ABSTRACT

This document has been prepared to encourage teachers in Oregon to plan environmental trips with their classes. It is organized into three major sections—Awareness in a Living Environment, Teaching and Planning Resources, and Directory of Overnight Sites in Oregon. Using a series of questions as guidelines, children become aware of their environment by looking, listening, and touching. Change, cycles, microhabitats, and interdependence are other topics designed to stimulate inquiry and increase environmental awareness. The second part of this publication is arranged in five subsections. The first section is a listing of agencies that will provide free pamphlets, booklets, maps, guides, films, and slide presentations upon request. Section two presents a bibliography of instructional materials. The third area contains a glossary of terms, which might be helpful in discussing environmental issues. Tips on planning trips are included in the fourth subsection. The fifth area is a listing of suggested items to take on a trip. Part three provides a listing of non-commercial camps available through agencies, church organizations, or private owners. The camps are listed within each of the eleven area divisions of Oregon, and by county within each division. Location, accommodations, and contacts for camps are included. (BP)
LIVING EDUCATION: A TEACHER'S GUIDE TO OVERNIGHT SITES IN OREGON
LIVING EDUCATION: A TEACHER'S GUIDE TO OVERNIGHT SITES IN OREGON

Oregon Department of Education

Mary Lewis
Specialist Environmental Education
We learn best by doing—seeing, feeling, hearing, sharing experiences. By planning and working together to make learning a process both in and out of classrooms, perhaps we can implant an environmental ethic based on respect for human dignity and a reverence for life.

If young people are to become intelligent participants in society, in part capable of reasoned environmental management decision-making, the educational process in schools must include opportunities totally involving the learner.

This guide has been prepared to encourage teachers to plan one such opportunity: environmental trips throughout Oregon. It includes planning suggestions, teaching resources and a directory to overnight sites; it complements *A Handbook of Environmental Encounters* distributed to school districts in 1973. Both books emphasize student involvement with real situations.
Grateful recognition is given to Dr. Dale Parnell, former Superintendent of Public Instruction, whose belief in the need for an interdisciplinary approach to environmental education made this publication possible.

The members of the State Environmental Education Advisory Committee and the Metro-Environmental Education Committee, as well as Bus Nance, former Specialist, Environmental Education, have supported this project by willingly sharing their skills and information.

The following individuals from the state, federal and private agencies have provided information and the names and addresses of local county contacts:

- Robert Corthell
- Robert Hostetter
- Ernie McDonald
- Lois Redman
- Ralph Voris
- Richard Lauer
- Don Kopet

This is a teacher's guide to overnight sites in Oregon. In developing this guide, a whole new world of educational resources has been discovered.

Places to Go,

Many counties have overnight sites available at a nominal charge, provided you make reservations. National Guard Armories and county fairgrounds generally have toilets, heating and minimal cooking facilities. Located in community areas, they provide excellent opportunities for studying the environment of the city as well as the wilderness. Many of these facilities are open year-round and not limited to fall or spring visits, as are many of the resident campsites listed.

The campsite directory in this book lists, according to geographic area, the overnight sites in Oregon that are owned and operated by churches, community organizations, private residents and government agencies. Appropriate information regarding reservations and available facilities is included.

You will need to make your own contacts and arrangements. Costs and available facilities vary and are constantly changing, so you will need to check each site for your particular needs. For instance, most campsites furnish cots or beds, but armories and fairgrounds usually do not. Lack of planning may result in a sleepless night on the hard floor, when air mattresses or foam rubber might have been a joy.

People and Things to See

Skilled men and women from federal and state agencies, industry and public utilities have a sincere interest in education and wish to share in the classroom information related to their professions. Special public relations and educational personnel are often available at no cost and should be contacted whenever possible.

Each county has a brief listing of points of interest and major industries in their area, available from the Chamber of Commerce. Other contacts for information about the features of a specific area are given in the Teaching and Planning Resources section.

Making Plans

Some IED’s have developed excellent planning resources for teachers who wish to take students outside the classroom. Before you begin making plans, be sure to check on the availability of local resources.

Involve your students in planning the trip. The more students share in the preparations, the greater their learning experience will be. Setting specific objectives for the trip will help you and your students evaluate the experience when it is over. Many subject areas can be included in the plans; citizenship, math, science, social awareness, music, communications and career awareness can all be an integral part of environmental study.

Worried about money? Why not plan a budget and involve students in earning money for the trip? Discuss the energy situation, possibilities of curtailed transportation, and make alternate plans. Help the students develop positive attitudes and realistic goals. If you can’t travel as far as the coast, mountains or a distant city, where can you travel to meet the objectives you have established?

There is no more profitable way to teach the Fourth “R”—responsibility than through sharing in the planning of an overnight trip. If you are working with grades K through 8, check your local high school for students who might assist you with the trip as part of their own education and growth.
As a teacher, you too will learn and grow as the cooperative effort unfolds.

Whether your trip is by bus, train, bike or on foot, the experiences you share will have a lasting and meaningful effect on you all. Good luck and happy touring!
AWARENESS IN A LIVING ENVIRONMENT
"...it is not half so important to KNOW as to FEEL. If facts are the seeds that later produce knowledge and wisdom, then the emotions and the impressions of the senses are the fertile soil in which the seeds must grow. The years of early childhood are the time to prepare the soil. Once the emotions have been aroused—a sense of the beautiful, the excitement of the new and the unknown, a feeling of sympathy, pity, admiration or love—then we wish for knowledge about the object of our emotional response. Once found, it has lasting meaning. It is more important to pave the way for the child to want to know than to put him on a diet of facts he is not ready to assimilate."

Rachel Carson

THE SENSE OF WONDER
"A child's world is fresh and new and beautiful, full of wonder and excitement. It is our misfortune that for most of us that clear-eyed vision, that true instinct for what is beautiful and awe-inspiring, is dimmed and even lost before we reach adulthood..."

Rachel Carson
THE SENSE OF WONDER

What and Where to See

Environment is all around you; look and discuss your surroundings in and around:
- the school
- a vacant lot
- the city park
- the inner city

Inquiry and Action

How does the world look to a bird? an ant?
How does a tree look to a bird? to a beetle under the bark?
How does the world look upside down?
What color is the ground?
What is under a rock? in a gutter? in a crack in the sidewalk?
What shape is a leaf?

Walk down a city street and, making use of magnifying lenses, look for the tiniest thing you can find. Write about, or draw a picture of, the most interesting thing you saw. Describe the nicest thing you saw and tell why you felt good about it. Discuss the least attractive thing you saw and ways that it could be improved.
What and Where to Hear

Sounds are interesting; they can tell us many things. People's voices show joy, fear, anger, sorrow and, love. The wind in the trees can sound gentle and restful, or it can be wild and frenzied.

In the city some sounds are constant and some happen only now and then. Some sounds are loud and some are soft. Listen, and they will tell you where you are and where you have been.

Inquiry and Action

What sounds do you hear?
Which sounds are man-made?
Which sounds are not man-made?
Which sounds do you like?
Which sounds do you dislike?

Discuss ways of reducing or eliminating unpleasant sounds. Find ways to reproduce sounds. Experiment with vocal sounds; make a happy sound, an angry sound, a sad sound.

"Take time to listen and talk about the voices of the earth... the majestic voice of thunder, the winds... or flowing stream... 'No child should grow up unaware of the dawn chorus of the birds in spring... In that dawn chorus one hears the throb of life itself.'

Rachel Carson
THE SENSE OF WONDER
What and Where to Feel

There are many things to touch in the urban and rural environments:

- rough things—bark, stones, pavement and bricks
- smooth things—stones, glass, metals, smooth bark and leaves
- soft and prickly things—petals, silky-winged seeds, cactus, briars and soil
- textures—walls, screens, sandpaper and cloth

Inquiry and Action

Contacts: what is the hardest, softest, coldest or roughest?

TOUCH

“Our lives are filled with DO NOT TOUCH. Let children gently touch petals, leaves, and the bark of trees, a fluffy kitten or a cuddly warm puppy. Increased sensitivity stimulates increased creativity.”

Anonymous

Can you identify objects by touch? How can we communicate by touch? Can you communicate by touch to people? to animals? How can you touch something without hurting it?

Find an "ouch" plant. Make a rubbing from some textured material. Let each child put something in a paper sack; then let each child put his hand in to guess what is in the sack. Let children take each other on a blind walk; one partner guides the other, whose eyes are closed, as he touches various objects. Watch animals respond to petting. Try communicating by touch; squeeze hands in greeting, congratulations and regrets.
What and Where to Notice

Changes can occur rapidly, like a sudden hailstorm, or gradually. Observe some of the following changes in your surroundings:

In the urban environment
- seasonal changes in plants
- daily changes in plants
- cyclic changes in organisms (moths, baby birds, ant piles, etc.)
- erosion on pavements, bricks, sidewalks, etc.
- styles in cars, clothes, homes, and other artifacts

In a rural environment
- any organism: trees, herbs and animals
- decaying logs
- anthills and other animal homes
- mining disturbances
- road cuts
- trail boundaries
- streams, ponds and lakes
- land contours (gullies, slopes and mountains)

Inquiry and Action

Is the change man-induced? cyclic? natural (wind, temperature, radiation, water)?

What is the social cost of the change? What are some of the effects of change?

Should the change be encouraged? discouraged? ignored?

Should some action be taken? If so, what action?

"One impulse from a vernal wood
May teach you more of man,
Of moral evil and of good,
Than all the sages can."

William Wordsworth
"The Tables Turned"

"They paved paradise
And put up a parking lot
With a pink hotel, a boutique
And a swinging hot spot..."

They took all the trees
And put them in a tree museum
And they charged all the people
A dollar and a half just to see 'em...

Joni Mitchell
lyrics from
"Big Yellow Taxi"
What and Where to Observe

Change is cyclic in nature. Man frequently disrupts or interrupts natural cycles of change. In a rural environment, changes can be observed in:

- life cycles of trees, plants and animals
- water cycles
- seasonal changes in evergreens
- seasonal changes in deciduous plants
- cyclic changes in annuals, biennials and perennials

In an urban environment, natural and artificial changes can be observed in:

- the life cycle of trees, grass, shrubs and all plants in a well-manicured yard or park
- plants on a vacant lot or natural area within the urban environment
- birds that live in the city all year
- insects such as ants, beetles, flies and moths
- the life cycle of buildings, houses, cities, the skyline, urban renewal and school buildings
- styles in fashions and cars
- water cycles

Inquiry and Action

What is the life cycle of a specific organism?

What happens if a life cycle is interrupted?

When an organism is removed from its natural habitat in the death and decay stage, what are some effects?
MICROHABITATS

"And then there is the world of little things, seen all too seldom."

Rachel Carson
THE SENSE OF WONDER

What and Where to Discover

The world of little things contains a wide range of intricate and beautiful microenvironmental conditions.

In the rural environment, living things find dwellings in and under:

- the bark of trees, logs and stumps
- shady areas protected by rock overhangs with considerable moisture seepage
- small areas of moisture and shade
- decaying logs
- crevices in rocks, in both exposed and shady areas
- countless little areas along the streams

In the urban environment, living things find dwellings in and under:

- cracks in pavement, bricks and cement
- rocks and wood
- places where moisture collects
- the bark of trees and among exposed roots of trees and shrubs
- ledges on buildings, roofs and window sills

Inquiry and Action

How does the climate of the microhabitat compare with the surrounding area?
Which organisms are limited to the microhabitats?
What aesthetic patterns can you find?
What factors are responsible for making this special place a microhabitat?

Take a walk and gather small amounts of soil and dead leaves. Place them in a jar with water enough to moisten soil thoroughly, add vegetable peelings and seal the jar to maintain moisture. Find an old bird's nest; place it in a container or on a paper towel on the window sill; keep it moist. In a few days, use a hand lens to examine your own microhabitat.
What and Where to Study

All living things are dependent upon plants because every animal, including man, either dines directly upon some form of plant life or upon some other animal who dines on plants. Each animal is simultaneously engaged in a struggle to secure its own food and avoid becoming the food of another.

Nature, if left to her own devices, keeps all species in balance, so that none becomes extinct or so numerous as to overrun the earth.

Inquiry and Action

How are natural cycles such as decay and predator/prey relationships affected by man?
What changes has man made in the urban area to serve his needs for water, sanitation, food and shelter?
What natural populations can be found in the area?
What relationships between nature and man have developed?
Visit a tree farm, a natural forest, mill or industry. Invite the County Planning Commissioner to come and discuss the future plans for your county or community.
Visit a farm or ranch. Find out how the land is used and whether measures are being taken to keep the land fertile and productive.

"Nature works on a method of all for each and each for all."
Ralph Waldo Emerson
"Farming"
INTRODUCTION TO TEACHING AND PLANNING RESOURCES

An essential part of a living environmental education is helping students to formulate and answer questions about what they are experiencing. Various materials are available—from private and governmental agencies, independent publishers, libraries and instructional materials centers—that will aid the teacher in planning educational sessions to supplement the trip itself, before, after and while it is taking place.

This section is organized into five parts: the first is a directory of agencies that can supply free pamphlets, brochures, maps, films and slide shows upon request; the second is a partial bibliography of specific instructional materials that might be useful in classroom planning; the third contains a glossary of terms that might be useful in presenting and discussing environmental issues; the fourth contains planning suggestions; and the fifth provides a checklist for the trip itself.

PART I: AGENCY RESOURCES: 21
PART II: BIBLIOGRAPHY OF INSTRUCTIONAL MATERIALS 23
PART III: GLOSSARY OF TERMS 29
PART IV: PLANNING RESOURCES 31
PART V: THINGS TO TAKE ALONG 33
NATIONAL CONSERVATION AGENCIES

Free or inexpensive conservation materials can be obtained from the following agencies:

National Audubon Society
Nature Center, Division
1130 5th Avenue
New York, NY 10028

National Wildlife Federation
1412 16th Street, NW
Washington, DC 20036

Project Man’s Environment
National Education Association
1201 16th Street, NW
Washington, DC 20036

The Wilderness Society
729 15th Street, NW
Washington, DC 20005

Sierra Club
1050 Mills Tower
San Francisco, CA 94104

Conservation Organizations
Izaak Walton League
1326 Waukegan Road
Glenview, IL 60025

NATIONAL FORESTS

The office of the U. S. National Forest Service will provide the following two publications upon request:

"National Forest Campground Directory" (U. S. Dept. of Agriculture)

"Resorts and Packers on the National Forests" (listing all resorts on National Forest lands, name of operator, accommodations, seasons of operation, elevation, things to do and distance from the nearest town)

Write to:

Information Center
U. S. National Forest
P. O. Box 3623
Portland, OR 97208

OREGON WILDLIFE FEDERATION

Free materials on Oregon wildlife are available from the following address:

George Reed
Executive Director
P. O. Box 12438
Portland, OR 97212

PORTLAND GENERAL ELECTRIC COMPANY

This company provides a "Guide and Map to PGE Recreation Areas" upon request at the following address:

Portland General Electric Company
Public Relations Department
621 SW Alder Street
Portland, OR 97205

STATE PARKS

Maps and information on all sites and facilities under the State of Oregon Parks Department are available from the following address:

Oregon State Parks Pamphlet
Oregon State Highway Division
Travel Information Section
Salem, OR 97310

U. S. DEPARTMENT OF INTERIOR

Films and slides are available from this agency at no cost to schools, with the understanding that they will be used with care and with the proper equipment. Demand for them is high, so make your requests early and plan to return the material promptly. A description of the specific films and slides available is contained in Part II of this section (see "Films and Slides"). Direct your requests to the following address:

U. S. Department of Interior
Bureau of Land Management
Oregon State Office
729 NE Oregon Street
Portland, OR 97232

WESTERN FORESTRY CENTER

This agency provides a speaker who will visit schools and make presentations. A special slide-tape presentation about trees, suitable for intermediate grades, is also available. In addition, the agency provides pamphlets related to careers, environmental concerns, wildlife and forest industry. For all of these resources, write to the following address:

Dr. Yvonne Weber
4033 SW Canyon Road
Portland, OR 97221
BIBLIOGRAPHY OF INSTRUCTIONAL MATERIALS

BOOKS

Brehm, Shirley A. A TEACHER’S HANDBOOK FOR STUDY OUTSIDE THE CLASSROOM. Columbus, OH: Charles E. Merrill Publishing Co., 1969. Aids in planning and provides a checklist of preparations and follow-up activities.

Case, Marshal T. LOOK WHAT I FOUND. Riverside, CT: Chatham Press, 1971. Shows the young naturalist how to care for and study certain wild creatures.

De Bell, Garrett, ed. THE ENVIRONMENTAL HANDBOOK. New York: Ballantine Books, 1970. Focuses on some of the major problems of our deteriorating environment, explains the nature of ecology and suggests action that can be taken now in any community and by any individual.

Hammerman, Donald R. and William M. Hammerman. TEACHING IN THE OUTDOORS. Minneapolis: Burgess Publishing Co., 1964. Aids in understanding those segments of the basic school curriculum that exist in the out-of-doors, for all subject areas and at all grade levels.

Musselman, Virginia W. LEARNING ABOUT NATURE THROUGH GAMES. Harrisburg, PA: Stackpole, 1967. Students play their way to knowing and wanting to know more about the living face of nature.

Oregon Department of Education. A HANDBOOK OF ENVIRONMENTAL ENCOUNTERS. Salem, OR, 1973. A handbook designed to assist teachers in providing interdisciplinary approaches to instruction in environmental education; includes appraisal activities to assist teachers in determining the extent of the student’s learning.

Pringle, Laurence. THE ONLY EARTH WE HAVE. New York: The Macmillan Co., 1969. Presents basic information on the environmental problems of today, including a chapter on what to do, names and addresses of leading conservation groups to contact for additional information, and a glossary of terms.

ENVIRONMENTAL KITS AND WORKBOOKS

National Audubon Society. ECOLOGY AND CONSERVATION AIDS. 1973. An ecology and conservation kit ($13.00), including an Audubon ecology chart, an Audubon ecology study program (student booklet, teacher's guide, four color wall charts), nature bulletins on conservation and ecology, conservation fact sheets, charts on forest food chains and saltwater food chains, and ten Audubon slides on ecology.

National Audubon Society. A PLACE TO LIVE. 1973. An illustrated and colorful workbook containing information and exercises to help develop a sense of relationship between the student and his environment; exercises for outdoors and indoors included.

Both resources above available through:

National Audubon Society
1130 5th Avenue
New York, NY 10028

U.S. Department of Agriculture, U.S. Forest Service (Pacific Northwest Region). CONSERVATION TOOLS FOR EDUCATORS. 1968. A kit providing useful concepts, approaches and presentations for educators, with suggested grade levels for teaching. Contact:

Conservation Education Officer
U.S. Forest Service
P.O. Box 3623
Portland, OR 97208

U.S. Department of Interior, Bureau of Land Management (BLM). MINIATURE ENVIRONMENTS: AN ENVIRONMENTAL EDUCATION GUIDEBOOK. An illustrated booklet to help bring nature into the daily lives of children; a look at environments which can be created when outdoor sites are not available and ways to build miniature environments with low cost materials. Instructions for construction of several land and water environments included. Contact:

Mr. Louis V. Stevenson
Bureau of Outdoor Recreation
Division of Information
Room 4241
U.S. Department of Interior
Washington, DC 20240

U.S. Department of Interior, BLM. ALL AROUND YOU: AN ENVIRONMENTAL STUDY GUIDE. 1971. Reassuring information for the teacher and suggested activities and ideas that can be woven into the year-round daily classroom schedule.

THE EARTH: OUR HOME IN SPACE. n.d. A booklet for students about the solar system, the probable earth structure, our atmosphere, weather, resource problems and graphic definitions of most used earth science words.

THE JOHNNY HORIZON 76, LET'S CLEAN UP AMERICA FOR OUR 200TH BIRTHDAY. 1973. Includes resources, posters, stickers, booklets, etc.

PLANTS: HOW THEY IMPROVE OUR ENVIRONMENT. 1971. A booklet for students about how plant life converts sunlight into food.

Materials in the five listings above available free of charge to teachers and principals upon request. Write to:

U.S. Department of Interior
Bureau of Land Management
Oregon State Office
729 NE Oregon Street
Portland, OR 97232

U.S. Department of Interior, National Park Service. ADVENTURE IN ENVIRONMENT: A series of classroom texts, teacher guides and outdoor manuals for grades K-8 available for use in the 1974-75 school year. Materials for grades 3-6 currently available. A series from the National Environmental Education Development Program (NEED) through the cooperative efforts of the National Parks Department and the National Education Association. Order ADVENTURE IN ENVIRONMENT booklets currently available directly from:

Silver Burdett Co.
250 James Street
Morristown, NJ 07960

Indicate on order "special National Park Service discount price."

Teacher in-service workshops to introduce teachers to the NEED materials and program may be arranged by a sponsoring institution (local civic groups, city government or National Park Service) and carried out in cooperation with one school or an entire system. For workshop requests, contact:

Mr. Glen Hinsdale, Environmental Education Specialist
National Park Service
Pacific NW Region
Fourth and Pike Building
Seattle, WA 98101

FILMS AND SLIDES

Environment Information Center, Inc. THE ENVIRONMENT FILM REVIEW. A publication listing films and slides available in 21 environmental categories, including a brief review of each production, the cost of purchase or rental, and contact information. Published annually and available from:

Environment Information Center, Inc.
Film Reference Department
124 East 39th Street
New York, NY 10016

National Education Association: MAN, AND HIS ENVIRONMENT. An introduction to using
environmental study areas produced by the Association of Classroom Teachers, NEA, in cooperation with Project Man's Environment, the American Association for Health, Physical Education and Recreation, and the National Park Service; the booklet (with filmstrip) contains two major divisions: Environmental Study Areas and Instructional Activities. A discussion of the strand approach to environmental education presents an interesting method for studying the environment. Order from:

NEA Publications-Sales Section 34
1201 16th Street NW
Washington, DC 20036

(Booklet: $1.75 single copy [Stock No. 246-25118] and filmstrip, printed guide and script, and 33-1/3 rpm recorded narration, $15 [Stock No. 388-11902])

U.S. Department of Interior, BLM. THE LAST FRONTIER. 28 minutes; 16mm; sound; color. America's frontiers have been pushed west and north until only one remains: the last frontier, the lands that settlers passed by, now managed by BLM and called national resource lands. Urban sprawl, erosion and pollution demonstrate the need for wise management of the remaining open lands. The film shows the immense variety and extent of the national resource lands, from deserts in Arizona to forests in Oregon to tundra in Alaska, including breathtaking scenery, exciting wildlife and wilderness solitude.

ROGUE RIVER COUNTRY. 28 minutes; 16mm; sound; color. An exciting review of the recreational opportunities and wealth of natural resources to be found in the Rogue River Valley of southwestern Oregon. Scenes include flowers, trees, fish and animal life, historic mining areas, hiking, white-water boating, and other features of this famous area.

THIS WAITING LAND. 28 minutes; 16mm; sound; color. A film contrasting pioneering a century ago with modern resource management practices used in the Vale district of southeastern Oregon; showing homesteaders, cattle drives, railroads, modern rangeland, wildlife, brush control, grass drilling, and water development. To accompany film is a 20-page booklet, also entitled "This Waiting Land."

WESTERN WILDLIFE SLIDES. A set of 50 colored slides (25mm in standard 2" x 2" mounts) with accompanying script which can be read in about 20 minutes. Slides present outstanding photographs of wild animals, birds, and fish that live on the national resource lands of the West. All BLM offices have sets of these slides for loan.

WE'VE GOT A LOT OF WORK TO DO. 7½ minutes; 16mm; sound; color. Narrated by Burl Ives, a film showing the cleanup of national resource lands in southern California, where many organizations cooperated; suitable for use before groups of all ages—civic, school, or church.

Order the five BLM films and slides listed above from:

U.S. Department of Interior
Bureau of Land Management
Oregon State Office
729 NE Oregon Street
Portland, OR 97232

ADDITIONAL BIBLIOGRAPHIES

Carvajal, Joan and Martha E. Munzer. CONSERVATION EDUCATION: A SELECTED BIBLIOGRAPHY.
OGRAPHY, SUPPLEMENT. Danville, IL: Interstate Printers and Publishers, Inc., 1971. (No. 1237) Prepared for the Conservation Education Association, the titles in this bibliography selected from publications between, 1967-1970, and marked by suggested reading levels: elementary, middle grades, high school, teachers and group leaders. Subjects include: Interrelationship of Resources; Natural Resources—air, water, plants, animals, soil, land use, earth materials and energy resources; the Role of Man and the Quality of the Environment; Social Implications of Conservation; Population Planning, and others. Tools for the teacher, the name of the publisher, index, author index and subject text also included. Order directly from the publisher.

Michigan Department of Natural Resources. MOTION PICTURE FILMS 1974-75. A list of 43 16mm films (ranging from 10 to 32 minutes) on environmental subjects. Film request should be directed to:

Film Service
Michigan Department of Natural Resources
Lansing, MI 48926

Ohio Department of Education. AN ANNOTATED CATALOG OF ENVIRONMENTAL LEARNING RESOURCES. 1973. Lists material directly applicable to programs in environmental education; organized into two divisions: Classroom Aids and Reference Materials. For catalog, write:

Ohio Department of Education
Division of Instructional Materials
518 South Wall Street
Columbus, OH 43215

U.S. Department of Interior, Office of the Secretary of the Interior. READING FOR THE ECO-ACTIVIST. A bibliography of selected environmental publications of the Executive Branch of the federal government prepared by the task force on Environmental Education and Youth Activities. Order from:

Office of the Secretary of the Interior
Washington, DC 20240

Washington Ecological Center. BIBLIOGRAPHY OF ENVIRONMENTAL EDUCATION MATERIALS. Sections of this bibliography list books, pamphlets and magazines, games, films and filmstrips. Order from:

Washington Ecological Center
2000 P Street NW
Room 308
Washington, DC 20240

</table>
Watershed: All land that drains into a single stream.
Web of life: All living things and their dependence on one another for survival.
Wildlife: All living creatures—birds, reptiles, fish and animals not domesticated.
PLANNING RESOURCES

Planning is the key to success in organizing an overnight field trip with students. The class should be involved in all stages of the planning process—deciding what kind of trip will take place; why it should be of value; where, when and how it will happen.

Some tips on planning steps, to help guide the students and teacher, are suggested below:

EARLY NEGOTIATIONS WITH ADMINISTRATION AND PARENTS

- Get administrative approval.
- Discuss the school policies related to out-of-school and overnight activities: insurance, medical records, permission, transportation, equipment, food, first aid and emergency procedures.
- Determine a plan for securing parental approval for the trip, keeping with policies of the school.
- Arrange for adults to accompany the class: one adult for every six students, grades K-5; one adult for every eight students, grades 6-9; and one adult for every ten students, grades 10-12.
- Check with a high school principal or counselor to see if high school students might accompany elementary and junior high trips as junior counselors.

DESIGNS FOR A TRIP IN KEEPING WITH CLASS GOALS, OBJECTIVES AND RESOURCES

- Discuss and set expectations for the trip. Determine some broad goals for learning about topics such as wildlife, pollution, urban planning, camping skills, etc. Then set specific objectives within those goals: species of trees, sewage disposal processes, laws on zoning, cooking over a campfire, etc.
- Determine the available resources for a trip in terms of money, equipment, transportation, time and personnel.

SELECTION OF A TRIP SITE

- Select possible campsites in keeping with the education and accommodation needs of your group. Inquire about: charges, service fees, caretaker, water, phone, firewood, supplies, equipment, food and kitchen use, sleeping facilities, meeting areas, toilets and showers, and emergency provisions.
- Learn about the area, especially possible hazards, around the campsites you are considering—poisonous snakes and/or plants, dangerous climbing conditions, large bodies of water, etc.
- Select a site on the basis of inquiries into several possibilities, and make reservations.
- Study the rules and regulations relative to the use of the specific campsite you have selected.
- Visit the campsite with a selected group of students and/or adult planners to determine the best travel routes, possible rest and meal stops, camp conditions and educational possibilities in the area.
- Write for information and/or special lectures from agencies that furnish educational materials related to the selected campsite.
SPECIFIC PLANS FOR THE TRIP ITSELF

- Set dates and negotiate final parent and administration approval.
- Develop an itinerary of activities for your stay.
- Schedule appropriate transportation.
- Schedule rest and meal stops. It saves time and confusion to place large group orders with restaurants in advance. State parks offer excellent rest and picnic facilities along all major highways.
- Make an equipment checklist with the students, taking into account the length of the trip, the weather and the nature of the planned activities. (See the following page for a suggested checklist format.)
- Assign trip responsibilities among group members. Provide for duties that will assure the care and maintenance of the facilities you will use. Most campsites are non-profit, and maintained at the expense of the owner. Group responsibilities should reflect appreciation for their generosity and respect for their property.
- Discuss and establish with students health and safety rules for the trip. They will cooperate more readily with their own conduct rules than with those imposed upon them by adults. Plans might include the development of a first-aid kit, with some practice sessions in class on its use.
- Plan pre-trip study on the areas you will visit. These plans may include special units on items in the trip objectives, slides and filmstrips, guest speakers and class discussions.

PLANS FOR TRIP EVALUATIONS

- Suggest that each student keep a notebook during the trip for use in evaluating the experience when it is over.
- Organize post-trip sessions to determine how successful the trip has been, especially in relation to the objectives set.
**THINGS TO TAKE ALONG**

You will need to add to these suggested items as you plan with your students. Discuss plans and develop a supplementary list to meet your own activities and program needs.

34
The camps listed in this guide are noncommercial and available through the courtesy of the agency, church organization or private owner. Facilities range from primitive to modern. The charges for use vary and, in most instances, barely cover the cost of opening and closing the camp.

References to "winterized" and "heated" facilities may range from three-sided adirondack shelters with fire pits to sealed and electric modern cabins. Know the details about accommodations before you venture unprepared. Most facilities require that campers bring their own food, table service, cooking utensils and bedding.

National Forest Districts have experimental stations and guard stations that might be made available for small groups to use. Contact the appropriate local district office for information.

Every effort has been made to list all resident campsites in the state. If some have been omitted, or new ones are established and not listed, please help to keep the directory up to date by sending contact information to:
Oregon Department of Education

Owned by Lincoln County and located in Newport. This site provides a cafeteria building with heat, kitchen facilities, toilet facilities, and can be used for group overnights; available fall, winter and spring.
Contact: Ms. Kenda Williams
Box 437
Newport, OR 97365
Phone: (503) 265-8832

**Newport Armory:**
Owned by the National Guard and located in Newport. This site provides a building which is available during weekdays for overnight use by supervised groups.
Contact: Major Leland Anderson, Army Facilities Coordinator
2150 Fairgrounds Road NE
Salem, OR 97310
Phone: (503) 378-6130

**Lincoln County**
Newport is the county seat. This area features coastline beaches, lakes, rivers and forests. Major industries are lumber, agriculture, fishing and recreation. Major points of interest are Agate Beach, Yaquina Bay Lighthouse, Marine Science Center and a museum and art center. Write or phone for further information:
Lincoln County Chamber of Commerce
Newport, OR 97365
Phone: (503) 265-2462
Coos and Curry counties, plus small portions of Lane and Douglas counties, make up this area. It extends from Cape Perpetua south along the coast line to the California border, a few miles south of Brookings.

Abounding in sand-dunes, lakes, rivers, estuaries, beaches and forests, the Siuslaw National Forest extends from the northern border to Myrtle Grove State Park in Coos county. The Siskiyou National Forest begins at Port Orford and continues down through the California border. A forest map is available from:
The Siskiyou National Forest
P.O. Box 440
Grants Pass, OR 97526

Coos and Curry counties cover 3,256 square miles with a population of 70,600. The area and population of Lane and Douglas counties is listed under Area Five.
AREA TWO
SOUTH COASTAL WEST

LANE AND DOUGLAS COUNTIES
COASTAL AREA

This coastal area extends from Cape Perpetua to Winchester Bay between the Lincoln county border on the north to Coos county border on the south. It includes the Sea Lion Caves, sand dunes, beaches, estuaries, lakes and forests. Major attractions: Honeyman State Park, Florence, and Reedsport at the mouth of the Umpqua River.

Overnight Opportunities

**Camp Baker:**
Owned by the Oregon Trail Council Boy Scouts and located on the north shore of Siltcoos Lake near Florence. This site provides heated facilities, lodge and kitchen; available fall, winter and spring. Contact:
Mr. Curtis W. Thornton
2525 Centennial Boulevard
Eugene, OR 97401
Phone: (503) 345-0553

**Camp Cleawox:**
Owned by the Western Rivers Girl Scout Council and located on the shore of Cleawox Lake near Florence, close to Honeyman State Park. This site provides buildings heated only by fireplaces; available fall, winter and spring. Contact:
Mrs. Marguerite Elliot
Western Rivers Girl Scout Council
2055 Patterson Street, Room A
Eugene, OR 97405
Phone: (503) 345-3359

**Loon Lake:**
Owned by Oregon-Idaho Annual Conference, United Methodist Church, and located on Loon Lake near Reedsport. This site is accessible by boat only and offers a waterfront, forest trails, moss-covered trees and the Umpqua River. This 45-acre site provides kitchen, dining hall, meeting rooms and lodges for 30; available year-round. Contact:
Mrs. Martha Squires, Camp Secretary
1505 SW 18th Avenue
Portland, OR 97201
Phone: (503) 226-7931

COOS COUNTY

Coquille is the county seat.
This area is steeped in history and rich in wildlife, forests and mineral deposits. Fishing, lumber and shipping offer a variety of educational opportunities. The seaport of Coos Bay is the world's largest lumber shipping port. For maps and information, write or phone:
Mr. Gary Combs, Director of Parks
Coquille, OR 97423
or
Chamber of Commerce
Coos Bay, OR 97420
Phone: (503) 267-6519

**Overnight Opportunities**

**Camp Easter Seal:**
Owned by the Easter Seal Society and located nine miles south of Reedsport at Lakeside on the north shore of Ten Mile Lake. This site provides heated buildings and is designed for camping for the physically handicapped; available spring and fall. Contact:
Mr. John Lloyd, Camp Director
4343 SW Corbett
Portland, OR 97201
Phone: (503) 228-6108

**Camp Millicoma:**
Owned by the Girl Scouts and located 20 miles east of Coos Bay on the Coos River. This six-acre site has lodge with fireplace and can accommodate groups up to 50. Available late spring, early fall. Contact:
Mrs. Marguerite Elliot
Western Rivers Girl Scout Council
2055 Patterson St, Room A
Eugene, OR 97405
Phone: (503) 345-3359

**Camp Myrtlewood:**
Owned by the Church of the Brethren and located south of the bridge, ten miles east of Myrtle Point on forest service land. This site provides dormitory rooms and food; service may be provided; available fall, winter and spring. Contact:
Mr. Cass Benedict, Director
Box 91E Bridge Route
Myrtle Point, OR 97458
Phone: (503) 572-5307

**Coos Bay Armory:**
Owned by the National Guard and located in Coos Bay. This site provides a facility available for overnight use during the week; available fall, winter and spring. Contact:
Major Leland Anderson, Army Facilities Coordinator
2150 Fairgrounds Road NE
Salem, OR 97310
Phone: (503) 378-6130

**Ferris Ford Work Center:**
Owned by the U.S. Forest Service and located 15 miles south of Powers on Forest Road, No. 333. This site provides a primitive area available for small groups of 10-12, but only after October 15 until June 11. Contact:
Mr. Harold Simes, District Ranger
Terramar:
a private camp located near Charleston (Coos Bay) in a quiet, secluded setting. This site provides living quarters, heated facilities, a kitchen and dining buildings. Living quarters with food service provided are set up for large as well as small groups; available year-round. Contact:
Mr. Wm. O. Arbus
Box 5377
Charleston, OR 97420
Phone: (503) 888-4753 or 756-4261

CURRY COUNTY
Gold Beach is the county seat.
Principal industries are lumbering, agriculture, fishing, recreation and tourism. Points of interest: Cape Blanco lighthouse, Elk River fish hatchery, Rogue River, ports, plywood and lumber mills and myrtle groves. The county borders California on the south and the Pacific Ocean on the west.

Picnic areas abound along the coast, with easy access to the beautiful beaches. The Kalmiopsis wilderness area, located in the Siskiyou National Forest, provides outstanding botanical study areas.

For detailed information on places to go and things to see, write or phone:
Chamber of Commerce
County Courthouse
Gold Beach, OR 97444

Phone: (503) 247-7526
NOTE: Curry county has no armory. The County Fairgrounds are leased year-round.

Overnight Opportunities

Camp Fir Croft
owned by community churches and located on Langlois Mountain Road. This site has a dining hall, kitchen, rest rooms and cabins. Available only to religious groups at this time. Contact:
Rev. Ronald D. Markem
P.O. Box 57
Langlois, OR 97450
Phone: (503) 348-2301

Camp Humdinger:
owned by Curry county and located on Dry Creek between Bandon and Port Orford. This site provides only a shelter and is very primitive; accessible only in the dry season. (For contact, see Lobster Creek.)

Lobster Creek Youth Camp:
owned by Curry county and located 20 miles east of Gold Beach. This unlimited natural area has a dining hall, kitchen and sleeping cabins and accommodates 75 students with additional quarters for supportive personnel; available except in winter when not accessible. Contact:
Ms. Margaret Lee, Secretary
County Fair Board
County Courthouse
Gold Beach, OR 97444
Phone: (503) 247-7011
This area is bordered on the north by the Columbia River, extending from a few miles west of Clatskanie in Columbia county to Bonneville Dam in the east. The four counties extend over 3,712 square miles, with a population of 946,770. Multnomah, Clackamas and Washington counties form the tri-county metropolitan area.

Most elements for the study of man and his environment are available in this area. The Mt. Hood National Forest covers a major area of Clackamas county and portions of Multnomah county. For further information, write:
Mt. Hood National Forest
P.O. Box 16040
Portland, OR 97216
AREA THREE
NORTH VALLEY WEST

COLUMBIA COUNTY
St. Helens is the county seat.
Major activities in this area, bordered on the north by the Columbia River, are fishing, agriculture, industry and recreation. For a map and brochure on points of interest, write or phone:
Columbia County Chamber of Commerce
County Courthouse
St. Helens, OR 97051
Phone: (503) 397-0685

Overnight Opportunities

Camp Wilkerson:
a county-owned youth camp located 40 miles west of U.S. 30 at St. Helens. This site provides sleeping shelters only, a kitchen and dining hall. Available year-round. Contact:
Mrs. Gloria Salvey
County Courthouse
St. Helens, OR 97051
Phone: (503) 397-4322

Columbia County Fairgrounds:
owned by the county and located two miles west of U.S. 30 at St. Helens. This site provides heated dormitories, a kitchen and dining hall, and arrangements can be made for meals; available year-round. Contact:
Mr. Paul De Thazer
Route 1, Box 77
St. Helens, OR 97051
Phone: (503) 397-4231 or 397-1650

National Guard Armory:
owned by the National Guard and located in St. Helens. This site provides a heated facility and is available during the week days and nights of the school year. Contact:
Major Leland Anderson, Army Facilities Coordinator
2150 Fairgrounds Road NE
Salem, OR 97310
Phone: (503) 378-6130

Perry's Sports Camp
privately owned and located near Vernonia. This camp is presently not available to outside groups. Contact:
Mr. Bob Perry
12220 SW Greenwood Street
Beaverton, OR 97005
Phone: (503) 644-5962

Suggestions for Day Visitation Only

Sauvie Island:
owned by the Oregon Wildlife Commission and located on the Columbia River. This large island, once the center of a great Indian culture, contains a wildlife sanctuary.
Oregon Wildlife Commission
P.O. Box 3503
Portland, OR 97208
Phone: (503) 229-5551

Trojan Nuclear Plant
Visitors Information Center primarily owned by the Portland General Electric Company and located on the Columbia River near Rainier. This site will provide an adjoining park and picnic area. Contact:
Visitors Information Center
Route 2, Box 120
Rainier, OR 97048
Phone: (503) 556-4741

WASHINGTON COUNTY
Hillsboro is the county seat.
Principal industries are agriculture, lumbering, manufacturing and food processing. Beaverton is the home of Tektronix, Oregon's largest single-site employer. Forest Grove is the county's oldest city and the location of Pacific University, a small private college. Forest Grove will be the nearest community to the new Scoggin Dam development for irrigation and recreation, due to be completed in 1975.

Overnight Opportunities

Camp Mountaineadle:
owned by the Portland Girl Scout Council and located near Cornelius. This 60-acre site provides heated facilities for 20 people and a wooded area with a pond and meadow; available year-round. Contact:
Girl Scout Camp Coordinator
1405 SW 14th Avenue
Portland, OR 97201
Phone: (503) 224-6562

Camp Sunago:
owned by the Presbytery of the Cascades and located near Banks. This 205-acre primitive site provides sleeping quarters in teepees (no heat), outdoor cooking and dining facilities, shower and toilet facilities (not heated), and can accommodate 40 in beds; available late spring through early fall. Contact:
Dr. Kent Lawrence
1624 NE Hancock Street
Portland, OR 97212
Phone: (503) 287-1289

County Fairgrounds:
owned by the county and located north of Hillsboro. This site provides a facility with a cement floor but no heat. Cooking and sanitary facilities are also
provided. Contact:
Mr. Dick Jassy, Manager
Phone: (503) 648-0704
or
Ms. Adeline Hess, Secretary
Phone: (503) 628-1610

National Guard Armories:
owned by the National Guard and located in Hillsboro and Forest Grove. These sites provide facilities which are available for overnight stays during midweek throughout winter, fall and spring. Contact:
Major Leland Anderson, Army Facilities Coordinator
2150 Fairgrounds Road NE
Salem, OR 97310
Phone: (503) 378-6130

MULTNOMAH COUNTY
Portland is the county seat.
Principal industries are manufacturing, lumbering and transportation. Portland, the major city in this most heavily populated county of the state, is divided east and west by the Willamette River. The deep river channel makes it possible for large ships to dock. Portland is one of the country’s leading wheat exporting cities, and its livestock market is one of the largest on the Northwest Coast.

Major points of interest are the Oregon Museum of Science and Industry, the Western Forestry Center and the Zoological Gardens. Tours of the dock areas, fire stations and various industries are available. For further information and maps, write or phone:
Portland Chamber of Commerce
824 SW 5th Street
Portland, OR 97204
Phone: (503) 228-9411

Overnight Opportunities

Camp Collins:
owned by the Portland YMCA and located out of Gresham on the Sandy River adjoining the Oxbow Park area. This 120-acre site provides heated facilities, and meals may be arranged. Contact:
Mr. Robert Smith
831 SW 6th Avenue
Portland, OR 97204
Phone: (503) 223-6161

Camp Crestview:
owned by the Church of Four Square Gospel, located out of Corbett. This 30-acre site overlooks the beautiful Columbia Gorge and provides heated facilities; available winter, spring and fall for 250 people. Contact:
Ms. Debi Spanberger
930 NW Birdsdale
9

Hillsboro
**Area Three**

**North Valley West**

Gresham, OR 97030  
Phone: (503) 665-2052

**Menucha Conference Grounds:**  
Ministry of the First Presbyterian Church of Portland and located out of Corbett, overlooking the Columbia Gorge. This 97-acre site provides comfortable heated accommodations for up to 150 people, and meals are prepared for all groups; available all year. Contact:  
Mrs. Rita Knapp  
Menucha, Box 8  
Corbett, OR 97019  
Phone: (503) 375-2243

**National Guard Armories:**  
Those in Portland are often used and may be difficult to secure. Nearby Armories are located in Tigard, Oregon City, Lake Oswego, Woodburn and St. Helens. Contact:  
Major Leland Anderson, Army Facilities Coordinator  
2150 Fairgrounds Road NE  
Salem, OR 97310  
Phone: (503) 378-6130

**Scouters Mountain:**  
Owned by the Columbia Council Boy Scouts of America and located at 11300 SE 147th Avenue, Portland. This 200-acre site provides a conference building with complete dining and kitchen facilities for 250; available year-round, but dates need to be scheduled well in advance. Contact:  
Mr. Don Kopet, Director of Camping  
Columbia Pacific Council BSA  
2145 Front Avenue  
Portland, OR 97201  
Phone: (503) 226-3423

**Trout Creek Bible Camp:**  
Owned by the Central Bible Church and located near Troutdale. This 90-acre site provides heated dormitories, and nonheated kitchen and dining facilities; accommodations are available for 30. Contact:  
Mr. G. R. Phillips  
8815 NE Glisan  
Portland, OR 97220  
Phone: (503) 252-1424

**Clackamas County**  
Oregon City is the county seat. Located on the Willamette River, Clackamas is the third largest county in population. Its borders extend from west of the Willamette River to the peak of Mt. Hood on the east. Major industries are agriculture and recreation. For maps and additional information, write or phone:  
Clackamas County Chamber of Commerce  
County Courthouse  
Oregon City, OR 97045  
Phone: (503) 656-1619

---

**Overnight Opportunities**

**Arrah Wonna:**  
Owned by the American Baptist Churches of Oregon and located at Wemme, 40 miles east of Portland just off Oregon 26, adjacent to Mt. Hood, and adjoining the Wildwood Recreation Area. Lane, Douglas, Josephine, and Jackson counties comprise this area—the second largest in population (438,750), and covering 14,136 square miles.

Four different national forest areas are located in this section—The Willamette National Forest extends along the eastern portion of Lane county from its northern border to its southern border—with the Siuslaw Forest in its west coast area. The Umpqua National Forest covers the major eastern portion of Douglas county with the Siskiyou National Forest covering the southern portion of Josephine county. The Rogue River National Forest covers a portion of the east and south of Jackson county.

Rev. Lyle Wilson
157 SE Crest Drive
Myrtle Creek, OR 97457
Phone: (503) 863-4742
The counties of Hood River, Wasco, and Sherman make up the North Central area. All three counties' north border is the Columbia River, extending from Cascade Locks to approximately 20 miles east of Biggs Junction. The western border extends south along the crest of the Cascades to the Olallie Butte on the Warm Springs Indian Reservation. The area covers 3,762 square miles and has a population of 36,160.

The Warm Springs Indians own and operate the famous Kah-Nee-Ta Hot Springs Resort. The resort is in the Wasco county area of the reservation. Due to its proximity to Madras, it is associated with and promoted by Jefferson county.

The Mt. Hood National Forest extends over the major portion of Hood River county and a sizable portion of Wasco county.

Ms. Mary Hansen
1000 Park Street

Baker, OR 97814
Phone: (503) 523-2209

National Guard Armory:
owned by the National Guard and located in Baker. This site provides heated kitchen facilities, floor sleeping, toilet facilities; available week nights winter, spring and fall. Contact:
Major Leland Anderson, Army Facilities Coordinator
2150 Fairgrounds Road NE
Salem, OR 97310
Phone: (503) 378-6130

NOTE: Among possible day excursion sites used for environmental education in the county are the Nature Trail developed by the Forest Service at the Union Creek Campground on the north side of Phillips Reservoir and the Marble Creek Campground located on Marble Creek ten miles northwest of Baker.
The counties in this area are Grant, Harney and Malheur. The area covers 24,590 square miles, nearly one-fourth of the state, with a population in 1972 of 37,190.

The southeastern area is bordered on the north side by Umatilla and Baker counties; on the east by the Snake River and the Idaho border; on the west by Crook, Deschutes and Lake counties; and on the south by Nevada.

The Malheur National Forest covers a major portion of Grant county and a small northern area of Harney county. The National Wildlife Refuge is located in the center of Harney county in the Malheur and Harney Lake area.

Check your State Park brochure. write:
Malheur National Forest

John Day, OR 97845
GRANT COUNTY
Canyon City is the county seat. Major industries are lumbering, livestock raising and recreation. Major points of interest include John Day Valley, gold ore dredge piles, historical museums, fossil collection in the John Day Chamber of Commerce office, and Strawberry Mountain. Contact: John Day Chamber of Commerce, John Day, OR 97845. Phone: (503) 575-0647.

Overnight Opportunities

Blue Mountain Camp:
Owned by the Assembly of God Church and located out of Prairie City on Oregon 26. This site provides a dining and kitchen lodge and sleeping cabins available June 9 through September excluding the first two weeks in July; will accommodate around 200 people. For information on facilities and their availability for group use, contact: Mr. Milo Frank, Assembly of God Church, NE Highway, John Day, OR 97845. Phone: (503) 575-1837. Or Mr. Charles A. Slaughter, First Assembly of God, Pendleton, OR 97801. Phone: (503) 276-6417.

Grant County Fairgrounds:
Owned by the county and located just outside of John Day. This 38.5-acre site provides heated dining, kitchen, toilet and sleeping facilities with 30 beds. The floor sleeping capacity is unlimited; available all seasons except during county fair. Contact: Mr. and Mrs. Alva Farley, John Day, OR 97845. Phone: (503) 575-1900.

Lake Creek Camp:
Owned by Lake Creek Recreation Association. Harney, Grant and Wheeler counties are cooperating in developing this camp for youth. Located 18 miles east of Seneca with access to an unlimited natural area, this 19-acre site provides a well-equipped lodge, kitchen and dining area and nine A-frame cabins available late spring into December. Presently, it is being used for outdoor education and 4-H activities. Contact: Mr. Roy Hamilton, County Extension Agent, Grant County Courthouse, John Day, OR 97820. Phone: (503) 575-1911. Or Ms. Evelyn Sword, Route 2, Vale, OR 97918.

HARNEY COUNTY
Burns is the county seat. Major industries are agriculture, livestock and lumbering. Major points of interest are lakes, Steens Mountain, Squaw Butte, Malheur Wildlife Refuge and Malheur Environmental Field Station. Harney county is Oregon's largest county, covering an area of 10,132 square miles, but with a total population of less than 7,600. It shares, with Grant county, the largest ponderosa pine forest in the nation. Write or phone for further information: Harney County Chamber of Commerce, 557 W. Washington Street, Burns, OR 97720. Phone: (503) 573-6388.

Overnight Opportunities

Harney County Fairgrounds:
