The course focuses on comparison shopping, store etiquette, impulse buying, interpreting labels, specials, loss leaders, standards in relation to need, installment or cash costs. It is primarily designed for consumer or homemaking education, rather than directly related to specific occupational preparation, although it has value for a prospective retail manager. Business Mathematics Fundamentals (5203.01) is suggested as a prerequisite. Performance objectives and course content are outlined, and classroom procedures, strategies, and learning activities are suggested. Evaluation criteria and techniques are discussed. Seven pages of resource materials list books, booklets, periodicals, films, filmstrips, games, learning activity packages, and practice sets and/or kits useful to both teachers and students. (MN)

2. Practice set
3. Learning activity packages

VIII. EVALUATION (Inform the students of the criteria used in evaluation.)

A. Pretest (a parallel of the posttest)
   A pretest covering the objectives of this course should be administered to determine individualized placement in this course. If any student has already met the objectives of this course, he may be rescheduled in another course.

B. Classroom Observation
   Note attitudes, reactions, behavior patterns, and interests of students and use this evaluation in student consultations.

C. Unit and/or Learning Package Tests
   Administer essay and objective tests to determine if students have met the objectives of various units. These tests will help the teacher to evaluate his/her success in changing student behavior.

D. Written Assignments
   Term papers and reports on books, articles, student experiences, etc., may be used as a meaningful method of allowing the student to express himself, and should be evaluated in relation to the personality of the student and the relevancy of the content to this course.

E. Projects
   An evaluation may be based upon the quality of a project, such as a skit, bulletin board display, scrapbook, or collection of related course materials contained in a folder.

F. Self-Assessment Inventories
   These may be used after the completion of a segment of study (before administering a teacher evaluation) to allow the student to determine for himself if he has met the objectives of that particular unit of work. Scores should not be recorded.

G. Posttest (a parallel of the pretest)
   The posttest should measure achievement for each performance objective.
