The 12 activities for a science careers curriculum are briefly outlined in the introductory section of the document and involve writing, discussion, films, research, interviews, reading assignments, field trips, and speakers. The body of the document consists of: a list of careers related to science and technology, science career-related cassette tapes and references available in the Hanley Library, a career questionnaire, a newspaper article on the employment outlook for scientific careers, a 12-page list of science-related career guidance publications, addresses for science associations, and a sample of a job application.
STUDENT ACTIVITIES FOR SCIENCE CAREERS CURRICULUM

June, 1972
Elaine A. Alexander
Hanley Junior High School
1. Each of you will be given a short article dealing with some area of science (from either magazine or newspaper). You will be allowed to choose an article which is of interest to you if possible. Each of you will be asked to list all of the careers that you can think of that are involved in the article after reading it. Your list should include both careers of persons discussed in the article as well as those of persons responsible for writing the article. You will be asked to pick one career from your list and tell others in your class what you think that person does. In other words, in a circle discussion, you will be asked to tell us what a person who has that particular career does in his job.

2. The film 'How a Scientist Works' describes how a wildlife scientist in Northern Montana solves a problem which has to do with managing a population of geese. You will be asked to react to the film in an open discussion, in terms of what specific personal traits a scientist must possess. Positive traits of the 'scientist' will be listed on the overhead projector as they are mentioned and then summarized at the end of the period.

3. You will be given a list of 'careers in science' and asked to choose one career that you would like to find out more about. You will also be given 2 lists of resource material in our Hanley library (career books and cassette tapes). You will be asked to choose one tape or book (if tape is not available) and find out more about the particular career that you have chosen. Each of you will be asked to fill out a questionnaire including many of the points made on the tape or in the book. The questionnaire will include items such as job responsibilities, educational requirements, etc.

4. You will be asked to listen to one tape about a career related to science and one tape about any other career you might choose. The same questionnaire used in #3 will also be used to summarize the two tapes. The list of tapes in the library is marked so that you will know which careers are related in some way to science and which are not. If you listened to a tape for #3 above, then you may use that questionnaire to fulfill the first part of #4.

5. You will be asked to make up a series of 20 questions which you would think appropriate to ask a person who is involved in the science career of your own choosing. You will be able to pick whatever career you would like to interview. Then you will be asked to find someone who is involved in that career at the present time, make an appointment with that person for an interview, and then actually carry out the interview with that individual. Both questions and answers will be turned in after the interview.

6. You will be asked to read the newspaper article 'Hiring of Scientists Up Slightly' from the Post-Dispatch (6/15/72). After having read the article, you will be asked to write a short paper discussing the pros and cons of a career in science at the present time. Put yourself in the place of
Student Activities for Science Careers Curriculum (continued)

a person interested in some area of science as a career and discuss your feeling about your future possibilities.

7. You will be given a list of free publications available which describe various careers in science and asked to write a letter requesting one publication dealing with the area in which you are most interested. After you have received and read the publication, I will ask each of you what you learned by reading it.

8. You will watch the film 'Your Job, Finding the Right One' and write a follow-up paper (of approximately one page) discussing your own personal characteristics or traits and what types of careers you might be best suited for as a result of these characteristics.

9. Each of you will watch the film 'Your Job, Applying For It' and be prepared to discuss the qualities which you think a future employer would look for in you. Pretend you are going to apply in person for a job tomorrow and list all of the things that you would want to do and remember as you prepared to keep that date. You will be asked to fill out a typical application form for a job and any problems which you have will be discussed and solved in class so that by the end of the period you should be able to fill out the form without much problem.

10. Several films from County AV manage to tell the story of their particular profession clearly and in an up-to-date manner. Each of you will be asked to watch one of the following five films during your study hall on an elective basis. The films are: 'Oceanography, the Study of the Oceans', 'What Ecologists Do', 'Weatherman as a Scientist', 'Camera and Careers', and 'Excellence By Design' (from McDonnell Air-Craft Corporation). After watching the film you will be asked to write a page reacting to the career portrayed in the film either favorably or unfavorably giving reasons for your choosing or not choosing that career.

11. Trips have been planned to the Arboretum, Planetarium, Zoo, and a Chemical Plant to listen to and see what scientists do. A botanist-education specialist from the Arboretum, an astronomer from the planetarium, keepers of the aquatic house and lion house at the zoo, and a chemist at the chemical plant will talk about what they do and show you as much of their particular 'work environment' as they are able to show.

12. The following areas will be covered by speakers who will come to the school to talk about their particular career:

   Teacher from Mo. School for Dr. Assistants and Technicians
   Computer programmer
   Missouri conservation agent
   National Park Ranger
   Nurse
   Geologist
Careers Related to Science & Technology

Agricultural Engineer (production and processing of food, farm equipment, soil and water.)

Farmer

Florist

Horticulturist (dealing with plants, landscaping, pest control and food processing)

Anthropologist (studies ancient civilizations)

Archaeologist (digs up and studies old relics of past civilizations)

Architect (designs homes, buildings, etc.)

Astronomer (studies the stars, planets, etc.)

Atomic Scientist (works with atomic energy)

Pilot

Stewardess

Space Scientist

Aerospace Engineer (designs and builds space ships, rockets, etc.)

Astronaut

Biologist (studies all living things)

Ecologist (studies living things and how they relate to their environment)

Microbiologist (studies microscopic plants and animals)

Fishery Biologist works specifically with fish)

Wildlife Biologist (studies relationship of wildlife populations to their environment)

Chemist

Conservationist (works outdoors to conserve our natural resources)

Park Ranger

Dentist

Dental Hygienist (cleans teeth only)
Careers Related to Science & Technology (continued)

Dietitian (plans meals for hospitals, schools, etc.)

Computer Scientist (works with computers)

Engineer

Forester (works in forest management, cutting and planting trees)

Nurseryman (grows and sells plants and trees)

Landscaper (designs outdoor areas similar to way architect plans indoor areas)

Geologist (studies rocks and minerals)

Home Economist (may be related to foods, textiles, home management, family relationships, etc.)

Draftsman (draws plans for machines, buildings, etc.)

Mathematician

Statistician (works with statistics)

Doctor (M.D. who treats some part of the body or all of it)

Registered Nurse (male or female)

Medical Research Scientist

Medical Technologist (performs medical tests)

Laboratory Technician (performs lab tests on blood, urine, etc.)

Optometrist (tests and fits people for glasses)

Ophthalmologist (eye doctor)

Surgeon (performs operations)

Radiologist (interprets X-rays)

X-ray technician (takes X-rays)

Physiologist (studies chemistry of the body)

Psychiatrist (treats mental or emotional problems)

Physical Therapist (teaches handicapped people to use hands, arms, legs, feet again)

Hospital Orderly (men who assist nurses with heavy hospital work)

Hospital Attendants (women who assist nurses)
Careers Related to Science & Technology (continued)

Practical Nurse (assist registered nurses in hospital)

Meteorologist (studies patterns of weather)

Weatherman (reports the weather)

Mining Engineer (manages the mining of coal, copper, etc.)

Oceanographer (studies ocean currents, animals, etc.)

Pharmacist (prepares and sells drugs)

Photographer

Physicist (deals with science of physics)

Electronics Technician (fixes TV, radio, etc.)

Science Teacher

Math Teacher

Technical Writer (writes scientific articles)

Veterinarian (doctor for animals)

Anesthetist (registered nurse who gives anesthesia to put people to sleep before an operation)

Medical Secretary (in hospital or doctors office)

Career Questionnaire

Answer as many of the following questions as you are able to answer while you are listening to the tape or reading a resource book from the library.

1. Name of the career that you are interested in finding out more about?

2. What types of jobs are available in this career area?

3. What type of training or education must one have in order to enter this type of career?

4. Must you pass a state exam in order to obtain a job in this career area?

5. What personal qualities or traits would be an asset to an individual who was considering this career?

6. What would the working hours be of a person with a job in this career area?

7. What sort of working environment would a person with this career have? (outdoors, indoor desk job, etc.)

8. What types of duties or responsibilities would a person with this career need to fulfill?

9. What do persons who are now working in this career say about the most exciting or satisfying part of their job? What are the rewards of this career?

10. What are some of the drawbacks or hazards to this particular career?

11. What type of equipment would a person in this career be using as a part of the job?

12. What would the approximate starting salary be in this career?

13. Could a person engaged in this career expect to receive regular salary increases?

14. Are jobs in this career area hard to get or are there many openings available at the present time? Will this change in the next ten years?

15. Now that you have found out more about this career, are you still interested in it as a future possible career choice?
Hiring Of Scientists Up Slightly

By WILLIAM K. WYANT JR.
A Washington Correspondent
of the Post-Dispatch
WASHINGTON, June 15

THE GLORIOUS DAYS of multiple job offers for young scientists are gone, but this will not discourage the really good ones, National Science Foundation Director H. Guyford Stever said today.

"I think the recovery of our economy will ease unemployment," he said in an interview, "but I don't see any time in the near future when the overabundance of jobs for PhDs will recur."

Stever, 55 years old, former president of Carnegie-Mellon University, referred to the constantly escalating demand for scientists that followed World War II and the post-Sputnik "international race in education."

The wellsprings of money for science are not gushing as abundantly now.

Stever, although not pessimistic, said he did not think the hiring of scientists for academic jobs would increase at a rapid rate in the next few years. He mentioned the financial troubles of colleges and universities.

"I PERSONALLY THINK we will work ourselves out of this problem," he said. "However, I would not want to pour kerosene on the production fires of PhDs in science at the present time."

The magazine Science, published by the American Association for the Advancement of Science, reported in April that the job outlook for fledgling scientists and engineers this June was better than last year but "nothing to do handsprings about."

Chemistry and physics were described as the hardest-hit group. Some physicists were said to have given up the idea of getting a post at a college or university. In an unusual degree they were turning to industry and other types of professional fulfillment.

There has been a decline in enrollments in physics, chemistry and engineering courses. Meanwhile, the pressure for entry into medicine, where a graduate has no trouble finding work, has increased greatly.

The Association of American Medical Colleges said that one decade ago 15,847 students had applied for 8642 seats at medical schools. In 1972-73, the figure was 30,000 applications for 12,900 seats.

The National Science Foundation, set up by Congress in 1950, is the major instrument for federal support of basic scientific research. In recent years it has been under political pressure to apply scientific knowledge to problem-solving in a way related to achievement of national goals.

For the fiscal year beginning July 1, the foundation is seeking $553,000,000 from Congress, compared with $422,000,000 appropriated for this year. Most of that money will go to the universities for basic research involving 7400 faculty scientists and 7000 graduate science students.

The 1973 budget includes also $90,000,000 for a program called "Research Applied to National Needs."
Scientists’ Job Shift

FROM PAGE ONE

work is aimed at applying scientific and engineering talent to problems of national concern.

While increasing its support for students working on research projects, the foundation has been dropping its support for graduate students in the form of traineeships and cutting down its fellowship program.

"THERE ARE TWO REASONS FOR THE DROP-OFF IN FELLOWSHIP AND TRAINEE SUPPORT," Stever said in a speech last month.

"One of these is that many people in government question why science should be singled out from all the other professions and fields for major student support.

"And the other reason is the unemployment and underemployment of scientists. Some ask why we should continue and aggravate the problem by training more scientists."

Among Society’s newly defined goals, Stever said, could he count such things as cleaning the environment, stopping the waste of resources, curbing pollution, and improving housing, transportation, education, health care and the like.

STEVER SAID LAW and medicine, like science, were becoming more popular as chosen fields of endeavor because they were professions. They are fields in which a person can he his own boss, and not just part of an organization, he said.

In the interview, he was sympathetic to the problems of higher education as the colleges and universities encounter inflation, a leveling off of financial support, rising costs and a decline in the old confidence that higher education has the answers.

"You have had a dropping away of universal desire and acceptance," he said. "Inflation, rising costs, and a drop in endowments."

"THE STEEL INDUSTRY and the university industry can be compared, in terms of the problems they have."

Stever received a doctorate in physics at California Institute of Technology. He served on the faculty of Massachusetts Institute of Technology for more than 20 years. He became president of Carnegie Institute of Technology at Pittsburgh in 1965. Carnegie Tech merged with Mellon Institute in 1967, forming a university with a total endowment of nearly $120,000,000.

In the mid-1960s, Stever was chief scientist of the Air Force. He is considered an expert on aeronautical engineering and space technology. He has served as a director of United Aircraft Corp., Koppers Co. Inc., and Fisher Scientific Co.

There is nothing in Stever’s background to suggest that he is not enthusiastic about applying scientific knowledge to the everyday problems of man.
CAREER GUIDANCE PUBLICATIONS

GENERAL

The Big Pond - Federal Jobs for Engineers, Physical Scientists, and Mathematicians
Civil Service Commission
The stories of several individuals who are working for the federal government in these fields.

Can I Be a Scientist? - Public Relations Staff, General Motors Corporation
Considerations of a scientific career, background required, and opportunities.

Careers in Science - National Bureau of Standards
Trained specialists conduct pure and applied research in the fields of physics, mathematics, chemistry, and engineering at the laboratories of this government installation. 1969. 30 pp.

Careers in Science and Engineering - Civil Service Commission
Basic information for people desiring jobs in these fields with the Federal government.

Science and Engineering - International Bussiness Machines Corporation
Outlines career opportunities for engineers, scientists, mathematicians, physicists, programmers, chemists, and metallurgists. Includes sections relating to IBM company products, benefits, and working environment.

AGRICULTURE

Choose a Challenging and Rewarding Career in the U.S. Department of Agriculture -
Office of Information, U.S. Department of Agriculture
Facts on opportunities in the Department of Agriculture.

Rewarding Careers in a Dynamic Industry - National Association of State Universities and Land-Grant Colleges
The booklet describes careers in farming and related fields. Available from the Dean of Agriculture at land-grant institutions in student's home state. 22 pp.

Threads of Life - The National Academy of Sciences, Agricultural Board
Particularly emphasizes the agricultural sciences. Request from agricultural departments of colleges. 1964. 16 pp.
AGRICULTURE (continued)

Agricultural Engineering and You — American Society of Agricultural Engineers
Facts about careers in this field, and how one prepares for the profession. 16 pp.

Opportunities for You in the Florist Industry — Society of American Florists, Executive Director
Career opportunities in floriculture. 12 pp.

ANTHROPOLOGY AND ARCHAEOLOGY

Anthropology as a Career — Smithsonian Institution
Pamphlet divided into five parts: areas of anthropology, training, employment, universities, and a reading list in general anthropology and in each of the several fields. Revised. 20 pp.

Archaeology As a Career — Archaeological Institute of America
J.H. Rowe describes the work and training of the archaeologist. Bibliography revised in 1970. 11 pp. Quantity prices on request.

ARCHITECTURE

Designing a Better Tomorrow — American Institute of Architects
The challenges and rewards of a career in this field. Lists accredited schools of architecture and further references.

ASTRONOMY

A Career in Astronomy — American Astronomical Society
Gives information on the nature of work involved in contemporary astronomy, the schools having training in this area, and employment opportunities.

ATOMIC ENERGY

Careers in Atomic Energy — U.S. Atomic Energy Commission
The various fields of the atomic scientist. Also contains a selected reading list on sources of financial aid to the student. 27 pp.
AVIATION AND SPACE SCIENCE

Career Opportunities with the Airlines - Air Transport Association of America
Various career openings with the airlines; basic requirements, personal and educational; salaries; ways to apply for an airline job.

Educational Opportunities in the Air Force - Local U.S. Air Force Recruiting Offices
A booklet describing educational opportunities open to members of the Air Force.

Occupational Handbook of the United States Air Force - Local Air Force Recruiting Offices
A vocational manual for guidance counselors and educators, furnishing information on aviator career fields and opportunities for young men and women in the U.S. Air Force. 44 pp. Also available, Your Son's Air Force Life.

Pocket Guide to Air Force Opportunities - Local U.S. Air Force Recruiting Offices
A pocket-size summary of U.S. Air Force training courses and job specifications with emphasis on technical training courses and job opportunities. 81 pp.

Your Career as an Aerospace Engineer - American Institute of Aeronautics and Astronautics
Aerospace engineers design and build equipment used in space exploration and more earthbound transportation. Includes a list of schools where programs in aerospace engineering are offered. 21 pp. (Student memberships in AIAA are available too.)

BIOLOGICAL SCIENCES

Career Guidance Booklet - American Society of Zoologists
"Careers in Animal Biology," outlining career opportunities in teaching, research, museum work, work with government agencies, etc.

Careers in Biology - Rochester Institute of Technology
Describes the varied professions in the life sciences, including the prospective salaries and educational preparation. 24 pp.

Fisheries as a Profession - American Fisheries Society
A career guide for the field of fisheries science.
BIOLOGICAL SCIENCES (continued)

Microbiologist - Food and Drug Administration
Possibilities of assignments with this government agency are described in this booklet. 8 pp.

CHEMISTRY

Chemist - Food and Drug Administration
Some assignments chemists may have in careers with this government agency. 8 pp.

Chemistry Guidance Leaflet - University of Missouri at Rolla
Pamphlet describing careers and requirements in chemistry.

Chemistry and Your Career - American Chemical Society
A booklet designed to help students at the junior high school level visualize how chemistry affects careers in many areas. Describes the training and background necessary for a career in chemistry. 1969. 20 pp. Single copies free.

A Dozen Reasons Why Young People Choose Chemical Industry Careers - Manufacturing Chemists Association, Inc.
4-page flyer.

CONSERVATION

Careers in Conservation - Soil Conservation Society of America
If you like to work outdoors and are interested in serving the needs of our country, this may be the career for you. 12 pp.

Careers in the National Park Service - National Park Service
Describes the major programs and employment needs of the Park Service, and answers many questions on procedures to follow in applying. 1968. 31 pp.

Careers for Women in Conservation - U.S. Department of Labor, Women's Bureau
The wide range of careers that are available in this field. 1969.

Careers in Wildlife Conservation and Management - Wildlife Management Institute
What is involved in wildlife management, required training, and other facts about this career.

A Wildlife Conservation Career for You - The Wildlife Society
The wide range of rewarding careers in this field is described in this pamphlet, which also lists sources of further information.
DENTISTRY

Careers in Dental Hygiene - American Dental Hygienists' Association
Brochure presenting the facts concerning career opportunities, examination and licensure, and sources of further information.

Careers in Dentistry - American Dental Association
Facts a future dentist needs to know when considering choosing dentistry as a career. Also available, Dental Students' Register which gives information on enrollment and requirements of dentistry, dental hygiene, dental assistantship, and dental laboratory schools. 19 pp.

Dental Assisting is an Action Career - American Dental Assistants Association
The functions and activities of this career are outlined.

Dental Hygiene...A Career with a Future - American Dental Hygienists' Association
Short brochure describing the profession of dental hygiene.

DIETETICS AND NUTRITION

Careers in Nutrition - American Institute of Nutrition
Discusses briefly the preparation for a career in nutrition and the many applications of the "science of food."

ELECTRONIC DATA PROCESSING - COMPUTER SCIENCE

Analytically Minded? - International Business Machines Corporation
Outlines job opportunities in systems engineering with emphasis on IBM. 32 pp.

Computer Science at State Universities and Land-Grant Colleges - National Association of State Universities and Land-Grant Colleges
This publication provides a brief overview of activities in computer science at state universities and land-grant institutions. It includes information about career and study opportunities in the computer field. 1967. 22 pp.

The Programmers - International Business Machines Corporation
Provides a concise description of programming, what a programmer does, and how he accomplishes this task in the two main areas of applications and systems. IBM locations are outlined, as well as educational requirements and IBM company benefits.
ENGINEERING

Can I Be an Engineer? - Public Relations Staff, General Motors Corporation

Careers in Engineering - Purdue University, Office of the Dean of Engineering
A booklet that tells what engineering is and what engineers do. It describes the profession of engineering and the qualifications and educational requirements of a successful engineer. It is aimed at providing sufficient information so that one can decide for himself whether he wants to prepare for a career in engineering, including what should be studied in high school and the various options one has in college.

Does Engineering Appeal to You? - American Society for Metals
A brief introduction to metallurgical engineering and its expanding opportunities. Free in quantities for high school students.

Engineering and Applied Science - Columbia University School of Engineering and Applied Science
This booklet describes the program at Columbia University and provides much information about careers in engineering and applied science.

Engineering: A Career of Opportunity - National Society of Professional Engineers
Helps students develop and answer questions about their interest in, and fitness for, a career in engineering. 14 pp.

Engineering: Creating a Better World - Engineers' Council for Professional Development
Answers such questions as: What is an engineer? What does an engineer do? Who can become an engineer? 20 pp.

Why Not Be an Engineer? - U.S. Department of Labor, Women's Bureau
Information about the opportunities in this field for women.

FORESTRY

Ask Any Forester - Society of American Foresters
Describes the rewards and opportunities of a career in the forestry profession. 15 pp.
FORESTRY (continued)

Career Opportunities in the Nursery Industry - American Association of Nurserymen
Gives information on the nature of the work, career opportunities, types of operations and schools and curriculum. Enclose a stamped, self-addressed envelope with your request.

A Job with the Forest Service - U.S. Department of Agriculture, Forest Service
A pamphlet describing non-professional employment possibilities in the U.S. Forest Service. 1970.

GEOLOGICAL SCIENCES

Geology–Earth Science - University of Missouri-Rolla
The program at this school is featured in this description of careers in geology.

Geophysics - University of Missouri-Rolla
Careers in the field of geophysics, with emphasis on the curriculum at this school.

HOME ECONOMICS

Careers in Home Economics - American Home Economics Association
Miscellaneous career booklets on home economics, including careers in nutrition and textiles. Special series of pamphlets "The Wonderful World of Home Economics."

INDUSTRIAL

American Paper Institute - What's So Special About Paper?
Outlines the various types of job possibilities in the paper industry and lists some scholarships available. Also lists colleges giving specialized training in papermaking.

General Motors Corporation - Can I Be a Craftsman?
General Motors program for developing skilled craftsmen. 21 pp.

General Motors Corporation - Can I Be a Draftsman?
A description of opportunities for draftsmen and preparation for employment. 13 pp.

International Business Machines Corporation - The Problem Solvers
Outlines job opportunities in business administration, engineering, system engineering, customer engineering, science, marketing, programming.
INDUSTRIAL (continued)

research, and finance, as well as general information about IBM.

MATHEMATICS

Careers in Mathematics - Rochester Institute of Technology

Describes the several fields and professional opportunities for the mathematics major. 1969. 20 pp.

Careers in Statistics - American Statistical Association

How About a Career with Mathematics - The Mathematical Association of America

If you like math, you'll be interested in the many ways you can make a career of it. 1965. 8 pp.

MEDICINE AND HEALTH

The Opportunities and Rewards of Medicine Can Be Yours - American Medical Association

Medicine promises a future to students of various talents. There is room in the profession for almost every type of interest and study including athletics, education, and astronautics. 8 pp.

Decision for Research - American Heart Association

Discusses meaning of research, training needed to work in the field, and work at a research center after college. 8 pp. Request from the local chapter of the Heart Association.

Why Not Be a Medical Technologist? - U.S. Department of Labor, Women's Bureau

What medical technologists do and what to expect from this career.

Your Career Opportunities in Medicine - Charles Pfizer & Company, Inc., Educational Services Department

Provides information on careers in medicine, educational requirements, and a list of medical schools in the United States. 31 pp.
MEDICINE AND HEALTH (continued)

Do You Want to Be a Nurse? - National League for Nursing
Preparation and career opportunities in nursing.

Why Not Be an Optometrist? - U.S. Department of Labor, Women's Bureau
What optometrists do and what to expect from this career.

The Career for You - Physical Therapy - American Physical Therapy Association
The satisfactions of a career in this profession. Career Facts, also available, describes the physical therapist's job and requirements.

Consider Physiology - The American Physiological Society
Answers the question "What is a physiologist?" and discusses the advantages and challenges of working in this field.

Careers in X-Ray Technology - The American Society of Radiologic Technologists
Discusses the need for radiologic technologists. Reviews the training required and the duties one might encounter in this career.

Health Education as Your Career - American Association for Health, Physical Education and Recreation
Pamphlet discusses opportunities in health education, the work, salary, courses of study at college, advantages of such a career.

Today's Hospital - Career Center for America's Youth - American Hospital Association
Career opportunities in hospitals, the types of people needed, educational requirements. 1970. 8 pp.

Your Career Opportunities in Hospitals - Charles Pfizer & Company, inc., Educational Services Department
Career information for those interested in applying for the various hospital jobs not held by physicians. 35 pp.

METEOROLOGY

Career Guidance and Educational Material on Meteorology - American Meteorological Society
Literature on careers in meteorology as the science of the atmosphere. Material includes career booklet The Challenge of Meteorology, listing of colleges having degree programs in meteorology, and a selective bibliography on meteorology and teaching aids.
MINING

**Going Places in Oil – American Petroleum Institute**

Sixteen young men and women in their twenties who hold key jobs in the petroleum industry discuss their work and the way they feel about it. Some of the industry’s many different job classifications are included, as well as brief descriptions of the main divisions of the industry. 24 pp. One per student; limited quantities for guidance counselors or teachers.

**Penetrating New Frontiers with Minerals Engineers – Society of Mining Engineers of AIME**

Geologists, mining engineers, and metallurgists have a variety of careers in this field.

OCEANOGRAPHY

**Careers in Oceanography – U.S. Naval Oceanographic Office**

A short description of the many areas of oceanography that are open to qualified persons. 1965. 8pp.

PHARMACY

**A Career in Pharmacology – American Society for Pharmacology and Experimental therapeutics**

Information on such subjects as: What is pharmacology, what does pharmacology offer, and how to enter this profession.

**See Your Future in Pharmacy – American Pharmaceutical Association**

Pamphlet discusses pharmacy in general, personal qualifications of a pharmacist, education, licensing and registration, opportunities in the various areas of pharmacy, and gives a list of accredited colleges of pharmacy. 16 pp.

**What Is a Pharmacist? – Upjohn Company**

Emphasizes careers in the pharmaceutical industry for people with degrees in pharmacy or related sciences.

**Why Not Be a Pharmacist? – U.S. Department of Labor, Women’s Bureau**

What pharmacists do and what to expect from this career.

PHOTOGRAPHY

**Photography in Your Future – Eastman Kodak Company**

This booklet discusses photography’s important role in today’s way of
PHOTOGRAPHY (continued)

life and the serious consideration it deserves by all young people planning for the future.

PHYSICS

Physics as a Career - American Institute of Physics
Discusses physics as a science and as a profession, physicists in industry, teaching, and the federal government; the training of the physicist, and physics organizations and publications. 1970. 20 pp. Slight cost for 10 or more copies.

RADIO AND ELECTRONICS

The Electronics Service Technician - Futures Unlimited - Electronic Industries Association
Career possibilities in radio and television service. Also available: Routes Into the Future, a list of schools offering consumer electronics servicing courses. 1970.

How to Choose a Career in Electronics - Bell & Howell Schools
Discussion of career opportunities in a wide variety of electronics fields; outline of growing demand for technicians and available areas of specialization. 1970. 36 pp.

TEACHING

A Career for You as a Science Teacher - National Science Teachers Association
Booklet discusses the rewards and challenges of science teaching, the preparation required, and the advantages of such a career. Also lists sources of further information. 1966. 24 pp.

Mathematics Teaching as a Career - National Council of Teachers of Mathematics
A leaflet discussing the questions which students ask about careers in teaching mathematics. 8 pp.

TECHNICAL WRITING

Technical Writing as a Career - Society of Technical Writers and Publishers
Deals with the following questions: Why be a technical writer? How big is the field? What are the salaries? Where is technical writing done?
TECHNICAL WRITING (continued)

Why Not Be a Technical Writer? - U.S. Department of Labor, Women's Bureau

Information about the opportunities in this career area.

VETERINARY MEDICINE

Career Facts about Veterinary Medicine - American Veterinary Medical Association

Answers these questions: What does the veterinarian do? What training is available? What qualifications are needed?

Today's Veterinarian - American Veterinary Medical Association

Qualities needed by a person who enters this profession, and a list of colleges which have this curriculum.

MAJOR CONDITIONS OF EMPLOYMENT

Please read these conditions and sign the certification statement below.

1. In order to meet the needs of patients for 24-hour-a-day, seven-day-a-week care, employees must agree to perform work over a period of 14 consecutive days (80 hours at 8 hours per day) before qualifying for overtime compensation and must be willing to accept changes in shifts and days when necessary.

2. Employment is contingent on passing a physical examination by a physician in the Employee Health Service. Any health condition which may cause hazard to yourself or others on the job must be reported and shall be good cause for terminating your employment at DEACONESS HOSPITAL with cause.

3. Any false, misleading or omitted material facts which you write on DEACONESS HOSPITAL forms are good cause for terminating your employment with cause.

4. If your qualifications meet the minimum requirements for a vacant position, you will be referred to the appropriate department for an employment decision. When this decision has been made, you will return to the Personnel Office to be processed for hiring, consideration for other positions, or your application will be placed on file for future consideration.

5. This application will be retained for six months. If you wish to be considered thereafter, you will be required to reapply for employment with an up-dated application.

6. If you are employed as a full-time employee, you will be required to enroll in a group term insurance plan after three months of employment. The amount of the insurance will be approximately your annual salary. You, along with the hospital, will contribute to the cost of this insurance on a basis to be determined by DEACONESS HOSPITAL.

7. You grant permission for the authorities of this hospital to investigate your references and release said hospital from any and all liability resulting from such investigation. Upon your termination you authorize the release of reference information on your work.

8. DEACONESS HOSPITAL is an Equal Opportunity Employer and will not discriminate on the basis of race, creed, color, national origin or ancestry.

CERTIFICATION: I have read and agree to the conditions of employment stated on this application.
