The document is the final report of the career development outreach project. The project was designed to actively involve a systematic program of career education, dissemination of occupational information, and career guidance. The project was to make the target population (students, faculty, and staff at the University of Maine at Farmington and individuals referred by community agencies) cognizant of the career resources available to them when making career choices and also to encourage the target population to make their career decision based on realistic information. The functions (individual counseling, testing, placement, community service, group counseling, and resource library) of the center have been tested over the years and proven successful. Survey instruments, forms, and instructional material are appended. (KB)
CAREER DEVELOPMENT OUTREACH PROGRAM

EXEMPLARY PROJECT

Conducted Under
Part C of Public Law 90-576

The project herein was performed pursuant to a grant from the
Bureau of Vocational Education, Maine Department of Educational
and Cultural Services. Grantees undertaking such projects under
State Department sponsorship are encouraged to express freely their
professional judgment in the conduct of the project. Points of
view or opinions do not, therefore, necessarily represent official
department of Educational and Cultural Services position or policy.

SUMMARY OF REPORT

TIME PERIOD:

This report covers the period, July 1, 1974 to June 30, 1975.

GOALS AND OBJECTIVES OF THE REPORT:

The goals of this Outreach Project were to inform, and to motivate the following groups in the area of Career Development:

1. Students at the University of Maine at Farmington
2. Faculty and Staff at the University of Maine at Farmington
3. Individuals (high school dropouts, unemployed, underemployed young adults, veterans, etc.) that are referred by the staff of the Community Action Council of Franklin County, Veterans Administration, Bureau of Veteran's Affairs, Neighborhood Youth Corps, parents and high school counselors.

The Career Development Outreach Project was designed to actively involve the staff and facilities of the Center for Educational and Career Development in a systematic program of career education, dissemination of occupational information and career guidance. The project continued to make the above-mentioned target populations cognizant of the career resources available to them when making career choices and also to encourage the target populations to make their career decision based on realistic information concerning themselves and the world of work.

SPECIFIC OBJECTIVES OF THE PROJECT:

1. To serve as a career guidance resource center for the population (high school dropouts and adults in Franklin County) served by the Franklin County Community Action Council, the veterans enrolled in the Veterans Early Education Program, as well as for the student population at the University of Maine at Farmington.

2. To expand the knowledge and expectations of the target population concerning career information of the 70's as it relates to their present interests, skills and experiences.

3. To identify those people in the target population who could benefit from transfer to other educational programs and/or institutions that
would give them the education or training desired.

4. To continue to increase the diversity (written, audio, and visual) of the Center's library in the area of educational and career information to cover all occupations ranging from skilled to professional.

5. To expand the use of the resources of the Center by the faculty at UNF; to focus their thinking on career development as it relates to their discipline.

PROCEDURES FOLLOWED:

We revised our reporting system; instituted a materials sign-out system; maintained a co-operating relationship with faculty and outside agencies through periodic meetings and exchange of ideas; expanded our testing program; expanded our Career Resource Library; supervised the Co-operative Education Program; trained Veteran's Early Education Counselors in the use of the Center resources; provided individual and group counseling; conducted seminars and workshops on a variety of subjects; developed policies and procedures for the Buckley Amendment; Developed a multitude of instructional materials and a booklet "Not to Decide is to Decide," prepared a synopsis of our services for inclusion in all informational type booklets on campus.

RESULTS AND ACCOMPLISHMENTS:

1. As of May 29, 1975, we saw 1505 different individuals (1245 students, 260 non-students).

2. Our group activities served 628 individuals (see appendix).

3. We received referrals from Franklin County Community Action, Friends of counseleees, parents, head residents, R.A.'s, self, academic counselors, ministers, faculty, classified employees, administration, counselors in residence, Town Manager, police, Maine Employment Service, high school counselors.

4. We had consultations with: Franklin County Community Action Council, faculty, Program of Basic Studies, SAD # 9 Internship Program, Tri-County Mental Health, Career Day Carrebec High School, with students regarding Career Education class projects, Thomas College, Baptist Ministers, Husson College, Federation for the Blind, Liberal Arts Council, Squareheads Meeting, Legislative Hearing on LD 1609, Rural Health Associates, Bureau of Vocational Rehabilitation, Veterans Association, Neighborhood Youth Corps, Jay Junior High School, Pine Tree Legal, University of Maine at Orono, Unity College, Maine Employment Service Council.

5. We had 424 contacts with faculty and administrators, and 206 contacts with outside agencies.

6. We had 131 community consultations.

7. We developed job descriptions for both the Center Director and the Career Development Educator.
8. We met weekly with all counselors on campus to coordinate counseling efforts, to plan programs for 1975-76 and for inservice training.

9. We retained the services of Dr. Martin Fleishman, Psychiatrist, as a consultant.

10. We wrote an $85,000. Federal Grant Proposal for a Career Education and Development Project.

11. We were invited to speak about Careers at one Residence Hall. 50 students attended.

12. Trained 2 PBS-VEEP Counselors in the use of the Career Library and techniques on How to Research a Career.

14. Organized, conducted, and reported on, a conference for Employers of Education Majors. 30 Superintendents/principals and an estimated 100+ students participated.

15. Participated in Career Day's at Jay Junior High School, Carrabec High School, the Admissions sponsored Career Day on campus, and Livermore Falls High School.

16. Held evening seminars for R.A.'s regarding the use of the Career Library, researching career techniques, and how interest tests can be helpful.

17. Did one radio Program with Sandra McDonald aimed at opportunities and problems the older female student encounters.

19. Guest lectured - Mr. Harrigan's Rehabilitation Class and Sandy Johnson's Early Teaching Experience Classes.

20. Assisted with information and suggestions for the Advisors' Handbook prepared by the Dean of Math and Science.

21. Assisted University of Maine at Augusta in developing a career resource library.

22. Have served as facilitators for goal setting and responsibility clarification for the experimental SAD # 9 - UMF's Teachers Intern Project.

23. Assisted Thomas College in the organization and operation of their Placement Office.

24. Spoke in favor of LD 1609 at the Legislative hearing.

25. Discussed with Dr. Dave Fearon, at his request, ways Co-operative Education could help the non-typical student.

26. Rev. Bob Gale contacted us and we participated in a program concerning problems college students face with Baptist Ministers from across the state.

27. Assisted students with resources for a Career Education presentation as part of a class requirement.
28. 87 agencies and 80 university personnel were contacted in the process of developing 25 co-operative education positions.

29. Developed a new cover and solicited letters from each program director to accompany the "Job Seekers Directory" we published last year.

30. Developed 24 posters - job clusters, steps to finding a job, job market projections to 1980, salaries for various occupations, and distributed them throughout the campus.

31. Published a Center Communicator.

32. Completed an evaluation of our Placement services by our 1973-74 graduates. Results were published in our Mid-year Placement Report.

33. Published a 1973-74 Annual Placement Report and in February a Mid-year Report.

34. Conducted a survey of school superintendents regarding number of teachers hired in 1973-74.

35. Conducted a survey of the faculty as to what services the Center should and should not offer.

36. Developed a new in-house reporting system.

37. Transparencies to assist seniors in completing credentials, writing resumes and letters of inquiry.

40. Guidelines for the organization and operation of Career Development Symposia.

41. Developed a booklet "Not to Decide is to Decide" which deals with choosing a career and the resources on this campus to assist students.

42. Held 43 seminars concerning job hunting strategies, interviewing, and writing letter of inquiry and resumes with 13 faculty involved first semester and 14 faculty participating second semester.

EVALUATION:

Due to the level of funding we were unable to hire an outside evaluator. However, as a staff our weekly meetings included an ongoing self-evaluation. As a result of this process some activities were dropped and others intensified to insure the most effective use of our time and resources. Also,
the secretary kept a list of individuals seen and indicated the dates and the counselor seen. The staff maintained their own records and reported quarterly their activities to the Director.

The staff and the director held reciprocal evaluation sessions using their job descriptions as a basis.

Externally, the faculty were surveyed as to their attitude and perception of the Center and its specific functions (see appendix). We also conducted an evaluation survey by 1973-74 graduates of our placement services including the Career Education programs for seniors (see appendix).

CONCLUSIONS:

This year can best be characterized as an "activity" year for the Center. The past two years have been devoted to building the resources and personnel to support an activity based program. The type of activities we sponsored are indicative of our developmental growth since 1972.

Our view of Career Education as a life long process has proven to be a viable approach in reaching our objectives. The counseling, resource information and testing aspects of the Center have assisted our target population to assess the limits and possibilities within themselves and their environment. We believe that as a result of this process target populations were better able to make decisions wisely.

In emphasizing a process we also emphasized the fact of change. We found most individuals regardless of age trying to make irrevocable decisions. This assumes a static world and with it comes "fear" of making the wrong decision and negation of a dynamic individual. An additional change was perhaps most evident in our students who began to investigate alternatives to teaching.

Our greatest accomplishments were in generating statistical data and reporting that data, in establishing a foundation for a Co-op program on campus, in the development of instructional materials, in conducting Career Education programs on and off campus, in conducting activities and in coordination of counseling services on campus.

RECOMMENDATIONS:

1. That projects of this scope have a staff of three full-time individuals. This would free one to develop more rapidly the community, faculty, and student contacts necessary for success.

2. That such projects have two full-time secretaries.

3. Articulate early through written and personal contacts the Center services to the target population.

4. Maintain contact with target population, community agencies, and faculty through frequent communications (phone, newsletters, reports).

5. Develop early career search information packets for use with non-student populations.
6. Coordinate existing resources on the campus and in the community to develop a broad base of information and referral resources.

7. An Advisory Board is one means to obtain input from the varying populations you serve. However, they cannot have decision making power for they cannot be held accountable. They become a recommending body and the training necessary before they become useful should be done prior to asking them to recommend policies.

8. The budget for this project has been far too small. No project of this scope should be undertaken without monies for two full-time staff and preferably three, and at least a secretary and a half.

9. Costs of materials and supplies to begin such a project should be substantial to allow for the speediest development of a resource library.
BODY OF THE REPORT

PROBLEM AREA

The project directed itself toward the following areas as listed in the original proposal.

1. Lack of access to career information and counseling on the Farmington campus and in Franklin County. (Proposal pg. 5,6)

2. Low aspiration level of our target population. (Original Proposal pg. 4,5)

3. The tight job market caused students to doubt the value of an education and themselves. (Original Proposal pg. 5)

4. Inmature career patterns of our student population. (Original Proposal pg. 5)

5. Dissatisfaction of present academic advising by both students and faculty. (Original Proposal pg. 5)

RELATED STUDIES, EXPERIMENTS AND LITERATURE

A survey by the Center of available career information on campus and in Franklin County substantiated the need for career education resources. Most information available was fragmentary and impossible to survey unless a career decision had already been made. That this need is not peculiar to our geographic location is pointed out by Robert Darcy and Phillip Powell in their book Manpower and Economic Education. Their book grew out of a curriculum development project co-sponsored by the U.S. Office of Education and after 5 years of experience with the materials.

Ann Streeter in her article "Counseling Today and Tomorrow." states the
"dedicated counselor has an obligation to help students determine the most suitable career direction according to personal characteristics.....to provide information that will give the student an awareness of the realistic conditions of the working world he will be entering -- to expose the student to the different career choices available -- and to present and discuss schooling alternatives which will prepare him for his chosen career." (Emphasis, 1974)

Dr. Spradley, in his article "Career Education a Cultural Prospective." states that "the choice factor has increased so rapidly in our society that it seems impossible to deal with, and as a result education was designed to impart fundamental skills for adult roles and to prepare children for more education. Thus, we have contributed to the development of a society lacking experience in choice making." (Essays on Career Education, 1973)

In our case it is expressed in low aspiration levels, immature career patterns and dissatisfaction with the academic advising system.
Larry Allen a recent high school graduate helps to verify that the
problem areas we have indicated regarding students is not peculiar to this
geographic location. He states, "Many students leave high school without
any concept of what the world of work is all about. Even college bound
students rarely have any concrete ideas of how their proposed major areas of
study will lead to employment. In fact, many of them are college seniors be-
fore they even begin to consider the need to relate their studies to present
or future occupational opportunities." (Essays on Career Education, 1973)

A study by Michael Osborne published in December 1971 in the Journal of
Educational Research points out that students aspire to and expect to achieve
educational goals in the direction of the like-sex parent. If this is true
for our population, and most UMF students are first generation college students,
we can support and provide the encouragement to aspire and achieve to the level
of their capabilities, not to their parents.

D.G. Anderson and A.A. Binnie points out in their research project, "Effects
of a Group Vocational Guidance Class with Community College Students", that as-
piration levels can be raised and more realistic assessment of aptitude can be
achieved through courses and/or seminars in 'Career and Educational Planning.'" (Vocational Guidance Quarterly, December, 1971). Our Career Search Groups ac-
complished what the above class did.

In an article "The World of Work: 1980" Burt Nanus indicated to manpower
experts that concern for the whole person will be the emphasis not just
obtaining employment for an individual. This is the emphasis we have given in
our work and most especially with seniors and non-students. (Impact, Spring, 1972)

Further reinforcement that the problem areas we have been concerned with are not
unique is provided in a study "Educational Career Future Blue Chips or not?"
conducted by Impact and Francis E. Burtnette. (Impact, Spring, 1972)

Their findings were as follows:

1. Students appear extremely flexible about their future career plans,
because of a concern over the economic uncertainty of the times and
because of a feeling that in times of social change they must keep
their options open.

2. When students make specific career preferences, they seem to lean more
heavily toward people-oriented or service jobs.

3. Many students hold a set of pre-conceived images about which of the
many careers in society have more prestige and value, and thus are
supposedly "better" to enter.

4. Although they have a distinct impression about certain fields and the
specific occupations within these fields, for many young people these
images are based on myth and not on reliable or factual information.
5. Students place great stock in personal communication, expressing a desire to receive information about careers on personal basis, through human interaction.

6. The young see education as a mechanism for bringing about a better way of life. However, this is ideal rather than something which they see as a reality.

7. Students generally speak favorably of their instructor. When they criticize them, it is for being out of step with the times or for not having the time to take a personal interest in them. The criticism of counselors was similar. Many students feel that counselors do not understand pupils needs, offer unrealistic advice or at the high school level are primarily concerned with getting as many people into college as possible.

Dr. Fredrickson, Ms. Rowley and Ms. McKay in their article "Multipotential - a Concept for Career Decision Making" state that "A career counseling process that supports the notion of multipotentiality will be better able to help the client learn to expect change in his career and anticipate the need to develop other abilities. In this way, the individual will be able to control his own career plans and direction." (Impact, 1975).

This has been our approach and was reflected in our original proposal under Relation of Goals to Project, page 4. The above article further states, "A concept of the multipotentiality of the individual would help the individual to anticipate changes and recognize them not as failures to measure up to the requirements of a previous choice but an awareness of their own plasticity and ability to adapt to a changing world of work" which confirms our experience with individuals trained as teachers, who when unable to obtain a teaching position see themselves as failures. (Impact, 1975)

In the article "A Career Management Model for Counselor Involvement" Lorraine S. Hansen and W.W. Tennyson most succinctly state the problems our project has directed its' efforts toward I quote, "Among these problems are the changing meanings of work-thoughtful challenges of the traditional work ethic, midlife career changes, and concerted efforts to achieve balance among multiple life roles. A tight labor market creates limits on occupational opportunities, suggesting the need for counseling with regard to alternative occupations. There is a walling off of the employment-bound from the college-bound and of the school from the community in ways that limit the development of reality-based curricular and counseling experiences. An information deficit is created because of an open, fast-changing society in which it is difficult for one to know the range of options available or the means to achieve them. Finally, there are the special needs of bypassed populations, especially women, the handicapped, and minorities, who have been outside of the opportunity structure, who lack the sense of agency or positive self-concept that will allow their career to develop, and who need to know the many life style options available to them." (Personnel and Guidance Journal, May, 1975)

GOALS AND OBJECTIVES OF THE PROJECT

The goals of this Outreach Project are to inform, and to motivate the following groups in the area of career development:

1. Students at the University of Maine at Farmington

2. Faculty and Staff at the University of Maine at Farmington
3. Individuals (high school dropout, unemployed, low career expectations of young adults, veterans, etc.) that are referred by the staff of the Community Action Council of Franklin County, Veterans Administration, Bureau of Veteran's Affair, Neighborhood Youth Corp, parents and high school counselors.

The Career Development Outreach project is designed to actively involve the staff and facilities of the Center for Educational and Career Development in a systematic program of career education, dissemination of occupational information and career guidance. The project will continue to make the above-mentioned target population cognizant of the career resources available to them when making career choices and also to encourage the target population to make their career-decisions based on realistic information concerning themselves and the world of work.

The following objectives were established to meet the above goals.

1. To serve as career guidance resource center for the population (high school dropouts and adults in Franklin County) served by the Franklin County Community Action Council, the veterans enrolled in the Veterans Early Education Program, as well as for the student population at the University of Maine at Farmington.

2. To expand the knowledge and expectations of the target population concerning information of the 70's as it relates to their present interests, skills and experiences.

3. To identify those people in the target population who could benefit from transfer to other educational programs and/or institutions that would give them the education or training desired.

4. To continue to increase the diversity (written, audio and visual) of the Center's library in the area of educational and career information to cover all occupations ranging from skilled to professional.

5. To expand the use of the resources of the center by the faculty at UMF; to focus their thinking on career development as it relates to their discipline.

PROJECT DESCRIPTION

Project Description: "To utilize the staff and facilities of the Center for Educational and Career Development in an outreach program to disseminate career information and to motivate UMF students and referred citizens from Franklin County to consider realistic and meaningful information in relation to developing individual career patterns.

The staff consists of one full-time Director, one full-time Career Development Educator, one half-time Co-operative Education Coordinator, one full-time secretary.

We served a student population of approximately 1500. Due to the Basic Studies and Veterans Early Education Programs we do not have a homogeneous population. Also, we have a large portion of married students which further adds to the diversity
of our student population. There also exists a very unbalanced male-female ratio 1-4 respectively.

The majority of our students are preparing for a career in teaching which partially contributes to the male-female ratio.

We revised our reporting system which allowed us to better identify problem areas and areas where our efforts could now be reduced. A materials sign out system was instituted and using this as a basis we were able to more efficiently order duplicate materials.

A co-operating relationship through meetings and periodic exchanging of information was maintained with Franklin County Community Action, Tri-County Mental Health, Veterans Early Education Program, Basic Studies Program and the Farmington ministers.

We trained the Veterans Early Education Program Counselors in how to use the Center resources and in techniques of "How to Research a Career" a pamphlet we developed. This program used the Center's resources and space to hold their Career Education Classes.

Seminars, workshops and meetings were conducted to discuss, graduate school, testing, Why are you here, credentialing, interviewing, job hunting strategies, co-operative education, placement, faculty advising, mental health concerns, the liberal arts student, the returning student and CED, Franco American student.

We used weekly Center staff meetings to keep each other up-to-date, to discuss common problems, to plan, to evaluate, and to do inservice training.

For the dissemination of information we used annual and mid-year reports to faculty and administration, surveys, a newsletter, posters throughout the campus, bulletin boards in the Student Union and Administration Building, the bi-weekly bulletin, the student newspaper, the radio station and information sessions with the residence hall staff.

In summary our procedures included:

Personal contact, instructional material, resource library, testing, dissemination of information, seminars and workshops, individual and group counseling.

RESULTS AND ACCOMPLISHMENTS

The functions (individual counseling, testing, placement, community service, group counseling, and resource library) of the Center have been tested over the year and have been found to be viable means by which to accomplish our goals.

To present an over-all view of the Center's accomplishments, I will report on each function.
INDIVIDUAL COUNSELING

Individuals seen:

<table>
<thead>
<tr>
<th>Students</th>
<th>1245</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-students</td>
<td>260</td>
</tr>
<tr>
<td>Total</td>
<td>1505</td>
</tr>
</tbody>
</table>

Individuals were seen basically about career planning and/or personal social adjustment. This count indicates 1505 different individuals and does not include the walk-ins nor the group work.

We received referrals from: friends of the counselor, parents, ministers, head residents, self, faculty, high school counselors, academic tutors, Franklin County Action Council Outreach Workers, Classified Employees, administration, Maine Employment Security, Rural Health Associates, Town Manager.

We had consultations with

Franklin County Community Action Council
Faculty
Program Basic Studies
SAD # 9 Internship Program
Tri-County Mental Health
Career Day Carrabec High School
With students regarding Career Education Class projects
Thomas College
Baptist Minister
Husson College
Federation for the Blind
Liberal Arts Council
Squareheads Meeting
Legislative Hearing on LD 1609
Rural Health Associates
Bureau of Vocational Rehabilitation
Veteran's Association
Neighborhood Youth Corps
Jay Junior High School
Pine Tree Legal
University of Maine at Orono
Unity College
Maine Employment Service Council

GROUP COUNSELING

This has taken the form of seminars, workshops and search groups. During the year we have conducted the following group counseling activities which served a total of 901 individuals.

Employer interviews with seniors                                            74

Total                                                                     901

Our consulting activities have increased tremendously this year which is a continuation of a trend that began second semester 1974.

TESTING

This area of the Center has continued to grow. We offer achievement, aptitude, interest and personality testing and have administered and interpreted 70 tests (The Strong Vocational Interest Inventory, the Kuder DD, the Minnesota Vocational Interest Inventory, and the Hollander Self Search.)

This past year we were a test center for the College Level Examination Program and did monthly testing.

Testing has been done at an individuals request.

The Psychology Department as part of a course gives the Strong Vocational Interest Test. The results are forwarded to the Center and should a student want more than a general interpretation they are referred to the Center.

RESOURCE LIBRARY

From September to May we have been engaged in acquiring a breadth as well as a depth of career information. We now have the standard, educational and occupational references, undergraduate and graduate catalogues, job opportunities files for business, industry, education, public and social services, pamphlets geared to challenge women to consider occupations other than traditional fields, study guides for the GRS's, Miller Analogies and Federal Civil Service Tests, 103 career tapes, study skill film strips and audio tapes.

PLACEMENT

The service available to seniors expanded to include the whole realm of career information. The best way to explain the growth of the area is to list and describe some of the activities that have taken place this past year.
The credential packets were again evaluated and re-written.

311 seniors have registered and filled out credential papers.

116 alumni re-activated their files and are presently on our mailing list.

An attempt was made by the staff to talk to each senior individually or in small groups to explain the services of the Center and their credential packet. Each of the elementary student teaching centers were visited as were the secondary methods classes on campus.

11 interviewers recruited on campus for a total of 74 interviews arranged. This is a substantial reduction from last year and reflective of the present supply and demand, and budgetary conditions.

Workshops on interviewing skills were held with each student attending having the opportunity to have at least one practice interview.

Workshops on "How to Find a Job" were held. Forty students attended.

Transportation was provided to take a group of seniors to Portland to attend the Maine Native Sons and Daughters Career Days.

Each senior registered with the Center received a copy of the ASCUS Journal and the Graduate Magazine.

Students received the Graduate Record Examination fee waivers. A special attempt was made to talk with seniors about graduate school and make them aware of the Center's collection of graduate catalogues.

A conference with school superintendents, principals, faculty members, and students was held to discuss "Job requirements and college preparatory programs."

The areas we made the most significant headway in were communications and the development of instructional material. (see appendix) For seniors we have established the expectation that they can obtain information from our office. The idea of a credential packet - what it is and how it's used is becoming common knowledge.

CO-OPERATIVE EDUCATION:

A Co-operative Education Program funded through a Federal Grant, became a new service of the Center last year. This year we continued exploring with faculty, business, industry, and various agencies the possibility of developing Co-operative Education options for this campus.

To date, various departments have expressed an interest in offering a Co-operative Education experience as an option for their students. The Home Economics department has instituted a Public Service Option to student teaching. Students were interviewed, their applications processed, and contact made with interested agencies resulting in 25 students having a co-operative experience. To accomplish these results 87 agencies and 80 university personnel were contacted.
On the state level a computerized job bank for the state of Maine was completed. Also, state-wide standardization forms and procedures were implemented to avoid confusion and unnecessary competition between campuses.

OTHER ACTIVITIES:

1. Arranged a seminar on "Teaching in Australia."

2. Worked with the Public Information Office on press releases regarding placement oriented news features.

3. Compiled placement comparison figures for the University of Maine system.

4. Conducted a cost analysis of the Placement Office operation.

5. A two year progress report on Co-operative Education is being compiled.

7. At President Olsen’s invitation met with the academic Deans to discuss Placement.

8. Revised and up-dated all instructional materials for 1975-76.

9. Held a seminar on teacher certification with the State Certification Officer as the speaker.

EVALUATION:

This year can best be characterized as an "activity" year for the Center. The past two years have been devoted to building the resources and personnel to support an activity based program. The type of activities we sponsored are indicative of our developmental growth since 1972.

The activities carried out would have been impossible without cooperation among the staff in each other's area of immediate responsibility. Having other than the director working during the summer made possible the planning of program activities for the fall.

Areas for which we have received the greatest positive faculty feedback were the development of instructional materials, the senior seminars, the Annual and Mid-year Placement Reports, and our willingness and ability to assist faculty and their students with career related questions and problems.

Based on preliminary review of returned faculty questionnaires which asked what the Center should and should not be doing, our activities were ranked in order as follows: (1) Placement Activities 90%; (2) Career Resource Library 88%; (3) Individual Counseling 85%; (4) Group Career Counseling 83%; (5) Assist students transferring to another institution 80%; (6) Guest lecturing on Career Education 76%; (7) Testing - aptitude, personality, interest 78%; (8) Counseling students who
are dropping out 73%; (9) Serve as a referral resource for community agencies 73%;
(10) Test and Counsel individuals from the community 56%; (11) Co-operative
Education 44%.

Many agreed 10 and 11 should be done as time permits or should be done
by the Public Service Division.

Our greatest accomplishments were in gathering statistical data and re-
porting that data, in establishing a foundation for a Co-operative Education
Program on campus, in the development of instructional materials, in conducting
Career Education programs on and off campus, in consulting activities and in
coordination of counseling services on campus.

CONCLUSION: A Career Development Outreach Program can serve as a career
guidance resource center for both the community in which it
is located and the university students.

IMPLICATIONS: Based on our experiences of the past three years differing age
groups share the desire to improve the quality of their life
whether it be economically, educationally or personally. As
indicated in our project and similar projects across the county
services to assist individuals in bringing their desires to
reality and/or assessing them realistically are very limited or
so diversified that motivation is lost. Perhaps the concept of
career centers serving various geographic areas in Maine is a
feasible beginning in our search to improve the quality of life
in Maine.

RECOMMENDATION: Continue to develop our services to coordinate our efforts with
those existing agencies. Continue to assist other colleges and
universities to establish similar services and resources.

CONCLUSION: We have expanded the knowledge and expectations of our target
population. In 1972-73 only 422 students and 96 non-students
sought our services; this year 1,245 students and 260 non-students
used our services. Usage, I believe indicates we are being
perceived as a resource for gaining knowledge about and for
investigating personal potentialities.

IMPLICATIONS: Based on our experiences this past year differing age groups
share the desire to improve the quality of their life whether
it be economically, educationally, or personally. As indicated
in our project and similar projects across the county, services
to assist individuals in bringing their desires to reality and/or
in assessing them realistically are very limited or so diversified
that motivation is lost. I believe the concept of career centers
serving various geographic areas in Maine is a feasible beginning as we
seek to assist others in their efforts to improve the quality of
their lives.

RECOMMENDATIONS: Continue to develop our services and to coordinate our efforts
with those of existing agencies.

CONCLUSION: We have identified people in our target population who could benefit
from transfer to other educational programs and/or institutions that
would give them the education or training desired.

IMPLICATIONS: If the concept of transfer is accepted as desirable then policy
and attitudinal changes will be required before it can become fact and a real option devoid of its present academic and financial burden.

RECOMMENDATION: When assisting individuals to transfer from one educational system to another be prepared to challenge some existing policies and attitudes. Each institution should have a written transfer policy so a student may transfer with awareness not ignorance.

CONCLUSION: We have expanded our Career Library to cover occupations ranging from skilled to professional, to cover graduate study, study guides for various tests, career tapes, financial aid information, industry and business information, 2 year and 4 year undergraduate and graduate catalogues, and career needs of the future.

RECOMMENDATION: Continue to expand the library resources especially two-year programs. Also, expand the forms of information-tapes, film strips, etc.

CONCLUSION: We have expanded the use of the resources of the Center by the faculty, and have begun to focus their thinking on career development as it relates to their discipline. Our career symposium program has received initial acceptance in some areas.

IMPLICATION: The above is based on the assumption that faculty will accept career development as being in their realm of responsibility. Our experience indicates that attitudes and clarification of what we mean by career development is necessary before progress can be made in this area. As more faculty become aware that they are involved in career development then a resource center becomes a service they welcome and use.

RECOMMENDATION: Communicate frequently and provide them with some of the information available in their discipline. Involve them actively in the Center as often as possible as resource people and to recommend additional materials and/or services for the Center.

CONCLUSION: We have expanded our means and frequency of communication with our target populations, co-operating agencies, and faculty.

IMPLICATION: Use of the Center and the co-operation of other agencies and individuals is dependent upon informed persons. Communicating with the various groups is the most effective way to gain support as well as understanding of the concept of career education.

RECOMMENDATION: Systematic communications as well as sporadic communications should be continued for the life of similar projects.

CONCLUSION: A team approach staff is most effective in developing a Career Education project and most effectively uses the talents of all concerned.

IMPLICATION: With the team approach career development begins with the individual, the student or non-student first sees at the Center, and thus sets an expectation that assistance is available. Career Development becomes a set of attitudes as well as a set of goals.
RECOMMENDATIONS: When developing a Career Education project, begin with the development of your staff. Achievement of an interdependency strengthens the team approach and provides an atmosphere where creativity and/or criticism are of equal value.

EVALUATION CHECK LIST

Conference with Employers of Education Majors
University of Maine at Farmington
April 1, 1975

Check one:

School Administrator
Student
Faculty - UMF
Other - Identify

On a scale of 5 to 1 (5 is tops) please rate the following:

1. Rate (and Identify) the discussion group in which you participated.
   Group # ____________________________  Comment

2. Was the Conference topic pertinent to today's educational scene?
   Comment

3. Overall Conference organization.
   Comment

4. Food, Hospitality, Parking, Facilities, Rooms, Time allotted to activities
   Comment

5. Did panel members stick to the Conference topic?
   Comment

6. Did panel members adequately represent their counterparts in a school administrative support team?
   Comment

7. Significance of keynote speaker's presentation.
   Comment

8. Has the Conference experience provided you with new insights in dealing with entry-level 
   education?
   Comment

9. To what extent do you believe the college program will be effected by the Conference dialogue(s) in the future?
   Comment

10. How do you rate the sincerity of UMF's wanting to hear from people from the field "telling it like it is"?
    Comment

Comment on: "How the Conference might have been improved."

Further comment on whatever you wish. (use reverse side, too.)
SHOULD I GO TO GRAD SCHOOL?

1.) DO I HAVE ENOUGH INFORMATION TO MAKE A CLEAR DECISION?

2.) DO I REALLY HAVE THE ABILITY TO EARN AN ADVANCED DEGREE?

3.) DO I HAVE SCHOLARLY ASPIRATIONS OR DO I FEEL UNCOMFORTABLE AS A STUDENT?

4.) WHAT OTHER FACTORS WILL SHAPE MY FATE AS A GRADUATE STUDENT?

5.) DO I KNOW WHAT KIND OF A CAREER I WANT AND DO I KNOW WHAT IT TAKES TO GET THERE?

6.) DO I HAVE ALTERNATIVES IN CASE I DON'T MAKE IT?

7.) DO I REALLY NEED AN ADVANCED DEGREE TO REACH MY GOALS?

IF THE ANSWER TO ANY OF THESE QUESTIONS IS 'NO', THEN DON'T SUBMIT TO THE DISCIPLINE AND DEMANDS OF GRADUATE STUDY.
