questions; mixed format; also assesses opinions about law enforcement and treatment techniques.

500. Education and Knowledge (continued).

505-HG Drug Knowledge Questionnaire (17 pp.).

115 questions; multiple-choice; self-administered; 1 page instruction; students; anonymous.

University of Oregon Medical School, Department of Psychiatry.

506-HG Student Attitude Survey (class) (18 pp.). (see 607).

Includes a series of cross-cultural items to "tap whatever sense of optimism that the (high school) students feel" - on a 10-point scale. Also investigates family and community influence; and as resources regarding drug information; and incorporates the "Purpose in Life Test".

California State College.

507-G Drug Survey (4 pp.).

55 questions; used with teachers in a public school system to aid in formulating a drug-education program.

Caldwell School District.

508-G Drug Knowledge Inventory (7 pp.).

50 questions; true/false; response sheet; tally sheet; 1 page of instructions and suggested use. Author (P. Dolan) requests description include "designed to indicate to the person taking the test the areas in which he is most and least knowledgeable . . . and the test is designed for paraprofessionals and non-medical professionals".

Metropolitan Training Institute, New York.

See 428-G and 610-G.
600. Program-Related and Evaluation.

601AG School Drug-Counseling Program Evaluation (1 p.).
For use with drug counselors.

601BG School Drug-Counseling Program Evaluation (1 p.).
For use with students.

Committee for Psychedelic Drug Information.

602AG Contact Form A (3 pp.).
602BG Contact Form B (2 pp.).
Initiated during first telephone or "drop-in" contact, for
treatment decisions and evaluation.

Texas Research Institute of Mental Sciences.

603-H Social Adjustment Profile (2 pp.).
For assessing treatment outcome in a drug dependence treatment
unit.
Veterans Administration Hospital, Allen Park, Michigan.

604AG HARP Intake Questionnaire (Rev. 9-69) (19 pp.).
113 questions; for key-punch.

604BG HARP Follow-Up Questionnaire (Rev. 2-70) (19 pp.).
50 questions; for key-punch.

604CG Drug Interview Schedule (Rev. 1-70) (4 pp.).
Outlines areas of inquiry: general; family history; S's history
as a child; introduction to psychedelics, etc.; subsequent usage,
and present and future (e.g. role of drugs in life).

604DG Life History Outline (Rev. 1-70) (4 pp.).
Outlines interview areas (e.g. transition from home to the Haight).

604EHG Philosophy Interview (3 pp.).
57 questions; current beliefs and values, changes in value system;
involvement in Haight-Ashbury; drug use; personal appearance; future
plans; plans for children; three wishes; and inquiry regarding imagi-
native processes.

Berkeley Center for Drug Studies.
600. Program-Related and Evaluation (continued).

605-G Drug Treatment Program Interview Schedule (10 pp.).

For interviewer and key-punching.

Mendocino State Hospital, California.

606-HG Untitled Intake Form (9 pp.).

77 questions; self-administered; demographic; childhood and family background; drug frequency; used with clients of a free clinic (the "Outside-In") for the drug culture.

University of Oregon Medical School, Department of Psychiatry.

607-G Student Attitude Survey (Individual) (6 pp.). (See 506).

Evaluation (by high school students) of ex-addict consultants in a drug education program.

California State College.

608-G Drug Information Questionnaire (4 pp.).

40 questions; 5-point scale; 1 page demographic; used to evaluate Drug Awareness Workshop Program, July 1972.

State University of New York, Plattsburgh.

609-G Untitled Questionnaire (13 pp.).

21 questions; mixed format; 1 page instructions; for evaluation of undergraduate course on drugs, attitudes towards drugs before and after course, knowledge etc.

Reports: ERIC**ED 057 397.

Abstract: Research in Education; April, 1972.

Carnegie-Mellon University.
600. Program-Related and Evaluation (continued).

610-G Drug Use Scale (10 pp.).

48 questions; 6-point agree-disagree scale with five drug classes; 1 page for scoring; students; anonymous.

Southern Illinois University.

611-11 Patient Progress Report (18 pp.).

153 questions; includes branching; for use with separate answer sheet; also termed: "Social History Questionnaire".

Providence Hospital, Holyoke, Massachusetts.

612-1G Personal History (4 pp.).

Approximately 80 questions; psycho-social intake form; besides expected data, is concerned with "family and educational background, early childhood deprivation, and experience in the armed forces (especially with regard to all aspects of drug taking)".

Haight-Ashbury Free Medical Clinic.

613-13 Discharge Plan Questionnaire (1 p.).

3 questions; is fully described in report listed below. Not available from D-ARII.

Beth Israel Medical Center.
600. Program-Related and Evaluation (continued).

614-G Drug Training Program Questionnaire (15 pp.).

77 questions; mixed format; self-administered; 1 page instructions; used in evaluation of program for training social workers; anonymous.

Simmons College, School of Social Work.

615-H Tennessee Self-Concept Scale*

Department of Mental Health, Boston, Massachusetts.

616-NH Personal and Social Inventory (26 pp.).

125 questions; interview; family background; drug and treatment history; personality assessment.

Addiction Research and Treatment Corporation, Brooklyn, New York.

617AG Admission Form (1 p.).

617BG Drug History (1 p.).

All drug use, drug of choice; route; detoxification history; support source; arrests; treatment history, etc.

617CG Evaluation Conference Form (1 p.).

Major drug use; disposition, etc.

617DG Termination Form (1 p.).

Reason; recommendations; referral; treatment, etc.

617EG Research Card (1 p.).

Demographic, type of contact; research forms completed, etc.

Comprehensive Drug Abuse Program, Sheppard and Enoch Pratt Hospital, Baltimore, Maryland.

See 309-HG, 428-G, and 610-G.
600. Program-Related and Evaluation (continued).

600. Addendum

Project Selection and Evaluation Process

Digital Resources Corporation
444 W. Ocean Boulevard Suite 808
Long Beach, California 90802

A synopsis of the juvenile drug survey method and approach, and a mechanism for a priori and ex post facto evaluation of such methods.
This is a supplement to the Drug-Abuse Research Instrument Inventory, dated February, 1973. It is issued to those who have received the Inventory, or it is issued together with a copy of the Inventory.

The Introduction, Model Entry, and Operating Procedures noted in the Inventory also apply to this supplement.

In addition to new instrument listings, this supplement also contains modifications of descriptions, references, and Inventory numbers of some of the entries in the previous edition of the Inventory. Modifications appear before new entries in each section.

Researchers in this area will be interested in obtaining:

Drug Abuse Current Awareness System (DACAS)
National Clearinghouse for Drug Abuse Information
5600 Fishers Lane
Rockville, Maryland 20852
100. Attitudes.

(see also: Education and Knowledge.)

113BG Modification of 114AG; no longer asks why drug use stopped; question regarding talking with someone about drugs now is cast in terms of who to go to for advice about drugs. Respondent now asked how often has trouble communicating with parents; other minor changes.

119-E Questionnaire on Smoking (2 pp.).

15 questions; also investigates habits.

Veterans Administration Hospital, Portland, Oregon.

120-G Opinion Survey (7 pp.). (See 510).

23 questions; Likert Scale; 1 page of instructions; 1 page demographic; all drugs.

121-E Smoking Attitude Scale

Two parallel forms; 22 questions each; assigned median scale weights. Totally reproduced in first reference cited below:

Scholastic aptitude and smoking attitude and behavior of college males. *Journal of Psychology*, 1966, 64, 63-68.

Sex difference in smoking attitude, behavior, and belief of college students. *Journal of Psychology*, 1966, 64, 249-255.

Boston College.
100. Attitudes (continued).

22-C  Opinion Questionnaire (3 pp.).

Two parallel forms; 22 questions each; 1 page demographic data; attitudes regarding marijuana.

Boston College.

23-C  Public Opinion Poll (4 pp.).

30 questions; mixed format; includes 1 page regarding respondent's experience with marijuana; "to discover how people feel about the use and control of marijuana"; background characteristics, general knowledge about marijuana, beliefs about the effects of using marijuana, knowledge of present legal restrictions, advocated changes in laws concerning marijuana and dimensions of the subject's opinions.

Washington State University.

24AG Questionnaire - Form A (4 pp.).
24BG Questionnaire - Form B (5 pp.).

A. has 50 questions; 5-point Likert Scale, multiple-choice, matching (vernacular terms with generic names); 1 page of instructions; 15-17 year olds.
B. has 51 questions; 5-point Likert Scale, multiple-choice, and matching; 1 page of instructions; 15-17 year olds.

Leeds University.
100. Attitudes (continued).

125-G  Attitude Scale (2 pp.).

7-point scale; current issues, including drugs; all drugs.

Weinstock, A. and Lerner, R. Attitudes of late adolescents and their parents toward contemporary issues. Psychological Reports, 1972, 30, 239-244.

Eastern Michigan University.

126AG  Views on Drug Use (25 pp.).
126BG  Views on Drug Use (Student) (37 pp.).
126CG  Parent's Questionnaire: Views of Drug Use (16 pp.).
126DG  Teacher's Questionnaire: Views of Drug Use (11 pp.).

A. has multiple-choice and 5-point scale items; attitudes towards deviant behavior in general, and knowledge of and participation in drug subculture; primarily for non-users; anonymous.
B. has multiple-choice and 5-point scale items; 1 page of instructions; anonymous.
C. has 23 questions with many sub-parts; mixed format; asks parents to assess degree of children's involvement with drugs.
D. has 18 questions with many sub-parts; mixed format; all drugs.

New Jersey Bureau of Research in Neurology and Psychiatry.

127-E  University of Illinois Survey (8 pp.).

88 questions; multiple-choice and 5-point scale; 1 page of instructions; separate answer sheet; high school students; test-retest reliability = .85 for males, .89 for females and .87 overall.

University of Illinois.
200. Measurement of subjective and objective effects of drugs.

**209-G Subjective Drug Effects Questionnaire (14 pp.).**

272 questions; interview; 1 page of instructions for initial administration, and 1 page short form for later administration; for key-punch use; physical feelings, feelings and mood, thought processes, perception.

General information about the SDEQ, its Scales and Scoring Procedures (5 pp.), and a list of A Priori and Empirical Scales (24 pp.) are also available from D-ARI.

NIMH.

**210-9 Subjective Questionnaire**

74 items; answer yes/no; "covers a wide range of potential alterations in perception, relationship with the environment, thought processes, emotions, experiencing of self and bodily reactions".

Not available from D-ARI. Totally reproduced in first reference:

Measurement of subjective and objective effects of drugs (continued).

**210AG** The Levine-Ludwig Modification of the Linton-Langs Questionnaire (8 pp.).

90 questions; answer yes/no; self-administered; to evaluate changes in thinking, time perception, meaning, affect, body image, somatic state, perception and loss of control while under influence of drugs.

Maimonides Medical Center, Brooklyn.

**211-4** Irwin Comprehensive Human Assessment Procedure

The procedure is used for assessing the long-term behavioral, cognitive and physiological effects of narcotic maintenance therapy and includes the following:

- **211A4** Subjective State Questionnaire
  68 items.

- **211B4** Adverse Symptom Checklist
  30 items.

- **211C4** Untitled
  70 items; 9-point scale; psychosocial and physiological behavior (for observational assessment and quantification).

- **211D4** Special Performance Tests
  Reading time; handwriting length; impulse control; time estimation; number learning and doubling; speed of closure; Minnesota clerical tests.

Author also reports that:
"The procedure has shown good inter-observer reliability (e.g., 82 and 96% agreement between observers within a 0.5 and 1.0 difference in scoring respectively on a 0-8 scale)."

**Available only from:**

Samuel Irwin, Ph.D.
Department of Psychiatry
University of Oregon Medical School
3181 S.W. Sam Jackson Park Road
Portland, Oregon 97201
200. Measurement of subjective and objective effects of drugs (continued).

212-C From Heroin to Methadone - Social Role Changes: Focussed Interview Schedule (15 pp.).

1 page of instructions; demographic, family and childhood, drug use (tobacco to heroin), and current trends in addiction.

New Jersey Bureau of Research in Neurology and Psychiatry.

213BD Participant Observer Schedule (29 pp.).

Multiple-choice; self-administered; 1 page of instructions; for detailed description of "drug" (psychedelic) and "non-drug" (marijuana and hashish) gatherings.

New Jersey Bureau of Research in Neurology and Psychiatry.
300. Differentiation and characteristics of abusers.

331-H Purpose in Life Test (4 pp.).
25 questions; 7-point scale.

College of William and Mary.

332-G Jargon Word Association Test (2 pp.).

Fifty stimulus words with space to record reaction time and response.

Manual of instructions including reliability and validity data and section of the establishment of cut-off scores (9 pp.) and a list of all study-associations to all stimulus words and frequencies (27 pp.) is also available from D-AHIT.

PHS Hospital, New Orleans.

333-G Inventory of Selected Experiences (ISE) (3 pp.).

60 questions; answer yes/no; ascriptions of need-reduction properties to the implicated substances, attributions of beneficial or pleasurable consequences to drug use or alcohol consumption, and expressions of protective attitudes toward substance abusers.

NIMH, Lexington, Kentucky.

334-I Patient Questionnaire

13 questions; multiple-choice, open-ended; characteristics of methadone maintenance patients.

Totally reproduced in reference cited below.

Greenwich House Counseling Center, New York.
300. Differentiation and characteristics of abusers (continued).

335ABG Interview Schedule for Informal Psychedelic Groups (18 pp.).
335BBG Interview Schedule for Psychedelic Work Communes (19 pp.).

A. has 19 questions; open-ended; 1 page of instructions and judgement of reliability of respondent; history, homogeneity of attitudes and life styles; group leadership activities, goals etc.
B. has 1 page of instructions; approximately the same as A.

New Jersey Bureau of Research in Neurology and Psychiatry.

336-G Untitled Questionnaire (30 pp.).

50 questions; multiple-choice, open-ended; in general, concerned with medical, psychiatric, and drug-abuse problems; 1/2 hour to complete.

School of Medicine, University of California at San Diego.

337-G Untitled Questionnaire (10 pp.).

52 questions; multiple-choice; parent-child relationships, order of first drug use, age at initial use, age at last usage; heroin addicts.

Boston College.

See 445-GH
400. Access and extent.

402-G Based on 435-M

404AG Student Survey (10 pp.).

54 questions; multiple-choice, scales; self-administered; 2 pages of instructions; cover letter; follow-up letter; "directions" sheet which is a campus mail return card; college students; "no-doze" to heroin.

404BG Student Survey, CMU Juniors, Class of 1972 (7 pp.).

404CG Student Survey, CMU Seniors, Class of 1972 (7 pp.).

Both B and C are follow-ups for A. Each have a cover letter and 2 pages of instructions; demographic; satisfaction with life, school, interpersonal relations, drug usage, frequency, future use.

Carnegie-Mellon University.

438-CG Untitled Questionnaire (4 pp.).

28 questions; primarily open-ended; interview; use, attitude, and expected effects of marijuana; use of other drugs.

University of Washington, Seattle.

439-G Industrial Drug Abuse Questionnaire (3 pp.).

Investigation of drug-related behavior while actually on-the-job in business or industry; anonymous.

Training for Living Institute.

440-LE Untitled Questionnaire (2 pp.).

19 questions; mixed format; investigates pattern of substance use and inter-relationships; anonymous.

Veterans Administration Hospital, San Francisco.
400. Access and extent (continued).

41-4 Drug Survey for Veterans (2 pp.).

5 questions; for Vietnam Era veterans who use VA services to tell about use of narcotic drugs (degree, past and/or present use); anonymous.

VAOPC, Boston.

42AG Parent Questionnaire (Wave I, Fall 1971) (16 pp.).
42BG Student Questionnaire (Wave I, Fall 1971) (19 pp.).
42CG Parent Questionnaire (Wave II, Spring 1971) (11 pp.).
42DG Student Questionnaire (Wave II, Spring 1972) (19 pp.).

A. has 93 questions; multiple-choice; self-administered; home background, medical and non-medical use of drugs.
B. has 96 questions; multiple-choice; for classroom administration; demographic, medical and non-medical use of drugs (in home and own use), attitudes toward drugs.
C. has 75 questions; multiple-choice; self-administered.
D. has 97 questions; multiple-choice; for classroom administration.

43-C Survey of Marihuana Use (9 pp.).

Sections with sub-sections; multiple-choice and open-ended; "administered orally avoiding risk of blank answers" - Ss questioned to "find out why a particular answer was given. Occasionally, questions were asked twice, at different times during the interview session ..." - questioned in private; aimed at moderate to heavy smokers; sections are: Method of Use, Usual Setting; Ownership Patterns; Activity Patterns; Other Drugs; Subjective Views; Legal and Political Factors; Communication; Qualitative Analysis of Marihuana; Personal Perceptions; After-Effect.

University of California Law School.
400. Access and extent (continued).

444-G Drug Questionnaire (11 pp.).

61 questions; multiple-choice and open-ended; 1 page of instructions; coded for machine data processing; all drugs. Used in 1970 high school survey. Accompanied by 1 page of instructions for administration.

Minneapolis Public Schools.

445-GH Life Styles and Campus Communities (26 pp.).

87 questions; multiple-choice, Likert Scale; 1 page of instructions and cover letter; national survey mailed to 200 random college freshman; from dress styles to drug use.

Johns Hopkins University.

446AG Drug Use Questionnaire (1 p.).
446BG Winter 1968 Questionnaire (4 pp.).
446CG 1972 Questionnaire (3 pp.).

A. has 9 questions; multiple-choice and open-ended; marijuana, LSD and hallucinogens in general; forerunner of B; Not available from D-ARII. Totally reproduced in first reference.
B. has 38 questions; multiple-choice, scales, open-ended; tobacco, alcohol, marijuana and hallucinogens.
C. has 53 questions; multiple choice.

Dartmouth College.
400. Access and extent (continued).

447-G Untitled Questionnaire (7 pp.).

Over 40 questions; most multiple-choice; for computer use; 1 page of instructions; coffee/tea to heroin/methadone.

New York University Medical Center.

448AH Interview Schedule (41 pp.).
448BH Response Booklet (16 pp.).
448CC Incident Response - Marijuana - Form 72 (5 pp.).
448DG Incident Response - Other Chemicals - Form 73 (5 pp.).

A. has 85 questions; branching; much regarding family and delinquency; multiple-choice.
B. has Scales: Likert, Osgood, Social Distance; interview; for use with A. C. and D. are for use with B. For 2 items from 17 item Delinquent Act list in A.; to record details regarding all drug offenses; generally open-ended; branching.

All used in the second National Survey of Youth - 1972.

Institute for Social Research, University of Michigan.

449-G Untitled Questionnaire (6 pp.).

31 questions; multiple-choice; answer sheet; 2-question evaluation of questionnaire; marijuana to heroin.

California State College at Long Beach.

450AG 7th and 8th Grade Survey
450BG High School Survey (1 p.).

A. and B. have same 7 multiple-choice questions regarding use of drugs during the past year. Used in 5 annual surveys.

Reports: Blackford, L. Do high school students who use LSD tend to avoid alcoholic beverages? Unpublished. Undated.

(no author listed.) Levels of (drug) use reported by junior and senior high school students. Unpublished, 1972.

Department of Health and Welfare, San Mateo County.
400. Access and extent (continued).

451-4 Drug Abuse and Narcotic Addiction Questionnaire (2 pp.).

9 questions; multiple-choice and open-ended; arrests; fatalities; resident addicts (in treatment); education; assistance needed; distributed to local mayors.

Monmouth County (N.J.) Narcotics Council.

452-G Community Survey (15 pp.).

136 questions; multiple-choice, 4-point scale, open-ended; self-administered; for computer use; use, attitudes, knowledge; anonymous.

Printed; must be obtained from:

Drug Research Center
Upper East Tennessee Council on
Alcoholism and Drug Dependence
201 W. Market Street
Kingsport, Tennessee 37660

453-G Untitled Questionnaire (22 pp.).

Self-administered; multiple-choice, scales; assays meanings evoked by different drugs, differentiation between users and non-users (opinion), subjective effects, frequency of use: 15-17 year olds, anonymous.

Leeds University.

454-G Wesleyan University Student Questionnaire (6 pp.).

30 questions; primarily multiple-choice; all drugs.

Wesleyan University.
400. Access and extent (continued).

455-G Marihuana-Drug-Use-Project (27 pp.).

102 questions; open-ended and multiple-choice; interview (1-1 1/2 hours); demographic; all drugs; respondent has identification code number; for key-punch use.

The marihuana muddle, Lexington, Ma.: D.C. Heath, in press.

Illinois State University.

456-G Untitled Questionnaire (37 pp.).

66 questions; primarily multiple-choice; for computer use; "... to study drug use among young people"; anonymous.

Printed: hence, must be obtained from:

Patrick O'Reilly
Co-Director
Center for Survey Research
17 Kossuth Street
New Haven, Connecticut 06519

457-C 1969 Questionnaire (1 p.).

5 questions; branching; multiple-choice; marijuana use, opinion regarding legal penalties.

University of Maryland.

458-G High School Study (12 pp.).

72 questions; primarily yes/no; self-administered; attitudes, use by self and others; all drugs; anonymous.

Stanford University.
400. Access and extent (continued).

459-G  Anonymous Poll #1 (2 pp.).

21 questions; multiple-choice and 5-point scale; all drugs.

Horowitz, J. and Sedlacek, W. University student attitudes and behavior toward drugs. Mimeo. Undated.

University of Maryland.

460-GH  Interview Schedule for Young Black Men (74 pp.).

303 questions; 3 pages interviewer observation; demographic; social history; explores aspects of many deviant behaviors, including the use of all drugs.

Washington University Medical School, St. Louis, Missouri.

461-GK  Medication and Drug Survey of Out-Patients Questionnaire (1 p.).

Demographic data; information regarding general medicine-taking; prescriptions, birth control pills, vitamins, coffee or tea, cigarettes, and liquor; random new admissions.

University of California, Irvine.
400. Access and extent (continued).

462-G High School Schedule - Alcohol and Drug Survey (16 pp.).

Questions are 5-point scale; open-ended, multiple-choice, agree-disagree, yes-no; personal data, family relations, social and self-attitudes, present-day social issues (opinions); all drugs.

453AG Questionnaire B and C (7 pp.).

B. has 84 questions: first 14 regarding how you would choose to feel - on a 5-point scale (much less/more often, as often as I do now), yes/no regarding the basic 14 questions vis-a-vis general substance use, marijuana, LSD, and amphetamine.

C. has 6 questions - for each, pick one of two alternatives as a desirable drug effect. Both used with undergraduate males as well as those noted below.

B. is also known as "Rouse and Ewing Desired Mental States and Associated Risk-Taking Questionnaire"; C. is also known as "Rouse and Ewing Mental States Forced Choice".

463BCG Rouse and Ewing Drug Use Questionnaire (1 p.).

3 questions; multiple-choice and yes/no; source of drug information, marijuana, and generally use of other drugs.

School of Medicine, University of North Carolina.
400. Access and extent (continued).

464-G  Untitled Questionnaire (22 pp.).

40 questions; multiple-choice, scale and open-ended; 2 pages of instructions; "feelings and experiences regarding the use of drugs"; all drugs; anonymous; planned follow-up; respondent asked to evaluate questionnaire.

Brock University, Ontario.

465-CG  A Survey of Indian Hemp Smoking among Lagos Prisoners (7 pp.).

77 questions; open-ended and multiple-choice; for computer use; demographic material, early background, criminal history, previous hemp usage, other drug history, experiences, etc. with hemp, prison experience, etc.

University of Lagos, Nigeria.

466-G  Drug Usage and Education Survey (4 pp.).

30 questions; to high schools "following a talk given by a professional staff member given to the student body in order to elicit trust and honesty"; 1 page of instructions; also regarding type of drug program wanted; multiple-choice; all drugs; anonymous.

Monmouth County (N.J.) Narcotics Council.
500. Education and Knowledge.

(see also: Attitudes.)

509-G Drug Knowledge Inventory

44 questions; multiple-choice; for student use.

A 28 page Discussion Guide is also included.

Printed; hence must be obtained from:

Family Life Publications, Inc.
Box 6725
Durham, North Carolina 27708

Price: $.85

510-G Drug Knowledge Questionnaire (13 pp.). (see 120).

52 questions; multiple-choice; 1 page instructions, 1 page demographic; all drugs.

Drug Education and Training Center, Philadelphia.

511-E Thompson Smoking and Tobacco Knowledge Test (4 pp.).

43 questions; multiple-choice; can be used with IBM answer sheet; accompanying sheet includes Test Key and Teaching Suggestions.

Mankato State College.

512-G Information Test on Drugs and Drug Abuse (4 pp.).

25 questions; multiple-choice; 1 page answer sheet; all drugs.

Wagner College, New York.
600. Program-Related and Evaluation.

604FG Drug Effects Questionnaire (4 pp.).

30 questions; 1 page of instructions; scale effects for drug from alcohol to heroin to "ideal drug".

604GCH Childhood Questionnaire (12 pp.).

56 questions; 1 page of instructions; up to age 15.

604HGH Written Interview (10 pp.).

27 open-ended questions; e.g.: movies seen, feelings regarding social and political issues; physical health; heroes; work enjoyed; 1 page of instructions.

604IGH Untitled Questionnaire (3 pp.).

4 open-ended questions: earliest memory; earliest memory of father, of mother; most significant early memory.

604JGH Decision Stories (7 pp.).

Includes 5 stories; answer decision questions regarding each; branching.

604KGH Follow-up: Situational Appraisal Inventory-Form J (4 pp.).

30 questions; 7-point scale (least wrong to most wrong) to rate outcome of situation; 1 page of instructions.

604LGB Follow-up II: Description of Drug Experiences (6 pp.).

6 questions (open-ended, semi-structured); most recent psychedelic trip, good trip, bad trip, flashbacks, other drugs, stopping or change.

604MGH Follow-up Clarification Kit (30 pp.).

93 questions; multiple-choice, open-ended; for computer use; 3 sections: general, family, drugs.

Berkeley Center for Drug Studies.
