This resource guide is intended for use as a general guide for teachers who are designing elementary and secondary Bicentennial social studies units. The unit stresses three main topics in both an historical and contemporary framework: family life, transportation, and social conflict for the periods of 1776, 1876, and 1976. Emphasis is on the social history of America rather than the political history. The unit only presents outlines, suggested activities, and resource lists. It is up to the individual teacher to collect the materials and fully develop social studies units. A list of suggested library resources, audiovisual resources, discussion questions, and activities are provided. The unit outlines the basic concepts followed by corresponding lists of print and nonprint resources. (Author/JR)

BICENTENNIAL RESOURCE UNIT

I. Introduction

This is a resource unit on the Bicentennial. It is not to be construed as a complete set of materials, but to be utilized as a general guide to relieve the basic work of any classroom teacher who is interested in presenting a Bicentennial unit.

In this unit three main topics are stressed that are historical as well as contemporary: Family Life, Transportation, and Social Conflict for the periods of 1776, 1876, and 1976. The emphasis is on the social history of America rather than on the political.

This unit is recommended as a study guide in outline form so that the teacher may use it to develop a unit. A list of suggested library resources, audio visual resources, discussion questions and activities is provided; however, the teacher will have to compile and collect his own material. The list of materials (elementary sources are in parts IV to VI and secondary sources are in parts VII to IX) was compiled from local school and community libraries and Media Centers; therefore, the teacher should find that this unit is easily executed.

This unit is provided in conjunction with the West Texas Regional Council for the Social Studies and
II. Unit Objectives

1. Describe changes in American family life, transportation, and social issues during the years 1776, 1876, and 1976.

2. Describe changes in American family life during the periods 1776, 1876, and 1976 by comparing the roles of the family members (father, mother, children, and grandparents) and the ways in which families make a living.

3. Describe changes in American transportation during the periods of 1776, 1876, and 1976 by comparing methods of transportation, types of energy (resources), inventions and technology; and the extent of travel.

4. Describe changes in American society during the periods of 1776, 1876, and 1976 by comparing significant social conflict issues that dominated each period.
