ABSTRACT
This document is one of several module clusters developed for the Camden Teacher Corps project. This module cluster is designed to enable students to have experience with and develop skills in writing educational policy, anticipating problems related to the implementation of the policy, and planning possible actions or strategies the teacher might use. The following modules are contained within this cluster: a) Writing Educational Policy, b) Policy Presentation Preparation, c) Policy Presentation, d) Defense of Policy, and e) School Board Policy Decision. For each module, objectives, prerequisites, preassessment, instructional activities, postassessment and remediation activities are stated. (JA)

Dear Colleague:

Our involvement in the Camden Teacher Corps Project has resulted in the development of several module clusters. The clusters are the primary mode of instruction in this competency-based teacher education program. The program follows the guidelines set forth by the U.S. Office of Education, Department of H E W.

Many of these modules are based on a list of teacher competencies which has been developed by members of the Elementary Education Department. The list represents the core competencies and is intended to be representative of a behavioral approach to teaching. These competencies comprise the nucleus of Glassboro's teacher education program.

All these modules specify competencies and describe a scenario for self-paced learning in a field oriented setting. Clearly this is a process which is in marked contrast to the accumulation of credits acquired primarily in college classrooms.

We invite your use, criticism, and refinement of these modules as a means of joining us in creating a more generative climate for developing competent, open, and hopefully healthy-minded teachers.

Sincerely yours,

Instructions for Using a Glassboro State College Module Cluster

A Glassboro State College Module Cluster aims at arranging a learning experience in a very specific way. The goal of the cluster is to facilitate successful, self-paced learning for the student.

1. Glassboro State College module clusters are intended to be used by students with the cooperation of an instructor. The instructor will give a brief explanation about the particular modular cluster. This should include the rationale for the cluster as well as general arrangements for completing the module.

2. After the initial meeting with the instructor, the student can begin work on the module cluster. Within a cluster the modules are presented sequentially.

3. When a student begins to study a module, he should first read the Objective, Prerequisite, and Pre-assessment sections. A number of alternatives are then available. For example, the student may decide after reading the pre-assessment procedures that he is competent in that area. He may then complete the entire pre-assessment and discuss the results with the instructor. The instructor will then be able to verify the student's competence.

4. A second choice is possible if the student feels unsure of the material as presented in the pre-assessment. He can then skip the pre-assessment and complete the module step by step, including the post-assessment procedures.

5. The instructor will consult with the student after the post-assessment is completed. At this point if the student and instructor feel the competency involved has been demonstrated, the student will move to the next module in the cluster. If the post-assessment reveals some deficiency, remediation will be assigned and another form of post-assessment will then be used.
IFE - 002.00 (GSC)  Educational Policy

General Objectives of the Module Cluster

The purpose of this module cluster is to enable students to have experience with and develop skills in writing educational policy, anticipating problems related to the implementation of the policy, and planning possible actions and strategies the teacher might use either individually or with a particular special interest group to gain acceptance of the particular policy proposed.

Module Cluster Rationale

This is perceived as a form of "survival training" wherein the student in a relatively protected environment with guidance and help gains some experience and skills in taking similar actions to those that he can expect to take in the very near future as a teacher. It assumes that the teacher will be an active member of his faculty and of one or more special interest groups during his teaching career. It has a focus upon experiences with the school and district where he is presently serving as an intern to provide the strongest possible reality element.
