Audiovisual Aids; *Aural Learning; Exceptional Child Education; *Handicapped Children; *Instructional Materials; Listening; Phonograph Records; *Resource Guides; Tape Recordings

The catalog (developed by the Great Lakes Region Special Education Instructional Materials Center) provides information on more than 100 auditory learning materials for use in special education. Described in the first section of the catalog are procedures used to evaluate and classify auditory instructional materials, including a list of classification descriptors, sample forms, and an explanation of a learner classification system. Entries are arranged alphabetically by title and usually include a one-paragraph description and picture of the material, the author's name, the producer's name and address, date, cost, a list of student objectives, and information on content, procedures, and equipment needed. Also included is notation of the curriculum focus area and level of student for which the material is recommended. Entries are indexed by titles, producers, broad interest areas, and recommended interest and/or use levels. Associated with the catalog are a cassette tape and printed publication which present practical suggestions for designing auditory instruction and making auditory instruction meaningful. (LS)
Auditory Learning Materials for Special Education

Media and Materials Development Unit
Great Lakes Region Special Education Instructional Materials Center
Michigan State University
East Lansing, Michigan

In conjunction with
The Consortium on Auditory Learning Materials for the Handicapped

July 1974
The Consortium on Auditory Learning Materials for the Handicapped was established in an attempt to tie together those federally funded projects that have a common interest in auditory learning with handicapped children. Activities of the Consortium include the development of procedures for identifying and classifying auditory instructional materials, the design and evaluation of auditory instructional materials, and other project activities related to auditory learning.

Members of the Consortium include projects at American Printing House for the Blind/University of Northern Colorado/Illinois Instructional Materials Center/University of Nebraska/New Mexico State University/University of Oregon/Pennsylvania State University/University of Wisconsin/Ohio State University/Michigan State University.

The Consortium on Auditory Learning Materials is coordinated at Michigan State University.

The work presented herein was performed pursuant to a Grant from the U.S. Office of Education, Department of Health, Education and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the U.S. Office of Education, and no official endorsement by the U.S. Office of Education should be inferred.
ACKNOWLEDGMENTS

As difficult as it is to credit those involved in a group effort such as this, we wish to express our appreciation to Mrs. Kay Miller for her willingness to type and retype through many revisions and in giving of her own talents in producing these catalog pages. We are also indebted to Mrs. Lynn Kinzel for her suggestions and invaluable assistance in editing and finally pulling this volume together. Mrs. Cindy Lafkas and Dr. Nancy Carlson provided input regarding the "Learner Classification System" which proved so useful in our classification system. To Mr. William Anderson we are grateful for input and cohesion regarding the Consortium on Auditory Learning Materials for the Handicapped. We wish to thank the Illinois SEIMC and the University of Wisconsin SEIMC for their contributions to this catalog. The suggestions and support regarding this catalog provided by Mr. S. Joseph Levine, coordinator of this project, have also been most helpful.

Marsha C. Smith
Phyllis O'Connor

July 1974
PREFACE

The information regarding the materials described in this catalog has been compiled from a series of 'Identification Information' sheets developed and used by this center's staff in their study of auditory learning materials. Each of the materials included in this catalog was examined "first hand" by a member of the staff and pertinent information gathered regarding the material itself. An in-depth explanation of this procedure is found in the first section of this catalog, as well as samples of the "Identification Information" form, descriptors used, and other information used in the development of this Catalog of Auditory Learning Materials for Special Education.

A few comments specifically regarding this catalog may facilitate its use.

1) If information was not available to the SEIMC at the time of this printing, that specific category was deleted from the catalog page (i.e., cost, copyright date, etc.). All available information has been included.

2) In the item appearing at the bottom of each catalog page labelled "Recommended For," the CA/MA stated usually refers to the minimum age with which the material would be appropriate.

Indices are provided following the alphabetical arrangement of auditory learning materials to help the user of this catalog in his search for specific materials. Indices are arranged alphabetically by 1) title, 2) producer, 3) broad interest areas, and 4) recommended interest and/or use level.
CLASSIFYING AUDITORY INSTRUCTIONAL MATERIALS

This first part of the catalog is designed to provide a background and description of procedures developed by the Great Lakes Region Special Education Instructional Materials Center (GLRSEIMC) for the classification of auditory instructional materials. The procedures described are those employed by the GLRSEIMC in their Media and Materials Development Unit which has been undertaking the evaluation and development of auditory instructional materials for handicapped children.

Why classify materials? The classifying of instructional materials according to a systematic procedure establishes the foundation for numerous decisions that are often impossible without such a procedure. The ultimate decision that must be made is the appropriate matching of an instructional material with a specific learner. To make such a match demands either a) prior knowledge and use of the instructional material, b) an opportunity to "try out" a material with a learner, or c) precise information regarding the material and its potential use. Obviously, the first alternate (prior use of the material) is the most effective. A teacher who has used a material understands the dynamics of it and whether or not it is appropriate for the situation. With the many new materials becoming available each year, however, an individual teacher's knowledge and use of a high percentage of available materials is shrinking at a phenomenal rate. Teachers are finding that, though they are becoming familiar with many new materials, the number to choose from is insurmountable.

The second alternative (trying out a material) can be effective, but certainly not efficient. Which materials should you try? Can you "borrow" materials for use in your classroom on a trial basis? Where do you begin?

Making this second alternative more efficient depends on the information that is available to the teacher. If he has precise information about a material (the third alternative), he can select certain ones to try (second alternative), and after trying them he will be able to make future decisions based on experience (first alternative).

What should be included in a classification system? The GLRSEIMC began the task of designing a classification system for auditory instructional materials by examining existing systems and selecting aspects of each that "seemed" to be appropriate for classifying auditory instructional materials. When the first model was developed it was used by staff members in an attempt to select specific instructional materials for use with learners involved in the field-testing program. This is the key in the development of this classification system. The system could only be considered usable if it would allow teachers and staff to make a learner/material match. Consequently,
the system was modified and altered on numerous occasions. Each re-
vision was made on the basis of either a) including an aspect that
was found to be important in the decision making process, or b)
deleting an aspect that did not contribute. It should be understood
that the primary purpose in the development of this classification
system was to support the ongoing efforts of the GLRSEIMC in selecting
appropriate materials for field testing. It is felt that the current
system meets a high percentage of our needs in this area.

Finally, the classification system was examined regarding its
compatibility with national systems for describing instructional
materials. Minimal modification was made in the system to accomplish
this compatibility. (2)

The parts of the system. The following pages show all of the
parts of the classification system that was developed.

AUDITORY INSTRUCTIONAL MATERIAL IDENTIFICATION INFORMATION

This is the actual form that is used for collecting
information. It has been kept down to one page in
length to make the classification task more viable
for the person actually doing the classification.

CLASSIFICATION DESCRIPTORS for Auditory Instructional Material
Identification Information Form

This set of descriptors forms the basis for the re-
sponses to be entered on the form. Through the use
of specified descriptors it is possible to establish
a consistency of information on all completed forms
and it allows an interlock with terminology used on
a national basis. (3) It should be understood, how-
ever, that the person classifying a material is not
limited to this list of descriptors and can add
others to the form as the need arises.

HOW TO USE THE AUDITORY INSTRUCTIONAL MATERIAL IDENTIFICATION
INFORMATION FORM

This is the procedure for completing the form. Again,
the outlining of a specified procedure further guar-
antees a consistency of information from form to form.

LEARNER CLASSIFICATION SYSTEM

The Learner Classification System (LCS) was developed
as a meaningful descriptor to be included in the
classification system. The LCS provides a single
descriptor approach for providing information regarding
the type of learner (developmentally) that can best
benefit from a specific instructional material. The
LCS is designed primarily to be used in conjunction
with the classification system.
The Catalog

The Catalog itself is considered to be the final "output" product to provide the user, specifically teachers and teacher trainers, with easily retrievable information regarding auditory learning materials. The catalog form itself is a result of a survey of teachers regarding what information they have found to be most helpful in identifying useful teaching materials. Preferences regarding format were also sought. Information gathered during the material identification phase has been transposed to the "output" format. This final product is the result of these preferences and opinions of the actual intended audience.

(1) Of particular help was the Evaluation Handbook developed by the SEIMC/RMC Network. This Handbook provided an overview of a number of different systems that have been used and are currently being used in the area of special education.

(2) The concern was to provide maximum compatibility with the ERIC-CEC Clearinghouse. Small numbers in parentheses on the form indicate the parallel entry in the NIMIS Master Record, the system being designed by ERIC-CEC for national use.

(3) The primary base for descriptors was the ERIC Thesaurus for special education. The Thesaurus presents descriptors used in the ERIC system. All terms selected for use in the classification system were checked against the ERIC Thesaurus and in needed cases were modified to guarantee consistency. Since, however, the ERIC system does not yet accept materials in other than print form, certain descriptors appear in the classification system that have no parallel form in ERIC.

## Classification Descriptors

### For Auditory Instructional Material Identification Information Form

This descriptor list is to facilitate filling out Section II of the Auditory Instructional Material Identification Information form.

### Mode of Input - Primary and Secondary

- Auditory
- Visual
- Tactile
- Kinesthetic

### Type of Format

- Phonograph Records
- Audiotape, reel-to-reel
- Audiotape, cassette
- Audiotape, flashcards

### Method of Output

- Verbal expression
- Non-verbal expression
  - manual (includes handwriting)
  - kinesthetic
  - tactile

### Curricular Area

- Affective behavior/development
- Auditory perception
- Career education
- Communication skills
  - listening skills/comprehension
  - reading
  - verbal communication
- Consumer education
- Daily living skills
- Environmental education
- Health/safety education
- Literature
- Mathematics
- Motor skills
- Music
- Prevocational education
- Science
- Self-care skills
- Sex education
- Social skills
- Social studies
- Spelling
- Other (specify)

### Minimum C.A., M.A.

This item should be completed by showing the appropriate minimum ages in years as opposed to showing age according to grade level.

### Stage

This is an optional item to define the type of learner best suited to this material. For information regarding the definitions of learner stages, see Learner Classification System by Nancy Carlson and Cindy Lafkas.

### Interest Level

- Pre-school
- Primary (grades K-3)
- Intermediate (grades 4-6)
- Advanced (grades 6-12)

### Prerequisite Skills

When using each descriptor, be sure to note level of competency: minimal, instructional, or competent.

- Auditory memory
- auditory attention
- auditory selective recall
- auditory sequential memory
- auditory imagery
- Visual perception
- Reading
- Mathematics
- Cognitive functions

### Necessary Equipment

- Tape recorder, reel-to-reel
- Tape recorder, cassette
- Audio flashcard reader
- Phonograph
- Filmstrip projector or viewer
- Manipulative materials
- Paper/pencil/crayons
- Other (specify)
HOW TO USE THE AUDITORY INSTRUCTIONAL MATERIAL IDENTIFICATION FORM

The purpose of this documentation is to facilitate the use of the Auditory Instructional Material Identification form (examples of this form are included). The meaning and purpose of each item will be explained. Examples are given from a completed form.

The numbers, 1-15, which appear in parenthesis on the right-hand side of the form represent the field numbers of the cataloging system of the National Instructional Materials Information System (NIMIS). They are included here in order that entries of this system will parallel those of NIMIS and thus enhance its usability. While using this form, the numbers need not be given special consideration.

I. TITLE: *Beginner's Bird Box*  
________________________ (2)

Record the title of the particular material being classified as stated by the publisher, including subtitles and/or alternative forms, such as inversions, acronyms. Edition data, if applicable. If the material is a portion of a whole (i.e., one song from a record of many songs), state this, and include the titles of both.

Series, title & number __________________________ (3, 4)

For materials which are not part of a series, this does not apply, and, therefore, will be blank.

Author(s)  *Julia K. Fenderson*  
________________________ (5)

If more than two, list as "and others." May write in names of editor(s) if "none listed."

Publication/Copyright date 1973  
________________________ (6)

SOURCES:

**National**  
*Educational Insights*  
________________________ (10)

**Local**

________________________ (11)

Record names and addresses of national and local sources of supply or delivery systems or "not available."
Enter cost of material and the date of catalog in which the price was listed. May enter purchase price and date of purchase if catalog not applicable.

National Identification Symbol

Refers to a unique national system identification symbol to be assigned by a national authority.

CEC ERIC Descriptors

Descriptors from ISIMDSE authority lists, as used by the Council for Exceptional Children, Educational Resources Information Center.

II. CLASSIFICATION:

With the Identification Information Form is a page entitled Classification Descriptors which is a list of descriptors from which to choose in completing the items in this section. Great care has been taken to use descriptors which would 1) offer guidelines and facilitate the ease and efficiency with which the form is used, both by the classifier and the reader, and 2) correspond to those used by ERIC. If the supplied list proves inadequate for a particular material, other descriptors may be used.

<table>
<thead>
<tr>

<th>Secondary</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type of format (note quantity of each)</td>
<td>auditory</td>
<td>visual</td>
</tr>
<tr>
<td></td>
<td>1 cassette</td>
<td>10 illustrated information cards</td>
</tr>
</tbody>
</table>

Size, speed or number of tracks may be recorded, if necessary.

Method of Output

Record the type of response that is required of the learner. For example, he may be asked to answer questions orally or tell a story (verbal expression), write responses, group objects, or mark choice (non-verbal, manual), dance or move around room (non-verbal, kinesthetic) or manipulate an abacus (non-verbal, tactile). If no response is demanded, "none" should be entered.
### Curricular Area
**Intensas**

### Instructional Level
**primary/intern.**

### Minimum: C.A.
**8**  
**M.A.**
**8**  
**Stage**
**II**

### Interest Level
**primary/intern.**

---

**Prerequisite Skills**
- Auditory memory - all areas competent
- Reading - instructional

---

The purpose here is to further classify the appropriateness of a material for particular learners. Not all of the skills suggested on the list will be necessary for use of any one material. Select those required and note the highest necessary level of competency for each skill: minimal, instructional, or competent.

---

### III. MATERIALS USE:

**Instructional** ☒  
**Supplemental**

Mark (☒ or ☑) after "instructional" if the material does indeed teach a concept, skill, etc. in and of itself or after "supplemental" if it is best used in conjunction with other instruction.

---

**Teacher's manual**
- ☒ yes  
- ☑ no

Mark yes if manual is included with the purchased material; no, if not included. Direction for use, objectives, etc. printed on a record cover can constitute a teacher's manual.

---

**Objectives**
- Identification of 8 of 10 birds and their calls, bird eggs and silhouettes, characteristics of different birds, and ways birds help ecology

May be quoted from author/publisher or may be as seen by the classifier.

---

**Lessons (include total number)**
- Singular ☒  
- Multiple ☑ 8  
- Sequential ☑

Enter a number in one of the three blanks to show how many lessons are included in the material, i.e., singular 1 or multiple 2 or more, if the lessons can be used in any order, or sequential 2 or more, if the lessons are designed to be used in a definite order.
Time per lesson: 20 min.

State in minutes per individual lesson.

Follow-up activities: required ___ suggested X ___ none ___

Mark (x or ✓) in one of the three blanks to show whether follow-up activities are given by the author/publisher as an integral part of the lesson (required), as a possible supplement to the lesson (suggested) or not offered (none).

Setting(s): individual ___ small group ___ large group ___

May be suggested in manual or may be as seen by classifier. Many materials may be used in more than one of the three settings.

Instructions for use designed for use in segments (by specific birds) - could be used in small group or individual study carrel - teacher's manual is complete and useful guide.

Brief description of how the material is to be used.

Teacher directed? ___ yes X ___ no

Mark to indicate whether or not a teacher is necessary during the actual lesson.

Descriptive Comments: very adaptable - easy to listen to and follow directions - instructions are included to turn off cassette and repeat section - well illustrated picture and information cards - music and words to songs also included - well done

Include information not found elsewhere on form. Do not include evaluative data. Suggested useful information: audio presentation method used (dramatization, direct information, drill, song, storytelling, etc.), voices, music, sound effects, etc. used, whether lessons seem to be pre/post testable, whether the auditory component could be used without the secondary component.
Necessary equipment & possible special features: 

- Cassette recorder

Some possible responses for this item are included in the Classification Descriptors. Other necessary equipment should be listed, such as earphones, opaque projector, etc. Note-worthy special features could be modifications such as the button box or any aspect of the material that might not be suitable for use with standard equipment.

Classified by: Marsha C. Smith
This paper describes an initial attempt to develop a system for specifying learner/instructional material interaction characteristics. The information collected on many evaluation forms and presented in catalogs of instructional materials allows the teacher to make a number of different decisions regarding the selection of appropriate instructional materials. The information, however, most often allows decisions based on physical characteristics and content area of the material. Decisions relating to matching materials with learner characteristics is usually spotty (reading level may be specified) and often too general to be useful (i.e., early elementary, trainable retarded, etc.). To make meaningful decisions about the appropriateness of a material for a specific learner demands a usable system for specifying the characteristics of learners that are appropriate for a specific material. An attempt at building such a system is described in this paper.

The Learner Classification System utilizes an organizational table that accommodates four "learner variables" and defines each variable at three different "learner stages." Such a system provides a single meaningful descriptor for understanding the type of learner for which a material is most appropriate. This descriptor (Stage I, Stage II, or Stage III) defines the mental age, chronological age, performance grade level, and level of emotional/social development. The following table presents the components of the Learner Classification System and the definition of characteristics at each stage.

<table>
<thead>
<tr>
<th>LEARNER VARIABLES</th>
<th>STAGE I</th>
<th>STAGE II</th>
<th>STAGE III</th>
</tr>
</thead>
<tbody>
<tr>
<td>MA (Mental Age)</td>
<td>2-7</td>
<td>7-11</td>
<td>11-</td>
</tr>
<tr>
<td>CA (Chronological Age)</td>
<td>3-</td>
<td>5-</td>
<td>9-</td>

<tr>
<td>Performance Grade Level</td>
<td>Pre-School 1</td>
<td>K-6</td>
<td>1-12</td>
</tr>
<tr>
<td>Emotional/Social Development</td>
<td>egocentric</td>
<td>interaction with others</td>
<td>logical and egocentric thought</td>
</tr>
</tbody>
</table>

The four variables included in the Learner Classification System (MA, CA, Performance Grade Level, Emotional/Social Development) were selected on the basis of information about instructional materials that is a) easily accessible and generally available and b) critical to evaluation of auditory learning materials.
DISCUSSION OF LEARNER VARIABLES

Each of the four learner variables can be shown as a developmental process. Children operate at different developmental levels for each of the variables. The organization of these variables into definable stages is based on the finding that a high percentage of children are consistent in their developmental patterns. In other words, when a child operates at Stage I in mental ability, he will also be operating at Stage I for the other variables. Of course there are exceptions to this, but most children are found to be consistent. We are hopeful that these characteristics of learners, as we understand them, will provide a framework for matching a particular material appropriate to a particular child for an enjoyable auditory learning experience.

The following working definitions of learner variables and the stages for each are provided to clarify the interpretation and use of the Learner Classification System.

A. MENTAL AGE

Stage I: Mental Age 2-7 - A child who has a mental age between 2 and 7 has experienced the world through his motor senses. Therefore, his mental ability is directly related to his first-hand experiences. Depending upon the quality and quantity of these experiences, he is ready to move on to symbolic associations with these experiences. This is when he can learn language. This acquisition allows him to internalize action rather than being purely perceptual and motor. Between the mental ages of 2 and 6 the learner is largely egocentric both in language and social behavior. But around the mental age of 6 or 7, the learner begins to accommodate other’s viewpoints and behaves more socially.

While he is acquiring language, the 2 to 7 year old is able to see only parts of an event rather than the entire event. He fixes his attention on only one aspect at a time and because of this he makes judgments based on what he sees. For example, a longer row of marbles looks like more to him even if it is in fact less in number. This type of judging does not allow him to follow reasoning back to a beginning point. These reasoning abilities limit him in learning and therefore define more specifically the type of materials we choose for this learner. In an auditory learning experience, the learner can focus only on one aspect of the auditory message at a time. This has a tendency to limit the learning experience unless repetition of key points is facilitated.

Stage II: Mental Age 7-11 - Between the ages of 7 and 11, the child no longer bases his judgments on perception. He can follow a series of events, sees the changes, and can follow a line of reasoning back to starting point. He is a social being in specific situations
only. His socialization has not yet generalized to society as a whole. The learner is not yet at a point where he can deal with hypotheses or purely verbal problems. He reasons through problems only with the aid of concrete objects and sequenced events. He is able to draw conclusions and solve problems correctly only if they are presented to him materially. Therefore, in choosing materials for this stage two learner, we can look for those materials which require thinking and are accompanied by concrete objects and events. In an auditory learning experience, a learner at this stage can be expected to follow the message if provision is made to facilitate the learner having contact with some more concrete and/or interactive material during the time he is required to listen.

Given cognitive functioning between the mental ages of 7 and 11, we find the vast majority of learners in elementary and special education classrooms fall into this area. This has necessitated a further examination of developmental characteristics which occur during transition periods of Stage II. For the sake of convenience, two sub-stages (IIa and IIb) have been designated. Children who are in the process of developing concrete learning abilities can be considered at the beginning level of the Stage (IIa), those that have developed the abilities and are using them appropriately can be considered at a more advanced level (Stage IIb). It may be important to break down Stage I and Stage III also, but we do not as yet have sufficient information to do so reliably.

Stage III: Mental Ages 11-16 - By the age of 11 the learner can solve problems through logical thought. Problems can be solved from purely verbal or hypothetical situation. He is aware of himself as a part of society, but only in a self-centered way. He bases his judgments on his concept of personal involvement. In choosing materials for this stage three learner, we look for those which present abstract concepts with high interest potential.

The high interest potential cannot be overlooked in the auditory learning experience. It seems as if Stage III learners consistently ask "What's in it for me?" If we understand that this is an appropriate question for this learner, we can better select materials and plan the auditory learning experience. Pre and post testing along with advanced organizers are very appropriate for this level learner. They are quite capable of evaluating the learning experience for themselves.

B. CHRONOLOGICAL AGE

Because we are dealing with in-school populations we have a lower limit of a 3 year old child. This child would fall into Stage I. Stage II has a lower limit of a 5 year old who may have a mental
age of 7. Stage III has a lower limit of a 9 year old who may have a mental age of 11. These lower age limits are provided to allow enough flexibility for all types of learners. We have not yet determined an upper chronological age limit.

C. PERFORMANCE GRADE LEVEL

We believe it will be helpful to know the reading level of the student as it is a descriptor commonly used by commercial producers, teachers, and field-test evaluators to describe a child. Most children can be found to be functioning at a reading level at least one level below their potential reading level. (NOTE: potential reading level is often equated with listening comprehension level)

D. SOCIAL AND EMOTIONAL DEVELOPMENT

In the above descriptions of various mental ages, we briefly discussed the social and emotional state of learners as it related to cognitive development. A Stage I learner is basically egocentric in thought and behavior. A Stage II learner interacts with others and is sociable in specific situations and with specific people. A Stage III learner, though capable of logical thought and aware of his membership in society, tends to base his involvement in experiences on ego-centered judgments. He is self-centered in terms of his reasoning and sees things "his" way.

We believe it is more important to include the social and emotional development of the learner in order to obtain a more complete "picture."
I. TITLE: Beginner's Bird Box

OF

AUDITORY LEARNING MATERIALS
**DESCRIPTION**
The Abacus: Four Sequential Lessons in the Use of the Abacus is designed to help students understand the structure of the number system, to develop skill in mental arithmetic, discipline in concentration and skill and speed in using the abacus as an aid in computing answers to problems. The publisher states that "lessons are self-directing and audio guides the students in the practice of each new concept as it is introduced."

**STUDENT OBJECTIVES**
- to understand the structure of the number system
- to develop skill in mental arithmetic and discipline in concentration
- to develop skill and speed in using the abacus

**PRODUCER**
Acoustifone Corporation
8954 Comanche Ave.
Chatsworth, CA 91311

**DATE**
1969

**CONTENT**
- two audiotape cassettes
- one teacher's guide
- abacus

**COST**
$17.50

**PROCEDURE**
Any number of students are to listen to the audiotape cassettes and respond as they are instructed to. Teacher direction is not necessary. Each lesson is 20 minutes long.

**COMMENTS**
--seems to work best with children who have math aptitude
--child must respond easily to auditory instructions

**EQUIPMENT NEEDED**
A cassette recorder is required.

**FOCUS AREA**
Mathematics

**TITLE**
The Abacus: Four Sequential Lessons in the Use of the Abacus

**RECOMMENDED FOR**
Primary/Elementary CA/MA: 7
DESCRIPTION

Learning Basic Skills Through Music is one unit in the Activity Records series. This material is designed as a supplemental listening activity for preschool children. Such things as "growing up" and the different kinds of clothing boys and girls wear are presented through quality music. Information about daily living skills and communication skills are also presented on this phonograph record.

CONTENT

--one phonograph record

AUTHOR

Hap Palmer

PROCEDURE

The phonograph record may be used as desired by the teacher. Directions for any student actions are included on the phonograph record. It is suggested that the teacher use this material in a small or large group setting, and that he be present during the lesson and after for possible follow-up activities. Each lesson is 3 minutes long.

DESCRIPTION
Learning Basic Skills Through Music: Health and Safety is one unit in the Activity Records series. The phonograph record discusses, as examples, 1) Seat Belts and 2) Take a Bath. The presentation on seat belts tells why seat belts are necessary and how they can help save lives in some incidents. Take a Bath explains the importance of cleanliness and good grooming.

STUDENT OBJECTIVES
--to become aware of the importance of seat belts
--to realize the importance of cleanliness
--objectives differ with song topic

Bowmar Reading Incentive Series contains several individual units (i.e. Horses, Motorcycles, Minibikes and Drag Racing). This series is designed to motivate disinterested readers, improve reading abilities and strengthen listening skills. This material also makes students aware of the subjects which are discussed in the series and therefore, expands their reading in varied media. The script from the audiotapes and photographs from the filmstrips are reproduced in student books.

- to motivate interest in reading
- to improve reading abilities
- to improve listening skills
- to become familiar with horses, motorcycles, minibikes and drag racing

The filmstrips and audiotape cassettes should be presented together and the students may be given the student books during the presentation or following it. Any number of students may attend the presentation. Teacher direction and follow-up activities are suggested. Each lesson is 10 minutes long. The teacher's guide provides complete instructions.

A cassette recorder and filmstrip projector is required.
Career Awareness Series is designed to assist students in becoming aware of the world of work by exploring areas both familiar and unfamiliar to them. During the presentation of this material, the students will become familiar with various occupations, duties and functions. The filmstrips accompanying the phonograph records are actual photos of workers on the job. The areas of employment covered are: school, hospital, airport and construction workers (include: professional, semi-professional and manual work).

**STUDENT OBJECTIVES**

- to become aware of the world of work
- to realize that everyone works and has responsibilities
- to understand that different careers require different knowledge and abilities

DESCRIPTION
Danger is an instructional material used to familiarize students with dangerous situations in the environment and inform them as to how they can avoid danger and thus, physical harm. The flashcards present black and white photos of possible sources of danger. As each card is presented a male voice issues a warning, states what the dangerous object or situation in the picture is, and then tells what child-on must always or never do to avoid it.

STUDENT OBJECTIVES
- To become aware of dangerous situations in our environment
- To learn how to avoid or prevent dangerous situations

Discovering Through Science gives descriptive information about the wheel, sound, weather, machines and insects. It is designed to make students more aware of the scientific principles in everyday life. This material is good for students whose interest in science outweighs their reading abilities.

---

**STUDENT OBJECTIVES**
- to learn scientific facts about the wheel, sound, weather, machines and insects
- to apply scientific principles to everyday life

---

**CONTENT**
- five audiotape cassettes
- one teacher's guide

---

**PROCEDURE**
The audiotape cassettes may be played to any number of students. Teacher direction is not necessary, although follow-up activities are suggested. Each lesson is 12 to 18 minutes long with a total of 5 lessons.

---

**EQUIPMENT NEEDED**
A cassette recorder is required.

Discovering Your Senses presents six individual lessons entitled: 1) Your Eyes Are For Seeing, 2) Your Skin Is For Feeling, 3) Your Ears Are For Hearing, 4) Your Tongue Is For Tasting, 5) Your Nose Is For Smelling, and 6) Your Senses Work Together. The use of these sensory organs are stressed as a means of warning, informing, delighting, and protecting. The filmstrips included with the material show inter-racial, mainly urban, children in a variety of situations.

STUDENT OBJECTIVE
--to become aware of sensory organs and their purposes

CONTENT
--six audiotape cassettes
--filmstrips
--one teacher's guide

PROCEDURE
The students should listen to the audiotape cassettes along with the showing of the filmstrips, although the filmstrips are not essential. Individual, small, or large group settings are all appropriate. Teacher direction is necessary. However, follow-up activities are not required. Each lesson is 9 minutes long with a total of 6 lessons.

EQUIPMENT NEEDED
A cassette recorder and filmstrip projector is required.

Citizenship in the Community is one part of the Early Childhood Enrichment Program developed to make students more aware of the social and personal importance of responsibility.

The audiotape cassette presents 2 situations. Little Charlie Becomes Lost: Charlie becomes lost in a department store. The audiotape cassette dramatizes events and asks students, "What should all children know when they are very young? What should you do if you get lost?" Connie Babysits: Connie has a conflict. Having promised to babysit, she now wants to go to a party. The students are asked to find solutions to the problem posed.

**STUDENT OBJECTIVE** --to learn the social and personal importance of responsibility

**AUTHOR** Margery C. Rutherford

Footnote to Community Helpers:

**Description**

*Grandpa Wiseman Tells* is one series from the *Early Childhood Enrichment Program*. The purpose of this series is to provide students with information about how life has changed since the pioneer time and to realize the importance of community helpers. The material is presented by Grandpa Wiseman addressing his 2 grandchildren and listeners in a narrated story. Everyday life in the past is compared to how it is presently. Grandpa begins to talk about how money, machines, and community helpers make the difference and then goes into more information about community helpers. During the course of the narration, a man's voice comes in to ask thoughtful questions of the listeners.

**Student Objectives**

- To learn how life has changed since pioneer days
- To realize the importance of community helpers

**Content**

- One audiotape cassette

**Procedure**

No specific instructions are necessary for this material and the teacher need not be present during listening time. However, the teacher should direct the discussion following the presentation of the material. Each side of the audiotape cassette is 17 minutes long. The material is broken down into two parts but could be broken down even more. Individual, small group, or large group settings are all appropriate.

**Equipment Needed**

A cassette recorder is required.

TITLE
HEAR-SEE-SAY
Let's Learn to Divide

RECOMMENDED FOR
Intermediate CA/MA: 9-10
Let's Take a Test is one part of the Hear-See-Say program. This material is designed as a practice, review, and drill of arithmetic facts. Students must already know all basic number facts before participating in this drill. The main objective of this material is speed and accuracy. A woman's voice states a number sentence and asks students to say the answer. After a short pause, children's voices on the audiotape cassette give the answer to the problem, then the students listening to the presentation are asked to write the answer. Cumulative processes and mental computations are used.

STUDENT OBJECTIVE
--to review arithmetic skills

CONTENT
--three audiotape cassettes

PROCEDURE
Any number of students may listen to this practice drill. Follow-up activities and teacher direction is not necessary. Each of the 6 lessons is 5 minutes long.

COMMENTS
--audio presentation method: drill
--also available on phonograph records

EQUIPMENT NEEDED
A cassette recorder is required.

DESCRIPTION
How Do You Go To School presents 22 rules for school bus safety. The material promotes an interest in safety, teaches an awareness of safety, courtesy and respect to others, as well as correct reactions in dangerous situations. The material is presented through songs with catchy melodies sung by young voices. Lyrics are included on the filmstrip and in the student booklets along with cute cartoons. The students are encouraged to sing-along.

STUDENT OBJECTIVES
- to learn rules for school bus safety
- to become interested in safety, courtesy, and respect for others
- to become aware of danger

CONTENT
- one phonograph record
- one filmstrip
- student booklets
- one teacher's guide

PROCEDURE
The phonograph record may be used with or without the filmstrip and booklets. The lesson should be teacher directed and may be presented to any number of students. Follow-up activities are suggested. The lesson is 15 minutes long.

EQUIPMENT NEEDED
A phonograph and filmstrip projector is required.

Ideal Structured Reading Cassettes is designed to develop reading abilities in the areas of readiness and word attack skills for students in kindergarten through grade 5. This material is instructional, although it can be used supplementally to enable students to improve their reading abilities.

**Student Objective**

- To develop and improve reading abilities in the areas of consonants, blends, vowels, syllable rules, phonics analysis, spelling, word function, sentence patterns

**Content**

- Eleven sets totaling 92 cassettes (5, 8, 9, or 10 in each)
- Student worksheets

**Procedure**

Audiotape cassettes and worksheets should be used simultaneously. The students respond to the information presented on the tape by using the worksheets. The students check and correct their own responses at each step of the lessons on the tape. Individual, small groups, or large groups are all appropriate. Teacher direction is not necessary, although follow-up activities are suggested. Each lesson is 6 minutes long. There are 2 lessons per tape.

Primary/Intermediate CA/MA: 5
Imperial Primary Reading Program is designed to assist primary level children in developing basic vocabulary and reading skills. Of the 40 lessons included in the pack, the curricular area focuses on such things as categorizing of words and phrases, pre-primer comprehension, initial consonants, and progresses into maps and graph reading.

The audiotape cassettes and student booklets contain information on left to right progression skills, and maps and graph reading. Students are asked to respond to questions on tape in the student booklets. Each lesson gives direct information in a story format. The stories are narrated by a pleasant female voice and a child's voice.

STUDENT OBJECTIVE
- Many presented for each lesson in manual, they run from left to right progression skills to reading maps and graphs

CONTENT
- 40 audiotape cassettes
- 30 student booklets
- Three manuals
- Placement test

PROCEDURE
Material should be used as supplemental lessons. Each audiotape includes instructions for the student to follow. The lessons may be used individually, in small groups, or in large groups. Primary input is the audiotape cassette; visual input is secondary. The time per lesson varies between 11-24 minutes. No follow-up activities are necessary.

EQUIPMENT NEEDED
A cassette recorder is required.

Literature

TITLE
Meet the Authors

RECOMMENDED FOR
Intermediate CA/MA: 8
Meet the Instruments of the Symphony Orchestra and Band introduces children to the sights and sounds of the 4 sections of a symphony orchestra. Side 1 of the phonograph record describes each instrument and plays a familiar melody. The narrators (a man and child) tell some history and give an explanation about each instrument. This commentary is straightforward and informative. Side 2 of the phonograph record again presents the instruments but without a commentary and plays selections from the classics demonstrating range and tone. This material would probably be most useful with children already interested in musical instruments.

STUDENT OBJECTIVES
--to learn the sights and sounds of instruments of a symphony orchestra
--to learn the history of each instrument

CONTENT
--one phonograph record
--two filmstrips
--one teacher's guide

PROCEDURE
Each side of the phonograph record is 30 minutes long and can be arranged in any order, time, or sequence at the teacher's discretion. The 2 filmstrips are to accompany side 1 of the phonograph record. Any number of students may attend the presentation. Teacher direction or follow-up activities are not necessary.

EQUIPMENT NEEDED

RECOMMENDED FOR Primary CA/MA: 5
Scotty and the Musical Kingdom is one in the series Multi-Reinforcement Through Music designed to teach the principles of music while simultaneously reinforcing many other areas of learning such as language arts and perceptual skills. The music principles (melody, treble and bass clefs, rhythm, harmony, etc.) are introduced within the context of an entertaining story line involving a boy named Scotty. The elements of music are animated and symbolized by appealing characters. The principles of music are expanded and reinforced through activities with squeezable toys and other manipulatable components, workbook exercises, and the music itself. Eighty-eight original songs fully orchestrated are presented.

**STUDENT OBJECTIVES**

- to learn the principles of music
- to reinforce language arts and perceptual skills

**CONTENT**

- six audiotape cassettes
- six filmstrips
- squeezable toys and other manipulatable components
- six teacher's guide

**PRODUCER**

Harper and Row Publishers, Inc.  
School Department

**DESCRIPTION**
Stories for Quiet Listening contains a number of pleasant, rather low-keyed original songs with stories. The material creates a relaxed mood while teaching speech discrimination. The concepts of time, value of good listening, and speech sounds s, t, and j are also presented throughout the phonograph record.

**STUDENT OBJECTIVES**
- to learn the value of good listening
- to learn speech sounds s, t, j
- to learn concepts of time (that good things come with time)

- one teacher's guide

**DATE**
1965

**PROCEDURE**
No specific instructions are given with this material. The material may be presented as the teacher wishes. However, teacher direction and follow-up activities are suggested. Each lesson is 4 to 7 1/2 minutes long with a total of 5 lessons.

**EQUIPMENT NEEDED**
A phonograph is required.

**COST**
$5.95

**COMMENTS**
- 3 albums available
- interesting voice
- told and sung by Harold Perry

**FOCUS AREA**
Listening/Auditory perception

**TITLE**
Stories for Quiet Listening

**RECOMMENDED FOR**
Primary CA/NA: 5
The Story of "Growing Up" is an informative presentation about adolescent development and its relation to the reproductive function. It provides clear explanations of male and female reproduction organs, the growth of sexual interest and desires and gives details of mating, pregnancy and birth. This material is primarily for and about female development, but it may also be used with boys.

STUDENT OBJECTIVES
--to learn about adolescent development and reproduction
--to become aware of mating, pregnancy and birth

CONTENT
--one phonograph record
--one teacher's guide

PROCEDURE
The teacher's manual gives special emphasis on planning special, supervised listening situations. The material should be presented to individuals or small groups. Follow-up discussions are advisable. The lesson is 30 minutes long.

EQUIPMENT NEEDED
A phonograph is required.

TITLE
The Story of "Growing Up"

RECOMMENDED FOR
Advanced CA/MA: 11
**DESCRIPTION**

Time Telling Facts and Fun presents information about telling time through a dramatized story of a boy and his interaction with "Mr. Pendulum." The need for time telling, the ways that nature helps us tell time, and a history of time telling are all areas that are covered on this phonograph record. This material also explains the hour, half hour and quarter hour.

**STUDENT OBJECTIVES**

- to realize the need for time telling and the way nature helps us tell time
- to become familiar with the history of time telling
- to become familiar with the hour, half hour, quarter hour
- to realize the need to take care of clocks and learn the parts of a clock

**CONTENT**

- one phonograph record
- one teacher's guide
- one large clock with movable hands on record jacket

**PROCEDURE**

The phonograph record may be played to any number of students. Teacher direction and follow-up activities are suggested. The lessons range from 5 to 8 minutes long with a total of 5 lessons.

**EQUIPMENT NEEDED**

A phonograph is required.

**FOCUS AREA**

Mathematics (telling time)

**TITLE**

Time Telling Facts and Fun

**RECOMMENDED FOR**

Primary CA/MA: 7
DESCRIPTION
Time-Wise Teaching Aids presents instructions on reading hours and minutes, the mechanics of telling time and time oriented stories for students to use as practice drills. Each child is given a clock with movable hands and is expected to do the 8 programmed instructions presented. The minute hand is represented by a female voice and the hour hand is represented by a male voice.

STUDENT OBJECTIVES
--to learn how to read hours and minutes
--to learn the mechanics of telling time

CONTENT
--four audiotape cassettes
--clocks

PROCEDURE
The audiotape cassettes provide instructions for the students to follow. The lessons may be played for any number of students. Teacher direction is necessary during listening time. Each lesson is 10 minutes long.

EQUIPMENT NEEDED
A cassette recorder is required.
