This book is designed primarily for principals in Right to Read programs and elsewhere, as both a theoretical description of competencies required for educational leadership and as a practical handbook for implementing leadership functions. The volume utilizes the interviews and self-analyses of 36 principals who participated in the Bank Street Right to Read Program, as first hand resources for the delineation of competencies required for enacting the leadership role in enabling adults to develop an effective reading environment in the school. The competencies identified by the principals are in the areas of staff development, leadership roles and relationships, and parent/community interaction. Each of these areas is discussed in the various chapters, in which are also listed resources and references for implementing and enacting the programmatic and administrative aspects. Six different self-rating instruments are placed in the appropriate chapters. The appendix offers a selective list of books and periodicals which are representative of the kinds of reading materials one might expect to find in the principal's bookcase. (TS)
DEVELOPING THE LEADERSHIP ROLE

A RESOURCE BOOK FOR PRINCIPALS

ACKNOWLEDGMENTS

Since this book is intended as a resource for the school principal, it is in large part a collection of the work of others. I am particularly indebted to the staff of Bank Street's Program for the Development of the Role of the Elementary School Principal as an Educational Leader for permission to include the leadership competencies that appear on pages 44, 88, 90, 101, and 102, and the Principal's Log on pages 108-113.

I am also indebted to the following authors and publishers for permission to quote copyrighted material:

The Phi Delta Kappa Educational Foundation and Theodore Kauss for the chart "Modern Leaders" from Leaders Live with Crises, by Theodore Kauss;

Learning magazine for the section "People" from Peter Madden's article "Exploring and Exploiting Your Community";

Wanda Gray for the excerpts from her article "Volunteers: Love 'Em or Leave 'Em";

United Bronx Parents for excerpts from How Good Is Your Child's School? A School Evaluation Handbook for Parents (And Students);

University Council for Educational Administration for case study descriptions from the UCEA Instructional Materials Catalog;

The Workshop Center for Open Education for the reproduction from Reading Failure and the Tests, by Deborah Meier;

Citation Press for the reproduction from Recording Children's Progress, by Joan Dean;

Macmillan Publishing Co., Inc., for the reproduction of "Freddie," by Beverly Hannum and Seymour Reit;

INTRODUCTION

From its inception almost six decades ago as the Bureau of Educational Experiments, Bank Street College of Education has worked with schools and school systems and trained their staffs in the field. The College has two major training divisions conducting both on-campus and field-based educational programs. The Graduate Programs Division offers degree programs for pre-service and in-service teachers, guidance personnel, and supervisors and educational leaders. The Division of Field Services and Leadership Development provides non-degree programs of in-service training and continuing development for paraprofessionals, teachers, and educational leaders. Bank Street’s Right to Read Administrative Leadership Program, conducted by the Division of Field Services and Leadership Development, has been one of the continuing professional development programs for educational leaders.

Bank Street believes that effective and continuing change in the educational enterprise to improve educational opportunities for children is unrealizable unless the principals of the schools are involved in such change as educational leaders, staff developers, and knowledgeable administrators. Over the years, the College has designed a number of programs for the continuing professional education of principals. These programs have been funded by government agencies, private foundations, and industry. The thrust of the programs has been on both the development of competencies of the principal and his or her role in enabling the development of reciprocal competencies of the educational team in the school.
The Bank Street Right to Read Program has produced this resource book, DEVELOPING THE LEADERSHIP ROLE, for principals in Right to Read programs and elsewhere, as both a theoretical description of competencies required for educational leadership and as a practical handbook for implementing leadership functions. The volume utilizes the interviews and self-analyses of 36 principals who participated in the Bank Street Right to Read Program, as first hand resources for the delineation of competencies required for enacting the leadership role in enabling adults to develop an effective reading environment in the school. A profile of the Right to Read principal has been drawn from this set of leadership characteristics.

The competencies identified by the Right to Read principals are in the areas of staff development, leadership roles and relationships, and parent/community interaction. Each of these areas is discussed in the various chapters, in which are also listed resources and references for implementing and enacting the programmatic and administrative aspects. Excerpts from and samples of these resource materials are reprinted to provide the reader with some sense of their value and impact.

A thorough check of the availability of these resources and their costs was made right up to the final moment before the printing of the book. In view of the vagaries of the economic scene and ongoing inflation, it is advisable to recheck prices with publishers. Inasmuch as some publications are limited to a single printing run and may be sold out, it might be necessary to rely on library copies.
Six different self-rating instruments are placed in the appropriate chapters. They may be used as leadership guidelines towards competency-based performance or for personal self-evaluation, or for a combination of the two. They have been designed as enabling instruments: the statements are cue lines for the enactment of the leadership role.

While some of the materials utilized in the volume have been developed in Bank Street programs, others have been gathered from a wide range of sources, including schools and school systems of principals participating in the Bank Street Right to Read Program. A list of acknowledgments appears elsewhere in this volume.

This resource book can be utilized as a do-it-yourself training sequence for Right to Read principal-administrators. The training has two goals: to enable the principal to develop his or her leadership competencies in relation to individual needs and style; and to enable the principal in the role of educational leader to conceptualize and implement a Right to Read program appropriate for and meeting the needs of his or her school. Through such leadership, hopefully, Bank Street's commitment towards the improvement of educational opportunities and the "National Right to Read Effort . . . to ensure that in the next decade no American shall be denied a full and productive life because of an inability to read effectively" will be realized.

Hyman Wolotsky
TOWARD A COMPETENCY-BASED PERFORMANCE OF THE EDUCATIONAL LEADERSHIP ROLE

SELF-ANALYSIS
What competencies should a principal have, in order to be an effective leader of a Right to Read program in his school and community?

Where is the "expert" who can define an effective leadership role for every principal who administers a Right to Read program?

Who can say that what works for one principal in one school setting, will work for another principal in another setting?

The following set of leadership competencies for administrators of a Right to Read program is based on our conviction that school principals are the experts, when it comes to defining an effective leadership role for themselves. The men and women who hold the job know what works for them. They are the best source for determining what competencies they need, in order to be an effective leader of a Right to Read program in their school and community.

During the first months of our leadership development program for administrators of 46 Right to Read programs, we interviewed 36 principals of elementary, junior high, and senior high schools in 14 states. The schools varied in size from 200 to 2500 students, and in locale from rural to urban.

In individual interviews we asked the principals to describe their role with each adult member of their school community, and to discuss their working relationship with each person or group specified. From the interviewer's notes of each interview we collected all references to the leadership role, role function, and relationships with staff, parents, and the community. These references were then collated, and comprise the following set of 112 leadership competencies.
The competencies therefore provide a description of the educational leadership role as the principals in our program define and enact it. Since no one principal performs every leadership function or develops all professional relationships with equal effectiveness, however, the competencies are listed as a self-rating questionnaire, so that each principal may evaluate his own role performance.

The principals in our program all rated themselves on the leadership competencies derived from their interviews. From our analysis of their self-ratings we developed a profile of the leadership characteristics of the principal as leader of a Right to Read program. The profile differentiates elementary and junior-senior high school principals, and male and female elementary school principals.

When you have evaluated your own leadership role—using the rating code described on the following page—you can compare your role performance with that of the "typical" Right to Read principal pictured in our profile.

Any generalization about the kinds of curricular and extracurricular efforts needed for the children in any specific community can be only half right. The principal who knows his teachers, his children, his parents, and his community is in a much better position to determine the kind of effort needed in his school. He may find ideas in other places, but the patterns he evolves have to be cut from his cloth to fit his clientele.

--Carl B. Smith

*Treating Reading Difficulties*
LEADERSHIP COMPETENCIES FOR ENABLING ADULTS TO DEVELOP

AN EFFECTIVE READING ENVIRONMENT IN THE SCHOOL

March 1974

Directions

Please rate your own performance of each competency, using the following code:

S - if you feel that the competency is one of your leadership strengths;

OK - if you feel that your performance of the competency is average or adequate;

W - if you do not perform the competency but feel that you should; or if your performance of the competency is below average or ineffective;

NR - if the competency is not relevant to your role or to your school setting.

Please use only one rating for each competency; and rate each competency (including each a-b-c-d subheading for those competencies with more than one reference.)
1. Arranges release time for teachers to participate in regularly scheduled in-service workshops.

2. Leads workshops for teachers.

3. Plans and implements workshops for teachers, specifically:
   a) curriculum
   b) use of A-V equipment
   c) use of reading centers
   d) behavior modification
   e) making materials

4. Uses self as a resource person for the staff by identifying, demonstrating (where relevant), and providing new materials, sources, resources, equipment, etc.

5. Effectively communicates knowledge of available reading programs and materials to staff.

6. Uses self as a resource person for the staff by demonstrating curriculum skills and strategies:
   a) in the classroom
   b) in faculty meetings
   c) in in-service workshops

7. Delegates 50% or more of the reading specialist(s)' time to staff development.

8. Delegates responsibility for curriculum supervision/coordination to other(s).
5. S - strength
   OK - average performance
   W - weakness
   NR - not relevant to own role

9. Implements and facilitates individual teacher self-evaluation as part of teacher evaluation process. __________

10. Provides feedback to teachers based on observation of classroom performance. __________

11. Recommends discussion with peers in the school to:
    a) teachers __________
    b) instructional aides __________
    c) reading staff __________
    d) A.P.'s __________

12. Recommends performance observation of peers in the school to:
    a) teachers __________
    b) instructional aides __________
    c) reading staff __________
    d) A.P.'s __________

13. Recommends and schedules visits to other schools for:
    a) teachers __________
    b) instructional aides __________
    c) reading specialist(s) __________
    d) librarian(s) __________
    e) department chairmen __________
    f) A.P./curriculum coordinator __________
14. Arranges and schedules teacher exchanges between own and other schools.

15. Enables teachers to develop and implement own curriculum and instructional objectives.

16. Enables teachers and/or specialist teachers to identify, understand, and enable the learning needs of instructional aides.

17. Enables reading specialist(s) to identify, understand, and enable the learning needs of classroom teachers.

18. Enables test-oriented staff members to develop individual child focus and understanding.

19. Develops and implements human relations training for the total staff (i.e., "all people in the school who touch the lives of students").

20. Involves and enables the following staff members in specific strategies for developing the positive self-image of students:
   a) physical education teacher(s)
   b) nurse
   c) speech therapist
   d) psychologist
   e) learning disabilities/special education teacher(s)
   f) guidance counselor(s)
   g) librarian(s)
   h) classroom teachers
   i) reading/language arts teachers
j) reading specialist(s)  
k) department chairmen  
l) parent volunteers  

21. Has developed effective qualitative means of assessing individual child needs and causes of poor self-image.

22. Involved the total faculty in pre-planning Right to Read program, and worked with a representative faculty team to write proposal(s).

23. Develops and implements team relationships among staff and:
   a) functions effectively as a member of a staff team
   b) functions effectively as a leader of a staff team
   c) delegates leadership responsibility to member(s) of a staff team

24. Facilitates team relationships among:
   a) self and reading staff
   b) librarian(s) and classroom teachers
   c) librarian(s) and reading specialist(s)
   d) learning disabilities teacher and classroom teachers
   e) aides and reading staff
   f) aides and classroom teachers
g) grade-level teachers

h) counselor(s) and grade-level teachers

i) nurse, counselor, reading specialist(s) and classroom teachers

j) department chairmen and teachers

k) A.P.'s

l) Unit Task Force

25. Schedules reading specialist(s) to share routine supervisory duties with teachers (e.g., bus, playground, corridor, lunchroom, study hall, etc.)

26. Facilitates colleagueship between instructional aides and teaching staff by:
   a) explaining own philosophy of education to aides
   b) defining own expectations for aides
   c) including aides in faculty meetings
   d) including aides in grade-level teacher meetings
   e) including aides in in-service teacher workshops

27. Enacts a mutually supportive colleague relationship with reading specialist(s).
28. Speaks informally with each staff member:
   a) every day
   b) at least once a week

29. Makes self available to and encourages teachers to express their individual problems, needs, feelings and frustrations.

30. Varies role with classroom and specialist teachers from supportive to directive, depending upon individual needs.

31. Uses the following staff as a resource for self:
   a) learning disabilities teacher
   b) guidance counselor
   c) reading specialist(s)
   d) physical education teacher
   e) librarian(s)

32. Participates as a learner in staff in-service workshops.

33. Enacts the role of curriculum supervisor/coordinator.

34. Enacts the following role(s) with the Unit Task Force:
   a) Task Force chairman
   b) Task Force member
   c) catalyst
   d) resource person
   e) liaison (interpretive) between school and Task Force
35. Elicits and makes programmatic use of ideas and suggestions from:
   a) teachers
   b) instructional aides
   c) Unit Task Force
   d) parents
   e) students

36. Delegates leadership responsibility for reading program planning and policy-making to:
   a) parent members of Unit Task Force
   b) reading staff members of Unit Task Force
   c) other staff members of Unit Task Force
   d) student members of Unit Task Force

37. In individual conferences with parents, interprets reading program and child's test results.

38. Plans and implements workshops for parents, specifically:
   a) to enable parents to work with children in the classroom
   b) to enable parents to work with children at home

39. Personally recruits parent volunteers for school program.
11-

S - strength
OK - average performance
W - weakness
NR - not relevant to own role

40. Involves staff in personally recruiting parent volunteers for school program.

41. Personally recruits community people other than parents as volunteers and/or resources for the school.

42. Involves staff in personally recruiting community people other than parents as volunteers and/or resources for the school.

43. Involves professional staff, instructional aides, and parent volunteers in personally communicating the achievements, needs, and objectives of the school to parents and members of the community.

44. Personally "sells" the school by communicating the school program, achievements, and objectives to the community during:

   a) meetings of civic organizations

   b) meetings of business and professional groups

   c) meetings of community groups

   d) PTA meetings

   e) parent workshops

   f) memoes, letters or newsletters to parents

   g) home visits to parents

21
LEADERSHIP CHARACTERISTICS
OF THE PRINCIPAL AS LEADER
OF A RIGHT TO READ PROGRAM

A PROFILE
A SPECIAL COMPETENCE IN HUMAN RELATIONS

The profile of the school principal that emerges from our analysis of 90% of the competency self-ratings of the principals in our project, shows a school leader who feels a special competence in the area of human relations. Making oneself available to teachers to express their individual problems, needs, feelings and frustrations, for example, is the competency rated as a strength by the greatest number of principals (89%). A majority of the principals also help teachers to develop and implement their own curriculum and instructional objectives; and facilitate individual teacher self-evaluation as part of the teacher evaluation process.

Another strength of the group in the area of human relations is the development of team relationships between themselves and the reading staff; between the librarian and the classroom teachers; and between instructional aides and classroom teachers. A majority also feel that they have a mutually supportive colleague relationship with the reading specialist(s).

Humanistic educators are a diverse group, with overlapping concerns and values, but drawn from a wide range of backgrounds, traditions, disciplines, and fields. They agree in putting man, rather than a doctrine or dogma, at the center of their valuing system.

--Paul Nash
Extending their focus on human relations to the student population, a majority of the principals involve and enable classroom teachers, reading and language arts teachers, the reading specialist(s) and the librarian(s) in specific strategies for developing the positive self-image of students. However, only the junior-senior high school principals, as a group, feel that they have successfully implemented human relations training for the total staff (i.e., "all people in the school who touch the lives of students.")

Within the general context of an ease and expertise in the area of human relations, our profile principal nevertheless illustrates some remarkable variations, depending upon school classification, the sex of the principal, the person or group enabled, and the process used. For example, speaking informally with each staff member on a regular basis, an interaction process perceived as a strength by a majority of the principals, was rated in terms of frequency "at least once a week" by junior-senior high school principals and male elementary school principals, and "every day" by 75% of the women elementary principals. Over three-fourths of the principals elicit and make programmatic use of ideas and suggestions from teachers, indicating openness and responsiveness as qualities of their interaction with the teaching staff.
A majority of the women elementary principals also elicit and use ideas and suggestions from Unit Task Force members and parents; and a majority of the junior-senior high school principals and 75% of the women elicit and use ideas and suggestions from students. Male elementary principals, on the other hand, rated themselves average to weak in eliciting and using student ideas and suggestions; but average to strong in eliciting and using ideas and suggestions from instructional aides. Junior-senior high school principals and women elementary principals, however, rated themselves average to weak in eliciting and using ideas and suggestions from instructional aides.

ROLE AND RELATIONSHIPS WITH AIDES, PARENTS, AND THE UNIT TASK FORCE

As the above breakdown of a single competency illustrates, there is variation in performance of the competency—from strong to weak—when certain groups are singled out from the totality of the school community. Frequently, as this breakdown also illustrates, the professional staff receives the full benefit of the principal's attention and expertise; while instructional aides, parents, and Unit Task Force members are groups with whom the principal tends to feel less effective. However, there is also variation among junior-senior high school principals, male elementary school principals, and female elementary school principals in performance of the same competency with the same group. For example, in the area of
This profile is based on the competency self-ratings of 38 principals. Sub-groups referred to are comprised of the following numbers of principals:

- Male elementary principals - 22
- Female elementary principals - 8
- Junior-senior high school principals - 8

51% or more of any group is considered a majority.

Staff development: A majority of the principals recommend and schedule visits to other schools for teachers and the reading specialist(s). A majority of the male elementary principals also arrange school visits for librarians; and half of the junior-senior high school principals do so for their assistant principals. But 65% of the principals do not recommend and schedule visits to other schools for instructional aides.

Similarly, the group rating for promoting peer discussion and performance observation among various groups of school staff is much higher with teachers and members of the reading staff than with instructional aides. Within this consensus, however, junior-senior high school principals and women elementary principals tended to rate themselves higher with teachers and the reading staff and lower with instructional aides than did male elementary principals.

Distinctions between professional staff and instructional aides:

Junior-senior high and women principals least effective with aides.
Nevertheless, 58% of the group feels that facilitating team relationships between instructional aides and classroom teachers is a strength; while approximately the same number of principals rated themselves average in facilitating team relationships among members of the Unit Task Force.

Given the diversity of groups represented by members of the Task Force and its fairly specialized focus on planning and implementing the reading program, enabling the development of the Task Force as a leadership team has been a problem for many principals this year. On a supplementary questionnaire administered to half of the principals in the group, 95% agreed that "parent members of the Unit Task Force tend generally to feel inadequate and unprepared for making decisions about reading"; perhaps explaining why the competency self-ratings of the whole group ranged from average to weak in the case of delegating leadership responsibility for reading program planning and policy-making to parent members of the Unit Task Force, and from average to strong in the case of delegating such responsibility to reading staff members of the Task Force.

The principals' analysis and assessment of their roles on the Unit Task Force are also an indication of the degree to which team relationships actually exist among members of most Task Forces. A majority of the principals—and the same principals, in a majority of the cases—rated their roles as Task Force chairman and Task
Force member as strengths; a duality of function consistent with delegating responsibility for reading program planning and policy-making to the reading staff members of the Task Force. Approximately the same number of principals--and again the same principals, in a majority of the cases--also rated their role as resource person for the Task Force a strength; a supportive function consistent with promoting leadership within the group itself.

Within this consensus, only a third of the junior-senior high school principals rated themselves strong in the role of Task Force chairman; and half of the women elementary principals rated themselves strong--a percentage still smaller than those representing the group consensus and the male elementary principal consensus. A much higher number of women elementary principals rated themselves strong as members of the Task Force (75%) and as resource people for the Task Force (63%) than did male elementary principals and junior-senior high school principals, however.

From these variations it can be seen that women elementary school principals view themselves as more participatory and supportive in their role with the Unit Task Force, and as less directive, than do male elementary principals. Whether in fact this is the case, or wheth-
The role on the Unit Task Force rated as a strength by the largest number of principals (74%), however, is that of liaison (interpretive) between the school and the Task Force; a function that, by definition, indicates distance and a lack of communication between the Task Force group and the school community. Since the school staff members of the Task Force are directly involved in the school program, it seems most likely that it is the parent and community members of the Task Force with whom the principal functions as a liaison—and to whom he interprets the objectives and needs of the school program.

In their personal interviews, from which these competencies were derived, many principals described the role of liaison as a two-way communications process involving the parents' interpretations of community reactions and attitudes toward the school as well as their own inter-
pretation of the school's needs and objectives. Where this is the case, parent and community members of the Task Force are obviously performing a valuable service, by functioning in the community as a kind of public relations group for the school's reading program and by providing regular feedback from the community to the principal and other Task Force members.

The need for better public relations between the school and the community does not obviate the need for parent and community involvement in school program planning and policy-making, however. Where parent and community members of the Task Force are involved in this communications function—with the principal operating as an interpretive liaison between themselves and the school—there is the indication that they remain polarized, both from the school itself and from the other members of the Unit Task Force "team." In terms of providing leadership for the reading program, then, parent and community members of the Task Force may often be what one principal has described as "a rubber stamp action."

Parents, in fact, are the group with whom our profile principal seems to feel least effective. On none of the competencies relating to parents—to the interpersonal relationship between principal and parent, and to the active involvement of parents in the school—was the group consensus a
PRINCIPALS FEEL LEAST EFFECTIVE WITH PARENTS

strength; and on most, the ratings ranged from average to weak, with the junior-senior high school principals tending to rate themselves lower than the elementary school principals.

Interpreting the reading program and their child's test results in individual conferences with parents; communicating the school program and objectives in home visits to parents; recruiting parent volunteers for the school program, and enabling parent volunteers in specific strategies for developing the positive self-image of students -- all are areas of need for the principal of our profile.

Planning and implementing workshops for parents is the greatest area of need, however, since a majority of the principals do not offer workshops to enable parents to work with children in the classroom, or effectively plan and implement workshops to enable parents to work with children at home.

ROLE AND RELATIONSHIPS WITH THE STAFF

The principal of our profile is a good support person for the staff, a role not surprising in a school leader who feels a special competence in the area of human relations. Most principals try to vary their role with classroom and specialist teachers from supportive to directive, depending upon individual needs, but this is not a strength for the majority; and 74% admitted to being "more effective in enabling teachers who need more support than di-
rection" on a supplementary questionnaire administered to half the principals in the group.

The same distinction, in performance ratings, between supportive functions and directive ones is amazingly consistent in our analysis of the competencies describing the principal's role and relationships with staff. The profile of a humanistic school leader emerges—one who is best at enabling others to do their own thing. The weaknesses of our profile principal are, correspondingly, the weaknesses of one who does not prefer to be "the expert," "the model," or "the director." For example, facilitating team relationships among various groups of staff is seen as a strength by a majority of the principals. Similarly, a majority consider delegating leadership responsibility to members of a staff team a strength. A smaller percentage—roughly half the group—also feel that they function effectively as members of a staff team. However, a majority of the principals rated themselves average as leaders of a staff team.

Most humanistic assumptions about the nature of man stem from a basic belief in man as a free creature. This notion of freedom does not imply that human behavior is uncaused, totally random, or uncontrollable, nor does it mean that man is uninfluenced by his environment, his personal history, or his experience. Rather, it means that he is, in the last analysis, able to make significant personal choices, to frame purposes, to initiate actions, and to take a measure of control over his own life. —Paul Nash
Within this consensus, a majority of the male elementary principals also rated themselves average as members of a staff team; a role perceived as a strength by 75% of the women elementary principals. 75% of the women also rated delegating leadership responsibility to staff teams as a strength—a much higher percentage than the male elementary principal consensus. A similar distinction between men and women elementary school principals has already been noted with reference to Unit Task Force team relationships, indicating consistency in the women principals' tendency to perceive themselves as more supportive and participatory in promoting team relationships than do the men. In this case, however, neither the men nor the women rated themselves strong in the directive role of team leader.

Staff development is another area in which our profile principal's preference for supportive functions, rather than directive ones, is clearly discernable. For example, a majority of the principals facilitate staff development by arranging release time for teachers to participate in regularly scheduled in-service workshops, and by including instructional aides in in-service teacher workshops. For more than three-fourths of the group, participation as a learner in staff in-service workshops is also a strength. However, leading workshops for teachers was rated average in performance by the majority.
Planning and implementing workshops for teachers is also not a strength of the group, though ratings ranged from average (the most frequent rating) to strong and from average to weak, depending upon the focus of the workshop. Planning and implementing teacher workshops in curriculum, the use of A-V equipment, and the use of reading centers received higher self-ratings than did workshops in making materials and those dealing with behavior modification.

Within this consensus, 100% of the women elementary principals rated participation as a learner in staff in-service workshops as a strength; and more women rated themselves average as workshop leaders (75%) than did the male elementary principals. For half of the women elementary principals, however, planning and implementing workshops in the use of reading centers is a strength. And almost two-thirds of them rated planning and implementing workshops in curriculum as a strength—a marked difference from the group.

The women principals' greater expertise in the area of curriculum—or greater confidence in expressing such expertise—extends also to the role of curriculum supervisor/coordinator. Half of the women elementary principals rated their performance of this role a strength; whereas the self-ratings were average for a majority of
Comparative data collected in two relatively recent studies reveal several important facts about the employment of women as elementary school principals. The first of these studies was conducted by the National Association of Elementary School Principals. The second was a parallel study conducted in the commonwealth of Virginia for the Virginia Association of Elementary School Principals.

--Only 8.6 percent of the men reported in the Virginia study had ten or more years of experience as elementary school classroom teachers compared to 65.9 percent of the women.

--Concerning their educational preparation, 10.4 percent of the men majored in secondary administration and 30.1 percent majored in general school administration. Evidently, these men had not intended to prepare for the elementary school principalship, because only 2.8 percent of them majored in elementary supervision and curriculum. . . . 34.8 percent of the women majored in elementary school administration, 11.6 percent majored in elementary instruction, and 22.3 percent majored in elementary supervision and curriculum . . .

--Male principals more frequently than female principals tended to dominate the determination of specific instructional methods to be used. Moreover, more women than men worked cooperatively with faculty committees in determining instructional procedures.

--William H. Seawell & Robert Canady
"Where Have All The Women Gone?"
The National Elementary Principal
May/June 1974
the male elementary principals. For the group, also, the directive role of curriculum supervisor/coordinator is not perceived as a strength.

The principal of our profile feels more effective in the role of resource person for the staff. When the resource role is defined as identifying, demonstrating and providing new materials, sources, resources and equipment, a majority of the principals consider their performance of the role a strength. Half of the elementary school principals also believe that they effectively communicate a knowledge of available reading programs and materials to the staff.

However, when the resource role is defined as demonstrating curriculum skills and strategies in the classroom and during staff meetings and in-service workshops, the principals' assessment of their performance ranged from average to weak; with classroom demonstration perceived most frequently as a weakness.

Again our profile principal illustrates the preference for a supportive function—i.e., providing materials and equipment—rather than the directive or demonstrative function of performing as an expert or model. Women elementary principals, however, more frequently rated the supportive function a strength and the demonstrative
MALE ELEMENTARY PRINCIPALS BETTER AT GIVING FEEDBACK TO TEACHERS

function a weakness than the male elementary school principals. Similarly, a majority of the women rated themselves average to weak in providing feedback to teachers based on observation of classroom performance; whereas for a majority of the male elementary principals this evaluative function is seen as a strength.

Even though there is significant variation between the male and female elementary principals in their role and relationships with the staff, there is far more variation between the elementary principals as a group, and the junior-senior high school principals. Much of this difference can be attributed to the larger student population—and therefore, to the larger staff—in the junior and senior high schools. The subject-area specialization of junior and senior high school teachers and the administrative hierarchy of department chairmen and assistant principals are other factors influencing the quality and kind of relationships junior-senior high school principals tend to establish with staff members.

Given these differences in school setting and population, it is not surprising to find the junior-senior high school principal enacting a more managerial role with the teaching staff than is characteristic of the elementary school principal in our project. Delegating responsibility for curriculum supervision/coordination to others, for example,
with the reading specialist(s) a strength

In fact, lack of mutuality and colleagueship seems to characterize the relationship between the junior-senior high school principal and the reading specialist(s).

For example, facilitating a team relationship between themselves and the reading staff is perceived as a leadership strength by a majority of the elementary principals; but not by junior-senior high school principals.

Similarly, using the reading specialist(s) as a resource for themselves is seen as a strength by three-fourths of the elementary principals; whereas junior-senior high school principal ratings ranged from average to weak.

On the other hand, using the guidance counselor(s) as a resource for themselves was rated a strength by 88% of the junior-senior high school principals.

A majority of the junior-senior high school principals also effectively involve and enable classroom teachers, department chairmen, and the guidance counselor(s) in specific strategies for developing the positive self-image of students. Self-ratings with regard to the reading specialist(s), however, were average.

As these examples also illustrate, a colleague relationship with the guidance counselor(s) rather than the read-
is considered a leadership strength by a majority of the junior-senior high school principals; though not by the elementary school principals.

Unlike the elementary principals, therefore, junior-senior high school principals rated themselves average to weak in the role of resource person for the staff, when the resource role is defined as identifying, demonstrating and providing new materials, sources, resources and equipment or effectively communicating a knowledge of available reading programs and materials to the staff; and weak as a resource person, when the role involves actual demonstration of curriculum skills and strategies. Providing feedback to teachers based on observation of classroom performance is another function of the resource role on which junior-senior high school principal ratings ranged from average to weak.

Since a majority of the junior-senior high school principals delegate 50% or more of the reading specialist(s) time to staff development (unlike the elementary principals), one would expect them to be involved in a mutually supportive colleague relationship with the reading specialist(s). For a majority of the junior-senior high school principals, however, this is not the case; though over three-fourths of the elementary principals rated enacting a mutually supportive colleague relationship...
with the reading specialist(s) than with most classroom teachers; while 37% found the reverse to be true. Only two principals stated that they could perceive no difference in the degree of colleagueship characterizing their relationships with classroom teachers and the reading specialist(s).

Often the reading specialist is a recent classroom teacher with expertise in reading or language arts; and this is another factor that may inhibit the relationship between classroom teachers and the reading specialist(s).

A strategy for ameliorating the teachers' resentment of the reading specialist is to schedule the reading specialist to share routine supervisory duties with teachers (e.g., bus, playground, corridor, lunchroom, study hall, etc.) Half of the junior-senior high school principals and a majority of the male elementary principals do not implement this strategy at all, frequently because they consider it inappropriate. However, 75% of the women elementary principals rated scheduling the reading specialist(s) to share routine supervisory duties with teachers as a leadership strength.

THE PUBLIC RELATIONS FUNCTION OF THE PRINCIPAL'S ROLE

Parent and community relationships are not generally leadership strengths of the principal of our profile, as has been shown above in our analysis.
ing specialist(s)—seems characteristic of the junior-senior high school principal, as opposed to the elementary school principal. The junior-senior high school principal's lack of involvement in curriculum may in part explain this difference. Nevertheless, the junior-senior high school reading specialist's role as staff developer would seem to provide a relevant basis for a colleague relationship with the principal.

The mutuality and colleagueship that should characterize the inter-relationships of staff members in a humanistic school community may be threatened when the principal develops stronger colleague relationships with some staff members than others, however; particularly in the smaller and more closely-knit community of the elementary school. For example, where a greater degree of colleagueship and mutuality exists between the principal and the reading specialist(s) than between the principal and the classroom teachers, or vice versa, the reading specialist's efforts to develop an effective enabling relationship with the teachers may be inhibited. On a supplementary questionnaire administered to half the principals in the group, 47% indicated that "there is more mutual problem-solving and colleagueship" in their role

*The distinction is valid only when school setting, as well as the principal's leadership role, is considered; since many elementary schools in our project do not have a guidance counselor on the staff.
of the principal's role and relationships with parents and the Unit Task Force. One would therefore expect the public relations function of the principal's role to be neglected—particularly where it involves a focus beyond that of the normal school community.

This assumption is generally true of the group; however, it is not valid in the case of the male elementary school principal. For example, "selling" the school by communicating the school program, achievements, and objectives during PTA meetings, and in memoes, letters, and newsletters to parents, is seen as a strength by a majority of the principals (and by 75% of the women elementary principals). Whereas, selling the school during meetings of civic organizations, business and professional groups, and community groups, is not a strength of the group; though it is a strength of a majority of the male elementary principals. The ratings of the women elementary principals, on the other hand, ranged from average to weak.

There is the suggestion in these variations that the women elementary principals may have more ease or expertise in communications skills than the male elementary principals; but that they are more reluctant to enact a leadership role in the community—particularly where this would involve them in the predominately male world of civic and professional organizations. Male elementary principals are more at ease in such gatherings; and are able to use their participation as an opportunity for de-
veloping community awareness and support for the school.

Involving the staff in personally communicating the achievements, needs, and objectives of the school to parents and members of the community is good public relations--and an area of need for the principal of our profile. Recruiting community people other than parents as volunteers and/or resources for the school is also an area of need for most of the principals in the group. Women elementary principals, particularly, rated community recruitment as a weakness; whereas ratings of 75% of the junior-senior high school principals were average.

Some Interesting Studies of Differences Between Male and Female Principals

"Sexism in American Schools? Yes... But..." Learning, April 1973, pp. 60-61
A SUMMARY OF THE LEADERSHIP CHARACTERISTICS AND
NEEDS OF THE PRINCIPAL AS LEADER
OF A RIGHT TO READ PROGRAM

The principal of our profile has worked hard to
develop a supportive interpersonal relationship with
each member of the teaching and specialist staff.
He shows respect for the individuality and profes-
sional expertise of teachers by encouraging them to
develop their own curriculum and instructional ob-
jectives; by incorporating their self-evaluation in-
to the teacher evaluation process; and by using their
ideas and suggestions in planning and developing the
school program. Though he is not too comfortable in
a team relationship himself, he facilitates team rela-
tionships among various members of the staff; and
supports teamwork by delegating leadership respon-
sibility to staff teams.

As leader of the Right to Read program, our pro-
file principal is still very much a learner. He
participates as a learner in staff in-service work-
shops, and relies heavily on the reading specialist
as a resource. He also delegates responsibility
for reading program planning and policy-making to
the reading staff members of the Unit Task Force.
Like the parent members of the Task Force, he tends
to feel inadequate and unprepared for making deci-
sions about reading.

In fact, the role of curriculum supervisor is an
ambiguous one for the principal of our profile. He
is good at identifying and providing a variety of
materials and equipment for the staff; he is aware
of available reading programs and materials, and
communicates this knowledge to teachers. However,
he does not generally lead in-service workshops for
the staff; or demonstrate curriculum skills and
strategies in the classroom or in staff meetings
and workshops. Nor does he tend to give concrete
feedback about their classroom performance to teach-
ers. As a curriculum supervisor, therefore, he is
a facilitator rather than an enabler.

*Since approximately four out of five principals
in the group are men, the profile principal is cer-
tainly a "he." Similarly, junior-senior high school
and women elementary principal variations are omit-
ted from this summary.
It is in the area of human relations that our profile principal is most effective as an enabler, as his supportive interpersonal relationships with the teaching staff illustrate. He also involves and enables teachers and the specialist staff in specific strategies for developing the positive self-image of students. However, he has not developed effective qualitative means for assessing individual student needs and causes of a poor self-image.

Processes and instruments for assessing the individual needs and development of students are therefore a major area of need for the principal of our profile—both as an enabler of the teaching staff and as leader of the Right to Read program. More expertise in curriculum, with an emphasis on reading and the integration of reading with other subjects, is another major area of need; so that, in his role as curriculum supervisor and leader of the Right to Read program, the principal may effectively communicate and demonstrate a variety of instructional and program approaches to the teaching of reading, and implement and evaluate the professional development of the staff.

Promoting the active involvement of parents and the community in the education of their children is a third major area of need for the principal of our profile. Since he does not generally recruit parent or community volunteers for the school program or provide workshops to enable parents to work with students in the classroom, planning and implementing a recruitment and training program for parent and community volunteers is a top priority for the principal in his role as leader of the Right to Read program.

The Right to Read leadership competencies fall primarily into the following categories:

LEADERSHIP ROLES AND RELATIONSHIPS (Competencies 22-35)

PARENT/COMMUNITY INTERACTION (Competencies 35-44)

STAFF DEVELOPMENT (Competencies 1-21)

Check your self-ratings by category to determine a priority area of need for further leadership development.
LEADERSHIP ROLES
AND RELATIONSHIPS
Behavioral scientists have studied and debated the various concepts and precepts of "role." The term refers to actions an individual who holds a certain position takes because of expectations held by himself or others. The roles a leader assumes are often determined more by a particular situation, even a crisis, than by the person himself.

---Theodore Kauss

Most of the principals in our program try to vary their role with staff from supportive to directive, depending upon individual needs. Many feel, however, that they are more effective in enabling staff members who need support rather than direction.

Though support and direction are characteristics of two different leadership styles, an effective leader is able to provide both. Flexibility of style helps the school principal to enact the multiple roles of the educational change agent.

The chart on the opposite page, developed by Richard Wallen, classifies leadership characteristics according to three modern leadership types or styles: the "tough battler," the "friendly helper," and the "objective thinker." Which type of leader are you? How flexible is your leadership style?

Although the role of the elementary school principal is extremely diffuse and his credentials are multi-faceted, his success or failure is probably most often determined by his ability to understand and to exercise human interaction skills, the most difficult of which are those that enable him to work effectively with groups. —James C. King

Facilitating team relationships among various groups of staff is seen as a leadership strength by most of the principals in our program. However, many express difficulty in interacting with a team themselves, both as a team leader and as a member of a staff team.

How open and supportive are the staff relationships in your school? How many of the following comments made by new teachers would also characterize the feelings of teachers on your staff?

"Why do older teachers treat new teachers the way they so often do? Maybe they just glory in their seniority. They feel they've earned it. I guess they have. If they feel threatened, which is the reason I've heard suggested, I can't imagine why. Just because they're old?"

"Counselors could be a lot more help if they weren't so busy, if they could give you some time. Because of the discipline problems in my class, I sent a number of kids to the counselor at the beginning of the year. He couldn't do anything with them. Just too busy. Then I'd ask over and over again, 'Please come to the classroom; I don't want to send kids out, but I do need someone to sit in the class for a while and help me out.'"

"I'm so happy with the staff I'm with now that I can't believe it. I work with a principal and a psychologist and people who assume that I have a brain in my head and that I'm not just an
idiot when it comes to handling something. The other teachers give me so much support."

"I think the staff generally takes on a particular kind of attitude and atmosphere to get along with the principal. When there are two or three teachers in a school who are different, they leave. In the school I left, where I was so miserable, the principal didn't like me. I was different."

"In our school district we have a group of staff people--school psychologists, speech teachers, counselors, and the like--who have talked about having some kind of human rights committee. It would be a place where teachers could meet and really talk--air problems and share experiences. Wouldn't that kind of thing be great?"

These teacher comments about "The Staff" come from the National Institute of Mental Health pamphlet Teachers Talk About Their Feelings (ed. Eli M. Bower). Comments of new teachers are also given under the following headings: "That First Year," "The Kids," "The Administration," "The Parents," "The System," and "Themselves as Teachers." Reading and small-group discussion of these direct and open observations might be a good way to help your staff begin to "air problems and share experiences. Wouldn't that kind of thing be great?"

How do you small-group the staff for discussion and interaction? What is your own role with the group? How do you evaluate what happens in the group? The paperback Leadership and Dynamic Group Action, by

For each method discussed there is an itemized set of Characteristics of the method, Reasons for choosing the method, Useful aspects of the method, Instructions for using the method, Instructions for the group leader, Instructions for group members, and Cautions.

Leadership and Dynamic Group Action is published by The Iowa State University Press, Ames, Iowa. Price: $2.95

How do you behave in a group? How do you communicate in a group? How do you listen in a group? These questions and others are dealt with analytically in the paperback Group Processes: An Introduction to Group Dynamics, by Joseph Luft. Dr. Luft is the co-originator of the Johari Window, a graphic model of awareness in interpersonal relations; and there is a "how to" section on using the Johari Window with a group.

The mark of a group is its concern for human emotion. The right to one's own feelings and the right to express them is the keystone. Awareness of the feelings of others has a high premium. The exercise of these rights, so based, creates a profound sense of freedom.

--Joseph Luft

For junior and senior high school principals who are interested in developing staff teams into team teaching clusters, here are two excellent sources for working with the staff:

**What Climate for Team Teaching?** by John McClure is a UCEA case study that narrates the difficulties encountered by a junior high school principal and the members of the science department when they initiate team teaching in their school. In spite of the support of the principal and the creative leadership exercised by the chairman of the science department, problems encountered by the team make the effort a near disaster. The case study is anecdotal, very funny, and very "real." A good discussion focus for planning with the staff--particularly what not to do.

*What Climate for Team Teaching?* may be ordered from The University Council for Educational Administration, 29 West Woodruff Avenue, Columbus, Ohio 43210. Code C-38. Price: 40 cents.

**Focus On The Individual--A Leadership Responsibility,** by J. Lloyd Trump and Lois S. Karasik, is both a filmstrip and a pamphlet. The pamphlet includes the complete script...
Evaluation

To evaluate an innovation, first ask yourself—or your colleagues—why you are undertaking it. If "team teaching" is started only in order to conserve building space (which it can do), the evaluation is simple: Did it save space? More seriously, if the purpose is to have students develop more responsibility for their own learning, evaluation needs to define how students in the team-teaching program demonstrate such responsibility in a way different from that shown by those who are not in the program. Then, collect the proper data for individual students and for the total school population involved. If instruction assistants are employed to save teacher time for more demanding professional activities, evaluation pinpoints what teachers now do that they did not do previously. Comparable questions are raised and answered with reference to all aspects of the innovation.

Second, study the effects of the changes that are made in the educational setting to accomplish a particular purpose. For example, if the goal is to have students read more books, students then need a flexible schedule that includes time in libraries or resource centers where a variety of books are available. Paperback books foster more reading than anthologies or hardbound copies of the same selection. Less formal book reports encourage more reading. The evaluation is simple: How many and what kind are read by individuals in the changed program, as compared with students in conventional programs? If small groups are organized to promote better discussion skills, the teacher collects data on the extent and quality of participation by each individual. Teachers also appraise growth in group sophistication in handling issues and reaching conclusions. Sociometry is used to evaluate changes in group relationships.

Third, evaluate the conditions for learning. Can students hear and see well in large groups? Was the material appropriate? Were the visuals effective? Were the students interested? Did they know what to do in independent study? Were the resources available for independent study adequate? The list could be extended.

Data such as those mentioned are needed for each individual and for all students involved in the innovation. The results then are reported systematically so that pupils, parents, and ultimately colleges and employers know what growth has resulted.

The evaluation of individual pupil progress has three parts: (1) It reports what a student knows and can do; (2) it describes changes in his behavior; and (3) it characterizes the quality of his independent study. Accurate answers to part 1 come from measuring instruments available to students for self-appraisal and from those given periodically by teachers. Part 2 is answered by a variety of observations similar to those suggested earlier in this statement. Part 3 requires the application of scaling techniques. The following items in a scale for evaluating independent study, developed by Dr. W. Max Griffin, suggest student procedures that need to be judged: perceives things to do, personalizes learning, exercises self-discipline, makes use of human and material resources, produces results, and strives for improvement.

As suggested...evaluation must focus on the individual student. Group comparisons may be necessary on occasion, but they must not negate our attention to the personal growth of the individual...

Evaluation also focuses on the individual teacher. How have his activities changed as a result of the innovation? Does he now have better opportunities to exercise his individual skills? His opinions are important, but analyses of performance and behavioral changes are even more significant...

Evaluation, therefore, in all cases requires specific descriptions of purposes, analyses of changes desired, attention to conditions for teaching and learning, collection of relevant data, and careful interpretation of results....The results are studied constantly to produce further improvements in the innovation.

---J. Lloyd Trump and Lois S. Karasik

FOCUS ON THE INDIVIDUAL--A LEADERSHIP RESPONSIBILITY
and the pictures from the filmstrip, as well as concluding sections on "Independent Study," "Larger and Smaller Groups," "The Individual in the Teaching Team," "Flexible Schedules," "Evaluation," and "Educational Facilities."

Focus on the Individual begins by focusing on three high school students whose different needs for motivation and individual attention can be met in the large-group, small-group, and independent study experiences afforded by team teaching. Illustrated suggestions for planning, grouping, and scheduling with the teaching team then follow. Filmstrip and pamphlet are specific and practical, providing a good focus for planning with the staff—particularly what to do.

For yourself . . . For teachers . . . For older students . . .

ROLES AND RELATIONSHIPS: Exploring Attitudes and Values
by Robert Howard

A casebook of questions and exercises that focus on "interaction between a person and his environment, especially in relationship to other persons," Roles and Relationships can be used as a stimulus to individual awareness or group discussion and interaction. Exercises coincide with the chronological stages of life, and lead to developing insights about oneself, one's values and relationships with others. There is lots of space for writing; and a running bibliography of readings that relate to the various questions considered.

Westinghouse Learning Press
Price: $7.00.
Since the interaction of the community, the home, and the school is directly related to reading problems, the first task of the principal is to get to know his community and neighborhood thoroughly in order to understand the specific environmental factors that may be contributing to reading difficulties.

What he hears through the organized, traditional channels, such as long-established clubs and PTA's, is probably only part of the story. It is the inarticulate, invisible, unrepresented parents and their children who are probably in the most desperate need for help.

--Carl B. Smith

Parent/Community Interaction is the priority area of need for further leadership development for most of the principals in our program, as the small number of Right to Read leadership competencies in this category also indicates.

To further evaluate your role performance with parents and the community, rate yourself on the following competencies developed by Bank Street's Program for the Development of the Elementary School Principal as an Educational Leader. Use the same code for self-rating as above:

S - if you feel that the competency is one of your leadership strengths;

OK - if you feel that your performance of the competency is average or adequate;

W - if you do not perform the competency but feel that you should; or if your performance of the competency is below average or ineffective;

NR - if the competency is not relevant to your role or to your school setting.
1. Accurately identifies the characteristics of the community, such as social class(es), community power structure, cultural values, interest groups and pressure groups.

2. Develops survey procedures suitable for assessing the educational needs and expectations indigenous to the community and student population.

3. Proposes educational programs appropriate to identified community and student needs.

4. Analyzes the climate for change in the school-community setting and interprets strategies for change to parents and the community.

5. Effectively enables members of the following groups to share in planning and decision-making for the school:
   a) school staff
   b) parents
   c) school board
   d) community interest and pressure groups

6. Works with staff to develop and implement use of the community and its resources as an extension of the school learning environment.

7. Promotes community use of the school building and facilities.

8. Involves parent and community groups in fund raising for the school.

9. Helps teachers develop a dialogue with parents that involves sharing perceptions of the student's strengths and potential, and planning cooperatively to meet the student's learning needs.
DO YOU HAVE?

TREATING The Role of the
Principal
READING Teacher
Specialist
DIFFICULTIES Administrator

This HEW monograph by Carl B. Smith is the best single sourcebook for principal-administrators of a developmental reading program that we have seen. Emphasis is on the elementary school, but many suggestions, examples, and the sections on the principal's and administrator's roles are equally relevant to the junior and senior high school. Sections are by role, as indicated in the title, and each is a "how to" resource for implementing alternative approaches to reading problems. Case study examples of operant methods and programs in specific schools are given throughout.

The responsibility of the principal, according to Carl B. Smith in Treating Reading Difficulties, is READING AND THE HOME ENVIRONMENT. The following checklist illustrates Dr. Smith's approach to this area of the principal's responsibility:

A Step-By-Step Approach to Change

The principal today is assuming more responsibility for the instructional integrity of his school, for creating the means whereby children can become effective learners, and for counteracting environmental deficits. But how does he proceed in a logical way? Here are some typical steps in establishing programs in reading:

1. Survey the Needs Related to Reading
What factors in the neighborhood may interfere with the reading performance of some, or even all, of the children? Examples are: poor self-image, lack of language
stimulation, non-standard dialect, and negative attitude toward school and authority. Use study committees, questionnaires, and school records to determine these factors.

2. **Assess Resources**
What people, facilities, money, and procedures can you use to act on the needs? Examples are: interested teachers and community groups, temporary buildings, contingency funds and Federal grants, and participation in pilot programs.

3. **Consider Possible Solutions--Programs**
What do research, demonstration programs, or commonsense suggest as ways that will ease the reading problems associated with the environment? Examples are: ungraded classes, homeschool teachers, family library programs, tutors, directed field trips, stimulating materials.

4. **Include the Community in Planning and in Execution**
What groups or individuals should help solve some of the reading problems? Examples are: PTA, local business associations, political pressure groups, professional associations, and interested parents. These people are important not only for generating good will, but also for selling the programs to the community and for finding resources to operate the proposed programs.

5. **Set Specific Objectives**
What should the children (or adults) be able to do as a result of your programs? For example, with a home-school coordinator program, the child and the parent should be able to conduct a simple reading and comprehension exercise after a visit from the coordinator. (Establishing specific objectives becomes important in "selling" the program to others and in evaluating its effectiveness.)

6. **Clarify Operational Procedures**
Who are the people with responsibility and what are the rules for the programs? For example, publicize the leader of the program and the guidelines for its operation. A necessary condition is that the principal must give the program leader freedom to operate. Innovative programs, like innovative teachers, must be free to make mistakes or it is unlikely that anything exciting can happen.

7. **Submit a Proposal**
If the program needs central approval for any reason, write a proposal that describes the first six steps and gives a budget.

8. **Evaluate the Program**
Are the procedures being carried out? Have the objectives been realized to some degree? Be willing to evaluate in terms of the response of the teaching staff, the pupils, and the local community, and use some format measures of achievement.
Planning and implementing a recruitment and training program for community and parent volunteers in the school is a top priority in the area of Parent/Community Interaction for many of the principals in our program. Using the community itself as a resource is also a need for most schools.

An excellent source for the elementary school principal involved in developing such parent and community ties is the May 1973 issue of Learning magazine. The article "Exploring and Exploiting Your Community," by Peter Madden, gives a number of tips on soliciting materials from businessmen, planning field trips, and using community and parent volunteers in the classroom. (We reproduce the last-named section on the following page.) There is also a page of "Free or Low-Cost Resources," with annotations and instructions for ordering.

Another article in this issue of Learning, "Volunteers: Love 'Em or Leave 'Em," by Wanda Gray, is a one-teacher-talks-to-another series of practical suggestions for using volunteers to enrich classroom learning. Ms. Gray's advice that volunteers not be used as academic tutors is worth thinking about. She says: "A common mistake with volunteers is to automatically assign all of them to teach academic skills individually or in small groups. If this is what you need, well and good; don't hesitate to try to find and organize able helpers. But don't overlook the possibility of doing this work yourself if you find others who
It is even easier to get adults into your classroom than it is to get students out of it. You can get a high level of adult participation if you can deal with their natural reluctance to get involved in situations that provoke anxiety. Adults have an overriding fear of looking foolish or inadequate in front of children, especially their own children.

Pave the way. You must provide some initial structure so that the adults know in advance exactly what is expected of them and are prepared to carry that task out correctly. It is essential that they feel successful in their early ventures into classrooms. The easiest way to handle this problem is to prepare job cards for parents unless they are coming into the classroom to do some very personal task, such as show slides of a trip they took. Even in that case it would be wise to visit with the adult this summer and go over the session with him.

Parents in the classroom can tutor individual children (preferably not their own), work with small groups in reading or other academic areas, lead art or music activities with either large or small groups, engage in their own special interests or hobbies with children, show slides, work with motors and tools or any one of a hundred activities that you'll think of when you get to know the parents and their skills.

One of the most valuable things adults can do with children is discuss their own occupations.

But adults can be asked to do more than merely talk about their occupations. One primary grade teacher, Martha Wei of Washington, D.C., has been successful in getting adults into the classroom to "do their own thing" for a period of time. They are not expected to make any kind of presentation to the class; instead, they simply set up shop and model their work. As children become interested, they drift up to watch and ask questions.

Her first such experience involved an artist who spent four days producing an oil painting from scratch. Then a carpenter built a small project in one corner of the classroom. But any number of professional and business people can simply bring the tools of their trade to school for a few hours and work in the classroom.

Local special-interest groups will also make a contribution to your classroom if you invite them. Within my own range of experience, flower and gardening clubs, country dancing groups, local historical associations and professional societies have all volunteered in the past year to work in classrooms.

Senior Citizens. One largely untapped resource is senior citizens, who often have a strong craving for involvement and lots of time. Their recollections and souvenirs could provide the basis for construction activities that would reproduce an earlier culture in your community, including housing, art, clothing, speech, political and social interests and any other areas you can uncover. Old books, photographs and newspapers could lead children to investigations of what people wrote and thought about in an earlier time.

Contrasting studies might be made about the community as it presently exists. Ethnic groups, politics, geography, architecture, education, art and music, commerce, government and religious institutions of the then and now are among the topics that might be investigated. One variation on this community study theme is the exchange of information and classes in other parts of the country. (I will be happy to serve as a middleman for classes that want to share community studies or anything else--with each other. At the moment, I can direct requests to classrooms in North Dakota, Alaska, New York, New Jersey, Illinois and New Mexico. I'm sure others will develop if the interest exists.)

These are only a few of the ways teachers can introduce reality into their classrooms. The materials of reality are all around you, no matter where you teach.

--Peter C. Madden is school psychologist at the Center for Teaching and Learning, University of North Dakota, Grand Forks, North Dakota 58201
can lead art, craft, building or other group projects. While one or two such volunteers guide the group work, you can see children individually. Chances are you are much more able in this area than the volunteer, and his own experience is more rewarding if he works at what he knows best.

Focus in both articles and the resource list is the teacher, so you can duplicate them for distribution to the staff. Ideas are more stimulating when they can be shared and discussed with others, however; so follow up with group or team discussion. (Try the "huddle method."

Don't let your volunteers work in isolation from each other or from the rest of the staff, however. Set up and try to participate yourself in discussion and information-sharing sessions (the Handbook suggests "luncheon meetings") for volunteers, the reading specialist, and the relevant classroom or subject-area teachers.

If your school doesn't have printed guidelines for volunteers, try these, or use them as a starter for making your own.

GUIDELINES FOR VOLUNTEERS

DO:
1. Arrive promptly.
2. Learn names of children quickly.
3. Learn where things are kept.
4. Ask questions freely, about children, procedures, equipment.
5. Share your own experience: tell stories, sing, play an instrument, bring a pet—make the classroom richer for your having been there.
6. Allow children to continue a project as long as they like, if there is no danger to themselves or others, and no destruction of property.
7. Work at the child's level when possible; sit or stand with him. In storytelling, sit beside the child talking, as this helps focus attention on him.
8. Give instructions clearly and be consistent in rewards and punishments.
9. Handle accidents, especially toileting, matter-of-factly and quickly.
10. Speak positively.
11. Warn children ahead of time of a change in activities, such as, "In five minutes it will be time for lunch." Then clean up your area with the children, when you finish.
12. Discuss ideas and suggestions freely, but question the teacher privately if you disagree with anything he asks you to do.

DON'T
1. Belittle a child or make comparisons between children.
2. Hit a child, under any conditions.
3. Visit with other adults while on duty.
4. Do work for children, such as draw pictures for them, tell them answers.
5. Rush the children or nag at them.
6. Hide your feelings from children, but don't use them as weapons.
7. Criticize the teacher to children or to parents. Instead, tell him your criticism.
8. Start projects with children that you can't finish.

--Wanda Gray
"Volunteers: Love 'Em or Leave 'Em"
Involving parents directly in program planning and policy-making for the school is a goal for many schools in our program; although a number of principals privately question the advisability of "parent power"—particularly in the areas of curriculum and instruction.

The experience of most of our principals with parent and community members of the Unit Task Force, however, indicates that parents themselves feel inadequate and unprepared for making programmatic decisions. Orientation and training programs for parents are therefore a prerequisite to developing significant parent involvement in decision-making for the school.

It is also important for parents to "enter the planning stage of a program from the beginning and to continue through the deliberations of every aspect of the program," as Milan B. Dady points out in the Winter 1972 issue of the Journal of Research and Development in Education. "Effective involvement requires on the part of the parents progressively more and more initiating of ideas, more and more assistance in paid or volunteer roles in the school, more and more discussion of problems, and more and more participation in the resolution of the problems. Two parallel developments take place in the participation process: staff's function shifts from professional control to shared planning, and parent responsibility shifts from pro forma approval of staff-originated ideas to genuine involvement."
The role of a parent is the most difficult role anybody undertakes in our society. And the fact that their kids come to your classroom puts them on the defensive. The teacher is the judge of their flesh and blood, the judge of their parenting — what they've made of the kid. Problems make them feel inadequate and guilty. If you can just make a positive relationship with them the first time, if they come to back-to-school night, or if you call them up and say, "Hey, I'm really liking having Johnny in my class," then Johnny thinks it's going to be a great year and the parents do too. And then if there are problems, you can suggest working together to straighten them out and they don't feel you're out to get them.

---Teachers Talk About Their Feelings

If parents do not feel capable of judging curriculum and instructional methods, what do they look for in the school? How do they evaluate the effectiveness of their children's education? What values do they hold? And how will their values affect the direction of the school, if parents are to be actively involved in the planning process?

The following sections from HOW GOOD IS YOUR CHILD'S SCHOOL? A School Evaluation Handbook for Parents (and Students) prepared by the United Bronx Parents association, illustrates what one active parent group feels parents should look for in evaluating their children's school.

Use these questions as a checklist for assessing your own school environment. How would parents in your school community feel, and what would they see, if they followed these guidelines for judging the school?
LOOK AND LISTEN ... TO THE STUDENTS.

Schools are for children.
Teachers are good if they teach children.
Methods are good if they help children.
When you visit the school, watch the children.
Are they interested?
Are they involved?
Are they learning?

VISIT CLASSROOMS

Do the teachers and students like each other?
Are the teachers doing all the talking?
Do teachers and students listen to each other?
Are they learning from each other?
Do they respect each other?

DO THE TEACHERS AND STUDENTS LIKE THE SCHOOL?

Look for smiles.
Not fake smiles, put on just for you.
Real smiles.
Are the secretaries glad to see you?
Are the teachers happy to be in this school?
Are the students bored or angry,
or can you see they like what they are doing?

DOES YOUR SCHOOL GIVE EQUAL EDUCATIONAL OPPORTUNITY TO EVERYONE?

Is every student treated with equal respect?
Or do teachers favor some pupils over others?
Are girls pushed one way and boys another?
That could be discrimination.
Are blacks more likely to be in "slow" classes?
Are whites more likely to get academic honors?
That could be racism.

DOES YOUR SCHOOL PREPARE STUDENTS FOR A REAL WORLD?

Students want to study about war and poverty and pollution.
They want to be prepared for modern jobs.
They want to learn how to survive.
And they want to learn how to improve their world.
Does your school teach them this?

DOES EVERY STUDENT GET THE HELP HE NEEDS?

Look carefully to see how each child is doing.
Are some students "turned off"?
If so, does anyone care?
If a student is doing poorly,
does the school blame him, or help him?
VISIT THE LUNCHROOM

You can learn a lot about the school here.
Is the room clean and pleasant?
Do students have to eat with their coats on?
Are students who get free lunch treated differently?
Do teachers and students eat together?
Do they eat the same food?
Taste the food. Do you like it?
Do the students like it?
Are they forced to take food they don't want?
Look at the garbage cans. Is much food thrown away?
IF CHILDREN ARE NOT TREATED WITH DIGNITY IN THE LUNCHROOM,
YOU CAN BE SURE THE SCHOOL IS HAVING TROUBLE IN THE CLASSROOMS.

HOW GOOD IS YOUR PRINCIPAL?

The key to a good school is a good principal.
A good principal is rarely in his office.
He walks around the school and visits classes.
He wants to know what is happening.
He finds many ways to help his teachers.
He takes time to talk to his students.
He is determined to educate every student in his school.

A GOOD PRINCIPAL WANTS YOUR HELP

A good principal does not run the school alone.
He trusts other people.
He meets often with students and teachers.
He wants their ideas.
He is never satisfied.
He wants to make his school better.
He welcomes your visits and your help.
He does not try to 'brainwash you.
He answers your questions clearly.
He is willing to try new things.

How Good is Your Child's School? may be ordered from United Bronx Parents, 810 East 152 Street, Bronx, New York 10455. Price: $1.00.

STAFF DEVELOPMENT
When the adult is involved as planner in a program being designed to fulfill his needs, he is able to channel his energies into positive personal action. In various training situations—on the job, in-service, and formal education programs—he learns what he chooses to learn. He resists learning which is imposed upon him; he needs to be a participant in the teaching-learning process. His interests and experiences and the relevance of the subject content to them and his goals are the gauges with which he measures the value of the learning situation.

—Hyman Wolotsky

More than half of the principals in our program involved their total faculty in pre-planning a Right to Read program for the school, and worked with a representative faculty team to write the original proposal for funding. Most principals have also participated as learners, along with the staff, in in-service workshops designed to develop skills for implementing the program; and share further program planning responsibilities with reading and other staff members on the Unit Task Force.

Clearly, for many principals the Right to Read program itself has been an impetus to developing colleagueship with the staff, through a shared purpose and focus on professional growth.

It is not surprising, therefore, to find that almost half of the Right to Read leadership competencies are in the area of staff development; and emphasize the development of curriculum and instructional skills through in-service training, peer sharing and support, and an individualized approach to the learning needs of classroom teachers and instructional aides.
IMPLEMENTING TEACHER EVALUATION BY OBJECTIVES

Helping teachers to develop their own curriculum and instructional objectives, and facilitating individual teacher self-evaluation as part of the teacher evaluation process, are leadership strengths for more than half of the principals in our program. Through their support of innovation and independence on the part of their teachers, these principals illustrate a humanistic approach to educational leadership.

Depending upon the community and district in which their schools are located, however, they may also illustrate a degree of risk-taking. "The fact is that if the principal does become the educational leader, his school and teachers are apt to develop an independence which is threatening . . ." and he "is apt to find himself threatened in one way or another from above," as a teacher comments in Henry F. Wolcott's excellent 'ethnography' of the American public school principal, The Man in the Principal's Office.

Risk-taking by the teacher is also involved in any genuine expression of professional need or planned change in classroom performance. No matter how open and supportive the principal's relationships with teachers may be, "The principal represents authority, lets teachers know

DO YOU HAVE?

THE PERSON: His Development Throughout The Life Cycle
by Théodore Lidz

A basic textbook that traces the development of the human personality from infancy through the middle years and old age, The Person is a good source for understanding both the child and the adult as a learner. New York: Basic Books, Inc., 1968. ~ Price: $10.00.
Much in present-day school life contributes to a neurotic process, especially when the individual is treated as an object of learning to be molded, shaped, prodded, pushed, and then rewarded or punished. Whenever lessons of learning are dictated and imposed, whenever a person is classified and labeled, whenever he is plotted on a chart and compared, he is being violated as a unique being and is being forced to take a path of conformity or to go underground.

--Clark Moustakas
Teaching as Learning

He's supposed to evaluate me but he's never observed me teaching, never once. A vice-principal or visiting principal would come in but my principal would sign the evaluation. They write up all these stupid things that have nothing whatsoever to do with you as a teacher. It's all so much nonsense.

--Teachers Talk About Their Feelings
what they must and must not do, and usually is in a position to play a
major role in determining whether they will be promoted, retained, or
dismissed," as the recent CRM sourcebook *Educational Psychology: A Con-
temporary View* (1973) points out.

A teacher evaluation process in which teachers themselves estab-
lish individual needs and/or change strategies as objectives—with the
guidance and support of the principal—and are then regularly observed
and assessed by the principal on the basis of their development toward
these objectives, thus involves mutual risk-taking by the principal and
the teaching staff. Its successful implementation depends upon a clim-
ate of trust in which teachers are supportive of each other's efforts
to change, and feel confident of the principal's support against criti-
cisms that change may bring.

How do you implement teacher evaluation by objectives gradually?
For principals who use an evaluation checklist, here is a process based
upon a suggestion by James H. Murphy, a principal in Bank Street's Pro-
gram for the Development of the Elementary School Principal as an Edu-
cational Leader:

**During an individual conference with each teacher**
**in June:**

1. Ask each teacher to select one category or sub-
division on the checklist that she feels repre-
sents her greatest need for growth or development.

2. Be honest in sharing your own input during the
selection process.

3. Agree to observe and assess the teacher in this
area only during the following school year.
4. Help the teacher develop relevant objectives in this area of need. Since most checklist items are objectives, you can focus with her on the most relevant checklist items in this subdivision; and/or develop others.

5. Help the teacher develop specific change strategies for each objective.

6. Ask the teacher to write out objectives and strategies agreed upon.

7. Follow up the conference with your written agreement to observe and evaluate the teacher in the category or subdivision specified, in terms of the objectives and strategies agreed upon. Attach teacher's objectives and strategies. This is your "performance contract" with the teacher.

During the following school year:

1. Observe each teacher regularly, in different activities at different times of day.

2. Confer with each teacher at least three times during the year, to ask for her self-evaluation of development toward objectives and to share your observations and suggestions.

3. Follow up each conference with a written summary of what was said and/or agreed to.

During an individual conference with each teacher in June:

1. Ask for the teacher's self-evaluation and suggestions of needs for further change or development.

2. Share your assessment of the teacher's development and your own suggestions for further growth.

3. On the basis of your mutual perceptions, help the teacher select objectives for the following year. You can refer back to the checklist for these; but in most cases the year's experience and shared input will already have pinpointed them.

4. Ask each teacher for a written self-evaluation of the year's development in the category or subdivision specified; and her objectives for the following year.

5. Write your evaluation of each teacher's development in the category or subdivision specified; attach to teacher self-evaluation. Initial or otherwise indicate your agreement with the teacher's objectives for the following year.
Almost all of the principals in our program use the required district or county evaluation checklist as the basis for formal evaluation of non-tenured teachers. Since most principals (and teachers) complain that the checklist items are ambiguous and often irrelevant to the developmental programs and individualized focus they support in their schools, it is obvious that other criteria actually determine how the principal observes and evaluates his teachers.

To develop a climate of trust in which teachers feel free to admit their needs and change or innovate approaches to working with students, it is essential that the principal's own philosophy, values, and expectations for teachers be clearly spelled out.

For principals who prefer a one-page checklist but find their district checklist inadequate, the Wichita Public Schools Evaluation Check List reproduced on the following page has the humanistic orientation preferred by most of the principals in our program.

The Richmond Public Schools instruments for assessing classroom teachers, librarians, and guidance counselors—which follow the Wichita Check List (pages 62-70)—are more geared to individualized evaluation. Each instrument has a final section in which evaluatees state their own objectives for the school year, and evaluators indicate their approval of the objectives and their assessment of the evaluatees' achievements on objectives at the end of the year. Checklist subdivisions are objectives, and focus specifically on interaction with students, humanizing the learning environment, and supporting the reading program. Checklist items in each subdivision are actually competencies.

### Evaluation Check List

The activities that should be considered as subcategories of the five major areas include but are not necessarily limited to those shown below.

Place a check mark in the appropriate column to indicate only those factors that are outstanding or in need of improvement. If a factor is not marked, it is assumed that performance in that area is satisfactory.

### Performance Criteria

#### I. HUMANIZING OF INSTRUCTION
1. Knows the academic strengths and weaknesses of each child.
2. Knows the home and community environment of each child.
3. Treats each child as an individual in accordance with his needs.
4. Understands and appreciates each child as an individual of worth.
5. Helps each child to recognize his potential, to develop his abilities, and to assume his responsibilities as a member of the group.

#### II. PROVIDING FOR INDIVIDUAL DIFFERENCES
1. Provides different subject matter and learning experiences for individuals with different abilities and/or past achievement.
2. Provides opportunities for pupils to work independently on meaningful tasks that derive from and contribute to the planned activities of the group.

#### III. ORGANIZING AND IMPLEMENTING LEARNING ACTIVITIES TO ACHIEVE SPECIFIC PURPOSES
1. Develops needed skills.
2. Builds understanding of specific concepts.
4. Emphasizes the application of knowledge to new situations.
5. Evaluates progress of students.
6. Uses appropriate instructional materials and other resources.

#### IV. PROVIDING FAVORABLE PSYCHOLOGICAL ENVIRONMENT
1. Develops and uses questioning techniques that require pupils to employ the higher cognitive processes as well as to demonstrate retention and comprehension.
2. Encourages pupils to express their ideas in group discussions and other creative ways.
3. Involves pupils in planning and conducting class activities under the guidance and direction of the teacher.

#### V. DEMONSTRATING PROFESSIONAL TRAITS
1. Displays accuracy.
2. Maintains a good working relationship with others.
3. Exhibits dependability in assignments.
4. Recognizes and accepts responsibilities.
5. Accepts suggestions and adapts to change.
6. Respects rights of others.
7. Uses discretion in conversations regarding students, parents, and colleagues.
8. Exercises self-control.
9. Exhibits sincere personal concern for students.
10. Communicates effectively with students.
11. Is competent in subject matter assigned to teach.
12. Maintains and exhibits results of own professional growth.
13. Uses methods in addition to the required reporting procedures to inform parents regarding progress of students.
14. Provides opportunities and guidance in helping students become independent learners and thinkers.
15. Maintains discipline conducive to learning.

VI. PROVIDING FOR TEACHING OF READING (Elementary Teachers and Secondary Reading Teachers only)
1. Supports the reading program developed for school.
2. Understands the reading program and its basic components:
   a) the skills it comprises
   b) the sequential and developmental nature of the process
   c) the sequential and developmental nature of children's learning.
3. Implements a planned reading program based on students' identified needs; continuing to diagnose and prescribe as levels of achievement change.
4. Evaluates their total reading program in light of pupil achievement, improved attitudes, and application to learning in other areas.

VII. PROVIDING FOR TEACHING OF READING (Content Area Teachers only)
1. Supports the reading program that has been developed for the school.
2. Understands the reading program and its basic components:
   a) the skills it comprises
   b) the sequential and developmental nature of the process
   c) the sequential and developmental nature of children's learning.
3. Assesses the learning environment he controls, diagnosing and planning for specific reading needs in his area.
4. Implements an instructional program where multi-level reading and concept development is planned and encouraged.
5. Strives for increased proficiency in instruction through trying to utilize better reading techniques to help students achieve.
6. Evaluates the total program of instruction based on improved attitudes and student achievement.
Part II

The form is designed to assist the EVALUATOR and EVALUATEE in formulating and in recording an accurate appraisal of the evaluatee's performance through a two-way procedure. In recognition of the fact that each person is an individual who must function as a team member, the opportunity to relate individual job objectives to system-wide objectives is provided for in Part II of the plan. The EVALUATEE should state at least three (3) objectives which relate to the categories in Part I for the approval of the EVALUATOR in the fall conference. The achievement of these objectives will be evaluated at the spring conference and will be a portion of the annual overall performance evaluation.

OBJECTIVES. Objectives should identify desired results, conditions under which activity expected to occur, time frame, and how attainment of objective will be determined. Example:

Objective #1: To develop a profile of the learning assets and liabilities of each student by the end of the first semester by analyzing cumulative record and conducting individual conference with each student. The results will be used as instructional guides during the second semester.

ASSESSMENT OF LIBRARIAN PERFORMANCE

RICHMOND PUBLIC SCHOOLS

MARK: (O) Outstanding
(A) Above Average
(S) Satisfactory

Part I

(N) Needs Improvement
(U) Unsatisfactory
(N/A) Not Applicable

Performance Criteria

I. HUMANIZING OF INSTRUCTION

1. Understands and appreciates each child as an individual of worth.
2. Works with each child according to his needs and on his academic level.

II. PROVIDING FOR INDIVIDUAL DIFFERENCES

1. Provides a variety of media on all levels to meet individual differences.
2. Maintains scheduling which allows for individual as well as group use of media center.

III. USING APPROPRIATE INSTRUCTIONAL MATERIALS AND OTHER RESOURCES

1. Works with faculty to provide a media center adequate in instructional materials and other resources.
2. Involves both faculty and students in ordering materials for the media center.
3. Shows knowledge of sources and availability of new and needed materials.
4. Is aware of standards and works toward meeting them.

IV. ORGANIZING AND IMPLEMENTING LEARNING ACTIVITIES

1. Sees that materials are well housed, catalogued, and easily available to all.
2. Budgets time and keeps library schedule flowing smoothly.
3. Sees that materials are promptly made available.
4. Is efficient in securing materials.

V. PROVIDING FAVORABLE PSYCHOLOGICAL ENVIRONMENT

1. Provides pleasant and stimulating environment for learning.
2. Offers opportunities for display and encouragement of student work.

VI. SUPPORTING THE READING PROGRAM

A. Supports the reading program that has been developed for the schools.
1. Speaks positively about the reading program to teachers, supervisors, administrators, and others.
2. Encourages teachers in their use of the program or its extension whenever the occasion arises.
3. Uses his field of endeavor to the utmost to support the program and help wherever possible.

Evaluator's comments:
B. Understands the reading program

1. The skills it comprises.
2. The sequential and developmental nature of the process.
3. The sequential and developmental nature of learning.
4. Attends reading in-service workshops to learn more about the program.
5. Examines program literature and teachers' manuals for a better understanding of the program and of the skills and techniques involved.

C. Takes responsibility for students meeting with success in learning to read.

1. Visits classrooms, consults with teachers and others, to find out where support and help can be given.
2. Encourages, where practical, others under his charge to find ways to support the program and help children meet with success.

VII. DEMONSTRATING PROFESSIONAL TRAITS

1. Displays accuracy.
2. Maintains a good working relationship with others.
3. Exhibits dependability in assignments.
4. Demonstrates cooperation.
5. Recognizes and accepts responsibilities.
6. Is efficient in carrying out assignments.
7. Accepts suggestions and adapts to change.
8. Respects rights of others.
9. Uses discretion in conversations regarding students, parents, and colleagues.
11. Exhibits sincere personal concern for students.
12. Communicates effectively with students.
13. Maintains and exhibits results of own professional growth.
14. Provides opportunities and guidance in helping students become independent learners and thinkers.
15. Maintains discipline conducive to learning.

Part II

The form is designed to assist the EVALUATOR and EVALUATEE in formulating and in recording an accurate appraisal of the evaluatee's performance through a two-way procedure. In recognition of the fact that each person is an individual who must function as a team member, the opportunity to relate individual job objectives to system-wide objectives is provided for in Part II of the plan. The EVALUATEE should state at least
three (3) objectives which relate to the categories in Part I for the approval of the EVALUATOR in the fall conference. The achievement of these objectives will be evaluated at the spring conference and will be a portion of the annual overall performance evaluation.

OBJECTIVES. Objectives should identify desired results, conditions under which activity expected to occur, time frame, and how attainment of objectives will be determined. Example:

Objective #1: To increase use of library during second semester over the first semester by designing a questionnaire for students to complete to survey the range of interests. The objective will be considered to be achieved if circulation increases by ten percent the second semester.

5. Examines program literature and teachers' manuals for a better understanding of the program and of the skills and techniques involved.

C. Takes responsibility for students meeting with success in learning to read.
   1. Visits classrooms, consults with teachers and others to find out where support and help can be given.
   2. Encourages, where practical, others under his charge to find ways to support the program and help children meet with success.

IV. DEMONSTRATING RELATIONS WITH PARENTS
   1. Is cooperative with parents.
   2. Is available to parents.
   3. Has a professional image among parents.
   4. Promotes and participates in parent conferences with teachers and administrators.
   5. Uses methods in addition to the required reporting procedures to inform parents regarding progress of students.

V. DEMONSTRATING RELATIONS WITH TEACHERS
   1. Understands the role of the teacher.
   2. Communicates effectively with the teacher.
   3. Is receptive to teachers' suggestions.
   4. Is professional in communication with and about teachers.

VI. DEMONSTRATING RELATIONS WITH ADMINISTRATORS
   1. Is cognizant of the role of the administrator.
   2. Communicates effectively with administrators.
   3. Attends to administrative referrals.
   4. Upholds administrative decisions in a professional manner.

VII. DEMONSTRATING RELATIONS WITHIN THE DEPARTMENT
   1. Is cooperative with other counselors.
   2. Is conscientious about maintaining accurate up-to-date reports and records.
   3. Assumes leadership in assigned tasks.
   4. Is willing to assume necessary after-hour responsibilities.
   5. Is cooperative in efforts to improve guidance services within the school.
   6. Takes initiative in cooperative activities.
   7. Maintains effective working relationship with other supportive pupil personnel staff members, i.e., nurses, psychologists, visiting teachers, etc.
Part II

The form is designed to assist the EVALUATOR and EVALUATEE in formulating and in recording an accurate appraisal of the evaluatee's performance through a two-way procedure. In recognition of the fact that each person is an individual who must function as a team member, the opportunity to relate individual job objectives to system-wide objectives is provided for in Part II of the plan. The EVALUATEE should state at least three (3) objectives which relate to the categories in Part I for the approval of the EVALUATOR in the fall conference. The achievement of these objectives will be evaluated at the spring conference and will be a portion of the annual overall performance evaluation.

OBJECTIVES. Objectives should identify desired results, conditions under which activity expected to occur, time frame, and how attainment of objective will be determined. Example:

Objective #1: To improve students' understanding of interpersonal relationships by producing three packets of materials which can be used as basis for role-playing in group work. Achievement of objective to be determined by written evaluation of students at end of activity.
PLANNING STAFF DEVELOPMENT ACTIVITIES TO SUPPORT TEACHER EVALUATION BY OBJECTIVES

As you implement teacher evaluation by objectives, staff development activities should be problem-centered and reality-based. Grouping of teachers on the basis of common objectives will encourage peer sharing and support. However, adult learners also need to be involved in exercises or activities that relate directly to their own experiences.

Three kinds of staff development activities that are reality-based and can be selected on the basis of problems relevant to the objectives of your teachers, are the case study, the simulation exercise, and the simulation game.

The case study is a narrative description of a real problem situation, in which only names and other specific reference points have been

changed. Cases may be written or filmed, and vary in length and complexity of subject. The focus of the case study is generally the decision-maker—or decision-makers, if the narrative includes more than one area of the school setting. Frequently the problem situation is left unresolved, allowing for group discussion on the basis of "what would you do?" Similarly, case studies may be organized in sections, to allow for discussion of "what would you do at this point?" at various stages of the action.

The value of the case study as a staff development exercise is that it lets teachers analyze familiar problems in another school setting; and through associating with the decision-maker, take into consideration the broad range of interest and pressure groups in the school community.

Although the simulation exercise may be based upon a real incident, it is a fictionalized narrative or scenario—a "simulation of reality." Unlike the case study, the simulation generally programs the participant toward a "right" or "preferable" course of action or problem solution. Simulation exercises may be simple scripts of a single incident; or they may be extremely complex (and expensive)—covering a broad span of time and a whole school system, and utilizing such varied media as film, video and audio tapes, written case studies, in-basket exercises, etc. Opportunities for role-playing are included in the simulation exercise, whether simple or complex.

The value of the simulation exercise as a staff development activity is that it allows teachers to participate directly in the problem situation by role-playing; and through exchanging roles, to associate
with different members of the school community by acting out their needs and values.

The simulation game is a simulation exercise in which role-playing participants compete—generally as teams, though sometimes as individuals. The best games involve cooperation as well as competition, through team sharing in decision-making and through whole-group evaluation of outcomes. The value of the simulation game as a staff development exercise, therefore, is that it allows teachers to participate as group or team members in shared problem analysis and decision-making.

In an atmosphere of freedom and trust where individuals are valued, fully accepted, and respected, the group becomes its own best resource and serves as the primary basis for emerging insights and for the resolution of problems. The leader initially creates the atmosphere and provides the occasion for learning... he initiates a structure in which expressions of the real self occur, the individuality of the learner flourishes, and each member of the group becomes fully alive and growing. Once the leader fulfills his initial responsibility, the group functions on its own and he becomes a learner, too.

--Clark Houstakas
Teaching as Learning

The annual UCEA Instructional Materials Catalog lists a wide variety of case studies, simulations and games, with helpful annotations. UCEA focuses exclusively on the administrator, however, so materials should be carefully scanned for their relevance and adaptability to teacher involvement in problem-solving. The case studies are more geared to staff development use than the games and simulations, since many feature teachers as major figures in the action.
Among the UCEA case studies that deal with problems mentioned by principals in our program are the following:

**Was the Assignment Unreasonable?** by Frederic W. Yocum, reports the chain of events beginning with the assignment of an extracurricular duty to a secondary school teacher through the period of litigation resulting from the teacher's refusal to accept the "unreasonable assignment"—i.e., sponsor of the boys' bowling club. Highlighted is the extent of the involvement of members of the community and school staff, as well as the role of the local news media. (5 pages.) Code C-21. Price: 40 cents.

**Big City Loses a Teacher**, edited by Kenneth McIntyre, takes place in an urban elementary school in a bilingual setting. The decision-maker is a "new" principal; the focus is a fifth grade teacher with special problems in relating to minorities students and maintaining control; and the central issue is corporal punishment. The public relations function of the principal is highlighted. (10 pages.) Code C-2. Price: 40 cents.

**The French Club Lightbulb Sale**, by John McLure. An influential, but otherwise undistinguished, eighth grade French student proposes a French Club lightbulb sale and a rather creative way to spend the unexpectedly large amount of money it produces. This proposal, along with the principal's action of spending most of the money outside of the French Club, presents problems for the sponsoring teacher. Student motivation is an interesting highlight. (5 pages.) Code C-37. Price: 40 cents.

**Motivating Underprivileged Negro Students in Northton:** A Study in Frustration, by John J. Horvat, describes the frustration felt by a high school business teacher and her principal as their efforts to help some of the school's underprivileged students help themselves are blocked by legal restrictions applicable to all families receiving welfare payments. With the support of the principal, the teacher has provided her advanced students with work experiences designed to help them overcome their defeatist attitudes and lack of "success" motivation. Despite evidence that the program is achieving some of its goals, outside factors which seem to be beyond the control of the school system and its staff work to negate the efforts of principal...
and teacher. The supportive relationship between the principal and a dynamic and innovative teacher is well portrayed. (6 pages.) Code C-30. Price: 40 cents.

Unemployed, by Principal Norman Hyatt of Salt Lake City, focuses upon the leadership style of an elementary school principal as she works with a teacher having special problems with curriculum and instruction. A tri-dimensional view of the case is presented: events are described in terms of the principal's perceptions, the teacher's perceptions, and the perceptions of the author in his role as an officer of the local teacher's association. The case has implications for administrative behavior, instructional leadership, and the in-service training of teachers. (10 pages.) Code C-5. Price: 40 cents.

The Guide to Simulations/Games for Education and Training (1973), by David W. Zuckerman and Robert E. Horn, is a vast and comprehensive sourcebook of available games and simulation exercises, classified by subject area (e.g., ecology, mathematics, social studies, etc.) and annotated in great detail by the authors. Teachers will also find it a stimulating source for discovering games that can be used effectively with students.

We reproduce the authors' descriptions of five teacher-training simulation games, for possible use as staff development activities, on the following pages.

UCEA case studies and the free Instructional Materials Catalog may be ordered from the University Council for Educational Administration, 29 West Woodruff Avenue, Columbus, Ohio 43210.

Actionanalysis: A Series of Simulation Games

Summary Description

Roles:
- Players represent two levels of individual, plus observers and a game master.
- Players should rotate through all roles.

Objectives:
- To adhere to assumed roles and behaviors or attitudes.

Decisions:
- How to reflect a given behavior.
- Whether roles were played authentically.
- How situation was handled by the role-players.
- Different ways of coping with same situation.

Purpose:
- To prepare individuals for precise performance in their occupational roles.

Cost: $25.00

Producer: Randa, Inc.
P. O. Box 143
Old Beth Page, Long Island, New York 11704

Teacher Student Interaction Game I

Summary Description

Roles:
- Each player rotates between four roles: teacher, student, supervisor, discussion leader.

Objectives:
- Within their assigned role and attitude, students try to teach and students to learn, supervisors try to evaluate the teacher's effectiveness.

Purpose:
- To provide an opportunity for players to experience teacher-student interaction, evaluate teaching methods, and discuss teaching theory.

Cost: Full time professional, part time applied to those who require.

Producer: Randa, Inc.
P. O. Box 143
Old Beth Page, L. I., N. Y., 11704

Page 76
Teaching Strategy

John E. Hashbrouk, in consultation with c. 1971 staff of National Teacher Education Project

Playing Data

Age Level: In most cases played with professional and volunteer teachers, however, can be played with teacher and class (elementary-adult).

Special Prerequisites: Some understanding of concept development and behavioral objectives of Player.

Number of Players: 2 to 12, optimum 12 to 24, maximum 4 to 8 teams.

Playing Time: 20 to 30 minutes.

Preparation Time: 1 hour.

Materials: Players' manuals, Administrator's manual, tokens, cards, playing forms.

Special Equipment: Suggest overhead projector or chalkboard.

Object: Interactive within teams, emphasis on cooperative problem solving.

Play involves strategic thinking. "Successful" play is not a factor of self-satisfaction with the learning achieved; there are no points or winners. Players are assigned equal resources in the basic game; through this may be varied to reflect the fact that some teachers have more time and energy to expend in some situations than others. Chance determines which problem cards are received, but outcomes are chance free.

By playing Teaching Strategy it is possible to have students of varying age levels become players of Teaching Strategy in order to participate more fully in subsequent teacher-student planning sessions.

Comment (Continued)

for the classroom, it provides, therefore, a laboratory to test out various styles of teaching and can be played repeatedly with great profit.

NIP should be contacted for evaluation and field test information.

Summary Description

Roles: Not applicable.

Objectives: To arrive at a teaching strategy by drawing cards within 20 to 30 minutes, to be able to produce a suggested plan for teaching in a fifty-minute period, plan to include at least 3 steps, and will take when teaching.

Decisions: Unknown.

Purposes: To assist volunteer and professional teachers to discover their own preferred teaching styles and how to use them effectively. By playing Teaching Strategy, the teacher becomes familiar with the variety of sequences possible for preparing a teaching session. After playing the game, each player should be able to identify the elements in teaching strategies, prepare a logical sequence for teaching a given concept, and describe a variety of approaches available to teachers, with related resources. It is possible, uniquely, to have students of varying age levels become players of Teaching Strategy in order to participate more fully in subsequent teacher-student planning sessions.

Cost: Contact NIP for evaluation and field test information.

Producer: National Teacher Education Project; 6047 East Macdonald Drive, Scottsdale, Arizona 85255.

Human Relations: One Dimension of Teaching

David B. Ritchie 1971

Playing Data

Age Level: College, continuing education.

Number of Players: 1 to Unlimited.

Playing Time: 1 hour.

Preparation Time: 1 to 30 hours, 3 major components can use 1, 2, or 3.

Materials: Magnetic tape, film, background materials, information on individual pupils, critical incidents.

Special Equipment: Phonograph, slidestrip projector.

Objectives: To develop better decision making capability.

Comment (Continued)

A deterministic game with qualitative outcomes; play is by individuals in assigned roles; play involves decision making and strategic thinking.

Summary Description

Roles: A beginning (elementary) teacher in an inner-city school.

Objectives: To develop better decision making capability.

Decisions: Unknown.

Purposes: To help the student develop better decision making capability; To help the student identify those principles and guidelines that make for effective professional behavior.

Cost: not established.

Producer: Center for Innovation in Teacher Education, School of Education, Indiana University, Bloomington, Ind 47401.
High School

James S. Coleman and Constance Russell  c. 1971
Academic Games Associates, Inc.

Playing Data

Age Level: High School
- College
- Graduate School
- Teachers

Number of Players: 4 to 8

Playing Time: 1 1/2 to 3 hours

Preparation Time: 1 hour including reading manual

Material:
Components: Administrator’s manual
- Dice
- Board
- Tokens
- Playing forms

Supplementary Material: supplementary readings suggested

Comment

A. Interactive game for either individuals or teams, both competition and cooperation are built in, and either may be encouraged by differ game set-ups. Play involves strategic thinking, bargaining, coalition formation, and a limited degree of role playing.

To begin play, certain game parameters -- student abilities, the value climate -- may either be determined by the administrator or decided upon by students, the role of chance in this decision process varies with the manner in which the game is administered. During play, chance influences players’ advancement along the activity routes; they role specially marked dice related to their ability profiles and run the risk of certain chance spaces.

Game outcomes are in the form of esteem points, earned through achievement in activities that are valued by the peer culture, the parent culture, and/or the individual player. Qualitative outcomes are coalitions, varying degrees of competition or conflict, and the possibility of empathy for previously unexperienced student roles. Players are not assigned equal resources before play begins: student profiles specify ability levels (high, medium, or low) in each of three school activities (academic, athletic, social). These may be easily varied so that an entirely homogeneous or highly divergent student population may be created. Personality characteristics within roles are not specified, but personality characteristics may be developed by the administrator or the players themselves.

Obseration of play indicates that strategic thinking is the major determinant of successful play. However, because players may negotiate friendship exchanges, some degree of interpersonal competence should tend to maximize scores.

One of the game’s unique features is the potential for varying game input: student profiles may be easily varied, different combinations of parent and peer value climates may be employed, reward structures may be varied by limiting the “room at the top” in some types of activities, achievement in academics and athletics may either be positively or negatively linked to social status. This potential for variation increases the value of HIGH SCHOOL for repeated play and for research purposes.

Comment (Continued)

The “world view” behind this game is that students in high school are constrained by the social parameters of the high school. The school, as a social institution, influences students not merely through what goes on, but also by the very structure of the institution. Many of these restraints are difficult to understand and verbalize, and so are accepted unconsciously by students and teachers alike.

Through playing HIGH SCHOOL, however, it is hoped that some of these social parameters may be brought into focus, so that they may be rationally and critically examined. While no explicit behavioral changes are suggested by the game, it does recognize man as capable of acting on his environment, as well as being acted upon by it. Thus, although a player may not be able to escape the social environment, he can maximize his gains within it by understanding it and behaving accordingly.

The model incorporates Coleman’s theoretical formulations based on his data as well as some basic sociological concepts (the social self, reference group theory, exchange theory, intra-group vs. inter-group competition). It is hoped that play of the game will facilitate understanding of the social-structural parameters that influence the behavior of students in a high school setting.

Summary Description

Roles:
- Players represent students in high school
- Teams represent different high schools. Different social climates may be created and results of several game plays representing different high schools compared.

Objectives:
- For players, to win the most esteem points
- It may be set up so that teams (schools) are in competition with each other. In this case the school with the highest total points for all players would be the winner.

Decisions:
- Players decide which activities to invest their time in, from the three activities represented on their gameboard. Players may also decide who they would like to be their friends (signified by the exchange of friendship chips). There may be some group decisions, such as whether or not athletes should be helped in their academic work so that they can spend more time in athletics advancing the team marker toward a goal. Athletes also decide which goal to strive for.

Purposes:
- The game is based on James Coleman’s study of the social system of the high school (Adolescent Society, 1961). The model incorporates Coleman’s theoretical formulations based on his data as well as some basic sociological concepts (the social self, reference group theory, exchange theory, intra-group vs. inter-group competition). It is hoped that play of the game will facilitate understanding of the social-structural parameters that influence the behavior of students in a high school setting.

Cost: No selling price yet established

Producer: Not published but can be played by contacting Academic Games Associates, Inc.
430 E. 33rd Street
Baltimore, Maryland 21218
Knowledge about the learner is the basis for determining which learning opportunities are appropriate and necessary. A teacher needs to have knowledge about the status of the learner; i.e., his current needs, interests, and abilities. Such knowledge is a product of the evaluative process.

--Daniel M. Purdom

I had to sit down with my principal on this pilot evaluation thing, and it was pretend and yet for real. He has these great objectives--every teacher has to know the level the kid's achieving at when he comes to you and you have to know how much growth has taken place at the end. Great, but I have 40 kids in my first period... I said, "Until you can get class size down, I won't sign this." We were kidding but he knew I meant it. He has all these great objectives that I as a teacher can't fulfill.

---Teachers Talk About Their Feelings
HELPING THE STAFF DEVELOP INDIVIDUAL STUDENT ASSESSMENT

Helping test-oriented staff members acquire an individual student focus has been a problem for most of the principals in our program this year. Similarly, developing effective means for assessing the individual learning needs and growth of students is a major objective shared by our principals and their teachers as they continue to implement the Right to Read program in their schools.

Step one in the process of helping the staff develop individual student assessment, is to be able to illustrate effectively why standardized normative group tests do not accurately measure individual ability.

An excellent and inexpensive source to share with test-oriented staff members (and parents!) is Deborah Meier's *Reading Failure and the Tests*—a position paper published by The Workshop Center for Open Education in New York City. Ms. Meier classifies the inequities of standardized normative group reading tests under the following headings: "Language Dialect," "Class Bias," "Conformity Bias," "Early Reading Bias," "Speed Bias," "Emotional Bias," and "Teacher Strategy Bias." Each bias is analyzed in clear, forthright language; and many are illustrated by excerpts from the MAT and the California Reading Achievement battery. The scoring of standardized tests is also explained; and alternatives to reading tests are suggested.

*Reading Failure and the Tests* may be ordered from the Workshop Center for Open Education, 6 Shepard Hall, City College, Convent Avenue and 140th Street, New York, New York 10031. Price: $0.75. A position paper on *Evaluation* is also available at $2.00.
In the scene below, "Mary's books will get wet in the rain" is the correct answer. But, said many children, surely she would not let her books get wet. Look how happy she is. She must have them covered, although this detail cannot be ascertained from the picture. Most children selected one of two wrong answers: "The rain will not hurt the books" or "Mary is taking good care of the books." I arrived at the right answer only through devious adult logic: If the children were right, two answers would be valid. Two answers cannot be right on a standardized test. Therefore Mary's books are not covered!

Two other children engaged in a verbal battle over the drawing of a lady shopping. "The man weighs the fruit before Mother buys it" (the correct answer) couldn't be right, according to one girl. "Where will Mother put the fruit he's weighing? She's already carrying one bag that is too full." Her classmate tried to demonstrate how Mother could carry another bag. The first girl remained unconvinced.

Whatever weaknesses their answers might have, greater reading skill, no matter how we defined it, would not have helped these children avoid their mistakes.

These are examples, which can be found over and over again, of children penalized for the very qualities one most dearly treasures in them: their dogged determination to make sense of the written word, to use their own experiences, to trust their own good sense, to respect the values of their families.

--Deborah Meier
Reading Failure and the Tests
Individual student assessment is a continuous process, however, as Daniel Purdom explains in the IDEA monograph Exploring the Nongraded School; and "consequently, it is a time-consuming task. To make it more feasible to evaluate each individual continuously, the purchase and use of as many self-assessing instruments and materials as possible are recommended. The learner should be given much of the responsibility and many of the necessary tools for this self-evaluation. Not only does this technique promote implementation of the evaluative program, but it also seems to be consistent with the desire for each individual to be self-reliant."

Two inexpensive sources of a variety of student self-assessment instruments for elementary principals to share with the staff, are the PRS report The Principal as Educator, published by the Center for Urban Education in New York City, and the paperback Recording Children's Progress, by Joan Dean.

The Principal as Educator focuses on the principal of an inner-city school who enacts the role of the "head teacher." Her relationships with students, parents, and the teaching staff are explored. The instructional program centers around reading; and after the first grade, grouping of children is by reading ability, as determined by standardized tests. Ongoing individual assessment allows for intra-class "streaming" during the year, however. The Principal as Educator includes some excellent reproductions of student assessment and self-assessment instruments, one of which we reprint on the following page.

**This Week I Was Especially Curious About:**

**Next Week I Would Especially Like to Learn:**

---from The Principal as Educator
Recording Children's Progress is a more comprehensive source of individual assessment instruments, since its focus is record-keeping in the modern British primary school. Examples, illustrations, and clear explanations of school records, teachers' records, and student self-assessment records for older and younger children are included. We reproduce one of the self-assessment record sheets for younger children on the following page.

The Principal as Educator may be ordered from ERIC Document Reproduction Service, Post Office Drawer 0, Bethesda, Maryland 20014. Price: $3.29 (hardcover).

Recording Children's Progress is published by Citation Press (Library and Trade Division, Scholastic Magazines, Inc.), New York. Price: $1.75.

Individual student assessment of reading—including record-keeping by the student—is well-detailed and illustrated in Treating Reading Difficulties, by Carl B. Smith, in the section on "Correcting Reading Problems in the Classroom." Several individual skills checklists, for students of any age, are also included. A "Taxonomy of Reading Skills," with suggestions for worksheet, group, and individual activities for developing each skill, concludes the final section of the monograph. (To order, see the discussion of Treating Reading Difficulties above, pages 45-47.)

For junior and senior high school principals, the section "Using Evaluation" in Guiding Learning in the Secondary School, by John W. Renır et al, is a helpful source—both for analyzing the inadequacies of traditional tests and measures (e.g., standardized tests, published content tests, teacher-made tests), and for helping the staff develop an individual student focus. The following questions are suggested as bases

---from Recording Children's Progress
for individual student evaluation:

1. Is the student able to adequately identify the problem he is attempting to solve? Can he outline clearly his investigative approach?

2. Does the student properly organize and describe the information he has found pertaining to his problem?

3. When the student studies the information he has gathered pertaining to his problem, can he accurately determine what theses that information will substantiate?

4. Is the student able to draw conclusions pertaining to his problem from the information he has gained in his investigation?

5. Is the student capable of approaching another problem, using the conclusions drawn from the investigation of a previous problem?

The authors of Guiding Learning in the Secondary School also advocate student self-evaluation, but advise that it take the form of a joint inquiry by teacher and student. Criteria for the joint approach to student evaluation are given, and related to a sample study lesson on the Constitution that utilizes the inquiry method.

For principals with teaching teams, the individual assessment and evaluation of students in team teaching clusters is outlined above, on page 41, in the section "Evaluation" from Focus on the Individual—A Leadership Responsibility, by J. Lloyd Trump and Lois Kerasik. Individual record-keeping for teachers in teaching teams is also well-illustrated in Recording Children's Progress.
ARE YOU INTERESTED IN CHANGING YOUR PRESENT GRADING SYSTEM?

Assessment and evaluation—of the school program, of teachers, and of students—is generally an area of need for the principals in our program. As a result, there are few competencies relating to assessment and evaluation in the set of Right to Read leadership competencies.

To further evaluate your role performance in the area of program, teacher, and student assessment and evaluation, rate yourself on the following competencies developed by Bank Street's Program for the Development of the Elementary School Principal as an Educational Leader. Use the same code for self-rating as above:

S - if you feel that the competency is one of your leadership strengths;

OK - if you feel that your performance of the competency is average or adequate;

W - if you do not perform the competency but feel that you should; or if your performance of the competency is below average or ineffective;

NR - if the competency is not relevant to your role or to your school setting.
1. Works with parents, teachers, and other school personnel to develop goals and objectives for the school.

2. Analyzes the climate for change in the school setting and outlines strategies for change to teachers and other school personnel.

3. Enables teachers and other school personnel to implement strategies for carrying out school objectives.

4. Works with teachers and other school personnel to develop and implement an assessment program for measuring the school's effectiveness.

5. Helps teaching staff develop procedures for:
   a) diagnosing the learning needs of students
   b) diagnosing the learning styles of students
   c) identifying the special strengths, needs, abilities and interests of students.

6. Helps teaching staff develop record keeping and assessment procedures for evaluating individual student learning.

7. Gives feedback to teachers based on regular observation of classroom role performance and student interaction.

8. Identifies those aspects of a teacher's performance in need of development and suggests alternative approaches to improvement.

9. Identifies and provides consultants in areas of staff need.
HELPING THE STAFF DEVELOP
AN EFFECTIVE ENVIRONMENT FOR READING

A rich human environment characterizes most of the schools in our program. A rich learning environment is still a need in many schools, however.

In our interviews with the principals in our program—from which the Right to Read leadership competencies were derived—no principal discussed working with the staff to develop the school environment. Competencies defining this function of the principal's role are therefore not included among the Right to Read leadership competencies.

To help you evaluate your own role in developing the learning environment in your school, competencies in this area developed by Bank Street's Program for the Development of the Elementary School Principal as an Educational Leader are listed on the opposite page. Use the same code for self-rating as above.

Since a rich learning environment in the school provides an effective environment for reading, our second administrative seminar for the participants in our program—held at Bank Street College in February 1974—focused on school and classroom learning environments. The principals and their curriculum or reading coordinators were able to gather ideas and materials for enriching the environment in their own schools by visiting and observing in Bank Street's School for Children, several of the schools of principals in the Program for the Development of the Elementary School as an Educational Leader, and the Freeport (N.Y.) High School of Right to Read Principal William McElroy.
1. Works with the staff to develop alternative uses of space and staff-student groupings, to provide a variety of settings for learning.

2. Works with the staff to develop an aesthetically stimulating school environment that includes the qualitative selection and display of:
   a) students' work;
   b) traditional and contemporary artworks in a variety of media (e.g., painting, sculpture, collage, mobile, etc.)
   c) such natural elements as plants, animals, fossils, minerals, etc. for tactile and other experiential learning activities.

3. Works with the staff to develop a multi-cultural perspective in the environment and learning experiences of the student (e.g., in school displays, assemblies, and special events; language arts and social studies curricula; bilingual education; etc.)

4. Works with the staff to develop an emphasis on contemporary life and problems (e.g., war, poverty, racism, pollution, sex education, consumer protection, etc.) in the school environment and learning experiences of the student.

5. Plans and implements a program of student activities, both during and after school, to offer a variety of options for students in terms of their individual interests and abilities.

6. Works with staff and students to develop shared responsibility for the care and maintenance of the total physical environment.
SOME THOUGHTS ABOUT SKILLS

As principals, ask yourselves—what do our children need in our school, and what would be nice to teach them if we could afford it? When skills take over and word recognition becomes an end in itself, you lose the whole essence of reading.

You cannot neglect skills, but you must balance your program by emphasizing all three of these topics: skills, comprehension ability, and critical thinking.

Phonics
There is a general trend towards over-teaching of phonics. Just remember, 'a little dab will do you!' Over-teaching of phonics can cause students to lose meaning and speed. Phonics is better with spelling than reading anyway, and as for decoding—that's pure exercise.

Comprehension skills
Yes, these are important, but wouldn't it be better to discuss comprehension abilities? Comprehension does not mean an automatic response, and besides, there are two types of reading materials—discourse and non-discourse—which call for different skills. Discourse is the world of fact, information, and logical judgment. There is a difference between the reading of discourse, which is logical, analyzable, and verifiable, and the reading of non-discourse, which is an aesthetic ordering. In discourse, you can test for verifiability, but in non-discourse, in stories and poems, you cannot test. Stories and poems are built on relationships, thoughts, and feelings, and the test is not verification. Above all, we must help our children to read fiction critically. A balanced reading program contains opportunities to understand and experience both types.

Critical reading
We need to teach quite early that no writer ever says everything about every subject. Though the writer seems to be nowhere on the printed page, he is everywhere from what he brings to it. Also, the writer is going to do everything in his power to get you going where he wants you to go, and it is the reader who must choose whether he wants to go there or not.

--Dr. Leland B. Jacobs,
From an address at the Winter Right to Read Administrative Seminar, Bank Street College, February 1974
The following questions, suggested by language arts consultant Miriam Marecek (our Program Associate), may be used as a checklist for assessing the reading environment in your school. A list of "Things That Kids Will Read," prepared by Ms. Marecek, also follows.

---Are there intimate and inviting reading areas throughout the school building--in hallways, corners, entrance or waiting areas, stairway landings--and in every classroom? Is a variety of reading materials attractively displayed in each area?

---Does the environment offer reading materials that reflect the students' backgrounds, interests, and abilities? Are there books at all reading levels?

---Is there ample evidence of students' writings and other "products" on display throughout the school building and in every classroom? Is their work displayed with dignity?

---Is the library comfortable for browsing, and are students at all times allowed to go in and enjoy books and other media?

---Are films, filmstrips, tapes, and other non-print media available in the library?

---Does an emphasis on reading permeate the total curriculum? Is there articulation between grades and subject areas?
--Are music, singing, films, and the graphic arts integrated with the activity of reading?

--Do teachers read stories and poetry to students every day? Do you?

--Do students have some opportunity to work in pairs or in small groups? Do they read and share materials of real interest with their friends?

--Are older children sometimes paired as helpers with younger children?

Things That Kids Will Read

1. Advertisements, posters, programs from theaters and concerts.
2. Automobile manuals.
3. Telephone directories.
4. Road maps; brochures from travel agencies.
5. Buttons; stickers; decals.
6. Menues; cookbooks.
7. Catalogues; almanacs; world records.
8. Plane, bus, and train schedules.
9. TV guides.
10. Labels from packages.
11. "How to" manuals on macramé, knitting, woodworking, painting, electricity, etc.
12. Collections of plastic models--with directions.

13. Puzzles; games of chess, checkers, dominoes, monopoly--with directions.

14. Wilderness survival guides.

15. Yoga manuals.

16. News--a variety of newspapers and magazines, some in foreign languages.

17. Comic books.

18. Song books; sheet music.

19. Lists of top records.

20. Greeting cards.

22. Comparative price lists from various materials.

23. Other students' writing--on bulletin boards; in student-made books.

24. Matchbook collections.

25. Lots and lots and lots of paperback books.
In addition to providing "things that kids will read," how can you help teachers turn students on to books? The following list of suggestions for you to share with the staff was prepared by three of the participants in our program: Principals Breck Alexander and John Conyers, and Reading Specialist Connie Wood.

1. A designated time for reading—everyone in the entire school reads "anything and everything" during this time. All activity ceases except reading.

2. Student newspaper.

3. Student diaries.

4. Student-made books—upper-grade students make books using high-frequency words, and illustrate them; then give them to younger students.

5. Artist-in-Residence programs.

6. RIF (Reading Is Fundamental program), Smithsonian Institute.

7. Before-school and after-school reading lab service.

8. Lots of field trips, and follow-up reports by students.

9. A photography club—students photograph each other, and write about it.

10. Creative dramatics.

11. Choral readings.

12. Parent involvement—suggestions to parents to buy books and read with children at home.

13. Senior citizens—share talents (quilting, whittling, etc.) and read to students.

14. Special story times for pre-school children.

15. Story times for older students—read aloud to them, dramatizing parts of stories to make literature "come alive."

16. Bulletin boards—have students design displays relating to stories read in class.
If your role as resource person for the staff is similar to that of most of the principals in our program, you are continually adding to your knowledge of available reading programs and materials, and passing on your findings to the staff. Here is a list of unusual and highly motivational reading programs for you to preview, if you are not already familiar with them.

SOME PROGRAMS WORTH LOOKING AT
prepared by
Miriam Marecek

For elementary school readers:

World of Language - Follett Education Corp.
1010 West Washington Blvd.
Chicago, Illinois 60607

Composing Language - Macmillan Publishing Co., Inc.
100 Brown Street
Riverside, New Jersey 08075

Language Experiences in Early Childhood - Encyclopedia Britannica
425 North Michigan Avenue
Chicago, Illinois 60611

Box 3623
Glendale, Ca. 91201

For junior and senior high school readers:

Language of Man - Includes "Man in the Fictional Mode"
"Man in the Poetic Mode"
"Man in the Dramatic Mode"
"Man in the Expository Mode"
- McDougal Littell & Co.
Box 1667
Evanston, Illinois 60204

Go-Reading in the Content Area - For the junior high "hard to reach" reader; focuses on the areas of literature, social studies, mathematics, and science
(Go-Reading in the Content Area) - Scholastic Press
50 West 44th Street
New York, N. Y. 10036

Tempo Series - Includes "Changing"
"Off-Beat"
"Up from Zero"
"Free and Easy"

- Low-readability level materials with high interest relevanv for the disinterested adolescent reader;
- accompanying skills program motivates peer group sharing and discussion

- Macmillan Publishing Co., Inc.
100 Brown Street
Riverside, New Jersey 08075

Other individualized reading programs and kits:

One to One - Practical individualized reading program conceived and developed by Dr. Leland B. Jacobs
- Prentice-Hall Publishers
Englewood Cliffs, New Jersey 07632

Individualized Reading Program - Scholastic Magazines
902 Sylan Avenue
Englewood Cliffs, New Jersey 07632

Interaction - Cards of activities that students can do individually, with a partner, in small groups or in large groups
- Houghton Mifflin
551 - 5th Avenue
New York, New York 10017

Children are really pretty good readers before they come to school. They read the expressions on the faces of their family and friends. They read buildings, knowing which is a store, a church, a home, etc. They can read plants, knowing flowers, vegetables, weeds, etc. So you can truthfully say--you really know how to 'read' many things. But these black marks on paper are reading too and it's not so easy, but I'm going to help you.

--Leland B. Jacobs
EVERYBODY ALWAYS KEEPS BUGGING ME TO CHANGE THE WAY I LOOK...

MY MOTHER NAGS ME TO PUT ON SOME CLEAN CLOTHES...

MY OLD MAN SAYS I LOOK LIKE AN UNMADE BED...

MY BEST FRIEND, CHICO, STOPPED TALKING TO ME...
MY OTHER FRIENDS VOTED ME "SLOB OF THE YEAR"...

YESTERDAY THE TEACHER LOCKED ME OUT OF CLASS...

AND MY GIRL, NINA, SAID IF I DIDN'T CHANGE MY IMAGE, SHE'D SPLIT...

SO I FINALLY DECIDED TO TAKE THEIR ADVICE...

I BOUGHT A NEW HEADBAND.
TOWARD A COMPETENCY-BASED PERFORMANCE OF THE EDUCATIONAL LEADERSHIP ROLE

SELF-DEVELOPMENT

113
In the foregoing pages we have developed a profile of the educational leadership role based upon personal interviews with 36 principals of elementary, junior high, and senior high schools with first-year Right to Read programs. To help you assess and evaluate your own role performance as leader of a Right to Read program, we have analyzed the functions of the educational leader as follows: Leadership Roles and Relationships; Parent/Community Interaction; and Staff Development. Competencies defining each function appear as self-rating instruments on the following pages:

**LEADERSHIP ROLES AND RELATIONSHIPS:** Pages 4-11 (Competencies 22-35)

**PARENT/COMMUNITY INTERACTION:** Pages 4-11 (Competencies 35-44)

**STAFF DEVELOPMENT**

a) General: Pages 4-11 (Competencies 1-21)

b) Assessment and Evaluation: Page 88

c) Enriching the School Learning Environment: Page 90

Since our interviews and our training program for the principals in our program focused primarily on educational leadership, administrative and management functions of the principal's role have not been dealt with. So that your evaluation of your own role performance may be more comprehensive, however, we include competencies defining PLANT MANAGEMENT AND SUPERVISION and FINANCIAL ADMINISTRATION functions—developed by Bank Street's Program for the Development of the Elementary School Principal as an Educational Leader—on the following pages. Use the same code for self-rating as above.
PLANT MANAGEMENT AND SUPERVISION

1. Interprets and enacts the basic principles of school law, specific legal mandates, decisions of the courts, and regulations and decisions of the Commissioner of Education, as they apply to the principal's responsibilities in such areas as pupil attendance, curriculum, personnel administration, plant operation, and safety.

2. Knows and utilizes district regulations and union contracts with respect to personnel policies and procedures.

3. Personally recruits competent staff, including paraprofessionals.

4. Involves staff members and parents in the personnel selection process.

5. Develops and implements a daily schedule for classes, students, and staff that provides for efficient and effective maximum use of the physical space and facilities.

6. Supervises and coordinates the services of the school service staffs, including the custodial staff, secretarial staff, lunchroom staff, school aides, and parent volunteers.

7. Arranges for substitutes and class coverage for teacher absences, "prep" periods, release time, etc.

8. Periodically inspects the physical plant and initiates and carries out procedures to improve, modify, and/or make repairs.

9. Works with staff to develop and implement a safety program for the school.

10. Works with staff to develop procedures for reporting and handling emergency and accident situations.

11. Works with central administration, supervisory personnel, and other principals to promote mutual sharing of ideas, problems, expertise, resources, personnel, etc.
FINANCIAL ADMINISTRATION AND DEVELOPMENT

1. Cooperates with central administration and with school staff in preparing a budget that is responsive to program, staff, and building needs.

2. Administers the fiscal operations of the school within established budgetary guidelines.

3. Maintains fiscal records and files and appropriate financial reports.

4. Orders or requisitions supplies, equipment, and materials.

5. Establishes and maintains inventories and records on the equipment, supplies, and materials in the building.

6. Facilitates planning for the school that anticipates future building and equipment requirements.

7. Acquires federal, state, and foundation support for extending and enriching the learning opportunities for students, by keeping abreast of the trends and viable sources of educational funding and--

   a) writing proposals

   b) involving staff and parents in writing proposals.

8. Involves parents and community groups in fund raising for the school.
To determine a priority area of need for your own leadership development, check your competency self-ratings by role function. The function under which you have listed the greatest number of "W" and "OK" ratings is your priority area of need.

From the competencies rated "W" and "OK" in this area, select those that represent the most immediate needs in terms of your staff and school-community setting.

From this group of competencies, choose two or three that you feel most committed to performing in terms of your own role as school leader. These competencies are your leadership objectives for the year.

For each leadership objective, itemize the strategies—that is, the specific means or activities—that you will follow to achieve the objective. Then establish a specific time for implementing each strategy, so that you will be able to assess your achievement of the objective in terms of what should be done when.

Not all leadership objectives will have a one-year time line. Some can be accomplished in a month or two; while others will require two, three, or even five years. The number of strategies you have found to be necessary for achieving the objective, and the total time estimated for implementing them, will determine the over-all time line for your objective.
Periodic assessment of each leadership objective should be in terms of individual strategies, and the time you have allocated for implementing them. Evaluation of the objective is in terms of the total number of strategies implemented, within the time line estimated for achievement of the objective.

To illustrate the development of competencies into leadership objectives with strategies and a time line for assessment and evaluation, here are three examples of objectives developed by principals in our program during our third administrative seminar in April 1974.

Leadership Objective: To involve Unit Task Force parent and community members as volunteers in the reading program. By December 1974.

Strategy 1 -- Call a meeting of the Task Force for a general discussion of our reading program - September 20th.

Strategy 2 -- Establish schedule for parent and community members to observe in classrooms - by October 1st.

Strategy 3 -- Call a general meeting to discuss reading activities they observed - October 15th.

Strategy 4 -- Conference with each member individually to determine area they prefer to work in - by November 1st.

Strategy 5 -- Conference with each member and classroom teacher to work out member's participation in the program - by November 15th.

Strategy 6 -- General meeting to discuss progress and evaluate - December.
Leadership Objective: To develop inner-school awareness, interaction of staff, idea sharing. September-June, 1975.

Strategy 1 -- I will schedule staff meetings in classrooms on a regular basis -- each Tuesday morning at 8:10 -- classroom meeting place assigned one week in advance of meeting date -- throughout the year.

Strategy 2 -- I will schedule myself into classrooms on a regular basis -- two classrooms per week -- by September 15th.

Strategy 3 -- I will schedule grade-level small group idea exchanges at noontime luncheons on a regular basis -- one per month -- by September 15th.

Strategy 4 -- I will include summary mention of ideas, presentations, teacher's name, etc. in weekly bulletin to parents -- i.e., include this as an item in the bulletin that is now being issued.

Strategy 5 -- I will compile the weekly summaries into an "Idea Handbook" to be issued by the close of the school year.

Leadership Objective: To involve community leaders in the school, in an effort to inform them of the Right to Read Special Reading Project. By June 1974.

Strategy 1 -- Determine community organization leaders.

Strategy 2 -- Invite specific leaders for general school visitation and luncheon at school. Discuss the Right to Read Special Reading Project objectives. By end of April.

Strategy 3 -- Follow up luncheon with phone calls to each community leader. Encourage each one to come back to school for classroom visit and observation. Schedule classroom visits. May 1974.

Strategy 4 -- Meet with each community leader after classroom observation (or follow up with phone call), to discuss their observations -- also program techniques being used by teacher. Try to provide an opportunity for interaction with instructional leaders. Encourage leaders to disseminate information and observations to their organization members. May 1974.

Finding the time for new priorities is a major concern for most principals as they begin to formulate leadership objectives. Step one in freeing time for new priorities is to acknowledge current priorities. How you spend your time is the actual definition of your leadership role. Therefore, how you spend your time is the best indication of your current priorities.

To help you assess your current priorities in terms of the weekly expenditure of your time, we include a Principal's Log—developed by the participants and staff of Bank Street's Program for the Development of the Elementary School Principal as an Educational Leader—on the following pages. If you fill out the Log at the end of a typical week, you will be able to see what percentage of your time is spent in each of the following functions: PLANNING, ORGANIZATION AND MANAGEMENT TASKS, STAFF DEVELOPMENT TASKS, and COMMUNITY AND PUBLIC RELATIONS TASKS.

Most of the principals who have used the Log have discovered that they spend more time on Planning, Organization and Management Tasks than on Staff Development and Community and Public Relations Tasks combined. Objectives for the development of the educational leadership role, however, tend to fall in the areas of staff development and parent/community interaction.

Freeing time from routine operations and management tasks is generally a question of delegating them.
--to your secretary, for example, and helping her delegate her more routine tasks to a paraprofessional, a student aide, or a parent or community volunteer;

--to your assistant principal or curriculum coordinator, perhaps by exchanging them for some of his classroom observation and curriculum supervision responsibilities.

--to a parent or community volunteer; e.g., a senior citizen with time to give and previous job experience in business administration, management, or accounting.

Frequently, freeing time for new priorities is accomplished by scheduling an hour or two a day away from the telephone, except for genuine emergencies.

Most significantly, however, or so the principals in our leadership development programs tell us, the way to find time for your leadership objectives is: do them!

I define leadership as the human response to the needs of a social matrix which enables it to become--to be--more fully. I find quality in leadership when, either in the rap of the moment or the deep mists of time, it improves the human condition.

The new leader may speak from an alternative program in education, from the establishment of the school system, or from the university without walls; but he speaks for today. ...Radical change is the identity of today--as myriad and unequivocal as the demands of minorities, the poor, youth, and women for a liberation that leaders in education have failed to offer them. Thus, change is the imperative we must live by, if we are to survive.

--Gordon J. Klopf
**PRINCIPAL'S LOG**

This log of your activities should be filled out at the end of a typical week. Decide each task that you did during the week, fill in the number of times you performed the task, and the total amount of time you spent on the task during the week. You should include all tasks that you did this week, including any work done at home or away from school. If your task is not listed on the log, please write them in at the end of the Log under "Other."

A NOTE ABOUT THE
BANK STREET COLLEGE OF EDUCATION
RIGHT TO READ ADMINISTRATIVE LEADERSHIP PROGRAM

The basic premise of the Right to Read Administrative Leadership Program conducted by Bank Street College of Education was that the school principal is the instructional and curriculum leader in his school. The program was designed to be an experiential approach to leadership development.

During the academic year 1973-74, Bank Street College developed and conducted a training program for 46 principal administrators (36 elementary and 10 secondary) located in 14 states. Training experiences were designed, relevant to the individual needs of each of the participants. School sites were visited and analyzed, and principals were interviewed individually to analyze his or her own role and to determine his or her leadership needs.

Nine "small group" seminars in the field involved principals and administrative staff in problem solving, role playing, reading workshops (e.g., how to create an enriched learning environment), and other experiential activities. Emphasis was also placed on the principal's leadership role with parents in the community, particularly in the development of reading program planning and responsibilities of the Unit Task Force -- representative staff, parent, community group mandated under the national Right to Read program. In addition to the seminars, Bank Street staff conducted in-service workshops at many school sites to aid the principal in strengthening his or her school's staff development program.
The Bank Street Right to Read Administrative Leadership Program had as an objective also the development of this resource book for distribution to all Right to Read principals. Developing the Leadership Role was conceived and written to reflect the program's individualized approach to development of the principal as an educational leader responsible for administration of his or her Right to Read program, for its programmatic substance, and for its staff's training.

APPENDIX:

THE PRINCIPAL'S BOOKCASE

In our Right to Read Administrative Leadership Program we stressed the role of the principal as a reader. During his opening address to the participants in our program, Bank Street's Dean Gordon J. Klopf spoke of the principal's office as a resource for reading, and of the principal himself as one who continually shares books, articles, and ideas gleaned from his own reading with the staff, students, and parents in his school community.

From this perspective the following, highly selective listing of books and periodicals is offered in illustration of the kinds of reading materials one might expect to find in the principal's bookcase.

TEN MODERN CLASSICS
For Re-reading and Renewal

Reading--of self, others, and the printed word--is the focus in this first-person recollection of the author's experiences teaching Maori children in New Zealand. The trial-and-error development of her Creative Teaching Scheme, with its key vocabulary of words that are a "book" of direct experiential meaning and emotional significance for the child, is a primer for all educators committed to 'individualized instruction.'

Surely the shortest, clearest, and soundest rationale for experiential education--by its foremost proponent.

Human development viewed as psychosocial, and classified in eight progressive stages from infancy through old age. Ego conflicts defining each stage are a revelation and a guide to the educator of children and adults.

A perceptive and impassioned eulogy of the adolescent personality—and a bleak analysis of the public school system that stifles it. School criticism is easy to come by nowadays, but the author's tenderly analytical, often anecdotal descriptions of adolescents are worth re- and re-reading, for renewal of our own adolescent integrity.

The controversial study of ethnic minorities and their efforts to maintain distinct identities in the mainstream of American urban life.

Or, how to find out today what's happening tomorrow. This impeccable 'class' journal of research, scholarship, and current practice in education is a first-class weathervane of trends and issues in the field. "Must" reading for the educational change agent.

The pioneer model of the modern free school. Neill's views on education vs. teaching kids to take tests make valuable re-reading today, particularly in light of the known inequities of the "standardized" tests by which we judge our children's learning.

The six stages of cognitive development in children, as first explicated by the maverick originator of "genetic epistemology."

Lessons in humanism by a model enabler of self-actualization in others. A warm, loving, inspirational account of the development of the author's practice and theory of 'client-centered' psychotherapy, written for the layman.

The problems of social change, and leadership for change, related to the creation of social "settings"—from marriage to large-scale organizations and social systems. A brilliant and cautionary perspective on the realities of effecting change in schools and other social arenas, by the author of *The Culture of the School and the Problem of Change*.

AND TWO RECENT STUDIES

Of Specific Relevance to Schoolpeople

Hard-hitting essays with an experiential focus define the racial stereotypes and prejudices that pervade American society, and introduce the educator to the cultural values and defenses of black American, Puerto Rican, Chicano, native American, and Asian American children. Essays directed to the teacher (Part II) are loaded with valuable teaching strategies and programmatic suggestions: but they should be previewed and selected with care for the teacher who is ready to learn from them. These are all trenchant writings—and tough.

The role of the major foundations—and by implication, of American business and industry—in determining what kinds of changes shall be made in the ed biz.
PLUS TWO
Especially for Parents

The title speaks for the contents—a result of the author's 15-year struggle to make the public schools effective enough to educate her five children. Both informed and informative, this detailed blueprint for action is for sharing with parents who really want to become involved in school change—by principals who really want their involvement.

A sweeping overview of the American school scene, followed by brief, informative, pungent definitions of the various positions and schools of thought characterizing modern schools and the critics of modern schools. A good, though rather tongue-in-cheek primer for parents (and others) who have slept through the past 15 years of 'reform' in public education.

A SHELF OF CLASSROOM AND CURRICULUM IDEABOOKS
To Share with the Staff

Originally one of the quarterly newsletters published by this talented group of teaching writers, the Catalogue is now in its fourth printing as a sourcebook of suggested assignments for student writings of all kinds—and all ages, though the focus is on the elementary school. Illustrated throughout by the mind-blowing poems and stories of New York City elementary school children. Also includes a center section of materials for simple classroom display and reproduction of student writings—e.g., paper constructions, hand and press printing—with diagrams and instructions; and a checklist of "teaching tools." A great resource for drawing forth the natural creative expressiveness of every child.

A well-designed, charmingly illustrated series of diagrammed instructions for teachers and/or parents to follow in doing various experiential learning activities with children. The focus is early childhood, but many activities are adaptable to the older primary grades (e.g., puppetry, mask-making, story dramatization).

This vivid, humorous narrative of the author's experiences teaching reading to "unteachable" junior high kids in a ghetto school, is also a sourcebook of practical information and advice on individualized curriculum and assessment, materials, teaching techniques, and parent involvement. There is also an excellent bibliography of books (mostly paperback) that his students enjoyed reading--grouped into six reading levels from 0.1 to 7.0 and up.

EDC NEWS. Newton Massachusetts: Education Development Center.

A free semiannual newsletter published by these most innovative developers of curriculum materials--e.g., Elementary Science Study (ESS) and Man: A Course of Study, among others. Describes current projects in social studies, science, math, open education, media, etc., and materials available. Ideas and experiences submitted by readers are also featured. Write and ask to be put on the mailing list.

"Education is life itself, not preparing for life" is the philosophy expressed throughout this softcover ideabook. Photographs, drawings, diagrams, instructions, and a running commentary that reads more like poetry present a thousand and one creative possibilities for teachers and students together to "learn by doing" as they develop the potential of their common environment. Activities illustrated range from the most elementary paper construction to building a geodesic dome. Materials suggested are the simplest and cheapest--from cardboard and styrofoam to junk and scrap. Also includes a source list of free materials, and where to find them.

Published nine times a year (during the school year), Learning is generally the best available commercial resource of ideas, programs, and materials for innovative and individualized elementary school teaching.

Klick, Bill, and Eleanor Rosenost. *SURVIVAL KIT FOR SUBSTITUTES.* New York: Citation Press, 1974.

Clearly-stated and tempting instructions for a variety of learning activities in each and every elementary school curriculum area. A boon for substitutes--and teachers!

A DETAIL LIST OF CLASSROOM ITEMS THAT CAN BE SCROUNGED OR PURCHASED. Newton, Massachusetts: Education Development Center, n.d.

Though an Early Childhood Education Study publication, this 72¢ materials list is by no means restricted to use in the early grades. The list is in...
tame parts: a "scrounge list": "free and inexpensive materials--grouped by classroom activity"; and "supplies and materials to be purchased," with prices and addresses of suppliers. No illustrations, but a rich source of materials possibilities for experiential learning.

This 25¢ pamphlet produced by Project Head Start lists sources of free "junk" materials--where to find them, and how to use them (illustrated by drawings). There is also a section of "fun materials to save." Focus is on the early grades.

A beautifully designed and illustrated report, written with wit and perspicacity. The section on alternative high schools is exciting and hopeful; but the need for much broader and more varied change—to meet the manifold needs of an already changed population "as unlike the generations of youth that preceded it as Andy Hardy is from Abbie Hoffman"--is the theme throughout. Recommendations for change make this an ideabook for educators whose definition of school is not dependent upon walls, desks, and schedules.

Alphabetized listing of people and places common to most communities—e.g., newspaper plant, pharmacist, greenhouse, bakery, union boss, electrician, hospital, etc.—with a "What You Can Learn From ____" heading and a comprehensive, clearly-stated checklist of suggestions for using each as a resource for learning. Well illustrated by drawings and diagrams, this functional sourcebook is an excellent resource for developing elementary and junior high students' community awareness and involvement.

Like its parent resource, the Whole Earth Catalogue, this oversized sourcebook is a fascinating and far-out alembic of ideas, resources, materials, quotations or reviews of other sources, and designs for living. Whether or not your teachers will follow many of the suggestions is not the point—it's the 'uplift' from browsing through them that counts!
A CORNER FOR STUDENT WRITING
To Lend to Students

Poems by black and Puerto Rican junior high students who had been writing together for four years (in a workshop begun by the Teachers and Writers Collaborative), illustrated by photographs. These poems were written for other children to read, and they are superb.

Children's art and writing from around the world. Fine color reproductions of their paintings and drawings provide a vivid accompaniment to stories, poems, and essays by children of varied ages, backgrounds, and perceptions. Non-English writings are printed in both languages—an intriguing introduction to the many shapes and alphabets of speech! An affective and entertaining anthology for all ages.

Essays and scraps of essays by a 6th grade class in a New York City ghetto school, grouped by theme. These are honest and searching writings—exciting for other 6th graders and junior high students to read and discuss (and a good source of writing topics for teachers).

STONE SOUP: A Journal of Children's Literature. Santa Cruz, California (Box 33).

Published three times a year—in November, February, and May—this magazine of children's art, stories, poems, and book reviews is a delicious collection of free (uncensored and unedited) and creative expression. Great for elementary school children to read—and contribute to.

A collection of the writings of high school students in Upward Bound programs all over the country. A multi-cultural potpourri of style and focus, the writing is generally first-rate—and fascinating to read.

The subtitle of this collection from the early issues of the small-town Appalachian high school magazine of the same name, gives something of its flavor—"Hog Dressing, Log Cabin Building, Mountain Crafts, Food Planting by
the Signs, Snake Lore, Hunting Tales, Faith Healing, Moonshining, and Other Affairs of Plain Living." But nothing really captures the essence of this loving and lovingly-crafted record of a culture except Foxfire itself (and Foxfire Two, a second collection available from the same publisher).

AND A SELECTION OF PUBLICATIONS ON LEADERSHIP

With a Focus on the Principalship

Becker, Gerald et al. ELEMENTARY SCHOOL PRINCIPALS AND THEIR SCHOOLS: BEACONS OF BRILLIANCE AND POTHOLES OF PESTILENCE. Eugene, Oregon: Center for the Advanced Study of Educational Administration, University of Oregon, 1971.*

A lucid survey of the problems and needs of 300 "representative" elementary school principals.

Though leadership per se is not its focus; this compendious volume of readings on planned social change and change processes provides the educational leader with the conceptual bases for effectively enacting the role of the change agent.

Perspectives on the Principalship. NASSP BULLETIN #368, December 1972.

Four recent NASSP studies of relevance to secondary school leaders.

Though primarily a research profile of the "average school principal"—both elementary and secondary—and his educational background, a concluding section on "A Plan for Principal Improvement" offers some insightful questions and suggestions for school principals committed to developing the educational leadership role.

This pacesetting periodical with its continuing experiential focus on innovative leadership should be "must" reading for every school principal. See particularly Chautauqua '74: "The Remaking of the Principalship" (the March/April, May/June, July/August, and September/October issues).

IDEA's commitment to planned change and view that "the principal is in a leadership role where he can release the human potential of the school" set the tone for this group of essays on humanistic leadership and decision-making. There is also a well-annotated bibliography of books and articles on change and change processes.

PRINCIPALS. New York: The Bank Street College of Education.

Occasional papers published by The Program for the Development of the Role of the Elementary School Principal as an Educational Leader report the rationale, training processes, and outcomes of this experimental re-training program for 12 selected volunteer elementary school principals.

This "organized inventory of all the published research findings on leadership" is a cogent analysis of 3000 books and articles--divided into 40 major topics, with a complete bibliography. Weighty and definitive.

Employing the anthropological method of ethnography, the author explores in depth the childhood, education, socialization, family and colleague relationships, and daily routine of a representative middle-American elementary school principal, as a means of identifying and understanding the 'culture' of the principalship. Fascinating.

Indicates availability in paperback and the publisher of the paperback edition.
