The results of a survey of machine-readable data bases in Wisconsin are reported. Fifty-eight data bases accessed by Wisconsin libraries are listed alphabetically. Included in the descriptions are the name of the data base, its subject coverage, its availability, the year it began, the frequency of update, the current size of the file, the name of the printed equivalent, the thesaurus used, sources of information contained in the data base, the ways in which the data base can be searched, the persons to contact for additional information, and names of institutions through which the data base is available. Two other lists are provided: an alphabetical list of institutions accessing data bases in Wisconsin, and a general subject index to the data bases. The survey instrument is appended. (Author/L5)
SURVEY OF MACHINE-READABLE BIBLIOGRAPHIC AND NUMERICAL DATA BASES AND RELATED SERVICES IN WISCONSIN

COMMITTEE ON SHARED RESOURCES COUNCIL OF WISCONSIN LIBRARIANS

MAY 1975
Acknowledgment

This Survey of Machine-Readable Bibliographic and Numerical Data Bases and Related Services in Wisconsin was compiled and published by the Committee on Shared Resources of the Council of Wisconsin Librarians, Inc. The Project was funded by the Council. Additional support was provided by Media Retrieval Services, Pierce Library, UW-Stout.

Special thanks are given to Philip Schwarz, Stout's Automation Development Librarian and a member of the Committee on Shared Resources, for preparation and distribution of the survey forms and the onerous task of tabulating Part II results, and to John Luedtke for his assistance in preparing Part I for publication.

LeRoy G. Zweifel, Chairman
Committee on Shared Resources
The purpose of the survey was to determine what machine-readable data bases are accessed by libraries in the State of Wisconsin, and further, to assess librarians' perception of what specific data bases they deem important in the future operation of their library.

A questionnaire was sent to a Wisconsin Division of Library Services mailing list, that included public libraries, special libraries, technical institutes, school libraries, and college and university libraries. The questionnaire consisted of two parts: Part I, Locally Accessible Data Bases and Part II, Wisconsin's Future Needs. Part I questionnaire results were both clarified and supplemented by telephone with the contact person listed on the returned questionnaires. This publication is the compilation of Part I information. A copy of the Part I questionnaire is appended. The results of Part II will be published late summer of 1975.

This publication is divided into three sections. The first gives a description of each data base accessed by a Wisconsin library. Included in the description is the name of the data base, the subject coverage, its availability, the year it began, frequency of update, and current size, the printed equivalent, the thesaurus used, sources of information contained in the data base, the ways in which the data base can be searched, and the person(s) to contact for additional information. If the data base is available through more than one institution, all institutions are listed. This section is arranged alphabetically by data base name.

Section two is an alphabetical listing of institutions accessing data bases in Wisconsin. Section three is a general subject index to the data bases. These sections are cross referenced to the data base description section.

This edition of Part I of the survey represents an initial attempt to identify locally accessible data bases. Comments and suggestions on how to make this type of document as useful as possible, as well as indications of omissions or corrections to this document are welcome. Additional copies may be obtained by writing to:

NAME OF DATA BASE:
Legislative Reference Bureau

DESCRIPTION:
It consists of the entire typing output of the Legislative Reference Bureau, Legislative Fiscal Bureau, Senate Chief Clerk, and Assembly Chief Clerk. It is designed to facilitate typesetting of Legislative actions and to reduce preparation times for new documents containing elements of documents previously stored.

AVAILABILITY:
The computer is used for internal document preparation within the legislative service agencies. For external use, printed copies are more convenient and are available.

WHEN IT BEGAN: FREQUENCY OF UPDATE:

CURRENT SIZE:

PRINTED EQUIVALENT:
"Bulletin of Proceedings" and daily journals of the Legislature

THESAURUS:
None

SOURCE(S) OF INPUT:
Legislature's daily journals, bill histories, proposals and amendments thereto, reports and letters issued by legislative service agencies.

CAN BE SEARCHED BY:
Store Code.

NAME OF DATA BASE:
Legislative Reference Bureau-Statute Data Base

DESCRIPTION:
It consists of full text of Wisconsin statutes and of the federal and state constitutions, backed by a joint inverted concordance of searchable words. Employed mainly in bill drafting for the Legislature when consistent word use throughout the statutes is a major consideration.

AVAILABILITY:
It is available to other state agencies through the Legislative Reference Bureau on a courtesy basis. Searches are available commercially from the Data Retrieval Corporation of America.

NAME OF DATA BASE:  
Master's Theses and Seminar Papers

DESCRIPTION:  
Consists of items produced in the graduate schools of the nine former state universities: Eau Claire, La Crosse, Oshkosh, Platteville, River Falls, Stevens Point, Stout, Superior, and Whitewater. It is divided into two sections: 1) alphabetical author list which includes author, complete title, name of school, type of paper and date; and 2) Key word in context (KWIC) title index which acts as a subject index for users who need a subject approach.

AVAILABILITY:  
Batch mode. One copy available to each library contributing listings for the data base.

NAME OF DATA BASE:
UW-Madison Serials Catalog Data File

DESCRIPTION:
This data base is an alphabetical listing by title and entry for 30,000+ serial publications currently received in libraries of record on the UW-Madison Campus. The file is used to produce the Union Catalog of Serials Currently Received in the Libraries of the University of Wisconsin-Madison.

AVAILABILITY:
Batch mode. File can be made available as a magnetic tape in the MARC II Serials format; charges for use to be determined.

WHEN IT BEGAN: 1974  FREQUENCY OF UPDATE: monthly

CURRENT SIZE: 50,000 records

PRINTED EQUIVALENT:
Union Catalog of Serials Currently Received in the Libraries of the University of Wisconsin-Madison, and Supplements.

thesaurus:
None

SOURCE(S) OF INPUT:
Public Catalog Record

CAN BE SEARCHED BY:
Title only.
