The SPAN (An Accelerated Project for a Systems Program Approaching Non-Unemployment of Vocational Students, or "Start Planning Ahead Now") career education curriculum guide provides activities that will give junior high students exposure to real work situations. Briefly discussed are the program's organization, general objectives, and various teaching methods. The guide is divided into four units: orientation to the World of Work, understanding self and others, integrating career education into subject matter, and career cluster approach to career education. Each of these units consists of unit generalizations, objectives, a topical outline, activities, resource materials, and evaluation methods. Two-thirds of the document contains appended case studies, additional instructional materials, student self-evaluation tests, learning activities, resource materials, and a brief bibliography. INTRODUCTION

Education is getting a new thrust. The big thrust is toward career education. Many see it as being the first major re-orientation of public education in modern times. Some believe it should be the backbone of all education.

The concept of career education is that all education should assist students in assessing their abilities and interests as well as providing them with the information, guidance and counseling, and basic skills needed to help them make realistic career decisions.

Although some junior high school youths are not ready to make lasting career choices, they are ready for activities that will give them exposure to real work situations, i.e., part-time or volunteer work, laboratory projects, plant tours and "rap" sessions with employees and employers.

Career education teaches students to LIVE, LEARN, and EARN.

ORGANIZATION

This unit in career education is for junior high school students. Approximately three weeks may be allowed for the unit exclusively. However, various phases of it may be integrated into the ongoing curriculum. For example, as a culminating activity of the child care unit in home economics, the students may study job opportunities in the area of child care. An English class can get extensive training in the basic skills needed to get a job, such as writing letters of application, the job interview and personal resumes.

Guidance counselors and home room teachers may use parts of the unit for occupational and educational counseling and home room guidance. The unit is developed so that each part may be taught singularly.

SCOPE AND SEQUENCE

Orientation to the World of Work
Understanding Yourself and Others
Integrating Career Education into Subject-Matter Contents
Career Cluster Approach to Career Education

Instructions for using the unit:

Blank spaces appear in parts of the unit. These blank spaces should be filled in with the name of the course or the cluster of careers that is being studied.
EXAMPLE: There are socially acceptable careers that use **mathematics** skills and knowledge ...........

or

Have students name occupations in the **health** careers cluster.

**GENERAL OBJECTIVES**

The ultimate purpose of this unit is to provide learning experiences to:

1. Foster the development of personal traits, attitudes, and habits that are necessary to succeed in the world of work.

2. Aid in developing an awareness of relevant factors, such as abilities, interests, values, goals and education and their relationship to occupational choices.

3. Familiarize students with a wide range of occupational areas to aid in formulating general career preferences.

4. Familiarize students with specific high school courses that offer training related to various desires, acquired skills, innate abilities and the projected demands of industry and business.

5. Help students acquire skills and the expertise that will facilitate decision making processes.

**METHODS**

Success in teaching a career education course depends primarily on the degree to which it is student-centered. Each student should be allowed to analyze his interests, talents, personal traits and abilities to see how he can fit into our vast economic system. Therefore, the students need to be "involved" from the very first day and throughout every phase of the course.

Questionnaires and/or a pre-test may be used at the beginning of the course "to find" where the student is. A similar instrument may be used at the end of the unit to measure the student's growth.

Case studies may be used to stimulate interest and to develop problem solving, decision making techniques.
Students love to "get into the act". Socio-dramas may be used to teach many phases of this unit. This method along with other group activities is especially effective with the slow learner.

In working with the advanced or accelerated students, it is desirable to give them special projects that are more stimulating. Select learning experiences that will lead them to form concepts and generalizations independently. These students may be able to handle activities and projects that require outside research, study, and problem solving.

Artistic students in the class should be given special projects that will utilize their talents and give them a medium for expressing their ideas and interests in the world of work. They may be asked to draw cartoons, set up displays, design posters, bulletin boards, and other visual aids.

Primary sources of occupational information are the worker and the employer. Therefore, students should have direct, personal contacts with employees and employers through personal interviews, field trips, "rap" sessions with workers and classroom symposiums. The students should be permitted to ask questions and discuss freely all aspects of the job.

"Learning by doing" is still considered the best educational method. Students should be permitted, when at all possible, to handle and use the tools and experience some activities of the workers. This can be achieved, to some extent, in laboratory classes. In some cases, students may obtain part-time or summer jobs to earn money, and acquire some expertise in the world of work. Where funds and plant facilities are available, a career education laboratory can provide exploratory activities for students in various career areas.
ORIENTATION TO THE WORLD OF WORK

Generalizations:

1. An appreciation of the world of work in a democratic society helps one to understand the vital contribution made by each worker.

2. Knowledge of available job opportunities tends to help individuals plan for the achievement of goals.

3. Socio-economic and technical developments are continuing to require more skillfully trained people.

4. High school and post-high school vocational training offer preparation for a wide range of occupations.

Objectives:

Upon completion of this unit the students should be able to:

1. Identify three factors that affect the availability of jobs.

2. Discuss in written form or orally the value of work in a democratic society.

3. Relate in an essay the importance of vocational education as preparation for the world of work.

4. List the three primary sources of information regarding jobs.

5. Use objective criteria for examining various careers.

6. Formulate clusters of careers when given a list of various occupations.
I. Relationship of employment to society
   A. Factors affecting today's job market
   B. National, state and local employment trends
   C. Implications of employment trends for workers.
      1. Increased education
      2. Increased competition of workers
   D. Benefits derived by individuals from work

II. Laws and regulations related to employment
    A. Child labor law
    B. Work hours
    C. Minimum wage
    D. Unemployment insurance and workmen's compensation
    E. Social Security
       1. Purposes
       2. Coverage benefits
       3. Eligibility contributions
    F. Fringe benefits of employment
       1. Pension-bonus plan
       2. Profit sharing

ACTIVITIES AND EXPERIENCES

Have resource person discuss employment trends, laws, regulations related to employment.
Class discuss new industries and businesses in Memphis area and affect on the community.
Example: Schlitz Brewery
Class discuss businesses and industries that have closed, considered closing or cut down on production and their affect on the community.
Example: RCA
Invite a person from the social security office to discuss social security.
Have students get social security cards. Ask school guidance counselor to discuss child labor laws and working papers for minors.
Study references to determine laws and regulations, such as licenses, certificates, etc., pertaining to certain jobs. List on chalk board.
Have class committee survey local businesses to find out what fringe benefits they offer. (Report to class)

#### III. Factors affecting choice of career

- A. Job preferences
- B. Job availability
- C. Job requirements
- D. Future prospects of job
- E. Nature of work
- F. Earnings

- Define terms used in discussing occupations: white collar, blue collar, managerial service, professional, semi-professional, skilled, unskilled.

- Discuss kinds of education and their relationship to employability: general, vocational, college preparation. Conduct a panel on the values of each.

#### IV. Preparation for a cluster of occupations

- A. Job trends
- B. Job location
- C. Job security

- Discuss the meaning of career clusters. Invite vocational teacher from local high school to speak on preparation for career clusters.

- Conduct group discussions to determine advantages of preparing for a career cluster. Have students identify the career cluster of the occupation in which they are interested.

#### V. Entrance into a career

- A. Methods of locating a job
  1. Daily newspaper
  2. Classified telephone directory
  3. Community services
     a. Tennessee Employment Security
     b. Chamber of Commerce

- View film or filmstrip on getting a job. Summarize information presented.

- Resources
  - HANDBOOK FOR YOUNG WORKERS

ACTIVITIES AND EXPERIENCES

RESOURCES

c. Urban League
d. School counselors

B. Entrance on trial basis
   1. Part-time work
   2. Summer work
   3. Co-op training

C. Methods of applying for a job
   1. Personal resume folder
   2. Letters of application
   3. Application forms
   4. Obtaining recommendations
   5. Personal interview
      a. Be punctual
      b. Dress appropriately
      c. Be well groomed
      d. Respond in a clear, concise and interested manner
      e. Relax

D. Job Analysis

Interview students who have had part-time or summer jobs. Report to class how jobs were located.

Discuss contents of personal resume.

Have students write a sample letter of application.

Have pupils fill in sample application blanks from local employers.

Simulate a personnel office. Have students role play the right and wrong way to behave when being interviewed.

Have each student do a job analysis on an occupation in which he is interested.

EVALUATION

1. Note students' interest in resource person's presentation and questions asked.
2. Score individual projects using an objective rating device.
3. Confer with students individually to discuss their educational plans.
4. Note students' participation in panel discussions.
5. Note students' contribution to class discussions.
6. Check students' information obtained in interviews.
7. Observe students' attitude toward work.
8. Check students' understanding of concepts and attitudes toward work in written essays.
9. Use objective tests to determine retention of information.
UNDERSTANDING SELF AND OTHERS

Generalizations:

1. As a person improves his personal qualifications and acquires skills, his opportunities for employment tend to increase.

2. Both employers and employees make contributions to the job which can result in mutual satisfaction and effective job performance.

3. When one has an accurate concept of himself, he has a sound basis for making himself employable.

4. Continuous educational and career plans enable one to take advantage of educational and other opportunities for increasing employability.

Objectives:

Upon completion of this unit, the student should be able to accomplish the following objectives:

1. To demonstrate, through the ability to get along with others, increased maturity, self-understanding and understanding of others.

2. To list at least five personality traits that one must acquire to be successful at school and in the world of work.

3. To demonstrate, by improved personal appearance, the importance of being well groomed and the factors that affect it.

4. To demonstrate the ability to make independent and rational decisions when analyzing case studies.

5. To discuss orally or in written form the tangible and intangible advantages of personal efficiency.

6. To identify attitudes and characteristics which contribute to success in school and on the job.

7. Make a personal educational and vocational plan based on interests, skills, and capabilities.
I. Identify personal goals, interests, and abilities

Pre-test to determine student's attitude toward self and work. Have students write an autobiography describing several factors that have influenced their lives and their plans for the future.

II. Employer's criteria of characteristics important to successful job performance

Have students complete open-ended statements. Example: When I finish high school I ________: In spite of my shortcomings, people like me because ________.

III. Employee's point of view concerning personal characteristics which contribute to efficiency and harmonious working relationships

Invite a personnel director from a local business, industry, or employment service to discuss characteristics that are important for successful job performance. Invite a worker to give his point of view on personal characteristics that contribute to efficiency and harmonious working relationships.

IV. Characteristics of maturity that relate to employment

Role play conflicts between employer and employee: two or more co-workers. Divide into buzz sessions and discuss how problems could have been handled more effectively if more respect and consideration for each other had been shown by those involved.

Define and discuss ethics.

- **C. Wage earning experiences**
- **D. Acquaintances with a variety of people**
- **E. Management of personal resources**
  1. Time
  2. Money
  3. Energy

**VI. Personal traits that influence employability**

- **A. Definition of personality**
- **B. Values: source and importance in determining one's future**
- **C. Independence vs dependence**
- **D. Self evaluation and self discipline**
- **E. Attitude and mental health**
- **F. Sense of humor**

### ACTIVITIES AND EXPERIENCES

**V. Education and experiences as an opportunity for growth toward employability**

- Make a list of opportunities for vocational-technical training in the Memphis Area.

**VI. Personal traits that influence employability**

- Class discuss what is meant by personality. Then list desirable personality traits which they admire in their friends, also list traits which employers might desire in employees, compare similarities and relative importance in both categories.
- Either develop a personal appearance and attitude rating scale or use one already constructed. Students rate themselves. Students analyze their rating plans which could be improved, discuss with teacher in private conference.
- Have students check their school attendance record, analyze from the view-

EVALUATION

Note student's reactions to resource persons.

Personality check list score.

Judge whether student's proposals for meeting problems are mentally healthy or unhealthy.

Observe student's personal assessments.

Observe student's techniques in analyzing case studies and problem solving techniques used.

Note student's completion of open ended statements.

Objective test of personal traits that contribute to employability.

Observe student's portrayals in role playing scene.

Student's knowledge of opportunities for vocational training in the Memphis area.

Check student's ability to analyze job requirements.

Observe change of attitudes in students toward work.

Student's expression of occupation preference.

Discuss formula for achievement:

Aspirations (setting goals) + abilities (talents of various kinds) +
action (effort with purpose and enthusiasm) = Achievement (reaching goals)

Discuss cases from newspaper of persons who have overcome obstacles to achieve goals. (Example in appendix)
INTEGRATING CAREER EDUCATION INTO SUBJECT MATTER

Generalizations:

1. One's satisfaction in the choice of a career is influenced by his understanding of the related occupations.
2. Occupations differ in the qualifications they require for successful performance.
3. There are socially acceptable jobs that use skills and knowledge for a wide range of interests and capabilities.
4. Learning to work is an educational process.
5. All aspects of education contribute in some way to occupational competency.

Objectives:

Upon completion of the study of occupations that utilize skills and knowledge obtained in courses, the student should be able to accomplish the following objectives:

1. From a list of occupations identify and classify those occupations that utilize skills and knowledge.
2. To discuss either in written essay or orally some personal traits and skills required for the broad areas of occupations in ______.
3. To list the courses taught at the high school level in the Memphis area that train in skills and knowledge.
4. To identify the institutions, high schools and schools of higher learning from which post high school training can be received.
5. To become aware of the demand for persons trained in skills in our changing economy through the discussion of newspaper ads.

Objectives for Laboratory Experiences:

The laboratory activities suggested at the ninth grade level should enable the students to accomplish the following objectives:

1. To use acquired skills to earn money on part-time basis for self and/or class activities.
2. To discover opportunities for volunteer or part-time work that require skills and knowledge in subject matter.
3. To decide if personal traits, interests, and skills meet the criteria for a major in ______.

</table>
TOPICAL OUTLINE

ACTIVITIES AND EXPERIENCES

RESOURCES

Take a field trip to the nearest high school. Observe the various related classes. (Note: Teacher make arrangements with teachers in the high school to make the trip a special treat).

Take a field trip to businesses and institutions employing people at all levels in jobs using skills and knowledge. Follow-up field trip with a discussion of the importance of the job that is being done at all levels: Semi-skilled, skilled, technical and professional.

Have students make mobile showing job opportunities in __________.

Have each student draw a cartoon or make line drawings representing a worker in the areas of __________. Write a brief description of his job. Use these to make transparencies for use on the overhead projector.

Have a student committee plan and set up a "Career in __________" display in the school's showcase or main foyer.

Discus occupations which deal with "things", "people", or "ideas". How does one's personality affect the choice of occupations in these categories?

V. Job descriptions

VI. Personal interest and traits

See appendix

Example: Line diagram of home economics opportunities in appendix.

<td>Invite a personnel representative to speak on preparation for career clusters or families. Participate in group discussion after presentation to determine advantages of preparing for career clusters. Identify career clusters in subject matter area.</td>
<td>Tennessee Employment Security</td>
</tr>
</tbody>
</table>
EVALUATION

At the end of the course each student should be able to discuss intelligently each related occupation that is listed on the chalk board.

Note student's special occupational interests for guidance purposes.

Quiz students objectively to determine their knowledge of terms.

Observe committees at work and note individual contributions.

Confer with students individually to discuss their projects and educational-vocational plans.

Observe student's reactions to the presentations of resource people.

Check written information obtained in personal interview.

Observe interest and questions asked at interviews, symposiums and on field trips.
CAREER CLUSTER APPROACH TO CAREER EDUCATION

Generalizations:

1. Because of modern technology, employment patterns are changing as compared to 50, 25 or even 10 years ago.

2. An understanding of career clusters and employment opportunities in an area aid in the decision to enter a career area.

3. There are specific personal qualities that contribute to success in each career cluster.

4. The process of identifying the differences and similarities in the capabilities required of jobs within a cluster aids in the making of realistic career choices.

Objectives:

Upon completion of the exploration of several career clusters, the student should be able to accomplish the following objectives:

1. List the general aptitudes and abilities needed for success in two or more career clusters.

2. Identify numerous tasks and responsibilities related to the occupations he is exploring.

3. Identify at least two career clusters which appeal to his interests.

4. Relate information on training and experience required for entry level positions in the preferred careers.

5. Identify alternate choices in case vacancies in chosen career do not present themselves.

6. Relate the disagreeable aspects of his chosen career.

7. Identify the different competencies required of various jobs within a career cluster.

8. Identify the similarities in competencies required of various jobs in a career cluster.

9. Tentatively identify with a career cluster.

| II. Define career clusters | |
|----------------------------| Involve students in defining career clusters. |
|                            | Discuss symbols for each cluster. |

| III. Identifying* occupations | Permit students to discuss occupations of parents who work in the area. |
|                              | Group students to listen to cassette on occupations in career cluster being studied. |
|                              | Collect "Help Wanted" ads from local newspaper. Determine which jobs are in the careers cluster. What percentage of the ads fall into this category? |
|                              | Analyze the Yellow Pages of the local telephone directory for possible locations of occupations related to cluster being studied. |

| A. Classify occupations in cluster | Determine which occupations in the cluster are unskilled, semi-skilled and skilled. |
| 1. Unskilled | |

* Fill in blank with the career cluster that is being studied

**B. Group occupations according to training required.**

1. High school
2. Post-high school
3. College

**IV. Trends and outlook**

Use want ads to determine the number of jobs in the career cluster being studied.

Invite a representative from the local employment security commission office to discuss the employment situation.

**V. Explore occupations in cluster**

A. **Printed materials**

- Have students to select two or three occupations in the cluster for which they have interest and aptitude and would like to study in detail.
- Allow time for students to do individual research to secure information on selected occupations.
- Permit students to give oral reports on one of their chosen occupations.

B. **Audio-visual aids**

- Show movies, filmstrips and other audio-visuals to give students some insight into the nature of __________ careers.

C. **Resource persons**

- Have each student to interview a person who is working in one of his chosen occupations.

**Resources**

- Local school catalogs
- Occupational Outlook Handbook
- Computerized Career Information Service
- Info"
ACTIVITIES AND EXPERIENCES

D. Field trips

Invite employees and/or employers to discuss their work with the class. Invite representative from technical institute or college to discuss training programs in the _______ cluster.

VI. Opportunities for training in _______ career cluster

A. High school

Class discuss the relationship between education and lifetime earning. Stress the need for completing high school.

Field trip to vocational departments in high school.

B. Community colleges, vocational and technical institutes

Obtain brochures and catalogs from area schools and colleges to discuss training programs.

C. Apprentice programs

Invite local representative of apprenticeship programs to speak to class.

VII. Laboratory Experiences

Assist students in planning activities that will demonstrate skills that are common to most occupations in the cluster that is being studied.

RESOURCES

See appendix

EVALUATION

Pictorial and/or oral discussion of factors related to the career the student is exploring.

Note student's special career interest for guidance purposes.

Quiz students objectively to determine knowledge of careers.

Observe student's contribution to classroom discussion.

Observe students' interest and questions during field trips, interviews, etc.
CASE STUDIES IN OBTAINING AND HOLDING JOBS

CASE I.

Sandra Z. first applies at an employment service office at the age of 16. She said she needed a job urgently because she was living with her sister. When she reported to the employer and was told her wages she immediately replied that friends advised her not to work for those wages and that she wasn't interested. The employer contacted the counselor and said that he would not hire this applicant under any circumstances. Her attitude and manner were so unsatisfactory that he felt she should not be referred again.

CASE II.

Mary S., 19, is tall and attractive. She went to art school in Cleveland for half a year, was dissatisfied and quit in February. The employment office referred her to a job that did not require experience but included Saturday work. She informed the employer that she wanted Saturdays free to visit friends in Cleveland.

When given the name of the person with whom she would be working, Mary exclaimed, "Oh her! I fought with her all through high school." Needless to say, Mary did not get the job. The employer reported that he did not consider her mature enough.

CASE III.

Lenore had excellent experience as an accounting clerk, stenographer, and general office clerk. She was also an efficient typist. She was, however, quite short; her hair was long and uncombed, and her clothing loud. She was referred to a large industrial plant for a job as accounting and payroll clerk.

The personnel manager said that he wished he could employ her, but because of her appearance he feared she would not fit in with the other girls in the office. Her lack of neatness and poor taste in clothing resulted in her not being hired.

CASE IV.

Mary wanted a job with hours like those she had while attending school. The job must also be in her neighborhood; she did not want to travel downtown; the working conditions must be just right with pleasant surroundings and congenial co-workers. Mary insists on these special requirements and is still unemployed.
CASE V.

Agnes was placed with a local newspaper. Her duties were proofreading and teletyping. After two days she quit without notice and reported to the counselor that she disliked the job because the major work was proofreading.

CASE VI.

June graduated from a high school commercial course and was sent to her first job as a stenographer at $45 a week. She worked about 10 days and then quit. Her duties, she said, were too varied; she wanted more stenographic work. The counselor found her another job at the same rate of pay per week. She worked only one day because the dictation was too heavy.

NOTE: THE TEACHER CAN MAKE UP SITUATIONS TO PINPOINT IDEAS TO INDIVIDUALS IN THE CLASSROOM WITHOUT EMBARRASSING THEM OR SINGLING THEM OUT.
The following story clipped from a newspaper a few years ago illustrates how one man overcame serious obstacles to achieve his goals.

CASE I. "Expert Who Saved Many from Cancer Is Dead of Same Disease"

"Dr. Grant B. Ward, sixty-one, cancer expert of Johns Hopkins University, died today of the same disease from which he had saved countless patients."

"Dr. Ward overcame a tremendous handicap to continue his career after a tumor on the spinal cord of his neck in 1942. The tumor was non-cancerous but its removal cut a nerve and deprived him of the power to raise his right hand and to bend his elbow."

"Although he could still use the fingers and forearm muscles of his right arm, Dr. Ward's career as a surgeon appeared ended. But with the help of experts in appliances, together with his own determination, Dr. Ward made a steel and leather harness equipped with springs to perform actions of his useless muscle."

"To win over his handicaps, Dr. Ward developed certain special skills with his left hand. He asked for no special adjustments in the operating room, except that the table be raised to a higher level. The internationally known expert on head and neck tumors continued performing very difficult and delicate operations."

Question: What were Dr. Ward's aspirations? What special abilities did he develop? What action did he take?

CASE II "The Dropout Who Came Back"

"Joe Sorrentino has 25 scars on his hands to prove that he is a street fighter. By the time he was 16, he had flunked out of high school four times, had been sent out of the Marines, and had lost 30 jobs. The second oldest of seven children, Joe always wanted to be an 'achiever,' and in his neighborhood an achiever had to be handy with his fists. A veteran of more than 100 rumble street fights, when he was in his first year of probation, he flunked out of high school. Not long after he enrolled in another high school at night -- he failed there also. In a third try at high school he didn't last a semester."

"At 14, Joe had begun trying his hand at various jobs, achieving a record for failing which was 'better' than even his school career. On his first day of work at a bleach factory, he attempted to carry 10 gallons of bleach to a truck he was loading and dropped all 10.
Joe later worked in a sweater factory, where he had the embarrassing experience of being awakened from a nap by the President of the company. Another job opportunity for Joe came through a furniture company's ad in the newspaper which read: "Want ambitious young man who seeks responsibility." After a month of aligning wheels of teacarts, he got tired of responsibility.

Joe enlisted in the Marines when he turned 18 but could not stand the discipline, and rebelled. He fought with recruits, rioted in the mess hall, and tried to run away. Judged an "incorrigible" by the Marines, he was sent packing with a General Discharge. Back home, he was a hero to his old street gang buddies. But within himself, Joe felt ashamed. At 20, he came to realize that his only chance for a better life was through education. So he went back to high school, for the fifth time, at night, working days in a supermarket. After two years, he graduated with the highest average in the school's history.

Despite only fair results on college entrance exams, his grades got him admitted to the University of California. At first, Joe felt he had nothing in common with the college youths who talked about summer vacation and beach parties --- things he knew nothing about. But he stuck it out and in his senior year, was elected president of the student body. After graduating with honors, Joe went back into the Marine Corps for two years, feeling that he had to make up for his past record. He did. This time he became a platoon leader, highest scorer in athletic competition, and changed his General Discharge to an Honorable one.

In June of last year, 30-year-old Joe Sorrentino was valedictorian at Harvard Law School. Joe has received several offers to work for major U. S. law firms. Instead, he wants to serve a term as an assistant U.S. or State Attorney in California.

Questions:

1. Identify some of the attitudes and values that Joe had before he finished high school, and compare them with his later outlook on life.
2. What can we learn from Joe's case about job opportunities and the economic rewards that are available in our economic system?

CASE III.

"I'm a die designer. We draw up the prints when somebody has a bright idea for a new die. Dies are tools that are used in the plant for shaping material for machine production. They come around to the planner and ask him whether or not we should work on it. They then give it to us and we have to design a die that will compete with one that they might have had designed outside the firm."
"I used to make dies, that's how I got started. I came to XYZ Corporation for my apprenticeship right out of high school. I had a friend whose father was a supervisor and this fellow started in here. In those days employment was tight and it wasn't easy to get a job, but I came in after my friend did. He told me about it and managed to get me in. But I wasn't doing tool and die work then. They started me on the assembly line. I worked on the line nights. But after I was in the plant for a while I looked around and I thought that I'd like to go into die work."

"You'd walk into the die shop and it was always so neat and clean. They clean the machines up every weekend. The floors were always clean. Well, one of the supervisors thought I could learn the work so he took me on as an apprentice. I had to take a cut in pay but it was worthwhile."

"So I started at the bottom. Along with your work on the job you were supposed to go to school at night. We started there by taking what they called a five year course. I finished it up in 2,800 hours. That meant something. They taught us all that an engineer learns, but from a practical standpoint."

"I'm always trying to do the best job I can. XYZ is my company. I'm going to stick with them until they cross me up. Until now they've been very good to me. If the work I do doesn't satisfy them, well, that's just too bad. I always do the best work I can."

"When I got back from the Army after the war I thought I should be in a higher position. I never said anything about it but one day the boss called me into his office and he asked me if I wanted to be a designer. I had never been any great shakes at drawing in school but I figured I'd have a go at it. Well, that's what I'm doing today and I'm one of eight in the whole plant. What I draw and design in eight hours makes enough work to keep production men busy for fifty or sixty hours."

"The engineers in our firm who are college graduates have to come to me to ask questions. I won't take anything away from them, they're smart. They know all about stresses and strains but when they want something done they have to come to me. That's something I'm very proud of."

Questions:
1. How would you describe this worker's attitude toward his job? Toward life?
2. Do you think this worker has achieved success? Why?
1. The three things in life that are most important:
   A. 
   B. 
   C. 

2. The three things I wonder about most:
   A. 
   B. 
   C. 

3. The three things about myself I need to improve:
   A. 
   B. 
   C. 

4. The three things I think I'm good at:
   A. 
   B. 
   C.

19. Workers should not attempt to do something unless they are specifically told to do so.

This device may be used as a pre-test of student attitudes. It could serve as a guide for class discussion.

Illinois Teacher, Vol. XI, No. 5
Spring 1967-68
PERSONALITY INVENTORY

Here are twenty traits without which, though you may have ability, brains, skill, and information, you can hardly expect to succeed in competition with other people. Grade yourself:

- Excellent: 5 points
- Good: 4 points
- Average: 3 points
- Fair: 2 points
- Poor: 1 point

Those traits in which you score 3 points or below are the ones that you should improve.

1. IS SOCIABLE: Smiles a great deal; gets along with people; and has a keen sense of humor.

2. IS COURTEOUS: Considerate of other people; gives extra service; and says "Please" - "Thank you."

3. SPEECH IS EFFECTIVE: Expresses ideas clearly and convincingly; and speaks distinctly.

4. IS COOPERATIVE: Helps fellow workers and customers; is willing to assume responsibility; and works for the organization.

5. HAS INITIATIVE: Makes best use of time; thinks up new ideas; and makes suggestions for improvements.

6. IS AMBITIOUS: Wants the business to succeed; wants to see others succeed; and is a "doer," not a "dreamer."

7. IS TACTFUL: Says the right thing at the right time; does not argue; and makes the other fellow feel he is doing things his way.

8. IS ENTHUSIASTIC: Is not afraid of hard work; likes people; and does his job as if he owned the business.

9. IS CONSIDERATE: Makes an effort to see the other fellow's point of view; and is always on the alert to help others.

10. IS ORDERLY: Systematizes his work; keeps things in their proper place; and is a clean storekeeper.

11. IS HONEST: Must be held in highest confidence; takes responsibility for his own errors; and avoids temptation, bad companions, and bad personal habits.

12. IS DEPENDABLE: Is always on the job; observes company policies and procedures; and does what he is told to do.
13. HAS SELF-CONFIDENCE: Believes he can and will succeed; does not know it all; and never alibies.

14. IS LOYAL: Believes in the company for which he works; knows people who are qualified will be advanced; and observes company policies.

15. IS INTELLIGENT: Knows what he is doing; knows his merchandise; and makes an effort to learn new methods.

16. IS ADAPTABLE: Makes adjustments easily; welcomes changes; and judges new ideas on merit rather than by prejudices.

17. MEMORY: Remembers and can associate names and faces; is able to retain essential facts; and discards nonessentials.

18. IS ECONOMICAL: Saves time and effort by being efficient; watches use of supplies, equipment, etc. that are costly; and saves his own money as well as money for his employer.

19. USES JUDGMENT: Bases judgment on facts; makes decisions on merit; and is noted for sound judgment.

20. HAS PERSISTENCE AND PATIENCE: Does not lose patience easily; tries again and again, and is not easily discouraged.

TOTAL: ___
### WHAT ARE MY INTERESTS

**INSTRUCTIONS TO STUDENT:**

If you had to select one or more of the jobs below, which do you think would be most interesting? Check as many as you find of interest to you—numbering them in the order of your preference.

**SUCCESSFUL DEVICES IN GUIDANCE AND COUNSELING**

Rudolph F. Wagner
"Each group represents an INTEREST AREA. If you have checked a job in GROUP A, it probably would indicate that you have an interest in mechanical things—that you like to work with your hands and use tools and machinery.

GROUP B might indicate an interest in numerical work—a liking for figures and mathematical calculations.

GROUP C represents a few jobs which could be classified as "technical" and usually reflects an interest in work of a scientific or engineering nature.

GROUP D jobs show a preference for working with people—the selling and promotional occupations.

GROUP E jobs are clerical in nature—indicating an interest in office work and business procedures.

GROUP F indicates artistic interests—a liking for interpretive activities dramatic and literary jobs could also be listed in this group.

"When considering your job interest, keep in mind that interest alone does not necessarily spell success in a job. Thousands of boys are interested in baseball, but very few could make even the minor leagues as players. This is of special importance when considering the more unusual or glamorous fields, such as acting, opera singing or deep-sea diving. Remember that each job has its own special value, and that practically every job calls for some special skill, ability or talent. The job of draftsman, for example, requires ability to concentrate and visualize, along with a knowledge of mechanical drawing, shop techniques, blueprint reading and mathematics. Satisfactory grades in most of these subjects in high school are a MUST for the successful draftsman in today's industry.

"Similarly, an interest in the clerical field—particularly in stenographic and secretarial work—must be supported by many special abilities and talents. Typing requires a high degree of physical coordination, manual speed and an ability to read rapidly. The good secretary must have a keen memory, a good vocabulary, legible penmanship and a sound foundation in language, spelling and grammar. Good grades in high school English, arithmetic, bookkeeping, typing and shorthand are certainly valuable assets to the high school graduate looking for office work. Try to keep your interests within the practical limitations of your abilities and talents.

"Once you have discovered these real interests, however, you will probably have a fairly accurate estimate of your talents and aptitudes. Your high school grades are usually a good indication of both. Your parents, friends, teachers and counselors know you, and can be of help in determining your personal qualifications. Moreover, these people have a definite INTEREST IN YOU, and should be consulted before making your final occupational choice."
SUGGESTIONS FOR HIGH SCHOOL STUDENTS REGARDING JOB INTERVIEWS

Personnel executives have been asked in many studies to list the most important things the graduating senior can do in order to make a favorable impression during the job interview. One such study came from 153 companies whose findings were reprinted in Educational and Vocational Planning by William Martinson (Scott, Foresman & Co., 1959).

High on their list of priority were the following suggestions:

Know what field of work or job he is interested in and why.

Understand his interests and abilities.

Show a knowledge of the company and its products or services.

Read company literature in the placement office.

Dress properly—neatly. A good appearance.

Try to be relaxed—at ease. Act naturally.

Ask questions about the company or job which are sensible—intelligent—pertinent—discriminating—well thought out.

Display an interest in the company and the job.

Be sincere—forthright—frank.

Show an ability to express himself clearly; good use of English.

Have a scholastic record which is average or better.

A Drama for Classroom or Assembly Program

THE DROPOUT LOOKS FOR A JOB

As industry uses more and more automation, jobs for unskilled workers are rapidly disappearing. One study shows that such jobs are disappearing at the rate of 250,000 each year. What do you suppose will happen to the teenagers who drop out of school before they are prepared for jobs?

THE FOLLOWING SCENE TAKES PLACE IN THE EMPLOYMENT OFFICE OF A LARGE ELECTRIC UTILITY COMPANY. PETE IS SEATED IN FRONT OF A DESK. BEHIND THE DESK IS MISS ANDERS, A PERSONNEL INTERVIEWER.

ANDERS: What kind of job are you looking for, Pete?
PETE: Oh, I don't know. Just anything, I guess, Miss Anders.
ANDERS: Tell me about your qualifications.
PETE: My what?
ANDERS: Your qualifications. What would you have to offer our company that would make us want to hire you?
PETE: Well, I like to fuss around with telephone lines.
ANDERS: But we're not a telephone company. We're an electric utility company. What qualifications do you have for our company?
PETE: Guess I don't have any.
ANDERS: Tell me, Pete, how did you get along in school?
PETE: Not so good, I guess. The teachers always yapped about me being late, and they gave dumb tests about things I'd never use. So I quit.
ANDERS: Well, Pete, I can tell you this. If you have a job, your boss expects you to be on time.
PETE: I would be—if I had a job. That's different from school.
ANDERS: Are you sure? Don't you know that when you're in school, that's your job?
PETE: But you don't get paid.
ANDERS: But in money, but you're preparing yourself for a future job that does pay. The more education you have, the more the job pays. Your teachers are fussy about your being on time, doing your assignments, and taking tests. They are trying to help you learn good work habits.
PETE: But you don't have to take tests on a job...
ANDERS: On, yes you do, Pete, each one of our employees is on probation for six months. During this period he's on trial. At the end of six months he is graded by his supervisor, who turns in the grades and a long report to us. If the grade is satisfactory, the employee enters another probationary period. He must complete this period successfully before he's given permanent employment.
PETE: Guess I didn't know.
ANDERS: Did you know that before we hire anyone we check his grades at school?
PETE: Gosh, I'm a dead duck then.
ANDERS: Pete, you know how the baseball team managers go all around the country trying to find the very best qualified men for their teams.

PETE: Sure, they gotta have a good team.

ANDERS: Yes, they do. So does any business. Every businessman wants the very best qualified person he can find for any job opening that comes up. He's going to check applicants for attendance and punctuality, for grades, for attitude, for their interest in taking part in school activities.

PETE: You're saying that I don't have a chance, aren't you?

ANDERS: Right now, yes, Pete. You need more education. Look at your application form. What is this first word?

PETE: It says "print."

ANDERS: Exactly. But you wrote instead of printing. This tells me that you don't follow directions well.

PETE: But my printing is terrible.

ANDERS: What about these empty spaces?

PETE: I just didn't know what to put in them. I don't know what to put in them. I don't know what some of the words mean.

ANDERS: Marital status? We merely want to know whether or not you are married.

PETE: Oh!

ANDERS: I'm trying to help you for your next application, Pete... Remember when I asked you what kind of job you were looking for and you said, "just anything?"

PETE: Well, I am. I'm looking for a job. I'll take anything.

ANDERS: But, Pete, can't you see how we look at a statement like that?

PETE: No, I can't.

ANDERS: Before you apply for a job, you need to find out all you can about the company. Then you decide if you have any skills to offer for a particular job. Believe me, Pete, you must have something definite to offer. There's too much competition for jobs that don't require a great deal of education and training. There are about seven million young dropouts like you competing for the few jobs open for unskilled help.

PETE: Wow! Makes a guy stop to think, doesn't it?

ANDERS: It should, Pete. Why don't you give it some serious thought? Then decide what you should do.

PETE: Thank you, Miss Anders, I will.

ANDERS: And remember, Pete, good habits are your servant; bad habits are your master.

FILL IN THE BLANK SPACES BELOW

1. What kind of job did Pete say he was looking for?

2. Why did Pete say he quit school?

3. What did Miss Anders say about school as a job?
4. Do business organizations have any kind of test for their employees?__________________________

5. Employers usually check with schools about the qualifications of a person applying for a job. Name three things they check for.__________________________

6. What impression of Pete did Miss Anders get from the way he filled out the application form?__________________________

7. What does marital status mean?__________________________

8. Name two things you should do before applying for a job.__________________________

9. Should a job applicant say he will do just anything? And Why?__________________________

10. With how many dropouts was Pete competing for a job?__________________________

11. MATCH THE DEFINITIONS
   ___ 1. qualifications a. a person who asks for a job
   ___ 2. automation b. promptness
   ___ 3. assignment c. the way a person looks at things
   ___ 4. probation d. a person who works hard
   ___ 5. applicant e. the abilities that are needed to fill a certain job
   ___ 6. punctuality f. a contest: rivalry
   ___ 7. attitude g. the use of machines to do work that used to be done by people
   ___ 8. competition h. work given to be done: tasks
   ___ h. a trial period

12. What do you think Miss Anders meant when she said, "Good habits are your servant; bad habits are your master"?

13. Why do you think Miss Anders did not hire Pete?
14. Do you agree or disagree with Miss Ander's judgment about Pete?

15. We get an idea of what Pete thought about his teachers. What do you think the teachers thought about Pete?
APPLICATION LETTER

872 Shady Avenue
Memphis, Tennessee 38108
June 1, 1971

Mr. William S. Johnson
Personnel Director
A-1 Construction Company
1260 East Seventh Street
Memphis, Tennessee 38120

Dear Mr. Johnson:

In response to your advertisement for a draftsman in the May 31, 1971, edition of the Commercial Appeal, I should like to apply for the position. As I have indicated on the enclosed personal resume sheet, my draftsman qualifications meet the high standards of your company.

I graduated in the upper fourth of my high school class. In addition to the drafting courses I took in high school, I have taken drafting courses at the Area Vocational School. I plan to continue my training in this field by taking night courses at the Memphis Technical Institute.

While in high school I participated in a cooperative education program in which I worked part time in the drafting department of International Harvester Company. The manager of that department, Mr. Oscar Reddick, has given me permission to list his name as one of my business references.

I enjoyed my drafting classes at school and my work at the International Harvester Company. I should like to continue in the field and make it my career. May I expect to be called for an interview? My telephone number is 684-5234.

Sincerely yours,

Joseph W. Webster

Enclosure
PERSONAL RESUME

Name: Joseph W. Webster
Address: 872 Shady Avenue
Telephone: area code 901 684-5234

Height: 6' 1"
Weight: 190 pounds
Marital Status: single

Did the workers seem happy?

How do you make application for a job here?
"What's My Line?"

(A classroom learning activity that is played like the television game, "What's My Line?.")

Each student researches a job in which he is interested. He should be prepared to answer questions about his occupation. A panel of four, a timekeeper and a moderator are selected. The teacher may prefer to serve as moderator, because occasionally he will have to intervene and qualify answers.

Students volunteer to be questioned about their occupations. Each panel member questions for one minute, after which the timekeeper blows the whistle and the next panel member takes up the questioning where the last left off. In the event the panel does not guess the occupation in seven minutes, the student being questioned tells what he does. After the first panel has questioned the four volunteers, the four having been questioned serve as a panel member and as the guest with the job.

The game gets off to a good start when the panel is given some leading questions. The panel may start the questioning by finding out whether the job is of a manual, mechanic, etc., nature.

SOCIAL SECURITY NUMBER:

Everyone who works, regardless of age, must have a social security number. You must have a social security number before your employer can pay you. To obtain a number fill out an application at the Social Security Administration, 242 Federal Office Building, 167 N. Main St. or the office at 1796 S. Third St.

BIRTH CERTIFICATE

To obtain a work permit or to prove to an employer that you are old enough to work, you must have a copy of your birth certificate.

If you were born in Shelby County then go to the Shelby County Health Department, 814 Jefferson to receive a copy. There is a $2.00 fee.

If you were born outside of Shelby County but in Tennessee, write to the Division of Vital Statistics, Tennessee Department of Public Health, Cordell Hull Building, Nashville, Tennessee, 37219. If you were not born in Tennessee, write to the Bureau of Vital Statistics, State Board of Health, in the capital of the state in which you were born. Include your name, birthplace, date of birth, time of birth (if known), your mother’s maiden name and your father’s name. Be sure to enclose the $2.00 fee and the address where you presently live.

WORK PERMIT

If you are not 18 years old and have found someone who wants you to work for them, you must have a work permit.

If you live in the city you can obtain a permit at the Memphis Board of Education, 2597 Avery. If you live in the county a work permit can be obtained at the Shelby County Board of Education, 160 S. Hollywood. You must take a copy of your birth certificate with you. You will be given papers to have signed by your doctor, prospective employer, and your parents or legal guardian. If you live in the county your parents must accompany you. As soon as these papers are returned you will be issued a work permit.

14 and 15 Year Olds ---- May work in many jobs before and after school hours and during vacations.

FOR EXAMPLE:

1. Office and clerical work
2. Cashiering, selling, art work, and window trimming
3. Price marking and tagging assembling orders, packing and shelving
4. Bagging and carrying out customer's orders
5. Some errand and delivery work by foot, bicycle, or public transportation
6. Clean up work, maintenance of grounds, but not including the use of power-driven mowers or cutters
7. Preparing and serving food and beverages
8. Delivering newspapers
9. Casketting
10. Working on a farm
11. Work in connection with cars and trucks if confined to the following:
    Dispensing gasoline and oil
    Courtesy service
    Car cleaning, washing, and polishing

But NOT including work:

Involving the use of pits, racks or lifting apparatus or involving the inflation of any tire mounted on a rim equipped with a removable retaining ring

12. Cleaning vegetables and fruits, and wrapping, sealing, labeling, weighing, pricing and stocking foods when performed in areas physically separated from areas where meat is prepared for sale and outside freezers or meat coolers
13. Cleaning, tending or assisting householders, as yard care, pet care, child care, cleaning yards, garages and attics

A 14 or 15 year old may not be employed in any occupation declared hazardous.

These include manufacturing, mining, processing, construction and warehouse occupations (except office or sales work in connection with these occupations). A 14 or 15 year old may not work in a freezer, load or unload goods, work for a public messenger service, operate any power-driven machinery, work as a baker, wash outside windows when a ladder is required, or work in a boiler room.

14 or 15 Year Olds --- May work full time in most jobs

FOR EXAMPLE:

Most manufacturing jobs
Most jobs in stores and restaurants
Most service jobs, such as in repair shops, laundries, drycleaners, recreation services, and hospitals
Clerical and office jobs
18 years is the minimum age for some hazardous jobs

These include:

1. Driver or helper on motor vehicles
2. Jobs involving the operation of certain dangerous woodworking, metalworking, bakery, and paper products machinery
3. Operating elevators and other power-driven hoisting apparatus
4. Most jobs in connection with mining
5. Most jobs in logging or sawmill operations
6. Some jobs in slaughterhouses and meatpacking plants
7. Many jobs involved in the manufacture of brick, tile, and similar products
8. All jobs in roofing, wrecking, and demolition operations
9. Jobs in explosive plants
10. Jobs involving exposure to radiation
11. Jobs where intoxicating beverages are manufactured, bottled, or served for consumption

Maximum Hours of Employment

A 14 or 15 year old may not be employed during school hours. They may work no later than 7:00 P.M. or earlier than 7:00 A.M. during school months.

A 14 or 15 year old may not be employed:
* More than 3 hours a day—on school days
* More than 18 hours a week—on school weeks
* More than 8 hours a day—on nonschool days
* More than 40 hours a week—on nonschool weeks

A 16 or 17 year old may not work more than 8 hours in one day, 40 hours in one week, or 6 days in one week. They may work no later than 10:00 P.M. or earlier than 6:00 A.M.
