The 1965 Elementary Secondary Education Act Title VII Chinese Bilingual Pilot Program is a bilingual/bicultural program the purpose of which is to provide for the special educational needs of children who have limited English-speaking ability, who come from environments where the dominant language is one other than English, and who come from low-income families. The program is charged with developing and disseminating Chinese bilingual/bicultural curriculum materials, providing instruction in both English and Cantonese in the basic subject areas, providing the parents of our students with second language instruction in English and Cantonese, and developing an educational prototype which might serve as a replicable model for the development of a K-12 bilingual/bicultural program. A student in the program divides his school time between two teachers in two different classrooms: an English component class and a Chinese bilingual component class. The student will spend half the day in one class and the other half in the other. In some grades the alternation between components is every other day. The students are offered the following subjects: English reading and writing, Chinese reading and writing, spoken English, spoken Cantonese, mathematics, social studies/science, music, physical education, and art. IN T R O D U C T I O N

In 1969 a pilot Chinese bilingual project was funded under the Elementary Secondary Education Act to provide for the special educational needs of limited-English Chinese immigrant children in San Francisco. One of the primary functions of the pilot project has been to develop a K-12 program model which can be replicated in other areas with similar needs. The program model has been modified and refined as perspectives, circumstances, and needs changed.

The purpose of this guide is to give a brief description of the project and its program resources. Please take into account that this description is current to 1974-'75 and that it is written primarily from the viewpoint of one person’s working knowledge of the program.

Roger Tom
July 1974
I. BILINGUAL BICULTURAL EDUCATION: PERSPECTIVES AND VIEWPOINTS

A. A Historical Perspective - Victor Low

The idea of bilingual education began on the premise that minority children in America, going through English-speaking, white-oriented school systems, are being short-changed. They attend schools that do not recognize or accept their native languages and cultures. They study one version of American history, and whatever learning is acquired separates them from their families and/or community. Those that survive the system have poor self-images, deficiencies in reading and difficulties in competing for jobs. The whole upshot is that the public school systems in America consciously perpetuate a false reality of America that non-white children can barely identify or accept. What is the public school saying when a child's native language is thought of and taught as a "foreign" language? Foreign to whom? What is the public school saying (or not saying) when American history textbooks have nothing to say about the contributions of the people with whom he most readily identifies; yet he hears these aspects of history from the lips of his parents and grandparents. Even the melting-pot theory has holes because it assumes a person is white and western oriented.

Out of this predicament sprang forth the Bilingual Education Act of 1965 which addresses itself to this problem. It recognizes the importance of a child's first language and cultural background as assets to be encouraged and promoted by the public school. This educational concept recognizes the wonderful diversity within America's midst and seeks to develop children who will be truly bilingual and bicultural. All children are encouraged to participate in these programs.

The practical implication of bilingual education means that equal emphasis will be given to both English and the child's mother tongue. Equal emphasis will also be given to the child's native culture as well as to the American culture. This new educational approach rests on the assumption that young children can learn a second language. It is relevant for 20th century America, gives children a more realistic picture of this country, and is a sure step toward cultural and linguistic tolerance in a multi-cultural, multi-lingual society.

B. From an Immigrant Chinese Parent's Viewpoint

I'd like my child to speak the language of our new country as good as the people of this country. I know my speaking Chinese at home doesn't aid his learning of English. So I appreciate what the school is doing. I don't mind the school encouraging my child to speak less Chinese and more English. Otherwise how can he practice enough? This doesn't mean that I disapproved of Chinese being used by the children or teacher at school. My child tells me he understands lots more when the teacher explains in Chinese and he can ask
questions in Chinese. But I think there should be times when only English is spoken and is encouraged. And more time devoted to English than Chinese when he is trying to learn English.

After he begins to feel confident in English, then it's another story. Then there should be equal attention to both languages. For I would not like my child not to be able to speak the language of the old country as well as he can the language of his new country. In regards to this, the school can help a lot. The language we use at home is everyday Chinese. The lessons at school will teach him vocabulary and expressions we don't teach at home. In this way, my child will be able to fulfill his responsibility to his new country - and to us, his family. This is very Chinese and very American. Don't you think so?

C. From a Non-Chinese Parent's Viewpoint - Lois Link (June 1974)

It seems to us that bilingual-bicultural education is based on the premise that two people with different languages and traditions thrown together by history have much to offer each other.

In that case, bilingual education is not a one-way street. It cannot be relegated to the minority communities and ignored by the English-speaking majority. To limit bilingual education to persons of non-white or non-English-speaking ancestry would affirm the concept that such education is merely remedial, that the language and culture of the minority is inferior to the language and culture of the majority. Such limitation would only deepen and extend attitudes already prevalent in our society.

We are happy that our children have had this opportunity to participate in the bilingual program - to share their culture and language.

This bilingual-bicultural curriculum greatly expands the typical elementary school curriculum. It affords our children rare insight into important segments of this community and the world. It assists in counteracting the racist influence of other areas of our society and it provides a broad social background.

In other words, the bilingual program seems to offer a superior way of educating our children.
II. THE CHINESE BILINGUAL PILOT PROGRAM
SAN FRANCISCO UNIFIED SCHOOL DISTRICT

A. Statement of Educational Philosophy

We believe that the goal of education to be the preparation of individuals to participate fully and effectively in a democratic and pluralistic society.

We believe that the "content" of education is just as important as the "process"; that is, we believe that what is taught is just as important as how it is taught.

We believe that education should be a broadening and humanistic experience which would enable the individual to remain "un-encapsulated".

We believe that education should help preserve the cultural heritage of the individual so as to enrich the pluralistic society in which we live.

We believe that everyone regardless of age or education can be a learner and a teacher; that the two roles are not mutually exclusive, but that they are complementary.

Based upon our beliefs, we propose an educational program:

--that would maximize the opportunities for students to participate in the decision-making process of the classroom and the program;

--that would enable students to develop an awareness, understanding, and true appreciation of students of different cultural and ethnic backgrounds;

--that would enable students to develop the basic language skills in his home language as well as a second language;

--that would enable students to develop skills in learning to learn and in the higher cognitive areas;

--that would enable students to develop social and affective skills in the areas of self-awareness, self-confidence, and social interaction.

B. The Questions Most Frequently Asked About the Program

1. What is the ESEA Title VII Chinese Bilingual Pilot Program?

The Program is a bilingual/bicultural project funded jointly by the Federal Government and the San Francisco Unified School District.
2. What is the purpose of the program?

The purpose of the Program is to provide for the special educational needs of children who have limited English-speaking ability, who come from environments where the dominant language is one other than English, and who come from low-income families.

3. What are the specific tasks of the program?

The Program is charged with:

--Developing and disseminating Chinese bilingual/bicultural curriculum materials

--Providing instruction in both English and Cantonese in the basic subject areas

--Providing the parents of our students with second language instruction in English and Cantonese

--Developing an educational prototype which might serve as a replicable model for the development of a K-12 bilingual bicultural program.

4. In what areas are special curriculum materials being developed?

Special curriculum materials are being developed in the areas of Chinese reading and writing, Cantonese as a second language, and Chinese cultural studies.

5. What is the operational definition of bilingual education, and what bilingual model is being employed?

Bilingual education is defined as the use of both English and Chinese as mediums of instruction. The project is an equal maintenance language program with an informal alternation of languages in the teaching of subject matter.

6. What subjects are offered to students?

- English Reading and Writing
- Chinese Reading and Writing
- Spoken English
- Spoken Cantonese
- Mathematics
- Social Studies/Science
- Music
- Physical Education
- Art
7. Why is Cantonese taught rather than Mandarin?

The majority of our Chinese students come from Cantonese-speaking homes. Working on the premise that a child's home language is his best medium for learning, Cantonese is used as one of the languages of instruction.

8. How are Chinese and English taught as second languages?

They are taught through the audio-lingual method in an activity-oriented curriculum.

9. Is the program only for Chinese students?

No. 40% of our children are non-Chinese. They are in the program to learn about Chinese culture, spoken Cantonese, and eventually Chinese reading and writing.

10. How many children are in the program?

In 1974 there are 360 elementary school children in 14 classes in grades K-6.

C. A Typical Program For A Student

A student in the program divides his school time between two teachers in two different classrooms: an English component class and a Chinese bilingual component class. The student will spend half the day in one class and the other half in the other. In some grades the alternation between components is every other day. Listed below are the subjects taught in each component.

D. Program's Organizational Structure

1. Administration (See also Organizational and Staff Chart)

The day-to-day operations of the program is the responsibility of the Project Manager, Mr. Victor Low. Liaison between the program and the central office staff and the Board of Education is the responsibility of the Project Director, Mr. Wellington Chew. Mr. Chew is quarter-time with the project; his other time is spent as the supervisor of the district's Chinese ESL/Bilingual Department. Mr. Chew reports to Mr. Raymond Del Portillo, who is the district's Director of Bilingual Education.

2. Program Components

The Program has two major functions. The first is to develop and field test curriculum materials for Chinese bilingual-bicultural programs. The second is to provide a Chinese bilingual instructional program for students on the elementary level.

The instructional program was started in 1969 with two first grade classes. In each succeeding year an additional grade level was added by forming two new classes. In September 1974 there will be two classes at each level in grades 1-6 and one kindergarten class. In the non-public sector there are two bilingual classes at St. Mary's Day School.

The curriculum development component has been developing materials in the areas of Chinese Reading and Writing, Cantonese as a Second Language, Chinese Cultural Studies, and Chinese American Studies.

3. Advisory Groups

The project has two advisory groups which meet regularly to give the Project Manager input: The Parents' Advisory Committee and project's Staff Council. Both groups have a part in reviewing and consulting on the project's operations and program's application for the continuation of funding.
III. INFORMATION FOR NEW TEACHERS IN THE
CHINESE BILINGUAL PILOT PROGRAM

A. The Teacher's Role

The degree of success of the Program is largely dependent on
the quality and commitment of its classroom teachers. It is the
teachers who must translate the Program goals and objectives into
meaningful educational experiences for children. It is they who
must not only give proper attention to the cognitive growth of
children, but also to their emotional and social growth as well.
In short, teachers in the Program have the responsibility of enabling
students to learn in the language and style best suited for them,
to build self awareness and confidence and to develop the ability
to relate well with others in a pluralistic society.

B. Team Teaching

There are two basic components in the instructional program:
the English component and the Chinese component. At any particular
grade level one teacher from each of the components are teamed to-
gether to teach two classes of children. For example, two teachers,
one from the English component and the other from the Chinese com-
ponent, would team teach two classes of second graders. The
children would spend half of their time with one teacher and the
other half with the other. The alternation between teachers are
done daily or every other day depending on the decision of the
team.

English component teachers are selected on their knowledge and
skill in teaching English language arts and English as a second
language.

Chinese component teachers are selected on their knowledge and
skill in teaching bilingually in Chinese and English in the areas
of math, social studies, and Chinese language arts.

Team teaching in the Program has resulted in better place-
ment and use of teachers. Rarely has there been a teacher who is
equally competent in all areas of the curriculum. However, through
team teaching, teachers have been able to complement each other
and have been able to develop a stronger instructional program as
a result.

C. Paraprofessionals

In most cases, teachers in the Program will have the assistance
of a paraprofessional in the classroom. Paraprofessionals in the
Program have varied skills and training backgrounds. In most in-
stances, paraprofessionals in the Chinese component are skilled in
C. Paraprofessionals - continued

the teaching of the Chinese language. Those in the English com-
ponent are selected partly on the basis of their being good
English language models.

Even though certain paraprofessionals are excellent teachers, Cali-
ifornia state code places the ultimate responsibility for
teaching and supervising students on the classroom teacher. The
code states that the paraprofessional may not do anything which the
classroom teacher is specifically charged to do. For example,
paraprofessionals may not make out student report cards, nor may
they prepare and verify school registers.

Use paraprofessionals effectively. In most instances the
classroom teacher should introduce new concepts and skills; the
paraprofessional should be used to provide the needed practice and
supplementary lessons. Also, in most cases, the teacher should
work with the children needing the most help, and the paraprofession-
al should work with those who are more capable.

D. Teacher Training and Retraining

Teachers in the Program are required to participate in pre-
service and inservice training programs. Also, they are afforded
opportunities to attend regional and national meetings, conferences,
and workshops.

1. The Preservice Workshop: The last week in August is
usually set aside for the Program's preservice workshop.
The workshop activities include the orientation of new
staff members, introduction of new materials and methods,
seminars on special topics and planning for the coming
school year.

2. Monthly All-Day Inservice Workshops: Once a month the
teachers and the curriculum staff meet to evaluate the
effectiveness of the Program in achieving its stated
goals and objectives, to provide feedback on materials
being field-tested, and to develop strategies for im-
proving the Program.

3. Regional and National Meetings: In previous years
teachers of the Program staff have had the opportunity to
attend the following conferences and workshops -

---Annual Meeting of Teachers of English to Speakers
Of Other Languages

---International Bilingual Bicultural Conference

---National Association of Social Studies Teachers Conference
D. Teacher Training and Retraining - continued

--California Federation of Chinese Bilingual Educators
Meetings

--Northern California Multilingual Multicultural Conference

The field of bilingual bicultural education in the United
States is a relatively new one; and as the field becomes better
developed, teachers in such programs will be afforded better training opportunities. In California, the framework for a Bilingual Bicultural Specialist Credential has already been established. Teacher training institutions are in the process of developing credential programs in bilingual bicultural education for the various language groups. A forerunner of such credential programs are the bilingual bicultural training institutes of Seton University and San Francisco State University.

E. Materials Development and Field Testing

Teachers in the Program are asked to evaluate and give feedback on experimental materials introduced into the classrooms. Input from teachers and students who have used these materials are vital in the development of effective curriculum materials for the Program.

In addition to the curriculum staff, teachers have also played an important role in the development of new curriculum materials. During the Summer Curriculum Development Workshop, the Project Manager may assign teachers to special curriculum projects on an extended-day basis.

F. Individualized Instruction

In the areas of math and phonics are sufficient materials to permit the individualization of instruction. These materials include student profiles, criterion-referenced tests, learning units, record-keeping systems, and supplementary materials. The necessary components for individualizing instruction are being developed in the areas of Chinese Reading and Writing, Cantonese as a Second Language and English writing skills.

1. Student Profiles - These skills profiles are organized by topics and levels of difficulty. They are used in conjunction with diagnostic and mastery tests and are passed on to succeeding teachers as a student progresses through the grades. The primary function of the skills profiles is to provide a record of what has been mastered by students.
F. Individualized Instruction - continued

2. Criterion-Referenced Tests - These tests are specific to what the student has been exposed to and taught. And thus they give information on the items which have been learned in a particular area at a particular level of difficulty.

3. Key Sort Cards - These cards are used in conjunction with the student profiles and criterion-referenced tests. They provide a quick method of grouping students for instruction.

G. Instructional Materials and Equipment

Teachers in the Program have access to the commercially-produced and project-developed materials listed in Appendixes A and B. In addition, teachers have access to project equipment such as language masters, cassette tape recorders, and listening centers. Also, each teacher has a $100 a year to purchase instructional materials for his students at his discretion.
IV. STARTING A CHINESE BILINGUAL BICULTURAL PROGRAM

A. The Scope of the Program

1. The Program is designed to enable students to become fluent and literate in Cantonese and English and to become effective persons in a democratic and pluralistic society.

2. It is intended to be a long-ranged program with students entering it in the primary grades and continuing in it through high school.

B. Staff Requirements

1. Chinese bilingual bicultural teacher(s) to team with ...

2. Teacher(s) experienced in teaching English to speakers of other languages.

3. The number of teachers required is dependent upon the number of students who would benefit from the Program. Generally, a class should be composed of no more than 50% non-English dominant children.

If the above is used as a guideline, then a bilingual bicultural teacher will be needed for every 12-15 Chinese-dominant students.

C. Selection of Students

1. Classes should include non-Chinese as well as Chinese students.

2. Chinese-dominant students should have priority in placement in the Program.

3. Non-English dominant students who are not Cantonese speaking should be referred to the appropriate bilingual program.

D. Instructional Program Characteristics

1. Students are given language instruction in both Chinese and English. Curricular content areas are also taught in both languages. There is a formal separation of the two languages during a part of every day.

2. Curriculum packages have been developed to provide for individualized competency-based instruction in the areas of math, phonics, and English writing.
D. Instructional Program Characteristics - continued

Other packages are being developed in the areas of Chinese reading and writing, English as a second language, Cantonese as a second language, and Chinese cultural studies.

3. In schools where there are only two or three teachers in the program, the children should be allowed to remain with the same team of teachers two or three years.

E. Instructional Support Requirements

1. Teachers in the Program should have release time for preservice and monthly inservice training.

2. Teachers should be supervised and supported by an elementary specialist in Chinese bilingual bicultural education. The specialist would provide assistance in screening students, instructional methods and materials, and evaluation.

F. Evaluation

The evaluation of a Chinese bilingual bicultural program should include criteria and instruments to measure the effectiveness of its ...

1. Preservice and inservice training of teachers,
2. Instructional program in terms of student performance,
3. Screening and placement of students, and
4. Parent education program.

APPENDIX A - CURRICULUM MATERIALS DEVELOPED BY THE F.S.I.E. TITLE VII-CHINESE BILINGUAL PILOT PROGRAM

A. Chinese Reading and Writing Curriculum - Robert Sung

1. Components
   a. Teacher's Guides: include weekly lesson plans, word lists, teaching suggestions, games, visual aides (Grades 1-5 completed).
   b. Lessons: 28-30 lessons for each of the grade levels completed; the lessons are written in the form of stories, poems, and paragraphs on various subjects.
   c. Audiotapes are available for each lesson.
   d. Reading Charts are available for every lesson in Grades 1-3.
   e. Student Worksheets: for every lesson there is a student worksheet to help students develop comprehension and word analysis skills.
   f. Chinese Word Practice Sheets: for every new word introduced in Grades 1-4 there is a worksheet to help students in the sequencing of the strokes and putting the strokes in proper relationship with each other.

B. Chinese Festivals: Teacher Guides - Helene Lew

The guides were written to give classroom teachers some basic information on the major Chinese festivals. Each guide includes a historical background of the festival, its significance to the Chinese, how it is celebrated, and a bibliography of additional resource materials. Guides are available for the following Chinese festivals:

1. The Moon Festival
2. The Winter Festival
3. Chinese New Year
4. Ching Ming
5. The Dragon Boat Festival
C. Chinese Festivals: Student Booklets - Gordon Lew

The illustrated student booklets are written in Chinese and English. The significance of the Chinese festivals is conveyed to students in story form. The following titles are available:

1. "The Moon Festival Is Here"
2. "Winter Festival"
3. "Preparing for Chinese New Year"
4. "The Story of the Red Envelopes"
5. "The Story of Ching Ming"
6. "Dragon Boat Festival"

D. Bicultural Study Trips in San Francisco: Teacher Guides - Elizabeth Lew

The guides are multi-curricular and can be used to teach skills in a number of subject areas; e.g., social studies, math, science, language arts, etc. A typical guide has the following components:

1. Destinations: a listing of several options as to places to visit.
2. Objectives: general and specific instructional objectives.
3. Preplanning: a list of materials the teacher should read and become familiar with.
4. Suggested Classroom Activities
   a. Preliminary Activities
   b. Planning for the Walk
   c. The Walk Itself
   d. Follow-up Activities
   e. Culminating Activity
5. An Oral Language Lesson Related to the Study Trip
6. Bibliography: Non-fiction and Fiction Items

The following Study Trip Guides are available:

1. "A Study Trip to a Chinese Bakery"
2. "A Study Trip to an American Bakery"
3. "A Study Trip to a Chinese Restaurant"
Study Trip Guides (continued)

4. "A Study Trip to an American Restaurant (Cafeteria)"
5. "A Study Trip to a Chinese Vegetable Store"
6. "A Study Trip to San Francisco's Farmer's Market"
7. "A Study Trip for the Moon Festival"
8. "A Study Trip on Thanksgiving"

The guide covers the history of the Chinese in America from the 1840's to the present. The guide is used together with three source books which contain most of the visuals for each lesson. The guide is divided into eleven parts - each covering a certain period of history:

1 & 2. "China Clippers & the Land of the Golden Mountains"
5. "Working on the Railroad: Conquering the Sierra Nevadas"
6. "Hard Times: Work & Achievement"
8. "The Chinatown You Missed - The Bad"
10. "Chinatowns in U.S.A."

F. Chinese Cultural Multi-media Kits - Irene Kwok

The Chinese Cultural Multi-media Kits have been developed around major topics. There is a different kit for each topic for each of the grades 1-5.
F. **Chinese Cultural Multi-media Kits** (continued)

1. **Major Topics**
   a. Moon Festival
   b. Winter Festival
   c. Chinese New Year
   d. Transportation
   e. Family
   f. Seasons
   g. Ching Ming (To be developed)
   h. Dragon Boat Festival (To be developed)

2. **Components of Each Kit**
   a. A Basic Fact Sheet
   b. An Illustrated Story in English and Chinese (Audio-tapes and filmstrips will be developed)
   c. A Song, Poem, and Rhyme
   d. A Group Game
   e. A Class Art Project

G. **Cantonese As A Second Language Curriculum - Helene Lew**

1. **Components**
   a. Lessons: 35 lessons for each of the three levels. Level I will be completed July 1974.
   b. Flash Pictures: vocabulary cue cards to be used in substitution drills.
   c. Classroom Charts: tone and classifier charts to teach the two most difficult aspects of learning Cantonese.
   d. Games: oral language games will be developed to supplement the activities of each lesson.
   e. Language Master Cards: sets of cards to review vocabulary and structures introduced.

2. Filmstrips

a. Continuous Progress Education (2)
   Education Progress Corporation
B. 16mm Films

1. "Boy with Glasses"  45 minutes, B & W, Intermediate
   A shy Japanese boy is told he must wear glasses. Though he needs it for school he's afraid of ridicule from his peers. He finally agrees to wear it because his teacher and father helps him overcome his self-consciousness.

2. "Christmas Cracker"  9 minutes, Color, Intermediate
   Created by several of Canada's best artist and animators, this film present three humorous and highly imaginative Christmas stories.

3. "Clay (Origin of the Species)"  8 minutes, B & W
   (Motivational Film)

4. "Dream of Wild Horses"  9 minutes, Color, Inter. Language Arts.
   The director utilizes slow motion against soft-focus backgrounds to create dream-like effects that evoke the wild horses of the Camargue.

5. "Family of the Island: Her Name is Wasamatha"  11 minutes
   Color, Intermediate Geography.
   The film tells of Wasamatha, a ten-year old girl growing up in the Fiji Islands who learns an important lesson in responsibility about a family living on an island. We learn that like family life in the U.S. each member of a group has to carry his (her) share of responsibility if the family is to survive.

   The film encourages children to examine family life in another country and compare it to their own by following a day in the life of a Malay family living in a kampong (village).

7. "Family of the River"  12 minutes, Color, Inter. Geography
   The film is narrated by Razi, a girl living with her family on a boat on the Chao Phrara River in Thailand. We see Razi and her family working together as a unit living on a boat in contrast to our urban, technological society.

8. "Magic Moments"  5 units of 4 films each. Language Arts.
   Unit 1 - Let's Talk.
8. "Magic Moments" (continued)

What If?  3 minutes. Color.
Whose Shoes?  3 minutes. Color.
Me, Too?  3 minutes. Color.

Clap!  5 minutes. Color.
Bang!  3 minutes. Color.
Follow Me.  5 minutes. Color.
Magic Hands.  7 minutes. Color.

Unit 3 - Let's See.
Toes Tell.  6 minutes. Color.
Fantasy of Feet.  8 minutes. Color.
Lopsideland.  5 minutes. Color.
Hands Grew Up.  6 minutes. Color.

Unit 4 - Let's Pretend.
Getting Along.  2 minutes. Color.
Holding On.  4 minutes. Color.
Magic Sneakers.  8 minutes. Color.
Getting Even.  3 minutes. Color.

Unit 5 - Let's Play
Choosing Up.  6 minutes. Color.
Join Hands, Let Go!  8 minutes. Color.
Guessing Game.  7 minutes. Color.
Matching Up.  4 minutes. Color.

A Chinese-American boy living in New York's Chinatown meets and befriends a Puerto Rican girl. The two get acquainted and open a new world of fantasy, but then the adult world intervenes and prevails as the story ends on gently sad but telling note.

The film shows students the crucial importance of rice as the principal food for almost two-thirds of the world's people. It dramatizes the relation of Asia's basic crop to the rapidly rising number of people who depend upon rice for their principal food.

A film record of the 30-day life cycle during which a pair of robins build a nest and raise a family. It includes a discussion of nest building, laying of eggs, hatching of these eggs, feeding and caring for the young robins and finally their leaving home.

Produced in special technique of string animation. Tells the story of the friendship between a scrap of paper and a piece of string. The film points out the usefulness and significance of paper and string to our culture and economy. It is done with a humanistic approach.

(1) Cheetah. 11 minutes. Color.
(2) Elephant. 11 minutes. Color.
(3) Giraffe. 10 minutes. Color.
(4) Lion. 11 minutes. Color.
(5) Zebra. 10 minutes. Color.

A sensitive film dealing with the friendship that grows between two Japanese boys. Fatty is shy and unsure of himself and has a difficult time making friends. Skinny has no trouble making or keeping friends. Gradually, the two form a close bond and become inseparable.

An introduction to some of the relationships that exist among the celestial bodies, the sun, moon, and earth. The causes of day and night, the seasons, and the tides are explained.
