The junior high student will type postcards, personal announcements, memorandums, personal notes, personal business letters, envelopes; and learn the parts of letters, letter styles, folding of letters, punctuation rules, proofreading, and erasing in this course. The student will also learn to compose at the typewriter. A prerequisite to this course is the ABC's of Typewriting and a pretest to be given to help the teacher to determine the student's placement in the class. The behavioral objectives, an outline of the course content, learning activities and procedures, and evaluative instruments (testing methods) are discussed. Ten pages of resource materials for student and teacher and an appendix of sample tests are included. (Author/BP)

1. center a problem of seven or more lines both horizontally and vertically on a full or half sheet of paper;

2. tabulate properly to align a given list of words in two columns;

3. use a dictionary properly to determine word division, proper spelling, and word meaning in an original composition of a ten- or more-line paragraph;

4. compose and type a short, personal business letter in block or modified block style with mixed or open punctuation;

5. type a return and main address on a small envelope, and insert the letter typed in Item 4 into this envelope;

### D. Repetitive Practice

The teacher directs the students to retype material for reinforcement of learning or improvement in technique. This is especially helpful in tabulations.

B. Testing Intervals

Testing can be done throughout the quinmester, but it is suggested that most of the class time should be spent in actual typing of problems.

1. A pretest should be administered at the beginning of the course to determine individual placement within the course or if any students have already met the objectives of the course. Those students that have already met the objectives for this course should be moved to a higher level typing class (or course within this class).

The pretest should contain a 5-minute timed writing (syllabic intensity of 1.2 to 1.4) and should measure all the objectives of this course of study. A maximum amount of time should be allowed for completion of problems, and the teacher should not supply any aid during the testing period.

2. At least one interim test should be given during the course. The interim test should measure the objectives covered in a unit or units of work. Since students will vary in their individual progress, the interim test might be administered several times; it is imperative that the teacher develop several of these so that the same one is not used more than once.

3. The posttest should be administered during the last week of the quinmester. It should be a parallel of the pretest and should therefore determine if the student has met the minimum objectives of this course.

C. Grading

Grading should be based on individual progress of each student at his/her own level. However, minimum standards for the course are
VIII. EVALUATIVE INSTRUMENTS, Continued

established in the performance objectives. It is conceivable that a student could spend more than one quarter on this course of study while another student could spend less than one quarter on this course of study and proceed to the next course of study during the same quarter.
