The manual, designed for one-and-one-half-day workshops with 20 to 40 local officials of various agencies from a single jurisdiction (e.g., county) who have responsibility for alcohol-highway safety, is one of five workshop manuals developed to assist State and local agencies involved in programs coping with the drinking-driver problem. Workshop goals include: encouraging communication between local officials, developing cooperative plans, and motivating implementation of these plans. Activities include: discussion of nature and scope of the problem, homogeneous small group plan-of-action discussions, rehabilitation agencies panel discussion, alcohol awareness seminar involving breath analysis, and heterogeneous small group plan-of-action discussions. The manual is organized into three major parts: (1) the introduction, with problem overview, manual synopsis, and workshop staffing suggestions; (2) the governor's representative and chairman workshop materials; and (3) appendixes including preworkshop instructions, group moderator workshop materials, and miscellaneous materials (these include information on audiovisual equipment, instructions, evaluation forms, and followup materials). The manual is designed to be completely self-executing and includes sample letters, fully executed speeches, discussion guidelines, evaluation instruments, and participant selection criteria. (MW)
ALCOHOL HIGHWAY–TRAFFIC SAFETY WORKSHOP

FOR

LOCAL OFFICIALS

Prepared for:

The U.S. Department of Transportation
National Highway Traffic Safety Administration
Washington, D.C. 20590

ACKNOWLEDGEMENTS

Several Governors' Highway Safety Representatives were very helpful in the preparation of these manuals. Thanks to those who served on the review committee, and who were an invaluable aid:

John Borda, Nevada
Carlton Fischer, Georgia
Brooks Griffith, Arkansas
Richard Turk, Maryland

Each Manual was pilot tested and we thank also the Governors' Representatives of the states in which these workshops were held. These include Mssrs. Borda, Fischer, and Griffith, and:

John Hanna, Virginia.

INTRODUCTION

THE DRINKING-DRIVER PHENOMENON

Although drinking-drivers have operated motor vehicles since the invention of the automobile, only recently has sustained attention been focused on the highway carnage caused by impaired and drunk drivers. We have reached the point where drinking-drivers and pedestrians are involved in more than 28,000 traffic fatalities each year, or over 70 deaths every day. An estimated 800,000 accidents a year are caused by drivers who were impaired or drunk while driving.

Research* has indicated that alcohol consumption by drivers and pedestrians is responsible for more deaths and accidents on the highway than any other single factor. Specifically, drinking-drivers and pedestrians contribute directly to approximately half of all traffic deaths. Most of these deaths, however, are not the result of actions by what is commonly known as the "social drinker." These deaths are largely the result of actions of the driver who drinks to great excess, the so-called "problem drinker." Alcoholics and other problem drinkers, who constitute less than 10% of all licensed drivers in the United States, account for a very large part of the overall problem. It appears, in fact, that two-thirds of those drinking-drivers who are involved in fatal accidents are problem drinkers.

Problem drinker-drivers are those who have had more than one arrest for offenses involving alcohol (including non-highway arrests), who are known to the various health and social agencies in their communities, and who often have a history of troubled relationships with their employers, their families, and their banks or creditors.

Most research indicates that at least 7% of the total population of over 100 million drivers are problem drinkers. This means that there are more than seven million drivers on the highways today who are the primary hazard in terms of alcohol-related crashes; that is, one driver out of every fifteen. Clearly, this is a crisis demanding a prompt and effective remedy.

*Most studies referred to in this Manual are summarized in the Department of Transportation 1968 Alcohol and Highway Safety Report to Congress.
INTRODUCTION

THE NATIONAL EFFORT TO COPE WITH THE PROBLEM

The Department of Transportation (DOT) has mounted a national three-part effort in highway traffic safety:

1. the development and use of passive restraint systems;

2. the design and implementation of more stringent requirements in vehicular safety; and

3. the initiation of a comprehensive alcohol countermeasures program involving prosecutors and law enforcement, legislative, judicial, driver licensing and rehabilitation-treatment agencies.

The third approach is specifically aimed at alcohol-highway traffic safety. The thrust of this latter approach is to assist the states in planning, developing, and implementing systematic state-wide approaches and programs of their own to cope with the problem. This Manual is part of this effort to help assist local officials who are responsible for dealing with the problem drinker-driver.
This Manual is one of a series of five manuals designed to assist state officials to conduct workshops in which representatives of state and local government and members of law enforcement, judicial and rehabilitation and treatment agencies develop programs for coping with the drinking-driver problem. This manual has been designed for one-and-a-half day workshops for local officials who are involved with alcohol-traffic safety problems. The other four manuals have been designed for one- to two-day workshops for law enforcement professionals, state officials, judges, and treatment and rehabilitation professionals who have responsibility for alcohol-highway traffic safety.

The five workshops are designed to accomplish two purposes: first, to focus on the necessity for cooperation and coordination among agencies and individuals in coping with the problem, and second, to focus on the need for each agency and individual to see himself as part of a system or a team, in which all functions should be coordinated if maximum impact on the problem is to be achieved. To avoid overlap or conflict of interest among the various agencies and groups involved, each workshop has also been designed to stress the importance of each individual agency's contributions to the overall effort.
OBJECTIVES OF THE LOCAL OFFICIALS WORKSHOP

This manual has been designed for the conduct of one-and-one-half day workshops with 20 to 40 local officials of various agencies from a single jurisdiction (e.g., county) who have responsibility for alcohol-highway traffic safety. If the drinking-driver is to be stopped, it must be done in his own community through the concerted efforts of local officials. In order to be effective, these officials must work together in a coordinated fashion. There must be increased communication among these local agencies and a willingness to apply new techniques.

The overall goals of the workshop are therefore to encourage local officials to communicate openly with each other, to develop and detail cooperative plans for coping with the drinking-driver problem, and to implement these plans. Although maximum impact on the drinking-driver problem can be achieved only if all elements of the system plan cooperative actions that reinforce each others' activities and avoid duplication of effort, inconsistent efforts, and contradictory efforts, the workshop stresses that participants can also take independent actions to help solve the problem. The specific workshop objectives are:

1. to increase participants' awareness of the nature and extent of the drinking-driver problem, and therefore, of the need for improvement and expanded efforts in the alcohol-traffic safety system;

2. to increase participants' awareness of the existence, resources, responsibilities, problems, and interrelationships of the other parts of the system, and of current national, state, and local efforts to improve cooperation;

3. to increase participants' awareness of their role in the system, and of how they can facilitate coordination;

4. to increase participants' ability to analyze their role with respect to acting, where necessary, independently of other agencies;

5. to motivate them to take an active role in educating the public and other actors;

6. to encourage participants to realize that both coordinated and independent actions can impact the problem; and

7. to motivate them to act on this awareness.
This increase in participants' awareness of these aspects of their role in the alcohol-highway traffic safety system cannot be accomplished by mere lecture. Most of the workshop exercises are, therefore, based on an exchange of ideas among the participants. There are several reasons for using this approach:

1. many participants have significant expertise on the subject;
2. they are more aware of unique local conditions than are those conducting the workshop;
3. the primary objective of the workshop is to promote action and cooperation, and this requires opening lines of communication;
4. professionals may resist being provided with lecture material that they could more easily read on their own;
5. the ideas aired at the workshops may be better than those of the workshop designers.

Those conducting the workshop, therefore, should make clear to participants that they are not being told what to do but are being encouraged to exchange their ideas and develop their own plans for dealing with the drinker-driver.
INTRODUCTION

ORGANIZATION OF THE MANUAL

The Manual is organized into three major parts:

I. INTRODUCTION

II. GOVERNOR'S REPRESENTATIVE AND CHAIRMAN WORKSHOP MATERIALS

III. APPENDICES

The INTRODUCTION contains an overview of the nature of the drinking-driver problem, a synopsis of the entire manual, and the suggested method for staffing the workshop.

The GOVERNOR'S REPRESENTATIVE AND CHAIRMAN WORKSHOP MATERIALS section provides all the materials (except for audiovisual materials and multiple copies of forms) that the Governor's Representative and his Chairman will need to use during the workshop. As the workshop progresses from the opening speeches, they need only to turn from page to page in this section to learn what they need to do or say next.

The APPENDICES section consists of three major sub-sections:

A. The Governor's Representative Pre-Workshop Instructions,

B. The Group Moderator Workshop Materials, and

C. Miscellaneous Appendices.

A. The Governor's Representative Pre-Workshop Instructions Appendix provides detailed instructions for preparing for and administering the workshop. It is critical that this section be read carefully in order to ensure that all workshop preparations are carried out efficiently and on time. The Appendix ends with a check list of tasks the Governor's Representative will need to complete prior to the workshop.

Insofar as possible, this Manual has been made completely self-executing. Whenever possible, all work involved in preparation for and in conducting the workshop has been provided in the Manual. For example, sample letters of invitation have been written in advance, speeches have been fully executed, evaluation instruments have been devised, and selection criteria for participant identification have been drawn up.
B. The Group Moderator Workshop Materials Appendix provides all the instructions that the Group Moderators who direct small group activities will need to read before the workshop and all the materials they will need to use during the workshop. It should be noted that much of their material duplicates materials previously found in the Governor's Representative and Chairman Workshop Materials section. However, this separate Appendix comprising all Group Moderator materials has been included so that the Governor's Representative will have a pre-collated section that can be duplicated as is and given to each Group Moderator. As a result of this and other section duplications, the Manual is somewhat bulky, but it was felt that size should be sacrificed for maximum self-executability and ease of implementation.

C. The Miscellaneous Appendices section provides information on audiovisual equipment, on the participants' handout folder of take-home information, and on follow-up evaluation methods for determining the success of the workshop.
INTRODUCTION

STAFFING

In addition to the Governor's Representative and his staff, six other individuals will be needed to assist in directing the workshop: a Chairman and five Group Moderators.

The Chairman should be a person highly regarded by the participants and therefore it is recommended that he be a respected local official. His role and functions have been fully detailed in the first Appendix (Governor's Representative Pre-Workshop Instructions). His speeches and instructions are contained in section II, Governor's Representative and Chairman Workshop Materials. The Governor's Representative will want to give his Chairman a complete copy of this section even though several of the activities may be directed by the Governor's Representative himself. The Chairman should be given a copy of this entire section so that:

- he can gain a comprehensive overview and understanding of the entire workshop—its objectives and activities—before it begins,
- he can be familiar at all times with what is taking place and is supposed to be taking place during the workshop, and
- he can, if necessary, take over the direction of an activity or a small group discussion should the Governor's Representative or a small Group Moderator suddenly become unavailable.

The Chairman will have to spend time preparing for the workshop and will lead several of the activities.

The five Group Moderators are volunteers from among the participants. They will have to read some introductory materials prior to the workshop in order to direct the small group activities. These five moderators and two alternate Group Moderators should be selected prior to the workshop (alternates in case one or two appointed Group Moderators fail to show up). The role and functions of the Group Moderators have been detailed in the first Appendix, The Governor's Representative Pre-Workshop Instructions. Instructions explaining their tasks during the workshop may be found in the second Appendix, Group Moderator Workshop Materials.

The organizer may choose to enlist both administrative and technical support in preparing for and/or running the workshop. Such additional assistance would undoubtedly improve the caliber of the workshop. However, the Manual has been designed to be implemented by the organizer, the Chairman and the Group Moderators alone, and pilot testing has indicated that, used in this manner, the resulting workshop can provide a meaningful and exciting learning experience for all participants.
As you will see, the workshop is a dynamic experience. It has a rhythm and definite pattern of growth, and its desired effects on participants depend on maintaining this structure. Note the fact that the types of activities are varied, with as few straight lectures as possible and with as much variety from one activity to the next as possible.

This manual was designed to serve as a resource. If you wish, all the instructions can be followed to the letter, and the resulting workshop will be successful. However, you are invited to add to it and to modify it as you see fit. However, if you choose to make changes, you should keep in mind the purpose and flow of the original design so that each of its components that you do use will mesh well with your additions.

Registration is between 9:00 and 9:30 a.m. If possible, two assistants should supervise the Registration Desk where participants fill in the initial evaluation form and pick up their packets of information.

INTRODUCTIONS BY THE GOVERNOR’S REPRESENTATIVE AND CHAIRMAN

This section describes the purpose of the workshop, introduces the principal actors and the team approach to solving the alcohol-traffic safety problem, presents a summary of events, and provides instructions for the first exercise.

ACTIVITY #1: INTRODUCTORY EXERCISE

The participants work in small groups. Collectively, they work on providing answers to a series of multiple-choice and true-false questions on the nature and scope of the problem and various countermeasures. The Governor's Representative emphasizes that, despite the form it takes, this exercise is not a quiz. In addition, each group does not submit its responses; instead, each participant records his group's answers, along with any individual comments or disagreements that he wishes to note.

In order to maintain interest, the exercise is brief. Any questions left unanswered by the group remain unanswered until the end of Activity #2. The Governor's Representative develops a few questions dealing with his specific state, including accident rates, enforcement statistics, and countermeasure programs. At the end of the exercise, the Governor's Representative asks the participants to be patient; many of their questions will be answered during the following activities.
INTRODUCTION

COFFEE BREAK

Because participants are not given the correct answers to the Inventory, they may be interested in comparing their responses. A coffee break at this time gives them the opportunity to do this.

ACTIVITY #2: NATURE AND SCOPE OF THE PROBLEM

This exercise provides the factual basis for the rest of the workshop. It consists of a slide-talk followed by a film. The talk covers the most important points concerning the magnitude and nature of the drinking-driver problem. The film dramatically provides additional details about the effects of alcohol on driving.

It is especially important that this exercise follow and not precede the Information Inventory. The Information Inventory exercise should demonstrate to participants that there are relevant facts about the drinker-driver that they do not know. Without this clear indication of their lack of knowledge some participants may feel offended by the elementary nature of the points covered in Activity #2.

After the film in Activity #2, answer sheets for the Information Inventory are handed out. This is followed by a discussion period, during which the Governor's Representative, the Chairman, and anyone else who has something to contribute, explain any of the issues that participants have questions about. The Governor's Representative is provided with a discussion guide that contains answers to the Information Inventory questions. He must provide answers to questions about his particular state. Participants emerge from this session with an understanding of the nature and the scope of the problem on the national and state levels.

ACTIVITY #3: HOMOGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

This activity has several parts, all dealing with the interrelationships among the various actors in the alcohol-traffic safety countermeasure system. In small groups participants discuss the nature of the system, its interrelationships, the deficiencies in the present system, the constraints operating upon individual actors, and recommendations for solutions to these problems.
INTRODUCTION

ACTIVITY #4: CURRENT APPROACHES

This is a presentation of the approaches currently being used to deal with the drinking-driver problem.

ACTIVITY #5: REHABILITATION AGENCIES PANEL DISCUSSION

Participants view a thirty-minute film depicting the processing of a DWI case from arrest through trial. They then break into small groups to discuss which treatment modality they would choose for the defendant. After this, the rehabilitation and treatment agency participants form a panel which responds to the measures advocated by the small groups; suggests its own rehabilitation measures; gives a brief presentation about the availability of treatment and rehabilitation services in the local community; and responds to questions about these facilities and about rehabilitation and treatment in general.

ALCOHOL AWARENESS SEMINAR

The seminar takes the form of a cocktail party, with a few major variations. Two breath-analysis machines, along with trained operators, are provided. Periodically, participants have their BAC measured. The results are recorded on a tag which they wear so that the effects of various BAC levels on different people can be observed. One participant can be asked to become especially intoxicated, to either the .10 or .15 level, so that extreme intoxication can be observed.

If possible, one or two driving simulators are provided so that the effects of alcohol on driving can be simulated by the participants.

ACTIVITY #6: DISCUSSION OF BAC LEVELS

This is the first activity of the second day. It consists of a discussion of behavior and perceptions at various BAC levels, with particular attention directed to the impairment of driving ability.
ACTIVITY #7: HETEROGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

Small groups are organized heterogeneously by occupation. Using the Check Lists developed in Activity #3, the groups discuss and record the actions each type of official or agency can be expected to take to help solve the alcohol-traffic safety problem through a cooperative effort of all parties involved in the system.

WRAP-UP

A brief summary of the findings of the workshop is now presented with emphasis on the need for cooperative action among agencies. The speech also points out the usefulness of individual agency actions. The resources of the Governor's Representative's office and the National Highway Traffic Safety Administration are explained. Participants are thanked and asked to fill out a brief post-workshop evaluation form.
PREFACE

Each element of the workshop is preceded by a brief capsule description. Following each capsule description are all the actual materials the Governor's Representative and the Chairman will need for that activity — speeches, instructions, and forms (except for multiple copies of forms and audiovisual materials). The speeches and instructions for the Group Moderators are also included so that the Governor's Representative and the Chairman can always be aware of exactly what should be taking place during the workshop even when they are not the persons responsible for directing a particular activity.

REGISTRATION

9:00 - 9:30: REGISTRATION

CAPSULE DESCRIPTION

Registration takes place between 9:00 a.m. and 9:30 a.m. If possible, two assistants should supervise the Registration Desk. Participants fill in and immediately return the initial evaluation form. Participants also pick up their packets of information at this time.
LOCAL OFFICIALS ALCOHOL-TRAFFIC SAFETY PRE-WORKSHOP EVALUATION FORM

Purpose of this form: This form is designed to assist those of us who are conducting this workshop to determine how useful it is for you and to help us to improve the workshop for future use. Therefore, we are asking you to fill out this form before the workshop and will ask you to fill out a similar form at its end.

Instructions: There are no right or wrong answers in this evaluation. Please do not put your name on the form. Try to answer all the questions but leave blank any questions you feel you cannot answer. Thank you.

Questionnaire:

1. Do you feel that the problem of alcohol-related traffic accidents is a serious one?
   ___ not very serious
   ___ serious
   ___ very serious

2. Do you feel that a concerted effort in this country could help solve this problem?
   ___ not much help at all
   ___ help some
   ___ help a lot

3. Do you feel that the problem is worthy of a major effort to find a solution?
   ___ definitely not
   ___ probably not
   ___ probably
   ___ definitely

4. If you answered Question #3 as "probably" or "definitely," whom would you involve in this effort? (check any or all)
   ___ police
   ___ prosecutors
   ___ judges
   ___ alcoholism treatment and rehabilitation professionals
   ___ local government officials
   ___ state legislators
   ___ department of motor vehicles officials
   ___ the general public
   ___ others (specify) __________________________
5. Do you feel that your agency alone (without additional resources) could make any significant contribution to the solution of the problem?
   ____yes
   ____no

6. Do you feel that what your agency could accomplish with their present resources would be worth the necessary redistribution of effort?
   ____yes
   ____no

7. Do you feel that it would be worth the redirected effort for your agency to try to influence other actors (those you checked in Question #4) to work together on this problem?
   ____yes
   ____no

8. Do you feel that any direct action on your part as an individual could help to solve the problem?
   ____yes
   ____no

9. If yes, do you feel that helping to solve the problem would be worth the redirection of your personal efforts?
   ____yes
   ____no

10. Do you feel it would be worth your effort to try to influence either your agency or the general public to increase their efforts to solve this problem?
    ____yes
    ____no
Instructions for compiling the packet of information for participants is explained in Appendix C2, pages III-87 - 89.
9:30 - 10:00: INTRODUCTIONS

CAPSULE DESCRIPTION

The Governor's Representative opens the workshop promptly at 9:30 a.m. with an introductory speech. He then introduces the Chairman who in turn makes an introductory speech that explains the team approach to dealing with the drinker-driver. Both speeches should end before 10:00 a.m.
I want to welcome you to the Local Officials Alcohol-Traffic Safety Workshop. My name is [insert name] and I am the Governor's Highway Safety Representative.

This workshop is one in a series on the alcohol-traffic safety problem. Other workshops (insert "have and" if appropriate) will be held for judges, for alcoholism rehabilitation and treatment professionals, for law enforcement officers and for state officials with responsibility for coping with the driver who drinks excessively.

Similar workshops have been and will be held in other states as part of a national, state, and local effort to do something about the intolerable number of people injured and killed on our highways every day due to the abuse of alcohol by automobile drivers. Local officials clearly have an important role in coping with this problem. However, they alone cannot be expected to solve it, and that is why we are conducting workshops for every significant group that has a part to play in reducing the number of alcohol-related traffic accidents.

Before I turn over the formal opening of this conference to the Chairman, I want to say a few brief words about our plans for these two days. You have been invited to attend this workshop to learn more about the nature and the magnitude of the drinking-driving problem; to become familiar with some of the more effective methods being used to cope with this problem in [insert name of state] and in other states across the nation; and to share
with each other your own thoughts about how to cope with the driver whose driving ability has been impaired by alcohol abuse. We hope you will be able to at least outline some actions you can take cooperatively after you leave the workshop that will help reduce the number of alcohol-related crashes on our highways.

Present today are representatives from many local agencies and government groups. Some of you may share similar opinions and thoughts about the problem, and some of you may differ.

You should understand, however, that we are not here to teach you but rather to enable you to share and elaborate with each other ideas about dealing with the drinker-driver. Some of the parts of this workshop will involve our providing you with information; this information is intended to establish a common base of knowledge so that you can work well together. But we cannot pretend that either we, or the "experts" can provide you with a solution to the drinking-driver problem. The solution must come from you and from others with responsibility in alcohol-highway traffic safety who deal with the problem first-hand.

I now want to introduce the Chairman. He is a man with whose work most of you are familiar. (Governor's Representative inserts several sentences here about the Chairman's qualifications and background.)
Mr. __________________ (Governor's Representative inserts name of Chairman.)
Thank you, _______ (insert name of Governor's Representative). (Ladies and) Gentlemen. Let me join with ____________ (insert name of Governor's Representative) in welcoming you to what I know will be two days of informative and productive work. I want to stress right from the beginning that we will be working — working in the sense that we will be very busy and active; we will be tackling and trying to come up with some solutions to very tough problems, and we will accomplish things that will be of practical use to us in our official capacities.

As you know, we will be dealing with a problem of massive importance to the safety of our communities, state, and country — the problem of the drunk or impaired driver.

Several agencies in our state share responsibility for coping with this problem. Among you are representatives of most of these groups. The courts, including judges, prosecutors, and probation officers, play a central role. Treatment and rehabilitation agencies are vitally important to rehabilitate problem drinker-drivers. The Department (substitute "Registry" if appropriate) of Motor Vehicles also plays an important part. So does the legislature by virtue of the laws it passes or fails to pass, and through the funds it makes or fails to make available for coping with the drinking-driver problem. The responsibility of the police lies in the manner in which they enforce the laws. Finally, public information and education programs are essential to inform the public about the extent and dangers of driving while impaired.
In short, you as local officials and representatives have a responsibility to cope with the drinking-driver phenomenon. However, we do not expect you alone to shoulder the entire burden for solving the drinking-driver problem. As __________ (insert name of Governor's Representative) has already indicated, this conference is only one of many that (insert "have been and" if appropriate) will be held involving court personnel, law enforcement officials, alcoholism treatment and rehabilitation professionals and other state and local officials. In this way, we plan to involve all the groups at every administrative level who are in a position to make a significant impact on the drinking-driver problem. So what may seem to you as an isolated effort here today is in fact part of a state-wide, interdisciplinary effort. Our objective is to have all of these groups -- yours and the others -- moving in complementary ways to solve the problem. You are not being singled out in this effort as the only group responsible for helping to solve the problem; rather, you are being singled out as constituting one of the many key groups who share the responsibility.

What we ultimately are seeking to achieve is the smooth functioning of all these key groups so that they work together cooperatively in a team approach to solving the drinking-driver problem. What are these other groups and what is a team approach to solving problems? Let us take a few minutes to answer these two questions.

Six key groups share responsibility for coping with the drinker-driver: law enforcement agencies, the judiciary, licensing agencies like the Department of Motor Vehicles, treatment and rehabilitation agencies, public information education agencies, and the state legislature.
Clearly, all these agencies or functions must work together smoothly and in unison if they are to be effective. This is the essence of a team approach to solving a problem: getting all the agencies and functions with responsibilities for coping with the drinker-driver to coordinate their efforts and cooperate on a systematic basis, step by step, so that duplication of effort, inconsistency of effort, and contradictory effort do not occur.

Perhaps the best analogy to a team approach to solving problems is a football game. The objective for the offensive team is obvious: to score as many touchdowns as possible. Accomplishing this objective requires the smooth coordination of efforts among several key persons and types of persons, each of whom has a different task to perform, each of whom must be aware of what each other is going to be doing, and each of whom must be successful at what he is doing if a touchdown is to be scored. As a crude example, the blockers must, on a running play, know which way to block the opposing players; the pass receivers must act as successful decoys to clear out the field; the quarterback must call the signals, successfully decoy the opposition, and hand off to the running back; and the running back must hustle through the opening created by the blocking and then follow his other blockers. All these functions -- decoying, blocking, and running -- must be performed in a coordinated, effective fashion if a touchdown is to be scored. Similarly, each of the six functions with responsibility for solving the alcohol-traffic safety problem must coordinate their efforts if the drinker-driver is to be kept off the road.
Realizing that there are many other organizations and agencies that have a responsibility for alcohol-traffic safety, such as Governors and their staffs, let us briefly run through the list of these six agencies or functions and note what their responsibilities are and, in particular, observe how their responsibilities are related to each other and must therefore be coordinated to be effective. Open your folder and take out the article entitled "Section IV: System Deficiencies and Recommended Corrective Countermeasures."

Turn to the fifth page of this article where you will find a chart illustrating the system functions needed for handling drinker-drivers. This chart illustrates the role all six of the functions play and how their roles are related to each other. (See following page for a copy of this chart.) We start first with the drinker-driver and the law enforcement function. (The speaker now briefly points out how each of the tasks are related by following the flow of actions illustrated in the chart. He should point out that two functions, legislative regulations and public information education, do not show up in any single box in the chart because they are involved with every step in the process of handling drinker-drivers. Consequently they are indicated in brackets on the left- and right-hand margins of the page. The chart is geared toward revealing the deficiencies in the system but can be used very effectively for simply illustrating the interrelationships between the various elements of the system.)

This slide, (Flash Slide #1) which duplicates the chart in your handout materials, is a graphic representation of the alcohol-traffic safety
INTRODUCTORY SPEECHES

SYSTEM FUNCTIONS FOR HANDLING DRINKING DRIVERS

A. Drinking Drivers
   - Not Impaired
   - Impaired

B. Undetected
   - Detected (Crash Investigation)
   - Detected (On View)

C. No BAC Test
   - No Arrest
   - No BAC Test (Refused) Arrest DWI
   - No BAC Test Arrest Lesser Charge
   - BAC Test Below Limit No Arrest
   - BAC Test Below Limit Arrest Lesser Charge
   - BAC Test Above Limit No Arrest
   - BAC Test Above Limit Arrest Lesser Charge
   - BAC Test Above Limit Arrest DWI

D. Prosecuted
   - Lessor Offense
   - Dui Offense

E. Not Guilty
   - Guilty Plea
   - Guilty

F. No Pre Sentence Investigation
   - Pre Sentence Investigation

G. Detection
   - Alcoholism Clinic
   - Alcohol Safety Schools
   - Fine and/or Jail
   - Therapeutic Sanctions
   - Punitive Sanctions

H. Other
   - Accidents
   - Spot Checks

DEFICIENCIES IN ENFORCEMENT OF DRINKING DRIVING LAWS

A. Lack of Knowledge regarding Drinking and Driving
B. Inadequate Detection of Drinking Drivers
C. Insufficient Chemical Testing
D. Failure to Prosecute DWI Drivers
E. Failure to Convict DWI Drivers
F. Insufficient Penalties for DWI
G. Inadequate Treatment for Problem Drinkers
H. Lax Enforcement of Driving Suspensions

11-15
system in operation. With few exceptions, everything that can happen in an individual's interaction with the various agencies that deal with the drinker-driver is represented here by a line running through a series of one or more boxes. A drinker-driver can be thought to start at the top of the chart and go through a series of processes represented by boxes. The use of lines to represent this series of paths enables us to indicate only potential combinations, so that a person who has not been apprehended cannot be prosecuted, a person who is sentenced must first have been convicted, etc. For instance, a person who is arrested, given a BAC, convicted, and entered into an alcoholism clinic would follow this path. (Show path with pointer.)

Drinker-Driver

Impaired

Detected (say, or-view)

BAC test above limit - Arrest DWI

Guilty Plea

Guilty

Pre-Sentence Investigation

Therapeutic Sanctions

Alcoholism Clinic
Are there any questions about the way the chart works? (If there are, repeat using another example.)

Now, let's examine what the chart says. We will omit some of the less common paths; these can be examined later, if you wish. The processes on the chart are categorized into five stages. (slide #2) First the offender must be detected, then charged, then he is arraigned and prosecuted. Next the case is adjudicated, then sanctions are imposed for the purpose of rehabilitation and recidivism prevention. The bands along the side refer to means by which one can effect changes in each of the stages.

Let us examine each of those levels briefly:

Detection: (slide #3) The drinker-driver may be either impaired or not impaired. In either case he may be detected; if he is not impaired, detection will probably occur through some other action on-view. If the driver is detected, he is stopped and probably asked to take a BAC test. He has the choice of refusing.

Charging: (slide #4) The driver can be released, he can be charged with a lesser charge, or he can be charged with DWI. All of these options are open whether he took a BAC test or not. The automatic suspension of license following refusal is noted below, under adjudication.

Arraignment and Prosecution: (slide #5) If charged with either DWI or a lesser charge, he can plead either guilty or not guilty.
Adjudication: He can be found guilty or not guilty of either the DWI charge or the lesser charge. If he is found guilty of DWI, there is a license action; there may also be a pre-sentence investigation. (slide 91)

Rehabilitation and Recidivism Prevention: (slide 97) On the left are the license actions. License action and other sanctions can be applied simultaneously. Following license action there must be some mechanism for enforcement which requires detection, either through spot checks, other arrests, or accidents. The system often includes both therapeutic and punitive sanctions, which also can be applied simultaneously.

So we see that this chart is a useful way of thinking about the complex process which people arrested for DWI pass through. It also illustrates graphically how all the involved agencies must coordinate their efforts in a systems approach to solving the drinking-driver problem.

However, even though many of your efforts depend on cooperation and coordination with the legislature, police, courts, rehabilitation and treatment agencies, DMV, and public information and education agencies, there are many positive actions you can take independently to help solve the problem. Some of you are already engaged in such activities. We expect you to share with each other information about what seems to work best for you, as __________ (insert name of Governor's Representative) has already mentioned. We will also have some suggestions for you on what you can do independently of what other groups may or may not do.
So there are two ways you should look at what you can do about the problem: You should view your efforts as part of a larger coordinated effort that is being mounted by all involved groups; and you should view them in terms of what you can do independently of these other groups.

If this is how we hope you will look at your role in helping cope with the drinking-driver phenomenon, how will this conference help you cope? It will help you in at least two ways:

One, it will provide you with the latest information about the nature of the alcohol-traffic safety problem — how severe the problem is and how alcohol abuse can affect driver and pedestrian safety.

Two, the workshop will help you cope with the drinking-driver problem by clarifying the actions you can take in cooperation with each other to help solve it. We hope to achieve this clarification by encouraging you to share with each other the actions you have already found to be effective and by presenting some of the various interagency procedures around the country that seem to be effective in reducing the number of alcohol-related traffic accidents.

Through these two methods — your sharing information with each other and our providing you with other ideas — we hope you will leave at the end of the conference with some new and specifically coordinated plans of action to put into practice. For it is clear that while we alone cannot solve the dilemma of the problem drinker-driver, if we don’t play our crucial part, the problem will never be solved.
Before we turn to our first activity, let me give you a quick rundown on such vital matters as location of coffee, water fountains, restrooms, lunch, and other logistical problems. With the exception of lunch, feel free to take advantage of these facilities as often as you like.

(The Governor's Representative, when he knows what facilities will be available, fills in this section indicating the availability of these items and their locations.)

And now I'll turn the meeting back to _____________(insert name of Governor's Representative), and he will introduce the first activity.
The workshop divides into small groups led by the Group Moderators. Using an Information Inventory Form, the members of each small group jointly answer as many questions as possible during the time allotted. Each person notes on his question sheet his group's responses, as well as any personal comments. None of the answer sheets is handed in, but for the sake of coordination the Group Moderators take written or mental notes of their groups' responses.
GENERAL INSTRUCTIONS FOR GOVERNOR'S REPRESENTATIVE AND GROUP MODERATORS

This exercise involves answering questions on an information survey. Each group jointly answers as many questions as it can in the time allotted. The Group Moderators note their group's answers and facilitate discussion concerning them. They keep the group moving from question to question and prevent spending too much time on any one question. They point out that the answers will not be collected and therefore it is not important to make sure they are all absolutely correct. It is advisable for participants to record their group's answers on their question sheets along with any disagreements or comments they may have. These will be helpful during the discussion period later. Following the next activity, which will provide answers to many of the questions in the Information Inventory, each participant will be provided with an answer sheet and an opportunity to discuss further any of the questions.

This activity serves two purposes. It involves participants in group work. To facilitate this, the Group Moderators should have each member of their group introduce each other briefly at the beginning of the activity. The activity also demonstrates the extent to which participants have (or lack) an understanding of the scope and nature of the problem. The form of the exercise is that of a quiz. However, the Governor's Representative should attempt to remove any feelings of quiz-like pressure.

The Governor's Representative can improve this exercise by adding to it questions about the drinking-driver situation in his state. A form on which to summarize these data is provided in Activity #2.
ACTIVITY #1

SAMPLE INTRODUCTORY SPEECH BY GOVERNOR'S REPRESENTATIVE

For our first exercise, I will ask you to divide into small groups. Your name tags indicate which small group you belong in. (Indicate where each group meets.) Each of you will be given a list of multiple-choice and true-false questions. This is not a quiz. Rather, it is designed to determine what you think the facts are about drinking and driving and to allow you to see what kinds of questions merit further investigation. Together, each group is to come up with as many answers as it can in 20 minutes. You will record your answers on answer sheets. These sheets will not be collected but will serve as the basis for later discussion. While you may know the answers to many of the questions, you may have to make educated guesses about some.

After completing the exercise we will have a coffee break and then a presentation that will answer many of the questions raised by the exercise. After that, we will distribute answer sheets which will provide the basis for an open discussion. Therefore, each of you will probably want to note on your question sheet your group’s responses and any additional comments you would like to make.
ACTIVITY #1

LIST OF QUESTIONS FOR ACTIVITY #1: INFORMATION INVENTORY

1) What is the Blood Alcohol Concentration (BAC) level presumptive of legal intoxication in this state?
   a) .05%
   b) .08%
   c) .10%
   d) .15%
   e) .20%

2) Approximately how many drinks (one-ounce shot of 86 proof whiskey, twelve-ounce can of beer, or four-ounce glass of wine) would a 175-pound man have to consume to reach this BAC? Assume that he drinks them within an hour’s time and that he has not eaten for at least three hours.
   a) three
   b) six
   c) nine

3) Which of the methods listed below effectively sober up a person so that he will be able to drive safely? (circle one or more)
   a) black coffee
   b) waiting as long as is necessary
   c) cold shower (or a dip in a swimming pool, lake, etc)
   d) hot shower, steam bath, sauna
   e) a shock (like an auto accident, or near miss)
   f) exercise
   g) fresh air
   h) none of the above

4) True or false: One or two drinks of alcohol sharpen your driving skills.
5) When a 175-pound man has had nine standard drinks on an empty stomach two hours before driving, what do you think his chances are of being involved in an accident?
   a) 2 times greater than when he is sober
   b) 5 times greater than when he is sober
   c) 25 times greater than when he is sober

6) In most states, what proportion of the drivers arrested for driving while intoxicated do you think have had a previous arrest for DWI?
   a) 1 in 2
   b) 1 in 10
   c) 1 in 25

7) In most states, what percentage of the drivers arrested for DWI do you think are already known to community service agencies for having other alcohol problems?
   a) 10%
   b) 50%
   c) 80%

8) Approximately how many people were killed last year in traffic accidents in this country?
   a) 5,000
   b) 25,000
   c) 50,000
   d) 100,000

9) Approximately what percentage of these deaths involved drinker-drivers or drinking pedestrians?
   a) 25%
   b) 50%
   c) 75%
ACTIVITY #1

10) What percentage of those accidents in which blameless drivers were killed were caused by drinking drivers?
   a) 15%
   b) 45%
   c) 75%

11) On the average, people arrested for DWI have Blood Alcohol Concentrations that would result from a 175-pound man drinking how many drinks in an hour?
   a) 3
   b) 6
   c) 10

12) Alcohol is medically considered:
   a) a stimulant
   b) a depressant
   c) both
   d) neither

13) In California a study was made of the records of traffic violations of all types. What percentage of people who had had their licenses revoked were caught driving without a license?
   a) 15%
   b) 35%
   c) 65%

14) True or false: In most states, when a person is stopped for a DWI violation, his record is usually checked for previous violations (at least those violations which took place within the state).

15) True or false: In most states alcohol is involved in more run-of-the-mill crashes than in serious crashes.
16) True or false: Alcohol-related crashes typically involve drivers with BACs that are at very high levels rarely found among drivers who do not get into accidents.

17) What proportion of adult pedestrians hit by vehicles are under the influence of alcohol?
   a) 10%
   b) 40%
   c) 80%

18) True or false: Since few alcoholics own cars, they do not contribute significantly to the drinking-driver problem.

19) True or false: Very few convicted drinker-drivers have ever been involved in any crime (such as drunk and disorderly) other than DWI.

20) True or false: Two-and-a-half times as many people are killed in alcohol-related automobile accidents as are killed in willful murders.

21) True or false: Five times as many people are injured in alcohol-related car accidents as are hurt in crimes against persons (muggings, assaults, etc.).
10:45 - 11:45: NATURE AND SCOPE OF THE PROBLEM

CAPSULE DESCRIPTION

In this activity there is a brief slide presentation by the Chairman about the magnitude of the national alcohol-highway traffic safety problem. It is followed by a film, Point Zero Eight, which describes a driving experiment conducted in Canada and shows the effects of alcohol on driving ability. Following the film presentation, the Governor's Representative conducts a brief discussion in which he reviews the answers to the questions participants dealt with in Activity #1.
INSTRUCTIONS TO GOVERNOR'S REPRESENTATIVE

After the filmstrip presentation and the showing of Point Zero Eight by the Chairman, you will lead an open discussion session. Your chief task is to try to ensure that all participants’ questions are answered adequately. To do this you may have to intervene if the discussion lingers too long on any single point or if the topic becomes irrelevant. The discussion guide is just that, a guide. Use only that material which you feel will be helpful. Give participants a few minutes to compare the Inventory Answer Sheet (that was passed out to them during the film, Point Zero Eight) with the answers they gave. Then, if possible, direct the discussion to what is being done in your state and to what kinds of things could be done in the future. However, enter this area of discussion only after you are sure that everyone has a good grasp of the nature and extent of the problem.
CHAIRMAN’S SPEECH

Our second activity today is a brief overview of the entire drinking-driver problem. Most of you are familiar with at least some of the facts we are about to present. We want, however, to review them so that we will all have the same basic information necessary to engage in the other workshop activities. Also, you will be able to use much of this information after the workshop to describe to others the nature and extent of the drinking-driver problem.

Almost every American adult drinks sometimes. Almost every American adult drives sometimes. And a large number of adults who do both sometimes drive after drinking. The problem is that a small percentage of these individuals who drive after drinking have been drinking excessively. This percentage, small as it is, is involved in 28,000 automobile deaths each year. (Slide II-1) This means that in two years, the American death toll from impaired and drunk drivers is as high as the total American death toll in the entire Vietnam war. Nearly 70 people are killed every day in alcohol-related accidents, or nearly three people every hour. Each year highway deaths exceed willful murders by a ratio of five to one. Highway fatalities annually are equivalent to the total depopulation of a medium-sized city or large suburb in a natural disaster.

In other words, when measured against other forms of
disaster such as war, murder, floods, and epidemics, alcohol-related traffic fatalities rank extremely high in the magnitude of the number of people killed. (Governor's Representative inserts local statistics here.)

I have noted that driving after excessive drinking is responsible for many deaths and accidents. But what is excessive drinking?

First, it should be noted that drinking and driving can mix when the drinking is moderate or when enough time elapses between the time a person drinks and the time he drives. The one or two drinks a social drinker may have with dinner are not likely to affect his driving ability significantly. How many drinks will? Please remember that throughout this discussion, and indeed throughout the entire workshop, when we say "a drink" we will mean a one-ounce shot of 86-proof whiskey, a twelve-ounce can of beer, or a four-ounce glass of wine. These are all approximate equivalents in terms of pure alcohol content. (Slide II-2) Drinks served in people's homes, however, are often larger.

Alcohol-traffic safety experts have conducted enough tests to have a fairly good idea of how many drinks impair a person's ability to drive safely. They have determined this number by studying how much alcohol a certain number of drinks leaves in a person's blood stream. The percentage of alcohol in someone's blood stream is called his Blood Alcohol Concentration, or BAC for short. The point is that alcohol affects people only when it enters their blood stream and only when it has reached a certain level in their blood stream.
Only four things can affect the amount of alcohol in a person's blood — that is, his BAC. (Slide II-3) They include the following:

1. The amount of alcohol he drinks. As previously noted, one beer, one glass of wine, and one mixed drink all contain approximately the same amount of pure alcohol. However, certain cocktails (like martinis and manhattans) that combine two types of alcohol contain more pure alcohol than a can of beer or a glass of wine.

2. Whether the person has eaten before drinking. If he has eaten, the food will slow down the passage of the alcohol into the small intestine and the bloodstream.

3. How much a person weighs. Very simply, the more someone weighs, the more blood he has. And the more blood a person has, the more he must drink to reach the same BAC level as someone who has less blood — that is, who weighs less.

4. How long the person waits. The longer a drinker waits before driving, the more time his liver has to convert the alcohol into carbon dioxide, which is breathed out, and into water, which passes out as urine.
Nothing else affects a person's BAC. Cold showers, drinking hot coffee, and a host of other so-called "cures" for intoxication are all myths. They don't do a thing to affect the amount of alcohol in a person's blood stream or to modify the alcohol's effects on his behavior.

Now we return to our original question - how many drinks impair an operator's ability to drive a car safely? (Slide II-4) According to the law in most states, a BAC of .10 or higher is presumptive evidence of intoxication. For a 175-pound person to achieve a BAC of .10, he has to have had 5-1/2 drinks in one hour, or six drinks in a two-hour period. This is the case if he has not eaten in three hours; if he has eaten, it will require more alcohol for him to reach that BAC level.

You all have a BAC chart in your folder of materials. (Slide II-5) Take out your chart and compute, on the basis of your own weight, how many drinks you would have to take before you reached a BAC of .10 and were presumed to be legally drunk. Do this by setting the dial in the window at the bottom to .10 at the one-hour mark.

(Pause while they do this; explain further if necessary, using slide. Keep in mind that the BAC chart in the slides may be slightly different from the ones you have been able to obtain and distribute to participants.) Now look across the line that says "Weight in Pounds" until you arrive at your weight. (Pause again.) Then read the figure in the "Number of Drinks" column right underneath your weight. This is the number of drinks you would have to take to be considered legally intoxicated in this state. (Speaker will have to revise this description accordingly if the
state law defines .15 or .08 as the BAC level presumptive of legal intoxication.) Now you can reverse this procedure. (Slide II-6) Turn the dial until "three drinks" appears right above your body weight. Then look down at the window and determine, according to each half hour of time that passes, what your BAC would be. (Pause while they do this.)

Now let's relate this information about how many drinks you must have drunk to be considered legally intoxicated. One study indicated that more than half of the people arrested for driving while intoxicated have BACs of over .20. In our example of a 175-pound person who has not eaten recently, it would take ten drinks in an hour to reach a BAC level of .20. In the same study over 97% of DWI arrests involved people with BACs over .15. (Slide II-7) At a BAC level of .15, a person is 25 times more likely to have a car accident than if he were sober. In comparison, the same person, having three drinks and a BAC level of .06, is only about twice as likely to have an accident than if he or she were sober. Having any more than 1-1/2 drinks within an hour of driving will affect a person somewhat, but the degree to which he will be affected varies greatly.

Who are the problem drinker-drivers? By and large they are not social drinkers. True, the social drinker sometimes gets really drunk and then drives. Sometimes he kills people, but generally speaking the social drinker does not drive at BAC levels comparable to those of people arrested for DWI. (Slide II-8) What careful studies have shown is that more than two-thirds of alcohol-related fatalities involve so-called problem drinkers.
That represents over 18,000 deaths each year. So who are these problem drinkers?

Generally they are people whose drinking in some way creates a problem, financial, emotional, or social -- such as driving when drunk. Problem drinkers are sometimes alcoholics. Most people think that a true alcoholic is always too drunk to drive and too poor to gain access to a car. This is true of skid row alcoholics, but only 5% of all alcoholics are derelicts. Most alcoholics live in homes or apartments and manage to drive, often regularly. A person can be dangerously drunk and still manage to get a car moving, as you well know.

Problem drinkers are also those drinkers who, while not necessarily alcoholics, do drink to excess at times, causing problems for themselves, their families, and sometimes for the public.

It is these alcoholics and other problem drinker-drivers who are responsible for most alcohol-related accidents. (Slide II-9) For example, one study revealed that 80% of those arrested for DWI had histories of drinking problems, 60% had more than one previous alcohol-related arrest, and 35% had more than four. Most drivers arrested for DWI are not social drinkers who happened to have "one too many"; they are drinkers who regularly or frequently get drunk - and then drive afterwards.

It is primarily these alcoholic and problem drinker-drivers that we need to get off the road, not just the immoderate social drinker. We plan to discuss methods for accomplishing this during the workshop.
ACTIVITY #2

(The Governor's Representative should now introduce statistics about his particular state's drinking-driver problems and indicate how they corroborate the national statistics or, if they do not replicate them, discuss why a discrepancy exists.)

Clearly this is a problem for several agencies - namely, those referred to earlier by the Governor's Representative. We will be discussing the function of all these agencies and parts of the system: the courts, the police, the legislature, and the motor vehicles department, rehabilitation-treatment, and public information and education agencies.

I will expand on two of these functions at this time because they have too often been neglected by people who deal with the drinking-driver problem. These functions are the rehabilitation-treatment and the public information and education functions.

Problem drinking is increasingly coming to be recognized as a disease, rather than as a crime or a sin. Research is constantly being conducted to discover its causes and cures. To date there is little agreement among the authorities about what causes problem drinking and even less agreement about how to treat it. However, there are indications that problem drinkers can often be helped through treatment programs that may use counseling, psychotherapy, drugs, group support (such as Alcoholics Anonymous), or some combination of these. It is important not to view the alcoholic and the problem drinker-driver as incapable of changing. Given the right treatment, many can be significantly helped to avoid abusive drinking.
What this means in terms of the drinking-driver problem is that we must draw rehabilitation-treatment agencies into the overall effort to cope with the problem.

Public information and education campaigns must also be built into the overall effort. The public is ignorant about the severity of the problem, often believes that we are "out to get" the social drinker, and frequently feels that not much can be done about the problem anyway. All of us must take action to dispel this lack of understanding. At least twice during the workshop we will return to this central theme of educating the public to the necessity of taking effective action to reduce the number of alcohol-related accidents on our highways.

We are now going to view a film that graphically illustrates the relationship between drinking levels, BAC, and impaired driving ability. In the film actual driving tests are conducted in which skilled racing drivers take driving skill tests when sober. They then drink varying amounts of alcohol and try to perform the same driving skill tests again. You should know that this film was produced in Ontario, Canada where the BAC level presumptive of legal intoxication is .08. After the movie, we will have a few moments to answer questions you may have about the effects of drinking on a person's driving ability.

SHOW FILM, POINT ZERO EIGHT

(During film, pass out Information Inventory answer sheets.)
ACTIVITY #2

As you have clearly seen, even relatively small amounts of alcohol and a low BAC can affect a person's ability to drive.

The Governor's Representative will now answer any questions you might have about material in both this presentation and in the information survey. This is an open discussion, so if you have anything to add please feel free to speak up. Because of the lack of time the Governor's Representative may have to cut off long discussions of any one question. Please do not feel slighted if there is not time for you to say all that you might like.
FOOTNOTES

3. Ibid.

NOTE: All studies quoted in Manual are summarized in the Department of Transportation 1968 Alcohol and Highway Safety Report to Congress.
1. In most states it is now .10. In two states, and in Canada and in Great Britain, it is .08. In some European countries, including Sweden and Poland, it is .05. Some of the responses may indicate a level of .15 which was the previous level presumptive of intoxication in many states, some of which have only recently changed theirs.

The BAC is measured in three ways: blood test, breath test, and urine test. If the actual amount of alcohol present in the blood is calculated it is a great deal less than the amount consumed. For instance, .05% is less than one-twelfth of an ounce of alcohol in the blood. This is because most of the alcohol does not remain in the bloodstream but is breathed out as carbon dioxide and discharged in urine.

2. The correct answer is (b), 6. According to the formula we have used, a 175-pound man would require five-and-a-half standard drinks within an hour to reach a BAC of .10. If he has eaten during the past three hours, he would require even more alcohol to reach that level. It should be noted that in most homes the average drink contains considerably more than one ounce of alcohol. Mixed drinks involving two or more types of alcoholic beverages have even higher amounts of alcohol. Similarly, fortified wines, such as sherry and muscatel, have greater amounts of alcohol than indicated in the answer to the question.

3. The correct answer is (b). Only time can increase sobriety, at a rate of about one hour for each standard drink. Since alcohol is principally metabolized in the liver, even exercise, which usually increases metabolism, does not help. How a person feels is not an indication of how drunk he is; many drunks will strenuously deny that they are drunk. And while such things as a shock or a cold shower may enable a person to appear and feel sober, his driving (and other) capabilities are still seriously impaired.

4. False. This is a common belief, but it is untrue. In most cases, a drink or two will have no serious effect on driving ability. However, even at low BAC levels (.02 - .05) such tests as visual tests, car positioning tests, coordination tests, and comprehension tests have indicated the possibility of definite impairment in driving situations. These reactions were noted at low BAC levels of .02 and were sometimes pronounced at .05. Those who drove best at the .02 - .05 level were habitual drinkers, but all drivers tested performed equally poorly at the .10 level. Remember also that in these tests those who performed best at low BAC levels were the least likely to remain at those levels in a non-laboratory situation. There is no statistical evidence correlating low BACs (.05) with crashes, largely because crash victims are rarely tested for BACs unless they appear seriously impaired.
5. The correct answer is (c), 25. The Chairman should point out that this is an example of a "guessing" question for which none of the participants is expected to know the correct answer. The statistic is from a study by Borkenstein, et al., "The Role of the Drinking Driver in Traffic Accidents," reported in the Department of Transportation 1968 Alcohol and Highway Safety Report. The graph indicates that, for all crashes, probability is double at .06. The probability of being in a single-vehicle crash is always higher -- twelve times higher at .10.

6. The actual percentage in a 1965 Oakland, California study was 45%, or nearly 1 in 2. The study is cited in the Department of Transportation 1968 Report, as are most other findings in this survey. Among people with no crashes and no citations, only 2% had been arrested for DWI. Among those with run-of-the-mill violations, only 9% had DWI records.

7. The correct answer is (c), 80%. This is a finding from the same Oakland study. While other studies, conducted where the social service agencies might not be as effective, may show a lower percentage, the Oakland findings effectively demonstrate that the typical person arrested for DWI is not an average member of the driving public. The percentage for run-of-the-mill violations was 30% and that for no crashes or violations was 10%.

8. The correct answer is (c), 50,000, although the actual figure is over 56,000 and rising each year. Driving is becoming safer in terms of deaths per miles driven, but because people are on the average driving more than in the past the chances of an individual being killed are still about the same. The rise in the total number of deaths reveals that not only do more people drive, but they drive further than before.

9. Nearly 50% of highway fatalities occur in alcohol-related crashes. Usually alcohol is implicated only in cases where the driver's BAC exceeded .05. In one series of studies, between 39% and 50% of the drivers killed in all auto crashes had BACs in excess of .10, and between 29% and 37% had BACs above .15. In other words, traffic fatalities are not related merely to drinking but to drinking in large amounts.

10. The actual figure is 44%, so the correct response is (b). The study was conducted by the Dade County, Florida, Coroner's Office, and the finding was noted in the 1968 Report. Another researcher concluded, "The drinking driver ran into others four times as often as he was run into. The proportion of rammers among the drinking drivers was significantly greater than the proportion among the non-drinking drivers...."
ACTIVITY #2

11. In several studies the average BAC for people arrested for DWI was between .17 and .20. For a 175-pound man this would require 10 standard drinks, so the correct answer is (c).

12. Chemically and medically alcohol is considered a depressant. That is, it progressively lowers the activity of the brain. Many people incorrectly consider it a stimulant because one of the first areas of the brain to come under its influence, and therefore to be depressed, is the area controlling inhibitions. A reduction of these inhibitions often creates a euphoria which is misinterpreted as stimulation.

13. The correct answer is (c), 65%. Among those who merely had their licenses suspended, the fraction was only one in three. It is possible that, feeling they have little else to lose, drivers who have had their licenses revoked are still more likely to continue to drive. It is probable that drivers who have had their licenses revoked have attitudes and behavior patterns more consistent with violating traffic laws than are the attitudes of those drivers with suspended licenses.

14. False. One study indicated that the record of a person committing a violation is examined in perhaps as few as one out of eighty cases. This figure, of course, varies greatly from state to state. The problem is that record-keeping facilities are not readily available and accessible to those involved in processing the violation. In addition, almost no facilities are available for checking on the records of another state, at least not on a regular basis.

15. False. There is a direct relationship between the severity of an accident and the likelihood alcohol was involved. In one study mentioned in the 1968 Report, 83% of the drivers involved in run-of-the-mill crashes had not been drinking at all, and only 6% had BACs above .10.

16. True. About half of the drivers killed in crashes had BACs above .10. About one-fourth of those seriously injured had BACs above .10. Among random drivers tested at the time and place of fatal crashes, about 2% had BACs in these ranges.

17. The correct answer is (b). In one series of studies quoted in the 1968 Report, 33%-43% of fatally injured pedestrians had BACs above .10. Among pedestrians in the same place at the same time, about 9% had concentrations at that level. The fact that such a high proportion of all pedestrians had such high BACs indicates that many of these accidents occur outside bars or in areas with many bars nearby.
18. False. Derelicts do not, as a rule, own cars, but they account for fewer than 10% of all the alcoholics in the country. One study in the 1968 Report indicated that 60% of drinker-drivers judged to be responsible for fatal crashes were alcoholics.

19. False. In the Oakland study those arrested for DWI had an average of about 1.8 non-alcohol-related arrests, in addition to about 4.6 alcohol-related arrests (including DWI).

20. True

21. True
INSTRUCTIONS TO GOVERNOR'S REPRESENTATIVE ABOUT THE INVENTORY ANSWER SHEET:

Because you will develop some additional questions and because some answers (those, for example, about presumptive BAC levels) will vary from state to state, you may have to rewrite this answer sheet. The complete answer sheet should be distributed during the showing of Zero Point Eight. This will eliminate some questions about straightforward facts and allow you to concentrate on the implications of these facts. In addition, the Inventory and the answer sheet may serve as a useful tool for participants for educating their colleagues or the general public.

SAMPLE ANSWER SHEET

The following answers are correct for a state with a BAC of .10 presumptive of intoxication:

1. c 12. b
2. b 13. c
3. b 14. false
4. false 15. false
5. c 16. true
6. a 17. b
7. c 18. false
8. c 19. false
9. b 20. true
10. b 21. true
11. c
LOCAL INFORMATION SUMMARY

These forms provide a basis for summarizing the drinking-driver situation in your local area. They may be modified to include additional information or to eliminate information that is either unavailable or unnecessary. Where local data are not available, use state data. The completed forms should be handed out at the same time as the Information Inventory answer sheets. A few questions at the beginning of the Information Inventory should deal with the situation in your area, and one question should definitely deal with the alcohol-related crash fatality rate. In addition, these same facts should be used in the speech dealing with the nature and magnitude of the problem and elsewhere in the workshop where appropriate.

1:00 - 3:00: HOMOGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

CAPSULE DESCRIPTION

In this activity introduced by the Governor's Representative, participants break into small groups that are organized homogeneously by type of official. Each group discusses cooperative steps which all elements in the alcohol-traffic safety countermeasure system can be expected to take. During the activity the Governor's Representative and the Chairman circulate among the small groups, listen to the discussions, and make comments only when appropriate. Rather than jump from group to group, they should spend about twenty minutes with each group.
This next activity is closely linked with tomorrow's final activity. In both activities we will be planning actions that each agency in the alcohol-traffic safety countermeasure system can actually take to help solve the problem — the agencies being the legislature, the courts, the Department of Motor Vehicles, and law enforcement, public education, and rehabilitation and treatment agencies. The actions we are concerned about are those that we could take in cooperation with each other.

For this activity we are going to break into small groups that are arranged homogeneously by type of official: all rehabilitation and treatment professionals will be together in one group, all judges will be together in another group, and so on. In each of these groups you will be discussing specific steps which members of your set of officials can be expected to take in cooperation with each of the other types of officials to help solve the drinking-driver problem. You will also discuss what reciprocal steps you expect each of the other professions to take in cooperation with your plan of action. The Group Moderators will be able to explain to you in detail how we will conduct this small group session.

You all have in your folders blank sheets of paper to record in outline form the precise steps that your and other professions should be expected to take. You will need the sheets tomorrow so don't misplace them.
Tomorrow we will break into small groups again, but at that time they will be arranged heterogeneously by profession — that is, each group will contain one or more members from each set of officials represented at the workshop. Then each small group will share its ideas on what steps should be taken to cope with the drinking-driver problem and resolve any differences between the officials. Our expectation is that each small group will emerge tomorrow morning with a set of realistic steps that each set of officials can implement once the workshop ends. It may not be possible for every group to iron out all disagreements among officials, but we do hope that through this interchange of ideas you will have at least initiated a dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.

Note on your program which small group you are in for this activity and please proceed to the designated room location now.
INSTRUCTIONS FOR GROUP MODERATORS FOR PLAN-OF-ACTION DISCUSSIONS

NATURE OF THE ACTIVITY

This activity is closely linked with the following morning's final activity. In both activities participants will be planning actions that each of the agencies in the alcohol-traffic safety countermeasures system could actually take to help solve the drinking-driver problem — these agencies being the legislature, the courts, the Department of Motor Vehicles, and law enforcement, public education, and rehabilitation and treatment agencies. The actions you will discuss are those that officials of these agencies could take in cooperation with each other.

In this, the first of the two plan-of-action activities, the small groups will be arranged homogeneously by official position: all rehabilitation and treatment professionals in one group, all judges in another group, and so on. Each of these groups will discuss specific steps which its officials can be expected to take in cooperation with each of the other types of officials to help solve the drinking-driver problem. Each group will also discuss what reciprocal steps it expects each of the other sets of officials to take in cooperation with its plan of action.

Activity #7 on the following morning will again involve small group discussions which you will moderate. However, Activity #7's small groups will be arranged heterogeneously by type of official — that is, each group will contain one or more members from each set of officials represented at the workshop. Then each small group will share its ideas on what steps should be taken by each set of officials to cope with the drinking-driver problem and resolve any differences between the officials.

OBJECTIVE OF THE ACTIVITY

It is expected that each small group will emerge at the end of the workshop with a set of realistic steps that each group of officials can implement once the workshop ends — steps that involve cooperation among all involved parties. It may not be possible for every group to iron out all disagreements between officials, but it is expected that through this interchange of ideas officials from different agencies will have at least initiated a dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.
ACTIVITY #3

ROLE OF GROUP MODERATOR

Your responsibilities in this activity are twofold. First you will help elicit discussion and help channel it along the general topic area specified. Second, you will record the conclusions your small group comes up with on the forms that follow these instructions. While you are to help confine the discussion to the general topic at hand and discourage irrelevant conversation, you should encourage discussion on any specific area that is within the general topic.

Eliciting discussion is the more difficult of your two tasks, but if the previous activities in the workshop have been effective it should not be hard. The most important task is to establish rapport with the group. Once the members of your group recognize the objective role of the Moderator, there should be less need for competition and a feeling of group cohesiveness should evolve. Your goal is to create an image of non-leadership. As in most cases where interaction occurs, the most direct, honest approach is best. Assuming a defensive superior attitude will immediately alienate most people.

Begin the activity by explaining its objective and the steps by which you plan to accomplish that objective. You will be able to do this once you have digested the following instructions yourself.

Begin the discussion by establishing a list of specific activities your group actively plans to engage in and those activities it would like to (but can't) engage in to help cope with the drinking-driver problem. Be careful to distinguish between the two, but be sure to discuss both types of actions.

As your group comes to an agreement on each action it plans to take or would like to take, be sure each participant records those actions in outline form on the check sheets provided. Remind them that they will need these sheets to refer to tomorrow.

After you have recorded these actions, have the group select that agency with which your group most needs to develop a coordinated, cooperative effort if it is to carry out in reality the actions it listed earlier as being within its own sphere of responsibility. Then discuss the reciprocal actions your group feels this other group of officials must engage in if you are to be able to implement effectively your selected actions. For example, law enforcement officials may plan to arrest more drivers for DWI than they presently arrest. As a result they will need to coordinate their efforts with prosecutors to see to it that these DWI charges are not reduced through plea-bargaining. In this example the group needs to discuss exactly what it expects prosecutors to do.
When discussion has been completed on the cooperative steps that should be taken between your group and this particular group of officials, move on to the next most important group of officials with whom your group needs to coordinate efforts, and so on down the list.

Once the discussion has begun, bear in mind the time limitations. At an appropriate time, for example when members are getting tired or restless or a major discussion has been concluded, declare a coffee break. Don't let the break run more than fifteen minutes unless you feel you have extra time to spare or you feel members need the extra time to relax before resuming work. In terms of the time limitations, remember that there are five groups of officials or professionals with whom your group may want to coordinate efforts. If necessary, cut off discussion about one group if it appears to be taking too long or seems to be bogged down and return to it later in the session if there is time.

At the end of the session participants should have three check sheets filled in and ready for use in the afternoon session.
ACTIVITY #3

ACTIVITY #4

3:15 - 3:45: CURRENT APPROACHES PRESENTATION

CAPSULE DESCRIPTION

The Chairman gives a brief overview of the current team approaches employed by various agencies to deal effectively with the drinking-driver problem. Additional information is included in each participant's folder.
CURRENT TEAM APPROACHES PRESENTATION BY CHAIRMAN

Now that you have been able to discuss approaches to solving the drinking-driver problem, we want to supplement your efforts with a brief summary of some of the countermeasures involving interagency cooperation that we think are or might be effective in helping your agencies to cope with this problem.

The new approaches we are going to present (some of which you may have already mentioned in your small group discussions) have actually been implemented by several state and local agencies throughout the nation. We hope that you will consider implementing any of them that are compatible with your individual agency's constraints. And we hope that you will have a clear picture of how the specific contributions of each of your particular agencies fit in with actions that are being or will be taken by the other agencies involved in solving the alcohol-traffic safety problem.

We want to make it clear, however, that not every agency will be able to implement all these new interagency approaches, nor, in some cases, should they want to. Local circumstances, state laws, and financial or manpower constraints may make it difficult for you to use all of them. The selection of a specific countermeasure will also have to be based on consideration of all agencies and their interactions within an overall program of unified action directed at reduction of alcohol-related crashes.

First, let me discuss just one of the major countermeasure activities involving interagency cooperation that national traffic safety
experts have recommended as having great potential for helping to cope with drinker-drivers. This is the area of legislative countermeasures.

All five major agencies can initiate or further cooperate in the area of legislative countermeasures affecting the drinking-driver problem. The following are four examples of areas in which legislators and each of the other agencies can implement joint steps:

Legislators and the judiciary can meet to discuss what kinds of license suspension laws would be most effective in deterring the drinker-driver from driving while intoxicated. The advisability of mandatory license suspension laws for convicted offenders can be discussed. Participation by officials from the Department of Motor Vehicles is essential in these discussions.

Legislators and law enforcement agencies can arrange meetings at which at least five central pieces of legislation can be discussed that can help police perform their task of enforcing the laws:

1. Requiring drivers suspected of DWI to consent to a chemical test or face suspension/revocation of driver's licenses.

2. Establishing a legal level of presumed intoxication at no higher than .10 BAC and possibly lower.

3. Passing illegal per se laws that make it an automatic crime to be driving with a BAC of .10 or higher.
4. Establishing vehicle registration laws providing for the suspension or revocation of the license plates of any vehicle owned by an individual convicted of a drinking-driving offense who drives illegally during the period in which his driving privilege is limited or suspended.

5. Legalizing the use of a preliminary screening breath test prior to arrest.

Participation by law enforcement agencies in this discussion is essential if an accurate estimation of each proposed law's enforceability is to be achieved. All too often laws are passed that law enforcement agencies are unable to enforce effectively because these agencies have not participated in the laws' formulation.

Legislators, rehabilitation-treatment agencies, and licensing agencies can all meet together to discuss at least ten possible pieces of legislation:

1. Legislation requiring medical authorities to report known problem drinkers to state driver licensing agencies. For example, the state can pass legislation requiring that state mental hospitals report the admission and discharge of individuals treated for alcoholism. Our laws have traditionally provided for the protection of society through the reporting by the physician to appropriate government agencies certain dangerous communicable diseases and gunshot wounds. Alcoholic drivers will kill two to three times more Americans than will guns this year. Legislators, rehabilitation-treatment agencies, and the Department of Motor Vehicles can
ACTIVITY #4

discuss the advisability of adding alcoholism to this small list of dangerous
diseases which it may be the physician's responsibility to report to the
appropriate government agency.

2. Legislation requiring examination by a medical or driver's
license review board of all drivers convicted of DWI to determine whether a
drinking problem exists.

3. A law requiring attendance at an alcohol rehabilitation
facility for all drivers arrested for DWI.

4. Laws that require that all license applications include a
certification by the applicant indicating, for example:

- whether he has ever been convicted of a
drinking-driving offense;

- whether he has ever previously had action taken
  against his license for a drinking-driving offense;

- whether he has ever been convicted of any other
  offense in which intoxication was a major factor,
such as drunk and disorderly; and

- whether he has ever been admitted to a medical
  facility or social institution for treatment as an
  alcoholic.
5. Legislation that empowers the licensing agency to collect information on problem drinkers from applicants and from such other sources as:

- the judiciary for court records of prior drinking-driving convictions;
- the judiciary for court records of all non-traffic convictions related to the consumption of alcohol, such as public drunkenness and drunk and disorderly;
- state and local government medical and social agencies covering the admission and discharge of individuals treated for alcoholism and problem drinking; and
- licensed physicians for reports on problem drinkers.

6. Legislation that instructs the licensing agency to provide each local enforcement agency with a list of individuals within its jurisdiction who have convictions or reports indicative of problem drinking. Such legislation must be coupled with proper safeguards for handling this information to ensure the protection of the individuals involved.

7. A provision requiring courts to order or conduct pre-sentence investigations of each person convicted of DWI to determine the existence and the extent of the drinking problem of such convicted persons.

8. The development and implementation of Driver Improvement
Programs (Alcohol Safety Schools) for identified problem drinker-drivers, including provisions for referral to alcoholism rehabilitation facilities.

9. Legislation empowering courts and licensing authorities to stay all or part of a mandatory sentence on condition that the convicted person satisfactorily participates in a driver rehabilitation program; and

10. Legislation empowering the driver licensing agency to grant a limited driver's license for restricted use.

Rehabilitation—treatment professionals need to participate in discussions about such legislation for at least two critical reasons:

1. They need to provide information to legislators and DMV personnel about the availability and effectiveness of different types of rehabilitation programs within their jurisdictions; and

2. They need to ensure that the rights of alcoholics and problem drinkers are not abused should their names be reported to a state agency. In this connection most states have provisions for a Board of Medical Advisers for the licensing agencies. Such boards, for example, can be given the responsibility for review of information coming from medical sources and for advising the licensing agency as to whether to grant license applications or to suspend or revoke existing licenses.

The necessity for licensing agency officials to participate in these meetings is self-evident.

Finally, legislators and public education officials can meet to:
1. Discuss the extent to which alcohol education, with specific reference to drinking and driving, can be made a mandatory part of driver education courses; and

2. Discuss ways in which an educational campaign can be mounted or enlarged to inform the public of the state's drinking-driving laws and to develop public support for them.

Clearly, there are at least four important forms of cooperation that can take place in the field of drinking-driver legislation: between legislators and the judiciary, between legislators and law enforcement agencies, among legislators, rehabilitation-treatment agencies, and the Department of Motor Vehicles, and between legislators and public education agencies. There are, however, numerous other forms of interagency cooperation that can be undertaken. Let us examine three of the more important examples:

Police-judiciary coordination of efforts is needed to ensure that:

- Police are not tied up with lengthy court appearances at odd hours when they must testify on a DWI case; arraignment and trial procedures can be reviewed with a view toward simplifying and reducing the involvement of arresting officers; and to ensure that

- Police are trained by appropriate court personnel in the art of presenting effective testimony in court
that will ensure that drivers guilty of DWI are not acquitted by juries or judges for lack of proper or sufficient evidence.

Judiciary-rehabilitation cooperation is needed to:

- Initiate or expand a pre-sentence investigation program to determine whether a driver convicted of DWI is a social drinker, problem drinker, or alcoholic; and to

- Keep judges informed on a continuous basis about the availability of treatment programs as an alternative to solely punitive sanctions for convicted DWIs.

Finally, the entire area of records and information exchange can be analyzed and streamlined. This is a problem that involves nearly all of us — Department of Motor Vehicles, judiciary, law enforcement, and rehabilitation and treatment agencies. Without an efficient reporting system, our best efforts to cope with the drinking-driver problem will come to naught.

These, then are some examples of the major forms of cooperation and coordination that can fruitfully be initiated, improved, or expanded among our various agencies. As we can see, any successful effort to cope with the drinking-driver must involve such coordination of efforts among all the agencies with alcohol-traffic safety responsibilities.
In addition to presenting you with these interagency approaches, we would also like to indicate briefly some of the new independent measures that some state, county, and city agencies involved in the alcohol-traffic safety problem are beginning to implement. These are actions that do not require interagency cooperation but rather are steps an agency can initiate by itself to help combat the drinking-driver problem. Although cooperation between or among agencies is our principal objective, we want to present this wider picture of what is taking place both on the state and local levels to re-emphasize that all agencies are already or will soon be working together, each doing its part, to solve the problem. For only if each agency plays its part fully will we be able to be effective in our overall effort.

First of all, police departments are being encouraged to:

1. Determine the locations and times of day during which most accidents involving drinking occur and then to increase patrols during those hours and at those locations.

2. Establish a system of spot roadside checks as a device both to educate the public to the severity of the problem and to the sanctions against violating the law and also to help monitor those drivers in the community who have had their licenses suspended or revoked for drinking and driving.

3. Train enforcement personnel in methods of detecting, apprehending, and handling intoxicated drivers.
4. Acquire the equipment used to detect intoxication and then train police to use it effectively.

Secondly, judicial agencies are being encouraged to engage in the following five countermeasure activities:

1. Engage in pre-sentence investigation of convicted drinking-drivers and obtain the necessary information to do this effectively. This means coordinating efforts with the Department of Motor Vehicles and appropriate alcoholism treatment and rehabilitation agencies so that judges can then make the disposition most likely to deter the problem drinker-driver from driving again while intoxicated.

2. Provide special training for selected prosecutors whose sole function would be devoted to prosecution of DWI violations.

4. Increase probation staff with personnel especially trained in alcohol problems.

5. Increase cooperation between prosecutors and judges in preventing plea-bargaining.

Licensing and registration agencies are being encouraged to establish a comprehensive information file on previous, actual, and potential drinking-drivers using information on alcohol-related arrests from court records and state licensing agencies, including casework information from
social and treatment services.

Rehabilitation agencies are being encouraged to:

1. Diagnose the problems of drivers convicted and sentenced for DWI so that appropriate treatment methods may be selected and instituted.

2. Organize drug treatment programs for problem drinkers referred for rehabilitation by the courts.

Public education agencies, including schools, are being encouraged to:

1. Teach drivers about the dangers of drinking and driving in an honest, non-moralizing manner. To aid in these efforts, the Department of Transportation has developed a filmstrip with accompanying discussion guide to be used in high school driver education classes. This program is called "The Decision is Yours."

2. Teach students in general more about the nature and dangers of alcoholism. The National Institute of Mental Health and the Department of Transportation have prepared an alcohol curriculum for kindergarten through twelfth grade called "Alcohol and Alcohol Safety."

In addition, we are encouraging legislatures to pass meaningful and effective alcohol-traffic safety laws. And lastly, public information and education campaigns are being mounted, directed at both students and adults, to inform the public of the magnitude of the drinking-driver problem and of steps which can be taken to rectify it.
These, then, are some of the new approaches that we expect state and local agencies with responsibility for the drinking-driver problem to initiate or expand. They are, as we indicated, actions these agencies and departments can take that do not require any significant interagency cooperation. But, in the last analysis, such cooperation must take place if our struggle with the drinker-driver is to be totally successful. It is to initiate and further such cooperation, in addition to any independent actions individual agencies may take, that we have been holding this workshop.
There are three parts to this activity:

1. The Governor's Representative introduces the activity and then shows the movie, Ladies and Gentlemen of the Jury (Governor's Representative's introduction: 8 minutes; movie: 32 minutes)

2. Participants break into the same small groups as for Activity #1, the Information Inventory, and discuss and record what rehabilitation measures they would advocate for the drinker-driver in the movie. (30 minutes) Now I will introduce the day's last, but hardly least interesting activity.

   1) Respond to the measures advocated by the other participants and suggest their own rehabilitation measures; (10 minutes)

   2) Give a brief presentation about the availability of treatment-rehabilitation services in the local community that can treat problem drinker-drivers; (20 minutes)

   3) Respond to questions about these facilities and about rehabilitation in general. (5+ minutes)

The overall activity is introduced, directed, and concluded by the Governor's representative. Part 2 is led by the Group Moderators. Except for their moderating role during part 2, the Group Moderators have no other tasks.
INSTRUCTIONS FOR GOVERNOR’S REPRESENTATIVE, GROUP MODERATORS, AND PANEL MEMBERS

INSTRUCTIONS FOR GOVERNOR’S REPRESENTATIVE

The Governor’s Representative directs this activity. He:

1. Introduces it with the speech provided below or with a speech of his own;

2. Presents the movie, Ladies and Gentlemen of the Jury;

3. Instructs the participants to break into the same small groups they were in for Activity #1, except that rehabilitation-treatment participants do not engage in these small group discussions. (This means that the rehabilitation Group Moderator will have to be replaced by an alternate Moderator for this activity.)

4. Ends the small group discussions after 30 minutes and instructs participants to re-form into the large group;

5. Instructs Group Moderators to read their group’s conclusions to the whole group and to the panel;

6. Moderates the panel discussion; and

7. Concludes the activity with a few words, such as those provided below.

The Governor’s Representative should moderate the panel discussion as he sees fit — formally (e.g., repeating questions from the floor), informally, or somewhere in between. By this time during the workshop, he will know whether he can be relaxed in his approach or whether participants need structure. The Governor’s Representative should also be flexible about the time allowed for the three parts of the panel discussion. For example, if interest is great, he can allow the final question and answer period to extend beyond the planned five minutes, since the following BAC activity can be delayed.

The Governor’s Representative, as moderator, should not allow any one panel member to dominate the discussion. When panel members respond to questions from floor, he should allow enough time for answers but not let the response drag. He should also check to see if other panel members have additional comments to add to each answer.
INTRODUCTORY SPEECH BY GOVERNOR'S REPRESENTATIVE

Now that we have heard some of the current interagency approaches for dealing with the drinking-driver problem, we are going to participate in an activity that deals with one particular and very crucial element in the overall system of countermeasures, namely, rehabilitation. This activity will give us an opportunity to learn more about the nature of rehabilitation of drinker-drivers and about precisely what treatment facilities and clinics are available to us in our community for helping the drinker-driver.

The activity has three parts. In the first part we will view a movie, Ladies and Gentlemen of the Jury. This movie depicts a story in which a problem drinker-driver gets into an accident. The movie then traces his court case in which he is charged and tried for driving under the influence. All elements of the countermeasures system are involved save for one, namely public education. After the movie we will split up briefly into the same small groups we were in at the beginning of the day for Activity #1, the Information Inventory. Brief thirty-minute discussions will then be held in each group about what specific rehabilitation-treatment measures you would advocate for the problem drinker-driver in the movie. The rehabilitation professionals participating here today will not take part in the small group discussions.

The movie has received considerable criticism for its portrayal of some of the actors in the alcohol-highway traffic safety system, most notably the role of the judge. We feel, however, that despite these drawbacks the
film does show what one type of drinking-driver is like. In the small group discussions, please ignore the shortcomings of the film and concentrate on the rehabilitation and treatment methods you would recommend. Your suggestions will be written down and submitted to the rehabilitation treatment professionals. These rehabilitation participants will then take your suggestions and form a panel discussion based around them. Panel members will:

1. Respond to the measures you advocate and offer their suggestions on how to rehabilitate the drinker-driver in the movie;

2. Give a brief presentation about the availability of treatment services in our community that can be used to treat problem drinker-drivers; and

3. Respond to questions about these facilities and about rehabilitation in general.

To summarize, then: Activity #5 will consist of viewing the movie, Ladies and Gentlemen of the Jury; brief small group discussions of how we would treat the problem drinker-driver portrayed; and a panel discussion on rehabilitation facilities and methods available in our community. Let us now view the movie.
CONCLUDING REMARKS BY GOVERNOR'S REPRESENTATIVE

This has been a most interesting and informative activity. I think we all have gained greater insight into the nature of problem drinker-driver rehabilitation. And we have acquired some badly needed, accurate information about what rehabilitation clinics and facilities are available to us for use in our efforts to treat problem drinker-drivers.

I want to thank our panel members for their assistance.

Now I will introduce the day's last, but hardly least interesting activity.
INSTRUCTIONS FOR GROUP MODERATORS

The Group Moderators lead the small group discussions that constitute part two of this activity. When the small groups have formed, each Group Moderator reviews briefly with his group the objectives for and substance of these small group discussions. This includes indicating that:

1. Only 30 minutes are available for this discussion;

2. The group is to decide what specific rehabilitation measures it would like to see instituted for the drinker-driver portrayed in the movie;

3. The group may decide that more than one treatment is appropriate;

4. The group may not be able to agree on the best treatment method(s) and, if that is the case, it can report back all the methods it advocates;

5. At the end of the discussion, the Group Moderator will record the group's decision(s) for transmittal to the Chairman and panelists.

During the discussion itself, Group Moderators also need to keep the time constraint in mind and discourage irrelevant talk. If participants are too quick to decide on the most appropriate treatment method(s), the Group Moderator can ask them why they believe these methods would be effective or more effective than other methods.

At the end of the 30 minutes, the Group Moderators record briefly on a piece of paper the treatment method(s) their group advocated.*

*These small group discussions can be conducted as a large group discussion if time is short.
INSTRUCTIONS FOR PANEL MEMBERS

Panel members are those participants who are involved with the rehabilitation and/or treatment of problem drinkers. They have been singled out to participate in a panel discussion for this workshop because the other participants need accurate, up-to-date information about precisely what rehabilitation services are available for treating drinker-drivers and about current thinking on the nature and effectiveness of contemporary rehabilitation modalities.

The general nature of the panel discussion has been delineated in the preceding pages. Panel members must not only respond to the small groups' conclusions about what rehabilitation measures should be provided for the drinker-driver in the movie, Ladies and Gentlemen of the Jury, but also prepare and deliver a brief presentation on what rehabilitation facilities are available in the community that can provide treatment and/or education for problem drinker-drivers and social drinkers who are convicted of DWI. This will require some minor research in advance of the workshop and the preparation of a list of available services. The list should include the names and addresses of the facilities and the types of treatment modalities they provide. However, this presentation will be very brief, no more than five minutes per panel member. While in-depth discussions of treatment modalities would be very useful, there is not enough time for this kind of presentation.

There will be a few minutes at the end of these presentations for the other participants to ask questions about these facilities and about treatment modalities in general, but the Governor's Representative, at his discretion, can extend the time should there be a significant amount of interest in this issue. In any case, there will be ample time during the subsequent drinking exercise for participants to ask the rehabilitation-treatment professionals questions.
The Governors' Representative concludes the day with a brief summary of the day's accomplishments, and, if he plans to host the Alcohol Awareness Seminar, an introduction to that activity.
CAPSULE DESCRIPTION

In this activity, the Governor's Representative and/or an official to whom he delegates this task requests participants or special subjects to drink alcohol and record their BAC levels on chemical breath-testing equipment while participants observe and/or test drinkers' reasoning powers and dexterity at different BAC levels.
Two different types of optional activities in which participants and/or subjects drink alcohol and periodically check their BAC levels with chemical breath-testing equipment can be used at the end of the first day's activities. Both can be very useful in illustrating many points about drinking behavior and about impaired driving. Of the two, the one a workshop administrator will want to implement will depend on the extent to which he feels comfortable engaging in these types of activities and on his ability to arrange them. This will mean obtaining the necessary beverages and equipment and locating personnel to operate the breath-testing equipment. If one of the two BAC demonstrations is implemented, a follow-up discussion must be held along the lines suggested in the instructions for activity #6. Unless the follow-up discussion is carefully planned and executed, observers may leave the demonstration with erroneous conclusions about how alcohol affects driving ability.
1. AN ALCOHOL AWARENESS SEMINAR

In this activity all participants are invited to drink as much alcohol as they want and periodically to test their BAC levels on chemical breath-testing equipment. Each time a test is taken, the result is written on a sticky label and affixed to the participant's clothing so that everyone knows what everyone else's BAC level is.

The objectives of this seminar are to provide:

1. An opportunity to socialize informally;
2. An understanding of how chemical breath-testing equipment works and of what the relationship is between alcohol consumption and BAC levels;
3. An awareness of just how much alcohol must be imbibed in order to reach a BAC level that is legally presumptive of intoxication;
4. An understanding of how alcohol abuse impairs driving ability;
5. An illustration of how some people can feel sober enough to drive but have high BAC levels that indicate they are impaired;
6. An illustration of how a person may appear sober and capable of driving safely but in fact have a high BAC level and be impaired.

The Governor's Representative can introduce the seminar to participants by explaining its nature and referring to the first four objectives listed above (save any reference to the other two objectives for follow-up discussions). He might want to request a volunteer to attempt to reach the BAC level that is presumptive evidence of intoxication in his state. He will want to stress the fact that participation is voluntary.

The Governor's Representative will have to make the necessary arrangements in advance for securing a bar, alcohol, chemical breath-testing equipment, sticky labels, if possible a driving simulator, and personnel to operate the bar and equipment. Chemical breath-testing equipment is usually available from local or state police and/or the local Alcohol Safety Action Project (ASAP). A trained policeman or other trained professional should be present for the evening to administer the tests. A high school or professional driving school may be able to provide a driving simulator along with a staff member to administer the driving tests.
2. AN ALCOHOL AWARENESS EXPERIMENT

When it is not feasible or wise to conduct the above seminar, it may be possible to have one or two volunteers from the community, such as doctors or professors, drink alcohol in the presence of the participants. They should periodically take a chemical breath test to determine their BAC level and then attempt to perform tests requiring clear reasoning powers and quick reaction abilities. Their performance on these tests when impaired can be compared to pre-tests performed when sober. The discussion points suggested above can still be pursued at the end of the experiment.
9:00 - 9:30: DISCUSSION OF BAC LEVELS

CAPSULE DESCRIPTION

On the second morning, the Governor's Representative conducts a short discussion about the conclusions that can be drawn from the previous evening's Alcohol Awareness Seminar. (See previous section, Alcohol Awareness Seminar, for details.)
INSTRUCTIONS FOR GOVERNOR'S REPRESENTATIVE

If the Governor's Representative decides to host an Alcohol Awareness Seminar for participants, he should make absolutely certain that it becomes a vehicle for furthering the workshop experience in alcohol awareness as well as a pleasant social event for the participants. This end can be achieved during a follow-up discussion which will take place either immediately after the event or, preferably, the next morning before the day's regular activities. This discussion, lasting about a half hour and led by the Governor's Representative or by the Chairman, should support and reinforce the information being presented and the attitudes being fostered during the rest of the workshop. Discussion can center on the following points of interest:

1) During the seminar, did you think that the amount of alcohol you consumed was related to your BAC level?

2) Did any of you feel sober enough to drive but have high BACs? What might account for this discrepancy?

3) What kinds of behavior did you observe in those people who had low, medium, and high BACs? Could you guess what their BACs must be by observing their behavior? If so, how? If not, why not?

4) What was the behavior like of the volunteer who reached a BAC level of .10? Could you tell he was impaired? If so, how? If not, why not?

5) When someone has reached a BAC of .10, how many drinks would you now estimate he has imbibed?

The answers to these questions should be related specifically to law enforcement efforts. For example, a participant's ability to reach BAC levels of .10 and above and yet seem sober and pass (or even improve on) dexterity tests can be related to the police officer's task of determining whether drivers he has stopped for suspicion of drunk driving are impaired or not. In short, a police officer may not be able to recognize an impaired driver. It should be clearly pointed out that while participants may have reached high BACs but appeared unimpaired, their apparently normal social behavior and even average performance on the driving simulator at high BACs fail to reveal that if they were driving an automobile:

1) They might have a tendency to take risks they would not take if they were sober, like passing on a curve; and
ACTIVITY #6

2) They might be able to handle a car in normal traffic but be unable to respond quickly and safely to unexpected driving conditions, such as a pedestrian coming out from between parked cars;

3) Impaired individuals can often handle adequately a single task, such as touching their nose, but be unable to competently or safely cope with multiple tasks, such as steering a car, shifting, turning on a directional, and watching for pedestrians.

NOTE

It is possible that the BACs recorded by subjects on breath testing equipment may not correspond to the reading on BAC charts or dials for the same number of drinks. Such a discrepancy may occur because of one or more of the following:

- the machine was faulty (for example, from excessive movement to the workshop)
- the dial or chart uses non-corresponding data (different proof, hours of elapsed time, weight, etc.)
- the subject may have eaten before drinking
- the subjects have different metabolism rates

When such a discrepancy occurs, these possibilities should be explained to participants.
ACTIVITY #7

9:30 - 11:30: HETEROGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

CAPSULE DESCRIPTION

The Governor's Representative opens this activity by addressing the group as a whole and stressing the importance of this activity to the workshop's success. He instructs participants to break into new small groups, these being organized heterogeneously by occupation. Referring to the Check Sheets developed in Activity #3, each group discusses and records the actions each type of official or agency can be expected to take to help solve the alcohol-traffic safety problem through a cooperative effort of all parties involved. During the activity, the Governor's Representative and the Chairman circulate among the small groups.
INTRODUCTION BY GOVERNOR'S REPRESENTATIVE

This morning's session is the logical follow-up to yesterday's Activity #3 in which we met homogeneously by profession and discussed and recorded what concrete actions we believe our profession should take and what reciprocal steps other agencies should take. This morning, we will break into small groups again, but this time they will be organized heterogeneously by occupation — that is, each group will contain one or more members from each set of officials represented at the workshop. Referring to the Check Sheets you filled in during Activity #3 yesterday, each group can then develop a sort of "game plan" or series of steps that it agrees on, as a group, that each agency or official should take to help solve the drinking-driver problem. It may not, of course, be possible for every group to iron out all disagreements between officials, but we do hope that through this interchange of ideas you will have at least initiated a constructive dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.

Note on your program which small group you are in for this activity and please proceed to the designated room location now.
ACTIVITY #7

INSTRUCTIONS FOR GROUP MODERATORS

NATURE OF THE ACTIVITY

This is the culminating activity of the workshop. Once again, participants will be planning and coordinating actions that each element in the alcohol-traffic safety countermeasures system could actually take to help solve the drinking-driver problem.

OBJECTIVE OF THE ACTIVITY

It is expected that each small group will emerge at the end of the activity with a series of realistic steps that each set of officials can implement once the workshop ends — steps that involve cooperation among all involved parties. As was indicated in Activity #3, it may not be possible for every small group to resolve all disagreements between officials, but it is expected that through this interchange of ideas officials from different agencies will have at least initiated a dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.

ROLE OF GROUP MODERATOR

Your responsibilities in this activity are primarily once again to elicit discussion and to help channel it in such a way that the members of your group leave the workshop either with a plan of cooperative action they intend to implement once the workshop ends and/or with a spirit of cooperation that will outlive the workshop and lead to future planning efforts.

Begin the session by allowing members a few minutes to review what they wrote on their Check Sheets in Activity #3. Then explain the objectives of the activity and the steps by which you plan to accomplish them. You will be able to do this once you yourself have digested the following
instructions. Make it very clear to participants that the group cannot expect to come to agreement on every step each agency should take to solve a particular aspect of the alcohol-traffic safety problem. Indicate that the group should not be discouraged if such agreement is not reached on every issue. In fact, it would be surprising if it did. Indicate that you do expect the group to find some areas of possible cooperative action and a willingness to explore these and additional areas of cooperation after the workshop ends.

Once you have given members a chance to review the Check Sheets and have explained the nature of the activity, initiate the discussion by asking for one agency's representatives to volunteer to describe what actions it plans and/or would like to take and what reciprocal cooperative actions it expects from each of the other agencies. You might initiate the discussion as follows:

"All right, we know that each of your agencies plans to or would like to take certain steps that require the cooperation of one or more other agencies represented within this very group. Would one of you please begin by explaining what actions your agency plans to or would like to take and what cooperation you need from the other agencies represented here if you are to be successful."

If no one volunteers, begin the discussion yourself by using your own agency as the initial example and responding to the above request yourself.

Discussion should flow easily from this point on. With an eye on the time limitations, lead the discussion from agency to agency until each agency's representatives has had an opportunity to explain what actions it plans to or wants to take. They may discuss these actions with the members of other agencies and should mention the cooperation they need. Of course, these other agencies will want to respond to these requests for cooperation; and this dialogue between agencies should be encouraged. What must be avoided is bitterness and recrimination, as for example where one agency accuses another of not doing its job, of passing the buck, or of not caring. The objective of the activity is to discover methods of cooperation between and among agencies that will help solve the drinking-driver problem. When you feel a conversation is not going to lead to cooperation, suggest the group should pass on to another issue, indicating that it is to be expected that cooperation cannot be achieved on every issue. This task of fostering a cooperative spirit is the most difficult and the most important one you will engage in during the workshop. Keep in mind, and where needed remind group members too, that cooperation cannot be expected on every item brought up for discussion.

You will have to carefully decide when a conversation is clearly unproductive and should be ended and when it is, while argumentative, nevertheless constructive and therefore should be allowed to continue. Anger
is not always a sign of unproductiveness, but it is a warning signal that the discussion may be approaching or has already reached the point of uselessness. Your most helpful guide in distinguishing between productive and unproductive conversation will be your own common sense.

At the end of the session, indicate your satisfaction with the way things have gone. Then ask the members of your group to select two to five cooperative actions between two or more agencies that these other agencies have actually agreed they will engage in or have agreed to discuss further after the workshop. Jot down briefly what these actions are (e.g., "police will supply courts with traffic records prior to sentencing") so you can report them to the workshop when you meet for the next activity, the wrap-up session.

At the beginning of your small group's discussion, bear in mind again the time limitations. At an appropriate time declare a coffee break. Allow about 20 minutes for each agency to discuss its actions with the other agencies. Make sure you have 10 minutes at the end of the activity to select the two to five sample cooperative actions for presentation.
To conclude the day, the Governor's Representative solicits the presentation by the Group Moderators of their groups' sample cooperative actions. He then gives a brief speech and the Chairman does the same. The Governor's Representative has participants fill out post-workshop evaluation forms. Upon collection of these forms, the Governor's Representative ends the workshop.
SMALL GROUP MODERATOR PRESENTATION OF SAMPLE COOPERATIVE ACTIONS

GOVERNOR'S REPRESENTATIVE'S SPEECH

While circulating from group to group this morning, I could tell that you were effectively planning cooperative actions between and among the various agencies you represent. Very briefly, I want each of the Group Moderators to describe to the group two or three examples of the type of cooperation their groups agreed upon. ______________(insert name of one of the Group Moderators), will you start?

(Group Moderators provide the requested descriptions.)
CLOSING ADDRESS BY GOVERNOR'S REPRESENTATIVE

As you can see, we have a variety of types of cooperation planned or proposed. As we stressed at the beginning of this workshop, our major objective has been for all of us to begin to explore ways in which we can cooperate more effectively than we have previously done in order to cope with the drinking-driver problem. I think it is clear that we have begun a dialogue and instilled a spirit of cooperation that we hope will continue and expand after the workshop ends. We also hope that those cooperative actions we have already identified here this afternoon as desirable and feasible are in fact implemented after the workshop ends and that further meetings are held among our agencies to ensure the success of those cooperative actions. I am convinced that taken together -- the planned cooperative actions, the dialogue initiated, and the spirit of cooperation instilled -- all of these achievements constitute an excellent and impressive contribution to helping solve the alcohol-traffic safety problem.

I will now ask the Chairman to make a few final remarks to us.
CONCLUDING SPEECH BY CHAIRMAN

It's been a pleasure to have been a part of such an important workshop. We all clearly understand the magnitude of the problem. The Governor's Representative and I can only accomplish a little in our efforts to curb the problem without continuous cooperation among the legislature, the judiciary, rehabilitation and treatment agencies, law enforcement agencies, public information and education agencies, and the Department of Motor Vehicles. Furthermore, it will be difficult for us to curb the problem without your continued efforts to further the spirit and fact of cooperation among agencies and among the members of your own particular agency. I hope that each of you will soon meet within your respective agencies to help imbue your colleagues with the spirit of cooperation exemplified here. The result will be that each agency, not just a few members of each agency, will share the notion that only through cooperation between and among agencies can we hope to reduce the tragic number of alcohol-related fatalities and accidents on our state's highways.

I thank you all for coming here and making this workshop a success.
GOVERNOR'S REPRESENTATIVE'S INSTRUCTIONS TO PARTICIPANTS FOR DISTRIBUTING AND
FILLING IN POST-WORKSHOP EVALUATION FORMS

Again I thank you for your time and attention, but there is one more vital thing I would like you to do. We will hand out a series of forms, similar to the ones you filled out at the beginning of this session. When the stack of papers reaches you, take one and pass the rest on. The purpose of these forms is to allow us to see how effective these workshops are and how we can improve them. They are not a means of grading your success here; they allow us to grade ourselves. You will notice that there is no way we can identify who has filled out any particular form. Please answer the questions as honestly as possible; don't try to spare our feelings. The forms are intended to be self-explanatory but feel free to ask questions at any time. Please hand these sheets to me when you are finished.
POST-WORKSHOP EVALUATION

Directions: Obviously this is the same form you filled out at the beginning of the workshop, with some additions. It is intended to provide us with an idea of how effective these sessions are and how they can be improved. Please answer the questions as honestly as possible; don't try to please us or spare our feelings.

Questionnaire:

1. Do you feel that the problem of alcohol-related traffic accidents is a serious one?
   ___ not very serious
   ___ serious
   ___ very serious

2. Do you feel that a concerted effort in this country could help solve this problem?
   ___ not much help at all
   ___ help some
   ___ help a lot

3. Do you feel that the problem is worth a major effort to solve?
   ___ definitely not
   ___ probably not
   ___ probably
   ___ definitely

4. If you answered Question #3 as "probably" or "definitely," whom would you involve in this effort? (check any or all)
   ___ police
   ___ prosecutors
   ___ judges
   ___ alcoholism rehabilitation and treatment professionals
   ___ state legislators (changing laws)
   ___ local government officials
   ___ Department of Motor Vehicles officials
   ___ the general public
   ___ others (specify) ____________________________
5. Do you feel that your agency alone without increased resources could make any significant contributions to helping solve the problem?
   — yes
   — no

6. Do you feel that what it could accomplish with its present resources would be worth the necessary redistribution of effort?
   — yes
   — no

7. Do you feel that it would be worth the redirected effort for your agency to try to influence other actors (those you checked in Question #4) to work together on this problem?
   — yes
   — no

8. Do you feel that any direct action on your part as an individual could help solve the problem?
   — yes
   — no

9. If yes, do you feel that helping to solve the problem would be worth the redirection of your personal efforts?
   — yes
   — no

10. Do you feel it would be worth your while to try to influence either your colleagues or the general public to increase their efforts to solve this problem?
    — yes
    — no

11. What pieces of specific information, if any, gave you this feeling?
WRAP-UP

12. Do you have any comments about how the training in this workshop might be improved?

13. Are there any substantive ideas you would like to add but didn't get a chance to mention during the workshop?

14. Do you feel that this day was well spent?
USE OF THE ATTITUDE EVALUATION FORMS

There are two sets of evaluation forms: a pre-test and a post-test. Both are very short exercises. The pre-test involves only closed-ended questions; the post-test repeats these questions and adds a few appropriate open-ended questions. The pre-test questionnaire should be administered at registration. The Chairman should be at the registration desk to ensure that each participant fills one out, to explain to participants the purpose of the pre-test, and to reduce potential participant anxiety about being tested. He should stress anonymity of response and the fact that the test is to evaluate the workshop organizers, not the participants. The test is designed to indicate how the organizers should alter the workshop format or activities if the tests indicate participants are not learning from them.

Use the following chart to analyze the results of the two tests. The analysis involves only counting answers to the closed-ended questions on both tests and comparing findings. The answers to the open-ended questions in the post-test should be carefully read for ideas and indications of possible changes in the conduct of the workshop.

Note that you will need to make multiple copies of the two tests for use in the workshop.
WRAP-UP

ANALYSIS OF RESULTS OF ATTITUDE EVALUATION FORMS

This should be a very short exercise, involving only counting answers to the short-answer questions. The long answers should be read for ideas and indications of possible changes in the conduct of the workshop. The third column won't be used now; there is a follow-up questionnaire that will be sent out later.

II-100
The most important responses are the answers to the open-ended questions. The analyst should go through these responses, listing the various actions contemplated by the participants, and count the number who mentioned each different action. To complete the evaluation of the workshop, compare all responses to questions on both the Pre- and Post-Workshop Evaluation Forms and determine the general trend of responses. Check this trend against the objectives of the workshop to see if they were achieved.
POST-WORKSHOP DEBRIEFING SESSION

It is a good idea to hold an evaluation session immediately following the workshop. The Group Moderators, the Governor's Representative, the Chairman and two or three of the participants can meet for a brief discussion. Topics for discussion should include the presentations made during the workshop, the audiovisual materials used, and the small group discussions. The kinds of questions that should be raised are: Were the films of any value? Were the presentations clear, precise, and valuable? Were the group discussions helpful in promoting understanding of how the system works, of what all the elements of the system are, and of what each agency both as a separate entity and as part of a system can do about the alcohol-traffic safety problem?

To conclude the evaluation session it might be useful to end on the question: What kind of follow-up workshops or other activities would be useful in supporting our efforts here today?
GOVERNOR'S REPRESENTATIVE PRE-WORKSHOP INSTRUCTIONS

1. LOGISTICS
2. WORKSHOP PARTICIPANTS
3. FORMATION OF SMALL GROUPS
4. FORMS TO BE DUPLICATED
5. CHECKLIST OF PRE-WORKSHOP TASKS
APPENDIX A

1. LOGISTICS

FACILITIES

State and local facilities will be used for the alcohol-traffic safety countermeasure workshop. The workshop should have no more than 40 participants. It requires one large conference room and five smaller conference rooms located nearby, each large enough to accommodate eight people. If these small conference rooms are unavailable it may be possible for the small groups to gather either around tables, or in circles in separate areas of one large conference room. These facilities should be selected, examined, and secured at least two weeks prior to the workshop.

The workshop may be conducted in cooperation with a college or university. If this is done, college or other academic credits can often be offered to workshop participants. Using college or university facilities helps reduce rental costs if it would otherwise be necessary to rent space. If renting workshop facilities when classes are in session is difficult, it may be possible to hold the workshop during school vacations. It may be inconvenient for participants to go to the college or university to register prior to the workshop. To avoid such a trip the school's registration materials can be handed out during the workshop registration.

LUNCH

Although lunch is not an important substantive part of the workshop, arrangements for it should be handled well in advance. Lunch should be served in the same building where the workshop is held so that participants will not wander off after lunch. If possible, reserve a room for lunch so that all participants can eat and converse together. If the morning workshop sessions have gone well, much informal conversation at lunch will center around the drinking-driver problem. Speeches should be avoided during lunch, as they interfere with participants' opportunity to have a relaxing break from the workshop sessions.
REGISTRATION

A Registration Desk should be set up at the entrance to the large conference room. The desk should be supervised by a secretary who has been fully briefed on all registration procedures. As each participant registers for the workshop, he is given his workshop folder. These folders must be prepared in advance and should have the participant’s name, group number, and room number (for small group discussions) on the cover. The Pre-Workshop Evaluation form is filled out by the participants during registration and collected by the Governor’s Representative and/or the Chairman.
APPENDIX A

2. WORKSHOP PARTICIPANTS

Five categories of participants, not including the Governor's Representative, will attend the workshop. These groups are:

a. Twenty to forty relevant local officials and other citizens;

b. Four or five Group Moderators (plus two alternates) selected from among the 20 to 40 participants; and

c. Four or five Rehabilitation and Treatment Panel Members selected from among the 20 to 40 participants;

d. The Chairman, a respected local official with alcohol-highway traffic safety responsibility and experience, who hosts the workshop.

e. News Media (optional)

In the following section, detailed descriptions are given of the procedures that the Governor's Representative should follow in selecting each participant. Included are sample letters of introduction inviting participants to attend the workshop and samples of other materials that the Governor's Representative will need to send to them. Participants' responsibilities in the workshop are also described.
a. LOCAL OFFICIALS

SELECTION

In selecting participants for the workshop, it is important to invite a representative sample of those individuals and/or agencies that have responsibility for alcohol-highway traffic safety.

Top local government (elected) officials should receive invitations because many of these officials have power to initiate change. Examples of the kinds of elected officials that should be invited include the Mayor, County Commissioner, city councilmen, the city administrator, aldermen, and city manager.

Second, representatives from all the agencies directly involved in alcohol-highway traffic safety should be present. Participants in this workshop should represent all of the following functions in the alcohol-traffic safety system: law enforcement, judiciary, (prosecution, pre-sentence investigation, probation, all important appropriate court levels) rehabilitation (government and private), public information, and public education (driver's education, primary and secondary school administrators).

Third, those local residents who may play a key role in alcohol-highway traffic safety should be invited. Typically, these include non-elected representatives of political parties, officers of service organizations like Kiwanis, retired public officials, etc. This category of individuals is a particularly hard group to select because the workshop is designed for a maximum of forty people, and only individuals or agencies that do or should have a direct role in the problem should attend.

For assistance in identifying, selecting, and inviting participants, an informal panel should be established that consists of one key member of each of the relevant agencies and groups. This panel will be able to identify, for example, what rehabilitation agency officials to invite and will be able to help ensure that those who are invited attend.

Invitations should specify that the respondent acknowledge his acceptance or refusal. (See page III-9 for sample invitation.) All invitations should be mailed not later than six weeks in advance so that the Governor's representative will have enough time to issue invitations to other potential participants should a significant number of the originally invited participants decline to attend. Each workshop should have no fewer than 20 participants.

III-5 1'8
APPENDIX A

The letter to prospective participants should include the following items:

1. Letter of invitation (see page III-9)
2. Response form (see page III-10)
3. Workshop schedule (see page I-10)
4. Travel and accommodations information (see page III-12)
5. Self-addressed stamped envelope for returning response form.

If possible, it is highly desirable that the Governor or some other high state official sign the letter of invitation to stress the importance the state attaches to the workshop.

Local officials are busy men and may be reluctant to leave their desks for two days to attend one of many conferences they are invited to every year. Somehow this workshop must be seen as different from others to which officials are invited. To help make this workshop seem distinctive and to motivate officials to attend, the Governor's Representative can follow up the letters of invitation with personal phone calls.
SAMPLE LETTER OF INVITATION TO PARTICIPANTS

(Governor's Letterhead)

(date)

Mr. William Official
Local Official's Agency
Boston, Massachusetts 02116

Dear Mr. Official:

As you know, the number of people killed and injured on our highways in alcohol-related crashes has reached intolerable proportions. We are mounting a massive state campaign to counteract this carnage on the highways. As part of this campaign, we are hosting several alcohol-traffic safety workshops in an attempt to involve the courts, state officials, the police, rehabilitation and treatment agencies, and other relevant groups in a joint effort to cope with the problem. You have been recommended to me as a participant in this particular workshop for local officials and citizens.

We know that the control of the drinker-driver is a complex problem. We expect this workshop will materially assist you in coming to grips with this problem by initiating and furthering contact among the various local officials and agencies that share responsibility for alcohol-traffic safety.

The workshop will consist of a one and one-half day discussion and presentation of systematic approaches to handling drinker-drivers. I have enclosed a brief outline of the workshop proceedings for your perusal. The date of the workshop will be __________ (fill in date workshop will be held). I have also enclosed an information card and ask that you please return it, indicating whether you will be able to attend. My Highway Safety Representative plans to telephone you shortly to explain in more detail than this letter permits, the nature and great importance of this workshop, and my strong concern that you attend.

I am enclosing information about travel to and from the workshop which you may find useful. Please call (insert name of Governor's Representative) collect if you have any questions.

Sincerely,

(insert name of Governor)
Governor

Enclosures

III-7
SAMPLE RESPONSE TO INVITATION TO PARTICIPANTS

1. I ___ do ___ do not plan to attend.

2. I do plan to attend and would appreciate your calling me to explain the workshop in more detail.
   ___yes ___no

3. I am not sure if I can attend but would appreciate your calling me to explain the workshop in more detail.
   ______yes ______no

4. I cannot attend but I recommend you contact the following individual(s) who would be excellent participants for what you have in mind:

   Name: ____________________________
   Address: ____________________________
   Telephone: ____________________________

   Name: ____________________________
   Address: ____________________________
   Telephone: ____________________________

   Name: ____________________________
   Address: ____________________________
   Telephone: ____________________________

5. Important information about myself: (Complete only if you plan to attend.)
   a) Name: ____________________________
   b) Agency: ____________________________
   c) Position in agency: ____________________________
   d) Alcohol-traffic safety responsibility:
      ____________________________
      ____________________________
      ____________________________
TRAVEL INSTRUCTIONS

The Governor's Representative should send all potential participants travel information in the letters of invitation. This should cover the following items:

1. Days conference will be held
2. Exact address of conference facilities
3. Nearest hotel accommodations and rates, if appropriate
4. Airlines that serve the workshop location
5. Transportation information from the airport to the workshop location, including:
   - taxi fares
   - availability of limousine service
   - availability of bus transportation
   - bus and/or limousine rates
6. Telephone numbers where workshop administrator(s) can be reached
7. Time of arrival, including:
   - the best time to arrive at airport to catch limousines, bus, or cab
   - time the conference starts

This information will greatly reduce the problems participants often have when they make their own travel arrangements. It will also help ensure that participants arrive on time.
SAMPLE TRAVEL INFORMATION

The Local Officials Alcohol-Traffic Safety Workshop will be held at the Department of Transportation (DOT) Regional Office, 55 Wheeler Street, Cambridge, Massachusetts on February 5 and 6, 1973. Registration will begin promptly at 9:00 a.m. The workshop will begin promptly at 9:30.

If you plan to arrive the night before the conference, the nearest accommodation is the Homestead Inn, 429 Fresh Pond Circle, Cambridge. Room rates are $15.00/day for a single, $20.00/day for a double. The Homestead is within easy walking distance of the DOT Regional Office.

Allegheny Airlines services Boston from all airports within the state; maximum air fare is $30.00 from Springfield. However, it should be easier to drive from almost any point in the state since maximum driving time from the greatest distance is 2-1/2 hours. If you plan to drive, allow 1/2 hour to locate the facilities (see enclosed map).

Bus transportation and limousine service are not available from Boston's Logan Airport. It will be necessary to take a taxi cab. The cost from the airport to the conference facilities is approximately $5.00, and the driving time is about 1/2 hour. It will be necessary to arrive at Logan Airport no later than 8:30 a.m. in order to arrive at the conference in time. We strongly recommend you arrive the evening before.

In case of complications or questions, contact John Doe at 617-492-7100.
b. GROUP MODERATORS

The Governor's representative selects five participants from among the core participants to serve as Group Moderators. He also chooses two alternates to be Group Moderators in the event that any of the scheduled Group Moderators fails to show up.

Selection of potential Group Moderators must await return of the acceptance-rejection form by the 40 participants who were originally invited to the workshop. Upon receipt of these forms, seven of those prospective participants who accepted the invitation and meet the Group Moderator selection criteria can then be sent the enclosed cover letter and Group Moderator Instructions (Appendix B). One Group Moderator should be selected from each of the major agencies represented. Neither of the alternates should be rehabilitation professionals because one small group activity excludes them from participation.

Criteria for selecting Group Moderators are that they have the ability to talk freely and coherently in small group settings and the ability to command the respect of fellow participants. There is no sure method for discovering who among the core participants meets these criteria. However, when selecting core participants, certain individuals will no doubt be mentioned as meeting them. In addition, two or three well-qualified participants may already be known to the Governor's Representative or his staff.

Once again, it is highly desirable that the Governor or some other high state official sign the invitation to indicate the importance the state attaches to the workshop. After waiting a week, follow the letter of invitation to the prospective Group Moderators with a phone call soliciting their acceptance and providing them with additional information about their role as Group Moderators.
SAMPLE LETTER OF INVITATION TO GROUP MODERATORS

(Governor's Letterhead)

(date)

Mr. Group Moderator
50-50 Balance Lane
Middletown, Lt. 02020

Dear Mr. Moderator:

As you already know by your acceptance of our invitation to participate in the Local Officials Alcohol-Traffic Safety Workshop, we will be holding the workshop on ___________ (fill in date workshop will be held). I am extremely pleased you have accepted the invitation.

As part of the conference, we will need five Group Moderators to facilitate small group discussions that are an essential part of the workshop activities. We feel that your background and experience qualify you to be one of these Group Moderators. We hope that you will be interested in accepting this position. It does not entail any undue additional work either prior to or during the workshop. You will have additional responsibility, but we feel that you have amply demonstrated in the past that you exercise such responsibility exceptionally well.

Briefly, we are asking you to moderate four small group activities. This involves facilitating an atmosphere in which there will be a free and open discussion of the issues. In the following materials, these discussions take place in Activities #1, 3, 5, and 7.

In the first activity, participants, who have formed into five small groups, answer a series of questions about drinking and driving issues. In the second, each group discusses steps which local agencies might take in a systematic alcohol-traffic safety countermeasure effort. The third small group activity is a very short discussion of possible treatment modalities for problem drinker-drivers. The last activity that takes place in the small groups centers on concrete, coordinated plans for controlling the drinking-driver.
In all four activities, group discussions are intended to elicit the opinions, experiences, and expectations of the participants. While the training materials contain some descriptions of prior and current efforts to deal with the drinking-driver, we are not assuming or expecting that any particular conclusions will be reached by any group. The job we are asking you to do is to facilitate, not teach.

In a few days my Highway Safety Representative, __________ (fill in name), will call you to find out if you will be able to assume the role of a Group Moderator in the workshop. I would appreciate your giving full consideration to sharing this important responsibility with us.

Sincerely yours,

(insert name of Governor)
Governor

Enclosures

(The letter to the Group Moderators also includes a full copy of their instructions. See Appendix B, pages III-31 - 75.)
APPENDIX A

c. REHABILITATION AND TREATMENT PANEL MEMBERS

INSTRUCTIONS ON BRIEFING THE REHABILITATION AND TREATMENT PANEL MEMBERS FOR THEIR ROLE IN ACTIVITY #5

Contact the rehabilitation-treatment participants of the workshop as soon as they have agreed to participate. Forward them a copy of the complete instructions to Activity #5, which includes a discussion of their envisaged role. In the letter indicate that you feel their participation in this panel discussion is very important and that you will be contacting them by phone within a week to see if they are willing to be a panel member. When you call, arrange to meet with them if you feel such a meeting is desirable. Review over the telephone what their role (as detailed in the instructions to Activity #5) will be and remind them that the only advance preparation they need is to develop a list of facilities in the community and the modalities they employ that are available for problem drinker-driver referrals. Stress once again that their presentations are to be very short — no more than five minutes apiece. Encourage them to show up at the workshop early so that they can confer with you or your staff on any questions they may have thought of in the interval between your phone call (or meeting) and their arrival.
Selection of a workshop Chairman is of the utmost importance. Participants who may listen politely to an "outsider" talking to them about their work will pay infinitely more attention if someone from their field whom they respect gives his "seal of approval" to the workshop. The Chairman should therefore be:

1. A respected local official with experience and responsibility in alcohol highway-traffic safety;
2. Someone with whom the participants are already familiar through personal contact, publicity, or general good reputation;
3. Someone who has magnetic appeal or charisma and can "turn on" an audience;
4. Someone, in short, who will inspire the participants with the feeling that if he is present and actively involved in the workshop, it must be a valuable event.

The Chairman will have the following functions to perform before and during the workshop.

1. He will meet with the Governor's Representative prior to the workshop to review and suggest revisions in the workshop program and, in particular, to discuss his role in the workshop.
2. He will make an introductory speech at the beginning of the workshop; present the magnitude, nature, and scope of the drinking-driver problem; and present a lecture on current systems approaches to solving the drinking-driver problem.
3. He will be available during the workshop to answer questions from participants.
4. He will make a concluding statement at the close of the workshop.
You may want to decrease or increase the Chairman's tasks, depending on how much work he is willing to perform, how much of the work you want to delegate, and the extent to which workshop participants are likely to respond to his leadership. For example, you may not want to alternate with him in giving introductions and directing activities during the workshop. You may prefer instead either to administer most of these introductions and directions yourself or to have him administer most of them.

You may already be familiar with the names of two or three individuals who would be good chairmen. If not, you can solicit suggestions from local officials and agencies. If several officials recommend the same individual(s), your task is simplified by this corroborative evidence of appropriateness. If none of these solicited groups recommends the same individual(s), you will have to select from among all of the recommended individuals those you feel most closely meet the criteria listed above.

When you have two or three prospects, telephone the best one first and explain that you and the Governor expect to be holding a workshop with local officials and:

1. Explain the nature of the workshop in detail;
2. Elaborate what his role will be and why it is important that he, in particular, be the Chairman;
3. Indicate that the Governor feels strongly that he would be the best man for the job; and
4. Stress that he will need some advance preparation but that he will receive all necessary assistance.

If he is interested, follow up the call with a formal letter of invitation (see sample letter on page III-20) and schedule a preliminary meeting. At this meeting you should cover the following points:

1. Review in detail what his role will be at the workshop;
2. Review his prepared speeches, indicating that he is welcome to revise or even rewrite them, provided you can review and approve a copy of his revisions prior to the workshop;
3. Actively solicit his suggestions for improving the workshop. Even better, actually involve him in the development process, for the more he participates in its development, the more he will feel he has a stake in its success. In any case, it is likely he will have some good ideas.
4. Schedule his arrival the day before the workshop so that he can have dinner with you and review last-minute developments and revisions.

Should the initial prospect not be interested and/or available, contact the next person on your list, and so on down the line.

Above all, make the Chairman an integral part of the workshop, for if he is a person well-known and respected by the participants, they will begin the workshop with a positive attitude that you can build upon during the rest of the workshop.
SAMPLE LETTER OF INVITATION TO PROSPECTIVE WORKSHOP CHAIRMAN

(Governor's Representative Letterhead)

(date)

Mr. L. Official
Local Agency
1776 Independence Avenue, S.W.
Washington, D. C. 02173

Dear Mr. Official:

As you are aware from our earlier conversation, we are holding a series of very important workshops on alcohol-highway traffic safety. The number of people killed and injured on our highways in alcohol-related crashes has reached intolerable proportions. As a result, we are mounting a massive state campaign to counteract this carnage on the highways. As a part of this campaign we are conducting several workshops in an attempt to involve local officials, alcohol rehabilitation and treatment professionals, the courts, state officials, the police, and other relevant groups in a joint effort to cope with this problem.

You have been repeatedly recommended to us as a prospective Chairman for one of these workshops, the one for local officials with responsibility for alcohol-traffic safety. Your participation in this capacity would greatly assist us. The workshop will last one and one-half days. At the workshop we will discuss and present current approaches used to handle problem drinker-drivers. I have enclosed a brief outline of the workshop's planned proceedings for your perusal. The workshop will be held on _______________(fill in date of workshop).

We would like you, as the Chairman, to lend your expertise and experience in the field of alcohol-highway traffic safety to this workshop. Your responsibilities would involve:

1. Making an introductory speech that has already been written, but that you may revise or rewrite as you and I see fit;
2. Presenting a pre-written but alterable speech on the nature and scope of the drinking-driver problem;
3. Giving a pre-written lecture on current systems approaches to solving the drinking-driver problem;
4. Making a brief concluding statement at the close of the workshop that also has already been written but that you may revise or rewrite as needed.

Of course, your responsibilities can be revised if necessary.

I sincerely hope you will be able to act as Chairman at this workshop, as your presence would greatly help to motivate participants to reduce the alarming number of alcohol-related crashes on our highways.

In approximately one week, my Highway Safety Representative, (insert name), will be calling you to answer any questions regarding what your role as chairman would involve. He will be able to make an appointment at that time to meet with you for further discussions. He will also be able to furnish you with all the materials you will need to participate in the workshop. In the meantime, feel free to call him at any time if you have any questions.

Sincerely,

(insert name of Governor)

Governor

Enclosures

(This letter to the prospective workshop Chairman should also include copies of the Workshop schedule and outline.)
e. NEWS MEDIA

Members of the press can be invited to observe part or all of the workshop. This will help publicize the problem of alcohol-traffic safety and will help educate the mass media to the necessity of transmitting the drinking and driving message to the general public. If media representatives attend, they should be fully briefed about the workshop before it begins and be given an opportunity to have questions answered when it ends.
3. FORMATION OF SMALL GROUPS

Once participants have indicated whether or not they plan to attend, the Governor's Representative and his staff will need to develop two participant lists of five small groups each. The first list is for Activities #1, 5, and 7. For this list there must be no more than five agencies under discussion. If a greater number is represented, they should be divided (but not assigned to groups) by similar function and distributed among the groups. Suggested categories (but by no means the only possibilities) are:

- Law enforcement and DMV;
- Legislature;
- Rehabilitation-treatment;
- Public information and education;
- Judicial.

The easiest way to form the groups is to write the names of the participants on cards, along with the agency each represents. Then place the cards in five piles corresponding to the agencies. Distribute the represented agencies as equitably as possible into five new groups. Number the groups from 1 to 5. Then label each name card according to the group number (one to five) it finally ended up in.

When this has been done, indicate on each participant's folder what his small group assignment is for Activities #1, 5, and 7.

Assigning participants to groups for Activity #3 is easy. Simply put all those participants who work in the same agency or type of agency (e.g., legislature, law enforcement, etc.) into the same group. Again, note the small group assignment for each participant for Activity #3 in each participant's folder. It is important to form these groups in advance of the workshop and to include each participant's two group assignments in his workshop folder for convenient reference during the workshop.
4. FORMS TO BE DUPLICATED

Listed below are the locations in the Manual of all forms needed to conduct the workshop. Enough forms must be duplicated so that each participant can receive a copy of every form.

1. Registration form. This is the only form not provided in the Manual. The Governor's Representative must develop one.
2. Pre-Workshop Evaluation Form, pages II-6 - 7
3. Information Inventory, pages II-28 - 31
4. Information Inventory Answer Sheet, page II-49
5. Three Check Sheets for Activity #3, pages II-63 - 65
6. Post-Workshop Evaluation Form, page II-110 - 112
5. CHECK LIST OF PRE-WORKSHOP TASKS

The following chart is a check list of tasks the Governor's Representative should complete in preparation for the workshop. The chart has been organized into three tracks:

- TRACK I lists tasks to be performed in selecting and inviting participants, including the Group Moderators. Most of these tasks must be performed in sequence -- that is, one task cannot be performed until the previous one has been completed. For example, the Group Moderators cannot be selected until prospective participants have indicated they will attend the workshop, because the selection of Group Moderators will come from the pool of participants.

- TRACK II lists tasks to be performed in selecting, inviting, and working with the Chairman. All the tasks in this TRACK may be undertaken independently of the tasks in either TRACK I or III.

- TRACK III lists tasks related to the mechanics of conducting the workshop -- facilities and materials. All the tasks in this track may be undertaken independently of the tasks in either of the other two tracks.

Needless to say, it is crucial that certain tasks be completed well in advance of the workshop. The Governor's Representative may find it useful to indicate expected dates of completion for each task in the right-hand margin of each track. Such a timetable for completion of each task will help the Governor's Representative to closely control the workshop preparations.

It is suggested that duplicate copies be made of this check list and the master kept intact for future use. The individuals involved in workshop preparations should have their own copy with notations indicating which specific tasks they are responsible for carrying out and the date by which they are expected to have completed them.
APPENDIX A

TRACK I: PARTICIPANTS

A. PRELIMINARY TASKS

1. Determine days of week for workshop
2. Determine dates for workshop
3. Fill in data on sample schedule
4. Write travel instructions
5. Duplicate:
   a. 100 copies of schedule
   b. 50 copies of response form
   c. 10 copies of instructions to group moderators
   d. 50 copies of travel instructions
   e. 50 copies answer sheet to Inventory

B. SELECT PARTICIPANTS

1. Select likely prospects
2. Type letter of invitation
3. Have Governor sign letters
4. Type return address envelope
5. Assemble letter, including
   a. cover letter
   b. schedule
   c. travel instructions
   d. response forms
   e. return address envelope
6. Mail packets
7. Tabulate Responses
   a. Repeat steps in B if fewer than 25 prospects accept
   b. Prepare name tags
8. Notify panel members
   a. send letter
   b. send instructions to Activity #5
   c. telephone

C. SELECT GROUP MODERATORS

1. Select appropriate prospects
2. Type letters of invitation
3. Have Governor sign letters
4. Mail with Group Moderator instructions
5. Telephone
6. Repeat steps in C if fewer than 5 prospects accept
7. Prepare name tags

APPENDIX A

TRACK II: CHAIRMAN

A. DUPLICATE:

1. Instructions to Chairman
2. Copy of instructions to Group Moderators

B. INVITATIONS

1. Select prospect(s)
2. Telephone
3. Type formal letter of introduction
4. Have Governor sign letter
5. Send letter with workshop schedule

C. MEETINGS
APPENDIX A

TRACK III: MECHANICS

A. FACILITIES

1. Examine, select, and reserve facilities
2. Arrange lunch
3. Brief secretary on registration procedure
4. Fill in last page of Chairman's opening speech on facilities
5. Arrange for Alcohol Awareness Seminar

B. MATERIALS

1. Audiovisual
   a. Order films
   b. Preview films
   c. Examine facilities to determine equipment needs
   d. Order equipment
2. Packets
   a. Write resources list
   b. Send for packet materials
   c. Duplicate 50 copies of
      1. Schedule
      2. Resource list
      3. Information Inventory
      4. Three Check Sheets for Activity #3
   d. Buy packet envelopes
   e. Assemble packet
      (See pp. III-87 - 89 of manual for contents)
3. Duplicate Evaluation Forms (Tests)
4. Complete Activity #2 for local and state statistics

C. DAY PRIOR TO WORKSHOP

1. Pick up, set up, and test audio-visual equipment
2. Set up Registration Desk
   a. packets-handouts
   b. pre-tests

by whom when

SUMMARY OF WORKSHOP ACTIVITIES

REGISTRATION AND PRE-TEST

Registration is between 9:00 and 9:30 a.m. If possible, two assistants should supervise the Registration Desk where participants fill in the initial evaluation form and pick up their packets of information.

INTRODUCTIONS BY THE GOVERNOR'S REPRESENTATIVE

This section is a description of the purpose of the workshop, a rough outline of events, an introduction to the principal actors, and an outline of the basic instructions for the first exercise.

ACTIVITY #1: INTRODUCTORY EXERCISE

The participants work in small groups. Collectively, they work on providing answers to a series of multiple-choice and true-false questions on the nature and scope of the problem and various countermeasures. The Governor's Representative emphasizes that, despite the form it takes, this exercise is not a quiz. In addition, each group does not submit its responses; instead, each participant records his group's answers, along with any individual comments or disagreements that he wishes to note.

In order to maintain interest, the exercise is brief. Any questions left unanswered by the group remain unanswered until the end of Activity #2. The Governor's Representative develops a few questions dealing with his specific state, including accident rates, enforcement statistics, and countermeasure programs. At the end of the exercise, the Governor's Representative asks the participants to be patient; many of their questions will be answered during the following activities.
APPENDIX B

COFFEE BREAK

Because participants are not given the correct answers to the Inventory, they may be interested in comparing their responses. A coffee break at this time gives them the opportunity to do this.

ACTIVITY #2: NATURE AND SCOPE OF THE PROBLEM

This exercise provides the factual basis for the rest of the workshop. It consists of a slide-talk followed by a film. The talk covers the most important points concerning the magnitude and nature of the drinking-driver problem. The film dramatically provides additional details about the effects of alcohol on driving.

It is especially important that this exercise follow and not precede the Information Inventory. The Information Inventory exercise should demonstrate to participants that there are relevant facts about the drinker-driver that they do not know. Without this clear indication of their lack of knowledge some participants may feel offended by the elementary nature of the points covered in Activity #2.

After the film in Activity #2, answer sheets for the Information Inventory are handed out. This is followed by a discussion period, during which the Governor's Representative, the Chairman, and anyone else who has something to contribute, explain any of the issues that participants have questions about. The Governor's Representative is provided with a discussion guide that contains answers to the Information Inventory questions. He must provide answers to questions about his particular state. Participants emerge from this session with an understanding of the nature and the scope of the problem on the national and state levels.

ACTIVITY #3: HOMOGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

This activity has several parts, all dealing with the interrelationships among the various actors in the alcohol-traffic safety countermeasure system. In small groups participants discuss the nature of the system, its interrelationships, the deficiencies in the present system, the constraints operating upon individual actors, and recommendations for solutions to these problems.
ACTIVITY #4: CURRENT APPROACHES

This is a presentation of the approaches currently being used to deal with the drinking-driver problem.

ACTIVITY #5: REHABILITATION AGENCIES PANEL DISCUSSION

Participants view a thirty-minute film depicting the processing of a DWI case from arrest through trial. They then break into small groups to discuss which treatment modality they would choose for the defendant. After this, the rehabilitation and treatment agency participants form a panel which responds to the measures advocated by the small groups; suggests its own rehabilitation measures; gives a brief presentation about the availability of treatment and rehabilitation services in the local community; and responds to questions about these facilities and about rehabilitation and treatment in general.

ALCOHOL AWARENESS SEMINAR

The seminar takes the form of a cocktail party, with a few major variations. Two breath-analysis machines, along with trained operators, are provided. Periodically, participants have their BAC measured. The results are recorded on a tag which they wear so that the effects of various BAC levels on different people can be observed. One participant can be asked to become especially intoxicated, to either the .10 or .15 level, so that extreme intoxication can be observed.

If possible, one or two driving simulators are provided so that the effects of alcohol on driving can be simulated by the participants.

ACTIVITY #6: DISCUSSION OF BAC LEVELS

This is the first activity of the second day. It consists of a discussion of behavior and perceptions at various BAC levels, with particular attention directed to the impairment of driving ability.
ACTIVITY #7: HETEROGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

Small groups are organized heterogeneously by occupation. Using the Check Lists developed in Activity #3, the groups discuss and record the actions each type of official or agency can be expected to take to help solve the alcohol-traffic safety problem through a cooperative effort of all parties involved in the system.

WRAP-UP

A brief summary of the findings of the workshop is now presented with emphasis on the need for cooperative action among agencies. The speech also points out the usefulness of individual agency actions. The resources of the Governor's Representative's office and the National Highway Traffic Safety Administration are explained. Participants are thanked and asked to fill out a brief post-workshop evaluation form.
9:30 - 10:00: INTRODUCTIONS

CAPSULE DESCRIPTION

The Governor's Representative opens the workshop promptly at 9:30 a.m. with an introductory speech. He then introduces the Chairman, who in turn makes an introductory speech that explains the team approach to dealing with the drinker-driver. Both speeches should end before 10:00 a.m.
APPENDIX B (ACTIVITY #1)

10:00 - 10:30: INTRODUCTORY EXERCISE

CAPSULE DESCRIPTION

The workshop divides into small groups led by the Group Moderators. Using an Information Inventory Form, the members of each small group jointly answer as many questions as possible during the time allotted. Each person notes on his question sheet his group's responses, as well as any personal comments. None of the answer sheets is handed in, but for the sake of coordination the Group Moderators take written or mental notes of their groups' responses.
GENERAL INSTRUCTIONS FOR GOVERNOR'S REPRESENTATIVE AND GROUP MODERATORS

This exercise involves answering questions on an information survey. Each group jointly answers as many questions as it can in the time allotted. The Group Moderators note their group's answers and facilitate discussion concerning them. They keep the group moving from question to question and prevent spending too much time on any one question. They point out that the answers will not be collected and therefore it is not important to make sure they are all absolutely correct. It is advisable for participants to record their group's answers on their question sheets along with any disagreements or comments they may have. These will be helpful during the discussion period later. Following the next activity, which will provide answers to many of the questions in the Information Inventory, each participant will be provided with an answer sheet and an opportunity to discuss further any of the questions.

This activity serves two purposes. It involves participants in group work. To facilitate this, the Group Moderators should have each member of their group introduce himself briefly at the beginning of the activity. The activity also demonstrates the extent to which participants have (or lack) an understanding of the scope and nature of the problem. The form of the exercise is that of a quiz. However, the Governor's Representative should attempt to remove any feelings of quiz-like pressure.

The Governor's Representative can improve this exercise by adding to it questions about the drinking-driver situation in his state. A form on which to summarize these data is provided in Activity #2.
SAMPLE INTRODUCTORY SPEECH BY GOVERNOR’S REPRESENTATIVE

For our first exercise, I will ask you to divide into small groups. Your name tags indicate which small group you belong in. (Indicate where each group meets.) Each of you will be given a list of multiple-choice and true-false questions. This is not a quiz. Rather, it is designed to determine what you think the facts are about drinking and driving and to allow you to see what kinds of questions merit further investigation. Together, each group is to come up with as many answers as it can in 20 minutes. You will record your answers on answer sheets. These sheets will not be collected but will serve as the basis for later discussion. While you may know the answers to many of the questions, you may have to make educated guesses about some.

After completing the exercise we will have a coffee break and then a presentation that will answer many of the questions raised by the exercise. After that, we will distribute answer sheets which will provide the basis for an open discussion. Therefore, each of you will probably want to note on your question sheet your group’s responses and any additional comments you would like to make.
LIST OF QUESTIONS FOR ACTIVITY #1: INFORMATION INVENTORY

1) What is the Blood Alcohol Concentration (BAC) level presumptive of legal intoxication in this state?
   a) .05%
   b) .08%
   c) .10%
   d) .15%
   e) .20%

2) Approximately how many drinks (one-ounce shot of 86-proof whiskey, twelve-ounce can of beer, or four-ounce glass of wine) would a 175-pound man have to consume to reach this BAC? Assume that he drinks them within an hour's time and that he has not eaten for at least three hours.
   a) three
   b) six
   c) nine

3) Which of the methods listed below effectively sobers up a person so that he will be able to drive safely? (circle one or more)
   a) black coffee
   b) waiting as long as is necessary
   c) cold shower (or a dip in a swimming pool, lake, etc)
   d) hot shower, steam bath, sauna
   e) a shock (like an auto accident, or near miss)
   f) exercise
   g) fresh air
   h) none of the above

4) True or false: One or two drinks of alcohol sharpen your driving skills.
APPENDIX B (ACTIVITY #1)

5) When a 175-pound man has had nine standard drinks on an empty stomach two hours before driving, what do you think his chances are of being involved in an accident?

a) 2 times greater than when he is sober
b) 5 times greater than when he is sober
c) 25 times greater than when he is sober

6) In most states, what proportion of the drivers arrested for driving while intoxicated do you think have had a previous arrest for DWI?

a) 1 in 2
b) 1 in 10
c) 1 in 25

7) In most states, what percentage of the drivers arrested for DWI do you think are already known to community service agencies for having other alcohol problems?

a) 10%
b) 50%
c) 30%

8) Approximately how many people were killed last year in traffic accidents in this country?

a) 5,000
b) 25,000
c) 50,000
d) 100,000

9) Approximately what percentage of these deaths involved drinker-drivers or drinking pedestrians?

a) 25%
b) 50%
c) 75%
10) What percentage of those accidents in which blameless drivers were killed was caused by drinking drivers?
   a) 15%
   b) 45%
   c) 75%

11) On the average, people arrested for DWI have Blood Alcohol Concentrations that would result from a 175-pound man drinking how many drinks in an hour?
   a) 3
   b) 6
   c) 10

12) Alcohol is medically considered:
   a) a stimulant
   b) a depressant
   c) both
   d) neither

13) In California a study was made of the records of traffic violations of all types. What percentage of people who had had their licenses revoked were caught driving without a license?
   a) 15%
   b) 35%
   c) 65%

14) True or false: In most states, when a person is stopped for a DWI violation, his record is usually checked for previous violations (at least those violations which took place within the state).

15) True or false: In most states alcohol is involved in more run-of-the-mill crashes than in serious crashes.
16) True or false: Alcohol-related crashes typically involve drivers with BACs that are at very high levels rarely found among drivers who do not get into accidents.

17) What proportion of adult pedestrians hit by vehicles are under the influence of alcohol?
   a) 10%
   b) 40%
   c) 80%

18) True or false: Since few alcoholics own cars, they do not contribute significantly to the drinking-driver problem.

19) True or false: Very few convicted drinker-drivers have ever been involved in any crime (such as drunk and disorderly) other than DWI.

20) True or false: Two-and-a-half times as many people are killed in alcohol-related automobile accidents as are killed in willful murders.

21) True or false: Five times as many people are injured in alcohol-related car accidents as are hurt in crimes against persons (muggings, assaults, etc.).
10:45 - 11:45: NATURE AND SCOPE OF THE PROBLEM

CAPSULE DESCRIPTION

In this activity there is a brief slide presentation by the Chairman about the magnitude of the national alcohol-highway traffic safety problem. It is followed by a film, Point Zero Eight, which describes a driving experiment conducted in Canada and shows the effects of alcohol on driving ability. Following the film presentation, the Governor's Representative conducts a brief discussion in which he reviews the answers to the questions participants dealt with in Activity #1.
APPENDIX B (ACTIVITY #3)

1:00 - 3:00: HOMOGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

CAPSULE DESCRIPTION

In this activity introduced by the Governor's Representative, participants break into small groups that are organized homogeneously by type of official. Each group discusses cooperative steps which all elements in the alcohol-traffic safety countermeasure system can be expected to take. During the activity the Governor's Representative and the Chairman circulate among the small groups, listen to the discussions, and make comments only when appropriate. Rather than jump from group to group, they should spend about twenty minutes with each group.
This next activity is closely linked with tomorrow's final activity. In both activities we will be planning actions that each agency in the alcohol-traffic safety countermeasure system can actually take to help solve the problem — the agencies being the legislature, the courts, the Department of Motor Vehicles, and law enforcement, public education, and rehabilitation and treatment agencies. The actions we are concerned about are those that we could take in cooperation with each other.

For this activity we are going to break into small groups that are arranged homogeneously by type of official: all rehabilitation and treatment professionals will be together in one group, all judges will be together in another group, and so on. In each of these groups you will be discussing specific steps which members of your set of officials can be expected to take in cooperation with each of the other types of officials to help solve the drinking-driver problem. You will also discuss what reciprocal steps you expect each of the other professions to take in cooperation with your plan of action. The Group Moderators will be able to explain to you in detail how we will conduct this small group session.

You all have in your folders blank sheets of paper to record in outline form the precise steps that your profession and others should be expected to take. You will need the sheets tomorrow so don't misplace them.
APPENDIX B (ACTIVITY #3)

Tomorrow we will break into small groups again, but at that time they will be arranged heterogeneously by profession -- that is, each group will contain one or more members from each set of officials represented at the workshop. Then each small group will share its ideas on what steps should be taken to cope with the drinking-driver problem and resolve any differences between the officials. Our expectation is that each small group will emerge tomorrow morning with a set of realistic steps that each set of officials can implement once the workshop ends. It may not be possible for every group to iron out all disagreements among officials, but we do hope that through this interchange of ideas you will have at least initiated a dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.

Note on your program which small group you are in for this activity and please proceed to the designated room location now.
INSTRUCTIONS FOR GROUP MODERATORS FOR PLAN-OF-ACTION DISCUSSIONS

NATURE OF THE ACTIVITY

This activity is closely linked with the following morning's final activity. In both activities participants will be planning actions that each of the agencies in the alcohol-traffic safety countermeasure system could actually take to help solve the drinking-driver problem -- these agencies being the legislature, the courts, the Department of Motor Vehicles, and law enforcement, public education, and rehabilitation and treatment agencies. The actions you will discuss are those that officials of these agencies could take in cooperation with each other.

In this, the first of the two plan-of-action activities, the small groups will be arranged homogeneously by official position: all rehabilitation and treatment professionals in one group, all judges together in another group, and so on. Each of these groups will discuss specific steps which its officials can be expected to take in cooperation with each of the other types of officials to help solve the drinking-driver problem. Each group will also discuss what reciprocal steps it expects each of the other sets of officials to take in cooperation with its plan of action.

Activity #7 on the following morning will again involve small group discussions which you will moderate. However, Activity #7's small groups will be arranged heterogeneously by type of official -- that is, each group will contain one or more members from each set of officials represented at the workshop. Then each small group will share its ideas on what steps should be taken by each set of officials to cope with the drinking-driver problem and resolve any differences between the officials.

OBJECTIVE OF THE ACTIVITY

It is expected that each small group will emerge at the end of the workshop with a set of realistic steps that each group of officials can implement once the workshop ends -- steps that involve cooperation among all involved parties. It may not be possible for every group to iron out all disagreements among officials, but it is expected that through this interchange of ideas, officials from different agencies will have at least initiated a dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.
ROLE OF GROUP MODERATOR

Your responsibilities in this activity are twofold. First you will help elicit discussion and help channel it along the general topic area specified. Second, you will record the conclusions your small group comes up with on the forms that follow these instructions. While you are to help confine the discussion to the general topic at hand and discourage irrelevant conversation, you should encourage discussion on any specific area that is within the general topic.

Eliciting discussion is the more difficult of your two tasks, but if the previous activities in the workshop have been effective it should not be hard. The most important task is to establish rapport with the group. Once the members of your group recognize the objective role of the Moderator, there should be less need for competition, and a feeling of group cohesiveness should evolve. Your goal is to create an image of non-leadership. As in most cases where interaction occurs, the most direct, honest approach is best. Assumming a defensive superior attitude will immediately alienate most people.

Begin the activity by explaining its objective and the steps by which you plan to accomplish that objective. You will be able to do this once you have digested the following instructions yourself.

Begin the discussion by establishing a list of specific activities your group actively plans to engage in and those activities it would like to (but can't) engage in to help cope with the drinking-driver problem. Be careful to distinguish between the two, but be sure to discuss both types of actions.

As your group comes to an agreement on each action it plans to take or would like to take, be sure each participant records those actions in outline form on the check sheets provided. Remind them that they will need these sheets to refer to tomorrow.

After you have recorded these actions, have the group select that agency with which your group most needs to develop a coordinated, cooperative effort if it is to carry out in reality the actions it listed earlier as being within its own sphere of responsibility. Then discuss the reciprocal actions your group feels this other group of officials must engage in if you are to be able to implement effectively your selected actions. For example, law enforcement officials may plan to arrest more drivers for DWI than they presently arrest. As a result they will need to coordinate their efforts with prosecutors to see that these DWI charges are not reduced through plea-bargaining. In this example the group needs to discuss exactly what it expects prosecutors to do.
When discussion has been completed on the cooperative steps that should be taken between your group and this particular group of officials, move on to the next most important group of officials with whom your group needs to coordinate efforts, and so on down the list.

Once the discussion has begun, bear in mind the time limitations. At an appropriate time, for example when members are getting tired or restless or a major discussion has been concluded, declare a coffee break. Don't let the break run more than fifteen minutes unless you feel you have extra time to spare, or you feel members need the extra time to relax before resuming work. In terms of the time limitations, remember that there are five groups of officials or professionals with whom your group may want to coordinate efforts. If necessary, cut off discussion about one group if it appears to be taking too long or seems to be bogged down and return to it later in the session if there is time.

At the end of the session participants should have three check sheets filled in and ready for use in the afternoon session.
CHECK SHEET A

(fill in agency the group represents)

A. Capsule descriptions of specific actions your group plans to take when workshop ends to help solve the drinking-driver problem:

1. __________________________________________

2. __________________________________________

3. __________________________________________

4. __________________________________________

5. __________________________________________

Use additional pages if necessary.
CHECK SHEET B

B. Capsule descriptions of specific actions your group would like to take, but feels it can't take, when the workshop ends to help solve the drinking-driver problem:

6. 

7. 

8. 

9. 

10. 

Use additional pages if necessary.
A. Capsule descriptions of specific actions you expect other agencies to take to enable your agency to carry out its desired activities.

3:15 – 3:45: CURRENT APPROACHES PRESENTATION

CAPSULE DESCRIPTION

The Chairman gives a brief overview of the current team approaches employed by various agencies to deal effectively with the drinking-driver problem. Additional information is included in each participant's folder.
APPENDIX B (ACTIVITY #5)

3:45 - 5:30: REHABILITATION AGENCIES PANEL DISCUSSION

CAPSULE DESCRIPTION

There are three parts to this activity:

1. The Governor's Representative introduces the activity and then shows the movie *Ladies and Gentlemen of the Jury* (Governor's Representative's introduction: 8 minutes; movie: 32 minutes)

2. Participants break into the same small groups as for Activity #1, the Information Inventory, and discuss and record what rehabilitation measures they would advocate for the drinker-driver in the movie (30 minutes)

3. The rehabilitation and treatment participants form a panel (for which they have prepared in advance) and:
   1) Respond to the measures advocated by the other participants and suggest their own rehabilitation measures (10 minutes)
   2) Give a brief presentation about the availability of treatment-rehabilitation services in the local community for treating problem drinker-drivers (20 minutes)
   3) Respond to questions about these facilities and about rehabilitation in general (5+ minutes)

The overall activity is introduced, directed, and concluded by the Governor's Representative. Part 2 is led by the Group Moderators. Except for their moderating role during part 2, the Group Moderators have no other tasks.
INSTRUCTIONS FOR GOVERNOR'S REPRESENTATIVE, GROUP MODERATORS, 
AND PANEL MEMBERS

INSTRUCTIONS FOR GOVERNOR'S REPRESENTATIVE

The Governor's Representative directs this activity. He:

1. Introduces it with the speech provided below or with a speech of his own;

2. Presents the movie Ladies and Gentlemen of the Jury;

3. Instructs the participants to break into the same small groups they were in for Activity #1, except that rehabilitation-treatment participants do not engage in these small group discussions. (This means that the rehabilitation Group Moderator will have to be replaced by an alternate Moderator for this activity.)

4. Ends the small group discussions after 30 minutes and instructs participants to re-form into the large group;

5. Instructs Group Moderators to read their group's conclusions to the whole group and to the panel;

6. Moderates the panel discussion; and

7. Concludes the activity with a few words, such as those provided below.

The Governor's Representative should moderate the panel discussion as he sees fit -- formally (e.g., repeating questions from the floor), informally, or somewhere in between. By this time during the workshop, he will know whether he can be relaxed in his approach or whether participants need structure. The Governor's Representative should also be flexible about the time allowed for the parts of the panel discussion. For example, if interest is great, he can allow the final question and answer period to extend beyond the planned minutes, since the following BAC activity can be delayed.

The Governor's Representative, as moderator, should not allow any one panel member to dominate the discussion. When panel members respond to questions from the floor, he should allow enough time for answers but not let the response drag. He should also check to see if other panel members have additional comments to add to each answer.
INTRODUCTORY SPEECH BY GOVERNOR'S REPRESENTATIVE

Now that we have heard some of the current interagency approaches for dealing with the drinking-driver problem, we are going to participate in an activity that deals with one particular and very crucial element in the overall system of countermeasures, namely rehabilitation. This activity will give us an opportunity to learn more about the nature of rehabilitation of drinker-drivers and about precisely what treatment facilities and clinics are available to us in our community for helping the drinker-driver.

The activity has three parts. In the first part we will view a movie, Ladies and Gentlemen of the Jury. This movie depicts a story in which a problem drinker-driver gets into an accident. The movie then traces his court case in which he is charged and tried for driving under the influence. All elements of the countermeasures system are involved except public education. After the movie we will split up briefly into the same small groups we were in at the beginning of the day for Activity #1, the Information Inventory. Brief thirty-minute discussions will then be held in each group about what specific rehabilitation-treatment measures you would advocate for the problem drinker-driver in the movie. The rehabilitation professionals participating here today will not take part in the small group discussions.

The movie has received considerable criticism for its portrayal of some of the actors in the alcohol-highway traffic safety system, most notably the role of the judge. We feel, however, that despite these drawbacks the
film does show what one type of drinking-driver is like. In the small group
discussions, please ignore the shortcomings of the film and concentrate on
the rehabilitation and treatment methods you would recommend. Your
suggestions will be written down and submitted to the rehabilitation
treatment professionals. These rehabilitation participants will then take
your suggestions and form a panel discussion based around them. Panel
members will:

1. Respond to the measures you advocate and offer their
   suggestions on how to rehabilitate the
   drinker-driver in the movie;

2. Give a brief presentation about the availability of
   treatment services in our community that can be used
   to treat problem drinker-drivers; and

3. Respond to questions about these facilities and
   about rehabilitation in general.

To summarize, then: Activity #5 will consist of viewing the movie
Ladies and Gentlemen of the Jury, brief small group discussions of how we
would treat the problem drinker-driver portrayed, and a panel discussion on
rehabilitation facilities and methods available in our community. Let us now
view the movie.
CONCLUDING REMARKS BY GOVERNOR'S REPRESENTATIVE

This has been a most interesting and informative activity. I think we all have gained greater insight into the nature of problem drinker-driver rehabilitation. And we have acquired some badly needed, accurate information about what rehabilitation clinics and facilities are available to us for use in our efforts to treat problem drinker-drivers.

I want to thank our panel members for their assistance.

...I will introduce the day's last, but hardly least interesting activity.
INSTRUCTIONS FOR GROUP MODERATORS

The Group Moderators lead the small group discussions that constitute part two of this activity. When the small groups have formed, each Group Moderator reviews briefly with his group the objectives for, and substance of, these small group discussions. This includes indicating that:

1. Only 30 minutes are available for this discussion;
2. The group is to decide what specific rehabilitation measures it would like to see instituted for the drinker-driver portrayed in the movie;
3. The group may decide that more than one treatment is appropriate;
4. The group may not be able to agree on the best treatment method(s) and, if that is the case, it can report all the methods it advocates;
5. At the end of the discussion, the Group Moderator will record the group’s decision(s) for transmittal to the Chairman and panelists.

During the discussion itself, Group Moderators also need to keep the time constraint in mind and discourage irrelevant talk. If participants are too quick to decide on the most appropriate treatment method(s), the Group Moderator can ask them why they believe these methods would be effective or more effective than other methods.

At the end of the 30 minutes, the Group Moderators record briefly on a piece of paper the treatment method(s) their group advocated.*

*These small group discussions can be conducted as a large group discussion if time is short.
Panel members are those participants who are involved with the rehabilitation and/or treatment of problem drinkers. They have been singled out to participate in a panel discussion for this workshop because the other participants need accurate, up-to-date information about precisely what rehabilitation services are available for treating drinker-drivers and about current thinking on the nature and effectiveness of contemporary rehabilitation modalities.

The general nature of the panel discussion has been delineated in the preceding pages. Panel members must not only respond to the small groups' conclusions about what rehabilitation measures should be provided for the drinker-driver in the movie Ladies and Gentlemen of the Jury, but they must also prepare and deliver a brief presentation on what rehabilitation facilities are available in the community to provide treatment and/or education for problem drinker-drivers and social drinkers who are convicted of DWI. This will require some minor research in advance of the workshop and the preparation of a list of available services. The list should include the names and addresses of the facilities and the types of treatment modalities they provide. However, this presentation will be very brief, no more than five minutes per panel member. While in-depth discussions of treatment modalities would be very useful, there is not enough time for this kind of presentation.

There will be a few minutes at the end of these presentations for the other participants to ask questions about these facilities and about treatment modalities in general, but the Governor's Representative, at his discretion, can extend the time, should there be a significant amount of interest in this issue. In any case, there will be ample time during the subsequent drinking exercise for participants to ask the rehabilitation-treatment professionals questions.
5:30: WRAP-UP

CAPSULE DESCRIPTION

The Governors' Representative concludes the day with a brief summary of the day's accomplishments, and if he plans to host the Alcohol Awareness Seminar, an introduction to that activity.
5:30: ALCOHOL AWARENESS SEMINAR

CAPSULE DESCRIPTION

In this activity, the Governor's Representative and/or an official to whom he delegates this task requests participants or special subjects to drink alcohol and record their BAC levels on chemical breath-testing equipment while participants observe and/or test drinkers' reasoning powers and dexterity at different BAC levels.
9:00 - 9:30: DISCUSSION OF BAC LEVELS

CAPSULE DESCRIPTION

On the second morning, the Governor's Representative conducts a short discussion about conclusions that can be drawn from the previous evening's Alcohol Awareness Seminar. (See previous section, Alcohol Awareness Seminar, for details.)
9:30 - 11:30: HETEROGENEOUS SMALL GROUP PLAN-OF-ACTION DISCUSSIONS

CAPSULE DESCRIPTION

The Governor's Representative opens this activity by addressing the group as a whole and stressing the importance of this activity to the workshop's success. He instructs participants to break into new small groups, these being organized heterogeneously by occupation. Referring to the Check Sheets developed in Activity #3, each group discusses and records the actions each type of official or agency can be expected to take to help solve the alcohol-traffic safety problem through a cooperative effort of all parties involved. During the activity, the Governor's Representative and the Chairman circulate among the small groups.
INTRODUCTION BY GOVERNOR'S REPRESENTATIVE

This morning's session is the logical follow-up to yesterday's Activity #3 in which we met homogeneously by profession and discussed and recorded what concrete actions we believe our profession should take and what reciprocal steps other agencies should take. This morning, we will break into small groups again, but this time they will be organized heterogeneously by occupation -- that is, each group will contain one or more members from each set of officials represented at the workshop. Referring to the Check Sheets you filled in during Activity #3 yesterday, each group can then develop a sort of "game plan" or series of steps that it agrees on, as a group, that each agency or official should take to help solve the drinking-driver problem. It may not, of course, be possible for every group to iron out all disagreements between officials, but we do hope that through this interchange of ideas you will have at least initiated a constructive dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.

Note on your program which small group you are in for this activity and please proceed to the designated room location now.
INSTRUCTIONS FOR GROUP MODERATORS

NATURE OF THE ACTIVITY

This is the culminating activity of the workshop. Once again, participants will be planning and coordinating actions that each element in the alcohol-traffic safety countermeasures system could actually take to help solve the drinking-driver problem.

OBJECTIVE OF THE ACTIVITY

It is expected that each small group will emerge at the end of the activity with a series of realistic steps that each set of officials can implement once the workshop ends — steps that involve cooperation among all involved parties. As was indicated in Activity #3, it may not be possible for every small group to resolve all disagreements between officials, but it is expected that through this interchange of ideas officials from different agencies will have at least initiated a dialogue and fostered a spirit of cooperation, both of which will continue after the workshop ends.

ROLE OF GROUP MODERATOR

Your responsibilities in this activity are primarily once again to elicit discussion and to help channel it in such a way that the members of your group leave the workshop either with a plan of cooperative action they intend to implement once the workshop ends and/or with a spirit of cooperation that will outlive the workshop and lead to future planning efforts.

Begin the session by allowing members a few minutes to review what they wrote on their Check Sheets in Activity #3. Then explain the objectives of the activity and the steps by which you plan to accomplish them. You will be able to do this once you yourself have digested the following
instructions. Make it very clear to participants that the group cannot expect to come to agreement on every step each agency should take to solve a particular aspect of the alcohol-traffic safety problem. Indicate that the group should not be discouraged if such agreement is not reached on every issue. In fact, it would be surprising if it did. Indicate that you do expect the group to find some areas of possible cooperative action and a willingness to explore these and additional areas of cooperation after the workshop ends.

Once you have given members a chance to review the Check Sheets and have explained the nature of the activity, initiate the discussion by asking for one agency's representatives to volunteer to describe what actions it plans and/or would like to take, and what reciprocal cooperative actions it expects from each of the other agencies. You might initiate the discussion as follows:

"All right, we know that each of your agencies plans to or would like to take certain steps that require the cooperation of one or more other agencies represented within this very group. Would one of you please begin by explaining what actions your agency plans to or would like to take and what cooperation you need from the other agencies represented here if you are to be successful."

If no one volunteers, begin the discussion yourself by using your own agency as the initial example and responding to the above request yourself.

Discussion should flow easily from this point on. With an eye on the time limitations, lead the discussion from agency to agency until each agency's representatives have had an opportunity to explain what actions they plan or would like to take, and have them discuss with the members from other agencies what cooperation is needed from them. Of course, these other agencies will want to respond to these requests for cooperation, and this dialogue among agencies should be encouraged. What must be avoided is bitterness and recrimination, as, for example, where one agency accuses another of not doing its job, of passing the buck, or of not caring. The objective of the activity is to discover methods of cooperation among agencies that will help solve the drinking-driver problem. When you feel a conversation is not going to lead to cooperation, suggest the group should pass on to another issue, indicating that it is to be expected that cooperation cannot be achieved on every issue. This task of fostering a cooperative spirit is the most difficult and the most important one you will engage in during the workshop. Keep in mind, and where needed, remind group members too, that cooperation cannot be expected on every item brought up for discussion.

You will have to decide carefully when a conversation is clearly unproductive and should be ended, and when it is, while argumentative, nevertheless constructive and therefore should be allowed to continue. Anger
is not always a sign of unproductiveness, but it is a warning signal that the discussion may be approaching or has already reached the point of uselessness. Your most helpful guide in distinguishing between productive and unproductive conversation will be your own common sense.

At the end of the session, indicate your satisfaction with the way things have gone. Then ask the members of your group to select two to five cooperative actions among two or more agencies that these other agencies have actually agreed they will engage in or have agreed to discuss further after the workshop. Jot down briefly what these actions are (e.g., "police will supply courts with traffic records prior to sentencing") so you can report them to the workshop when you meet for the next activity, the wrap-up session.

At the beginning of your small group's discussion, bear in mind again the time limitations. At an appropriate time, declare a coffee break. Allow about 20 minutes for each agency to discuss its actions with the other agencies. Make sure you have 10 minutes at the end of the activity to select the two to five sample cooperative actions for presentation.
11:30 - 12:00: WRAP-UP

CAPSULE DESCRIPTION

To conclude the day, the Governor's Representative solicits the presentation by the Group Moderators of their groups' sample cooperative actions. He then gives a brief speech and the Chairman does the same. The Governor's Representative has participants fill out post-workshop evaluation forms. Upon collection of these forms, the Governor's Representative ends the workshop.
GROUP MODERATOR PRESENTATION OF SAMPLE COOPERATIVE ACTIONS

GOVERNOR'S REPRESENTATIVE'S SPEECH

While circulating from group to group this morning, I could tell that you were effectively planning cooperative actions between and among the various agencies you represent. Very briefly, I want each of the Group Moderators to describe to the group two or three examples of the type of cooperation their groups agreed upon. ___________ (insert name of one of the Group Moderators), will you start?

(Group Moderators provide the requested descriptions.)
CLOSING ADDRESS BY GOVERNOR'S REPRESENTATIVE

As you can see, we have a variety of types of cooperation planned or proposed. As we stressed at the beginning of this workshop, our major objective has been for all of us to begin to explore ways in which we can cooperate more effectively than we have previously done in order to cope with the drinking-driver problem. I think it is clear that we have begun a dialogue and instilled a spirit of cooperation that we hope will continue and expand after the workshop ends. We also hope that those cooperative actions we have already identified here this afternoon as desirable and feasible are in fact implemented after the workshop ends and that further meetings are held among our agencies to ensure the success of those cooperative actions. I am convinced that taken together -- the planned cooperative actions, the dialogue initiated, and the spirit of cooperation instilled -- all of these achievements constitute an excellent and impressive contribution to helping solve the alcohol-traffic safety problem.

I will now ask the Chairman to make a few final remarks to us.
CONCLUDING SPEECH BY CHAIRMAN

It's been a pleasure to have been a part of such an important workshop. We all clearly understand the magnitude of the problem. The Governor's Representative and I can only accomplish a little in our efforts to curb the problem without continuous cooperation among the legislature, the judiciary, rehabilitation and treatment agencies, law enforcement agencies, public information and education agencies, and the Department of Motor Vehicles. Furthermore, it will be difficult for us to curb the problem without your continued efforts to further the spirit and fact of cooperation among agencies and among the members of your own particular agency. I hope that each of you will soon meet within your respective agencies to help imbue your colleagues with the spirit of cooperation exemplified here. The result will be that each agency, not just a few members of each agency, will share the notion that only through cooperation among agencies can we hope to reduce the tragic number of alcohol-related accidents and fatalities on our state's highways.

I thank you all for coming here and making this workshop a success.
GOVERNOR'S REPRESENTATIVE'S INSTRUCTIONS TO PARTICIPANTS FOR DISTRIBUTING AND FILLING IN POST-WORKSHOP EVALUATION FORMS

Again I thank you for your time and attention, but there is one more vital thing I would like you to do. We will hand out a series of forms, similar to the ones you filled out at the beginning of this session. When the stack of papers reaches you, take one and pass the rest on. The purpose of these forms is to allow us to see how effective these workshops are and how we can improve them. They are not a means of grading your success here; they allow us to grade ourselves. You will notice that there is no way we can identify who has filled out any particular form. Please answer the questions as honestly as possible; don't try to spare our feelings. The forms are intended to be self-explanatory, but feel free to ask questions at any time. Please hand these sheets to me when you are finished.
APPENDIX C

MISCELLANEOUS APPENDICES

1. Instructions for Ordering and Use of A-V Equipment

2. Instructions for Assembling Participants' Packet

3. Follow-up Evaluation
APPENDIX C

1. INSTRUCTIONS FOR ORDERING AND USE OF A-V EQUIPMENT

This section explains what audiovisual equipment must be rented or otherwise obtained, how to use that equipment, and where to obtain the two films to be used during the workshop.

RENTAL AND USE OF 16mm SOUND PROJECTOR

Please read these instructions completely at least two working days before the beginning of the workshop. The points covered are:

- Examining the hall;
- Renting the equipment;
- Setting up the equipment;
- Operation of the equipment;
- Possible difficulties.
EXAMINING THE HALL

This is a simple, short process, but it is necessary in order to determine exactly what equipment will be needed. Just determine where the projector and screen will be and where the nearest electrical outlet is. Then complete this form:

Need projection table? Yes__ No__
Distance from projector to outlet (approximate): ___ ft.
Type of outlet: Three-hole (grounded) Two-hole __ __
Need screen? (Many halls have permanent ones) Yes__ No__
Distance from projector to screen (approximate): ___ ft.

RENTING THE EQUIPMENT

A 16-mm sound projector can be rented for less than $20/day from almost any medium to large camera or photographic supply store. The form filled out above will provide the information necessary to determine what additional equipment will be needed. It is preferable, but not necessary, to have a detachable speaker with a long enough cord to reach to the front of the room. Since this is the most common kind of arrangement, it should be easy to obtain. All that is needed for a projection table is some sort of stable platform, high enough so that the projector lens is above any fixed objects in between the projector and the screen. Usually, this can be found somewhere in the building where the hall is located. The distance from the projector to the screen determines the size of the lens necessary to fill the screen; if the room is unusually long or short, point this out to the person providing the equipment. Similarly, find out from him if the power cord that comes with the projector is long enough and if the plug will fit the receptacle. An extension cord and/or an adapter may be necessary.

It is important that the projector have an extra projector bulb with it; these burn out fairly often. Also, the "exciter lamp" may burn out. This occurs less often, but it is a good idea to have a replacement for this, too.
SETTING UP THE EQUIPMENT

Look at the projector when you rent it to see if there are instructions about threading the film. If there aren't any, have someone show you how that particular projector works. The important points are to make sure that the spikes on the sprockets go through the holes on the film, that the film is seated in the guide behind the lens, and that there are loops above and below the lens. Set up the projector before the beginning of the workshop, focus the lens, set the sound level and determine that everything works.

OPERATION

Rewind the film to the beginning. In some machines this involves taking the film out of the sprockets and moving the reels by hand. Turn on the machine and then the lamp. There will be an interlock to prevent you from stopping the film while the lamp is on; don't override this; it will burn out the frame. The "framer" knob (often on top of the machine) corrects if you are getting parts of two frames at once. If the picture starts jumping up and down, press the "systems restorer" button. If this fails to correct the problem, stop the machine immediately and check the seating of the film on the sprockets. At the end of the film, rewind it before you return it to the can. This is almost always done by removing the film from the sprockets.

POSSIBLE DIFFICULTIES

The best way to minimize difficulties is to talk with someone who has used the machine and to read any available instructions. The most frequent problem is not caused by misuse; it is a jumping frame, occurring when the sprocket holes on the film have been torn. If the sound doesn't come on, first check to see if there is a separate switch for it and that the volume is turned up (sometimes there are two of these: one on the machine, and one on the speaker). Then check the connections. There should be light coming from the exciter lamp housing (usually on the front lower right-hand corner, when seen from the back). The bulb may be out. If you change the projector bulb, handle it with a handkerchief; it stays hot a long time. When in trouble, see if any of the trainees has had experience with projectors; many people have had to use them at one time or another.
Please read the section on the movie projector first. Many of the same comments apply here.

The section above, "Examining the hall," also includes all the information needed for the rental of the slide projector. Be sure that the projector has the right lens, a long enough power cord (or an additional extension), the right kind of plug or adapter, and a table and screen, if necessary. If you get a model with remote control, make sure the cord for that device is long enough. The remote control should include a provision for focusing, or the projector should have automatic focusing, although these features are not necessary. While slide projector bulbs have a longer life than those on movie projectors, there should still be a spare.

You may have a choice between a magazine, which is also called a cartridge or slide tray, and a "stack loader." The magazine is a more reliable means of keeping the slides in order and obtaining them one at a time. It requires that you place the slides one by one in the tray before you begin the presentation. With the number of slides that you are using, this is not a great chore. Because of its more reliable operation and the ease with which you can refer to earlier slides, the magazine type is preferable. The stack loader allows you to place a pile of slides in the machine and to go through them one by one. It is more likely to jam and more difficult to backtrack.

Since there are many different kinds of projectors, have the person renting the equipment give you explicit operating instructions, including a demonstration.

When inserting the slides in the projector, it is important that they have the right orientation: hold the slide right side up so any writing on the slide reads left to right. Then flip the slide over so that the side you just looked at faces the screen and is upside down. Now insert it in the machine. In order to make this convenient, there is a dot on each slide. The slide should be oriented so that when the projectionist is facing the screen, the dot is in the upper right-hand corner. Double-check this by running the slides once before the conference begins. This will also enable you to detect any slides that are out of sequence.

Each slide should be focused separately, either by an automatic device or by the operator. This is because all slides are slightly warped. Also, it is a good idea to check any slides kept on the screen for a period of time; they may go out of focus. Focus as closely as you can; out-of-focus images can tire people very quickly.
The caution noted earlier about removing a dead projection bulb applies to slide projectors too. They are hot and stay hot for a long time. Allow the machine to cool by leaving the fan on after the bulb has been turned off. When removing jammed slides, be as gentle as possible.

Effective use of slides depends on timing. Don't remove a slide from the screen until you are just about to make a point about the next one. Take your time; if you've seen the slides before, you will read them more quickly than your audience will. Pause briefly if the slide is a chart, to allow people to interpret it. Encourage questions and, if a comment indicates that someone did not understand a previous slide, return to it.
APPENDIX C

ORDERING AUDIOVISUAL MATERIALS

The Governor's Representative will need to order two films used in the workshop:

POINT ZERO EIGHT

Produced by CTV Television Network Ltd.
42 Charles Street
Toronto 5, Ont. Canada

30 minutes, black and white, 16 mm.

Try to order it from the local Alcohol Safety Action Program (ASAP) or State Division of Alcoholism. Otherwise, film can be purchased for $125.00 from the above address. Contact Gail Thompson, (416) 924-5454.

Allow two weeks for delivery.
APPENDIX C

LADIES AND GENTLEMEN OF THE JURY

Produced by the National Highway Traffic Safety Administration
400 7th and D Streets, S.W.
Washington, D.C. 20590

27-1/2 minutes, color, 16-mm.

For borrowing, contact:

Office of Alcohol Countermeasures
Director's Office
National Highway Traffic Safety Administration
Washington, D.C. 20591
(202) 426-1675

Office of Alcohol Countermeasures
Technical Reference Division
c/o Winifred Desmond
National Highway Traffic Safety Administration
400 7th and D Streets, S.W.
Washington, D.C. 20590
(202) 426-2768

For purchase, contact:

Webelle Corporation
416 W. 45th Street
New York City, N.Y. 10036
(212) 245-8900

The purchase price is $150.00.

Two to three weeks are needed for delivery.
2. INSTRUCTIONS FOR ASSEMBLING PARTICIPANTS' PACKET

There are twelve items in the packet of literature to be distributed to Workshop participants. Inclusion of additional items should be avoided. Participants will be willing and even eager to read three or four pamphlets or articles, but a mass of literature may incline them to avoid reading anything. The contents and value of each item should be briefly explained to participants during introductory speeches. What follows is a capsule description of each item and a location from which each can be ordered in quantity. Packet envelopes may be obtained in most stationery stores.

(1) SCHEDULE OF DAY'S EVENTS

This is the same schedule as in the Manual. The Governor's Representative must have the appropriate data on the workshop typed in and enough copies must be duplicated for all participants.

(2) DEVELOPING A STATE ALCOHOL SAFETY PROGRAM, SECTION IV, "SYSTEM DEFICIENCIES AND RECOMMENDED CORRECTIVE COUNTERMEASURES" (16 pages)

This is Part IV of an article prepared by the National Highway Traffic Safety Administration that describes the components of a comprehensive alcohol-traffic safety program.

Copies may be obtained by writing to the Department of Transportation Regional Office. Allow four weeks for delivery.

(3) "ALCOHOL SAFETY COUNTERMEASURES PROGRAM" (12 pages)

This is a brief pamphlet outlining the National Highway Traffic Safety Administration's program to reduce the number of alcohol-related crashes.

Copies may be obtained by writing to the Regional DOT office. Allow four weeks for delivery.
(4) "MANUAL FOR A SELECTIVE TRAFFIC ENFORCEMENT PROGRAM FOR ALCOHOL RELATED MOTOR VEHICLE CRASHES" (43 pages)

This is a comprehensive outline of a curriculum on alcohol-traffic safety written by the International Association of Chiefs of Police for use by police instructors. If you have a manual of your own, feel free to substitute it.

Copies may be obtained by writing to the Regional DOT office. Allow four weeks for delivery.

(5) "ABC'S OF DRINKING AND DRIVING" (15 pages)

A cartoon pamphlet with considerable basic information about alcohol and drinking and driving; geared toward exposing myths.

Contact your State Division of Alcoholism or Department of Mental Health. Also distributed by Channing L. Bete Co., Inc., 45 Federal St., Greenfield, Massachusetts.

(6) RESOURCES LIST

This is a list of resources participants can telephone or write to after the workshop if they need assistance or information in implementing their new approaches. The Governor's Representative or his staff must compile the list for his state or community.

If the Governor's Representative prefers, he can omit this list and suggest that participants refer any requests for assistance directly to him. In that case, he should make sure participants have his full name, address, and telephone number.

Multiple copies of the Resource List should be made.
(7) BLOOD ALCOHOL CONTENT WHEEL

This is an indicator that enables a person to compute how much he must drink to reach a given BAC level.

Contact the local Alcohol Safety Action Program (ASAP) for copies. If your state does not have an ASAP or your ASAP does not have the dial, request copies from the Regional DOT office. Allow four weeks for delivery.

(8) NHTSA NOTICE 900 ON: REFERENCES TO SOCIAL DRINKERS IN NHTSA ALCOHOL COUNTERMEASURES; PUBLIC EDUCATION COMMUNICATION (1 page)

An NHTSA statement designed to ensure that NHTSA employees and contractors do not cause the public to misunderstand the NHTSA position regarding the social drinker and highway safety by their public statements and program materials.

Copies may be obtained from the Regional DOT office.

(9) "CIVIL RIGHTS RESPONSIBILITIES" (3 pages)

A DOT position paper on discrimination by agencies and contractors receiving any Federal financial assistance from DOT.

(10) "INFORMATION INVENTORY"

See pages II-28 - II-31.

(11) THREE CHECK SHEETS FOR ACTIVITY #3

See pages II-61 - II-63.

(12) NAME TAGS
Three methods of follow-up evaluation are provided in this Manual.

Completion of pre- and post-evaluation forms by participants and analysis of them by the Governor's Representative and his staff. These forms and a method for analyzing them have been included in Section II, Governor's Representative and Chairman Workshop Materials, under Registration and Conclusion.

Debriefing by the Governor's Representative and staff with the Group Moderators and two or three other workshop participants. This method of workshop evaluation has also been described at the very end of Section II, under Post-Workshop Debriefing Session.

Long-term evaluation of participant attitudes and behavior. This last type of follow-up evaluation is provided for in the following section.

The ultimate criterion of the workshop's success or failure is whether participants, in fact, took any concrete actions for coping with the alcohol-traffic safety problem suggested during the workshop. The ideal way to determine this is to visit each participant and observe his behavior. This is impractical. What can be done, however, is to mail participants a follow-up questionnaire several weeks or even months after the workshop to solicit information about their present attitudes and behaviors. What follows are:

- A sample cover letter that the Governor's Representative can send to participants;
- A follow-up questionnaire; and
- A form which the Governor's Representative can use to collate and then analyze participants' responses.

Using these three methods of evaluation, the Governor's Representative will be able to gain useful information on the success or failure of his workshop and on how to improve it for the future.
Dear Sir:

Last ___________ (insert date of workshop) you attended a workshop on the drinking-driver problem. We appreciate your contributing your time to that effort, and we hesitate to make further requests. However, it is necessary for us to have a real measure of the impact of the workshop, so we would appreciate a few more minutes of your time.

Enclosed you will find a questionnaire which to some extent duplicates the ones you filled out at the workshop. We need to compare the reactions of participants immediately after the workshop with their reactions some time later. The directions are the same; this is not a test and, indeed, the names of the respondents will not be recorded on the analysis forms. Answer the questions as best you can; if you feel that you cannot answer a particular question, just note the reason.

Again, thank you for your time and effort.

Sincerely,

Governor’s Representative

Enclosure
1. Do you feel that the problem of alcohol-related traffic accidents is a serious one?
   - not very serious
   - serious
   - very serious

2. Do you feel that a concerted effort in this country could help solve this problem?
   - not much help at all
   - help some
   - help a lot

3. Do you feel that the problem is worth a major effort to solve?
   - definitely not
   - probably not
   - probably
   - definitely

4. If you answered Question #3 as "probably" or "definitely," whom would you involve in this effort? (Check all that apply.)
   - police
   - prosecutors
   - judges
   - alcoholism rehabilitation professionals
   - state legislators (changing laws)
   - local government officials
   - Department of Motor Vehicles officials
   - the general public
   - other
   - (specify) ____________________________

5. Do you feel that your agency alone, without increased resources, could make any significant contributions to helping the problem?
   - yes
   - no

6. Do you feel that what it could accomplish would be worth the necessary redistribution of effort?
   - yes
   - no
APPENDIX C

7. Do you feel that it would be worth the redirected effort for your agency to try to influence other actors (those you checked in Question #4) to work together on this problem?
   - Yes
   - No

8. Do you feel that any direct action on your part could help solve the problem?
   - Yes
   - No

9. If yes, do you feel that helping solve the problem would be worth the redirection of your efforts?
   - Yes
   - No

10. Do you feel it would be worth your while to try to influence other your agents or the general public toward an increased effort directed at this problem?
    - Yes
    - No

11. Do you feel that the workshop has increased your confidence about being able to have an impact on the problem?
    - Yes
    - No

12. Have you attempted any actions as a result of your workshop experience?
    - Yes
    - No
    If you answered this question "no," skip to Question #16.

13. What were they?

14. Would you consider them successful?
    - Yes
    - No
    - Can't say
15. Do you have any comments on the success of your actions?

__________________________________________________________________________

16. Have any other agency personnel initiated actions because of your workshop experience, as a result of your instructions, suggestions, or example?
   __ yes  
   __ no  
   (If you answered "no" to this question, skip to Question #20.)

17. Would you consider these actions successful?
   __ yes  
   __ no  
   __ can't say

18. Do you have any comments on the success of these actions?

__________________________________________________________________________

19. Do you feel that the workshop days were well spent?

__________________________________________________________________________

20. Do you have additional comments of any kind?

__________________________________________________________________________

__________________________________________________________________________

### ANALYSIS OF RESULTS OF ATTITUDE EVALUATION FORMS

This is a very short exercise involving counting answers to the short-answer questions. The long-answer questions should be read for ideas and indications of possible changes in the conduct of the workshop.

- Number of responses to the pre-workshop evaluation \((n)\)
- Number of responses to the post-workshop evaluation \((N)\)
- Number of responses to the follow-up evaluation \((N')\)

The most important responses are the answers to questions 12 - 17. The analyst should review these responses, list the various actions contemplated by the participants, and count the number who mention each different action.
