The document is a collection of teacher guides to sample units introducing agriculture at the primary level; part or all of the units can be used along with the regular curriculum during the school year. Intended to acquaint K-3 students with agriculture's important role, the purpose of the course is to impart basic knowledge of materials, tools, processes, concepts, and career opportunities in agriculture. Five introductory units prepare students to focus on agriculture; the guide outlines are very brief. The nine sample units on agriculture are activity-based; the teacher guides are presented in the form of brief outlines in general terms, outlining basic procedures and listing content-area skills such as reading and mathematics which may be developed in the course of the activities. Four of the nine sample units are field-trips (to an orchard, a tomato farm, a golf course, and a stadium); four others involve the planting and maintenance of school gardens (flowers from bulbs, flowers from seeds, fruit in a greenhouse, and vegetables); and the remaining sample unit teaches leaf collection and identification through a "school rake-up." A teacher evaluation form, agribusiness career information, listed teaching resources, and 10 student activity sheets are included. (AJ)

Publication #0004
This publication is one of a series of curriculum documents in career education written under the statewide curriculum development project conducted by the New Jersey Curriculum Management Center. Materials developed under this project are published by the New Jersey Vocational-Technical Education Curriculum Laboratory in order to ensure the widespread availability of these materials to practitioners in the field at a reasonable cost.

The purpose of this unit is to serve as a basic guide for teachers at the K - 3 grade levels. It is hoped that this guide will stimulate the K - 3 teacher into further exercises that will encourage the study of Agriculture as a base for learning in other subject areas.

The content is centered upon the interest of students. It is basic in nature and can be adapted to meet the needs of the students.

It is hoped that this unit will provide the K - 3 teacher with a basic guide for the Introduction of Agriculture — Career Awareness into the curriculum. The option is available for the teacher to use part or all of the units listed. More specific technical information will require research and development.

Development of other units is encouraged, and it is hoped that this guide will serve as the pilot for the experienced K - 3 teacher to implement other units in order to introduce Agriculture to their students.
IMPORTANCE OF AGRICULTURE IN NEW JERSEY

According to the Agriculture Committee of the United States House of Representatives, four out of every ten nonfarm employees in the United States hold jobs that are directly related to Agriculture. They are involved in processing, transportation, marketing, and manufacturing agricultural products or the goods farmers purchase.

In New Jersey, it is estimated that the agriculture and the food processing industry have about $1.5 billion impact annually on the state's economy.

New Jersey's million acres of farmland make a major contribution to the underground water supply. The farmland holds rainfall, and allows what is not required for the crops to filter down and replenish the underground water supplies.

Agriculture is important to the fresh air supply in New Jersey. One acre of fruit trees, wheat or corn can generate enough oxygen for six people. Thus, New Jersey's one million acres of farmland can supply enough oxygen for six million people.

In addition to the factors mentioned above, agriculture is important for New Jersey because the population appreciates its value. According to a recent Gallop Poll, 80 percent of New Jersey's nonfarm residents want to keep agriculture in the state. The reasons given were the following: production of perishable foods nearby; contributions to the state's economy; retention of taxpaying open space.

Agriculture is important for New Jersey. It relates to employment and the environment, and therefore would be relevant to be included into the educational system at all levels.
INTRODUCTORY STATEMENT

Each student taking this course should be able to understand the basic phases of agriculture as presented in the course in relation to their every day lives, as well as to the related careers involved.

1. Nature and scope of the course -- it should enlighten the students as to the important role that agriculture has in the society in which they live. It is the purpose of this course, therefore, to impart basic knowledge dealing with materials, tools, processes, concepts, and career opportunities in agriculture to the student.

2. Grade placement -- the course will be offered to K-3 grades as part of their regular curriculum.

3. Prerequisites -- none.

4. Length of the course -- part or all of the units can be used along with the regular curriculum during the school year.
AN APPROACH TO TEACHING AGRICULTURE AT THE K - 3 LEVEL

In planning to teach agriculture at the K - 3 level, we must consider the needs and interest of the children we are planning to teach. If the subject matter is interesting and challenging, students will want to learn. If they are motivated to learning, they will tackle the problems relating to it and thus will develop problem solving skills. Students need to have their curiosities and intellectual needs satisfied as they pursue their interests. We must also look at other underlying beliefs about children learning, and adopt our style of teaching to meet these needs.

BELIEFS ABOUT CHILDREN LEARNING

The following beliefs should be considered in planning to teach agriculture at the K - 3 level:

1. Curiosity motivates learning -- when children satisfy their curiosity they are happy, they increase their knowledge, and are eager to learn more. Curiosity can be satisfied by the teacher through a use of interest learning centers, instruction sheets, and question and answer cards.

2. Creativity -- children must have time and be free to experiment and investigate. Teachers can stimulate the children to think by allowing children to use materials for the first time and allowing them to experiment, manipulate and explore.

3. Success -- everyone wants to succeed. As a child succeeds, he develops a positive self-image. Teachers should provide children with individual interest in something at which he can succeed.
4. Individualized learning — giving all children in a class the same assignment is unfair. The teacher should recognize individual differences, and offer alternative assignments to meet these variations.

PLAN FOR TEACHING

The unit should be the basic plan for teaching agriculture at the K - 3 level. A unit can be defined as "an organized body of contents and activities designed to facilitate student learning."

Steps in teaching the unit are as follows:
1. teacher planning
2. pupil motivation and planning
3. acquisition of information
4. comprehension of concepts, skills, and attitudes
5. presentation of the unit
6. evaluation of unit

CONCLUSION

Teaching agriculture at the primary level should be efficient and effective. It can be efficient if it does what it sets out to do. This can be checked by comparing actual child performance with the course objectives. Effectiveness can be checked by comparing the objectives with the actual jobs or vocation.

To be effective, the teacher must select appropriate objectives, and allow each child to reach them.
GENERAL OBJECTIVES

1. To develop career awareness.
2. To develop an appreciation of work attitudes and habits.
3. To develop motor skills and coordination of large and small muscles.
4. To develop safety habits.
5. To establish desirable health and habit attitudes.
6. To promote good health and physical stamina.
7. To improve speech habits.
8. To develop a positive self-image.
9. To promote self-confidence, self-control, and a sense of security.
10. To develop the ability to work and play with others.
11. To promote desirable social behavior.
12. To introduce desirable work habits.
13. To develop communication skills.
14. To promote:
   - observing
   - listening
   - thinking
   - reasoning
   BY
   - investigating
   - inquiring
   - experimenting
   - discovering
   - drawing conclusions
   - evaluating
15. To extend the child's readiness for:
   - language arts
   - mathematics
   - writing
   - reading
   - social studies
   - science
   - creative thinking and expression
16. To develop recognition of and respect for authority.
17. To promote standards of good citizenship.
18. To develop a respect for people of all races, creeds, and economic backgrounds.
SPECIFIC OBJECTIVES

1. To acquaint students with the variety of agricultural occupations available.

2. To help students gain understanding of his own interest, abilities, and personality traits as they relate to competencies in agriculture-related occupations.

3. To have the students make a successfully finished project that will be useful and attractive.

4. The students will be able to list the major differences between individual, and production methods used in agriculture.

5. The student will be able to grow plants and flowers from seeds, cuttings or bulbs.

6. The students will have an understanding of the importance of agriculture as it relates to life.

7. The student will have an appreciation of turf maintenance.

8. The students will be able to make attractive flower arrangements.
INTRODUCTORY UNITS

Unit I

Learner Objectives

1. To understand that school, work and play are three areas of life.

Learning Activities

1. Morning Hours - City Coming to Life

2. Morning Activities
   a. Wake-up
   b. Wash
   c. Dress
   d. Eat breakfast

3. On Our Way
   a. Car
   b. Bus
   c. Train
   d. Walk

4. Where are we going?
   a. School
   b. Work
   c. Play

Learning Resources

1. Teacher
2. Students
3. Magazine pictures

Evaluation Procedures

1. Observation
2. Distinguish between pictures of people at school, work and play.
Unit II

Neighborhood Workers

1. Objective

1. To be aware of the workers in our neighborhood.

Learning Activities

1. Workers in neighborhood
   a. milkman
   b. breadman
   c. policeman
   d. fireman
   e. mailman
   f. others

2. Importance of jobs
   a. Do they help us?
   b. Do we help them?
   c. All work is important.

Learning Resources

1. Video tape recorder
2. Discussion
3. Magazine pictures
4. Resource person

Evaluation Procedures

1. Personal observation of discussion.
2. Identify pictures of workers.
3. Explain differences in uniforms.
Unit III

Working

Learner Objective

1. To be aware of the role of the workers.

Learning Activities

1. Kinds of workers
   a. self-employed
   b. factory
   c. out-door workers

2. Conditions
   a. effects of weather
   b. seasons
   c. hours

3. Salary
   a. commission
   b. per hour rate
   c. annual salary

4. Qualities
   a. teamwork
   b. harmony

Learning Resources

1. Discussion
2. Resource person
3. Film
4. Magazine pictures

Evaluation Procedures

1. Classroom Discussion
2. Oral reports
3. Written assignment
Unit IV

Agriculture in Our Lives

Learner Objective

1. To understand that agriculture plays an important role in our every day lives.

Learning Activities

1. Breakfast related to agriculture
   a. milk
   b. eggs
   c. bacon
   d. cereal
   e. juice
   f. others

2. Beauty of homes related to agriculture
   a. trees
   b. shrubs
   c. flowers

3. Other values
   a. careers
   b. related careers
   c. importance to environment
   d. shelter and clothing

Learning Resources

1. Charts
2. Pictures
3. Film

Evaluation Procedures

1. Observation of discussion.
2. List three important advantages of agriculture.
3. List three jobs related to agriculture.
Unit V

Careers in Agriculture

Learner Objective

1. To become aware of the jobs in agriculture and the related areas.

Learning Activities

1. How does food get from the farm to the home?
   a. processed food
   b. non-processed

2. Related occupations
   a. flower designer
   b. greenhouse worker
   c. groundskeeper
   d. landscape architect
   e. landscape gardener
   f. nursery foreman
   g. nursery worker
   h. tree pruner
   i. forester
   j. farmer
   k. seed analyst
   l. veterinarian
   m. dairyman
   n. poultryman
   o. others

Learning Resources

1. Magazines
2. Films
3. Food samples
4. Student discussion

Evaluation Procedures

1. Oral report
2. Written report
3. Observation of discussion
UNIT ACTIVITIES

1. Visit to Apple Orchard -- pick, eat and plant seeds.
2. Visit to Tomato Farm -- follow tomatoes from farm to industry
4. Planting Sessions -- around school and community.
5. Eat and Seed Days -- eat fruit in school and plant seeds.
6. Flower Growing and Arranging.
7. Development of Fruit and Vegetable Garden -- farm land adjacent to school.
8. Visit Golf Course -- play golf and learn values of grass.
9. Visit Stadium -- watch game, learn astro turf maintenance procedures after game.
10. Career Awareness -- in which the students will gain knowledge about the range and nature of various careers, including their educational and personal requirements, will be an essential part of the above units.
VISIT TO APPLE ORCHARD
VISIT TO APPLE ORCHARD
SAMPLE UNIT

DESCRIPTION

Basic Procedures:

1. Visit site.
2. Pick apples -- study effects of air pollution on trees and fruit.
4. Load apples.
5. Discuss what to do with apples.
6. Observe how the farmer performs the same operation.
7. Return to school with apples.
8. Eat apples and save seeds.
10. Supervise growth of trees while moving on to other units.

TOPICS

1. Learn transportation -- How shall we go?
   a. air
   b. bus
   c. taxi
   d. train
   e. walk
   f. other

2. Mathematics
   a. estimate how much it will cost.
   b. how long will the trip take?

3. Science
   a. Directions -- north, south, east and west
   b. Weather --
      1. local paper
      2. dial weather
      3. farmers almanac
      4. radio and TV
      5. calendar
4. Reading
   a. map reading
   b. road signs

5. Physical education
   a. planned activity at orchard site.

6. History
   a. history of county
   b. history of apples

7. Spelling
   a. apple
   b. core
   c. seed
   d. farmer

8. Writing
   a. notebook
   b. reports
   c. instructions

9. Career awareness
   a. transportation careers
      1. pilot
      2. stewardess
      3. bus driver
      4. cab driver
      5. train engineer
   b. communication careers
      1. newspaper
      2. weather
      3. radio and television
   c. agriculture careers
      1. farmer
      2. farm machinery
      3. packaging
      4. sales
VISIT TO A TOMATO FARM
VISIT TO TOMATO FARM
SAMPLE UNIT

DESCRIPTION

Basic Procedures:

1. Visit farm.
2. Pick tomatoes.
4. Load.
5. Discuss what to do with tomatoes.
6. Observe how farmer performs the same operations.
7. Visit Campbell Soup Company — observe how tomatoes arrive.
8. Observe what is done with tomatoes.
9. Return to school with tomato soup can.
10. Prepare soup to eat in school.
11. Art work with labels.
12. Crafts with cans.
13. Discuss what can be done with tops.

TOPICS

1. Transportation
   a. how do we schedule a bus?
   b. who do we call?
   c. jobs at the bus terminal.
   d. who will drive the bus?

2. Mathematics
   a. average number of tomatoes per basket.
   b. cost per pound.
   c. records.

3. Science
   a. what makes the plants grow?
   b. when should they be picked?
   c. how to seed?
4. Reading
   a. directions on soup label.
   b. trip agenda.

5. Physical education
   a. planned at site.

6. History
   a. history of tomatoes
   b. related history

7. Spelling
   a. company
   b. tomato
   c. leaf
   d. seed
   e. stem

8. Writing
   a. notebook
   b. reports
   c. instructions

9. Career awareness
   a. transportation careers
   b. production careers
   c. sales careers
School Rake Up—Leaf Collection and Identification
SCHOOL RAKE-UP -- LEAF COLLECTION AND IDENTIFICATION

SAMPLE UNIT

DESCRIPTION

Basic Procedures:

1. Rake-up leaves around school.
2. Possibly extend rake-up services to older persons' homes adjacent to school.
3. Discuss what to do with leaves.
4. Collect and identify leaves from piles.
5. Call Borough Hall to schedule "The Leaf Eater" to visit the school.
6. Discuss other uses of leaves:
   a. ground cover
   b. mulch
   c. art

TOPICS

1. Tools and equipment necessary.
   a. how shall we get it?
   b. how much does it cost?
   c. different types.
2. Mathematics
   a. if salaries were paid, estimate how much the job would cost.
   b. estimate cost of tools.
   c. estimate cost of equipment needed.
3. Science
   a. leaf identification.
   b. why do leaves fall?
   c. parts of a leaf.
   d. why are leaves necessary?
   e. importance to other plants.
4. Reading
   a. catalogues for tools and equipment.
   b. types of various leaves.
5. Physical education
   a. planned activity
6. History
   a. history of tools and equipment
   b. related history

7. Spelling
   a. leaf
   b. tree
   c. rake
   d. leaves
   e. other related words

8. Writing
   a. notebook
   b. reports
   c. instruction

9. Career awareness
   a. service careers
   b. agriculture career
   c. equipment maintenance
PLANTING SESSIONS -- AROUND SCHOOL AND COMMUNITY

SAMPLE UNIT

DESCRIPTION

Basic Procedures:

1. Survey garden plots.
2. Rake and prepare surface.
3. Measure distances.
4. Plant seeds, bulbs or small plants.
5. Continue with periodic maintenance.

TOPICS

1. Problem solve
   a. where to place plants, seeds or bulbs.
   b. how many do we need?
   c. how much will they cost?
   d. when will we start the job?
   e. what type of plants are best for the season?

2. Mathematics
   a. number of plants.
   b. measurements.
   c. basic survey methods.

3. Science
   a. plant science
   b. related items.

4. Reading
   a. directions
   b. stories about seeds and plants.

5. Physical education
   a. planned at site.

6. History
   a. related to topic
   b. related to location and season.
7. Spelling
   a. plant
   b. seed
   c. bulb
   d. dig
   e. fertilizer

8. Writing
   a. notebook
   b. worksheets
   c. reports

9. Career awareness
   a. ground maintenance
   b. architectural
   c. public service
EAT AND SEED DAYS
EAT AND SEED DAYS

EAT FRUIT IN SCHOOL AND PLANT SEEDS

SAMPLE UNIT

DESCRIPTION

During these sessions, the children will eat the fruit in school and save the seeds. The seeds will then be planted in portable greenhouses. Periodic maintenance and recording of progress will be made.

Basic Procedures:

1. Serve fruit
   a. discuss shape
   b. sizes
   c. color
   d. texture
   e. types -- watermelon, peaches, apples, etc.

2. Slice fruit
   a. half
   b. quarters
   c. other sizes

3. Fruit
   a. eat fruit

4. Save seeds

5. Plant seeds

6. Follow-up
   a. water
   b. progress reports

TOPICS

1. Fruit
   a. definition
   b. examples
   c. where are they grown?
2. Mathematics  
   a. sizes  
   b. shapes  
   c. concepts of whole, half, quarters, etc.

3. Science  
   a. fruit identification  
   b. seed identification  
   c. temperatures needed for growth

4. Reading  
   a. stories related to fruit.  
   b. Johnny Appleseed.  
   c. related stories.

5. Physical education  
   a. planned activity at school site.

6. Spelling  
   a. fruit  
   b. seed  
   c. shape  
   d. color  
   e. names of various fruits

7. Writing  
   a. notebook  
   b. reports  
   c. identification signs

8. Related material  
   a. show various films on fruit growth and production.

9. Career awareness  
   a. distributive education  
   b. sales  
   c. management  
   d. produce
FLOWER GROWING AND ARRANGING
FLOWER GROWING AND ARRANGING
SAMPLE UNIT

DESCRIPTION

The students will bring in various flowers from home, and learn flower arrangement. Students will plant seeds and grow their own flowers, and arrangements with artificial flowers will also be learned.

Basic Procedures:

1. Plant seeds
   a. select type of flower
   b. identify seeds.
2. Maintain and record progress.
3. Bring in flowers from home.
4. Use of artificial flowers.
5. Arrangement of flowers.

TOPICS

1. Flowers
   a. types
   b. purposes for use
2. Arrangements
   a. types
   b. related arrangements
3. Mathematics
   a. measurement
   b. estimating
   c. shapes
4. Science
   a. plant and flower identification.
   b. controlling growth of flowers.
   c. controlling size of flowers.
5. Reading
   a. directions for planting.
   b. directions for arrangements.
   c. directions for daily maintenance.
6. Spelling
   a. flower
   b. plant
   c. cut
   d. water

7. Writing
   a. rules and regulations
   b. notebooks
   c. reports

8. Related material
   a. films on flower arrangement.
   b. visit to florist.
   c. discussion of various related careers.

9. Career awareness
   a. florist
   b. nursery
   c. sales
DEVELOPMENT OF FRUIT AND VEGETABLE GARDEN
DEVELOPMENT OF FRUIT AND VEGETABLE GARDEN

SAMPLE UNIT

DESCRIPTION

A garden will be started with the hopes that the children will take the knowledge home and start gardens of their own near their homes.

Basic Procedures:

1. Select location
2. Plot garden
3. Determine what will be planted
4. Purchase plants and seeds
5. Rake-up ground
6. Plow soil
7. Smooth surface
8. Plant seeds and plants
9. Mark rows for identification
10. Periodic maintenance
11. Weed
12. Record progress of garden

TOPICS

1. Gardens
   a. types
   b. purposes
   c. need

2. Survey plot
   a. slope of ground.
   b. type of soil.
   c. reasons for ground preparation.
3. Mathematics
   a. measurement
   b. distances
   c. depth, width, and length

4. Science
   a. weather
   b. climate

5. Reading
   a. directions for preparing garden.
   b. directions for planting.
   c. directions on seed packages.

6. History
   a. who used gardens in the past?
   b. where did they get the seed?
   c. related information.

7. Spelling
   a. garden
   b. rows
   c. plow
   d. dig

8. Writing
   a. notebook
   b. reports
   c. garden description

9. Related information
   a. visit other gardens in neighborhood
   b. visit garden farms
   c. films on subject

10. Career awareness
    a. environmental
    b. agriculture
    c. natural resources
VISIT GOLF COURSE
PLAY GOLF AND STUDY TURF MAINTENANCE

SAMPLE UNIT

DESCRIPTION

This unit will introduce turf maintenance to the students.
The need for and some of the reasons for good turf maintenance will be examined.

Basic Procedures:

1. Play golf.
2. Discuss type of grass played on.
3. Difference between rough and greens.
4. How is grass kept in proper condition.
5. Sand traps
   a. purpose
   b. maintenance
6. Equipment used.
7. Watering systems.
8. Careers available around golf course.

TOPICS

1. Physical education
   a. golf game
   b. equipment
2. Mathematics
   a. measure distance that balls are hit.
   b. estimate distances.
   c. determine distance to hole.
3. Science
   a. weather
   b. climate
   c. cloud condition
   d. effects on air pollution
   e. home for wild life
4. Reading
   a. procedures
   b. instructions
   c. follow-up reports

5. Spelling
   a. golf
   b. grass
   c. turf
   d. cut
   e. ball

6. Writing
   a. notebook
   b. reports
   c. score cards

7. Related
   a. golf course careers
   b. maintenance equipment
   c. pro-shop

8. History
   a. background of game
   b. history of golf course
   c. historical significance within country

9. Career awareness
   a. professional golf
   b. maintenance
   c. sporting goods sales
STADIUM VISITATION
STADIUM VISITATION

ASTRO TURF MAINTENANCE PROCEDURES

SAMPLE UNIT

DESCRIPTION

Students will watch a game and afterwards go down to the field and learn about astro turf maintenance, and other related information.

Basic Procedures:

1. Observe game and beauty of grass.
2. After game go onto field and examine grass.
3. Observe grass maintenance procedures.
4. Discuss advantages and disadvantages.
5. Discuss related careers within the stadium.

TOPICS

1. Astro turf maintenance
   a. snow, rain, and sun effects

2. Mathematics
   a. size
   b. length of ball park
   c. measurements
   d. shape

3. Science
   a. related to stadium
   b. air currents

4. Reading
   a. score cards
   b. score board

5. Physical education
   a. planned activity at stadium
6. History
   a. history of sport.
   b. history of stadium.
   c. history behind game.
   d. related information.

7. Spelling
   a. baseball
   b. bases
   c. bat
   d. glove
   e. hot dog
   f. soda

8. Related information
   a. physical layout of stadium
   b. facilities
   c. related careers

9. Career awareness
   a. sales
   b. service
   c. communication
   d. sports (professional)
   e. maintenance
METHODS OF INSTRUCTION

1. Lecture
   a. by teacher
   b. student reports
   c. guest speaker

2. Demonstration
   a. by teacher
   b. by student
   c. guest speaker

3. Discussion
   a. teacher directed
   b. class groups

4. Visual aid presentation
   a. films
   b. overhead projector
   c. chalkboard
   d. display charts

5. Field trip

6. Student workbook lesson questions
DESCRIPTION OF CLASSROOM

The course can be taught in the regular classroom. Provisions for adequate storage for supplies and equipment should be made.
SUPPLIES AND MINOR EQUIPMENT

paring knives

electric portable greenhouses

construction paper

tape

tape rulers

pens, pencils, etc.

seeds

water cans

hoses

rakes

hoes

shovels

hand tools

weed killer

fertilizer

notebooks, paper

artificial flowers

planting boxes and pots

paper plates, cups, forks, etc.

plants
MAJOR EQUIPMENT

work bench
storage cabinet
book shelves
chalkboard
student desks
overhead projector
projection screen
16mm movie projector
outside storage shed
TEACHER EVALUATION

To be filled out before and after course is taught.

Directions:

On the scale to the right of the following items, circle the value rating that would indicate how you felt the aim was met. Note: 1 being weak, 5 being strong.

Weak 1 2 3 4 5 Strong

Course Aims

1. Development of career awareness. 1 2 3 4 5
2. Development of appreciation of work attitudes and habits. 1 2 3 4 5
3. Development of safety habits. 1 2 3 4 5
4. Establishment of desirable health and habit attitudes. 1 2 3 4 5
5. Promotion of good health and physical stamina. 1 2 3 4 5
6. Improvement of speech habits. 1 2 3 4 5
7. Development of motor skills and coordination of large and small muscles. 1 2 3 4 5
8. Development of a positive self-image. 1 2 3 4 5
9. Promotion of self-confidence, self-control, and sense of security. 1 2 3 4 5
10. Development of the ability to work and play with others. 1 2 3 4 5
11. Introduction of desirable work habits. 1 2 3 4 5
12. Promotion of desirable social behavior. 1 2 3 4 5
13. Development of communication skills. 1 2 3 4 5
14. Promotion of observation, listening, reasoning, and thinking skills. 1 2 3 4 5
15. Extension of the child's readiness for: agriculture, language arts, math, transportation, writing. 1 2 3 4 5
17. Promotion of standards of good citizenship.  
18. Development of a respect for people of all backgrounds -- ethnic and economic.  

TOTALS

COURSE OBJECTIVES

1. To acquaint students with the variety of agriculture occupations available once they complete school.  
2. To inform students of agriculture career opportunities available to them with preparation beyond high school.  
3. To help students gain understanding of his own interest, abilities, and personality traits as they relate to competencies in agricultural related occupations.  
4. To have the students make a successfully finished project that will be useful and attractive.  
5. The students will be able to list the major differences between individual, and production methods used in agriculture.  
6. The student will be able to grow plants and flowers from seeds, cuttings or bulbs.  
7. The students will have an understanding of the importance of agriculture as related to life.  
8. The student will have an appreciation of turf maintenance.  
9. The students will be able to make attractive flower arrangements.  
10. The student will become aware of various career opportunities in agriculture.
UNIT OBJECTIVES

1. To understand that school, work and play are three areas of life.

2. To be aware of the workers in our neighborhood.

3. To be aware of the role of the workers.

4. To understand that agriculture plays an important role in our every day lives.

5. To become aware of the jobs in agriculture and the related areas.
REFERENCES

Books containing projects, drawing problems, or other related activities suitable for teaching the manipulative instruction of agriculture.

4. NEW JERSEY MANPOWER NEEDS IN NATURAL RESOURCES AND/OR AGRICULTURE. Cooperative Research Project No. 5427, Rutgers University, New Brunswick, New Jersey. 1972.
