The document describes an exemplary project from January 1, 1973 to December 31, 1974 in which 21 postsecondary cook/chef students were afforded the opportunity to spend six months in a training experience in Switzerland. The project, coordinated through the Swiss Hotel Association, was intended to provide a basis for sharing information with the food industry, especially in Minnesota. All participants reported that the program contributed to their growth. Language and cultural adjustment were seen as the biggest handicaps which were encountered most frequently at the beginning of the experience. Appended materials, making up the bulk of the document, include: list of participants, forms, correspondence, travel tips, metrics in the kitchen, and a program evaluation form. (LJ)
INTERNATIONAL VOCATIONAL STUDIES IN ADVANCED CULINARY ARTS

Exemplary Project
In Vocational Education

Conducted Using Grant Awarded by
Division of Vocational-Technical Education
Minnesota Department of Education

REPORT SUMMARY

Time Period

The time period covered by this project was January 1, 1973 to December 31, 1974.

Goals & Objectives

The overall objective was to design and implement an International Studies Program which will provide post secondary cook/chef students an opportunity to further their education and occupational skills through a six months foreign training experience in Switzerland.

Specific Objectives:

1. To provide a minimum of twenty (20) student who have completed one year of vocational training in Cook/Chef, Restaurant & Hotel Cookery, Food Service Management, Commercial Cooking, and Food Product Merchandising Programs an opportunity to acquire an international training experience.

2. To recruit, appoint and utilize an industrial advisory committee representing the Culinary Arts industry.

3. To provide ("seed") the Culinary Arts profession, particularly Minnesota, with individuals who have had first-hand foreign training in culinary techniques, product information, and food preparation, expecting they will share this information with fellow workers.

4. To evaluate the effectiveness of the program (including the recommendations of the advisory committee) and make a final report to the Suburban Hennepin County Area Vocational-Technical Centers and the Minnesota State Department of Education - Vocational Division.

Procedures Followed

Mr. Eugene P. Jereczek was assigned as director for the program for the duration of this project. He had primary responsibility for the detailed conduct of the project utilizing other staff members or individuals who have expertise relating to specific program objectives. Mr. Hans Gilgen and Mr. Klaus Mitterhauser were selected as the project coordinators.

The project coordinators assisted in the project's development plan and its execution. They were responsible for placing the participants at their Swiss locations. They also established a person-to-person contact with the Swiss employers and evaluated the Swiss establishments after an on-site visit.
REPORT SUMMARY con't.

The Director had six major responsibilities:

1. To act as program contact for student applicants and as a general information source.

2. To design the appropriate procedures for the collection of data regarding applicants for the studies pertaining to operation of the project and for the program evaluation.

3. To act as liaison between Suburban Hennepin County Area Vocational-Technical Schools and Program Advisory Committee (see Appendix #2 - Advanced Culinary Arts Advisory Committee).

4. To conduct and submit a final evaluation of the project.

5. To coordinate the program with the Swiss Hotel Association.

6. To make all necessary travel arrangements for the program.

Results & Accomplishments

The twenty-one program participants were located in eighteen different establishments throughout Switzerland. The experiences provided the participants varied greatly according to a variety of factors such as the size and type of the establishment, the training available within the establishment, the area or region of Switzerland, the acceptance by the establishment of the participant, and the acceptance of the establishment by the participants.

Seventeen of the twenty-one participants completed their training contract. Two individuals returned early for personal problems occurring within the U.S. and two individuals returned early after experiencing dissatisfaction at the Swiss establishment.

All participants including those who returned early emphasized that the program contributed to their growth, should be operated again and contributed suggestions for its development.

All participants indicated learning knowledge and skills that could be useful in the American foods industry.

All accepted program participants received a training placement and work visas through cooperation with the Swiss Hotel Association.

All participants worked a split work shift and most rotated through more than one position in the kitchen.

Language and cultural adjustment were the biggest handicaps early in the program and decreased with time.

An eight week optional French language course was made available to the participants prior to departure. French was selected as possibly the most universal kitchen language they would encounter.
A two-day program orientation was held prior to departure to assist the participants with expectation about language, culture, history and working conditions. It was viewed as successful by the participants and the advisory committee.

Evaluation

All of the evaluations were reviewed and summarized by the Project Director and the Project Coordinators. Based on those summaries, recommendations were presented to the industrial advisory committee for their review and final recommendations.

Conclusions & Recommendations

The pilot program can be termed successful having met each of the originally stated objectives. A summary of each part of the total evaluation indicates satisfaction with the basic program design and the resulting outcomes. Suggestions for improving future programs were made in all parts of the evaluation and are addressed in the body of the report.

All participants secured employment upon their return. Although it is too early to summarize the total effect of the program on the student's employability or its effect on their advancement, the present data indicates that the students desiring a change of employment had a choice of establishments, and were offered additional pay as a result of their foreign experience. The one-year follow-up study will more accurately identify the program's affect on the individuals earning power.
Project Problem and Need

The 20,000 students enrolled in the Minnesota 33 Area Vocational-Technical Institutes are not and never have had the opportunity to further their education and increase their skills through foreign training. Their post-high school peers in Junior Colleges, State Colleges, Private Colleges, and Universities have had the advantage of excellent foreign-summer abroad programs for many years and with apparent success.

This inequity of opportunity stimulated the Program Planning and Development Section of the Minnesota Division of Vocational-Technical Education to investigate the availability of foreign-based skill training programs. They found that all current foreign study programs were tied to four-year colleges and universities. The programs were the traditional liberal arts oriented programs related to study of art, music, drama, architecture, political science, religion, philosophy, etc. These liberal arts programs were found to be inadequate for the training objectives of Minnesota AVTI students.

The concept of providing equal opportunities for post secondary vocational students to broaden their education and training through foreign training experiences could well stand on its own merits. However, the basic philosophy of vocational education, either preparatory or extension, has as its justification the successful employment of the individual. Therefore, to be consistent, any vocational training program must retain this dimension regardless of its training site. Consequently, the Program Planning Section, after deliberation, selected Advanced Culinary Arts as an area of post-high vocational training worthy of investigation since it has a broad base of training programs, including both public and private in Minnesota as well as being national and international in occupational memberships. Present curriculum offerings in the training of Advanced Culinary Arts in both private and public vocational schools do not include first-hand experience in the foreign aspects of the profession. Yet, the foreign influence upon the profession has always been profound.

Project Description

With these above factors in mind the Program Planning Section of the Minnesota Division of Vocational Education identified a definite employment demand for persons with foreign training and/or experience. A program advisory committee of state and national leaders from business, private and public schools was organized. The committee reviewed and analyzed the need, made contacts with their international colleagues, and recommended that a short-term foreign training program be developed. This program would allow the opportunity for the vocational students to acquire needed technical and business skills and knowledges valuable in seeking vocational initial employment or increasing current and future earning power.

Suburban Hennepin County Area Vocational-Technical Centers was designated by the Minnesota Division of Vocational Education to serve as host school for administering a six months foreign training program. The program was offered in Spring, 1974. This program was submitted as proposal for a block grant as an Exemplary (Part D) Program from the State Department of Education.
Program Objectives

General Objective:

The overall objective is to design and implement an International Studies Program which will provide post secondary cook/chef students an opportunity to further their education and occupational skills through a six months foreign training experience in Switzerland.

Specific Objectives:

1. To provide a minimum of twenty (20) students who have completed one year of vocational training in Cook/Chef, Restaurant & Hotel Cookery, Food Service Management, Commercial Cooking, and Food Product Merchandising Program an opportunity to acquire an international training experience which will:
   a. Provide enrichment activities in the areas of food preparation, product knowledge, display techniques, and culinary trends.
   b. Increase the individual's current or future earning power.
   c. Contribute to the individual's human relations skills and/or attitudes relating to culinary arts as an occupation and profession.
   d. Provide the individual's familiarity with foreign travel and food preparation which will enhance their functioning as cook/chefs in their future employment.
   e. Provide an understanding of the educational system for culinary training in Europe through planned tours and discussions within technical schools and businesses.
   f. Increase the individual's awareness of international culinary arts and its impact on the world community.
   g. Exchange culinary skills and ideas between American Cuisine and Swiss cuisine.

2. To recruit, appoint and utilize an industrial advisory committee representing the Culinary Arts industry (See Attachment A). This Committee will:
   a. Recommend the appropriate curriculum content and program activities.
   b. Assist in making European training contacts.
   c. Assist in publicity for student recruitment.
   d. Assist in selecting the final twenty (20) participants.
   e. Preview the travel and program arrangements.
   f. Assess the effectiveness of the program after completion.
3. To provide ("seed") the Culinary Arts profession, particularly Minnesota, with individuals who have had first-hand foreign training in culinary techniques, product information, and food preparation, expecting they will share this information with fellow workers.

4. To evaluate the effectiveness of the program (including the recommendations of the advisory committee) and make a final report to the Suburban Hennepin County Area Vocational-Technical Centers and the Minnesota State Department of Education - Vocational Division.

Project Design and Procedure

Mr. Eugene P. Jereczek was assigned as director for the program for the duration of this project. He had primary responsibility for the detailed conduct of the project utilizing other staff members or individuals who have expertise relating to specific program objectives. Mrs. Nancy Olson was selected as the Instructor/Coordinator.

The Director had six major responsibilities:

1. To act as program contact for student applicants and as a general information source.

2. To design the appropriate procedures for the collection of data regarding applicants for the studies pertaining to operation of the project and for the program evaluation.

3. To act as liaison between Suburban Hennepin County Area Vocational-Technical Schools and Program Advisory Committee.

4. To conduct and submit a final evaluation of the project.

5. To coordinate the program with the Swiss Hotel Association.

6. To make all necessary travel arrangements for the program.

Schedule of Specific Tasks

September 1, 1973 Designate Project Director, Instructor/Coordinator

September 1, 1973 Assign necessary clerical assistance.

September 15, 1973 Design data collection and information dissemination system for applicants.

September 15, 1973 Appoint and assemble program advisory committee to discuss need, functions and recommendations for program.

October 24, 1973 Establish curriculum content, foreign training sites, and travel arrangements.

October 1973 Arrange with Swiss Hotel Association the training program and appropriate training sites.
November 1, 1973  Disseminate program information for student recruitment through educational institutions and industrial associations.

November 15, 1973  Begin processing student applications.

December 10, 1973  Establish Student Selection Committee to review applicants.

January 7, 1974  Student applicants reviewed and selection ranked by committee.

January 10, 1974  Notify the student accepted by the committee of necessary action.

March 1, 1974  Accept final travel fare installment from students to complete travel arrangements with agency.

March 31, 1974  Begin mini-language course in French.

April 1, 1974  Design program evaluation methods and instruments for final project report.

April 15, 1974  Recommend to Advisory Committee the final arrangements and evaluation methods for their review.

April 15, 1974  Designate instructor/coordinators for program.

April 27 & April 28, 1974  Pre-tour orientation by Project Director, Coordinators, and Industry Representatives.

May 19, 1974  Departure of group to Europe.

May 20, 1974  Location of students by Swiss Hotel Association; assistance by Program Coordinators.

June 1, 1974  Review program arrangements with Swiss Hotel Association for improvement suggestions.

June 21, 1974  Collect instructor's summary evaluation.

November 21, 1974  Review of summary evaluation by participants with advisory committee.

December 15, 1974  Collect final summary reports from participants.

December 27, 1974  Receive Swiss Hotel Association coordinator's reports.

January 15, 1975  Compile final summary reports.

January 17, 1975  Write final evaluation reports.

February 28, 1975  Submit final evaluation to District #287 and Minnesota State Department of Education.
Participant Information

A considerable amount of essential, program related literature was distributed to applicants prior to the departure day. Copies of most of these documents described below are found in the appendix.

1. Vocational Application Blank - contained such items as personal data and history, employment background, and education. Required a $10 registration and processing fee.

2. Personal Reference Forms - two forms were required for each candidate attesting to the applicant's maturity, attitude, ability and personality.

3. Accepted Participants Letter - acknowledging the candidates selection for the program and contained various instructions.

4. Swiss Hotel Applicational Form - each accepted individual completed.

5. Swiss Hotel Association Practical Course Description - Each participant received the description which described the requirement and options available.

6. Swiss Hotel Association Instruction Sheet - describes general working agreement and conditions of employment.

7. Certificate of Acceptance - form for accepted candidate to acknowledge his acceptance of the program.

8. Travel Tips - general suggestions about packing, travel, insurance, money, etc.

11. Orientation Schedule for April 27 and 28 - schedule of events given to all individuals involved.

12. Orientation Evaluation - submitted by all program participants after completing the events.

13. Student Evaluation Requirements -- description of the evaluations required for each participant to complete the program.

15. Customs Regulations - description to inform.

16. Travel Roster - participants list and location in Switzerland.
Evaluation

Every attempt was made to get evaluation input for all parts of the program as well as from all individuals or organizations involved with the program. The following list represents the sources used for the total project evaluation:

1. Orientation evaluation by participants and instructors.

2. Student Participant's evaluations:
   a. Four program evaluations for June, July, August and September.
   b. A final summary evaluation due in October.
   c. A pictorial (10 pictures or slides) and antidotal summary report with five (5) illustrating the working situation, three (3) illustrating the customs and native people and two (2) illustrating the training highlights.
   d. A meeting of the advisory committee and the participants after returning to share their experience and recommend improvements.

3. American coordinator's report on each Swiss Establishment.

4. Swiss Hotel Coordinator's report on establishment and the participant.

5. Swiss Hotel Association's recommendations for future programs.

Conclusions, Recommendations and Implications

The following are results of reviewing the evaluation sources:

- The program met its stated objectives with these considerations:
  Reference 1-e (page 5), Planned group tours of educational institutions were not possible, however our participants worked with and had discussions with apprentices about their training. Reference 1-g (page 5), The exchange of American culinary skills was extremely limited while in Switzerland, however, an exchange of Swiss skills is taking place with fellow chefs now that the participants have returned home.

- The program should be continued to be offered.

- The program was termed successful by the participants and the advisory committee.

- Clarify travel arrangements regarding an early emergency return of student.

- Clarify previous professional training of the participants to the Swiss employer for better working relationships and wages.

- Accept candidates for the next program at least six months prior to departure to allow adequate time for obtaining contracts and visas.
- Have Swiss Hotel explain the intent of our program in more detail to Swiss employers so the training aspect is understood and station rotation possible.

- Have all work contracts begin and end on the same date.

- Clarify role of Swiss Hotel Association to students.

- Change role of the two American Coordinators from both being involved in initial placement to one with group and one mid-way in program.

- Communicate with respective Swiss Hotels about the program and the accepted student prior to student arrival.

- Indicate to the Swiss Hotel Association a preference of the Hotels previously used and determined satisfactory.

- Change the language from French option to German requirement.

- Continue the program orientation format with additional emphasis on personal adjustments and working conditions.

- Maintain the established evaluation process and add on evaluation of the participant by his first line Swiss supervisor at the end of the experience.

- Encourage the participants to select a group leader who will assist student to student communications while in Switzerland.

- Increase dissemination of program information to prospective students.

- Successful completion of the program is greater for the unmarried person.

- Continue the criteria of vocational training and foods work experience which is adequate and necessary for Swiss employment.

- Continue the emphasis on cultural shock as it is the biggest early adjustment for the participant.

- Maintain the support of the American Foods industry in order to continue the success of the program.

- Assess the employability of the students in a year follow-up study.
APPENDIX
PARTICIPATION IN SWISS CONNECTION

Steven J. Baker (21)
4925 Beard Avenue North
Minneapolis, Mn. 55429
Phone: (Home) 535-5548; (Work) 854-7777
Attended Robbinsdale High School and Suburban Hennepin County Area Vocational-Technical Centers. Employed at Hotel Rheinfelderhof, Basel, Switzerland.

Mohamed A. Chalbi (21)
1400 Spruce Place, Apt. #8
Minneapolis, Mn. 55403
Phone: (Home) 332-1012
Attended Minneapolis Vocational High School and Minneapolis Vocational-Technical Institute. Employed at Hotel Krone, Andermatt, U. Kunzi-Fuchs, Switzerland.

Jack L. Clowers (18)
5714 Fort Street
Omaha, Nebraska 68104
Phone: (Home) 402-493-5841
Attended Omaha Benson High School, Omaha Nebraska and Suburban Hennepin County Area Vocational-Technical Centers, Employed at Hotel Atlantis.

Phillip R. Danford (24)
2000 Sharon Avenue
Minneapolis, Minnesota 55414
Phone: (Home) 333-0957
Attended Montour High School, Pittsburgh, Pennsylvania, Adrian College Indiana University and Suburban Hennepin County Area Vocational-Technical Centers. Employed at Rudolf Candrian, Bahnhofbuffet Zurich Main Station, Switzerland.

James W. Engstrom (25)
6017 Leslee Lane
Edina, Minnesota 55426
Phone: (Home) 941-5367
Attended Benilde High School, Creighton University and Suburban Hennepin County Area Vocational-Technical Centers. Employed at Restaurant Sonne, 3251 Scheunenbert, Schweiz, Switzerland.

Lawrence A. Fischer (22)
1731 Thomas Avenue
St. Paul, Minnesota 55104
Phone: (Home) 699-6274; (Work) 227-8761
Attended Harding High School and St. Paul T.V.I. Employed at AG fur Gaststatten im Einkaufszentrum, 8958 Spreitenbach 2, Switzerland.

Richard W. Forpahl (19)
3305 Birch Place,
Minnetonka, Minnesota 55343
Phone: (Home) 938-9492
Attended Hopkins Eisenhower High School and Suburban Hennepin County Area Vocational-Technical Centers. Employed at Restaurant Casino Bern, Switzerland.
Gary B. Foye (19)
2403 West 58th Street
Minneapolis, Mn. 55410
Phone: (Home) 920-6067; (Work) 835-7800
Attended Jefferson High School, and Suburban Hennepin County Area Vocational-Technical Centers. Employed at Restaurant Fischstube Zurichhorn, 8008 Zurich, Switzerland.

Michael D. Fritz (20)
1215 Valley Street
Chaska, Minnesota 55318
Phone: (Home) 448-2148
Attended Chaska High School and St. Paul T.V.I. Employed at Sporthotel Trubsee Engelberg', Switzerland.

Paul A. Gabrielson (24)
4205 23rd Avenue South
Minneapolis, Mn. 55407
Phone: (Home) 722-0354; (Work) 854-7441
Attended Roosevelt High School, University of Minnesota, and Rochester Area Vocational Institute. Employed at Hotel Elite Thun, Switzerland.

Kevin S. Harkins (21)
6009 Fremont Avenue South
Minneapolis, Mn. 55423
Phone: (Home) 866-8305; (Work) 338-7744

Robert J. Knutson (19)
321 Brandon
Hoyt Lakes, Mn. 55750
Phone: (Home) 218-225-2070; (Work) 218-262-3824
Attended Aurora-Hoyt Lakes High School and Hibbing Area Vo-Tech. Employed at Auberge du chene, 1637 Charmey, Switzerland.

Daniel C. Lundberg (20)
2703 First Avenue South-Apt. #1
Minneapolis, Mn. 55408
Phone: (Home) 824-7566; (Work)
Attended New London-Spicer High School and Willmar Area Vo-Tech. Employed at Hotel Krone, 3280 Murten, Switzerland.

Marvin R. Messenger (20)
c/o Richard Messenger
Northshore Drive
Glenwood, Minnesota 55334
Phone: (Home) 1-634-4417
Attended Glenwood High School, Glenwood, Minnesota and Hibbing Area Vo-Tech. Employed at Touring Mot-Hotel Bellavista CH - 6574 Vira – GQ./Ticino, Switzerland.

Gary L. Miranda (27)
2411 Lyndale Avenue North
Minneapolis, Mn. 55411
Phone: (Home) 588-3231
Completed North High School, Mpls. and Anoka A.V.T.I. Employed at Restaurant Rotisserie "Mull", 5243 Mulligen, Switzerland.
Terrance R. Neary (21)
2340 3rd Avenue North
Anoka, Mn. 55303
Phone: (Home) 421-8298; (Work) 935-7711
Attended Anoka High School and Anoka A.V.T.I. Employed at
Betriebsgesellschaft fur Restaurants AF Dietlikon H. Lusti, Switzerland.

Douglas W. Oaks (24)
1853 Berkeley Street
St. Paul, Minnesota 55105
Phone: (Home) (Work) 7702351 x207
Attended White Bear Lake High School. St. Paul T.V.I., and College of
St. Thomas. Employed at Seehotel Nidwaldnerhof Beckenried, Switzerland.

Neil E. Rittenour (19)
1124 South 27th Avenue Apt. 18
Moorehead, Minnesota 56560
Phone: (Home) 218-236-7459
Attended Wheaton High School and Moorhead A.V.T.I. Employed at Rudolf
Candrian, Bahnhofbuffet Zurich Main Station.

William A. Seykora, (22)
2125 Linn Drive
Owatonna, Mn. 55060
Phone: (Home) 507-451-3905
Attended Owatonna High School and Faribault Area Vo-Tech. Employed at
Le Grand Hotel Du Parc, 1884 Villars Sur Ollon, Switzerland.

Keith W. Teich (20)
R. R. #1
Chaska, Mn. 55318
Phone: (Home) 445-2415; (Work) 835-3488
Attended Chaska High School and Suburban Hennepin County Area Vocational-
Technical Centers. Employed at Betriebsgesellschaft fur Restaurant
AG., Switzerland.

John H. Wong (24)
3301 Overlook Drive
Bloomington, Mn. 55431
Phone: (Home) (Work) 888-8900
Attended John F. Kennedy High School, University of Minnesota and College
of St. Thomas. Employed at Seehotel Nidwaldnerhof 6375 Beckenried,
Switzerland.

INTERNATIONAL VOCATIONAL STUDIES

Applicant ________________________________
Program ________________________________

PERSONAL REFERENCE FORM

Vocational students are now able to study in a foreign country under new programs being developed by the Division of Vocational-Technical Education. These are the first programs in the nation to offer vocational school students and graduates the opportunity to develop skills in a foreign country and to improve human relations abilities of use to employers.

To assure that the finest students represent our state and country, maturity, attitude, ability and personality of applicants will be considered in selecting the participants.

Please describe this individual noting these traits. Any additional information you may have will be helpful.

Signature ________________________________
Position ________________________________
Address ________________________________
Date ________________________________

Please mail to: Eugene P. Jereczek, Project Director
International Vocational Studies
Sub. Henn. County Area Vo-Tech Schools
1820 North Xenium Lane
Minneapolis, MN 55441
612/546-3535

April, 1973
January 22, 1974

My personal congratulations, you have been chosen for the first International Vocational Study - Advanced Culinary Arts Program. The Culinary Advisory Committee met January 7, 1974, and reviewed the candidates for the training in Switzerland. According to your application data, you were selected as one of the twenty most qualified individuals to participate in the program.

Every effort has been made by the Committee to make this experience an exciting and rewarding training program. How exciting and rewarding will depend to a large degree upon you and your desire to work with your Swiss employer. It will be new and different by comparison to the American food industry.

When you accept enrollment in this program, you must be willing to accept all aspects of the training and be willing to prepare yourself for participation before departure. All requests made of you are absolutely necessary to remain as a qualified participant.

First, to secure your position in the program, you must return, by January 28, 1974, the following items:

- Certificate of acceptance
- Swiss Hotel Association Application (accurately and legibly completed).
- A $100.00 (minimum) down-payment on the transportation costs from Minneapolis to Switzerland - a total cost flying Swissair is projected at $575.00 round-trip. The final travel payment will be due by March 1, 1974.
- Indicate your interest in short, French language course established by Suburban Hennepin County Area Vocational-Technical Schools.
Second, complete a number of items in preparation for departure:

- Acquire a personal understanding and use of French kitchen terminology. A list is included. For those in the Metro area, we are attempting to establish a short course in French through the International Institute in St. Paul. If this arrangement is not desirable, convenient, or possible, you must make your own arrangements for a short course in conversational French, concentrating on kitchen terminology.

- Provide evidence of a physical examination prior to the orientation. The exact requirements are being prepared and will be forwarded to you soon. The following is a quote from the Swiss Hotel Association:

  "We should like to inform you that the students selected for a trainee-period in Switzerland should undergo a medical examination while in the U.S.A. Sick students will be refused at the Swiss border and will have to return to the States immediately. By examination in the States, we can prevent that such a case can happen."

- Participate in a two-day orientation immediately prior to group departure for overseas. It is anticipated that the hotel industry will provide lodging for those students outside of the Metro area. The exact details will be forwarded when complete.

The orientation will provide a variety of activities such as:

- Getting acquainted - student & staff
- Review of French terminology
- Introduction to Swiss culture and etiquette
- Familiarity with the Swiss kitchen and work conditions
- Understanding of monetary exchange system
- Identification of common cooking ingredients

- Obtain an American passport. Forms and instructions for obtaining the passport will be sent to you. A visa will also be necessary and will be secured by this procedure: Your Swiss Hotel Association application will be sent to the Swiss Hotel Association by Suburban Hennepin County Area Vocational-Technical Schools and the S.H.A. will place you in a hotel. A work contract will be sent to you to sign and return to them. A copy of your contract must be sent to me. The S.H.A., after receiving the signed contract, will apply for your work permit. After 3-6 weeks, the work permit will be forwarded to you or the permission to issue you a visa will be sent to the responsible Swiss Consulate. Your passport is necessary evidence to receive the visa from the Consulate. The fees for the work permit (only) are paid by the hotel.
There will be other things which you need to do in preparation and you will be informed in adequate time. Obviously we both have many things to do presently, so please be prompt with your response.

Thank you for your patience and interest in the program. Please contact me if you have any questions.

Sincerely,

Eugene P. Jereczek
Project Director

APPENDIX #7

PRACTICAL COURSE FOR HOTEL- AND CATERING STUDENTS IN SWITZERLAND

As a hotel- and catering student, you have the opportunity to follow a practical course of 2-6 months in Switzerland.

Please fill out the attached three application forms (printed letters) and return them to us, together with three photographs (passport size) and signed by your hotel and catering school/college.

The conditions and general working conditions are as follows:

1. Minimum age: 18 years (usually)
2. Minimum length of the practical course: 2 months
   Maximum length of the practical course: 6 months
3. Knowledge of a second language (german or french) is essential.
4. Part-time jobs cannot be taken into consideration.
5. The following departments are open to you to perform a practical course (we ask you to indicate the exact position desired):

   a) Service (waiting)
      Commis waiter ) dining room or
      Junior waitress ) restaurant
      Stillroom maid
      Stillroom man

   b) Hall
      Assistant porter
      House-porter
      Carriage attendand
      Relief porter (Tournant)

   c) Etage (floor)
      Housemaid (chambermaid)
      Assistant housekeeper
      Linen maid
      Tournante (various departments)

   d) Kitchen: **
      Trainee-cook (various departments)

      (** We require that you have attended for at least two years a hotel and catering school or finished an apprenticeship as a cook in order to work in the kitchen.)

6. Students cannot obtain jobs for which a fundamental training in the hotel and catering Industry is required (e.g. Reception).
7. The work conditions refer to the conditions of the general work contract. You are entitled to one day off per week and to 1-1/2 day holiday per month.
8. The working hours (without eating time) range between 54-60 hours per week.

9. The monthly salary refers to your position. Meals and accommodation are included and provided free.

   The minimum salary per month is SFr. 500.-, less taxes, insurance.

Establishments which offer you the best possible training shall be taken into consideration for placement.

As soon as we are in possession of your application and documents, we shall seek suitable employment for you.

We look forward to receiving your application and remain,

Yours sincerely,

SWISS HOTEL ASSOCIATION
Employment Department-HOFA

Our address:

SWISS HOTEL ASSOCIATION
Employment Department-HOFA
Monbijoustrasse 31/Postfach 2657
CH - 3001 Berne

Telephone: 031/ 25.72.22
Telex: 32 339 (Shv ch)

Enclosures:
3 application forms
1 general work conditions

701.20 I/71 d/f/e/i
Multiregional, general working agreement

(Berne and Lucerne and the Cantons, Basle-City, Geneva, Neuchâtel, St.Gallen, Ticino, Vaud and Zurich are subject to more extensive regulations).

1. Working-hours:

   The number of working-hours for:
   - Chefs (male and female) and pastry-cooks
     51 hours
   - Service personnel
     60 hours
   - Other employees
     57 hours

   These working-hours are less in the working agreements of individual cantons and towns.

   The weekly maximum working-hours of employees up to the age of twenty should not exceed those of other similarly engaged employees. In the case where there are no other employees, the working-hours laid down in this agreement should not be exceeded and the total number of hours ought not be more than fifty-four. Possible over-time and compulsory instruction (if during working-time) are to be included in the maximum working-hours.

   The working-hours of employees in small businesses may be extended: the working-hours laid down in Paragraph One may be extended by a maximum of six hours a week and the working-hours of minors laid down in Paragraph Three can be given a maximum extension of three hours a week.

   In the case of seasonal work, excluding small businesses, the weekly maximum working-hours may be extended over a period of eight weeks during the peak season. However, this is limited to twice yearly, and, according to Paragraph One, the maximum extension a week is six hours and, according to Paragraph Three, three hours a week.

   Time allowed for meals is not included in the above-mentioned working-hours. At least one and a half hours per working-day are allowed for the consumption of meals supplied by the employer or firm. The employer is responsible for the distribution of working-hours and meal-times.

2. Days off:

   The employee is entitled to one and a half days off a week.

   Businesses which are only open at certain times of the year and have one or two peak periods need only observe the weekly half-day off every second week.

   In the case of seasonal businesses open during two seasons, the weekly half-day off need not be observed during two periods of eight weeks each calendar year and compensation need not be granted.
In seasonal businesses only open once during a calendar year and in businesses open the whole year and with one or several peak seasons, the half day off need not be observed during a period of up to twelve weeks a calendar year. During this period, compensation need not be granted.

Small businesses with less than eleven employees do not have to observe the weekly half day off.

These exceptions do not apply to the weekly day off. If, by way of exception, the weekly day off cannot be observed, a corresponding period of rest is to be granted as compensation. In seasonal businesses, the weekly day off can be reduced four times to a half day off during a period of up to eight weeks; a corresponding period of rest must be granted as compensation.

No claims can be made for meals not consumed at the place of work during days off.

3. Minimum night's rest:

The employee is entitled to an uninterrupted night's rest of at least nine hours which must include either the hours 22.00 - 05.00 or the hours 01.00 - 08.00.

Employees who start work before 05.00 or work later than 01.00 must be granted a minimum night's rest of ten consecutive hours either directly before or after the start or completion of their work.

Minors up to the age of sixteen are entitled to a night's rest of at least eleven consecutive hours which must include the hours between 21.00 and 06.00.

For minors after the age of sixteen, the night's rest must comprise at least ten consecutive hours and include the hours between 22.00 and 06.00.

4. Holidays:

The employee is entitled to the following holidays:

- for the first to fourth year of service in the same place of employment 2 weeks
- for the fifth year of service and subsequent years of service in the same place of employment 3 weeks
- for the first year and subsequent years of service in the Cantons of Berne, Fribourg, Glarus, Lucerne, Schaffhausen, Valais, Zug, Solothurn (and also in the Cantons of Geneva, Vaud, Neuchâtel, Ticino and Zurich) 3 weeks
- in the Canton of Aargau from the completion of the thirtieth year of age on 3 weeks

Holiday compensation amounts per day to one thirtieth of the wage (contributory to Social Security) of the month preceding the holidays.

Holidays must be taken during the period of employment. In the case of the dissolution of the work-contract, compensation for holidays not yet taken is to be paid in cash.
If, in the case of the dissolution of the work-contract, the employee has had too many holidays, a corresponding wage-deduction is to be made.

During the holidays, no work may be undertaken for financial gain.

5. Over-time:
If the employee does over-time on the instructions of the employer, a wage increment of 25% must be paid (calculated on the basis of the net wage and remuneration in kind). This regulation is applicable if over-time has not been compensated for by additional time-off.

6. Accident and Sickness Insurance:
The employee is insured against accidents occurring on and off the premises of the place of work. The employer pays the premiums for Workmen's Compensation, however, the employee must pay at least a third of the total premiums for insurance against accidents not occurring at the place of work.

An insurable employee must take out an insurance covering medical treatment, medicine and hospital care. If the employee is already insured, he is absolved from the compulsory contribution to a possible existent Workmen's Compensation Scheme. In such a case, no disadvantage in respect of possible premium-contributions on the part of the employer should accrue to the employee.

7. Sick-pay:
If the employer pays at least half of the premium on a daily wages' insurance covering 80% of the wage, the obligation to pay wages in the event of illness is no longer applicable.

If there is no daily wages' insurance, the employee is entitled, within a period of twelve consecutive months, to the negotiated wage and, in addition, to "tronc-share" and a food-allowance of SFr. 6.50 per day:

February 8, 1974

Dear Applicant:

This letter is to inform you that you have been accepted for the International Vocational Studies in Advanced Culinary Arts training.

The first payment of at least $100.00 must be received by January 28, 1974, and the remainder ($475.00) by March 1, 1974. Failure to return the enclosed form with the payment may cancel your application and an alternate student will be notified for participation.

Departure is tentatively set for mid-April. You will receive additional travel information about the program prior to that date. Included will be: the items you should prepare to bring, travel tips, and an exact time schedule.

Sincerely,

Eugene P. Jereczek
Project Director

TANT: This certificate and first tour payment are due by 1-28-74.
TRAVEL TIPS

1. Pre-pack your suitcase and practice carrying it several hundred feet.

2. Pack less than the 44 pound limit if you anticipate returning with overseas purchases or Swissair for pound limitations.

3. Make your luggage easily identifiable for quick recovery at the baggage claim area. Suggest bright tape on each side.

4. Label each bag inside and out with your name and home address. Be sure outside tags are durable and fastened securely. Remove old tags.

5. Take two sets of keys for bags that lock.

6. Bring along some soap in a plastic case and a wash cloth. They are not always furnished abroad.

7. Electric razors may need a plug adapter and a transformer. Europe works on 220 volts. A cordless with batteries may be preferable.

8. Avoid bulky cans and jars. Small plastic packages of hand cream, shaving cream, deodorant, etc. will save weight.

9. If you carry medicines, have your doctor fill out standby prescriptions for use overseas, and sign a statement that you are taking medication. Very important because of drug problems.

10. Bring along your favorite remedy for upset stomach (diarrhea) which occurs to most travelers after a change of diet and environment.

11. Assorted bandages and a supply of antiseptic first aid cream are recommended.

12. Do not carry key documents in your suitcase (passport, drivers license, credit cards, etc.). Carry them in pocket or purse or check with the hotel.

13. Don't worry about the language barrier. Concentrate on tourist vocabulary for on street communication.

14. Purchase a small pocket phrase booklet for tourists, but don't try to memorize it.

15. Get and keep receipts when you shop. You will be allowed a $100 duty free allowance upon your return home.

16. Diet now! Travelers usually gain weight quickly in Europe.

17. If concerned about overweight baggage, wear your heaviest, bulkiest clothing over and back.

18. Wear or carry a coat. Small objects can be tucked into the sleeves and pockets.

19. A smallpox vaccination is the only shot recommended for Western Europe, but it is wise to record all shots (typhoid, polio, anti-tetanus, etc.) on your International Certificates of Vaccination form.
20. Take along an extra pair of glasses, and a standby prescription.

21. Few Tourists are troubled by airsickness or jets. Consult your doctor if you have been troubled before.

22. Your Blue Cross Card is valid in Europe also, bring along copies of other health or accident policies.

23. Flight insurance can be obtained at the airport. A $30,000 accident-death benefit costs about $1.00.

24. Valuable cameras are usually insured separately. Do not put extra film in luggage to be carried as baggage - it is x-rayed.

25. Some travelers will want to apply for an internationally accepted credit card.

26. Check the expiration date on any credit card you now hold.

27. A personal check in your home town bank is rarely honored in Europe.

28. American money is seldom usable abroad; you must have the local currency.

29. A "tip pack", about $10 of mixed currency can be obtained prior to departure. Practice with it, learn to make change.

30. Obtain a currency conversion chart for use in Switzerland.

31. Be wary of the black marketeers who offer you a money exchange at better than the official rate.

32. Travelers checks are a good investment and are guaranteed against loss.

33. Left over foreign currency should be exchanged before leaving for home. Hometown banks do not give good rates of exchange on small amounts.

34. Do not carry large amounts of cash or travelers checks on your person while traveling. Check them into the hotel safe.

35. Start a trip book. List places to see and things to do in your free time. Record dates, places, names, events, and expenses as you travel.

36. Allow five days for air mail letters to cross the ocean. Cablegrams are faster, but more expensive.

37. Remember the time differential if you must telephone home.

38. Obtain some literature on public restrooms. Don't expect American comforts.

39. Figure 7 hours flying time Montreal to Zurich by jet. Swissair flight #161. Arrive Zurich 10:50 a.m. April 30.

40. Clothing sizes are not internationally standardized. Try the garment on before you buy.
41. Kilometer conversion to miles: 1 km = 5/8 of a mile. Simple conversion: multiply kilometers by 6 and divide by 10.

42. Ten key words:

<table>
<thead>
<tr>
<th>ENGLISH</th>
<th>FRENCH</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. yes</td>
<td>1. oui</td>
</tr>
<tr>
<td>2. no</td>
<td>2. non</td>
</tr>
<tr>
<td>3. hello</td>
<td>3. Bonjour</td>
</tr>
<tr>
<td>4. goodbye</td>
<td>4. au revoir</td>
</tr>
<tr>
<td>5. water</td>
<td>5. eau</td>
</tr>
<tr>
<td>6. menu</td>
<td>6. carte</td>
</tr>
<tr>
<td>7. toilet</td>
<td>7. cabinet</td>
</tr>
<tr>
<td>8. Thank you</td>
<td>8. merci</td>
</tr>
<tr>
<td>10. help</td>
<td>10. aider</td>
</tr>
</tbody>
</table>

43. If you plan rent-a-car, an international driver license could be helpful.

44. Carrying your kitchen tools (knives) on board the plane will present a problem at the security check.
To the Traveler:

The following magazine articles may be of some assistance in planning your overseas trip. Additional tour-related articles are available at your public library. Consult the Periodical Index under "Travel".

Better Homes & Gardens 49:10-11 Jan. 1971

Passports, Visas and Customs inspections

If you are planning a trip overseas next summer, you should be filling out a passport application right now. As the number of Americans traveling abroad continues to increase at an explosive rate, passport agencies are often flooded with paperwork. And that means a longer wait between filing an application and receiving your passport.

Actually, obtaining a passport is a fairly simple procedure. You can get an application from a passport agency (in Boston, Chicago, Honolulu, Los Angeles, Miami, New Orleans, New York, Philadelphia, San Francisco, Seattle and Washington, D.C.) or from the clerk's office of a federal or state court in your community.

Once you've filled out the application, you'll have to appear in person before a passport agent or court clerk to file. If husband and wife are to be included in one passport, both must appear. Unmarried children under 18 who also are to be included in the passport need not appear.

In addition, you'll have to bring:

* Proof of your U.S. citizenship. A birth or naturalization certificate is preferred. Baptismal certificates or other church ceremonial records are acceptable if a birth certificate is not available.

* A current identification document - your driver's license, government or business I.D. card or your previous passport.

* Two duplicate full-face photographs (2½ x 2½ to 3 x 3 inches). Duplicate group photographs are preferred if your wife and/or children are to be included in your passport. In either case, photographs must be professional quality prints. Vending-machine photos, acetate, or film base prints, snapshots or full-length photographs are not acceptable. Usually there are photo studios convenient to a passport agency that will make the pictures you need at a nominal cost. Passport office clerks are not permitted to recommend or suggest a photo studio.

* A check, money order or cash for the $12 - $10 passport fee and a $2 execution fee.

Taking Care of Your Passport

As soon as you receive your passport, which at present is valid for five years, sign it as indicated. Until you do so, it is NOT valid. Also fill in the information required on the inside front cover.

Guard your passport carefully and keep it in good condition. When you're traveling abroad, it's best to keep your passport with you at all times. Don't give it to anyone to hold as collateral, and don't alter it in any way.
If you lose your passport, report the loss immediately to the Passport Office, Department of State, Washington, D.C. 20524, or to the nearest American consular office.

When you apply for a new passport to replace the one you have lost, you must furnish a detailed affidavit explaining all the circumstances of the loss.

Inoculations For Travel Overseas

For travel to some parts of the world, inoculations are recommended and sometimes required before you return to the United States. You can obtain this information from a U.S. Public Health Service Office, travel agent, local Board of Health or the Foreign Quarantine Program, National Communicable Disease Center, Atlanta, Ga. 33033.

Visas and Other Entry Documents

Many foreign countries require you to obtain a visa from one of their consular officials in the U.S. before you enter their territory.

A visa is usually a stamped notation in your passport by a consular official. Though pleasure travel is fast becoming visa-less, there are still exceptions. Your travel agent will know if visas are required for your particular trip, and he can help you obtain them.

Most Western European countries do not require them for tourist visits, nor does Canada or Mexico. If you're traveling to South or Central America, or the Caribbean, check with your travel agent or transportation company. Some of these countries require a passport and visa, others require a passport and tourist card, while some only require a tourist card or evidence of onward transportation. Tourist cards are easily obtained through your travel agent or transportation company.

Customs Regulations

As a general rule, if you've been out of the U.S. for at least 48 hours, you may bring back $100 in merchandise duty-free. Each member of your family - even an infant - is entitled to the $100 exemption. When your family travels together, you can total your exemptions.

If you are taking foreign-made articles - cameras, binoculars, watches - with you on an overseas trip, it's a good idea to have documents of ownership (a purchase or repair receipt, or a certificate of registry obtained in advance at a customs office). All your foreign-made articles are figured against your duty-free allowance unless you can show they were not purchased on your trip.

For details about duties and other U.S. customs regulations, consult the booklet, "Know Before You Go," available at a U.S. Customs Office or passport agency.

Today's Education 60:74-5 March 1971 TIPS FOR TOURISTS

The following suggestions and tidbits of travel know-how may be helpful to those planning to travel abroad this summer. Some of the tips apply to both sexes, but a number of them are specifically for women tourists.

First, here are the suggestions that either sex might find useful:
* If you wear glasses, take two or more pairs. (Ditto for sunglasses)
Even those with an outdated prescription may be useful.

* By all means, get an up-to-date currency converter for the countries
you'll be visiting. Many American banks and airlines give them free.

* If you are packing for a trip that involves many brief stops, place each
garment on a wire hanger, cover with a plastic dry-cleaner's bag, fold and
place in the suitcase. Enough air is trapped in the plastic bags to prevent
most wrinkles and having the clothes on hangers speeds the process of
packing and unpacking.

* Take your most comfortable OLD.shoes for the many miles you'll walk
while sight-seeing and shopping. Those you've merely "broken in" won't do.
Women's shoes should have low heels and soles that are thick enough to
protect feet from lumpy cobblestones.

* Shoeshine packets encased in foil are a real convenience. The walks and
roadways of many tourist attractions are covered with a gritty gray sand
that soon makes any pair of shoes look disreputable. A rub-off with a
shoeshine pad (impregnated with colorless liquid) brings about instant
improvement.

* Consider the convenience of gummed stickers already addressed for the
cards, letters, and packages you plan to send to friends and relatives.

* Small foreign language dictionairies and phrase books that fit into
pocket or purse can be a boon on those all-too-frequent occasions when you
can't make yourself understood. They're also a help in coping with menus
that give you few clues as to whether you are being offered fried octopus
or reindeer fricassee.

* Include a jar of powdered orange juice substitute if you're accustomed
to starting the day with a drink rich in vitamin C. Fruit juice seldom comes
with breakfast unless you pay extra, and a small glassful (often lukewarm)
can be 60¢ or more.

* Take along a representative collection of non-prescription drugs such
as aspirin and stomach-soothing antacids, as well as medications for diarrhea
and for constipation, in appropriately labeled bottles.

Now for the tips designed for women tourists, who generally outnumber
the male members of a tour by a wide margin.

* Instead of the wool dresses or tweed suits often recommended for chilly
days in Europe, we recommend doubleknit outfits made up of separate units
so that you can peel off or put on layers. Include one or two A-line dresses
or pleated skirts for comfort on planes or buses.

* The ideal outer garment would be a raincoat or waterproof topcoat that
is dressy enough for evening but plain enough for daytime wear. Bonded fabri
has the advantage of being highly wrinkle resistant. If you're the
shivery type, you must want a coat with a zip-out lining. Plastic rainbonnet:
are a must, and a collapsible umbrella is desirable.

* Take along at least one pair of support hose in hopes that this might
lessen fatigue and prevent swollen feet and ankles.

* The last suggestions may be heresy: Don't take a horsey handbag with
seven compartments and eight zippers. You'll go mad rummaging around in a
frenzied attempt to find your change purse, your lipstick, or even your
previous passport. You can get along very well with a bag only slightly
larger than average. Long and fairly shallow ones open up wide enough to
reveal their contents, and your passport can lie flat and protected on the
A dozen other suggestions come to mind, but we will forgo them all in favor of reminding prospective travelers to allow room for expansion in their luggage and for the extra weight that is inevitable as they shop their way from country to country and tuck acquisitions in their suitcases. One parting word: Those travelers who are the least encumbered are also the happiest ones.

The Department of State Bulletin LXV: 56-57 July 12, 1971

Travelers Warned of Penalties for Drug Violations Abroad

At the end of May, 1971, there were 747 Americans under detention in the jails of 50 foreign countries for violating local narcotic and marihuana laws. This represents an alarming fourfold increase in two years. Detentions in May, 1969, totaled 190, and by May, 1970, had risen to 556.

With more than 2 million Americans expected to go abroad this summer, the Department of State again warns travelers, particularly young Americans, of the serious consequences that may result from arrests abroad on charges of possessing, trafficking in, or smuggling illegal drugs.

The possibility of arrest is of particular concern because of the severe penalties involved, the primitive penal conditions in some countries, and the very limited ability of U.S. officials to assist those arrested.

Many of the young Americans arrested appear to have been under the impression that foreign governments are more tolerant of drug use and more permissive in their drug laws and law enforcement than is the case in the United States. In fact, however, prosecution of offenders is being intensified, partly as a result of the international effort to suppress the illicit drug trade, an effort in which the present administration has taken the lead. In many countries, the consequences of narcotics and marihuana violations are severe, ranging up to the death penalty.

Americans generally are also unaware that in many countries the drug peddlers are also police or customs informers. After making a sale, the seller will describe the buyer to the police (or customs officials at ports of entry and exit) as a possible user. The buyer is then detained, usually found in possession of the drugs, and arrested and charged with a serious offense. The seller benefits two ways: He makes money on the sale and receives a reward from the police or customs for being an informer.

Possession alone can result in a jail term of 6 years and a heavy fine in some countries. In others, possession or trafficking can result in sentences of 1 to 3 years in a detoxification asylum, usually a mental hospital. Penalties for trafficking can mean sentences of 10 years, 20 years or life. Many countries have no provision for bail on drug charges and pretrial detention may be prolonged, in some cases up to a year.

Prison conditions in some countries are primitive: Overcrowding, lack of sanitary facilities and bedding, limited, poor quality food, little or no heat or light, damp underground locations, rats and vermin, sometimes solitary confinement.

...American travelers abroad are not protected by U.S. laws. They are subject solely to the laws of the country they are visiting. The authority of American consular officers to intercede on their behalf is limited. The U.S. Government can only seek to insure that the American is not discriminated against; that is, that he receives the same treatment as do nationals of the country in which he is arrested who are charged with the same offense.
When a U.S. citizen is arrested abroad, U.S. consular officials move as quickly as possible to protect his rights, but the laws of the country where the arrest takes place determine what those rights are.

Whenever possible, an American consular officer visits the detainee on learning of his arrest, informs him of his rights, and provides him with a list of local attorneys from which to select defense counsel. If the detainee wishes, the consul helps him contact his family or friends to let them know what has happened and seek their assistance.

The consul reports the arrest and subsequent developments to the Department of State. He is in regular contact with the detainee, his attorney, and local officials to determine how the detainee is being treated and to make sure that processing of the legal charges is not unduly delayed. He also does whatever is possible to solve any difficulties which may result from the conditions of detention. (For example, in some foreign prisons a bare subsistence diet is provided, and families are expected to supply most of the prisoner's food.)

Under U.S. law, official U.S. funds cannot be used to pay legal fees or other expenses for an indigent American detainee.

The Department of State last year undertook a continuing information effort to warn American travelers going abroad of the seriousness of drug violations in foreign countries. As part of that campaign, it has distributed more than 420,000 copies of a warning leaflet to campuses, youth organizations, and travel agencies; made public service announcements and other materials available to radio and television stations; and taken other steps.

Esquire VOL. LXXVII: 68-72 October 1972

....Since all indications point to a continuation of the confused currency situation, the lessons learned by travelers these past few months should be useful well into the foreseeable future. Here are a few of the most valuable.

1. Don't let yourself get caught without local currency over a weekend. Hotels, restaurants and shops are especially reluctant to change dollars or to accept traveler's checks when they can't get them to their banks in a hurry, before a possible drop in value. If they do accept your dollars or traveler's checks, it will be at the lowest rate necessary to guard them against sudden depreciation.

2. For similar reasons, be sure you have enough local currency to pay your hotel bill, if you're checking out over a weekend, or arrange to pay most of your bill before bank closing on Friday.

3. Break your long-term habit of changing your money or cashing your traveler's checks at your hotel; go instead to a bank or licensed money changer.

4. Since the traveler loses with every transaction, try to estimate what your expenses will be in each country, then change the necessary amount of money all at once, or two or three times at most.

5. Buy some of your traveler's checks in small denominations, so that you won't have to change a lot of money if you've underestimated your expenses slightly and need some currency to take care of airport taxes and other small items before you leave.
6. For the same reason, carry with you a fair number of five-dollar and one-dollar bills. The dollar bills are especially useful for tips, before you've had a chance to change your money, and when you're trying to come out even on your foreign exchanges as you leave a country.

7. Before you leave home, buy at least a small amount of the currencies of the various countries you're going to visit. Then your rate of exchange will be no worse than it is at the time of the transaction.
What is the Metric System?

Since the 1890's, the metric system of weights and measures has been the official United States system, but we have not succeeded in converting our everyday uses to the metric system. The United States is the only major nation not committed to using the metric system, but in the long run our position in world trade would benefit by converting.

Developed in France at the time of the Revolution (1790's), the metric system has been refined in many ways. The up-to-date version, on which the nations of the world have agreed, is called Système International d'Unités (SI) or the International Metric System.

During the past few years, the United States government asked many citizens, professional groups, and industry to study the question of whether the United States should convert to the metric system. After weighing evidence presented by participants, it was recommended that the United States should change to the metric system through a coordinated national program. (This report to the Congress is entitled, "A Metric America: A Decision Whose Time Has Come," /NBS-SP345/ for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402 — $2.25. Reports on substudies, such as Education and the Consumer, also are available — $1.25 each.)

Scientists and engineers have used the metric system in this country for many years. You may use the metric system and not realize it. For example, the width of photographic film is expressed in millimeters and skis are sold in centimeter sizes. Have you ever run 100 meters or followed a diet that counted grams of carbohydrate or protein? These metric terms are familiar.
The change to the metric system probably will occur over a period of time defined by the U.S. Congress, such as ten years. The customary system and metric system will coexist in our homes, some people feeling more comfortable with one than the other. Eventually, the marketplace will require everyone to use the metric system so we can be intelligent consumers. Could a gas station attendant put 40 liters of gasoline into a car? How many servings are in a 2 kilogram pot roast?

Changing our system of weights and measures is like giving up a comfortable pair of shoes. The change can be made a little easier by preparing for it, such as becoming acquainted with words used in the metric system.

Five Stages Toward Adoption

There is a difference between being familiar with a system and being able to use it without converting; the goal, in this case, is to think in metric rather than customary measurement.

Margaret Warning, in an article in the Journal of Home Economics, December, 1972, said that researchers have found five stages people advance through before they adopt a new habit—in this case, using the metric system.

The first stage in learning to “think metric” begins when a person hears that the U.S. probably is going to change to the metric system soon. This is the AWARENESS stage. A surprising number of persons whose everyday lives will be affected by conversion to the metric system do not realize that the United States is now the world’s only large country that has not made a national commitment to convert to the metric system.

An INFORMATION-GATHERING stage follows awareness. At this point the person begins to ask questions: What are the six metric units? What do the prefixes mean and how are they used? What is the metric system different from the present system and what is similar? What are the advantages and disadvantages for the individual in her own particular circumstances? At this stage, too, she acquires small, relatively inexpensive tools and measuring devices such as metric tape measure, ruler, metric stick, thermometer, a scale, and probably some handy conversion tables.

Now she is ready for the APPLICATION stage. She begins to apply her knowledge. She notes her height, weight, and measurements in metric dimensions and units. She consults the thermometer to gauge the weather outside, but with an eye for degrees Celsius. She calculates the speed at which she is driving. Gradually this practice leads to the TRIAL stage.

During this period she uses the metric system more and more frequently. If she finds the trial runs successful and pleasant, she almost forgets the old system.

By the time she has reached the ADOPTION stage, the learner is no longer a neophyte but has begun to think in metric terms. Furthermore, she has become an enthusiast. She is convinced of the new system’s superiority, argues in its favor, and enjoys demonstrating its advantages.

Implicit in each stage, of course, is the individual’s eagerness to learn and willingness to practice, steadily and consistently. Alfred Harper, University of Wisconsin, said, “It is always disconcerting to have generally accepted terminology displaced, just as it is to have generally accepted information or beliefs proved false. Both make it necessary to relearn... a harder process than learning initially, because it involves not only acquiring new concepts but also discarding some that are well worn and comfortable.”

Food Preparation

At first glance it may seem that the metric system will change all of our food preparation, but keep in mind that many meals are prepared without any recipes. We also use many foods in the market units in which we buy them. For example, a can of tuna fish, a package of noodles, and a can of soup may be the measures used in preparing a casserole. Some day, however, you may want to try a new recipe that uses metric measurements instead of customary measures. A salad dressing recipe may call for 250 milliliters of oil. How much is that? New measuring cups are being designed that may look like the illustration and you may want to buy a new cup.

You also may need to buy a small scale to keep on the kitchen counter to measure grams of dry ingredients (flour, sugar) or solid fats. In countries that have the metric system, some women use a scale to weigh ingredients, but usually they find the measuring cup (volume) is the easiest way to measure ingredients.

Measuring spoons may have the same relationship to the metric cup as they have to our customary cup. (1 tablespoon = 1/16 cup, 1 teaspoon = 1/3 tablespoon). Or they may have a metric measure, such as 1 tablespoon = 15 milliliters. The first alternative seems more likely. A good cook will still taste her food and will know if she needs more seasoning.

As baking pans and casseroles need to be replaced, a new measure will indicate their size.

Temperature

Thermostats and thermometers will change from the Fahrenheit scale to the Celsius (Centigrade) scale. Until you are familiar with the Celsius scale, you may want to keep a chart of both temperature scales so you can use new appliances with old recipes — or new recipes with old appliances.

Thermometers are not needed all the time. The words to describe various methods of cooking will continue to be used. Words like freeze, chill, lukewarm, simmer, boil, and melt tell us what to do without a thermometer.

Thermometers are needed when making candy, roasting meat, or checking your freezer temperature.

---

**Nutrition and Health**

People trained in the sciences already use the metric system. Nutritionists measure food nutrients in grams, milligrams, and microns. The unit of measuring energy will change from the calorie to the joule (joule). (1 kilocalorie = 4.18 kilo joule)

Next time you have a physical check-up, ask for your weight in kilograms instead of pounds. You may be pleasantly surprised. Also, check your waistline in centimeters. Another surprise!

**Shopping for Food**

Quick now, how many quarts are there in a bushel? How many ounces in a liquid quart or a dry pound? It can be confusing. Although it may be uncomfortable at first, the metric system will provide an easier way to weigh and measure than our present system does.

One thing that won't happen, we will not have a slavish conversion of customary measures to metric measures. A pound box of candy will include a few more chocolates to make it weigh ½ kilogram (kg). A quart of milk will have a smidgeon more milk added to become a liter.

Have you noticed metric measurements on some of your groceries? Canned fruit and vegetable weights are indicated in both ounces and grams. Canned juice volume is measured in ounces and liters. These metric measurements are now voluntary. Read some labels to find out how many grams are in a can of soup or box of crackers. Unless container sizes are standardized, the metric system doesn't offer any advantages when comparing prices. Containers of the same size can be compared easily under any system.

Most meat markets use a decimal system to price meat. A package of ground beef is labeled 1.50 lb.—not 1 lb., 8 oz. When the metric system is used the same size package of ground beef will weigh .75 kg.

Some things probably won't change. A dozen eggs and a dozen cookies probably will always be. The unit of 12 is attractive because it can be divided in half, thirds, or quarters.
**Base Units in the Metric System**

All measurement units in the International Metric System are derived from six bases.

1. **Length**: The unit of length is the meter (m). A meter is longer than a yard. One meter = 39.37 inches. Volume is measured by the liter, which is derived from cubing the decimeter. One cubic decimeter = 1 liter. One liter of water = 1 kilogram. For household purposes, 1 liter of any liquid = 1 kilogram.

2. **Mass/Weight**: The unit of mass or weight is the kilogram (kg). The base unit for mass is the only one that contains a prefix. The gram (or 0.001 kilogram) proved to be too small for practical applications. One kilogram = 2.2 pounds.

3. **Time**: The unit of time is the second. This is the measurement system used now.

4. **Electricity**: The unit of electricity is the ampere.

5. **Temperature**: The unit of temperature is the Kelvin, which is translated into the degree Celsius, formerly called degree Centigrade.

6. **Luminous Intensity**: The unit of luminous intensity is the candela. The unit of luminous flux is the lumen.

An advantage of the metric system is that it is based on decimals. Bigger or smaller units than the base always are related by powers of 10. Prefixes are used to describe the size of the unit. The metric prefixes that homemakers will use most often are listed on the chart.

### Names and Symbols for Metric Prefixes

---

Based on the initiative of cooperative extension workers on agriculture and home economics, acts of May 8 and June 30, 1914, in cooperation with the Department of Agriculture. Roland H. Atterholt, Director of Agricultural Extension Service, University of Minnesota, St. Paul, Minnesota. Offers our programs and facilities to all people, without regard to race, color, sex, or national origin.
APPENDIX #13
ADVANCED CULINARY ARTS
INTERNATIONAL TRAINING PROGRAM, SWITZERLAND

STUDENT ORIENTATION
Saturday, April 27, 1974 - North Campus, Gourmet Dining Room

SCHEDULE OF EVENTS

8:00 A.M. Introduction of participants by Mr. Hans Gilgen, Gourmet Dining Room, G-107.
8:15 A.M. - 9:00 A.M. Continental breakfast in the Gourmet Dining Room.
9:00 A.M. - 9:30 A.M. Film presentation of Switzerland by Mr. Bill Strickling, Swiss Air Airlines.
9:30 A.M. - 9:45 A.M. Presentation of Swiss history by Mr. Mel Bauman.
9:45 A.M. - 10:00 A.M. Mr. Bill Strickling will discuss travel arrangements, flight schedule, actual transportation to and from Switzerland by Swiss Air.
10:00 A.M. - 10:30 A.M. Presentation of the cultural background of Switzerland, introduction of establishments and menus where students will be employed, working conditions and apprenticeship program, also question and answer session related to the above mentioned subjects, explanation of the structure of the Dining Room and the front of the house by Mr. Jaques Loth.
(Films: Do you like snow? Switzerland - Downtown Europe)
10:30 A.M. - 11:00 A.M. Slide presentation of Switzerland by Mr. Hans Gilgen.
11:00 A.M. Departure by bus from the North Campus to a local restaurant for Lunch.
11:30 A.M. - 1:30 P.M. LUNCHEON - Presentation by Mr. Bent Hjorthold introducing participants to Swiss etiquette, customs, layout of Dining Room, tipping procedures and related subjects.
1:30 P.M. Return by bus to the North Campus.
2:00 P.M. Arrival at the North Campus.
2:00 P.M. - 4:00 P.M. Introduction to the brigade, rotation of participants through six stations, identification of equipment, ingredients, kitchen
settings, metric weights and volume by Mr. Hans Gilgen and Mr. Klaus Mitterhauser. Introduction to Dining Room arrangements and monetary exchange by Mr. Bent Hjorthold and Mr. Hans Gilgen.

4:00 P.M. - 4:30 P.M. Question and answer session for next day activities.
11:30 A.M.  
Students and guests to mix socially.  
Seating arrangements (mixed).

11:45 A.M. - 12:30 P.M.  
Brunch - normal menu

12:30 P.M. - 2:00 P.M.  
Introductions and presentations  
Advisory Committee, etc.  
Superintendent of District #287

Orientation Evaluation

Please answer the following questions so future programs can be improved.

1. Do you feel that your previous training and experiences qualifies you for the type of food preparation in Switzerland? yes ___ no ___
   Comment: ________________________________________________________________

2. What do you think will be your number one handicap while working in Switzerland?
   Comment: ________________________________________________________________

3. If you took the French course offered, you feel that:
   - The subject/content was: poor ___ average ___ excellent ___
   - The level of difficulty was: too difficult ___ about right ___
     too easy ___

4. Do you feel comfortable with the basic French kitchen terms? yes ___ no ___
   Comment: ________________________________________________________________

5. Did the orientation help you with the French kitchen terminology? yes ___ no ___
   Comment: ________________________________________________________________

6. Did the orientation assist you in the identification of ingredients in French and German? yes ___ no ___
   Comment: ________________________________________________________________

7. Can you identify the basic tools, utensils and equipment in French and German? yes ___ no ___
   Comment: ________________________________________________________________
8. Do you feel comfortable with the metric measuring system?  
   yes  no
   Comments: ______________________________________________________
   ______________________________________________________

9. Do you feel that you are aware of the working conditions in Switzerland as a result of the orientation?  yes  no
   Comments: ______________________________________________________
   ______________________________________________________

10. Do you feel the orientation was useful and effective as a whole?  yes  no
    Comments: ______________________________________________________
    ______________________________________________________

11. Are there any subjects you would like added to the orientation?  yes  no
    Comments: ______________________________________________________
    ______________________________________________________

12. Are there any subjects you would like deleted from the orientation?  yes  no
    Comments: ______________________________________________________
    ______________________________________________________

Please add any comments that you desire below.
   ______________________________________________________
   ______________________________________________________
   ______________________________________________________
   ______________________________________________________
Dear Student Participant:

As you know, you are involved in an adventurous training program. Like all programs, its value to you and, therefore, to the industry, must be closely monitored and evaluated. This evaluation is a continuous one and has already started with your evaluation of the orientation. Your remaining portions of the evaluation require your fullest and most sincere cooperation. Your remaining portions are:

1. Four (4) program evaluations; one due at the end of June, July, August and September.

2. A summary evaluation for the entire training period. Same form as #1, due at the end of October.

3. A minimum of ten pictures or slides referenced within a short, written, personal summary of your training experience. This report should be written prior to return. It can be submitted after your pictures are developed, but by December 15, 1974. The pictures or slides should depict the following:
   - at least 5 illustrating your working situation, the kitchen, etc. Please include people (unposed).
   - 3 illustrating customs and the native people which you experienced.
   - 2 illustrating the highlights of your training.
   Please use your imagination and good judgement.

4. A possible dinner in Winter-Spring, 1975, to allow you to discuss and present your impressions and feelings regarding the program. This would include the above evaluations and whatever else you consider appropriate. You will get more details when this is finalized, but plan now.

In completing these items, I must remind you that the future of this program rests with you. Your best sources of feedback are these evaluations, and I am confident that you will give them your best.

ADVANCED CULINARY ARTS PROGRAM

STUDENT PROGRAM EVALUATION

Name ___________________________ Date ____________

Report - June

1. How many hours are you working? _____
   _____ Split shift or _____ Straight shift

2. Have you rotated to different stations within the training area?
   Kitchen _____ Yes _____ No
   Dining _____ Yes _____ No

3. What is your present position? __________________________
   Describe: __________________________________________
   __________________________________________
   __________________________________________

4. What is your acceptance from fellow workers?
   Complete / Moderate / Outsider
   Acceptance Acceptance
   Comments: _________________________________________
   __________________________________________
   __________________________________________

5. Have you had an opportunity to socialize with other students of our group?
   _____ Yes _____ No
   Comments: _________________________________________
   __________________________________________
   __________________________________________

6. What is your biggest adjustment or problem this month?
   Please describe and recommend solution:
   __________________________________________
   __________________________________________
   __________________________________________
7. Are you socializing with the Swiss people other than at work?
   ____Yes  ____No  Comments: ____________________________
   ____________________________
   ____________________________

8. What languages do the people speak?
   In the kitchen ____________________________
   The guests ____________________________
   On the street ____________________________

9. Do you feel that the French class was helpful?
   ____Absolutely  ____Some  ____No  Comments: ____________________________
   ____________________________
   ____________________________

10. Are you learning new skills or improving old skills in food preparation?
    ____Yes  ____No  Comments: ____________________________
    ____________________________
    ____________________________

11. Have you done any traveling?  ____Yes  ____No
    Place, time, length ____________________________
    ____________________________
    ____________________________

12. Would more food preparation training at home have helped you on this job?
    ____Yes  ____No  Comments: ____________________________
    ____________________________
    ____________________________

13. Would more American work experience have helped you on this job?
    ____Yes  ____No  Comments: ____________________________
    ____________________________
    ____________________________
14. Is the program living up to your expectations?  _____Yes  _____No
   Comments: ____________________________________________________________
   ___________________________________________________________________
   ___________________________________________________________________

15. Is the chef or manager trying to help you to learn or adjust?  
   _____Yes  _____No  Comments: ____________________________________________
   ___________________________________________________________________
   ___________________________________________________________________

16. Do you feel that it is a real learning experience for you?  
   _____Yes  _____No  Comments: ____________________________________________
   ___________________________________________________________________
   ___________________________________________________________________

17. Is there anything that we could do from here to help you in anyway?  
   _____Yes  _____No  Comments: ____________________________________________
   ___________________________________________________________________
   ___________________________________________________________________

18. List some of the most important things that you have learned thus far:
   ___________________________________________________________________
   ___________________________________________________________________
   ___________________________________________________________________

19. Do you think that what you are learning now can be used in the American food industry?  
   _____Yes  _____No  Comments: ____________________________________________
   ___________________________________________________________________
   ___________________________________________________________________

20. Do you feel that the program is worth running again?  
   _____Yes  _____No  Comments: ____________________________________________
   ___________________________________________________________________
   ___________________________________________________________________
21. Was the 2 day orientation successful as preparation for your job?
   ____ Very successful  ____ Moderately successful
   ____ Not successful  Comments for additions or deletions: __________

22. Was the American coordinator's visit helpful to you?
   ____ Yes  ____ No  Comments: ________________________________

23. If a similar program was set up to give you even more experience in Switzerland or possibly other countries, would you be interested?
   ____ Yes  ____ No  Comments: ________________________________

24. Please write below any comments to improve future programs:
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

25. Would you be interested in assisting the Advisory Committee in setting up future programs?
   ____ Yes  ____ No  Comments: ________________________________
   ___________________________________________________________

Eugene P. Jereczek  
Project Director  
Area Vocational Technical Centers  
1820 North Xenium Lane  
Minneapolis, Minnesota 55441  

Dear Mr. Jereczek:  

Governor Anderson has asked that I respond to your kind invitation to attend the International Vocational Studies Advanced Culinary Arts Brunch on Sunday, April 28, 1974, at 11:30 A.M.

Due to a prior commitment on that date, the Governor regrets that it will not be possible for him to attend. He genuinely appreciated the invitation and extends to you his best wishes for a successful brunch.

Thank you for writing.

Sincerely,

Roger Franke  
Staff Aide to the Governor

___ French  ___ Italian
___ German  ___ Other: ________________________________

14. Condition of living quarters?

___ Poor  ___ Good  ___ Excellent

15. Number of employees per room? ___

16. Working hours - straight or split shift? More than 10 hours daily?

___ Straight shift  ___ Split shift
___ Hours per day  ___ Hours per week

17. Can the student rotate through various stations?

___ Yes  ___ No  ___ No Commitment

18. Present position of our student: ________________________________

Comments:
State vocational school graduates have put Minnesota's vocational-technical institutes first in the nation again. This time it's for a culinary arts program being conducted as a work-study course in Switzerland.

May 19, 21 vocational school graduates boarded a plane to Switzerland where they will spend six months working in hotels as chefs, waiters and kitchen aids.

Going along to chaperon the affair is Klaus Mitterhaus and Hans Gilgen, both medal winners in the international culinary olympics and chef instructors in state area vocational-technical institutes.

Mitterhaus, while attending the culinary olympics in Zurich two years ago, investigated the possibility of foreign study for Minnesota's chef students. He came back to the U.S. with a contract proposal with the Swiss Hotel Association.

Not sure where the oversees study program idea first germinated, Eugene Jereczek, post-secondary director for Suburban Hennepin County Area Vocational-Technical Institute, said that he and state vocational-technical education officials have been working on the project for at least two years.

"We're trying this pilot program with the hopes of making it an on-going one for chef training students now at vocational schools," said Jereczek.

One of the graduates participating in the program is also an instructor at 916 Area Vocational-Technical Institute, White Bear Lake. Before leaving, he expressed some of his feelings about the experience.

When asked if he would have participated in the program if it had been conducted in American hotels he replied, "probably not."

"The European training is intriguing said Doug Oaks, instructor. "I've never had the opportunity to travel before because I've been working (in the food industry) since I was sixteen."

He's going to Switzerland not only to improve his own chef techniques, but also to bring back ideas for improving the waiter-waitress program at 916 - the only program of its kind being offered at Minnesota vocational schools.

"I think American chefs can hold up a candle to European chefs, but American consumers just don't appreciate the chef's art like European consumers do," he said.

He cited that Americans come to a restaurant, order a drink and dinner, eat and leave within an hour. Europeans on the other hand according to Oaks eat, drink and stay for hours in the restaurant enjoying the fine food.

Talking about his profession Oaks said, "It's continually a challenge. I don't think there's another job where you never reach the peak."

"If someone says they've learned all they can about our business, they might as well hang it up, for there's always something new to learn."

The trip, although sponsored by the state Vocational-Technical Division is completely paid by the students themselves.

Other vocational-technical foreign study programs have been developed for training in cosmetology, fashion merchandising and design.
Children's House receives national achievement award

The Mankato State College Children's House was one of schools in the nation given a distinguished achievement award the American Association of Colleges of Teacher Education in March.

The award to colleges and universities is in recognition of excellence in teacher education.

Mankato State's Children's House program is considered to leading the way nationally in preparation of teachers early childhood education. Located in Cooper Center on the Valley Campus, it is a pre-kindergarten school for three to six-

It was developed by the Home Economics Program Unit and the Vocation and Instruction Program, both within the Mankato State College School of Education. Opened Sept. 25, 1972, it currently enrolls about 100 children.

The Children's House is a model early education facility for prospective and in-service teachers, home economics-child development, consumer home-making and early childhood education.

It features an interdisciplinary approach and open concept of teacher education. The program provides for guided experimental learning with pre-kindergarten educational training working alongside other students from a broad variety of human services and other non-teaching professional programs.

With major funding from the State Department of Education, Vocational-Technical Division, the Children's House also serves as a demonstration combination of nursery school, all-day care program and part-time day care program. Emphasis is on eliminating the traditional boundaries between nursery school and day care.

The facility is aimed at enabling college students to learn about children and about themselves in relation to children. The award was presented at the annual convention of the Association in Chicago. Present for the honor were Marjorie Oelerich, executive director, and director of the MSC Early Childhood Program; Darlene Janov, resident director of the Children's House; Robert Anderson, home economics coordinator for Children's House; and Florence Stater of the State Department's Voc-Tech Division, a member of the Children's House board of directors.

Governor cites state's foreign study program

Two years ago the Vocational Education Division of our State Department of Education, in cooperation with Minnesota businesses, set in motion a unique experiment.

This involved the establishment of the nation's first foreign training program for young people attending Area Vocational Institutes.

The experiment is formally known as the Program for International Learning and Occupational Training (PILOT). In its first year of operation, PILOT sent 32 cosmetology students to London for advanced hairdressing training at three internationally known salons.

The program included a one-week side trip to Paris, where the young Minnesotans learned about the technology of the cosmetics industry from experts of the L'Oreal Co.

Another group of 10 students studied fashion merchandising and design in Paris, Florence and London.

This year 21 students, all but one from Minnesota, will receive training from expert chefs in the kitchens and dining rooms of first-class hotels and restaurants throughout Switzerland.

Accompanying the students will be project director Gene Jereczek and two chefs from Minnesota, Klaus Mitterhauser and Hans Gilgen, both past medal winners in the International Culinary Olympics. The students will spend six months in Switzerland, leaving the Twin Cities in May and returning in November, at a cost of $575 per student.

The Minnesota vocational-technical system now grown to 33 schools with a full-time enrollment of more than 23,000 students, is the finest in the nation in many ways.

These schools contribute heavily to the economies of the communities in which they are located, and to the economy of the state as a whole. Their graduates constitute a pool of talented workers that has proven a magnet for new industry.

The PILOT program is but another means through which the excellent of the Minnesota vocational-technical school system is being maintained, and it deserves your enthusiastic support.

Information on PILOT can be obtained by contacting Suburban Hennepin County Area Vocational Technical Centers, 1820 N. Xenium Lane, Plymouth, Minn. 55441.

Dear Mr. Jereczek:

Enclosed is the Notification of Grant Award for the International Vocational Studies in Advanced Culinary Arts. As you will note, the grant covers the period of time from January 1, 1974, through December 31, 1974, and is in the amount of $5,590.

Since this is the only notification concerning the award which is sent out to the recipient agency, please see that your business office is informed of it.

Jane Preston has been working with you concerning project intent, purpose, and content, and will continue to do so. I will be your contact person for all matters relating to grant management. Please feel free to call upon us with any questions which you may have concerning this matter.

Sincerely,

William E. Stock
