This guide to organization and decision making patterns in a Teacher Corps project is in the form of a workbook. It contains several forms and worksheets to be completed. There is a discussion of decision making patterns and a review of decision making skills. It is stated that to make good decisions, one needs skills to (1) identify the persons involved; (2) identify how those persons make decisions; and (3) identify if, when, and how a decision is made. There is an appendix containing the Teacher Corps definition of the community coordinator role. (RC)
A. INTRODUCTION

1) We all make decisions. The difference between the decisions we make at home and on the job is only that:
   a) There are more people involved
   b) There are rules of the game that have been set up by all kinds of other people
   c) There is power, dollars, status around in larger doses.

2) When we get involved in a Teacher Corps project, we sometimes hope that all that heavy stuff will disappear because Teacher Corps has such an exciting mission and values. In fact, most of the Teacher Corps people we run into seem to be good folk: people who have good ideas, values, interests and commitments.

3) Why then, do we not get things going smoothly. This session will attempt to sort out two key characteristics of organizations:

   STRUCTURE

   DECISION MAKING PATTERNS

   We will do this together.

4) As you came in, we handed out four pieces of paper:
   a) an agenda (white)
   b) an evaluation form for the session (blue)
   c) a paper with boxes with titles inside of them (green)
   d) a list of words in pairs (yellow)

5) The agenda tells you what we hope to get done (review agenda)

6) The first part of the evaluation form for the session is for you to make notes on as we go along. The second part is to fill out and put in the evaluation box at the end of the session.

   Are there any questions on the agenda and the evaluation form?

7) Please fill out the yellow form now and hand it in. We will be using the response at the beginning of the Decision Making patterns part of the agenda.

8) Hold on to the green sheet and worksheet A for a moment.

**Comments:**
1. Please circle the word at one end of each line which best represents your view.

Decision Making is

1 - logical
2 - formal
3 - constant
4 - control
5 - arbitrary
6 - individual
7 - closed
8 - legal
9 - rigid
10 - easy
11 - top
12 - clear
13 - scientific

intuitive
informal
responsive
adapt
democratic
group
open
developmental
flexible
hard
bottom
murky
humane

2. From the list select the three words which best describe how decisions should be made.
B. LEVELS OF ORGANIZATIONS AFFECTING A LOCAL TEACHER CORPS PROJECT

1) Now please refer to Worksheet A and the Green Sheet. The Green Sheet lists the majority of the titles (roles) which have an effect on your action as a community coordinator. Many of them do not have immediate day by day effect that is visible to you. It is important though, to know that they are out there. Please complete Worksheet A. When you are finished, we will review the unknowns.

2) One reason for putting each role or title in its place is so they don't clutter your mind or confuse you. In management terms this is called mapping the organization. In any mapping you will will find levels. It is important to note that to get from one level to another level efficiently you need to find the doors. These are called linkages. (insert overlay A here)

3) In a local Teacher Corps project the ENTRY point to Teacher Corps is the project monitor. Access at any other point indicates to everyone that some special need, concern, issue, confusion, or unusual action has occurred that the normal operating procedure does not take care of. While actual power, money, decision may be at a point other than the entry point, the entry point is the access point for requests. My personal experience with Teacher Corps says to me that while Bill Smith and others are great people, I need to go through the entry point for my activity to get things done by the Teacher Corps.

4) As a community coordinator, getting action requires my getting my requests and needs through the project monitor door. That probably means some understanding of how things get to the project monitor from my project. That also probably means an understanding of what things go to the project monitor from the project's point of view and how things are accepted at the door; e.g. in writing, on Tuesdays, gently.

5) Since the approved proposal is the basis for operations between Washington and your project, you should determine first what it says the project will accomplish and what the community component will produce. You should also find out how it says decisions will be made internally. It is important to realize that the proposal probably will not include all of the people or titles at the local level have clear tracks for how things get done. Any information you can collect is the basis for your negotiation of any change or any existing activity or procedure.

6) Since each local project is somewhat different, we can identify the people, the routes, and the decision points in our projects by doing Worksheet B. Please complete Worksheet B here.

---

**Note:** The document contains a reference to Worksheet A, Worksheet B, and an overlay A which are not visible in the image. The content is primarily instructional, focusing on the process of mapping organizational levels and identifying access points for actions.
7) Your lists should show that:

a) there are different groups or organizations working together in your project:

School  -  Community  -  Higher Education  -  Others

b) there are levels in the organization you work with at the local level. A title or name of a person should appear as a connecting point between you and a final decision in each organization.

c) there may be different people having different connections to a decision in money matters, degree matters, academic curriculum, community component, school and university decisions.

The lists also show you the what (areas of decisions) and how (procedures to get a decision) in your local project from your point of view. It probably will be filled in differently by each person in your project. It is important to remember that when one person serves as a link to other people or groups you have identified a level in your organization even if no one including you wants to admit this so publicly.

8) We now have established some of the road maps for Teacher Corps projects. We know what most of the boxes that exist in Teacher Corps are. We know where some decisions get made. We know how to get across the boundaries between levels and between organizations through the door person.

C. DECISION-MAKING PATTERNS

1) Most of our view of decisions is based on our perception of what Decision Making is. If we review results of our early survey, we find the following characteristics of decisions.

(Review results)

2) The important point about decision patterns is that they are the results of interconnected effects. There are very fancy formulas developed to explain all of this. Basically the patterns can be broken out as follows:

a. decisions occur when one has the opportunity to make decisions.
b. decisions occur with some information available and some level of mastery of decision making.
c. decisions occur individually or in groups.
d. decisions occur within a range of dollars available and dollars needed.
e. decisions occur in an organization which is effected by who is in it by goals, by its pattern of operations, and by its control mechanism.

The best decisions are those which get through all these within the available time for decision.

Let's see what words apply to the decision pattern in the following case study.

(Do Exercise A here)

To examine a decision one needs a clear set of questions or a pattern in mind. One pattern that has been developed is the following:
STAGES OF DECISION MAKING

1. Discovering the ITCH
   - identify ITCH
   - identify source (cause of) ITCH
   - identify where the ITCH can be taken care of.

2. Deciding to do something
   - agree on the intent to remove (reduce) ITCH
   - identify resources needed
   - select target to deliver resources

3. Figuring out what to do
   - analyze the ITCH
   - analyze the resources
   - analyze the environment and the system the solution is caught up in

4. Finding out 'how to do' something
   - get the resources together
   - invent possible actions
   - agree on action to reach target
   - agree on roles and responsibilities
   - agree on standards and expectations

5. Doing something
   - start the ball rolling
   - keep the ball alive
   - share the ball with others
   - keep track of what was, it, and will be
   - keep track of what questions were asked, answers and promises made and what was delivered

6. Knowing that the ITCH has changed
   - measure what has happened
   - report what has happened
   - plan next steps
When we have looked at decision making we find the following questions as crucial in making a useful decision.

CHECKLIST FOR IDENTIFYING DECISION POINTS?

1. Where in the organization are decisions made?
2. Who makes what kinds of decisions? Is it one individual or a group? NAME, ADDRESS, PHONE NUMBER?
3. What kind of information are decisions based on?
4. What problems or kinds of decisions are passed on to someone else? in the organization? somewhere else?
5. Does professional or technical information convince the decision-maker(s)? in what areas?
6. How are decisions made? How long does it take? How will you know the decision has been made?
7. Does a decision once made get communicated to those who must implement it? If not, where does it get stuck?

You will notice that both of these lists make public or formal a decision making pattern. Many persons working with decision making have begun to talk about and develop Decision Logic Trees. These tend to come in many forms, some very formal, some tied into computers and statistics. We have developed two grids which you may find useful.

(Insert Grid A & B)

What decision patterns do is to help keep track of where one is at in making a decision, then one can get useful information to others who also have to decide or to help you decide.
Grid A
Basic Decision Characteristic

A. Domain

Kind of Decision to be made
-Immediate decision
-Decision inquiry when have time
-Decision crisis have time

B. Kind of Response Needed

Kind of Response Needed (item)
-Usual
-Unusual
-Unknown

C. Routing of Request

Routing of Request (item)
-Regular
-Special
-Unknown

D. Impact of Request

Impact of Request (item)
-Normal
-Minimal
-Crucial
-Unknown

E. Expected Action by Decision Maker

Expected Action by Decision Maker (item)
(Easy)
(Hard)
Quick
Slow
Refer to someone else
Unknown
D. REVIEW OF DECISION-MAKING SKILLS

To make good decisions, one needs skills to identify the players in the game:

1) levels
2) roles
3) functions
4) areas of responsibility
5) kinds of decisions made
6) amount of power, dollars, control
7) name, address, phone number

(2) to identify how the players make decisions:

1) roles played
2) style of decisions
3) personality characteristics
4) influencing factors
5) control involved
   - law
   - regulation
   - policy
   - directive

(3) to identify if, when, how a decision is made:

1) making decision
2) keeping track of response
3) making decision public by action
4) reporting on effect of action
Selected Bibliography

Model for Understanding Organizations

![Diagram showing espoused theory, effectiveness, value, congruence, decision, behavior, action, testability, theory in use, and decision making]

J. Victor Baldridge, "Organizational Change: The Human Relation Perspective versus the Political Systems Perspective" *Educational Researcher*, Feb. 1972, p. 4-10

Influence on decisions:
1. Intellectual Heritage
2. Level of Analysis
3. Goals or Means
4. External environment
5. Image of Leaders
6. Leadership development techniques
7. Fade out or change

Areas of Decision making:

- Goals
- Environment
- Organization
- Strategy
- Implementation
- Control

Decision Making Is

1 - logical intuitive
2 - formal informal
3 - constant responsive
4 - control adapt
5 - arbitrary democratic
6 - individual group
7 - closed open
8 - legal developmental
9 - rigid flexible
10 - easy hard
11 - top bottom
12 - clear murky
13 - scientific humane

2. Top five words listed.
Appendix A

Teacher Corps: Definition

Role of the Community Coordinator

If the community based education portion of this training project is to be successful, it is important that staff be provided to plan and coordinate its implementation.

The community coordinator should be the staff person to be involved in (1) developing and administering the community based portion of the Teacher Corps project, (2) the instructional portion of the training of corps members, and (3) the coordination of schedules for corps members. The coordinator has the responsibility for either conducting classes, seminars, etc. in community education, or for arranging for them to be provided by utilizing other appropriate sources.

Additionally, the coordinator should:

1. arrange schedules and assignments for interns and teacher aides and (desirably) experienced teachers to gain the necessary experiences in community involvement and social service agency involvement.
2. serve as liaison between the school, university and community (residents and agencies).
3. arrange lectures, seminars, visits for training of interns, teacher aides and experienced teachers in community education.
4. insure that corps members gain the necessary knowledge and skills to utilize parents and agency personnel and services in the education of children, and if necessary, to train parents and others to serve in instructional and teacher supplement roles.
5. evaluate the success and performance of corps members in community based activities.
6. develop and/or coordinate the implementation of orientation sessions designed to develop an understanding of the social, economic and other unique characteristics of the racial and cultural groups in the community.
7. develop and/or coordinate the implementation of seminars, etc. to develop an understanding and appreciation of the multicultural characteristics of the racial and cultural groups in the community.
8. take the leadership for insuring that community education instructions are properly planned and adequately included in the school operation and in the training program.

The community coordinator should possess either (1) the ability to perform the above functions, or (2) be able to coordinate and arrange for these functions to be performed.
