Presented is a curriculum guide for preschool children with cerebral palsy, severe speech and language difficulties, trainable and educable mental retardation, and emotional difficulties. Minimum specific objectives in the domains of social self-help, communications, and psychomotor development are color coded according to handicap. Suggested are sample activities correlated to the specific objectives. For example, to teach the child to kick a ball without falling (psychomotor objective 8), the following activities are suggested: "Holding the student's leg, move it forward as to kick the ball in front of him. Have a ball in front of you and one in front of the student. Try to get him to model you kicking the ball." The appendix lists 5 nonhandicapped curriculums and 33 further references. (CI)

FOREWORD

Early Childhood Education is an area of current concern. Federal legislation supports programs for young families on the premise that education is a means of combating poverty. Working mothers are increasing accelerating divorce rates or from the necessity of both parents working to meet rising costs of living. The provision for their children which will stimulate and provide comprehensive services while the mother is working.

Head Start and other programs have provided information regarding the impact of early learning experiences on the development of the child. Research has focused on self-concept, social and motor skills, emotional and physical development concerns have been when to teach, how to teach, and what to teach. The important role of parents as teachers. Research data has brought out the point of view that early education of the handicapped can alleviate some handicaps, and help other children make fuller use of their potential.

Based on the belief that all handicapped children can function at a higher level if appropriate intervention is provided, "First Chance" programs were developed. Supporting funds for these projects come from the Bureau of Education for the Handicapped. These model programs develop early childhood curriculum, disseminate new knowledge, provide inservice education to the teachers, and establish outreach programs.

Las Palomitas Program for Early Childhood Education of the Handicapped is a First Chance project. It was established in 1972 at the Dove Learning Center, New Mexico State University, Las Cruces, New Mexico. This model program has the following unique features:

1. Children of various handicaps, such as cerebral palsy, severe speech and language difficulties, and emotional difficulties, are all integrated into the same classroom.
2. Non-handicapped children are included in the school population, and serve as models for the handicapped children.
3. Parents are required to spend a specific amount of time in the classroom, to attend training sessions, and work as outreach workers in a Parent-Training-Parent Program.
4. Rural areas around Las Palomitas Project are served by the parents and staff of Las Palomitas.
5. Volunteers from the University and the community become actively involved with the project.

Las Palomitas has prepared a documentary film on its parent training program, and has developed a curriculum for handicapped children. This curriculum can be used by both parents and teachers. It is divided into the curricular areas of self-concept, language, social, motor, and emotional development, and is cross-divided for use by children with various handicaps. This curriculum was written in response to the need for curricular guidelines. It is hoped it will help children to overcome being disabled by their handicap, and help family, friends, and involved community personnel to see past the handicaps to the strengths and weaknesses, which make all children "just kids".

FOREWORD

Education is an area of current concern. Federal legislation supports programs for young children from low income families. Education is a means of combating poverty. Working mothers are increasing in numbers, either from necessity or from the necessity of both parents working to meet rising costs of living. These parents want adequate programs which will stimulate and provide comprehensive services while the mother is working.

Programs have provided information regarding the impact of early learning experiences on the total child. Research has focused on self-concept, social and motor skills, emotional and physical well-being. Other research has focused on teaching, how to teach, and what to teach. The important role of parents as teachers has been established. But the point of view that early education of the handicapped can alleviate some handicaps, overcome other handicaps, and that all handicapped children can function at a higher level if appropriate intervention is provided in early years, has been developed. Supporting funds for these projects come from the Bureau of Education for the Handicapped.当日

The Las Palomitas Project is a First Chance project. Las Palomitas was established as the Early Childhood Education of the Handicapped Center, New Mexico State University, Las Cruces, New Mexico. This model project has several various handicaps, such as cerebral palsy, severe speech and language difficulties, mental retardation, and other handicaps, are all integrated into the same classroom.

Children are included in the school population, and serve as models for the handicapped children. They are required to spend a specific amount of time in the classroom, to attend training sessions, and to serve as workers in a Parent-Training-Parent Program.

Children are served by the parents and staff of Las Palomitas Project. Teachers from the University and the community become actively involved with the project children.

Las Palomitas Project prepared a documentary film on its parent program, and has developed a curriculum for preschool handicapped children. This curriculum can be used by both parents and teachers. It is divided into the curricular areas used by the project, and provides a curriculum for preschool handicapped children with various handicaps. This curriculum was written in response to the many inquiries we have received. It is hoped it will help children to overcome being disabled by their handicaps, and will enable community personnel to see past the handicaps to the strengths and weaknesses, the failures and successes of handicapped children "just kids".

Joy A. Brown, Ed.D., Director
Las Palomitas Early Childhood Education of the Handicapped
PHILOSOPHY

We believe that all children without regard to sex, economic status, mental or physical condition, creed, or race, have an inalienable right to an education commensurate with their capacities of learning.

We further believe that the developmental period between the ages of two and five years includes some of the most important years in the life of the learner. Therefore a preschool for the handicapped is of the greatest importance in these early developmental stages.

We further believe that parental training and involvement through participation in the classroom will provide a more consistent learning environment for the students, and will provide a better understanding of our total educational system.
GOALS

1. The general community will develop a more positive attitude toward handicapped preschool children.

2. The handicapped preschool child will develop a more positive self-image.

3. The handicapped preschool child will be capable of entering a public school program commensurate to his abilities.

4. To prevent the institutionalization of preschool handicapped children.

5. The parents of the preschool handicapped child will take an active role in the education and/or training of the students in the class. Thus the parents will gain a better understanding of their child.
DEFINITIONS

1. Trainable Mentally Handicapped - a mentally retarded person who is capable of only very limited meaningful achievement in traditional basic academic skills but who is capable of profiting from programs of training in self-care, and simple job or vocational skills.

2. Educable Mentally Handicapped - refers to mentally retarded children who are usually capable of learning basic functional academic skills such as reading and arithmetic; the adult educable retarded usually maintain themselves independently or semi-independently in a community.

3. Cerebral Palsy - a disorder dating from birth or early infancy, non-progressive, characterized by examples of aberrations of motor function.

4. Speech Handicapped -
   **Chronologically:** The child shows a marked delay in speech development, and/or acquisition.
   **Articulation:** Whether due to organic or psychological conditions there is difficulty for the learner in verbally producing language whether it be in tone, rate, pitch, loudness, or quality.

5. Behavior Disorder - impaired or abnormal development of internalized controls or mechanisms with which the individual can effectively cope with the natural and social demands of his environment.

6. Experientially Deprived - a learner whose proficiency level can be raised to a less handicapping level when supportive environmental experiences are provided.
DIRECTIONS:

This curriculum guide was prepared as a guide for a preschool class with a population of learners with various handicaps. The objectives for each of the three curriculum domain -- Social Self-Help, Communications, and Psycho-Motor -- are divided into sections pertinent to specific handicaps. The cut-out covers are color coded by handicap:

- Trainable Mentally Handicapped-------Blue
- Educable Mentally Handicapped-------Green
- Cerebral Palsy----------------------Brown
- Speech Handicapped----------------Yellow
- Behavior Disorder------------------Orange
- Experientially Deprived------------Red

With the proper cover card in place a list of minimum objectives will be visible. It is important to note that the list represents the minimum number of objectives expected of the learners. Some of the learners may be expected to accomplish higher objectives than listed for their general ability group. At this point instruction will proceed to focus on the next highest numbered objective that is just above the learner's general ability group. In the event a learner succeeds in completing all the objectives in a given domain, the learner is transferred to one of a number of good non-handicapped preschool curriculum guides.

Several of these are listed in the appendix.
DIRECTIONS (cont.):

The Sample Suggested Activities are numbered to correlate to the objective numbers ---
P-1 objective matches P-1 activities and so on. These activities are not all inclusive, they are only sample activities, they are to act as "sign posts" to other activities the teacher can create that will also accomplish the objective.
The Learner Will:

C 1. express himself through verbalization or gestures well enough to make his needs and wants known.
C 2. follow simple, concise directions.
C 3. attend to verbal communication when directed to him or in a small group.
C 4. imitate simple sound and/or sequential sound patterns when provided by another person.
C 5. say own name when asked "Who are you?" or "What's your name?"
C 6. have a verbal vocabulary of 100-500 words when recorded over a period of two days.
C 7. attend to short stories and/or music when presented no more than ten minutes.
C 8. speak in simple, complete sentences, using at least three words: I want that, I see that.
C 9. count serially to 5.
C 10. count serially to 10.
C 11. will match three primary colors of blue, red, yellow and/or basic shapes of circle, square, triangle.
C 12. use comparative words such as big-little, long-short, fat-thin.
C 13. will use inclusive words as all, none or words such as some, part.
C 14. use relational terms such as up-down, in-out, over-under, through-around, when directed a related question-"Where is the block?"-"It is in the cup."
C 15. identify periods of day-morning-noon-afternoon-night-by activities occurring during that time-"We go to bed at night. We eat lunch at noon."
C 16. use affirmative and 'not' statements: ("This is a book, this is not a bell"), when presented the object or asked an identification question.
C 17. recite and identify days of week.
C 18. identify penny, nickel, dime and quarter when presented the coin.

produce or demonstrate understanding of complex sentences: If THIS is big-then IT is not little. You may sit

Cerebral Palsy
The Learner Will:

1. move from sitting in a chair to a standing position by himself.
2. pick up an object off the floor without losing his balance and then regain an erect posture.
3. seat himself in a chair of proper size.
4. walk independently.
5. turn two - six (2-6) pages in a book by himself.
6. throw a ball in any direction, and of any distance.
7. imitate two teacher-made crayon marks on a piece of paper.
8. kick a ball without falling.
9. independently use a rocking chair.
10. turn one page at a time in a book.
11. be able to imitate a teacher-made crayon V stroke on a piece of paper.
12. walk the length of a six-inch-wide by ten-feet-long (6" x 10") board with aid of teacher.
13. independently walk up and down a flight of ten (10) stairs.
14. stand on one foot for a period of five seconds with aid of teacher support.
15. cut a piece of paper with scissors when the teacher holds the paper.
16. throw a ball with a predetermined direction established.
17. jump off an object twelve (12) inches above ground level and land on both feet without falling.
18. draw a □ O □ + in imitation of the teacher.
19. with one hand, bounce a ball two or more times.
20. walk the length of a six-inch-wide by ten-feet-long (6" x 10") board without aid.
Rising in a chair to a standing position.
Rising off the floor without losing his balance and regain an erect posture.
Sitting in a chair of proper size.
Rising from the floor immediately.
(2-6) pages in a book by himself.
Sitting at any direction, and of any distance.
Rising from teacher-made crayon marks on a surface without falling.
Rising from a rocking chair.
Rising at a time in a book.
Rising from a teacher-made crayon V shape of paper.
Rising of a six-inch-wide by ten-feet-long piece of paper with aid of teacher.
Rising and walking up and down a flight of stairs for a period of five seconds without support.
Rising from a paper with scissors when the teacher support.
Rising from a predetermined direction.
Bouncing a ball two or more times.
Rising twelve (12) inches above ground on both feet without falling.
Rising in imitation of the teacher.
bounce a ball two or more times.
Rising of a six-inch-wide by ten-feet-long piece of paper without aid.

The Learner Will:

S 1. respond to his name by an alteration in body position or eye movement.
S 2. say own first name on request, but not in imitation.
S 3. participate activity in structured classroom activities.
S 4. observe the general routine of the classroom; for example, wash before lunch, nap after recess.
S 5. feed himself with spoon and drink independently from a cup.
S 6. independently go to toilet, manage clothing, clean self and flush fixture.
S 7. respond with appropriate courtesy rules: Thank you, Please, Excuse.
S 8. carry out simple errand for example, carry object from place to place on request, will be able to retrieve item on request.
S 9. in a group of three or four people, wait for his turn in the activity.
S 10. greet strangers with verbal clues, for example, Hello, shakes hands.
S 11. wash hands and face without teacher aid.
S 12. clean nose with tissue when reminded by teacher.
S 13. manage all clothing appropriate for weather—coats, hats, etc.
S 14. put on shoes or boots without aid from adult or teacher; learner is not required to lace.
S 15. pick his personal coat out of a group of six coats.
S 16. help with simple classroom tasks when asked, for example, clean the black board, empty trash, pick up papers.
S 17. relate feeling about self, others, or places.
S 18. play in cooperation with two or three other learners.
S 19. retell simple nursery stories from memory.
S 20. distinguish sexual differences, I am a boy --- you are a girl; I am a girl --- you are a boy.
me by an alteration in body movement.

Body on request, but not in imitation.

Routine in structured classroom activities.

Cooperation on request, will be able to request.

Teach appropriate courtesy rules: Thank you.

Operate errand for example, carry object to toilet, manage clothing, fixture.

Routine on request, will be able to drink independently.

Suit self, others, or places.

Recite stories from memory.

Sex stories from memory.

You are a boy --- you are a girl --- you are a boy.

SAMPLE SUGGESTED ACTIVITIES

C-1. (1) Demand verbalization or gestures to gain desired goal.
(2) Reinforce the child's verbal activity with pleasant consequence.

C-2 (1) Give a verbal direction to learner. Then physically demonstrate the direction to the learner.
(2) Activities might include: give me your hand, throw the ball, sit down.

C-3. (1) Talk directly to each student using his own first name when the learners are in small groups.
(2) Play "Simon Says" as an activity.

C-4. (1) Reinforce any verbal attempts of the student by smiling and repeating the learner's sounds.
(2) Use rewarding consequences for a verbal imitation. This reward may be a physical thing at first (raisins or peanuts) then later shifted to secondary rewards such as praise.
(3) Sometimes it may be necessary to work on physical imitation before verbal imitation is attempted.

C-5. (1) Ask the learner, "What is your name?"
(2) In a small group take turns having students say their own name.
(3) Use a fading technique: ask student what his name is, give the appropriate response, then gradually decrease the volume of the appropriate response.

C-6. (1) Place several objects in front of the student and ask him to name each.
(2) Ask the learner to name various foods placed before him.
(3) Ask student to retell events that have happened to him.

C-7. (1) Read short yet interesting books every day. Let student.
(2) Play music and record.

C-8. (1) Make up situation when verbalize for his needs.
(2) Have the learner tell an activity.
(3) Ask the student to retell events that happened to him.

C-9. (1) Have the learner repeat.
(2) Start with 2-3 objects and count with him; but

C-10. (1) Start with two colors; color blocks, show the blocks as to color, have colors.
(2) Continue the same procedure with three colors.
(3) Give the student three group of ten blocks have original ones.

C-11. (1) Using two items of example, table and crayon) group differences, continuing.
(2) Long and short same as.
(3) Fat and thin same as
SAMPLE SUGGESTED ACTIVITIES

- C-7. (1) Read short yet interesting stories to students every day. Let students pick book.
  (2) Play music and recorded stories to students every day. Let students select the records.

- C-8. (1) Make up situation where learner will have to verbalize for his needs and wants.
  (2) Have the learner tell about picture or puzzle.
  (3) Ask the student to retell events that have happened to him.

- C-9. (1) Have the learner repeat after you as you count serially.
  (2) Start with 2-3 objects in front of the student and count with him; build up to number desired.

- C-10. (1) Start with two colors; have several of each color blocks, show the child how to separate blocks as to color, have student separate the colors.
  (2) Continue the same process in No. 1, using three colors.
  (3) Give the student three color blocks and out of a group of ten blocks have him match the three original ones.

- C-11. (1) Using two items of exaggerated differences (a table and a crayon) gradually decrease the differences, continuing to reinforce, "This is big and this is little".
  (2) Long and short same as No. 1.
  (3) Fat and thin same as No. 1.
C-12. (1) Using blocks, model for the student 'all' to denote totality.
   (2) Using blocks, model for the student 'few'.
   (3) Part - none - some, same as No. 1.

C-13. (1) Using a small stuffed animal and cardboard box, place the toy on, in, under, beside the box.
   (2) Do the same as No. 1, except use the student with a chair.

C-14. (1) Use pictures and have the learner group them as to night and day activities.
   (2) Ask the learner such questions as: "When do we get up to go to school?" "When do we go to bed?"

C-15. (1) Showing student various objects, model verbally: "This is a book. This pencil is not a book."
   (2) See C-6., No. 1 and 2.

C-16. (1) Each day explain what the name of that day is.
   (2) Show the student a calendar, explain school days and their names.
   (3) Ask student, "What is today's name?"

C-17. (1) Show the student a penny, nickel, dime and quarter. Explain the names of each and note the size differences.
   (2) With coins in front of the student, ask him to pick out the penny, etc.

C-18. (1) Try to correct the student when he leaves out conjunctions in his sentences.
   (2) Have the student verbalize as much as possible.
SAMPLE SUGGESTED ACTIVITIES

P-1. (1) With the student sitting on the floor, hold a toy above his head. Encourage him to stand up.
(2) Gently lift the student from a sitting position to a standing position. Slowly reduce your help and let the student pull himself up with his own strength.

P-2. (1) Place an object on the floor and with the student in a standing position ask him to pick it up for you.
(2) Have the student help clean up the classroom by picking up toys and scraps of paper on the floor.

P-3. (1) Using two chairs have the student sit down into one chair as you sit into the other.
(2) Hold the student in a squatting position while you slip the chair under him.

P-4. (1) Have the student stand against a wall. Hold out a favorite toy in front of him just beyond his reach. Be ready to catch him.
(2) Have the learner grasp a doll's buggy, or a small chair for him to push.
(3) With two adults seated in chairs approximately three feet apart, have the student walk from one adult to the other. Gradually increase the distance between the chairs.

P-5. (1) When reading stories be sure the students see you turn the pages.
(2) Give the student several books they can look through.

P-6. (1) Sit on the floor facing the student. Have the student roll the ball back and forth with you. Lightly begin to throw the ball to the student.
(2) Have activities where the student try to throw a ball into a large box.

P-7. (1) Demonstrate for the student to make a mark on a piece of paper. Be sure to use large strokes.
(2) Hold the crayon in the student's hand, make marks on the paper with the student.
(3) Make crayon marks on the student to imitate.

P-8. (1) Holding the student's hands, have the student try to kick the ball in front of him.
(2) Have a ball in front of the student. Try to get him to kick the ball.

P-9. (1) Seat the student in the rocking motion for you are reading.
(2) See P-5.

P-10. (1) Have the student turn pages as you are reading.
(2) See P-5.

P-11. (1) Hold the crayon in the student's hand, make a "V" mark on his paper.
(2) Make a "V" mark on the student to imitate.
SAMPLE SUGGESTED ACTIVITIES

P-7. (1) Demonstrate for the learner how to make a mark on a piece of paper with a crayon. Be sure to use large strokes.
(2) Hold the crayon in the student's hand and make marks on the paper guiding the learner's hand.
(3) Make crayon marks on the paper. Encourage the student to imitate you.

P-8. (1) Holding the student's leg, move it forward as to kick the ball in front of him.
(2) Have a ball in front of you and one in front of the student. Try to get him to model you kicking the ball.

P-9. (1) Seat the student in the rocking chair and start the rocking motion for him.
(2) Seat the student in the rocking chair and sitting facing him, grasp his hands and gently rock him back and forth.

P-10. (1) Have the student turn the pages of the book you are reading.
(2) See P-5.

P-11. (1) Hold the crayon in the student's hand and make a "V" mark on his paper.
(2) Make a "V" mark on the student's paper. Encourage him to imitate you with his crayon.
SAMPLE SUGGESTED ACTIVITIES (cont.)

P-12. (1) Hold student's hand and walk him down the board. Do not raise the board off the ground.
(2) Have two pieces of tape placed on the floor about one foot apart. Have the student walk between the pieces of tape. Slowly decrease the distance between the tapes.

P-13. (1) Stand behind the student facing the steps, lift each leg of the student's one at a time up to the next step. Gradually reduce your support.
(2) Hold the student's hand as you walk up the stairs.
(3) Show the learner how to properly use the handrail.

P-14. (1) Have the learner step over a broom handle held about three inches above the ground. Slowly increase the height to twelve inches above the ground.
(2) Let the student stand holding on to a chair. Grasp his leg and hold it off the ground. Encourage the student to try it by himself.

P-15. (1) Grasp the student's hand in which he is holding the scissors. Show him how to cut paper while you guide his hand.
(2) Have the student cut pieces of a small strip so that success will be easier.

P-16. (1) Stand learner facing you about five feet away and gently toss a ball back and forth between the two of you.
(2) See P-6.

P-17. (1) Place a piece of tape on the floor. Have the learner jump over the tape.
(2) Begin with the learner jumping from the height of approximately two inches. Increase the height slowly until the height of twelve inches is reached.

P-18. (1) See P-7. and P-19.

P-19. (1) Demonstrate to the student how to throw a ball.
(2) Standing behind the student holding his hands and bounce the ball to him.
(3) Have the student catch the ball and bounce it back to you.

P-20. (1) Have the student take a ball and throw it from the top of his head for you to catch.
(2) See P-5.
(Cont.)

P-18. (1) See P-7. and P-11.

P-19. (1) Demonstrate to the student how to bounce
a ball.

(2) Standing behind the learner grasp his
hands and bounce the ball with him.

(3) Have the student drop the ball, and as it
bounces back have the student catch
the ball.

P-20. (1) Have the student walk with an object on
top of his head for better balance.

(2) See P-5.
SAMPLE SUGGESTED ACTIVITIES

S-1. (1) Repeat the student's name as often as possible.
(2) Have the learner look at himself in the mirror. The teacher then says the student's name while pointing at the student.

S-2. (1) See C-5.

S-3. (1) Have the students participate in all classroom activities and classroom routines. Praise him for a job well done.
(2) Keep your activities at the same approximate time each day.
(3) Group your children as to ability and not by handicap.

S-4. (1) Keep consistent with your daily routines - washing hands before snacks, nap after recess, etc. - do them every day.
(2) Reward a student who follows classroom routine without having to be reminded.

S-5. (1) Hold your hand over the learner's hand on the spoon. Help him to guide the food on the spoon towards his mouth.
(2) Do same as above with his cup.
(3) Be sure to use food that will stick to the spoon.

S-6. (1) Show the learner how to flush fixture, wipe himself, and all of the other things involved in independent toileting.
(2) Take each step at a time and don't be in a hurry.
(3) Praise the learner as each step is completed.

S-7. (1) Demonstrate to the student when and how to use courtesy words.
(2) Reinforce a student when he is courteous.
(3) Be courteous yourself.

S-8. (1) Start with familiar. Generally, the stu

SAMPLE SUGGESTED ACTIVITIES

S-8. (1) Start with familiar items to the student. Generally, the student's own property. "Bring me your coat." Gradually increase the difficulty of the errand.
(2) Have the student repeat the direction before he does it.

S-9. (1) Encourage the learner to share toys with other students.
(2) Play catch with three students at the same time. Make them take turns.
(3) Have the learners take turn passing out the snacks.

S-10. (1) Demonstrate for the students how to greet visitors, "Hello," or shake hands, etc.
(2) Role play by having the students greet each other at the classroom door.
(3) Use proper greeting when the students arrive at school.

S-11. (1) Show the students where the soap, towels, and sink can be found. Demonstrate on the learner how to properly wash his face and hands, and how to dry them.
(2) Take the student's hand in yours and hold the soap or towel and guide them to the proper position.

S-12. (1) Demonstrate the blowing of your nose for the learner.
(2) Hold the tissue in the student's hand and wipe his nose with it.
(3) Have student imitate snorting with tissue in front of his nose.

n he is courteous.
S-13. (1) Give the student several activity toys with various types of buttons, snaps, zippers, hooks, etc. on them.
(2) Help student when he is dressing. Show him how to button his clothes.

S-14. (1) Have a doll with removable shoes. Show and tell the student how to put the shoes on the doll. Let the student play with the doll.
(2) Help the student put on his shoes, gradually withdraw your help.

S-15. (1) Start with two coats on the rack, the student's and one other. Physically help him to pick out his own coat. Gradually increase the number of coats on the rack.
(2) Put a special marker on the student's coat, possibly a bright piece of colored tape.

S-16. (1) Have the student help clean the room each day. Have specific jobs for each student.
(2) See S-8.

S-17. (1) Have a period each day set aside for you and the learners to talk about their experiences past, present or future.
(2) Ask the students about their likes and dislikes—favorite television show, foods they like, etc.
(3) Show your feelings to the students.

S-18. (1) Set up activities where the students will be likely to socialize with each other—"tea parties", group games, etc.
(2) Once the students are playing in cooperation with each other, try not to interfere with their activity.

S-19. (1) Read stories or present stories and retell what the learners ever happen.
(2) Have the students retell stories and retell what the story is about.

S-20. (1) Discuss sexual differences as clear and possible.
(2) Answer all questions about sexual differences as clearly possible.
IES (cont.)

Several activity toys with various snaps, zippers, hooks, etc. on them. When he is dressing. Show him how to use them.

Removable shoes. Show and tell the student how to put on the shoes on the doll. Let the student put on his shoes, gradually withdraw help.

Baskets on the rack, the student's and one that he helps him to pick out his own coat. Mark the number of coats on the rack. Marker on the student's coat, possibly with colored tape.

Help clean the room each day. Have each student.

Each day set aside for you and the learners to discuss experiences past, present or future. Discuss about their likes and dislikes-favorite foods they like, etc. Discuss to the students.

Where the students will be likely to get together - "tea parties", group games, etc. No interfering with their activity.

S-19. (1) Read stories or play recorded stories to the learners everyday.

(2) Have the students write or scribble stories and retell you what their story is about.

S-20. (1) Discuss sexual differences when taking a student to the restroom.

(2) Answer all questions regarding sexual differences as clearly and simply as possible.
