The final report summarized the development of a health occupations continuing education center. The project was designed to assess the needs of selected health occupations at the vocational level and to develop guidelines for the establishment of a model for a health occupations continuing education center. The learning needs of licensed practical nurses, nurses aides, and operating room technicians were identified through questionnaires. Perceptions of their learning needs were also obtained from instructional and supervisory personnel. Based on the findings of the survey, guidelines were developed for the establishment and operation of a learning center with a flexible approach to programming to meet the wide diversity of identified needs. Appendixes to the 10-page summary comprise the body of the document and contain: (1) a statement of philosophy and objectives; (2) the guidelines written for the planning, implementation, and evaluation of the learning center; (3) samples of forms to be used in the center; (4) the survey questionnaires; and (5) the report abstract. Statement of the problem. In spite of the fact that extensive effort has been expended in providing continuing education for members of the health occupations at the professional levels, few, if any, definitive attempts have been made to either identify the learning needs of members of the health occupations at the vocational levels or to provide resources through which their needs can be met.

Hospitals have been in the forefront in seeking to provide staff development programs for their personnel to insure a high quality of health care for their patients but the offerings have necessarily been restricted to their own employees. The increasing numbers and types of auxiliary health care groups have made it prohibitive for all but the largest institutions to conduct sufficient educational programs to insure worker competencies of all those needing instruction. An additional problem lies in the fact that the degree to which in-agency programs have indeed met the learning needs of the staff is not really known.

The increasing complexity of health care and externally imposed standards of training of various occupational groups have also created a need for new programs which have not been offered previously. Many health care facilities find that neither they nor the community have the educational resources needed to meet burgeoning learning needs. A School of Health Occupations with established basic training programs for some health occupations must begin to question whether it does not have some responsibility to participate in the area of continuing education.

Based on the assumption that there is a need for additional learning resources in the community, the purpose of the project was designed to develop a model for the establishment and administration of vocational health occupations continuing education centers.

Since a continuing education center must operate within the context of learners' learning needs, and the potential of the educational agency to meet learning needs, three occupational groups were chosen to survey their learning needs. The findings then served as the framework through which the following contributing objectives
could be achieved:

1. To identify the types of learning needs manifested and the numbers of potential participants in programs.

2. To determine which needs could be met through vocational education offerings.

3. To develop guidelines for establishing and administering a continuing education program for the health occupations at the vocational level.

Priority area. The operating definition of vocational education chosen was those learning experiences designed to assist a learner to develop that degree of skill and knowledge necessary for successful job entry and/or for continued growth on the job in an occupation requiring less than preparation at the associate degree level in the initial training program. This definition delimited the study to health care personnel below the level of the registered nurse and those occupational roles of a paraprofessional nature. The learning needs of this level are typically the concern of institutions of higher education. Furthermore, the educational resources of the School of Health Occupations are more consistent with the level of learning of the sub-professional auxiliary groups.

Since licensed practical nurses, operating room technicians and nurse aides are relatively typical of health care occupations trained at the vocational level, they were chosen as the target populations to which the project would first address itself. By further delimiting the sample to those employed in hospitals and nursing homes in the city, large groups which were readily accessible were involved. Additional groups and other occupational settings could be studied at a later date.

Strategies. The identification of learning needs was approached through two perceptual frameworks; namely, the perceptions of the workers themselves and the perceptions of supervisory and instructional personnel who have immediate knowledge of their job performances. Although there are other factors which should be considered in determining learning needs, such as quality of care audits, performance evaluations, morale indicators, grievance procedures and others, these were not considered in the study.
Separate questionnaires were developed for the three occupational groups and the supervisory and instructional personnel. The questionnaires sought to elicit the same types of data from each group, but they had to be slightly modified to fit the occupations and the employment settings. Supervisors were asked to complete an additional segment of the instrument concerning functions of each role and the adequacy of initial training programs to prepare each group for job entry. They identified urgent learning needs and suggested programs through free response items. Workers identified areas of learning needs through a check list and first programs desired through free response items.

The items on the instruments were structured for "yes", "no" and "no response" alternatives because it was felt that the target groups were inexperienced in completing questionnaires, and the simplest possible approach should be used. Most items could be scored through simple data processing, but some items required hand scoring.

With the permission of the administrators of the health care facilities, questionnaires were distributed at the places of employment in the manner approved by nursing service, but direct mailing was used for the returns.

Analysis. The study was not designed for advanced statistical computations. Simple frequencies and percentages of responses were adequate to provide the information sought. The study was descriptive and exploratory in nature. Although the free response items did complicate the analysis phase, the total information provided was helpful in clarifying the nature of the occupational environments and problems encountered in in-agency attempts to meet learning needs.

Analysis was both subjective and objective concerning the following points: adequacy of initial training programs to prepare for job entry, types of learning needs identified and numbers of potential participants, effectiveness of in-agency educational programs, congruence of perceptions of workers and work supervisors, reactions to the possible involvement of the School of Health Occupations in continuing education and potential of the School to meet the learning needs identified. From
these findings, guidelines for the establishment and operation of a continuing education center were derived.

Findings. Questionnaires were sent to all members of the three occupational groups employed in four hospitals and 13 nursing homes in the city. Head nurses and instructors in hospitals and the directors of nursing and charge nurses in nursing homes completed questionnaires to constitute the supervisory and instructional sample. The returns were expected to run about 40% in each occupational group. This generally was true except for practical nurses and nurse aides employed in hospitals, where the returns were 25% and 35% respectively. Some of the findings are as follows:

1. The learning needs of all the occupational groups ranged from simple basic performance deficits to needs for skill and knowledge extending beyond their initial job preparation.

2. The learning needs identified fell into three basic categories: namely, those which could be met through the independent efforts of an outside educational agency, those which could best be met in the occupational setting, and those which could be met through the initial efforts of an outside agency but which would require varying degrees of cooperation from employing agencies to implement clinical practice or to provide follow-up supervision on the job.

3. Among the real barriers to attendance at outside educational programs at the vocational level, lack of time and lack of money seemed to be predominant. Money was a more significant factor to nurse aides than to the other groups. However, interest in learning was high in all three groups.

4. There was relatively little specific agreement about learning needs of practical nurses employed in hospitals. The following findings are pertinent:

   A. In the sample of supervisory personnel, 49% felt the newly graduated and employed practical nurses did not meet performance expectations on initial employment, and 33% felt their inservice education programs were not effective for this group.

   B. Among the sample of practical nurses themselves, 34% felt their inservice programs were inadequate to meet their learning needs.
C. Interest among the practical nurses in attending programs was very high with 91% wanting more learning opportunities, and 91% being willing to attend on their own time and 73% at their own expense. A need to learn procedural skills was expressed by 66% of the sample.

D. Although specific learning needs identified by the practical nurses and the work supervisors were so diverse a true comparison was difficult, both instructional and supervisory personnel failed to identify team leading as an urgent learning need, but more practical nurses cited it than any other.

5. There was also relatively little agreement about the learning needs of practical nurses employed in nursing homes. The following findings are pertinent:

A. In the sample of supervisory personnel, 39% felt the newly graduated and employed practical nurses do not meet performance expectations on initial employment. Although not all nursing homes reported a general inservice program for practical nurses, 39% of the work supervisors felt their programs were not effective.

B. Among the sample of practical nurses themselves, 32% felt their inservice programs were inadequate to meet their learning needs.

C. Interest among this group of practical nurses in learning was also high, with 91% wanting more learning opportunities, and 88% being willing to attend on their own time and 68% at their own expense. A need to develop procedural skills was expressed by 74% of the group.

D. Only a few work supervisors perceived team leading and management as an urgent learning need, but the practical nurses themselves cited it as a priority need. However, both workers and work supervisors identified very diverse learning needs, making comparison difficult.

6. The learning needs of nurse aides employed in hospitals were very extensive, and the needs identified by some of them appeared to be inconsistent with the traditional role of the nurse aide. Pertinent findings are as follows:

A. In the sample of supervisory personnel, 47% felt their nurse aides were not adequately prepared to meet employment expectations on initial job entry, and 21% felt their inservice programs for nurse aides were not effective. Among the nurse aides themselves, 23% felt their inservice programs failed to meet their needs.

B. Interest in learning among the nurse aides was high, with 86% wanting more learning opportunities, 71% being willing to attend programs on their own time, and 43% at their own expense. A need for instruction in doing procedures was expressed by 70% of the sample.

C. The nurse aides themselves identified a variety of specific learning needs, but more were of an advanced nature. The supervisory sample also identified widely different learning needs, but advanced learnings were predominant with basic skill training cited as second. No single specific priority learning need could be identified.
7. The learning needs of nurse aides employed in nursing homes were just as numerous and diverse as those expressed by their counterparts in hospitals. However, they did reflect distinct differences in utilization patterns. Specific findings are as follows:

A. In the sample of supervisory personnel, 50% felt their nurse aides were not adequately prepared to meet employment expectations on job entry, and 36% felt their inservice programs for nurse aides were not effective. Only 11% of the nurse aides themselves felt their inservice programs did not meet their needs.

B. Interest in having more learning opportunities was expressed by 86% of the group, with 71% being willing to attend programs on their own time and 37% at their own expense. Among this group 81% would like instruction to develop procedural skills.

C. The largest single group of nurse aides citing a first program preference indicated basic training as their choice. However, when all other choices of a complex learning nature were grouped into the category of advanced care, it became the priority area. Work supervisors also identified advanced care as the priority need. However, within the categories of basic and advanced care the range of learning needs was very wide.

8. The perceptions of learning needs held by operating room technicians were dissimilar to the perceptions of their learning needs held by their work supervisors. Specific findings are as follows:

A. The operating room supervisors felt the learning needs of the operating room technicians were adequately met through present efforts.

B. Among the operating room technicians, 71% felt their inservice education programs were inadequate to meet their needs. Among the problems they identified were lack of relevance of programs and lack of enough programs to meet the requirements for continuing education established by the Association of Operating Room Technicians.

C. Interest in learning among the technicians was high, with 75% wanting more learning opportunities, and 95% being willing to attend programs on their own time and 71% at their own expense.

D. Although the learning needs of operating room technicians are highly specialized and require on-the-job instruction in many cases, some of their learning needs could be met through instruction in an outside educational agency.
Conclusions and recommendations. On the basis of the percentages of returns of questionnaires from each occupational group, generalizations cannot be drawn to the total target populations. Furthermore, the learning needs of the same occupational groups in other geographic locations would undoubtedly be different reflecting those factors which influence the need to learn. The perceptions of learning needs identified in the data can only refer to the samples and the specific locales from which the samples were drawn. However, the following conclusions were reached after review of the findings:

1. There is a need in the community for an additional source of learning for members of the health occupations at the vocational level. Many learning needs identified by the groups are not now being met through existing educational resources. However, the educational agency entering this type of education should develop a "learning center" rather than a "continuing education center" so that offerings can be flexible enough to meet the wide variety of needs expressed.

2. The development of a learning center to augment in-agency education is viewed with mixed reactions by respondents. While the majority of workers are supportive of the idea, supervisory and instructional personnel in hospitals tend to see a very selective involvement in limited areas as the most appropriate role.

The supervisory personnel in agencies with limited educational resources of their own tend to favor a broader participation by an outside educational agency because they carry dual instructional and supervisory roles. Attention they must give to instruction detracts from the time they can give to the care of patients.

The role of the School as a learning center for staff development would have to evolve gradually, just as adjustment to any change is slow. The viability of the learning center will depend on proof of ability to provide instruction which is effective and relevant to the workers.

3. There are real barriers to attending outside education programs among members of the health occupations at the vocational level, with lack of time and money being significant factors.

In spite of this, interest in learning is high, and sufficient numbers in the groups studied are willing to pay their own tuition to warrant offering programs. Fees must be kept as low as possible, and alternative sources of funding should be sought. Multiple scheduling of programs would be needed if all those wishing to attend are to be accommodated because of the work schedules in health care facilities.
4. The impact on the quality of care rendered to patients by educational offerings in the learning center will depend in a large measure on the degree to which cooperative relationships can be established with health care agencies for identification of learning needs and the planning, implementing and evaluation of programs.

Members of the occupational groups studied are seeking definitive help to grow on the job. While many of the learning needs identified in the study which were isolated and involved only a few workers can best be met in the occupational setting, some can be met independently by an outside educational agency, and many could be best met through initial instruction followed by planned supervised practice or follow-up on the job.

5. Careful selection of applicants for programs will be necessary so that the content is appropriate for the learners. In most instances, it is unlikely that a program for a given occupational role would be equally effective for workers coming from both hospitals and nursing homes if the objectives of learning are related to specific job performance. Furthermore, initial training programs for job entry no longer match the expectations for job performance many supervisors have. Upward shifts in job roles have occurred without the necessary advanced training to help the workers adjust.

On the basis of the study and review of related literature, guidelines were developed for the initial establishment and operation of a learning center. (See Appendix). Although these must be tentative and subject to testing in operation, it is recommended that the Evansville School of Health Occupations Learning Center be established and selected programs offered in the next school year so that any modification needed can be made.

It seems likely that unless health care facilities in the community adopt a more rigorous approach to on-going assessment of the learning needs of the health occupations at the vocational level, the specific learning needs of many will not be met. Increased involvement of all supervisory personnel in staff development so that teaching on the job is more fully recognized as an important part of their roles and recognition of every worker as a learner at a certain stage of development would greatly enhance the job performance of the ancillary groups of health care personnel. As long as instruction in the classroom is not augmented by assistance on the job to apply new learning in practice, staff development programs will fail to achieve their potential for improving the quality of care.
Evaluation of the project. In spite of the limitations inherent in the design of the study, the objectives were achieved. Future identification of learning needs of other health occupations groups in other occupational settings can be accomplished more easily through a much briefer questionnaire. The extensive information sought about the occupational and educational climates would no longer be necessary. This data, while only tangential to existing learning needs, was very helpful in establishing guidelines for the operation of the learning center. Information of this nature would be gathered in the future as a prerequisite to specific program planning as offerings are developed.

The need for the Learning Center has been established in terms of the three occupational groups studied. The execution of the project has placed the School of Health Occupations in contact with health care facilities in the area and has served as a declaration of interest. In response, suggestions about the learning needs of other occupational groups have been brought to the attention of the School. Discussion with administrators and supervisory personnel about methods, standards and procedures has served to identify potential problems and clarify possible avenues for cooperative relationships in developing the Learning Center. As with any innovation, adjustment comes slowly, but the stage has been set.

The attempt to determine the congruence of perceptions of learning needs held by supervisory personnel and workers was not completely successful. This can be attributed to many factors. The primary one seems to be that there is no definitive job description for a given occupational role. The functions of an employee in a role vary from one institution to another and even within an institution from one nursing unit to another. While obvious differences in perceptions exist, the only valid comparison would be between a group of workers in an occupational role and their particular supervisor.
The extent of learning needs expressed was overwhelming. Some could be grouped into instructional units, but the real crux of effective staff development was shown to reside in the fact that more attention must be paid to many disparate groups of individuals. More definitive identification of needs and more definitive program planning, although difficult to achieve, came through as an educational must.

During the course of the project, a new program for the preparation of food service supervisors was developed in answer to the urgent need in the area. Although this was not part of the original design of the study, it has offered the School an opportunity to experiment with techniques to implement classroom instruction concurrent with on-the-job learning. The approach used may very well serve as a model for instruction in other occupational groups.

The study has provided a good background for the development of the Learning Center, but the success of it as an instructional resource for staff development can only come through demonstrations of effectiveness. If careful development and continuous evaluation are used throughout the initial, developmental phase, the Learning Center can become an important component of the effort of the community to improve the quality of care given to patients.
APPENDIX AND SUPPLEMENTAL MATERIALS
Evansville School of Health Occupations Learning Center

Philosophy and Objectives

The Learning Center is an integral part of the School of Health Occupations in the Department of Adult and Vocational Education in the Evansville-Vanderburgh School Corporation and functions within the framework of the philosophy of the public school system and the philosophy of the Evansville School of Health Occupations.

The basic commitment of the School is to provide pre-service training programs in selected health occupations at the vocational level, but the faculty also believes that the School has a responsibility to contribute to the improvement of the quality of health care in the area it serves through the maintenance of a learning center for those members of the health occupations at the vocational level who have demonstrated learning needs which the School has the potential to meet and which are not being adequately met through other resources.

Therefore, the general purpose of the Learning Center is to provide organized learning experiences for those vocational health occupations which need opportunities to either acquire and maintain proficiency in their roles or to keep pace with new developments which affect their practice.

Since local educational resources are available to meet the learning needs of professional members of the health occupations, program offerings will be at the post-secondary level but less than the associate degree level. Educational resources are a precious commodity, and the efforts of all persons and agencies committed to this kind of education...
should be coordinated so that maximum benefits are accrued with the most effective and efficient means possible.

The scope of the involvement of the Learning Center should be flexible to reflect the wide variety of learning needs of the groups it seeks to serve. Identification of learning needs should result from careful assessment of all available information including the viewpoints of employers as well as employees. Adult learners learn best when they are actively involved in all phases of the educational process.

Since the primary concern is to assist the worker to perform his job more effectively and to grow and develop as a member of the health occupations, offerings may range from initial, short term training programs to advanced educational experiences based on the initial job preparation. The Learning Center should be involved with, but not limited to, continuing education in the restrictive sense of the term.

The ultimate test of the effectiveness of job-related instruction is whether the learners demonstrate changes in behavior in successfully applying new knowledge and skills in practice. For this reason, a link between teacher, learner and work supervisor is very important. A close working relationship between the educational agency and employing agencies should be established as much as possible.

A decision to offer an educational program can only be made after the nature of the learning need is fully assessed. Some learning needs can best be met in the employment situation; some can be met effectively through the independent efforts of an educational agency; some require a combination of the efforts of both to achieve effective learning.

To fulfill its responsibilities in the field of continued learning for the health occupations at the vocational level, the Learning Center
establishes the following objectives:

1. To actively assess the learning needs of members of the health occupations at the vocational level through independent review as well as cooperative study with others.

2. To maintain on-going programs of learning experiences at the vocational level which meet internally developed standards of quality and any relevant standards advocated by outside agencies and associations.

3. To provide an advising service to workers to assist them to identify their learning needs and to locate appropriate learning experiences either in short term courses, credit courses or career ladder programs.

4. To plan, implement and evaluate educational offerings which are relevant to identified needs and consistent with the educational resources of the Learning Center.

5. To work cooperatively with other educational agencies and all interested health care agencies to improve the quality of health care rendered through the offering of instructional programs.

6. To continuously evaluate the effectiveness of the Learning Center and its relevance to the needs of the community.
Evansville School of Health Occupations Learning Center

Guidelines for Administration of the Learning Center

1. The Learning Center functions as a department of the School of Health Occupations under the supervision of the Director of the School.

2. Lines of authority and responsibility extend in the regular channels of the Evansville-Vanderburgh School Corporation through the Director of Practical Arts, Adult and Vocational Education.\(^1\)

3. Rules, policies and procedures directing the operation of the School of Health Occupations are also applicable to the Learning Center, subject to permissable modifications to implement administration.

4. An Advisory Committee on Continued Learning with broad community representation acts in an advisory capacity in the matters of policy and development concerning the Learning Center.

5. Membership on the Advisory Committee for Continued Learning shall provide representation from the following areas:

   A. School of Health Occupations
   B. Continuing education in nursing
   C. Allied health education
   D. Staff development departments in health care institutions
   E. Administration in health care facilities
   F. Supervisory staff in health care facilities
   G. Others to be added as their involvement in health education becomes relevant to the role of the Learning Center

^-1 See Appendix D.
6. The objectives of the Advisory Committee for Continued Learning shall be:

A. To make recommendations concerning the role of the Learning Center in meeting the needs of the health occupations at the vocational level in the community.

B. To share knowledge about educational needs in the area and efforts of other educational resources so that activities will be coordinated.

C. To participate in the evaluation of the general effectiveness of the Learning Center.

D. To review the representation on various planning committees to insure broad community involvement.

E. To review program proposals as submitted by planning committees to insure the pertinence of programs to area needs and the adequacy of the educational base.

F. To interpret the activities of the Learning Center in their professional contacts.

G. To suggest instructional resources.

The regular faculty of the School of Health Occupations acts as a consulting body to facilitate the operation of the Learning Center.

8. A Coordinator of the Learning Center, or someone designated to act in that capacity, has responsibility for the activities of the Center under the supervision of the Director of the School of Health Occupations. The role of the Coordinator shall include the following:

A. Participating as a member of the faculty of the School of Health Occupations with voice but no vote in decisions regarding the primary programs in the health occupations.

B. Consulting with the faculty about matters pertaining to proposed educational offerings in the Center and keeping them informed of activities.

C. Coordinating all activities of the Center.

D. Taking the initiative for investigating the learning needs in the health occupations at the vocational level through contacts with employing agencies, workers, supervisory health care personnel, and governmental and professional associations with relevant interests.
E. Establishing a planning committee for each program.
F. Serving as a member of all committees involving Center activities.
G. Acting as a liaison officer with other educational and health care agencies.
H. Serving as an expediter to plan and implement programs.
I. Selecting applicants for admission to programs under the criteria established by planning committees.
J. Obtaining qualified instructional personnel and assisting them as necessary.
K. Maintaining records of all activities of the Center.
L. Continuously evaluating the effectiveness of the Center.
M. Acting as a counselor to learners to help them identify their learning needs and find learning resources available to them, either through short term courses or regular academic offerings.
N. Acting as a program director or instructor when her expertise is relevant to program objectives.
O. Consulting with the Director in matters pertaining to the budget for the Learning Center and investigating possible sources of funding.
P. Preparing interim and annual reports as necessary.
Q. Publicizing programs.
R. Acting to maintain the quality of educational offerings through consultation with instructors and assessment of program plans.

Suggestions for the qualifications for the position of Coordinator of the Learning Center shall be as follows:

A. A registered nurse, currently registered in the State of Indiana, and preferably with preparation at the master's level.
B. Certification as a vocational teacher by the Indiana State Board of Vocational Education.
C. A clinical area of expertise with appropriate experience.
D. Knowledge and experience in working with adult learners.
E. Knowledge and experience in continuing education.
F. Knowledge and experience in teaching methodologies and program planning.

G. Knowledge of health occupations at the vocational level and preferably with experience working with them.

H. Ability to work with groups in a leadership role.

I. Knowledge of advising techniques in career counseling and sincere interest in the growth and development of members of the health occupations.

J. Accuracy in maintaining records.

9. The following policies shall pertain to instructional personnel:

A. Instructional personnel for each program shall be selected on the basis of their educational preparation, their knowledge and expertise in the program area, their teaching skills, and their ability to work with adult learners.

B. Instructional personnel, other than guest lecturers, shall obtain certification as a vocational teacher by the Indiana State Board of Vocational Education as soon as the training schedule makes this feasible.

C. Salaries of instructional personnel are paid according to their educational and experiential background as outlined by School Corporation Board policies.

D. Curriculum Vita shall be on file for all instructional participants.

10. Tuition for programs shall be based on instructional costs, and care shall be taken that required textbooks or other materials are appropriate for the programs but kept as reasonable as possible.

11. Requests from any individual, association or agency for specific programs will be considered, and a decision to offer a program shall be based on verification of the learning need and the potential of the Learning Center to meet the need. The following factors shall be considered:

A. Views of supervisory personnel in agencies employing potential participants.

B. Views of potential participants.

2See Appendix F.
C. Policies and rules of employing agencies and Indiana State or federal agencies which are applicable to the occupational group and the learning need.

D. Any relevant standards of health associations and accrediting bodies.

E. Adequacy of the educational resources of the Learning Center to meet the learning need effectively.

F. Number of potential participants.

G. Availability of other programs to meet the learning need. A program shall not duplicate an offering of another educational or health care facility unless the available offering is not adequate to meet the needs of the learners to be served. The Learning Center shall keep informed of educational offerings presented by local universities, hospitals, the Indiana Vocational Technical College and others in the area.

12. In the case of multiple requests for programs, priorities of scheduling will be determined on the basis of the program which meets more of the following criteria:

A. The program is urgently needed to assist health care facilities to meet licensing or accrediting standards.

B. The program is needed to assist workers to meet re-licensure or re-certification standards.

C. The offering of the program has the potential for contributing to an improved quality of care for patients.

D. Offering the instruction would help remove performance deficits of workers already employed in the occupational role.

E. A large number of workers need the educational experience. (Generally, the more workers needing the instruction, the more urgent the need.)

F. The learning need involves a group of workers without access to any other educational resources. (Generally, a minimum of 20 participants is needed to make the offering of a program feasible, but there may be mitigating circumstances.)

G. Offering the program would help reduce the instructional burden of health care facilities with limited educational resources.

H. The program reflects those learning needs which the workers view as important and involves instruction appropriate for the educational role.
I. The program reflects those learning needs which supervisory personnel view as important.

J. The Learning Center has the required educational resources to function effectively in the area of instruction.

K. The cost of conducting the program is within the budget of the Learning Center.

13. Program approval shall be obtained from any appropriate state authority or professional association where such approval is necessary for certification of the learning experience. Examples are as follows:
   A. Indiana State Board of Health
   B. Indiana State Board of Vocational Education
   C. American Dietetic Association
   D. Indiana Statewide Plan for Continuing Education in Nursing, Region 13
   E. Association of Operating Room Technicians
   F. Others as pertinent to occupational groups

14. A certificate of course completion shall be given to each participant who is successful in meeting program standards.
   A. The Learning Center accepts the concept that all efforts of an individual already employed in the health occupations to acquire, maintain, and develop the abilities, skills, knowledge, and attitudes necessary to do his job or function more adequately is continuing education.
   B. The continuing education unit (10 contact hours of participation in an organized continuing education experience under responsible sponsorship, capable direction and qualified instruction) shall be used in recording participation in programs for all those already employed in the health occupations. The continuing education units assigned to a program shall be recommended by the planning committee and approved by the Director of the School.
   C. Continuing education units will not be awarded for those completing training programs prior to job entry unless they are making a transition from another health occupation.
D. If a program is developed to help participants meet re-licensure or re-certification procedures, applicable standards will be met, and the certificate of course completion shall be so designated.

E. Continuing education units for clinical practice hours will not be awarded unless established standards for the experience are met and supervision by qualified personnel is available. If standards are met, continuing education units may be awarded in the ratio of 1 continuing education unit to 20 clock hours of organized, supervised practice.

15. Each program offered shall meet the standards established by the Learning Center.
Evansville School of Health Occupations Learning Center
Guidelines for Program Planning, Implementation and Evaluation

1. A planning committee for each program shall be appointed by the coordinator of the Learning Center after conferring with the Director of the School. Members of a planning committee shall be chosen so that each of the following areas are represented:

   A. School of Health Occupations
   B. Health care agencies employing potential participants
   C. Learners or practitioners in the target occupational group
   D. Professional personnel supervising workers in the occupational group
   E. Instructional personnel with expertise in the program area
   F. All personal who will supervise field experience if planned clinical practice is included in the program. These members are added after enrollment of participants.

2. The planning committee will be responsible for confirming the learning need, preparing a program proposal and subsequently participating in the planning, implementing and evaluating of the program under the leadership of the primary instructor.

3. A program proposal shall reflect serious consideration given to the basis and level of the learning need, the purpose and nature of the proposed program, the participants to be served, the basis for admission and projection of the educational facilities and resources needed.

4. The proposal is reviewed by the Advisory Committee for Continued Learning. The final decision to offer the program is made by the Director of the School of Health Occupations.

---

3 See Appendix F.
5. Programs may be developed in a variety of formats depending on the objectives to be achieved, and they may be concerned with assisting learners in any of the following areas:

A. Acquiring new knowledge or skills in their occupational roles or in a specialized area of functioning in their roles

B. Acquiring new knowledge or skills to make a transition from one occupational setting to another

C. Re-training for their occupational roles to remove performance deficits or to restore competence after an absence from employment

D. Training to meet health care standards for their current roles

E. Training in basic short term courses for initial job entry

F. Changing attitudes or values

G. Acquiring knowledge or skills necessary to work effectively with co-workers and/or assume leadership responsibilities

H. Acquiring knowledge or skills necessary to function as a teacher of patients or co-workers

I. Implementing the application of knowledge to practice

J. Learning to assume responsibility for continued growth as a person and member of a health occupation

K. Understanding the scope and limitations of their occupational roles within the health care system

6. A fully detailed course outline is developed by the primary instructor and approved or modified as necessary on recommendation of the planning committee. The format of the course outline shall follow the pattern approved by the Learning Center and shall incorporate the following standards:

A. Instruction shall be based on what the learners already know or can do.

B. Objectives shall be clearly stated in behavioral terms, made known to the learners and related to their need to know or do.

See Appendix 6.
C. The content shall be appropriate for the level of the learners and for the achievement of the stated objectives.

D. Active participation of the learners shall be included as much as possible.

E. Teaching methodologies shall reflect variety and are selected with due concern for their educational effectiveness.

F. Learning resources and tools shall be identified or made available. A bibliography shall be included.

G. Clinical practice or laboratory practice, if included, shall be explicitly detailed with objectives, standards to be achieved, learning experiences, time required, place and supervisory personnel. A manual to direct clinical practice shall be prepared, and both learner and supervisor shall have copies.

H. The educational facilities and resources and the time allowed shall be adequate to enable the learners to achieve the stated objectives.

I. The instructor shall engage the learners in on-going self-evaluation of their progress.

7. A synopsis of the course outline shall be prepared and copies provided for each participant so that each learner can be actively involved in the teaching and learning.

8. An application for shall be submitted by each applicant, and admission shall be based on priorities and standards established by the planning committee. Particular care should be taken to insure that the nature of the program and the level of instruction is appropriate to meet the learning needs of the applicant.

9. The instructor maintains attendance records of students and instructional personnel.

See Appendix H.

See Appendix I.

See Appendix J.
10. Standards for successful completion of a program shall be determined and made known to the participants in advance.

A. If minimal criteria, such as attendance, are set, and there are no objective techniques of evaluation used, the reporting system will be based on "S" for satisfactory and "U" for unsatisfactory.

B. If program objectives and planning involve specific assessment of achievement, the instructor may use either the system described in A or a four point system based on "A" for excellent, "B" for good, and "C" for acceptable, and "U" for unacceptable.

C. If supervised clinical practice is included, a specific evaluation tool using a two point scale shall be devised based on the objectives and standards. The supervisor of the field experience completes this evaluation.

D. In any evaluation of student achievement, the standards must be clear, observations of performance must be adequate, and the learner must be actively involved in the assessment.

E. No uniform attendance requirement is established. In case of absence, an instructor may assign make-up work as necessary to insure that the learner has achieved the objectives of the class units missed. If absence is too extensive to make this feasible, the participant must be informed immediately.

11. Evaluation of the effectiveness of each program should be as complete as possible. Depending on the nature of the program, multiple approaches to evaluation should be used. Although the focus of evaluation will be on the specific objectives of the program, other aspects must be considered. Any, or all, of the following aspects may be pertinent to the evaluation:

A. Evaluation of the instruction by participants. A general form is used, and the instructor adds any questions necessary to explore the effectiveness of specific aspects of the program. The instructor summarizes these and writes a brief resume on the Report of the Educational Program.

B. Evaluation of teaching and learning by the instructor. This includes the assessment of the total instructional process, problems encountered, and recommendations for further offerings. This evaluation is entered on the Report of the Program.

8See Appendix K.

9See Appendix L.
C. Evaluation of the effect of the learning experience on work performance as perceived by work supervisors and learners. This information is obtained through discussion.

D. Evaluation of the total program by the planning committee to include the following areas:

1. Achievement of program objectives
2. Adequacy of learning experiences in classroom
3. Adequacy of learning experiences in clinical practice
4. Clarity of instructions for clinical practice
5. Recommendations for improvement in classroom and field experience
6. Effect of the learning experience on the job performance of participants
7. Recommendations concerning future offerings of the program

This evaluation is written into the minutes of the meeting of the planning committee.

E. Assessment of the cost of conducting the Program. This information is prepared on the Financial Report of the Program.10

F. Review of the program by the Advisory Committee for Continued Learning. This evaluation is written into the minutes of the meeting.

12. At the conclusion of the program the following records are prepared, or filed:

A. The Program is entered on the student's card file, Participant's Composite Instructional Record. On the reverse side of this form guidance contacts are recorded.

B. A folder is set up for each student and filed alphabetically. The application for admission and any other pertinent data are included.

C. The program is assigned a code number based on the year, LC for "learning center" and a number for the chronological appearance of the program. Example: 1975 LC 1

D. A course packet is prepared for the program and filed by its code number. The following are included:

1. Attendance record for learners and instructors
2. Report of the Educational Program

10 See Appendix M.

11 See Appendix N.
E. The program proposal is filed for future reference.

F. The Participants' Evaluations of the Educational Program are filed until the program is repeated.

The guidelines identified for the operation of the Learning Center will undoubtedly require modifications after the testing period. Furthermore, they have been developed to facilitate the offering of a new level of education within the parameters of an existing educational system. For this reason, the guidelines and records could not be expected to meet the precise requirements of another agency establishing a similar program, just as the learning needs identified in the study would probably not reflect the learning needs of the same occupational groups functioning in another locality.

It is anticipated that the guidelines will be used to establish the Learning Center and to conduct seven educational offerings during the next school year based on the needs identified. The final revisions in the guidelines will be derived from those experiences.

The tools used for the identification of learning needs will also be revised in preparation for surveying the learning needs of other occupational groups in other occupational settings. Greater precision in the items and fewer free-responses would facilitate the identification process. Also, some areas included in the questionnaires which contributed significantly to understanding the educational climate can be reduced or eliminated in future surveys. For example, items concerned with the extensive background data of the respondents elicit the kinds of information an instructor needs about the participants in a particular educational
program so that teaching and learning can be made relevant to the learners. The gathering of this kind of extensive information at the time of instruction will assume more importance than it would in preliminary survey efforts.

If the Learning Center operates effectively and makes a contribution to improved job performance in the area the School of Health Occupations serves, it can become a significant part of the total effort of preparing members of the health occupations at the vocational level to assume the responsibilities appropriate to their roles.

PARTICIPANT'S EVALUATION OF EDUCATIONAL PROGRAM

PROGRAM TITLE: ___________________________ DATE ____________

YOUR POSITION: RN ______ LPN ______ NURSE AIDE ______ OTHER (specify) ________

INSTRUCTIONS: Please read before answering questions.

Please be open and candid in your appraisal of the program you are just completing.
Your responses will be completely anonymous. Some of the questions may not be
pertinent to this particular program. Answer only those questions which apply.
In the column at the right place an "X" in the space which best reflects your
opinion about the question posed. The key is as follows:
UN means unsatisfactory; SAT means adequate, G means good, above average.
If a 'write in' response is required, please be as brief and clear as you can.

<table>
<thead>
<tr>
<th>AREA TO BE EVALUATED</th>

LEARNING NEEDS OF LICENSED PRACTICAL NURSES, NURSE AIDES, AND OPERATING ROOM TECHNICIANS AS SEEN BY STAFF DEVELOPMENT PERSONNEL IN HOSPITALS

The data obtained in this survey will not be used to identify you as an individual or the agency with which you are associated. Responses will be tabulated to reflect trends and educational needs within the selected categories of employers and employees.

INSTRUCTIONS: Please read before answering the questions.
Answer questions from your own personal point of view.
Many of the questions can be answered by placing an "X" in the space reflecting your view.
If a "write-in" response is required, please answer as briefly and clearly as you can.
Questions are included for three categories of health occupations: licensed practical nurses, nurse aides and operating room technicians. If any question is asked for which you do not know the answer, please write "Don't Know" in the space provided for the answer.
Please return the questionnaire in the stamped envelope provided as soon as possible.

(H1) Please indicate your role: RN_ IPN__ Other (specify) __________________________

LEARNING NEEDS OF LICENSED PRACTICAL NURSES

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF THE NEWLY GRADUATED AND EMPLOYED PRACTICAL NURSE:

Do the newly graduated and employed practical nurses have the knowledge and skill necessary to meet the demands of the beginning staff LPN role in your hospital? ____________ ____________ ____________ ____________ ____________ Yes ___ No ___ (D1)

IF YOUR ANSWER IS "NO", PLEASE ANSWER THE FOLLOWING QUESTIONS:

(H2) What deficits in skills or knowledge do you find? (Specify)

______________________________________________________________________________________

How does the education appear as an attempt to make up these deficits?

Instructing on the job in a one-to-one relationship ____________ ____________ ____________ ____________ Yes ___ No ___ (D2)

Providing classroom instruction ________________________________ Yes ___ No ___ (D3)

Requesting the LPN to train in-service training programs or unit personnel ____________ ____________ ____________ Yes ___ No ___ (D4)

Do you feel that the efforts to meet the training needs of the new practical nurses are effective? ____________ ____________ ____________ ____________ Yes ___ No ___ (D5)

(D1) Approximately what percent of the LPN\'s worked before this practical nurse graduated? (Specify) ____________

Do you feel that the LPN\'s worked before this practical nurse graduated were prepared for the beginning LPN role? (Specify)

For the acquisition of these skills, did you utilize an externship LPN in your institution? ____________ ____________ ____________ ____________ Yes ___ No ___ (D6)
Would educational programs by an outside agency to promote job readiness of LPN's facilitate the work of your department? . . . Yes ___ No ___(D7)

(H4) If you feel an outside agency could function effectively in helping new practical nurses in making up performance deficits for what course or programs do you see an immediate need? (specify)

(H5) How do you feel this would be an advantage for you? (specify)

(H6) In what ways might it prove to be a disadvantage? (specify)

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF LPN'S IN GENERAL IN YOUR HOSPITAL:

Does your department offer separate educational programs for LPN's? . . Yes ___ No ___(D8)

Does the content of any of your scheduled programs deal with the knowledge, skills and functions of LPN's? . . . . . . . . . . Yes ___ No ___(D9)

Is the content of any of your scheduled programs oriented toward the learning needs of LPN's beyond the immediate employment situation? . . Yes ___ No ___(D10)

(H7) What, if any, difficulties do you encounter in conducting effective educational programs for LPN's? (specify)

Do you feel LPN's need learning opportunities not now available to them? . . . Yes ___ No ___(D11)

If continuing education credits are eventually required for licensure renewal for LPN's, do you anticipate developing programs in your hospital to help meet this requirement? . . . . . . . . . . Yes ___ No ___(D12)

(H8) If continuing education programs for LPN's were made available by an outside agency, try to list a few courses or programs for which you see an immediate need. (specify)

(H9) Please indicate how you feel an outside agency could function best in the area of continuing education to complement your educational efforts without duplication. (specify)

47
LEARNING NEEDS OF NURSE AIDES

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF THE NEWLY EMPLOYED NURSE AIDE:

IN WHICH OF THE FOLLOWING WAYS ARE NURSE AIDES PREPARED TO FUNCTION IN YOUR HOSPITAL?

- Trained in your own basic nurse aide program ........................................... Yes ___ No ___ (D13)
- Accepted for employment without additional training if they have completed a basic course elsewhere .................................................... Yes ___ No ___ (D14)
- Require also a specialized training program for special areas ................. Yes ___ No ___ (D15)
- Apprentice training (learn by doing the job) ........................................... Yes ___ No ___ (D16)
- Require completion of the Red Cross Course in Home Care of the Sick ............................................................... Yes ___ No ___ (D17)

IF YOU DO CONDUCT YOUR OWN BASIC TRAINING PROGRAM FOR NURSE AIDES, PLEASE ANSWER THE FOLLOWING QUESTIONS.

Do you begin a class only when there are positions open? ..................... Yes ___ No ___ (D18)

(H10) How frequently do you find it necessary to conduct classes? (specify) ___________________________________________________________________________

Do you encounter any difficulties in conducting your training program for nurse aides? ........................................... Yes ___ No ___ (D19)

(H11) Indicate the training manual you use in your course. (specify) Own, American Hospital Ass. etc. __________________________________________________________________________

Do you feel the theory and basic skills for nurse aides could be taught effectively by an outside agency? ................................. Yes ___ No ___ (D20)

If an outside agency taught the pre-clinical portion of the nurse aide training program, could your own personnel then supervise them effectively in clinical practice? ................................................................. Yes ___ No ___ (D21)

If an outside agency did cooperate with you in teaching the pre-clinical part of the nurse aide training program, would this free the instructor now doing this to use her efforts in an area in which you want to work but have not had the time? ......................................................... Yes ___ No ___ (D22)

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF NURSE AIDS IN GENERAL IN YOUR HOSPITAL (AFTER INITIAL TRAINING):

Does your department offer activities or classes for the nurse aids? ................. Yes ___ No ___ (D23)

Does the content of any of your scheduled programs deal with the knowledge, skills and functions of nurse aides? ......................... Yes ___ No ___ (D24)

Is the content of any of your programs oriented to the learning needs of nurse aides beyond the immediate employment situation? ................. Yes ___ No ___ (D25)
(H12) What, if any, difficulties do you encounter in conducting effective educational programs for nurse aides? (specify) ____________

(H13) If continuing education programs were made available by an outside agency, try to list a few courses for which you see an immediate learning need by nurse aides but which is not now met by your department. (specify) ____________

LEARNING NEEDS OF OPERATING ROOM TECHNICIANS

Does the education department have any responsibility for the orientation of new ORT's? ................................................. Yes ___ No ___(D26)

Do you provide separate educational programs for ORT's? ................. Yes ___ No ___(D27)

Do ORT's attend educational programs scheduled by your department jointly with other levels of personnel? ......................... Yes ___ No ___(D28)

Do your ORT's have an organized educational program offered them or their unit? .......................................................... Yes ___ No ___(D29)

Do you feel your ORT's need learning opportunities not presently available to them? ......................................................... Yes ___ No ___(D30)

(H14) If continuing education programs for ORT's were offered by an outside agency, try to list a few of their learning needs that you are aware of. (specify) ________________________

(H15) Please make any comments you wish about the role of the School of Health Occupations in continuing education.
LEARNING NEEDS OF LICENSED PRACTICAL NURSES, NURSE AIDES AND OPERATING
ROOM TECHNICIANS AS SEEN BY REGISTERED NURSES WHO SUPERVISE THEIR WORK IN HOSPITALS

The data obtained in this survey will not be used to identify specific agencies or individuals. Responses will be tabulated to reflect trends and educational needs within the selected categories of employing agencies and employees.

INSTRUCTION: Please read before answering questions. Answer questions from your own personal point of view. Many of the questions can be answered by placing an "X" in the space reflecting your view.

If a "write-in" response is required, please answer as briefly and clearly as you can. Questions are included for three categories of health occupations: licensed practical nurses, nurse aides and operating room technicians. Do not answer questions in any section which pertain to a class of workers not actually working under your supervision.

Head nurses will constitute the major group of respondents, except in the operating room where the OR supervisor is also asked to fill out a questionnaire.

Please return the questionnaire in the stamped envelope provided as soon as possible.

(H1) Please specify your clinical service ____________________________

(H2) What is your title? Supervisor ___ Head Nurse ___ Other (specify) ____________

LEARNING NEEDS OF LICENSED PRACTICAL NURSES

IN WHICH OF THE FOLLOWING AREAS DO LICENSED PRACTICAL NURSES FUNCTION ON YOUR UNIT?

Direct nursing care of patients ______________________________ Yes ___ No ___ (D1)

Administering medications ________________________________ Yes ___ No ___ (D2)

Administering treatment ________________________________ Yes ___ No ___ (D3)

Team, leading ____________________________________________ Yes ___ No ___ (D4)

Conducting team conferences ______________________________ Yes ___ No ___ (D5)

Planning nursing care ____________________________________ Yes ___ No ___ (D6)

Evaluating nursing care ____________________________________ Yes ___ No ___ (D7)

Teaching patients and/or families ___________________________ Yes ___ No ___ (D8)

Supervising the work of others ____________________________ Yes ___ No ___ (D9)

Planning the work of others ______________________________ Yes ___ No ___ (D10)

Functioning as charge nurse on a unit ______________________ Yes ___ No ___ (D11)

Functioning as charge nurse of two or more units ____________ Yes ___ No ___ (D12)
Reporting to, and taking orders from, physicians ...... Yes ___ No ___ (D13)
Reporting to the on-coming shift .................. Yes ___ No ___ (D14)
Teaching personnel .................................. Yes ___ No ___ (D15)
Evaluating personnel ................................ Yes ___ No ___ (D16)
Charting ............................................. Yes ___ No ___ (D17)

(13) Other (specify)

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF THE NEWLY GRADUATED AND EMPLOYED PRACTICAL NURSES:

Do the newly graduated and employed practical nurses have the knowledge and skill necessary to meet the demands of the beginning staff LPN role on your unit? .... Yes ___ No ___ (D18)

IF YOUR ANSWER IS "NO"; PLEASE ANSWER THE FOLLOWING QUESTIONS:

(H4) What deficits in skills or knowledge do you find? (specify)

How do you attempt to make up these deficits?

One-to-one instruction by your personnel ............ Yes ___ No ___ (D19)
Instruction by education dept ...................... Yes ___ No ___ (D20)

Do you feel the efforts to meet the immediate learning needs of the newly graduated practical nurse are effective? ........ Yes ___ No ___ (D21)

Do you feel an outside agency could conduct programs (beyond the basic training program) which would develop a greater degree of readiness for full job responsibilities in the new graduate practical nurses? .... Yes ___ No ___ (D22)

(H5) If you feel an outside agency could function effectively in helping newly employed practical nurses in making up performance deficits, for what course or programs do you see an immediate need? (specify)

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF LICENSED PRACTICAL NURSES IN GENERAL ON YOUR UNIT:

Does your institution conduct a learning program for LPN's? .... Yes ___ No ___ (D23)

IF YOUR ANSWER IS "YES", PLEASE ANSWER THE FOLLOWING QUESTIONS:

Do the LPN's attend programs jointly with other levels of personnel? .... Yes ___ No ___ (D24)
Are any programs oriented to the specific job demands for LPN's? Yes ___ No ___ (D25)
Are any programs concerned with the learning needs of LPN's beyond the immediate employment situation? .... Yes ___ No ___ (D26)
Do you feel the educational programs are effective in meeting the learning needs of your LFN's? 

Yes ___ No ___ (D27)

(If) What, if any, difficulties do you see being encountered in conducting effective educational programs for LFN's? (specify)

Learning Areas of Nurse Aides

In which of the following areas do nurse aids function on your unit?

- Direct nursing care of patients
- Administering medications
- Administering simple treatments
- Administering or monitoring complex treatments (O2, IV, etc.)
- Administering or monitoring complex treatments
- Administering or monitoring complex treatments
- Observing patients and recording on charts
- Planning nursing care
- Evaluating nursing care
- Teaching patients and/or families
- Supervising the work of others
- Planning the work of others
- Functioning in the charge role on a unit
- Functioning in the charge role on two or more units
- Reporting to, and taking orders from physicians
- Teaching personnel
- Evaluating personnel
- Supervising and/or modifying menus
- Reporting to the on-coming shift

(If) Other (specify)
ANSWER THE FOLLOWING QUESTIONS IN TERMS OF THE NEWLY EMPLOYED NURSE AIDE:

IN WHICH OF THE FOLLOWING WAYS ARE NURSE AIDES PREPARED TO FUNCTION IN YOUR INSTITUTION?

- Trained in your own basic nurse aide training program  ........................................... Yes ___ No  (D45)
- Accepted for employment if trained in another basic nurse aide program  .................... Yes ___ No  (D46)
- Require also a specialized training program for specific area of work  ......................... Yes ___ No  (D47)
- Apprentice training (learn by doing on the job)  ......................................................... Yes ___ No  (D48)
- Require completion of Red Cross Course in Home Care of the Sick  ......................... Yes ___ No  (D49)

Does the present training required as preparation for being a nurse aide in your institution consistently prepare them for all the things you expect them to know or do on your unit on job entry?  ......................................................... Yes ___ No  (D50)

(D50) If your answer is "no", in what area, functions or skills must further training be provided? (specify) ____________________________

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF THE NURSE AIDES IN GENERAL ON YOUR UNIT:

Does your institution conduct a general learning program for nurse aides?  ........................................... Yes ___ No  (D51)

IF YOUR ANSWER WAS "YES," PLEASE ANSWER THE FOLLOWING QUESTIONS:

- Do the nurse aides attend programs jointly with other levels of personnel?  .................. Yes ___ No  (D52)
- Are any programs oriented to the specific job demands for nurse aides?  ...................... Yes ___ No  (D53)
- Are any programs concerned with the educational needs of nurse aides beyond the immediate employment situation?  ........................................... Yes ___ No  (D54)
- Do you feel the educational programs are effective in meeting the needs of your nurse aides?  ........................................... Yes ___ No  (D55)

(D55) What, if any, difficulties do you see being encountered in conducting an effective learning program for nurse aides? (specify) ____________________________

(D56) If educational programs for nurse aides were made available by an outside agency, list a few topics for which you see an urgent learning need. (specify) ____________________________
LEARNING NEEDS OF OPERATING ROOM TECHNICIANS
(Answer questions in this section only if you supervise ORT's)

(HL3) How many ORT's are on your staff? (specify) ________________________

(HL4) What is the nature of the work they do? Circulate ___ Scrub ___

Other (specify) _________________________________________________________

Is there a discrepancy between the knowledge and skill of the new ORT and the beginning level demands of the job? .................... Yes __ No __ (D56)

IF YOUR ANSWER IS "YES", PLEASE ANSWER THE FOLLOWING QUESTIONS:

(HL5) What expectations of them do you have for which the basic training program has not prepared them? (specify) ________________________

________________________________________________________

How do you attempt to make up this deficit?

One-to-one instruction by your personnel ......................... Yes __ No __ (D57)

Classes ......................................................... Yes __ No __ (D58)

(HL6) Other (specify) ___________________________________________________________

Are these efforts to make up performance deficits effective? ............ Yes __ No __ (D59)

Do you feel an outside agency could conduct a program which would help the new ORT reach the expected level of competency more quickly? .................... Yes __ No __ (D60)

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF YOUR ORT'S IN GENERAL:

Do you conduct a regular educational program for your ORT's within your own department? (i.e. unit in-service) ......................... Yes __ No __ (D61)

Do your ORT's attend learning programs developed by the education department in your hospital? ......................... Yes __ No __ (D62)

IF YOUR ANSWER IS "YES", PLEASE ANSWER THE FOLLOWING QUESTIONS:

Do they attend these programs jointly with other personnel? ................. Yes __ No __ (D63)

Is any of the content of these programs oriented to the specific job of the ORT's? ......................................................... Yes __ No __ (D64)

Does the content of these programs encompass broader learning experiences beyond the immediate job situation? .................... Yes __ No __ (D65)

Are these programs effective in meeting the learning needs of your ORT's? ......................................................... Yes __ No __ (D66)

Do you feel your ORT's need learning experiences not presently available to them? ......................... Yes __ No __ (D67)
(H17) If programs for ORT's were made available by an outside agency, try to list a few topics for which you feel there is a learning need. (specify)

(H18) Please make any comments you wish about the role of the School of Health Occupations in continuing education.
LEARNING NEEDS OF LICENSED PRACTICAL NURSES AND NURSE AIDES IN NURSING HOMES AS SEEN BY REGISTERED NURSES IN SUPERVISORY ROLES

The data obtained in this survey will not be used to identify specific agencies or individuals. Responses will be tabulated to reflect trends and educational needs within the selected categories of agencies and employees.

INSTRUCTIONS: Please read before answering:

Answer questions from your own personal point of view. Many of the questions can be answered by placing an "X" in the space reflecting your view.

If a "write-in" response is required, please answer as briefly and clearly as you can.

It is assured that in nursing homes direct supervisory responsibility for licensed practical nurses and nurse aides may be held either by the Director of Nursing Service or a registered nurse at some other level of charge nurse capacity. If both supervisory levels are represented, questionnaires should be filled out by both.

Please return the questionnaire in the stamped envelope provided as soon as possible.

(P1) Please indicate the types of patients cared for by your institution (specify)

(P2) Please indicate your position

LEARNING NEEDS OF LICENSED PRACTICAL NURSES

IN WHICH OF THE FOLLOWING ACTIVITIES DO LICENSED PRACTICAL NURSES FUNCTION IN YOUR INSTITUTION?

Direct nursing care of patients .......................................................... Yes ___ No ___ (D1)
Administering medications ............................................................... Yes ___ No ___ (D2)
Administering treatments ............................................................... Yes ___ No ___ (D2)
Treat leadin .......................................................... Yes ___ No ___ (D4)
Conducting nursing team conferences ............................................ Yes ___ No ___ (D5)
Planning nursing care ................................................................. Yes ___ No ___ (D6)
Evaluating nursing care ............................................................... Yes ___ No ___ (D7)
Teaching patients and/or families .................................................. Yes ___ No ___ (D8)
Supervising the work of others ..................................................... Yes ___ No ___ (D9)
Planning the work of others .......................................................... Yes ___ No ___ (D10)
Functioning as charge nurse of a unit or floor ................................ Yes ___ No ___ (D11)
Functioning as charge nurse of two or more units .......................... Yes ___ No ___ (D12)
Reporting to, and taking orders from physicians ........... Yes ___ No ___(D13)
Reporting to the on-coming shift ................. Yes ___ No ___(D14)
Teaching personnel ........................................ Yes ___ No ___(D15)
Evaluating personnel ..................................... Yes ___ No ___(D16)
Charting ......................................................... Yes ___ No ___(D17)

(H3) other (specify) ________________________________

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF THE NEWLY GRADUATED AND EMPLOYED PRACTICAL NURSE:

Do the newly graduated practical nurses have the knowledge and skill necessary to meet the demands of the beginning staff LPN role in your institution? ................................................................. Yes ___ No ___(D18)

IF YOUR ANSWER IS "NO", PLEASE ANSWER THE FOLLOWING QUESTIONS:

(H1) What deficits in skills or knowledge do you find? (specify)

How do you attempt to make up these deficits?

One-to-one instruction ........................................ Yes ___ No ___(D19)

Organized class instruction ................................ Yes ___ No ___(D20)

Do you feel your efforts are effective in meeting these immediate learning needs of the newly graduated practical nurse? ....... Yes ___ No ___(D21)

Do you feel an outside agency could conduct programs (beyond the basic training level) which would develop a greater degree of readiness for full job responsibilities in the new graduate practical nurse? ... Yes ___ No ___(D22)

(IF) If you feel an outside agency could function effectively in helping newly employed LPN's in making up performance deficits, for what courses or programs do you see an immediate learning need? (specify) ____________________________________________

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF LICENSED PRACTICAL NURSES IN GENERAL IN YOUR INSTITUTION:

Do your institution conduct a general learning program for licensed practical nurses? ........................................... Yes ___ No ___(D23)

IF NOT AT ALL OR "NO", PLEASE ANSWER THE FOLLOWING QUESTION:

Do the LPNs attend these programs jointly with other levels of personnel .......... Yes ___ No ___(D24)
Are any programs oriented to the specific job demands of LPN's in your institution?  

Yes  No  (D25)

Are any programs concerned with the educational needs of LPN's beyond the immediate employment situation?  

Yes  No  (D26)

Do you feel the educational programs you provide are effective in meeting the learning needs of your LPN's?  

Yes  No  (D27)

What, if any, difficulties do you encounter in conducting effective educational programs for your LPN's? (specify)

If educational programs were made available by an outside agency, list a few topics for which you see an immediate learning need. (specify)

LEARNING NEEDS OF NURSE AIDES IN NURSING HOMES AS SEEN BY REGISTERED NURSES IN SUPERVISORY ROLES

IN WHICH OF THE FOLLOWING AREAS DO NURSE AIDES FUNCTION IN YOUR INSTITUTION?

Direct nursing care of patients  

Yes  No  (D28)

Administering medication  

Yes  No  (D29)

Administering single treatments  

Yes  No  (D30)

Administering or monitoring complex treatments (O2, IV, etc.)  

Yes  No  (D31)

Coordinating patients and recording on charts  

Yes  No  (D32)

Cleaning: nursing care  

Yes  No  (D33)

Evaluating: nursing care  

Yes  No  (D34)

Teaching patients and/or families  

Yes  No  (D35)

Supervising the work of others  

Yes  No  (D36)

Knowing the work of others  

Yes  No  (D37)

Functioning in her role on a unit  

Yes  No  (D38)

Functioning in her role on two or more units  

Yes  No  (D39)

Functioning in her role on two or more units, including patient care,  

Yes  No  (D40)
Teaching personnel: Yes ____ No ____ (D41)

Evaluating personnel: Yes ____ No ____ (D42)

Supervising and/or modifying menus: Yes ____ No ____ (D43)

Reportin to on-coming shift: Yes ____ No ____ (D44)

(H9) Other (specify) ____________________________

Answer the following questions in terms of the newly employed nurse aide:

In which of the following ways are nurse aides prepared to function in your institution?

Trained in your own standard nurse aide training program: Yes ____ No ____ (D45)

Will accept for employment a nurse aide trained in another institution: Yes ____ No ____ (D46)

Also require a special training program for caring for patients in nursing homes: Yes ____ No ____ (D47)

Apprentice training (learning by doing): Yes ____ No ____ (D48)

Require completion of Red Cross Course in Home Care of the Sick: Yes ____ No ____ (D49)

Does the present training you require for your nurse aides in your institution consistently prepare them for all the things you expect them to know or do on job entry? Yes ____ No ____ (D50)

(H10) If your answer is "No", in what areas, functions or skills do you provide further training? (specify) ____________________________

If you conduct your own nurse aide training program for nurse aides, please answer the following questions:

Do you begin a class only when you have vacancies on your staff? Yes ____ No ____ (D51)

(H11) How many nurse aides do you usually train at a time? ______

(H12) How frequently do you find it necessary to conduct training programs? (specify) ____________________________

Do you encounter difficulties in conducting your own training programs? Yes ____ No ____ (D52)

(H13) If your answer is "Yes", specify the types of problems you encounter ____________________________

(H14) Indicate the training manual you use in your course (specify, e.g., American Hospital Ass., etc.) ____________________________
Do you feel the theory and basic nursing skills for nurse aides could
be taught by an outside agency? ........................................ Yes__ No__ (D51)

If an outside agency taught the preclinical part of the training program,
could your own personnel then supervise the clinical practice? ........ Yes__ No__ (D52)

Would having an outside agency teach the preclinical part of the train-
ing program work to your advantage? .................................... Yes__ No__ (D53)

(H15) In what ways would it help you? (specify) ____________________________

(H16) In what ways might it be a disadvantage? (specify) ____________________

ANSWER THE FOLLOWING QUESTIONS IN TERMS OF YOUR NURSE AIDES IN GENERAL:

Do you conduct a general learning program for your nurse aides? ........ Yes__ No__ (D54)

IF YOUR ANSWER IS "YES", PLEASE ANSWER THE FOLLOWING QUESTIONS:

Is the content of this program concerned with their specific functioning on the job? .................................................. Yes__ No__ (D55)

Does the content also encompass learning opportunities beyond the immediate employment situation? ......................... Yes__ No__ (D56)

Do nurse aides attend programs jointly with other levels of personnel? ................................................................. Yes__ No__ (D57)

Do you feel your programs are effective in meeting the educational needs of your nurse aides? ............................... Yes__ No__ (D58)

(If) What, if any, difficulties do you encounter in maintaining an educational program for your nurse aides? (specify) ______

Do you feel your nurse aides need learning experiences not presently available to them? ......................................................... Yes__ No__ (D59)

(If) If outside programs (off-site or training) were made available, or nurse aides, try to list a few areas in which you think

...
SURVEY OF THE CONTINUING EDUCATION NEEDS OF LICENSED PRACTICAL NURSES

The data obtained in this survey will not be used to identify specific agencies or individuals. Responses will be tabulated to reflect trends and educational needs within the selected categories of employing agencies and employees.

INSTRUCTIONS: Please read before answering.
Answer questions from your own personal point of view.
Many of the questions can be answered by placing an "X" in the space reflecting your view.
If a "write-in" response is required, please answer as briefly and clearly as you can.
Please return the questionnaire in the stamped envelope provided as soon as possible.

GENERAL INFORMATION

(1) Age: 18-30 31-40 41-50 51-60 over 60  (H2) Sex: M  F
(4) Year graduated (H4) Graduate of School of Practical Nursing  (H5) City
(6) Previous employment in nursing before present job: Years  Months

PREVIOUS EXPERIENCE

Hospital training program for operating room technicians __ Yes__ No__

OPT training program in an educational agency __ Yes__ No__

Had OR experience in nurse's training but didn't become a nurse __ Yes__ No__

Just learned direct training on the job __ Yes__ No__

Train in Government armed services program __ Yes__ No__

(H3) What year did you complete the training to become an CRT?____

Did you graduate from the OPT training program in the Evansville School of Health Occupations? __ Yes__ No__

(H4) How many years experience as an OR did you have before your present job? (specify)____

PRESENT EMPLOYMENT

(H5) Length of time in your present job: Years__ Months__

(H6) Nature of your job: Circulate__ Scrub__ Other (specify)____

(H7) Who supervises your work: Doctor__ RN__ Other (specify)____

(H8) Place of work: OR__ Pel. Room__ ER__ Other (specify)____

EDUCATIONAL EXPERIENCE YOU HAVE HAD DURING YOUR PRESENT JOB

(H9) Inservice education offered by employing agency: Often__ Occasionally__

Never__
Outside workshops and programs: Often ___ Occasionally ___ Never ___

List topics ____________________________________________________________

Have inservice programs offered by your employer met your learning needs? Yes ___ No ___ (D7)

If not, how have they failed? ____________________________________________

Have outside programs you have attended met your learning needs? Yes ___ No ___ (D8)

If not, how have they failed? Too technical ___ Too complex ___

Not well prepared ___ Not relevant to my job ___

Other (specify) ________________________________________________________

FUTURE LEARNING NEEDS

Does your employer expect you to know or do things which you haven't been prepared for? Yes ___ No ___ (D9)

thinkin' about your need to continue to learn and grow in your job and as a person, would you like more learning opportunities than are presently available to you? Yes ___ No ___ (D10)

Following are some areas in which programs could be developed. Please indicate your interest by checking "Yes" or "No" for each one.

Skills (procedures), how to actually perform specific procedures. Yes ___ No ___ (D11)

List the procedures ______________________________________________________

Understanding procedures: why they are done, effects, dangers, etc. Yes ___ No ___ (D12)

Equipment, purpose, operation and care . . . . . . . . . . . . . . . . . . Yes ___ No ___ (D13)

Specify type of equipment ________________________________________________

Operative procedures, effects and prognosis . . . . . . . . . . . . . . . . Yes ___ No ___ (D14)

Interpersonal relations . . . . . . . . . . . . . . . . . . . . . . . . . . . Yes ___ No ___ (D15)

**FUTURE CAREER PLANS**

Are you thinking of changing your job to another type of work in the health field? Yes **__** No **__** (D25)

For what reasons would you take courses in the areas you indicated an interest?

- Personal satisfaction Yes **__** No **__** (D26)
- To qualify for a raise in pay Yes **__** No **__** (D27)
- To qualify for a promotion (added job responsibilities) Yes **__** No **__** (D28)
- To improve your performance on your present job Yes **__** No **__** (D29)

If "credits" were required for certification renewal Yes **__** No **__** (D30)

To prepare for a job in another institution Yes **__** No **__** (D31)

Are you considering entering a training program for another type of work? Yes **__** No **__** (D32)

Which of the following reasons might, or might not, prevent you from pursuing further educational training:

- Lack of money Yes **__** No **__** (D33)
- Lack of time Yes **__** No **__** (D34)
- Program not available Yes **__** No **__** (D35)
- Program available not relevant to me or my job Yes **__** No **__** (D36)
- Program available but too far from home Yes **__** No **__** (D37)
- Lack of interest in attending Yes **__** No **__** (D38)
- Programs offered do not fit a time schedule Yes **__** No **__** (D39)

(H17) Other (specify) ____________________________
If program in your area of interest were made available locally which of the following types of program planning would be best for you?

- Morning classes: Yes ___ No ___
- Early afternoon classes (1:00 PM to 3:30 PM): Yes ___ No ___
- Late afternoon classes (4:00 PM to 5:30 PM): Yes ___ No ___
- Evening classes (7:00 PM to 9:00 PM): Yes ___ No ___
- Concentrated day-long workshops: Yes ___ No ___
- Several hours at a time but once a week over a period of time: Yes ___ No ___
- Several hours at a time several times a week over a period of time: Yes ___ No ___
- Joint programs with registered nurses: Yes ___ No ___

Would you attend classes at your own expense? Yes ___ No ___
Would you attend classes on your own time? Yes ___ No ___
Would you be more willing to attend classes if you had financial help? Yes ___ No ___

If the School of Health Occupations develops a continuing education program for operating room technicians, what is the very first program you would like to see offered? (specify) __________

Make any comments or wish about the learning needs of operating room technicians and how you think they should be met and what you would like to see the Evansville School of Health Occupations do in this area.
SURVEY OF THE CONTINUING EDUCATION NEEDS OF NURSE AIDES

The data obtained in this survey will not be used to identify specific employers or individuals. Responses will be tabulated to reflect trends and educational needs within the categories of employing agencies and employees.

INSTRUCTION: Please read before answering.
Answer questions from your own personal point of view.
Many of the questions can be answered by placing an "X" in the space reflecting your view.
If a "write-in" response is required, please answer as briefly and clearly as you can.
Please return the questionnaire in the stamped envelope provided as soon as possible.

GENERAL INFORMATION

(H1) Age: 18-30   31-40   41-50   51-60   over 60   (H2) Sex: M   F

(H3) Last grade of school ____________________

HOW DID YOU LEARN TO BECOME A NURSE AIDE?

Just learned on the job ...................................... Yes   No (D1)

Had some nurse's training ................................. Yes   No (D2)

Hospital training program for nurse aides ............ Yes   No (D3)

Nursing home training program for nurse aides ..... Yes   No (D4)

Red Cross Course in the care of the sick .............. Yes   No (D5)

(H4) How many years experience have you had in nursing before your present job? ________________

Project Monitor

LEA: Evansville-Vanderburgh School Corporation
ABSTRACT FOR PROJECT NO. 40-74-D-4
DEVELOPMENT OF A HEALTH OCCUPATIONS CONTINUING EDUCATION CENTER

This project was developed under a grant from the Indiana State Board of Vocational and Technical Education in cooperation with the Evansville School of Health Occupations, Evansville-Vanderburgh School Corporation.

In spite of burgeoning numbers and types of health care workers at the ancillary level and the pressure of increased demands for programs to insure worker competencies, few attempts have been made to identify their learning needs or to develop educational resources to meet them. This project was designed to investigate the learning needs of selected health occupations at the vocational level and develop guidelines for the establishment of a model for a health occupations continuing education center.

The learning needs of licensed practical nurses, nurse aides and operating room technicians were identified through questionnaires. Perceptions of their learning needs were similarly obtained from instructional and supervisory personnel.

Although generalizations could not be drawn about the occupational groups, the desired information about types of learning needs, numbers of potential participants in programs and possible problems in providing educational offerings was obtained.

Some significant findings were as follows:

1. The extremely diverse learning needs of the occupational groups could be met best through establishment of a "learning center" rather than a narrowly defined "continuing education center".

2. There are sufficient numbers in the groups studied willing to attend programs on their own time and at their own expense to warrant offerings by an outside educational agency.

3. The educational resources of the School of Health Occupations are adequate to provide programs for selected learning needs although varying degrees of cooperation with employing agencies would be required depending on the instructional objectives.

On the basis of the findings, guidelines for a model learning center were developed. It was recommended that the Evansville School of Health Occupations Learning Center be established and tested in operation offering selected programs based on the learning needs identified.
