This pamphlet contains a descriptive list of projects funded in Fiscal Year 1973 by the Research and Evaluation Division of the Children's Bureau, Office of Child Development. In addition, a few projects are included which were funded in earlier years but are still ongoing due to an extension of the grant period. The projects are arranged by these content areas: Day Care, Early Childhood, Social Ecology, Adoption and Foster Care, Advocacy, Children's Institutions, Education for Parenthood, Emergency Services and Child Abuse, Single-Parent Families, Television, Youth, Social Policy Studies, Information Dissemination, other, and Head Start Evaluation Projects. Address information is provided with each project entry to aid the reader in obtaining further information. (SDH)

ALLOCATION OF CHILD WELFARE RESEARCH AND DEMONSTRATION PROJECTS BY CONTENT AREA, FY 73

- Children's Institutions: 1.6
- Education for Parenthood: 23.1
- Day Care: 15.1
- Early Childhood: 12.3
- Social Policy: 8.6
- Social Ecology: 7.9
- Advocacy: 2.0
- Television: 2.4
- Information Dissemination: 2.8
- Youth: 5.4
- Adoption: 6.7
- Emergency Services and Child Abuse: 7.6
- Single Parent Families: 1.9
The following list includes projects funded in Fiscal Year 1973 by the Research and Evaluation Division of the Children's Bureau, Office of Child Development. In addition, there are a few projects, funded in earlier years, which are still ongoing due to an extension of the grant period. The projects are arranged by content area.

The current grant period and amount of the grant award appear under the synopsis. A "(C)" following the OCD identification number indicates that the project is continuing beyond the initial year; for example, (C-2) would mean the present grant year is the second continuation, or third year.

If the reader wishes further information on any particular project, he should write directly to the Project Director at the address provided.
Cooperative Child Care Demonstrations

The Coordinated Child Care Council of Bexar County, Inc. (4-C) serves as the mechanism to coordinate existing services and programs, design new programs and methods of coordination, and determine ways to implement programs to improve children's services in the San Antonio Model Neighborhood Area.

Paul Imig
Coordinated Child Care Council of Bexar County, Inc.
118 N. Broadway, Suite 523
San Antonio, Texas 78205
6/30/73-8/31/74 $21,130

Community Coordinated Child Care Project – Hidalgo County 4-C Council

The Hidalgo County 4-C Council serves as a planning and fund-seeking board for child care services, particularly for the large migrant population. The Council is attempting to establish and coordinate integrated child care services based on a sliding fee scale for 600 three, four, and five year olds of differing socioeconomic status.

Timothy Houston
Hidalgo County 4-C
1307 S. Closner Street
Edinburg, Texas 78539
6/30/73-6/29/74 $26,519

Community Coordination Project

The 4-C Agency is attempting to 1) insure comprehensive quality child care, child development, and supportive family services through provision of administrative, staff, and program coordination; 2) mobilize community resources to assure maximum agency commitment; 3) enhance community communication and pride in quality child care and supportive family services.

Willie E. Wilker
Athens-Clarke County Community Coordinated Child Care, Inc.
240 South Hull Street
Athens, Georgia 30601
6/30/73-6/29/74 $51,368
An agency, Family Service Center, is coordinating health and social services to children and families by acting as a family advocate and clearinghouse for service information and referral. It also stimulates the establishment of new services on the basis of the identification of unmet needs.

Catalino Barril, Jr. 3/1/73-8/31/74
Community Coordinated Child Care Agency
126 Second Street
Juneau, Alaska 99801
$79,298

Infant Satellite Nursery Component (0-2 Years)

Six infant day care homes have been established to provide emotionally secure and cognitively stimulating environments. Homes are staffed by surrogate mothers who are specially trained in child care and work in partnership with the child's parents and family in the home setting.

Marion G. Kagan, Ph.D. 1/1/73-12/31/73
John Chantiny, Ph.D. $76,717
Office of Human Development
University of Hawaii
Honolulu, Hawaii 96822

Community Coordinated Child Care in Forsyth County

The 4-C program in Forsyth County serves as a coordinating mechanism for the planning, implementation, and delivery of child care services. This year the program is seeking to merge with the Child Development Board in order to provide one county program that will increase the quality and breadth of child care services.

Edith Horowitz 12/16/72-12/15/73
4-C Coordinator $25,000
601 North Main Street
Winston-Salem, North Carolina 27102
Opportunities in Day Care and Child's Task Orientation

This project addresses itself to the general question of what types of environmental changes interacting with the development of the child at what ages will enhance and sustain that development. Emphasis is on improving the human relationships available to the child by means of casework with parents and providing contact with volunteer aides, and influencing development through use of an individualized curriculum.

Christoph Heinicke, Ph.D. 9/1/73-8/31/74
Reiss-Davis Child Study Center $90,000
9760 West Pico Boulevard
Los Angeles, California 90035

Evaluation of Pilot Programs for Children

This project is currently designed to provide information concerning the overall process and effects of Community Coordinated Child Care in five demonstration programs. This will include assessment of the defining of child care needs as well as the services available within the communities, the programs' efforts in meeting the needs for coordination and expansion of services. Other aspects include level of citizen involvement and support for child care services, and quality of service for children.

Patricia A. Self, Ph.D. 8/1/73-7/31/74
Central State Psychiatric Hospital $42,576
Tennessee Department of Mental Health
1501 Murfreesboro Road
Nashville, Tennessee 37217

New York City Infant Day Care Study - Input Section

This is a comparative study of the development of children and their families enrolled in infant group day care centers and in family day care homes. Focus will be on the group day care centers' and family day care agencies' programs, policies and facilities, the operations of the individual classrooms and day care homes of children in the study, and on the interaction of the child care worker with each child.

Mark Golden, Ph.D. 2/1/73-1/31/74
Medical and Health Research Association $46,173
of New York City, Inc.
125 Worth Street -- Room 713
New York, New York 10013
The Effects of Day Care on Psychological Development

The cognitive and affective growth of children from 3 1/2 to 30 months of age participating in an experimental day care program is to be compared with that of matched groups of children who are either in service-oriented day care situations or living at home. Children are from low to middle income levels of Chinese, Spanish and English speaking families. Both a specific cognitively oriented program in a day care center and the effects of group living on social development will be studied.

Jerome Kagan, Ph.D.  
Department of Social Relations  
1514 William James Hall  
Harvard University  
Cambridge, Massachusetts 02138  
9/1/73-8/31/74  
$200,213

Three Levels of Structure of Educational Programs in Family Day Care

This study is evaluating the effects of three different educational programs (Bereiter-Engelmann, Verbal interaction, and "Friendly Visitor") on the cognitive, perceptual, and social development of three- to five-year old children in family day care. Comparison groups are children in family day care homes with no treatment and AFDC children in their own homes.

Norman Goodman, Ph.D.  
Joseph Andrews, Ph.D.  
Institute for Research and Evaluation  
384 Clinton Street  
Hempstead, New York 11550  
9/1/72-8/31/74  
$78,813 (Grant period extended; no additional funds)

The Social-Emotional Effects of Day Care

Four-year-old children in group day care, family day care and full parental care will be assessed by behavioral measures of five categories of social-emotional development: independence, self-concept, sex typing, cooperation and sharing, and curiosity. Types of day care services and behavioral differences will then be related to the length of time in day care.

Marcia Z. Lippman, Ph.D.  
Department of Psychology  
Western Washington State College  
Bellingham, Washington 98225  
6/1/73-2/28/74  
$33,112
OCD-CB-225
A Study of Day Care Services in a Semi-Urban Area of Appalachia

This project is studying families involved in public day care services in relation to services available and selected variables involving the family unit. A survey of existing community resources providing day care for school-age children will also be conducted.

Mary N. Ayers, Ed.D. 9/1/72-8/31/73
Department of Elementary Education $20,219
College of Education
Tennessee Technological University
Cookeville, Tennessee 38501

OCD-CB-248(C1)
Comprehensive, Coordinated Child Care Program for Employee and Student Families in a Medical Center Community

Comprehensive, coordinated child care is provided through a counseling center utilizing model programs of center care, family care and in-home care, and existing community services. The focus of the project is on the integration of programming for children of employee and student families.

Jane E. Chapman, Ph.D. 6/1/73-5/31/74
University of Colorado Medical Center $184,738
4200 E. Ninth Avenue
Denver, Colorado 80220

OCD-CB-256
Dependency Status of AFDC Mothers Using Day Care

This project is studying the role of day care in aiding AFDC mothers in becoming self-supporting. Three groups of AFDC mothers who have used group day care in the last five, three and one year periods are being evaluated in terms of their ability to enter and compete successfully in the job market after placing their children in day care.

Majorie Grosett 9/1/72-10/15/73
Day Care Council of New York Inc. $51,518 (Grant period extended; no additional funds)
114 E. 32nd Street
New York, New York 10016
OCD-CB-264
A Descriptive Study of Group Care Arrangements for School Age Children

This project will provide descriptive data on the range of group programs offering day care to children of school age. Through the collection of data on regulatory agencies, clientele, organizational characteristics, physical facilities, staffing characteristics and programs of the centers, the project will identify critical variables which predict differences in program results and will develop a method for assessing the quality of program offered.

Elizabeth Prescott, M.A. 11/1/72-10/31/73
Pacific Oaks College $49,733
714 W. California Boulevard
Pasadena, California 91105

OCD-CB-283(C1)
The Day Care Developmental Progress Questionnaire

A Developmental Progress Questionnaire (DPQ), a parent-answered questionnaire pertaining to a child's current developmental status, is being tested and refined to correspond closely with the Denver Developmental Screening Test. The Questionnaire is being evaluated with 2000 children in day care settings and physicians' offices, and will ultimately be employed to screen preschool children for developmental delays.

William K. Frankenburg, M.D. 7/1/73-8/31/74
Department of Pediatrics $62,616
University of Colorado Medical Center
4200 E. 9th Avenue
Denver, Colorado 80220
The effects of preschool on motivational variables such as reflectivity, curiosity, level of aspiration, and "effectance" motivation are being examined in a group of black inner city children attending a Head Start program. Other objectives of the project are to reassess the issues of longer-term effects of preschool; to obtain longitudinal information on normal developmental changes in effectance motivation for low- and middle-income children; and to study differential influences of the day-care experience on motivation and cognitive development.

Lola Nash, M.A. 6/30/73-8/31/74
Elm Haven Day Care Center
52 Webster Street
New Haven, Connecticut 06511
$10,945

The project is investigating the effect of homogeneous versus heterogeneous social class and age groupings on cognitive and socio-emotional development of lower-class infants, toddlers and preschoolers in day care.

E. Kuno Beller, Ph.D. 9/1/73-8/31/74
Department of Psychology
Temple University
Philadelphia, Pennsylvania 19122
$71,345

The project is aimed at the development of instruments to measure the quality of services in a cross-section of day care situations. The study process will include the analysis of objectives and day care functions, and the resulting instruments will be published in a manual for use in day care evaluation.

Judith N. Buben 6/29/73-6/28/74
Council for Community Services
in Metropolitan Chicago
64 E. Jackson Boulevard
Chicago, Illinois 60604
$58,67/
Economic, Social and Policy Aspects of Child Care: A Quantitative Analysis of Child Care Arrangements of Working Mothers

The project will undertake a survey of working women to obtain information about modes of child care, expenditures for child care and household help, and information about family social and economic characteristics. Findings will be analyzed to determine the factors affecting the choice of child care and to evaluate the likely impact of the provisions of the Revenue Act of 1971.

OCD-CB-405(C1)
PRACA Bilingual Bicultural Early Childhood Project

The project has developed a bilingual, bicultural curriculum and materials for Puerto Rican/Spanish-speaking preschool children. The effects of the materials are being tested prior to their final revision and dissemination. Materials capitalize on the Puerto Rican cultural heritage and ways of communicating.

Camille Garcia
Puerto Rican Association for Community Affairs, Inc.
1432 Lexington Avenue
New York, New York 10028
Fifty migrant families and their children are participating in this bilingual, bicultural day care program. The program will demonstrate the effect of the prestige associated with each language and culture on success or failure in learning. Equally high prestige will be attached to Spanish and English language traditions in child and parent activities. A program of comprehensive early child development services and activities is carried out in Spanish and English to provide a healthy environment for the primary language and culture of the Spanish child, while acquainting him with the second language and culture.

Salvador Sanchez
United Migrant Opportunity Services, Inc.
809 W. Greenfield Avenue
Milwaukee, Wisconsin 53204

7/1/73-8/31/74
$103,675

The project will demonstrate the feasibility of providing a bilingual, bicultural education program in the context of a full-day day care center, staffed by community people who have little or no formal training but who are themselves bilingual and bicultural. Cultural factors to be used in shaping the educational program and teaching methodologies will be determined. Parents' involvement in the program will be studied.

Hilda Burgos de Sumner
The Spanish-American Committee for a Better Community
4500 Lorraine Avenue
Cleveland, Ohio 44102

7/1/73-8/31/74
$104,103
Demonstration of Individualized Structured Bilingual Curriculum in Preschool

This is a demonstration bilingual, bicultural program aimed at increasing the language competence and self-esteem of preschool children. The program utilizes the curriculum developed by the Southwest Educational Development Laboratory in an unstructured setting, combining free-play activities with individually structured lessons. Parents are kept informed of the child's progress and are actively involved in policy making. In addition, medical screening and services are provided to children entering the program. Comparisons with other programs will be made to determine the effectiveness of curriculum and techniques.

Jane M. Kasper
El Hogar del Nino
1850 S. Racine Avenue
Chicago, Illinois 60608

7/1/73-11/30/74
$102,500

Migrant Head Start/Day Care Project

The program offers a bilingual, multicultural experience for migrant Indian, Chicano and Anglo children within the context of a Head Start Program. The main focus of the program is to teach English to the non-English-speaking children. Multicultural awareness will be stressed through music, art, stories and games. Other emphases are social awareness, number and color concepts, and personal hygiene. In addition, a comprehensive Head Start nutrition, health, and parent involvement program will be offered.

J. David Hoggard
Economic Opportunity Board
of Clark County
900 W. Owens Avenue
Las Vegas, Nevada 89106

7/1/73-8/31/74
$14,999
OCD-CB-414(C1)
Community Service Organization Child Development Center

This is a Head Start day care center program for settled and migrant Spanish-speaking children, which includes a bicultural, bilingual educational program emphasizing language and learning patterns of Chicano children. The main emphasis of the program is to provide services for children and to assess the effectiveness of these services.

Polly S. Warren
Kern County Economic Opportunity Corporation
218-220 Eureka Street
Bakersfield, California 93304

$49,773
7/1/73-8/31/74

OCD-CB-424(C1)
Child Migrant Day Care

This is a bilingual, bicultural day care program for 40 three- to five-year-old children of migratory and seasonal farm workers in the Imperial and Coachella Valleys of Southern California. An evaluation component is being added to the program to train the staff in evaluation procedures and to determine what effect the project has had on parents, children and staff.

Adalberto Ramirez
Campesinos Unidos, Inc.
605 W. H Street
Brawley, California 92227

$49,705
7/1/73-8/31/74

OCD-CB-426(C1)
Differential Day Care Demonstration Project

The objectives of this project are to develop and standardize a practical working definition of differential day care placement and to develop appropriate mechanisms to assure such placement, providing alternatives for parents that will be as suitable as possible for their children's developmental needs.

Dolly A. Mosely, Ph.D.
Arkansas State 4-C Committee
416 National Old Line Building
Little Rock, Arkansas 72201

$49,999
7/1/73-6/30/74
OCD-CB-427(C1)
A Chinese Bilingual Bicultural Training Program

The project is aimed at the development and implementation of a Chinese-American bilingual, bicultural preschool curriculum. Staff are trained in the relevant Chinese cultural and childrearing patterns in order to facilitate responsiveness to the children's family and community backgrounds. Specific materials are being developed for use in Head Start, preschool and public school programs.

Roderick Auyang
Chinatown North Beach Child Care Center
715 Chestnut Street
San Francisco, California 94133

6/30/73-6/29/74
$36,441

OCD-CE-432
Day Care - IRS Brookhaven

This project is testing the feasibility of providing day care services to employees through industrial support of a child care coordinator situated on the site of an Internal Revenue Service office. The objectives are to identify parent needs for day care services and match them with known resources and to work with community resources to develop care for school age children.

Alice Brazier
County of Suffolk
Suffolk County Center
Riverhead, New York 11901

7/1/72-11/5/73
$60,000 (Grant period extended; no additional funds)

OCD-CB-465
Family Day Care Home Systems Demonstration Project

This project will determine the feasibility of providing developmental child care in a family home setting. To achieve this, the project will upgrade the quality of its administrative structure and its constituent family day care homes funded by Title IV-A so as to comply with the proposed 1972 Federal Day Care Requirements. Results will be published in a series of monographs and disseminated nationally to other such systems.

Anthony Diodati
Associated Day Care Service, Inc.
710 Jackson Street
Philadelphia, Pennsylvania 19148

3/1/73-2/28/74
$7,023
OCD-CB-466
User Survey of Day Care Publications

This project will conduct a mail survey to determine the usefulness, relevancy and timeliness of certain Office of Child Development publications intended for planners, operators and managers of day care facilities and services.

Frank P. Rymer, Jr.  
University Sciences Forum  
P.O. Box 39035  
Washington, D.C. 20016  
6/30/73-10/31/73  
$7,332

OCD-CB-467
Family Day Care Home Demonstration

The primary objective of this project is to demonstrate that quality developmental child care can be provided in a home setting in a family day care home system. The grantee will upgrade its administrative structure and constituent family day care homes so as to be in compliance with the proposed 1972 Family Day Care Requirements. The project will provide information and a description of how change occurs and the constraints incurred by the system in the process of upgrading performance.

Peggy Lowe  
Day Care Service Unit  
Jefferson County Department of Pensions and Security  
P.O. Box 10725  
Birmingham, Alabama 35204  
3/1/73-2/28/74  
$52,585

OCD-CB-468
Family Day Care Home Demonstration

This project seeks to upgrade services provided in 20 demonstration homes to meet requirements outlined in the proposed 1972 Federal Day Care Requirements. An administrative support system that will upgrade the demonstration homes is being developed and will serve as a model for the rest of the system and other systems nationally.

Lucille Farris  
Social and Rehabilitative Services  
Box 25352, State Capitol Station  
Oklahoma City, Oklahoma 73125  
3/1/73-2/28/74  
$33,477
OCD-CB-469
Family Day Care Home Demonstration Project

This project will demonstrate that quality developmental child care can be provided in family day care homes using a systems approach. The grantee will upgrade the level of services in the administrative agency and the quality of care in 20 family day care homes so as to be in compliance with the proposed 1972 Federal Day Care Requirements. One of the results expected will be information on the variety of costs associated with upgrading the performance of the system.

Queenie Lynch
Silver Bow County Department of Social and Rehabilitative Services
Court House
Butte, Montana 59701

3/1/73-2/28/74
$12,500

OCD-CB-470
Family Day Care Home System Demonstration Project

This project is an attempt by the Dane County Department of Social Services to ascertain if developmental child care can be provided in a family day care home setting. The aim is to develop and demonstrate the processes which will insure that developmental child care can be provided using a family day care homes systems approach. The project will provide information on the utility of such systems as a resource for existing federal day care programs and others that might be contemplated. The grant will be used to upgrade the quality of 20 demonstration homes and the administrative structure so as to comply with the proposed 1972 Federal Day Care Requirements.

Jerry McCartney
Dane County Department of Social Services
1202 Northport Drive
Madison, Wisconsin 53704

4/1/73-3/31/74
$19,720
The project seeks to determine the feasibility of providing developmental child care in a family home setting. The grantee will upgrade the quality of 20 demonstration homes and its administrative agency so as to be in compliance with the proposed 1972 Federal Day Care Requirements. One result expected from the project is information on the utilization of existing child support services, e.g. medical, dental, psychological, and other social services by the family day care homes system.

Flora Dieckhoff
Children Service Division
275 East 7th Street
Eugene, Oregon

OCD-CB-492
Cost-Benefit Analysis of Denmark's System of Day Care

A cost-benefit analysis will be performed on Denmark's nationwide government sponsored system of day care services for children. The cost to train one fully qualified caretaker and the cost per child per month will be determined for infant and toddler group day care centers, preschool group day care centers, school-age group day care centers, adolescent group day care centers, and family day care homes. The analysis will include the percentage of day care costs paid by central and local governments, parents and/or employers, and the percentage of cost expenditures for facilities, staff, supplies and health services.

Derrick B. Jelliffe, M.D.
Population, Family and International Health Division
School of Public Health
University of California
Los Angeles, California 90024
Parent-Child Centered Bilingual-Bicultural Daycare

This project utilizes a unique delivery system for both child care services and a bilingual-bicultural curriculum. Bilingual-bicultural day care services are provided by directly involving the mothers of young, two- to three-year-old Chicano children in an ongoing early education program. The mother serves as the primary instructor for her own and nine other children, and receives related training in child development.

Eugene E. Garcia, Ph.D.  
Department of Psychology  
University of Utah  
Salt Lake City, Utah 84112  
6/30/73-6/29/74  
$14,972

HEW-08-73-58  
Family Day Care Homes System Demonstration Project

The purpose of this study is to provide an evaluation of six to nine family day care home systems demonstrations delivering developmental day care services.

George Reagan  
Development Associates, Inc.  
1521 New Hampshire Ave., N.W.  
Washington, D.C. 20036  
10/1/72-3/1/74  
$143,301
Detection and Remediation of Learning Disabilities

This program is employing a series of remediation techniques in 1) an intensive summer program for 30 elementary school children showing symptoms of dyslexia and 2) a fall-to-spring program for 30 preschool-age children showing similar symptoms. Remediation activities stress perceptual-motor coordination basic to the acquisition of reading, writing, spelling, and language skills.

Leland P. Bechtel, Ph.D. 7/1/73-6/30/74
Department of Psychology
Bates College
Lewiston, Maine 04240

$86,290

A Special Facility for Child Development and Education

This project involves the development of a special facility for child development and education which links preschool and elementary education in a program that operates under the joint sponsorship of a state university and a public school system. It is studying individual learning styles in an attempt to further individualize instruction and will add a behavior modification system and self- and social-awareness program for approximately 275 children. Project activities also include home intervention for 150 children, and teacher training.

Bettye M. Caldwell, Ph.D. 6/1/73-5/31/74
Center for Early Development and Education
University of Arkansas
814 Sherman Street
Little Rock, Arkansas 72202

$380,740

Program in Child Welfare Research

This study is determining through data analysis the effectiveness of medical, social, educational and day care services for a group of disadvantaged families, and is examining aspects of parenthood and first-born children. A variety of publications on the development of these children is planned.

Sally Provence, M.D. 7/1/73-6/30/74
Yale University Child Study Center
333 Cedar Street
New Haven, Connecticut 06510

$64,426
Social Class and the Development of Symbolic Communication

This project will study symbolic communication in poverty-level preschool children as an effort to determine whether lower levels of educational performance can be attributed to dialect and a failure to understand standard English, or whether it represents a more general cognitive failure of understanding and ability to communicate various sets of information. The project seeks to define the relationship between performance on tests of information processing and communication and intrafamilial factors such as family and kinship organization. Perceptual, conceptual, semantic and syntactical aspects of processing and communication will be studied through tasks requiring communication between children and between mother and child.

J. McVicker Hunt, Ph.D. 6/29/72-8/31/73
Girvin E. Kirk, Ed.D. $69,898 (Grant period extended; no additional funds)
Department of Psychology
University of Illinois
Champaign, Illinois 61820

Cognitive Development and Mother-Child Interaction

This project studies cognitive development during the period from 15 to 36 months of age in a group of culturally deprived Negro infants for whom information on development from 8 to 15 months is already available. The focus is on the transition from sensorimotor action to internalized thought, the determination of the maternal characteristics associated with the development of representational thought, and the relation of early cognitive development and maternal variables to language development.

Silvia M. Bell, Ph.D. 9/1/73-8/31/74
Departments of Pediatrics and Psychiatry $65,729
The Johns Hopkins University
School of Medicine
Baltimore, Maryland 21205
Curriculum Research in Infant Education

The goal of this project is to formulate a curriculum with respect to particular developmental systems. Children from one to two-and-one-half years of age are being longitudinally studied in terms of their social, language, and play behavior. The major intention is to develop a program of infant education which will enhance the competence of children from low socioeconomic families. Currently 46 families from a representative range of socioeconomic backgrounds are participating in the research. The in-home, in-service training of caregivers as research assistants also is being explored.

The Family Development Research Program

Experiences are provided in a combined home visit and enrichment center program for young disadvantaged children and their families. Experiences are aimed at fostering in the child maximal cognitive and psychosocial functioning during the period of intervention and subsequently throughout life. Participants will be compared both with other disadvantaged families and with other school children on national norms. New tests of intraexperimental group development are being created and innovative preschool programs are being explored.

The Development of Infant-Mother Attachment

The project is analyzing the data collected on 26 white, middle-class infant-mother pairs in order to determine the development and organization of infant attachment during the first year. Individual differences in attachment, environmental influences on this process, and the effects of the attachment relationship on sensorimotor plus cognitive development of the child are also being studied.

Children with Deviant Early Developmental Experiences

This will ultimately be a longitudinal study of childrearing practices and their effects on the physical, cognitive, social and emotional growth of children reared in three types of nontraditional family settings (hippie communes, common-law relationships, and adolescent unmarried mothers). The present focus is on deriving dimensions for comparatively assessing the experimental and control environments.

Racial Misidentification and Attitudes About Self Among Preschool Children

This project will critically analyze racial misidentification and its relationship to positive or negative self-conceptual feelings among preschool black and white children. Through the use of doll models depicting various racial features, each child will rate herself/himself on an anthropological continuum. Discrepancies between the judges' ratings and the child's self-perception (as reflected by his/her doll choice) will be analyzed with respect to demographic variables. A final analysis will be performed to determine correlations between the child's discrepancy scores and his scores on the self-concept scale.

Interstate Compact on the Placement of Children

The Interstate Compact provides a mechanism which eliminates the complex legal and administrative provisions involved in the interstate placement of foster or adoptive children. This is particularly important in providing maximum opportunity for those with special characteristics, such as racially mixed and older children, groups of siblings, and physically handicapped and emotionally disturbed children, since resources may not be available in their state of residence. The project provides technical assistance to states interested in enacting the Compact and strengthens the service of the national secretariat maintained by the member states.

Boy Scouts of America - Education for Parenthood Program

The project will use a systems approach to the planning, production and implementation of a family life education program including sensitivity toward parenting, child development, and family welfare. National components of the project will provide coordination, supervision and support resources, including curricula, for the demonstration program in River Edge, New Jersey.

Education for Parenthood Program for Disadvantaged Adolescent Youth

This project will develop and operate a parenthood education program for disadvantaged adolescents in Boys' Clubs in three sections of the country. The program will include formalized in-service training for Junior Leader staff members; vocational exploration visits and training for beginning work experiences in child-related careers; discussions of values related to male-female relationships, marriage, families and parenthood; working directly with children and describing the experiences to others; and using videotape as a program attraction as well as for instructional purposes.

Education for Parenthood Program

This project is designed to improve the knowledge and skills of girls and boys in the area of child development through demonstration projects planned and carried out by five individual Girl Scout councils and a consortium of four councils. At the national level, an effort will be made to increase the involvement of the total Girl Scout membership in activities which will support and implement the purposes of the education for parenthood program.

Preparing Teenagers for Parenthood

This is an education and action-oriented demonstration program designed to mobilize the community resources, experience and expertise of five neighborhood centers located in five major cities in different geographical areas of the United States. The objectives of the program are to provide information about the human reproductive process, pregnancy, childrearing and parenthood; opportunities to discuss these topics in a comfortable climate of openness and mutual trust; participation in planned observation of children in various stages of development; and intensive practical experience in child care.

OM-CB-462
Education for Parenthood

A demonstration project in California, Maryland, Minnesota and Texas will provide formal and informal instruction and opportunities for older teens to gain direct experience with young children. Youth from rural, urban, suburban, out-of-school, parent and nonparent groups will learn firsthand about infant and child developmental needs and become aware of the role and responsibilities which they may expect as future parents. Projects will, through the 4-H Youth Extension Service, include study-discussion formats, Teens-Teach-Teens programs, individual counseling, psychotherapy groups, films and video trainers, games and simulations, and work with family day care mothers in actual child care situations.

OM-CB-463
Demonstration in Education for Parenting

This project seeks to provide a community based education for parenthood program for poor and disadvantaged youth. The program will focus on providing reality experiences concerning the needs of infants and young children through discussion, practical experience, and formal and informal teaching techniques and, in addition, will expose teenagers to career opportunities in the child development field.

This project seeks to demonstrate that a cooperative endeavor between private and public agencies and the parents of a rural Appalachian community can effectively recruit and provide learning experiences whereby teenagers can obtain the skill and knowledge to become effective parents. Teenagers will be recruited for out-of-school classes in child development and trained by direct experiences in a parent-child center and in children's homes, and will then serve as child advocates in the community.

Medical-Legal Cooperation in the Judicial Ascertainment of Paternity

The project will develop standards and procedures for the safe and efficient use of available medical evidence in paternity cases. The resulting modernization of the paternity investigation will aid in the process of providing rights for children born out of wedlock.

Psychiatric Impairment in Urban Children Over Time

Portions of information gathered from a longitudinal study of children, ages 6 to 18, in Manhattan will be investigated in three studies. The first study involves the prediction of violence in preadolescents and adolescents based on school and agency records and the mothers' reports. The second compares and delineates unique characteristics of the single parent family versus the dual parent family. The third study focuses on the influence of social ecological factors as a rate of social change.

Project Mobilization for Children and Youth

The project will initiate informational and educational services and technical assistance to the 130 voluntary, non-profit organizations with programs and services for children and youth. Publications and conferences will be used to further awareness of priority needs of children and youth, and of programs in operation or needed. Efforts will be made to recruit a larger number of organizations as members and associates of the newly formed National Council of Organizations for Children and Youth, in an effort to maximize dissemination of information and services.

HEAD START EVALUATION PROJECTS

H-1926
Data Analysis of Short Term Effects for the National Head Start Planned Variations Study

Project activities include the analysis and writing of reports on the data collected by SRI to evaluate the Planned Variation models of Head Start. The focus will be on determining the effects of the Head Start Planned Variations on children, determining the differences among models, and determining how children's characteristics, such as initial I.Q., socioeconomic status and prior preschool experience, interact with the effectiveness of the models.

Head Start Test Collection

The Head Start collection contract supplements those activities of the ERIC for Tests program by collecting and preparing abstracts on all standardized and experimental measures appropriate for use with children ages 0 through 9. Based on this collection, ETS will also prepare bibliographies, critical reviews, and state-of-the-art papers on request.

Disadvantaged Children and Their First School Experience (ETS Longitudinal Study)

A longitudinal study conducted in four sites is recording the development of disadvantaged children from age three and one-half through their first school experiences, which may include Head Start and Follow-Through as well as regular primary school. The study will provide basic data concerning the impact of preschool experiences on the development of disadvantaged children. Focus will be on identifying components of early education that are associated with cognitive, personal and social development of the disadvantaged, and on the environmental and background variables which moderate these associations.

Designing An Evaluation of Social Competency in Head Start Children

This project will assess options for designing a comprehensive evaluation of the Head Start program, and will make recommendations concerning these options in the form of reports. Tasks will include developing a conceptual framework for identifying outcome variables and program effects, identifying significant outcome variables in social competence, screening and selecting outcome variables for assessment, identifying appropriate existing measures and developing new measures, and designing evaluation plans.
