This directory lists pertinent information regarding national organizations concerned with school health. The chief administrative officer is listed for each organization with official title and highest academic degree. Other information includes the mailing address, telephone number, and approximate number of members. A list of the major 1974-1976 meetings are included with the location and date of the meeting. Also included are a list of official publications; names of committees, councils, sections, and/or divisions with school health interests and/or responsibilities; and a brief description of the organizations' purposes and objectives. (PD)
A DIRECTORY OF
NATIONAL ORGANIZATIONS
CONCERNED WITH
SCHOOL HEALTH
1974 - 1975

THE AMERICAN SCHOOL HEALTH ASSOCIATION
Kent, Ohio 44240
This, the 8th Edition of A Directory of National Organizations Concerned With School Health, is a publication designed to facilitate communications with and among organizations concerned with the health of the school child. It is hoped that the Directory will contribute to more effective utilization of professional resources.

The format of the Directory is outlined on the following page.

This edition of the Directory was compiled by the staff of the American School Health Association and published by the ASHA.

Price:
Member $3.00
Non-Member $3.50
KEY ON HOW TO READ THE DIRECTORY

1. Name of organization

2. Name of chief administrative officer; his/her highest academic degree; his/her official title

3. Mailing address of organization

4. Telephone number of organization

5. Approximate number of members

   
<table>
<thead>
<tr>
<th>Name of Meeting</th>
<th>Place of Meeting</th>
<th>Date of Meeting</th>
</tr>
</thead>
</table>

7. Name(s) of official publication(s)

8. List of names of committees, councils, sections, and/or divisions with school health interests and/or responsibilities

9. A very brief description of the organization's purposes and objectives

10. Additional comments
1. **ACTION FOR BRAIN-HANDICAPPED CHILDREN, INC. (ABC)**

2. Richard A. Hanson, B.A., Executive Director

3. 4020 Minnetonka Blvd., Suite 305, Minneapolis, MN 55416

4. (612) 927-8566

5. -

6. Dates not set as of this press date

7. **EXPECTATIONS**

   ABC Developments (Friends of ABC newsletter)

8. None specified

9. **ACTION** for Brain-handicapped Children, Inc. aims to increase awareness of available help for brain-handicapped children, and to telescope the time between the discovery of a child's difficulties and the discovery of his or her proper diagnosis followed by the appropriate treatment or treatments.

   This is done by reporting on the refined, burgeoning diagnostic aids that can preclude premature misdiagnosis and inappropriate treatment; reporting on the varied treatment approaches (for the varied combinations of neurological dysfunctions) utilized and developed in this country and abroad; providing professionals with an informal clearinghouse whereby they can be put in touch with one another for more immediate exchange of information and clinical experience helpful to their young patients; and providing book and film reviews on brain-handicap related books and films to parents and professionals.

Selected Papers of Annual Meetings
Directory of Alcoholism Treatment Facilities in United States and Canada, including domiciliary houses and State/Alcoholism Programs

Education Section of ADPA

ADPA is a non-profit corporation designed to facilitate governmental and professional activities in the fields of alcohol and drug related problems. It was founded by a group of state Alcoholism Program directors in 1949 as the National States’ Conference on Alcoholism and today has members throughout the United States and Canada whose work covers the spectrum of professional disciplines.

ADPA Objectives: To facilitate the exchange of information about education, research and treatment activities in the field of alcohol and drug problems.

To promote legislation and standards which will contribute to the alleviation of alcohol and drug problems in our society.

To encourage professionals to deal with alcohol and drug problems within their own disciplines, and to contribute new knowledge for better understanding and

(Contd.)
management of these problems.

To encourage cooperation among all who are engaged in activities involving alcohol and drug problems.

To promote standards of good practice for workers in the field of alcohol and drug problems.

8. Council on Child Health, which consists of:
   - Committee on Accident Prevention
   - Committee on Adoption & Dependent Child
   - Committee on Children With Handicaps
   - Committee on Infant and Preschool Child
   - Committee on School Health
   - Committee on Youth

9. **Goal and Objectives:** The goal of the Academy shall be the attainment by all children of the Americas of their full potential for physical, emotional, and social health. The Academy shall endeavor to accomplish this goal through the following scientific and educational objectives:

   (a) foster measures and conduct activities directed toward establishing and maintaining the highest possible standards of quality and acceptability in the delivery of health care to children;

(Contd.)
(b) conduct and encourage programs to maintain and increase the effectiveness of all those who provide health care to children;

(c) encourage the development of high quality pediatric educational programs for students and health professionals at all levels of education and experience;

(d) support and encourage programs to improve the health and health care of children;

(e) encourage support of basic and applied research into all aspects of child health, child health care, and the diseases of children;

(f) stimulate interest in the health and welfare of children and in the field of pediatrics;

(g) stimulate and conduct public informational and educational programs designed to improve the health and welfare of children;

(h) function as an effective advocate for children in all matters pertaining to child health and child health care;

(i) promote the publication of and encourage contributions to medical and scientific literature pertaining to child health and the delivery of health care to children;

(j) establish and promote liaison and cooperation with and between other organizations concerned with children and their care;

(k) foster ethical practice in all areas of child health care and pediatric research;

none of which are for pecuniary profit.

9. The American College of Sports Medicine was established to advance and
   disseminate knowledge dealing with the effect of sports and other motor activities
   on the health of human beings at various stages of life.

   Ongoing activities include the conduct of annual scientific meetings and the
   publication of the ACSM Newsletter and the College's scientific journal
   MEDICINE AND SCIENCE IN SPORTS.
ACSM is affiliated with the Federation Internationale de Medecine Sportive which published (in English) the JOURNAL OF SPORTS MEDICINE AND PHYSICAL FITNESS.

Regional Chapters are now being developed to promote smaller and more frequent scientific and educational meetings. These regional meetings are designed to be of particular significance to practitioners, e.g., physical educators, trainers and team physicians.

The College, in cooperation with the University of Wisconsin-Madison and the Macmillan Company, in 1971 published the ENCYCLOPEDIA OF SPORT SCIENCES AND MEDICINE. This volume is the first comprehensive collection of research and clinical reports on the many dimensions of sports medicine. Included are sections on sociology, psychology, drugs, environment safety, rehabilitation, growth and development, specific games and sports, and exercise in general.

   - Membership Committee
   - Commission on Curriculum Reform

9. **Definition:** Corrective Therapy is the application of the principles, tools, techniques and psychology of medically oriented physical education to assist the physician in the accomplishment of prescribed objectives.
Objectives: (1) To encourage the use of medically prescribed and oriented physical education principles and techniques in helping the handicapped to help themselves. (2) To advance the field of corrective therapy through improved professional standards in education and clinical training, without threatening or superseding the acknowledged contributions of other services. (3) To encourage research and publication of scientific literature dealing with the advancement of habilitation, rehabilitation and the prevention of disabilities.

Purpose: To facilitate the health enhancement of the handicapped and disabled individual in schools, hospitals, rehabilitation centers and nursing homes through competent corrective therapy and adapted physical education services.

10. Our organization maintains liaison with the following:

- National Association for Retarded Children
- Health, Education and Welfare
- Bureau of Education for the Handicapped
- American Academy of Physical Medicine and Rehabilitation
- American Congress of Rehabilitation Medicine
- American Association for Health, Physical Education and Recreation
- American College of Sports Medicine
- National Athletic Trainers Association
- President's Committee on Employment of the Handicapped
- National Rehabilitation Association
- Remedial Gymnasts of Canada
- Association of Schools of Allied Health Professions
- Neurologically Handicapped Children and Learning Disabilities

To assure the public of competent services our organization maintains a national registry, The American Board for Certification of Corrective Therapists and Adapted Physical Educators, which identifies fully prepared and certified practitioners in the profession.

   *Journal of the American Hospital Association*

8. Bureau of Professional Services, Division of Volunteer Services
   Bureau of Manpower and Education, Division of Education
   Bureau of Public and Community Relations, Division of Career Information

9. The American Hospital Association is a service organization with its major goal the provision of better health care for all people. Originally organized in 1898 by eight hospital administrators, the AHA membership includes more than 7000 health care institutions, Blue Cross plans, nursing homes, hospital schools of nursing, health planning agencies, and 18,000 personal members.

   Broad areas of service are education, research, information, legislation, and consultation. The Association maintains the world's most complete library of materials on hospitals and subjects related to hospital administration. To better serve local efforts, the Association has established nine regional offices to work with more than 90 regional, state, and metropolitan hospital associations.

(Contd.)
In the Policy Statement on Provision of Health Services the AHA underscores its concern with health education through the following goal:

The system (health services) must assure that all children are provided with preventive health care and that no child suffers from untreated illness.

7. **American Legion Magazine**

8. National Children and Youth Commission

9. The Children and Youth Program with The American Legion emphasis the securing of services and assistance for the children of veterans. Since more than half of all children are children of veterans, the program goal is "A Square Deal for Every Child." Four methods are used to accomplish this goal: (1) Legislation at the federal, state and local levels; (2) dissemination of information; (3) direct aid to veterans' children; and (4) cooperation with other national children and youth organizations. The program is concerned with four major areas: (1) Financial assistance to needy children; (2) health services for children; (3) protective services for children; and (4) public welfare administration with emphasis on child welfare.

10. The American Legion's activities in the area of health services for children from the national organization level are restricted essentially to legislative

(Contd.)
activities. We only have a limited number of publications in this area which are not available for general distribution purposes. Local Posts of The American Legion and local Units of the American Legion Auxiliary provide substantial assistance to children requiring health services in those situations where other financial resources are not available to provide such services.

The American Legion is organized into 58 Department (state) affiliates. In addition there are approximately 16,000 Posts (local organizations). Each of these Departments and Posts develop its own Children and Youth Program with a minimum of direction from the national level. The nearly 14,000 Units (local organizations) of the American Legion Auxiliary work quite closely with the Legion Posts in furthering the Children and Youth Program.

9. The American Lung Association is an independent voluntary agency dedicated to the organization of community efforts to prevent and control lung disease, including emphysema, chronic bronchitis, asthma and tuberculosis. School health has a definite place in program and activities of the association, particularly in the area of smoking and health, air conservation, and lung disease control among children and youth.

   (Contd.)
10. The American Thoracic Society serves as the Medical Section of the American Lung Association. It includes scientific assemblies organized around specific areas of interest. For instance, the ATS Scientific Assembly on Pediatrics emphasizes the problems of respiratory health and disease in children and young adults, and the Scientific Assembly on Clinical Problems in Respiratory Disease has among its objectives working to improve training of physicians and other health professionals.

American Lung Association staff members with responsibility in school health are:

Mr. S. S. Lifson, Director
Education and Public Relations Division

Mrs. Thelma S. Morris, Program Consultant
School and College Health

9. The American Parents Committee is a non-profit, non-partisan, public-service organization, incorporated in 1947, working for Federal legislation on behalf of the nation's 75 million children. This includes keeping our membership informed on new legislation, and the status of ongoing legislation affecting child health, education, and welfare. The APC works for increased appropriations for school lunch, the NEW programs for children, UNICEF and other federally-aided programs on behalf of children. The APC's other concerns have been in the areas of the Elementary and Secondary Education Act and its amendments, the Juvenile Delinquency Act and amendments, various child health acts, and child welfare legislation. The APC has also been active on the Federal judicial level, to the extent of filing amicus curiae briefs in cases on appeal to the Supreme Court, in matters vitally affecting children and youth, such as the Gault case reviewing juvenile court procedures.

The American Personnel and Guidance Association is a scientific and educational organization serving members and the public through programs that advance guidance and counseling in all settings. Established in 1952, the Association has 32,000 members, embraces 52 state branches, state Divisions, national Divisions, and local chapters. Its ten Divisions span personnel and guidance work at all educational levels, from kindergarten through higher education, and in community agencies, government, business and industry.

    and the betterment of public health and to carry out the purposes of this
    Association as described in the Certificate of Incorporation."
    -- Constitution of the American Podiatry Association

10. The following resolution was adopted by the House of Delegates at the
    1969 Annual Meeting:

    WHEREAS, it is necessary to provide foot health information at the grade
    school age level as part of their health education, and
    WHEREAS, information on podiatric care should be included along with
    information on medical and dental care in grade school textbooks,
    THEREFORE, BE IT RESOLVED that the Board of Trustees direct the
    Department of Public Affairs to arrange for the inclusion of a section or
    chapter on podiatric care in elementary school health textbooks.

9. The American School Health Association establishes guidelines for standards of excellence and competency for the professionals who make up the school health team: health educators, school nurses, school physicians, school dentists, dental hygienists, and other health professionals.
10. The American School Health Association, the only professional organization solely concerned with the health of the SCHOOL-AGE CHILD, promotes comprehensive and constructive school health programs — health services, health instruction, and a healthful school environment.

As a part of the ASHA's Program on Continuing Education, members may participate in the various educational programs, study committee meetings, seminars, and the annual convention sponsored by the Association. Professional guidance and assistance is available to members with problems relating to resources in the health sciences, professional preparation, and professional standards. The professional expertise of its members is enriched through professional interaction with other professionals in the health sciences.

   Committee on Environmental Pharmacology
   Division of Clinical Pharmacology

9. The American Society for Pharmacology and Experimental Therapeutics (ASPET) was established in 1908 to promote pharmacological knowledge and encourage communication among scientists concerned with the effects of drugs on living tissues. Its membership includes outstanding pharmacologists in universities,

(Contd.)
in government service, in industry, and in private laboratories and foundations. ASPET represents the United States in the International Union for Pharmacology.

In addition to the journals which it sponsors, ASPET fosters scientific communications through an annual spring meeting with other constituent members of the Federation of American Societies for Experimental Biology. It also holds a separate fall meeting each year on the campus of an American medical school and occasional joint sessions with closely allied groups such as Division of Medicinal Chemistry of the American Chemical Society, The Society of Toxicology, and the Division of Psychopharmacology of the American Psychological Association.

ASPET issues a career brochure on pharmacology and otherwise attempts to stimulate an interest in this field in high school and college students. Through appropriate committees, ASPET strives to improve graduate and postgraduate training in pharmacology, to explain pharmacology to the lay public, and to keep its own members abreast of pending legislation which may affect the field.

Specific educational programs conducted by ASPET include drug workshops, and teaching institutes. An innovative feature was added to the 1973 Fall Meeting - the Annual Convocation for Graduate Students.

ASPET makes two annual awards to stimulate fundamental research by young investigators: the John J. Abel Prize in Pharmacology (donated by Eli Lilly and Company) and the ASPET Award for Experimental Therapeutics (donated by Hoffman-La Roche, Inc.). The Society's highest honor, the Torald Sollman Award (donated by Wyeth Laboratories), is presented no oftener than every third year and then only for truly significant contributions to the advancement and extension of knowledge in pharmacology.

In 1972, ASPET played host to the V International Congress for Pharmacology which was held in San Francisco, California.

(Contd.)
9. The goals of the American Speech and Hearing Association are to encourage basic research and scientific study of human communication and its disorders; to stimulate exchange of information about human communication through conventions, publications, and other professional education activities; to promote investigation of clinical procedures used in treating disorders of communication; to maintain high standards of clinical competence for professionals providing services to the public; and to encourage the development of comprehensive clinical service programs.

10. The American Speech and Hearing Association is the national scientific and professional association for speech and language pathologists, audiologists, and speech and hearing scientists concerned with communication behavior and disorders. Approximately 38 percent (5000) of our membership comprises speech pathologists in the schools whose primary responsibility is the detection, diagnosis, and treatment of speech impairments in school-age children.

This Association is the recognized accrediting agent for college and university programs offering master's degrees in speech pathology and audiology, and for programs offering clinical services in speech pathology and audiology to the public.

             Children and Drugs

8. -

9. The purposes of this organization shall be: To work for the education and
   well-being of children; to promote desirable conditions, programs and practices
   for children from infancy through early adolescence; to raise the standard of
   preparation and to encourage continued professional growth of teachers and
   others concerned with the care and development of children; to bring into active
   cooperation all groups concerned with children in the community; to inform the
   public of the needs of children and the ways in which the school program must be
   adjusted to fit those needs.

   RESEARCH, both basic and applied, into muscular dystrophy and related neuromuscular disorders afflicting millions. Since its formation in 1950, MDAA has made grants to scientists working in leading medical and scientific centers throughout the world.

   PATIENT AND COMMUNITY SERVICES to assist patients in meeting the many problems which chronic disease imposes upon them and their families. Nearly 300 MDAA chapters throughout all the 50 states, the District of Columbia, Puerto Rico, and Guam provide certain authorized direct services. All services are free. No means test is required. Diagnostic workups - part of our community services program - are available to all those who may - in the opinion of their physicians - be suffering from muscular dystrophy or related neuromuscular ailments. In addition, the CPK serum enzyme test to detect unaffected female carriers of Duchenne dystrophy is available at most MDAA clinics. Other authorized direct services - wheelchairs, physical therapy, etc. - are available upon medical prescription to patients diagnosed as having any of the disease included in the service program.

   NAGC News (not regularly scheduled)

8. -

9. The NAGC is a major education association so declared by the U.S. Department of Health, Education and Welfare. It is non-profit, founded in 1954, and dedicated to helping schools, parents, the children themselves, and the public maximize abilities great and small for the good of all.

10. Our nation is urgently in need of helping the gifted turn on in the direction of good, for the good of all. Of greatest help to parents and teachers is our award winning periodical *The Gifted Child Quarterly*. This journal should be read by all who wish to improve and develop abilities, while reinforcing the gifted-self concept — modestly. Consulting services are available to schools and communities who desire to increase understanding, and function of the gifted in their midst.

8. -

9. Inspired originally by the parents of retarded children in all parts of the country, the National Association for Retarded Children (NARC) is a voluntary nationwide organization devoted to improving the welfare of mentally retarded persons. NARC seeks to aid all mentally retarded persons without regard to race, creed, geographical location or degree of retardation. It provides help to parents, individuals, organizations and communities in jointly solving the problems caused by retardation. The members of NARC are united by a common determination to see that every child and adult has a chance to develop to his fullest potential.

7. National PTA Magazine
    National PTA Bulletin

8. Commission on Health and Welfare

9. The Objects of the National PTA are: (a) To promote the welfare of children and youth in home, school, church, and community; (b) to raise the standards of home life; (c) to secure adequate laws for the care and protection of children and youth; (d) to bring into closer relation the home and the school, that parents and teachers may cooperate intelligently in the education of children and youth; (e) to develop between educators and the general public such united efforts as will secure for all children and youth the highest advantages in physical, mental, social, and spiritual education.

10. The National PTA sponsors projects and activities in various fields, including health. Its program is directed toward achieving the total health of the child.

The overall purpose of the project stressing continuous health supervision from birth through high school is to heighten parents' awareness of the importance and value of having periodic medical and dental checkups for their children; carrying out the physician's and dentist's recommendations for treatment or

(Contd.)
correction of defects; and having children receive immunization and booster shots against disease.

An anti-smoking project is designed to educate parents of seventh and eighth graders about the health hazards of cigarettes and to help them develop ways to keep youngsters from starting to smoke. In 1972, a program of alcohol education was integrated into the project. In pilot programs and other activities, parents are encouraged to work with youth, and young people are urged to develop their own preventive and control programs to combat cigarette smoking and alcohol misuse. It is hoped that their efforts and initiative will produce clearer insights into causes of risk-taking behaviors, and develop means of dealing with them more effectively in the family, the school, and the community. The National PTA supports the concept of comprehensive school health education programs. PTA's are urged to work for the development and strengthening of total and sequential programs of health education for grades K-12.

Another project is aimed at improving community resources to safeguard children's emotional health.

1. NATIONAL COUNCIL ON ALCOHOLISM, INC.

2. George C. Dimas, Executive Director

3. 2 Park Avenue, Suite 1720, New York, New York 10016

4. (212) 889-3160

5. NCA has approximately 150 affiliates and associates throughout the country

6. Annual Meeting Denver, Colorado Apr. 30-May 3, 1974

7. Annual Report
   Friday Letter (Newsletter)
   Three catalogs of publications yearly

8. The National Council on Alcoholism has affiliate and associate branches in almost every state in the Union.

9. The National Council on Alcoholism, incorporated in June 1944, is the only national voluntary agency devoted to the problems of alcoholism, whose major purpose is the prevention and control of the disease through a program of education and community services. Affiliated local councils on alcoholism are autonomous nonprofit organizations. Their functions and purpose are outlined in the four objectives necessary for NCA affiliation: an intensive educational campaign in their own area, to be conducted on a continuing basis over an indefinite period of time; establishment of an Alcoholism Information Center; procurement of hospital beds in general hospitals for treatment of acute alcoholism; establishment of diagnostic and treatment clinics for alcoholics. Affiliates and associates of NCA (approximately 150 in local areas throughout the country) stimulate and conduct programs of public and private education, stressing both prevention and treatment: they conduct special programs, seminars and workshops for professional groups; they provide counseling and referral service to alcoholics or to family, friends and employers of alcoholics who rarely know where to turn with the problem. This counseling is not for treatment, but to prepare the way for referral to the right treatment resource for each individual client, whether alcoholic or family.

(Contd.)
Acting as a national clearing house for all information regarding alcoholism, NCA conducts a national educational program designed to place this information in the hands of the general public and special groups. Literature and publications are available. NCA sponsors national Alcoholism Information Month, preparing and producing material used by private and public agencies throughout the nation.

10. Both the National and Local Councils provide materials and guidelines to school health educators, as well as to the students themselves.
1. NATIONAL COUNCIL ON FAMILY RELATIONS

   Task Force on Women's Rights and Responsibilities
   Film and Filmstrip Awards Committee
   NCFR Sections: Counseling, Education, Family Action, Research and Theory

9. The National Council on Family Relations was founded in 1938 as an interprofessional forum through which members of those disciplines interested in family life might think, work, and plan together for the strengthening of marriage and family life. Its objectives are to provide opportunities for individuals, organized groups, and agencies interested in family research, counseling and education to plan and act together on matters relevant to marriage and family living, including establishment of professional standards, promotion and coordination of educational efforts, encouragement of research and extension of community services for families.
1. **NATIONAL CYSTIC FIBROSIS RESEARCH FOUNDATION**

5. No official membership. Approximately 24,000 parents and other interested individuals can be considered members of the organization, as can approximately 2,000 physicians, scientists and other medical personnel who regularly receive medical publications.

6. Cystic Fibrosis Club  
   Washington, D.C.  
   April 17, 1974  
   (Scientific Symposium)  
   15th Annual Meeting  
   (tentative)

   Regional continuing education courses for the medical profession will be held each year, as will small research seminars. Schedule has not been determined.

   General Medical and Scientific Advisory Council and Board of Trustees meet 2-3 times annually.

7. Teacher's Guide: "C/F Child Is In Your Class"  
   Guidelines for Health Personnel: Cystic Fibrosis  
   Educational and Vocational Counseling of Young Adults with Cystic Fibrosis  
   Medical Information: Cystic Fibrosis (for physicians, medical students)  
   Vocational Rehabilitation for Young Adults with Cystic Fibrosis  
   C/F Facts and Figures (general information leaflet)  
   Your Child and Cystic Fibrosis

8. The Foundation, its local chapters and affiliated treatment centers are very much interested in the early diagnosis and competent treatment of children with cystic fibrosis and other chronic respiratory and gastrointestinal diseases. There are no specific committees devoted to school health, but the Foundation as a whole welcomes every opportunity to cooperate with school health programs and to serve as an educational resource for the community and the medical profession.

(Contd.)
9. The National Cystic Fibrosis Research Foundation was incorporated in 1955 to support programs for care, research, public and medical profession education and training of scientists, physicians and other medical personnel for benefit of the many children and young adults with cystic fibrosis, an inherited metabolic disease most seriously, and prematurely fatally, affecting respiratory and digestive functions.

More recently, programs have been expanded to include related pediatric pulmonary and gastrointestinal diseases, with the emphasis remaining on cystic fibrosis. Research in genetics, which may eventually lead to control, even prevention, of cystic fibrosis and the more than 1800 genetic defects thus far identified, is also of great concern to the NCFRF.

The Foundation also closely cooperates with the International Cystic Fibrosis (Mucoviscidosis) Association in its efforts to facilitate exchange of medical information, to gain support for research and care, and to extend the best possible care to cystic fibrosis patients throughout the world.

8. Education and Information Services: Earl C. Graham, Director
   Library and Information Center

9. Founded in 1921, the National Easter Seal Society is the oldest and largest
    voluntary health agency providing direct rehabilitation services to handicapped
    children and adults. Its major purposes are to provide and extend rehabilitation
    services which can alleviate physical, psychological, social, and vocational
    effects of crippling diseases or injuries; to conduct educational programs for the
    public, professional personnel, parents and families of crippled persons, and
    employers, in order to create greater understanding and acceptance of the
    handicapped; and to support scientific research in these areas.

10. Educational services provided by the National Easter Seal Society: The
    Society maintains a library of over 3500 volumes and over 600 serial publica-
    tions; conducts nationwide education programs on the elimination of architec-
    tural barriers; supplies materials on careers in rehabilitation and administers
    three scholarship programs; publishes and distributes pamphlets and reprints on
    a broad spectrum of rehabilitation topics.

7. -

8. -

9. The National Health Council's goals are to improve the health of the public throughout the nation by:

   Improving accountability and credibility of the private* sector including outreach to groups not meeting present membership criteria;

   Representing and promoting the needs and contributions of the private sector in health affairs;

   Providing a channel to and from government by serving as a point of communication, a coordinated point for exploring and clarifying public issues and reviewing and appraising for the public and private sectors the programs and policies of the public sector;

   Providing linkage to the total health scene for its members;

   Augmenting the objectives and efforts of members and fostering and encouraging mutual assistance to improve effectiveness of performance;

   (Contd.)
Participating in public policy development through exploration of policy issues.

* By this is meant voluntary and proprietary health institutions, and other organizations, agencies and corporations having an interest in the improvement of health of the public.

10. The National Health Council acted as fiscal agent for the President's Committee on Health Education and devoted its 1972 Forum, in New Orleans, March 21-22, to a discussion of the preliminary findings of the Committee. School health education was a concern of the Committee and, accordingly, of the 1972 Forum. The Council will convene, in late 1973, a number of organizations concerned with health education to explore possible mutual or joint efforts to promote more effective health education, including school health education.

8. There are thirteen Conferences responsible for programs in specific areas such as traffic, home, labor, industry, youth, school and college, etc. Each has an interest in health insofar as it concerns safety and accident prevention. The conference and department which works with and through schools and educational agencies is the School and College Conference/Department.

   In the School and College Department are four sections: Elementary, Higher Education, Driver Education and School Safety Supervisors, staffed by five professionals and four assistants. Guided by the Conference (composed of 100 educators and representatives of health, education and related agencies) the staff carries on school safety and accident prevention programs.

9. The mission of the National Safety Council is "to determine and evaluate methods and procedures that (a) prevent accidents and (b) mitigate injury

   (Contd.)
and economic loss resulting from accidents; and to provide leadership for adoption and use of those methods and procedures that best serve the public interest."

10. The National Safety Council is a nonprofit, nongovernmental, public service membership organization founded in 1913, and chartered by the U.S. Congress in 1953 "to arouse and maintain the interest of the people of the United States . . . in safety and accident prevention." Its scope includes a variety of safety issues such as fire prevention, industrial hygiene and personnel and plant security. It draws support from members around the world and maintains cooperative relationships with other safety organizations on a global basis.

9. The Pharmaceutical Manufacturers Association is a non-profit, scientific and professional organization. Its active membership comprises approximately 110 firms principally engaged in the production of prescription drugs. These are the products prescribed by licensed medical practitioners and dispensed by licensed pharmacists. Membership is voluntary. The present members account for about 95 percent of U.S. sales of products of the "ethical" type. The PMA was founded in 1958. Its five principal objectives are to (1) encourage consistently high standards of potency, quality and purity for pharmaceutical and biological products for the cure, mitigation, treatment, prevention or diagnosis of disease, (2) encourage research toward development of new and better medicinal products, better facilities and methods for the pharmacological and clinical evaluation of them, and safe, efficient methods for their manufacture, packaging and distribution, (3) engage in and foster research into the socio-economics and organization of health care in the U.S. and abroad in order to facilitate the establishment and maintenance of the most efficient, high quality standards of pharmaceutical production and service, (4) interpret and disseminate information, to and on behalf of the pharmaceutical industry, on governmental regulations, legislation and policies, and other subjects pertinent to the industry, (5) work with other professional associations or groups in the health field, with allied industries and with governmental authorities for the advancement of medical science and the development of optimal health care standards and delivery.

8. Youth Department  
   Women's Social Service Department  
   Family Service Department

9. The Salvation Army is an international religious and charitable movement. The motivation of the organization is love for God and a concern for the needs of humanity. This is expressed by a spiritual ministry whose purpose is to preach the Gospel and win people to Christ. It is expressed also by a wide variety of social services which are extended without discrimination as to race or creed.

   Sexual Health Care Delivery

9. To establish human sexuality as a health entity; to identify the special characteristics that distinguish it from, yet relate it to, human reproduction; to dignify it by openness of approach, study and scientific research designed to lead towards its understanding and its freedom from exploitation; to give leadership to professionals and to society, to the end that human beings may be aided towards responsible use of the sexual faculty and towards assimilation of sex into their individual life patterns as a creative and re-creative force.

SIECUS was chartered in April, 1974, as a nonprofit voluntary health organization. Its ultimate goal is to enable individuals to develop attitudes of responsible sexuality through a comprehensive program of public and professional education, research information, and information programs dealing especially with public

(Contd.)
policy issues affecting sexual attitudes. Advisory materials and consultative services are available upon request.

10. SIECUS is listed in the American Medical Association Directory of Voluntary Health Organizations. While its only voting members are the Board of Directors, anyone who shares the goals of the organization may become an Associate of SIECUS.

   Hypertension Awareness Subcommittee

9. Officially formed as the Student Section of the APhA in 1954 and reorganized into the Student American Pharmaceutical Association in 1969. Purpose is to aid and support the objectives of the American Pharmaceutical Association, to: improve the public health, to foster and encourage interprofessional relations for the promotion of public health, and to improve the science of pharmacy for the general welfare of the public. To provide direct methods for pharmacy students to carry out the above objectives and to enhance interprofessional programs and health conditions on their own campuses and in the communities of this nation.

   (Contd.)
10. Activities include various national and local projects in the area of drug abuse education, venereal disease education, health manpower conferences, including programs in free clinics, and other community service ventures. SAPhA also holds regional and yearly meetings.

To provide direct methods for pharmacy students to carry out the above objectives and to enhance interprofessional programs and health conditions on their campuses.

To provide pharmacy students a mechanism whereby they may contribute to the general welfare of the public and their communities.

Pharmacy students could be of great value if recruited to work in individual school health programs, as could other student health professionals, especially if an interdisciplinary approach was adopted.

9. The Woman's Auxiliary to the American Medical Association is a national organization of physicians' wives, the purpose of which is to assist the American Medical Association in its program to improve the quality of life through health education and services. A non-profit, volunteer service organization, it was founded in 1922. There are 90,000 members and more than 1,000 county auxiliaries in the 50 states and the District of Columbia.

   (Contd.)
Advised and guided by the leaders of the medical profession, doctors' wives are engaged in a broad program of activities for the betterment of the health of the American people. The goal is to improve the quality of life for Americans of all ages. Health care is a responsibility of the total community.
