Career Education; Curriculum Guides; Grade 7; Grade 8; Integrated Curriculum; Junior High Schools; Learning Activities; Resource Units; Secondary Education; Units of Study (Subject Fields)

The career education curriculum guide for grades seven and eight contains activities that can be integrated with existing curriculum. For each activity, career education objectives are cited together with goals, materials, procedures, anticipated results, and evaluation. Career education activities are presented in the following areas: art, English, general, guidance, home economics, industrial arts, mathematics, music, physical education, science, social studies, and special education. Appended are materials on the field trip, the West Woods Mall agreement, the employment bureau, the bank, the radio station, student government, and the store.

FOREWORD

Our classroom teachers in Bristol have met the implementation of the Career Education Program with enthusiastic response. This curriculum guide is the result of the combined efforts of so many in such a short time. I hope that the activities contained within this guide will encourage a great many more teachers to rise to the call of such an important concept in education today.

It will be through the efforts and cooperation of all involved that we will be able to provide our students with the necessary information they will need to meet the challenges of the world of work.

To the many teachers and Career Education staff who have given of their time, I express my appreciation for a job well done.

Dr. William F. Rowe
Superintendent of Schools
All education is career education - or it should be! The activities contained within this guide are representative of the preceding sentence. We are not adding another subject to the existing curriculum, rather incorporating a theme to the subjects already present. You as a classroom teacher might say that you have been doing a lot of what is contained in this guide already. What we would like to have you take a look at are the activities that you haven't been using. As you become more familiar with the concept of career education, you'll find numerous ways to incorporate career education into your daily lessons.

Unlike many other programs that have the compiling of a curriculum guide as one of their first objectives, the Bristol Career Education Program did not produce the guide first, but rather we collected the activities that have been developed over the past year by the classroom teachers in Bristol. The activities that are contained in this guide have been used at least once and in several instances, they have been used a number of times.

Our purpose in publishing this provisional curriculum guide is two-fold. First, we would like to place the activities that have been developed into the hands of as many other teachers as possible. Unless we share our ideas and thoughts, we do not benefit the greatest number of students. Secondly, we hope that the material contained within this publication can be improved upon, added to, and the source of inspiration for new and better career education classroom activities.

Whatever career education activity you may want to personally become involved with, the Career Education staff and material resources are available to help make the experience a meaningful one for your students. We fully recognize that it is you - the classroom teacher - who influences the greatest number of students.

We, the members of the Bristol Career Education Department, would like to thank all the administrators, teachers, and students who have helped make the publication of this curriculum guide a reality. We would like to thank our secretarial staff for the time and effort that they have themselves put into the production of this guide. Mrs. Carol Jackowitz receives credit for the art work on the cover of our guide. And I would personally like to thank the members of the Career Education staff for a job well done over and beyond the call of duty. Their dedication and commitment to the concept of career education has been the inspiration to all those involved in this undertaking.

We have purposefully constructed the career education curriculum guide so that additional pages may be added. We hope that during the course of the next year we may be able to periodically add supplements which will help the students of Bristol grow in an awareness of themselves and an awareness of the world of work.

What is a Career Education Activity?

A Career Education Activity consists of the following six parts and can fit into any subject.

Goal- What it is you want to do in Career Education?

Career Education Objectives- The specific tasks involved in achieving the goal.

Materials- What you need to fulfill the objectives

Procedure- How you intend to accomplish your objectives

Results- How the students' behavior has changed as a result of your activity

Evaluation- Any device that allows for an expression, by the students, which will show that their behavior has changed.
Career Education Objectives for Grades 7 and 8

1. There are many career possibilities for every person.
2. Every job, done well, is worthwhile and contributes to society.
3. Every individual can have a useful and satisfying career.
4. Different careers require different abilities, attitudes, interests.
5. Every person is an individual. He has different abilities, likes, dislikes, interests, needs, and values.
6. A person's career choice develops over a long period of time.
7. A person may choose a career for many reasons.
8. Any person is capable of performing well in more than one career.
9. Careers may be grouped in "clusters" which require similar abilities, and provide similar rewards.
10. All careers require some special learning and preparation.
11. The choice of a career will involve some conflict and compromise between values and needs.
12. Work experience in some form facilitates career decision making.
13. People change, and sometimes change careers.
14. Changes and conditions in the world affect the job market.
15. People must be prepared to accept the changes in the job market and be able to modify or change their career.
16. Occupations are inter-related in many cases, making them equally important.
17. A person's inter-relationship with employer, his fellow workers, and society affect his career.
18. A worker must have a knowledge and understanding of his job, employer's rules, regulations, policies, and procedures.
CCAL: Careers may be grouped in "Clusters" which require similar abilities, and provide similar rewards.

CAREER EDUCATION OBJECTIVES:
Make students aware of the fifteen Career Clusters and show examples of careers in each cluster.

MATERIALS: Construction paper
Scissors
Glue
Magazines
Pictures of each of the clusters

PROCEDURE:
1. Students are divided into fifteen groups
2. Each group must construct a poster to show one of the clusters
3. Students search out examples of jobs that fit into their cluster, and glue them on the poster.

RESULTS: Students have an awareness and knowledge of the fifteen Career Clusters and some of the careers in each cluster.

EVALUATION: Posters are used as a bulletin board or displayed around the school.
GOAL: To have students experience the inter-relationship of the fine arts and humanities cluster with the marketing and distribution cluster.
To have students experience an inter-relationship with their peers.
To have students design and implement the manufacture note paper.
To have students package, sell, and distribute note paper.
To have students use a simplified method of bookkeeping.

CAREER EDUCATION OBJECTIVES:
1. Every job, done well, is worthwhile and contributes to society.
2. All careers require some special learning and preparation.
3. Work experience in some form facilitates career decision making.
4. A person's inter-relationship with employer, his fellow workers, and society affect his career.

MATERIALS: Silk Screen Kit
Paint
Paper
Ledger Book
Seals

PROCEDURE: 1. An invited artist will come and speak to the students
2. A competition for best design will take place
3. Students will construct and operate silk screen
4. Students will see to the marketing and distribution of the goods.
5. A simplified method of bookkeeping will be carried on by the students.
6. Students will be selected through job application and job interview.

RESULTS: This program will contribute to the preparation of a career by exposing the students to the careers available within the fine arts and marketing clusters.

EVALUATION: The effectiveness of the program will be evaluated by observing and discussing with the student how well their jobs were executed.
GOAL: 1. Have students write letters to employers to ask for those things an employer looks for in a prospective employee.

CAREER EDUCATION OBJECTIVES:
1. Work experience in some form facilitates career decision making.
2. A worker must have a knowledge and understanding of his job, employer’s rules, regulations, policies, and procedures.

MATERIALS: 1. Yellow Pages
2. Typewriter
3. Stationary
4. Stamps

PROCEDURE: Have students choose a business they are interested in.

Get addresses from yellow pages.

Compose and type letter to employer.

RESULTS: Students will have some knowledge of characteristics necessary for the job he is interested in.

EVALUATION: Student will list those values the employer has made him aware of.
GOAL: Expose students to a wide range of occupations and their descriptions.

CAREER EDUCATION OBJECTIVES:
1. Many kinds of careers
2. Careers required different knowledge, abilities, attitudes
3. People pursue careers for many reasons
4. Every career requires special preparation

MATERIALS: Readings about occupations (DOT, pamphlets, etc.)

PROCEDURE:
1. Two teams are chosen.
2. Each student chooses a career and researches it.
3. Each team sends a representative to stump the other team.
4. 20 questions are allowed.
5. Answer must be one word (yes, no, etc.)
6. One point given if career is guessed in less than 20 questions.

RESULTS: Students will know about a variety of jobs and each will be especially familiar with one job.

EVALUATION: Written report to the teacher about the career chosen to stump the panel from each student.
Subject: English
Grade: 7

COOL: To explore the work of those people needed in producing a newspaper, and to understand the use of this medium of communications.
To show the newspaper is a means of communicating many things to people.
English skills are important for the full use of a newspaper.

GOAL EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, interests.
2. Occupations are inter-related in many cases, making them equally important.

MATERIALS:
Newspapers
Journalist (speaker)

PROCEDURE:
Discuss the different things that go into a newspaper (news, advertisements, ads, etc).
Journalist comes to class to discuss her job and tell how she fits into the total production. A trip to the Bristol Press to show students all the other jobs that go into making a daily newspaper.

RESULTS:
Students will have a better understanding of the make up and construction of a newspaper, and of all of the different careers in this communications field.

EVALUATION:
Students will assign themselves to different jobs and produce a school newspaper.
COAI: 1. To portray the poet as a man with a career
2. To express values through poetry
3. To improve the ability of the students to write poetry

CAREER EDUCATION OBJECTIVES:
1. Every individual can have a useful and satisfying career
2. Careers may be grouped in "clusters" which require similar abilities, and provide similar rewards.

MATERIALS: 1. The poet, himself, Mr. Leonard Holpin
2. His poetry
3. The students' poetry

PROCEDURE: 1. The poet discussed his own poetry.
2. He then gave the students ideas which to use in writing their own poetry
3. The students write a total of three poems.
4. The poet evaluated and discussed the students' work.
5. The teacher also evaluated the students' work.

RESULTS: 1. Brightened students' awareness of the career of writing.
2. Alerted students to their own and others values and therefore, to an understanding and tolerance of people.
3. Helped the students realize that an elderly person can be a resource of ideas and experiences which are still relevant to youth.

EVALUATION: 1. Poetry of the students
2. Class discussion about poetry as a career and the poet as a man
GOAL: To make students aware of the process of reading job descriptions, filling out an application form, and taking an interview.

CAREER EDUCATION OBJECTIVES:
1. Every job has certain inherent requirements and responsibilities.
2. An application form is a means of setting information about a possible employee.
3. An interview is another means of setting information, and a means for you to "sell" yourself to an employer.

MATERIALS: 1. Mr. John Fasolo (Associate Teacher)
2. Paper, typewriter, ditto machine

PROCEDURE: 1. Mr. Fasolo speaks to students about job descriptions
   a. examples
   b. list jobs available in the school
   c. design form for job description
   d. divide into groups and assign each group some
      of the jobs to describe with the help of the
      teachers that need these workers
2. Students interview faculty and describe a variety
   of school jobs
3. Mr. Fasolo talks to students about applications
   a. examples
   b. list these things important to know about employees
   c. make out format for application form
4. Students design application forms that will serve
   the schools purpose
5. Mr. Fasolo explains the interview process
   a. what questions are asked during an interview
   b. what employers look for in an interview
   c. role play with Mr. Fasolo and several students
6. Students develop a list of directions for conducting an interview

RESULTS: Students have a good understanding of the employment
   process, school has a good tool for setting students
   for the year.

EVALUATION: Complete program of A) job description, B) application
   form, and C) interview directions completed
INTRODUCED BY: Angelolo Llopis

SUBJECT: English

GRADE: 9

GOAL: To show students that a newspaper is a method for communicating, and that a newspaper tells about many careers.

CAREER EDUCATION OBJECTIVES:
1. There are many career possibilities for every person
2. Careers may be grouped in "clusters" which require similar abilities and provide similar rewards
3. Changes and conditions in the world affect the job market

MATERIALS: Newspapers

PROCEDURE:
1. Each student has one newspaper
2. Take one sheet of newspaper and have students pick a story on that page
3. Have the students read the story they have picked to themselves and make a list of as many jobs as they can that are mentioned in some way in that story
4. Students then in turn, report the story to the class and put their list on the board
5. The class compiles one master list into fifteen Career Clusters

RESULTS: Students will have a better understanding of the newspaper as a vehicle for transmitting information, and an awareness of many more careers and how they fit into clusters

EVALUATION: Students pick one career from the list and make a short report on it mentioning title, works with people, ideas or things, education necessary, earnings, and supply and demand for this job.
At Public Hearing

DEP Voices 'Serious Concerns' Over Racetrack Sewage

WOLCOTT, Conn. (AP) — The state Department of Environmental Protection has "very serious concerns" about the ability of the Waterbury-Wolcott sewage system to handle sewage from a proposed race track in Wolcott, a DEP official said Thursday.

Robert Smith, senior sanitary engineer with the department, expressed the reservation at the DEP's opening hearing on three environmental permits for the track.

Old Rock Road Corp. of Bridgeport has received a license from the state to build Connecticut Park in this community on Waterbury's northeast border. But the corporation must receive at least the three DEP permits before construction can begin.

The permits would allow the track to discharge sewage into the Waterbury-Wolcott system, to be built partly in an inland wetland area and to discharge surface water runoff from the track's parking lot and roads into Eastern Stream.

Another group has proposed the Saw Mill Brook race course in Middletown but state Special Revenue Commissioner John Macdonald has said he feels only one-horse race track will be established in Connecticut.

State Rep-elect William Moriarty, D-Wolcott, a supporter of the Wolcott proposal, told the hearing, "This thing is dragging on and on." He said he was "amazed at Old Rock's patience" in spending time and money to prepare plans.

Bristol City Councilman Alec Kaminsky said "before we give them (track developers) water from Bristol they've got a real fight on their hands." Bristol is on the northeast border of Wolcott and has been considered a possible source of water for the track.

The hearing was held before Robert Taylor, DEP's director of water compliance and hazardous substances.

The department is expected to hold more hearings on the permits this month in Hartford.

Leasing Troubles Plan Is Offered By Auditor

HARTFORD (AP) — A state auditor has suggested reviving a five-year-old plan for a state office complex to help end state leasing troubles.

State Auditor Leo V. Donohue said a panel, proposed consolidating state agency operations in a complex near the state Capitol in 1969 but that proposal was abandoned by the administration of Gov. Thomas J. Meskill.

The complex was estimated to cost $30.9 million at 1969 prices, he said.

More Stringent

Donohue also suggested a sweeping evaluation of the state Public Works Department plus more stringent oversight of the state's land acquisition activities.

The legislature's leasing committee has just completed its probe of state leasing practices. It found examples of political cronyism and allegedly exorbitant rents in a number of state leases.

The leasing committee members have discussed several proposals to improve state leasing procedures, including centralization of the state's land acquisition program and increased legislative accountability.

Donohue is the Democratic state auditor. He said the next legislature should reassess the five-year-old plan for a "Capitol Center" office complex.

Longo Appoints Registrar Office Study Committee

Mayor Frank J. Longo recently implemented action taken at the December 3 City Council meeting by appointing a Registrar's Office Study Committee.

Serving on the committee are Councilman Michael Boguslawski, chairman; Republican Town Chairperson Beryl P. Josephson, secretary; Councilman Alec Kaminsky, Patrick McFadden and Joseph Mike; Democratic Town Chairman John Duffy; and Republican Town Committee member Frank Johnson.

The purpose of this committee will be to study the present operations of the Registrars' office, to learn of alternative methods of operations and if deemed necessary, to make recommendations to the City Council to implement and fund any possible proposed changes.
GOAL: To make students aware of the Public Library as a resource center for Career information.

CAREER EDUCATION OBJECTIVES: 1. To show that career information is essential in making a wise career choice.
2. Career information can be gotten a number of ways.
3. D.O.T., O.O.H., and periodicals are some of the ways of learning about careers.
4. These books are in the Public Library and can be used by students.
5. A person's career choice develops over a long period of time.
6. A person may choose a career for many reasons.
7. Careers may be grouped in "clusters" which require similar abilities, and provide similar rewards.
8. All careers require some special learning and preparation.
10. Changes and conditions in the world affect the job market.
11. People must be prepared to accept the changes in the job market and be able to modify or change their career.

MATERIALS: D.O.T., O.O.H., periodicals, clusters, bus.

PROCEDURE: 1. Show and explain cluster concepts to students.
2. Expose one career through several methods (slides, tapes, speaker, D.O.T., etc.)
3. Show those materials a student will find in the library, and what information it contains.
4. Visit library, librarian talks about her job, how she can help in career-information-gathering, placement of career-information materials, use of these materials.

RESULTS: Students will be able to research information about careers of their personal interest through the use of materials offered in the Public Library.

EVALUATION: Students will list five resources the library has for career information.
CON: Have students use the skill of letter writing to gather information about certain careers.

CAREER EDUCATIONAL OBJECTIVES:
There are many career possibilities for every person. Every individual can have a useful and satisfying career.

MATERIALS: 25 stamps
25 short envelopes
Encyclopedia of Careers

PROCEDURE:
1. Students choose a career they may be interested in researching.
2. Students write letters asking for various materials available regarding this career.

RESULTS: Students use skill of letter writing and receive answers to their letters. They see a need for the skill of letter writing taught in English class. They are made aware of careers that interest them.

EVALUATION: Successful writing of one letter.
Introduced by: Michael Corin
Subject: English
Grades: 7 & 8

GOAL: To provide a basic appreciation of the communication industry in general and the radio industry in particular, and an awareness of job opportunities in this field.

CAREER EDUCATION OBJECTIVES:
1. Radio broadcasting is an end product of many people
2. Many jobs are required to produce a program
3. People with different abilities and interests are needed for these jobs.

MATERIALS: 1. 3 speakers
             2. Cassette tape recorders (3)
             3. 3 Cassette tapes
             4. Brochures provided by Connecticut School of Broadcasting.

PROCEDURE: 1. Speakers presented relevant material, followed by question and answer period
             2. Class divided into six groups, each group created their own radio presentation
             3. After last speaker each group presented their program as a summary project.

RESULTS: Children have a fuller understanding of radio as an essential portion of the communications industry and career opportunities in radio broadcasting.

EVALUATION:
GENERAL
Introduced by: Jeannine Provenzano
George Simpson

Subject: All
Grades: 7 & 9

GOAL: To relate student interests to future careers through a series of mini-courses.

CAREER EDUCATION OBJECTIVES:
1. There are many career possibilities for every person.
2. All careers require some special learning and preparation.
3. Work-experience in some form facilitates career decision making.

MATERIALS: Varied materials depending on the mini-courses offered

PROCEDURE:
1. Teachers decide on mini-course they like to offer.
2. Students pick a mini-course that interests them.
3. Mini-courses taught in a group session program.
4. Teachers relate course work to future careers through speakers, movies, field trips, etc.

RESULTS: Students were better informed about careers that dealt with their present interests. Teachers were motivated to teach other things besides their regular subject. Student interests were very high.

EVALUATION: Student questionnaire at completion of program.
GOAL: To make students aware of cluster of jobs in the military and air transportation field.

CAREER EDUCATION OBJECTIVES:
1. There are many career possibilities for every person.
2. Different careers require different abilities, attitudes, interests.
3. Careers may be grouped in "clusters" which require similar abilities, and provide similar rewards.

MATERIALS: 1. Films
2. Information given through airplane modeling club
3. Bus

PROCEDURE: 1. Give information through informal lecture during meeting of model building club.
2. Show films dealing with airplanes.
3. Visit Air National Guard and airport.

RESULTS: 1. Students will get first hand information and reactions from workers.
2. Students will have a better understanding about running of airport and Air Force.
3. Students will be aware of more jobs related to this cluster.

EVALUATION: 1. Students will be asked to list as many airport related jobs as they can before the field trip.
2. They will be asked to list 5 new jobs they had not thought of after the field trip.
GUIDANCE
GOAL: Show that individuals' values change during one's lifetime and career choice is based on part on these values.

CAREER EDUCATION OBJECTIVES:
1. People's values may be different at any point in time.
2. A person's likes, needs, interests change throughout his lifetime.
3. A person's career choice develops over a long period of time.
4. A person's values will influence his career choice.
5. People change and sometimes change careers.

MATERIALS: Yarn, tape, magazines, scissors.

PROCEDURE:
1. Stretch a length of yarn or rope along a wall(s).
2. Divide it into 5 year sections.
3. Students cut out pictures of values and tape them to the rope along the time continuum.
4. Discuss the significance of each.

RESULTS: Students will have a better understanding of the change that takes place in people as they grow and mature, and the effects this change has in their environment.

EVALUATION: Have students make a script and slide show or movie of life line.
COAL: To make students aware of people in their family and the variety of jobs they hold.
To show that interviews are a method of finding information.
To show that people in your family have information about many jobs.
To show that this information can be used by you or someone else in the process of choosing a career.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, interests.
2. Every person is an individual. He has different abilities, likes, dislikes, interests, needs, and values.
3. A person may choose a career for many reasons.

MATERIALS: Class prepared questionnaire to be used for the interview.
Optional—tape recorder, camera.

2. Students pick one member of his family that has a job and interviews him. (Tape recorder may be used if the interview is held at the place of work.)
3. Student reports the interview to the class, showing the slides and playing the tape.

RESULTS: The students will have first hand information on several careers as reported by the whole class.

EVALUATION: Make a career file from the interviews.
1. What is the name of your occupation?
2. Is it called anything else?
3. How long have you worked in this field?
4. How long have you worked for this company?
5. About how many people work in this field?
6. Are these jobs in expanding career areas?
7. Is this job regional in any way?
8. Has it changed in your experience?
9. Do you see a change coming?
10. What exactly do you do all day?
11. Do you use tools and equipment?
12. Do you have to cooperate with others?
13. What is unusual about your occupation?
14. Is it dangerous?
15. Would you call it challenging? Why?
16. Would you call it satisfying? Why?
17. Would you mind saying about how much people in your occupation earn?
18. What are the special qualifications for getting a job in your field?
19. How much education or training does a beginner need?
20. Does he have to have a license of any kind?
21. Does he have to have capital?
22. How does he go about getting this kind of job?
23. How did you get yours?
24. Was this your first choice of a career?
25. Did you have trouble choosing? Why?
26. What are the advancement opportunities?
27. Who are the local employers who need your skill?
28. Are there related occupations in which many of the same skills are required?
29. What are some of the other good and bad points about this career? (hours, fringe benefits, working conditions, etc.)
30. Does it affect your personal life?
GOAL: Comprehensive guidance program for students self awareness and career exploration.

CAREER EDUCATION OBJECTIVES:
1. There are many career possibilities for every person.
2. Different careers require different abilities, attitudes, interests.
3. Every person is an individual. He has different abilities, likes, dislikes, interests, needs, and values.
4. A person's career choice develops over a long period of time.
5. A person may choose a career for many reasons.
6. The choice of a career will involve some conflict and compromise between values and needs.

MATERIALS: Deciding (College Entrance Exam Board)
Movies about careers
Speakers with different careers

PROCEDURE:
1. Values clarification groups begin
2. During this time movies are shown during the week
3. Speakers come in periodically

RESULTS: Students were more aware of their own values, and that others may have values that may be different but just as important. Students were more aware of different careers available to them.

EVALUATION: Student questionnaire
GOAL: To make students aware of the activities, background, preparation, which are involved in police work.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, interests.
2. Every person is an individual. He has different abilities, likes, dislikes, interests, needs, and values.
3. All careers require some special learning and preparation.
4. A worker must have a knowledge and understanding of his job, employer's rules, regulations, policies, and procedures.

MATERIALS: Speaker
Career Education film, strip and tape.
Magazine articles

PROCEDURE:  
1. Class discussion about police work
2. See and listen to tapes and film strip about this type of work
3. Speaker (policeman, policewoman)

RESULTS: Discussions carried on showed that a greater awareness of the jobs of policemen was achieved, and that a new respect for the type of work and service they offer was gained.

EVALUATION: Class discussion after the speaker's presentation.
GOAL: To visit E. C. Goodwin Technical School for the purpose of seeing the school in progress and the programs offered there.

CAREER EDUCATION OBJECTIVES:
1. There are many career possibilities for every person.
2. Different careers require different abilities, attitudes, interests.
3. All careers require some special learning and preparation.

MATERIALS: Ditto form for retrieving information
Heavy oak tag
Bus

PROCEDURE: 1. Students interested in visiting the school sign up
2. Students are given an introduction to the school
3. Tour of the school
4. Students write a report about the school
5. If still interested, students fill out applications

RESULTS: Students will have a better understanding of what a technical school has to offer, and what will be expected of the student if he decides to attend.

EVALUATION: The reports the students are required to write will be used as an evaluation of the trip.
FOR: All 8th grade students

RE: Field trip to E. G. Goodwin Vocational-Technical School

Plans are being made to visit Goodwin Tech in the near future. If you are interested in attending this school next year, and would like to spend a morning touring it, please print your name below.

10. 20.
Dear Parent:

Your child has expressed an interest in participating in a field trip to visit E. C. Goodwin Technical School in New Britain on from to . The purpose of this trip is to familiarize the students with the school's facilities, operation, and programs.

The Career Education Department will fund the program except for a 20% charge to cover student insurance. The students will be required to gather certain information during the tour. We hope you can use this information in any later discussion with your child about his future plans.

Please fill in the consent form below and have your child return it to his teacher. If you have any questions, please call me at 584-0971, ext. 284.

Angelo Llopis
Career Education Specialist for 7th and 8th grade

I give my permission to have attend a field trip to E. C. Goodwin Technical School on .

Parent's Signature

We have a few seats reserved for parents interested in touring the school. If you would like to attend the tour, please check below.

[ ] Yes, I can attend the field trip.

Can I go on to college after graduating from E. C. Goodwin?
INTRODUCTION

Presented by: Charlotte Aston
Subject: Home Economics
Grades: 7 & 8

GOAL: To make students aware of career opportunities in the food preparation field.

CAREER EDUCATION OBJECTIVES:
1. To provide speakers in the field to discuss career opportunities.
2. Demonstrations and actual preparation of foods

MATERIALS:
- Kitchen equipment
- Food for preparation

PROCEDURE:
- Demonstration - by adult
- Student preparation
- Speaker-manager of a large restaurant

RESULTS: Demonstrations were successful. Kids had fun preparing food and speaker gave them an insight into careers around preparation.
GOAL: To recognize the values of home production and to compare articles made at home with those bought in the market place, and make students aware of job opportunities in the field of producing and marketing.

CAREER EDUCATION OBJECTIVES:
- Identify articles found in boutique-type stores.
- Describe items which could be made at home.
- Construct choice of clothing accessories, food products for self or gifts.
- Establish cost.

MATERIALS: Ingredients for recipes.
- Dried flower materials (foam, floral tape, etc.)
- Clothing for recycling, notions

PROCEDURE: Demonstrate and make sugar clay cake decoration.
- See demonstration of drying flowers and grasses.
- Listen to student at modeling school and see recycled clothing.
- Demonstrate making of tie.

RESULTS: Students were better able to understand the field of manufacturing and marketing.

EVALUATION:
Introducing by: Salvatore Valvo  
Subject: Industrial Arts  
Grades: 7 & 8  

GOAL: To provide basic instruction on fabricating the type of plastic best suited for making of projects in the school shop. This course is also intended to acquaint the student with the use of plastic in industry and to emphasize the importance of plastic in our everyday living.

CAREER EDUCATION OBJECTIVES:  
1. To develop interest in the use of plastics  
2. To learn of the various types of plastics and their characteristics  
3. To learn about the career opportunities in plastic industry  
4. To construct several projects utilizing techniques or processes

MATERIALS:  
- Ylics - such as plexiglass - lucite  
- Liquid plastics - for casting paperweights, wall plaques, etc.  
- Bus - field trip to plastic manufacturer

PROCEDURE: Thru lectures - demonstrations, sample projects  
Field trip to industrial plants

RESULTS: Students enjoyed working with a new material. Much interest and creativity developed in a short period of time. Students gained a knowledge of many careers and opportunities in the plastic field.
GOAL: To familiarize students with as many aspects of leathercraft as possible and to make them aware of the craft as not only a hobby and art, but a career as well.

CAREER EDUCATION OBJECTIVES:
1. To familiarize students with basic materials, terms and procedures and to finish at least one project of their own, which will have utility, value, beauty and permanence.

MATERIALS: Swivel knives, stamping tools, puncher, leather mallets, stains, dyes, lace lacing needles, project patterns, charts

PROCEDURE: Day 1 - Show examples of leathercraft, give scraps of leather to each and have them wet the leather and use the swivel knife and stamping tools. Pass out catalogs to order a project for Day 2.
Day 2 - Trace pattern on damp leather, use swivel knife, begin stamping.
Day 3 and 4 - Finish tooling, assemble, lacing and finish

RESULTS: Students learned concepts very well and were better able to appreciate the work involved in making leather products.
GOAL: Teach students basics of Carpentry and Blue Print Reading and the kind of construction that needs these skills.

CAREER EDUCATION OBJECTIVES:
1. Most construction needs the skills of a carpenter
2. Certain skills are needed to be a carpenter
3. Basic skills must be learned before real construction begins

MATERIALS: 4 - 2' by 4' by 8'
6 - 2' by 3' by 8'
4 - firring strips
2 lbs. 8d nails
1 lb. 4d nails

PROCEDURE: 1. Teach basic terms
2. Teach basic blue print reading
3. Guest speakers - Carpenter illustrates rough framing
4. Lab. - framing a wall

RESULTS: Basic awareness of Carpentry field gained and basic skills of carpenter explained and practiced.
GOAL: Investigate the Construction and manufacturing Clusters through the planning and building of a mailbox and bookshelf.

CAREER EDUCATION ACTIVES:
1. There are many career possibilities for every person.
2. Every individual can have a useful and satisfying career.
3. Careers may be grouped in "clusters" which require similar abilities, and provide similar rewards.
4. Work experience in some form facilitates career decision making.
5. Occupations are inter-related in many cases, making them equally important.

MATERIALS: 1. Hand tools
2. Other tools and materials needed for specific project

PROCEDURE: 1. Students design the item to be constructed
2. Students figure materials and cost
3. Safety of tools
4. Construction
5. Sanding and Painting

RESULTS: Students will have a better idea of jobs related to the construction of the product and how their school subjects helped in the production.

EVALUATION: Work will be evaluated by the product made
GOAL: To explore the work of an architect by designing a school courtyard for multi-departmental use.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. All careers require some special learning and preparation.

MATERIALS: Paper, paints, glue, crayons, and any other material such as rocks, bushes that the student wishes to use.

PROCEDURE:
1. A student assembly will be called to explain the project and set ground rules.
2. Students begin their planning.
3. Within two weeks an architect meets with students to explain his job and help students on the project.
4. Students will be given school time in which to work on their project.
5. Projects are judged and an award is given to the best design.

RESULTS: Students will have better understanding of the work of an architect. School will have many excellent ideas for creating an educationally valuable space.

EVALUATION: All projects will be displayed for students and parents to view.
Introducing by: Angelo Llopis
Subject: Industrial Arts
Grades: 7 & 8

GOAL: To introduce the construction cluster through the building of room dividers.
To show the assembly line technique.
To show how a unit price is arrived at by a manufacturer.

CAREER EDUCATION OBJECTIVES:
1. There are many career possibilities for every person.
2. Every individual can have a useful and satisfying career.
3. Careers may be grouped in "clusters" which require similar abilities, and provide similar rewards.
4. Work experience in some form facilitates career decision-making.
5. Occupations are inter-related in many cases, making them equally important.

MATERIALS:
1. 2" x 3" wood
2. 1/4" ply wood
3. Masonite sheets 4' x 4'
4. Wood screws
5. Drill bits
6. Glue
7. Wood dough
8. Sandpaper
9. Paint
10. Primer
11. Roller, tray
12. Brushes

PROCEDURE:
1. Draw up a workable blue print
2. Develop an itemized list of materials and cost
3. Visit a lumber yard with students to pick up materials
4. Explain the project according to steps involved in production.
5. Safety lesson about working in a shop, and use of hand and power tools
6. Assign job stations to students (stations will rotate)
7. Students begin construction of parts
8. Parts are assembled

The course ran for a four-week period, meeting from 8:30 - 10:00 a.m., Monday through Friday. There were eight students involved in the course. One student had just completed the fourth grade, one the sixth grade and six completed the fifth grade.

Students were allowed to use hand tools such as a screw driver, hammer, square, etc. and also power tools, an electric sander and drill with class supervision. Before the use of any tools, safety rules were explained and carefully followed. Other power tools needed were operated by the instructor. Students were shown the difference between construction line building and "unit" building. Students rotated from job station to station every day so that all students had a chance to sand, paint, drill, etc.
The unit to be constructed was a four by four foot divider designed to close off parts of a room for study. One side of the divider was painted white to act as a projection screen, the other side a bright color for attractiveness. Twelve units were constructed.

The cost of materials ran approximately $140. Unit cost per divider then was less than $12.

RESULTS: The following are the general steps in the assembly line process. They are in the order in which they generally occur. Students should become familiar with each step and how one relates and depends on the other.

1. Order received by manufacturing company
2. Product is designed - blueprints drawn
3. List of materials needed is drawn up and ordered
4. Machines and tools needed for production are assembled
5. Job stations are organized
6. Production starts
7. Each person does his step or operation and parts move from operation to operation.
8. Completed parts are inspected.
9. Inspected parts are sent to be assembled
10. Parts are put together to form a product
11. The product is then inspected
12. Inspected product is sent to packing and shipping

EVALUATION: 1. Students will be given a list of all steps generally involved in an assembly line production in scrambled order. They will be asked to arrange them in proper sequence.
2. Students will be asked to identify that step they feel is the most important to the production of a product. The instructor should lead a discussion around this question to show the importance of each step and to emphasize that all steps or jobs are necessary and therefore as important.
3. Students will make a list of products that are made through the assembly line technique.
GOAL: To acquaint students with the stock exchange as a hobby and as a possible career.

CAREER EDUCATION OBJECTIVES:
1. To have student know certain basics through self exploration of the field.
2. To have students listen to detailed explanations to improve their ideas.

MATERIALS: Portfolio of information (stock certificates, etc.)
Booklets for each student
Guest speaker

PROCEDURE: Field trip
Guest speaker
Movies, films
Discussion

RESULTS: Students were interested in learning about the stock market. A good understanding of how the market operates resulted.
Introduced: Gail Atruya. 
Subject: Math 
Grades: 7 & 8

GOAL: To show the need of a school store and the many jobs associated with it.

CAREER EDUCATION OBJECTIVES: 1. Reasons for school store  
2. Jobs required  
3. Set up of the store  
4. Smooth running of an organization such as this

MATERIALS: Speaker  
Filmstrip projector  
Bus  
Trip to established school store

2. Girls from Eastern High's store speak to students on organizing a store.  
3. Survey developed and given to determine if the population in the school was interested in a store, and what they would want sold.  
4. Field trip to Eastern High to see their store and watch the actual working of the people.

RESULTS: Found a definite need and interest for a school store. Students were more aware of the procedure for running such a store.

EVALUATION:
GOAL: To show students how mathematical problems can be done quickly and accurately through the use of the slide rule, and how a slide rule can be beneficial in some jobs.

CAREER EDUCATION OBJECTIVES:
1. How to read the rule
2. How to multiply and divide
3. How to combine operations on the rule
4. How to find square root and cube root

MATERIALS: Slide rule

PROCEDURE: Session 1.- Explain parts of rule and how to read numbers. Simple multiplication, C and D Scale
Session 2.- Review multiplication on rule, learn to divide C and D scale
Session 3.- Work on combined operation examples
Session 4.- Use of CI scale. Use of A and K scale for cube roots and square roots
GOAL: To show practical application of precision measurements and relative error concepts to the world of work.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, interests.
2. All careers require some special learning and preparation.

MATERIALS: Speaker
Micrometers
Example of brass stock

PROCEDURE:
1. Speaker taught use of micrometer.
2. Students broke in groups and practiced measuring.
3. Speaker talks about job.

RESULTS: Students had a better understanding of how math class relates to an everyday career.

EVALUATION: Discussion of speakers presentation.
GOAL: To show students the difference between assembly line production and production of unit by one individual. To show that some people make a complete product at their job, some people work together at making one product, each method has certain values and drawbacks, and that a geoboard is a useful tool for studying math.

CAREER EDUCATION OBJECTIVES:
1. Every job, done well, is worthwhile and contributes to society.
2. Occupations are inter-related in many cases, making them equally important.

MATERIALS: Wood, nails, saw, sandpaper, stain, brush, ruler, and rubber bands

PROCEDURE:
1. Explain how people can make a product themselves (plumber, electrician, auto mechanic, etc.)
2. Explain how an assembly line works (putting an auto together).
3. Short history of assembly line
4. Why each method is good in some aspects but not as good in others.
5. Divide the class into work stations
6. Explain safety in each station
7. Make one geoboard for every student
8. Explain use of geoboard

RESULTS: Students will have a knowledge of assembly line production, unit production, use of geoboard.

EVALUATION:
1. List five areas where assembly line would be preferable.
2. List five areas where unit work would be preferable.
3. Demonstrate how geoboard is helpful in math.
GOAL: To acquaint the student with the uses of mathematics in a banking environment. 
To acquaint the student with opportunities for a career in banking.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. All careers require some special learning and preparation.

MATERIALS: Bank tour

PROCEDURE: Students will attend a tour of a bank and listen to the accompanying lecture (approximately one hour). This is a follow-up to a unit done in the classroom on banking, credit, and interest.

RESULTS: Students gained a good deal of new ideas about the management and investment of money. Students learned about the various job opportunities offered in a banking environment.

EVALUATION: Class discussion will follow the field trip.
GOAL: Study of clusters through making a retrieval file.

CAREER EDUCATION OBJECTIVES:
1. There are many career possibilities for every person.
2. Different careers require different abilities, attitudes, interests.
3. Every person is an individual. He has different abilities, likes, dislikes, interests, needs, and values.
4. A person may choose a career for many reasons.
5. All careers require some special learning and preparation.

MATERIALS: 1. Reference books (Working, Handbook of Job Facts, O. O. H.)
2. Large file cards
3. Hole punch
4. Knitting needle

PROCEDURE: 1. Students are asked to research three careers in different clusters.
2. Each student makes up one information card
3. Cards are stored in file box.
4. Class uses it to research other careers.

RESULTS: 1. Students will have a ready retrieval file from which to study careers.
2. Students will have a better understanding of why subjects are important in school.

EVALUATION: Each student will have a chance of picking two careers from Retrieval File.
Example

Supply: some interest
Years: 3 years apprenticeship
Ed.: High school,
Other: people

Works within: A) people

Interests or subject and cluster
Cards left will be those that meet both
Push needle through subject interest in and
Lift out cards and discard
Push knitting needle through that number
Decide what cluster you're interested in
Decide what course(s) the career related to and punch that number(s)
Put all cards together
Lift out cards and discard

To and cluster the career is in
Put in information on card
The career is in
Students research a career

Supply and Demand

Training or Education

Works within: A) people

I - 15 - Career Clusters
GOAL: To introduce to the students the work that a computer does, and examine some of the related careers in this field.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. All careers require some special learning and preparation.
3. Changes and conditions in the world affect the job market.

MATERIALS: Film "Incredible Machine" (Bell System)
Article from Career World "Input Date on Computer Careers"
Bus

PROCEDURE:
I. Introduction
   A. Film "Incredible Machine"
   B. Discussion to follow film

II. How a computer works
   A. Input-Output
      1. Punched cards
      2. Tape
      3. Disk
      4. Typewriter
   B. How a computer "reads"
   C. How a computer "writes"
   D. Careers
      1. Keypunch operator
      2. Tape Librarian
      3. Console operator (also with Topic III)

III. How a computer "remembers"
   A. CPU
      1. Address concept
      2. Binary or hex storage (core)
   B. Basic things a computer does
      1. Reads
      2. Stores
      3. Does calculations
      4. Makes simple decisions (comparcs)
      5. Writes or prints
   D. Careers
      1. Console operator
      2. Repair technician
IV. How a computer is instructed
   A. Programs
   B. Languages (Basic, foreign)
   C. Flow charts "plan" programs
      1. Know the template symbols
      2. Write a simple flow chart (find the area of a triangle)
      3. Give several examples of flow charts
   D. Write a program for C2 in Basic
   E. Careers
      1. Programmer
      2. Systems analysts

V. How the computer was invented (brief history)
   A. First to Third generation computers, emphasize speed
   B. Careers
      1. Scientists who research design and
      2. Mathematicians develop computing
      3. Engineers machines

VI. Visit to a local facility in which a computer can be observed in operation, and where the students can watch the people in their work.

RESULTS: The students will have an appreciation for the need to study mathematics in order to qualify for certain careers. They will also be aware of certain careers they may want to get into if they have an interest in math.

EVALUATION: Students will fill an information sheet during the field trip, which will later be used for class and/or family discussion.

Use this space for additional information.
GOAL: To generate some interest in music and music writing and show 7th and 8th graders the job of a musician and composer.

CAREER EDUCATION OBJECTIVES:
1. Explore different musical mediums.
2. Create a musical piece.
3. Analyze their own and other groups work.
4. Perform in front of peers.

MATERIALS:
- 2 autoharps
- 1 set of elementary rhythm instruments
- 1 piano
- 1 tape recorder
- 2 sets of resonator bells
- Sheet music

PROCEDURE:
1. Group creates a piece of music to express emotion performed, then analyzed through the use of tape recorder.
2. Experiment with making melody and harmony. Students changed instruments throughout.
3. Sheet music analyzed
4. Several students visit rock concert.

RESULTS: Course was beneficial for students in understanding work that goes into writing a popular song.

EVALUATION:
GOAL: To make students aware of careers and cultural past times in dance.

CAREER EDUCATION OBJECTIVES:
To involve the student physically and intellectually in this art.
To achieve enjoyment through participation and/or observation

MATERIALS: 1. Bodies for movement
2. record players
3. records
4. speaker - Connie Schultz for Careers in Dance
5. Books, photographs

PROCEDURE: 1. Involvement of students in different types of dance, Concentration on Ballet
2. Students participation - Modern - talking of the Graham Movement and the pre-requisites of a dancer
3. Speakers - Connie Schultz - Running a Dance Studio and Careers in Dance
4. Choreography - Students talk about what a choreographer is and they split into two groups with each student playing a role-Choreographer-Dancer. They Choreographed at least one minute of a dance to music.

RESULTS:

EVALUATION:
GOAL: Students will run through a variety of obstacles to show the physical requirements of some careers.

CAREER EDUCATION OBJECTIVES:
1. Careers require different knowledge and abilities.
2. A person may be suited for several different careers.
3. Every career requires special preparation.

MATERIALS: Gym equipment
Gym
Oaktag, magazines

PROCEDURE:
1. A group of agility tests set up
2. Scoring system for total point score
3. Each student runs the course
4. At each obstacle make a collage of different occupations where this physical requirement may be useful.

RESULT: Student will have knowledge of their physical abilities and what jobs require these at this point in their life.

EVALUATION: Students will be able to list why physical conditioning is important in a given career.
SCIENCE
GOAL: Expose students to landscaping concepts.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. All careers require some special learning and preparation.
3. Work experience in some form facilitates career decision making.

MATERIALS: 50 plants
Bus
Tools
Fertilizer

PROCEDURE:
1. Visit nursery
2. Have worker come in to advise
3. Plant several plants

RESULTS: Each student plants one plant.

EVALUATION: Students will be able to list four occupations in landscaping.
FOAL: To present industrial chemistry to students.

CAREER EDUCATION OBJECTIVES:
1. To show practical application of studies in a classroom for a future job.
2. To show and prove that there is a connection between classroom and their future.

MATERIALS: Speaker (Mr. William Burrows, Metalurgist)

PROCEDURE:
1. Study of unit on chemistry in science
2. Speaker talks about:
   A. His duties
   B. Academic background
   C. Examples of his work

RESULTS: Students were better able to see the relevance between their science class and their future.

EVALUATION: Discussion of how school can affect your future career.
GOAL: To make students aware of career opportunities in environmental work.

CAREER EDUCATION OBJECTIVES:
1. Opportunities in Fish and Game and Wildlife management.
2. Opportunities in enforcement of environmental laws.
3. Opportunities in recreational area.
4. Make aware of environmental problems.

MATERIALS:
- Fish hatchery trip
- Spokesman from Environmental Protection
- Bus

PROCEDURE:
1. Discussion on what is the environment and need for protection.
2. Hatchery trip
3. Speaker on career opportunities from EPA.
4. Student chosen activity-clean up of school grounds.

RESULTS: Learned of varied opportunities in Environmental Protection. As a direct result, students helped in cleaning of the school property.

EVALUATION:
GOAL: To acquaint students with the various careers associated with dogs.

CAREER EDUCATION OBJECTIVES:
Students will be familiar with careers in grooming, breeding of dogs, veterinarians, and show judges. Also, to recognize adequate care of dogs and correct handling.

MATERIALS: 1. Movie projector
2. Brochures on heart worm disease, dog care, veterinarian careers
3. Dogs
4. Ropes, stakes, and ribbons for show.

PROCEDURE: Session 1: Mr. Paul Sullivan demonstrated standard of English Bulldog.
Mrs. Cheryl Wojack, groomer, came in and lectured on grooming. She brought her poodle and described grooming.
Session 2: Movie from New Haven obedience school on obedience training of dogs.
Session 3: Discussed heart worm disease. Mrs. Julie Anderson brought in Golden Retriever and show standards of the breed and appropriate behavior for dog show.
Session 4: Dog show was held.

RESULTS: Students seemed enthusiastic and able to control, handle and care for their dogs better, and more aware of careers in this field.

EVALUATION:
Introduced by: Janet Conlin
Subject: Science
Grades: 7 & 8

GOAL: To increase student's awareness of the careers available in the science field through class activities and field trips.

CAREER EDUCATION OBJECTIVES:
Specific areas introduced:
1. X-ray technician
2. Lab technician
3. Studies in anatomy
4. Psychology, counseling

MATERIALS: 7 Veal Hearts
X-acto knives
X-rays.
Bus
Trip to Bristol Hospital

PROCEDURE: 1. Looking at human anatomy through X-rays.
2. Comparative systems with veal heart-dissecting techniques.
3. Field trip to Bristol Hospital-stressing laboratory
4. Student involvement in awareness activities.

RESULTS: Students were better able to relate science studies to careers in Health Care cluster.

EVALUATION:
GOAL: To make the students aware of how mass production works, the problems created by it, and how it compares to the craft system.

CAREER EDUCATION OBJECTIVES:
1. Every job, done well, is worthwhile.
2. All careers require some special learning.
3. Work experience in some form facilitates career-decision making.
4. Occupations are inter-related in many cases, making them equally important.

MATERIALS:
- Printed cards on 80# white paper
- Colored markers
- 8½ x 11 construction paper
- Oaktag
- Rubber stamp and ink
- Tape

PROCEDURE:
I. Introduction-Explain craft system and workings of mass production.
II. Set up craft system-Some of the students will make the product (Christmas cards and envelopes) by the craft system. They will be timed and analyzed in order to compare it to mass production.
III. Set up mass production-An assembly line will be set up in class to mass produce the same product. Each class will measure its output over time to determine its productivity. They will compare it to the craft system.
IV. Each class will market the product to regain the cost of production.

RESULTS: Students will have an awareness of the values and drawbacks of both the production line technique of making goods, and the crafts method of making the same goods. They will also be aware of how a business is developed and why a product may be priced as it is.

EVALUATION: A marketable product will be produced.
GOAL: Students will study a technological device and show the careers involved in the production and utilization of it.

CAREER EDUCATION OBJECTIVES:
1. Careers require different knowledge, abilities, attitudes.
2. Careers can be grouped in various ways into "clusters" requiring similar abilities and providing similar rewards.
3. Changes and conditions in the world affect careers.
4. Different occupations are inter-related in many ways.

MATERIALS:
1. Readings-History books, science books
2. Do-it-yourself type of magazines (Popular Mechanics, Science Illustrated)
3. Wood, metal, wire, etc.

PROCEDURE:
1. Have the class break into groups
2. Each group will choose one machine (windmill, elevator, pulley, wheel, etc.)
3. Suggest some reading
4. Field trip to work site where tools are used
5. Make a technological museum

RESULTS: Students will have knowledge of how machines work, how they help man, how man needs change, and how machines also change.

EVALUATION: Each group will list five occupations directly related to the building or use of the machine.
GOAL: To acquaint students with the "inside" processes involved with teaching as a career.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. All careers require some special learning and preparation.
3. Work experience in some form facilitates career decision making.

MATERIALS: Normal volume and type of consumable teaching materials: paper, overhead transparencies.

PROCEDURE: 1. Have students choose their own groupings, 4 to a group, to create 6 groups (teacher has final say as to grouping to keep balance.
2. Have groups choose a given chapter to work with, from a 64-chapter sequence. (If a conflict, drawing of lots as fairest determiner of choice.)
3. Spend 1 week with all groups examining available resource materials as would be available to a teacher for preparation of a given chapter's work. (Textbooks, audiovisual materials, my file of previously used teaching materials.)
4. The 2nd week begin with 1st chapter of sequence each group was required to produce a weekly and daily lesson plan with supporting materials (class assignments and homework review materials and testing materials.)
5. Each group allowed 1 week to present their materials. It was emphasized that different teaching tasks should be matched to the appropriate personality within a group.
6. The culminating activity for each week's work was a group-made test.

RESULTS: Students responded positively when asked if they were made aware for the 1st time that teaching involved more than they originally thought. Several students commented that they would now consider teaching as a career choice because of their accomplishments and experience in this activity.

EVALUATION: Class discussion on the activity process, its accomplishments and weaknesses involved 1 class period at the end of the 7-week period (both teacher commentary and self-evaluation.)
SPECIAL EDUCATION
GOAL: Introduce students to jobs in the Manufacturing and Marketing and Distribution Clusters.

CAREER EDUCATION OBJECTIVES:
1. Visual Discrimination: sorting letters by color, size, and alphabetical order
2. Motor Coordination: Placing letters, centering, clamping and operating engraving machine.
3. Organizational Strength: Spelling, set-up and operational procedures
4. Self-Confidence: Talking to adults in order-taking and delivering and successful production
5. Creativity: To encourage children to visualize new uses and innovative methods of production
6. Awareness of school subjects and their role in the world of work
7. Awareness of business organization and operation
8. Every job, done well, is worthwhile and contributes to society.
9. All careers require some special learning and preparation.
10. Work experience in some form facilitates career decision making.

MATERIALS: Engraving machine, 2 x 8 plastic blanks, 1 x 3 plastic blanks

PROCEDURE:
1. Oral introduction to operation of machine and description of the project
2. Sort and categorize letters by size and alphabetize the letters being used.
3. Practice spelling message correctly in plastic letters; choosing correct size bit, centering and locking letters, plastic blanks and formation of sign. Clean-up of completed sign and machine as well as proper replacement of components
4. Formation of sales presentation and creation of appropriate order blanks
5. Order taking from teachers
6. Production
7. Delivery of product

RESULTS: Anticipated results were that name plates were produced and distributed to some teachers and office aids. Each student participates in at least one operation. Children had a much better understanding of the operation of a business and the assembly line production method. Children enjoyed the project and it successfully met the goals and objectives.

EVALUATION:
APPENDIX
The Field Trip

Many of the Career Education activities will call for some sort of first hand information from workers. An excellent way of getting this type of information will be through the "field trip". As Hoppock points out, "One can read about working conditions; one can talk about working conditions; one can recognize and acknowledge them intellectually; one can even memorize them and retain them long enough to pass an examination but the student who has actually seen them and heard them, felt them and smelled them, has learned them emotionally as well as intellectually."

The following are some points that should be followed to ensure a successful and profitable field trip experience.

1. A lesson should be used with any field trip. A field trip should be used to emphasize a lesson, not as a Career Education activity by itself. It can be used before or after a lesson. The length of the classroom lesson will be determined by the content, class ability or any other criteria. It can be as short as one teaching period or as long as two or three weeks.

2. Present a request with full details (lesson plans, place to visit, number of students, etc.) to the administration.

3. Make arrangements well in advance (2-3 weeks).

4. Make out permission slips for students. Include information to the parent as to where, when, and why students will be going on this trip (Example included).

5. The specialist will take care of the following:
   1. Finding and contacting an appropriate sponsor.
   2. Briefing him on what you would like your students to see or experience.
   4. Providing any materials relevant to this tour that can be used in class afterwards.

6. Collect insurance money from the students.

7. Create a questionnaire for students to take with them. At this age, although students may be very curious as to what they see, they are often hesitant to ask questions. By giving them a series of questions to ask or things to look for, you will create a learning type atmosphere and not just a social event. (Example included) These information forms can be stapled to cardboard or put on a clipboard and should be carried and filled in during the field trip.

8. If possible, students should be encouraged to bring cameras and/or tape recorders to capture what they see and hear. This information can be used later in planned class discussions or it can be used to prepare students that may be taking the trip at a later date, or used for classes that may not be going on this field trip but can still benefit from other's experiences.
I, ____________________________, as a member of the West Woods Mall association agree to comply with all necessary rules and regulations agreed upon by its members.

1. To act responsibly at all times.
2. To remain at my assigned station at all times.
3. To conduct myself properly at all times.
4. To be extra careful with all property entrusted to my care during my assignment.
5. To allow NO unauthorized Personnel into my area of responsibility.
6. To report all infractions I observe in my own area of responsibility as well as all infractions I observe within the West Woods Mall.
7. To make sure there is no loitering at all stations.

In order to protect the many who use our mall from those few who may ABUSE the privileges, I believe it is my place and my duty to report all infractions and those responsible for such.

GOAL: To develop a method by which student help can be provided for several school activities. To have students participate in a realistic employment procedure.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. A person may choose a career for many reasons.
3. The choice of a career will involve some conflict and compromise between values and needs.
4. Work experience in some form facilitates career decision making.

PROCEDURE: 1. Job description is written.
   2. Job description is posted on Employment Bureau, Bulletin board, and advertised over school radio.
   3. Interested students fill application form.
   5. Sponsors of the job review applications and conduct interviews.
   6. All job applications are kept on file.
   7. Workers for Employment Bureau are taken from study halls so that the bureau is manned at all times.
   8. One 7th and one 8th grader work together at one time.
   9. These workers give help in filling out application forms.
  10. If a person is "fired" from his job, the Employment Bureau is notified.

RESULTS: The students will have a better understanding of the mechanics of looking for work, filling out applications, being interviewed, as well as the importance of past accomplishments, attendance and recommendations in future employment.

GOAL: To familiarize students with some of the careers in banking.
To provide a model by which the processes of banking can be investigated and practiced.
To provide a service for the student body.

CAREER EDUCATION OBJECTIVES:
1. All careers require some special learning and preparation.
2. Work experience in some form facilitates career decision making.
3. A person’s inter-relationship with employer, his fellow workers, and society affect his career.

PROCEDURE: 1. Workers for the bank apply through the Employment Bureau.
2. Capital for the bank loans is produced through a fund raiser: car wash, car dry, tag sale, etc.
   Capital is also obtained through a loan from school associations.
3. Lunch Loans: Slip #1 is filled out and given to the student. This note is used in payment for lunch. Slip #2 is kept on file. At the end of lunch a cafeteria worker returns all slip #1's to bank and is paid. (#3) Slip #4 is used for bookkeeping. Interest is charged at the rate of 10¢ per day for the first day, 5¢ per day for the next 2 days, and 25¢ for the fourth day.
4. Christmas Club: Six payments are offered.
   A. Get all but $1 back plus free gift.
   B. Get all money back after six weeks.

RESULTS: Students will have a better understanding of what kind of work goes on in a bank, what the work will be like, and what a bank does with their money through a hands-on activity. The bank will also affect a large part of the student body in teaching them about banking services through loans and savings.

GOAL: To introduce students to a variety of careers in media, through a hands-on program of developing and maintaining a radio station. Provide a service to the school much like a radio station provides to a community.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. Any person is capable of performing well in more than one career.
3. Work experience in some form facilitates career decision making.

MATERIALS:
- Office space
- Records
- Tape recorder, tape
- Record Player
- Radio
- Micro-phone

PROCEDURE: Student workers will be provided through the Employment Bureau. Office space is equipped with tie-in to the office intercom. Schedule for workers and schedule for programs is developed. Present schedule:

AM***
1. Prepare announcements
2. Recorded music to homerooms
3. Flag salute
4. Cafeteria menu
5. Activity announcement
6. Special announcements
7. Good news - bad news

STUDY HALLS***
Classical and semi-classical music played into study halls during the day

LUNCH***
Rock music played during lunch period

Proposed activities:
1. Friday world news wrap-up (Capsule of the week's important stories)
2. Friday community news wrap-up (Same for local news)
3. Friday school news wrap-up (Same for school news)
4. Community and school sports
5. Announce players before a basketball game, and give box scores during half time
6. Story telling by 7th and 8th graders to elementary grades
7. American Folk Tales to elementary classes
8. Enjoying Literature (reading book reports)
9. Commercials (for other organizations)
10. Historical minute (one minute spot about local and national history)
11. Looking to the Future (discussing future careers)
12. Imagination Plus (Serialized stories students have written)
RESULTS: Students will have a better understanding of the many careers in media, through working in the school radio station. They will fill a need in communicating information to fellow students. Use their History, English, and other classes as centers for gathering information for their radio programs. They will also be more aware of the role of the radio, T.V., and newspaper plays in the community. Self confidence will be built through the process of gathering and relating information to peers.

November 19, 1974

Radio Program

1. Salute to flag
2. Cafeteria - Hey, Hey, Hey, Gang! Guess what our Gorgeous Cooks brewed up for us today? HOT DOGS! BEANS, SAUCER, BANANA CAKE and MILK ------- that's what they're going to serve us this fine Tuesday!

3. Read copy of "Job for the Day" Description
4. Activity Announcements

A. How many of you COOL CATS out there in WWSR land would like to take a trip to New York? Yeh, that's right, - New York-- Saturday, December 7th, from 8 am to 8 pm! Maybe you dudes would like to visit New York's CHINATOWN! How about lunching at a CHINESE Restaurant? Well OK, -- How about a Cool tour of the NBC STUDIOS? Would you rather visit the STATUE of LIBERTY? No? Then how's this -- an OCEANLINER TOUR or see a Broadway Matinee? I tell you what I'm going to do. You sign up to go on this trip, beg, borrow or work for $11.00, and I'll see to it you people get to do 3 or 4 of these things. (Anyone interested meet on Thurs. Rm. 7)

November 19, 1974 (Continued)

B. Hey, Gang! Don't forget -- today is the day of days for Westwoods! Yup! It's grand opening day!! our mall is officially open today! Many Dienitaries (to you cool cats out there, Dienitaries means very important people). They are all coming to celebrate!

The mayor is sending someone!
The Superintendent of Schools will be there!
Our Chamber of Commerce will be represented!
Directors from career education will be there!
Our School Orchestra is going to Perform!

Hot Dog but today is going to be a great day!
It's really nice to know that we are #ONE in Bristol with a project like this! What say we go all out to let then know what a great school we have and how proud we are of the school!
5. Meetings, and Miscellaneous Announcements (once in each study and at lunch)

A. Last day for popcorn sale at 2:30 today!
B. Talent show meeting in Rm 5 at 2:30
C. A "Must attend" meeting for science lab aides Wed. at 2:30 in Rm 12
D. A school bank employee meeting Wed. in Rm 8 at 2:30
E. Students going to Goodwin-Tech. This Thursday morning must meet at front door at 8:30 with coats. Please bring 25¢ for refreshments!
F. Science department needs to borrow a rototiller some afternoon this week. If you have a rototiller that can be transported, please see Mr. Daily

6. Little Known Facts:

A. Did you know that a Chinese Typewriter has up to 5,850 characters. It requires a skilled typist to type 11 words a minute on the machine.

B. How about this little known fact - Lake Compounce comes from the Indian named Compound. He was an Indian who was returning from Farmington one night stoned to the gills (drunk that is). He borrowed a brass kettle to paddle across the lake. He ain't never been seen since!

C. Now back to music from station WWSR the silver "W"!

GOOD AFTERNOON, BASKETBALL FANS! WELCOME TO WEST WOODS GYMNASIUM
FOR TODAY'S BASKETBALL GAME BETWEEN
COACHED BY ____________ AND WEST WOODS ____________ TEAM.

COACHED BY ____________________.

THIS IS ____________________ FROM WEST WOOD'S STUDENT RADIO,
STATION WWSR, BRINGING YOU SOME OF THE HIGHLIGHTS OF TODAY'S BASKETBALL GAME!

THE REFEREE FOR TODAY'S GAME IS ________________.
SCORE
KEEPERS ARE ____________________________________.
TIME KEEPERS ARE: ____________________________________.

SAY, WE CERTAINLY DO NOT WISH TO LEAVE OUT THE BACKBONE OF ANY BASKETBALL TEAM---THE CHEERLEADERS! OUR VISITING CHEERLEADERS HAVE AS THEIR ADVISOR ________________.
DON'T YOU AND YOUR GIRLS STAND AND TAKE A BOW. WEST WOODS CHEERLEADER ADVISOR IS MISS BROZINSKI. WON'T YOU PLEASE STAND AND TAKE A BOW, TOO?
WE ALSO HAVE THE GOOD FORTUNE OF HAVING MAJORETTES FOR THE FIRST TIME. THEY ARE UNDER DIRECTION OF MRS. PURDELL. WOULD MRS. PURDELL AND THE MAJORETTES PLEASE STAND AND TAKE A BOW.

THE STARTING LINEUP FOR ____________________ TODAY AT CENTER IS ____________________.
AND AT GUARD IS ________________ AND ____________________.
THE FOREWARDS ARE ____________________ AND ____________________.
THE STARTING LINEUP FOR WEST WOODS TODAY AT CENTER IS ____________________.
OUR GUARDS ARE ____________________ AND ____________________.
THE FORWARDS ARE ____________________ AND ____________________.
STATION WWSR WISHES TO REMIND YOU THAT BASKETBALL IS PROBABLY THE MOST DIFFICULT SPORT WHEN IT COMES TO BEING A REFEREE. WE AT WEST WOODS REALIZE THIS AND WE PLAN TO SHOW GOOD SPORTSMANSHIP ON THE COURT AS BALL PLAYERS, AND OFF THE COURT AS SPECTATORS. WE KNOW OUR VISITORS WILL SHOW GOOD SPORTSMANSHIP TOO!!!

SO--WHAT SAY WE HAVE A GOOD BALL GAME AND MAY THE BETTER TEAM WIN.

PLAY BALL "REF"!!!!!!

SO FAR, FANS, AT THE END OF THE FIRST QUARTER, THE SCORE IS: ____________________ AND WEST WOODS ____________________.
SPACE FOR SOME INDIVIDUAL HIGHLIGHTS OF THE GAME!!
SO FAR, FANS, AT THE END OF THE FIRST HALF, THE SCORE IS:

AND WEST WOODS

SPACE FOR SOME INDIVIDUAL HIGHLIGHTS AND SCORES OF THE GAME.

AT THE END OF THE THIRD QUARTER THE SCORE IS:______AND W.W____

SPACE FOR SOME INDIVIDUAL HIGHLIGHTS AND SCORE IS__________

AND WEST WOODS______________.

THE FINAL SCORE BASKETBALL FANS IS______AND WEST WOODS______

UNOFFICIALLY, THE HIGH SCORER FOR TODAY'S GAME IS__________

WITH A TOTAL OF_________ POINTS.

THE NEXT GAME AT WEST WOODS GYMNASIUM IS ON________ BETWEEN

_______________________________ AND WEST WOODS__________________

THE NEXT AWAY GAME IS AT_____________ AGAINST WEST WOODS____

______________________________ ON__________________.
GOAL: To develop an understanding of the representative form of government.
To provide a service to the student body by which their feelings and ideas may be expressed to the student body and teachers.
To provide an opportunity for students to participate in making school policies.
To investigate the work of politicians.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. All careers require some special learning and preparation.
3. Work experience in some form facilitates career decision making.
4. A person's inter-relationship with employer, his fellow workers, and society affect his career.

MATERIALS: Poster board
Color markers
Other materials needed for campaign
Voting Machine (Registrar of Voters, City Hall)

PROCEDURE:
1. Homerooms select two representatives.
2. Representatives meet and nominate two people for each of the four offices, President, Vice-President, Secretary, and Treasurer. (President must be an 8th grader)
3. Campaigning, voting, etc. is discussed in Social Studies classes.
4. One to two weeks is spent on campaign. Posters, buttons, radio announcements, etc. Campaign managers do most of this work.
5. Platform is stated and a campaign speech is given at an assembly program.
6. Voting takes place on a real voting machine.
7. Referendums are voted on at this time.
8. Four officers chosen form the Executive Committee.
9. The Executive Committee meets bi-weekly prior to Student Teacher Principal group.
   General Meeting-(All representatives) meet bi-weekly
   Agenda - A) Secretary report
          B) Treasurer report
          C) Committee reports
          D) Executive Committee report
          E) Open forum (anyone may participate)
10. Work shops are given to all representatives and officers by Mr. Ray Paul on a Saturday.
RESULTS: Students will have a better understanding of the workings of a representative form of government. They will have an opportunity to decide on some school policy. People who are representatives or officers will have a chance to do much the same work as politicians do.
GOAL: To provide a source for hands-on experience in the Marketing Distribution and Consumer Homemakers courses. To provide a service to the student body in the form of a school store from which they may purchase school supplies.

CAREER EDUCATION OBJECTIVES:
1. Different careers require different abilities, attitudes, and interests.
2. All careers require some special learning and preparation.
3. Work experience in some form facilitates career decision making.

MATERIALS:
- Room for housing the store and storing materials
- Cash register
- Calculator

PROCEDURE:
1. Workers are advertised for through the Employment Bureau.
2. Material for the store are ordered using money from a fund raiser, or parent organization, or student council.
3. Profit margin and prices are figured.
4. Store is open during all periods of the day.
5. Records of money coming in, stock on hand, workers hours etc. are kept.

RESULTS: Students will have a better understanding of how a store is set up, how prices are arrived at how profits are made etc. The store will provide a source for "employing" students interested in the retailing business. It will also provide a place for students to buy school supplies.
