The refunding of the California Video Resource Project (CVRP), new Federal Communications Commission cable rules, various newsbits, a calendar of events and reviews of print materials are presented in this issue of the CVRP newsletter. A general index to the ten previous issues of the newsletter is given, along with indexes to the reviews of videotapes which have appeared in previous issues. (HAB)
All things change, and the CVRP is no exception. We have been refunded for one more year for $54,000 in Library Services and Construction Act (LSCA) monies and will be heading in new directions. Our two targets will be: 1.) consultancy (including on-site visits) to librarians in California on their specific video and cable tv needs and problems, and 2.) publication of the CVRP Patch Panel at its present frequency and quality.

Since Craig will be busy in Hollywood with the BIONIC WOMAN (as of July 1 he is an Associate Producer at Universal Studios) guest technical writers will contribute Technosphere articles and advice. Our good friend, Major Macula, will continue his column. The Patch Panel editor is changing, too. Lee will be taking a full-time position in the Mission Branch on July 1, and I will take over as editor.

Videotape reviews will continue to be a Patch Panel priority. We will only purchase tapes that we can use in individual consultancies and workshops, rather than for general library use.

Immediately following the AAL programs in July, the CVRP will hold a workshop in cooperation with the Extension Services' Chapter of the California Library Association at Richmond Public Library on July 29, entitled "Out of Site---Library Extension Services and the Video Process." We will follow it with an all-day video production workshop on August 21, in cooperation with Helene Kosher, at the Pinole Public Library. Still more distant plans include a videotape editing workshop to make our equipment available for post-production work. The time and place is still to be decided.

If you want more information, please write or call. Our major concern is to respond to your needs. Keep in touch, and let us know what we can do for you.
CVRP PATCH PANEL
IS A BI-MONTHLY PUBLICATION WHICH IS THE OFFICIAL VOICE OF THE CALIFORNIA VIDEO RESOURCE PROJECT (CVRP), A LIBRARY SERVICES AND CONSTRUCTION ACT, TITLE I—FUNDED PROJECT DESIGNED TO EXPERIMENT WITH AND REPORT ON USE OF VIDEO AND CABLE TECHNOLOGIES AS EXTENSIONS OF LIBRARY SERVICES, PRIMARILY BUT NOT EXCLUSIVELY IN CALIFORNIA. VOLUME I, ISSUES 1-10 (DEC 74-JUNE 76) $10; VOLUME II, ISSUES 1-6 (JULY 76-JUNE 77) $10. BOTH VOLUMES ARE SOLD ONLY AS SETS. FOR MORE INFORMATION CALL (415) 558-5034, OR WRITE CVRP, SAN FRANCISCO PUBLIC LIBRARY, CIVIC CENTER, SAN FRANCISCO, CALIF. 94102.

REPRODUCTION IS PERMISSIBLE PROVIDED FULL CREDIT IS GIVEN TO BOTH THE AUTHOR AND THE CVRP PATCH PANEL.
Cable Enters New Era

In early May, the FCC adopted new access and channel capacity rules that should be of interest to all librarians. To compare the old access rules with the new:

<table>
<thead>
<tr>
<th>1972 rules</th>
<th>1976 rules</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Only systems having over 3,500 subscribers and located within the most populous 100 urban markets need comply.</td>
<td>2. All systems having over 3,500 subscribers, regardless how near a major TV or urban market, must comply.</td>
</tr>
<tr>
<td>3. Three access channels: one for public access, one for educational access, one for municipal access.</td>
<td>3. Only one composite access channel, another to be made available only after &quot;full use&quot; of the composite.</td>
</tr>
<tr>
<td>4. Rebuild all systems to 20-channel capacity, two-way by 1976.</td>
<td>4. Rebuild all systems to 20-channel, two-way non-voice return capacity by 1986.</td>
</tr>
<tr>
<td>5. Provide one non-broadcast channel for every broadcast channel carried.</td>
<td>5. Deleted.</td>
</tr>
</tbody>
</table>

Analysis: While expanding the availability of cable television access to communities outside the major urban settings, new Federal Communications Commission rules demonstrate a dramatic relaxation of all other access and rebuild requirements. The two are closely allied, since without adequate channel space on a cable system (many systems still have only twelve channels) there can be no access space. However, if a cable company receives duplicate network programming—from both a local channel and a distant channel—the FCC allows even 12-channel systems to eliminate (black out) the distant signal and replace it with access programming.

The true test of these new rules will be the ability of local educators, municipal agencies and officials such as libraries and librarians, and public interest users to cooperate and resolve the inevitable conflicts of joint channel use. Cable has just entered Phase II. ---ROBERTO ESTEVES---
**corrections**

Is my face red! After Issue #9 came back from the printers, we found several places where information was incorrect. On page 9, under Tripods, Heads and Dollies, where it says "next time around, I'll buy a "Swanson..." it should say a "Swanson Quick-set Tripod-Dolly," to accept a "Miller (not Mill) 16mm Fluid Head." In addition, on page 8, under Audio Mixers, fourth line, it should be a Sony MX-12 (not MS-12). In the Videotape Reviews, page 16, the first Producer/Distributor should be Gerry Jarocki (not Jaroki).

Then, to add insult to injury, I discovered that we had printed an incorrect Producer/Distributor in Issue #8. In Videotape Review #73, SHARING BOOKS WITH YOUR PRE-SCHOOL CHILD, it should read: Producers: Mary Pierce, Karol Seehaus, and John Sturgeon; and Distributor: Mary Pierce, Long Beach Public Library, Long Beach, CA 90802. Apologies to everybody.

**awards**

The very same videotape in the above correction, SHARING BOOKS WITH YOUR PRE-SCHOOL CHILD, along with its companion scrapbook, were the winners of the 1976 John Cotton Dana Award for promoting and publicizing libraries and library services. Congratulations to all who were responsible for them.

"NEWSbits" is a regular feature of the CVRP Patch Panel. If you hear of anything you think our readers would be interested in, please send it to the Editor, CVRP Patch Panel, at the address on page 2.

**literacy**

ACAA's Public Information Office in March released "Literacy and the Nation's Libraries," in which it was reported that "21 million Americans are functionally illiterate, which means they can't read want ads, job applications or long distance dialing directions. Obviously, too, the vast (print) resources of the nation's libraries are lost to them. (my emphasis)."
## CALANDER

### Bay Area

July 29---Richmond. Workshop, "Out of Site---Library Extension and the Video Process." Richmond Public Library, CVRP, in cooperation with California Library Association, Extension Services Chapter. By reservation only. $5. Contact: Larry Cross, Mobile Outreach Project, Richmond Public Library, Richmond, CA 94804 (415) 234-6632

August 14---San Francisco. Videotape workshop x403, through UC Berkeley. 3 quarter units, $155. Lone Mountain College Video Center, 2800 Turk Street, San Francisco. Contact: Ginger Richardson (415) 861-6833 or Jane Turner (415) 642-4101.

August 21---Pinole. Workshop on video production at Pinole Public Library, CVRP, in cooperation with Helene Kosher. By reservation only. Contact: Roberto Esteves, CVRP.

October 31-November 4---San Francisco. American Society for Information Science Annual Convention. Hilton Hotel, SF. Contact: ASIS, 1155 16th St., NW, Washington, DC 20036

### United States

July 19, 21, 22---Chicago: Video/Cable Communications Section's programs at ALA. 19th--"Video Visionaries #1" (showing of library-produced videotapes over hotel CCTV system, with viewing suite). 6-8 pm, Conrad Hilton, Private Dining Room #3. 21st--"Video Distribution Panel" (librarians and software distributors discuss acquisition and purchase problems). 2-4 pm, Palmer House, Private Dining Room #14. 22nd--"Video Visionaries #2" 7-9 am, Palmer House, Private Dining Room #3. Contact: Roberto Esteves, CVRP.

### California

December 2-6---Los Angeles. California Library Association Conference. "Video Software," sponsored by Video/Cable Chapter and CVRP. Marriott and Sheraton Hotels. Contact: Roberto Esteves, CVRP.

If you would like your workshop or event listed in "CALENDAR," send all the information (what, when, where, who to contact) to Editor, CVRP Patch Panel.

This is a new monthly periodical that libraries ought to know about. Published by the same people who do VideNews, it looks very good. Similar in format to Educational and Industrial Television, the first issue was a glossy compendium of news and comment, hardware reports, software reviews, and articles ranging from "Sound for 4-inch" (excellent—written clearly and simply enough for the non-professional) through communications satellites and computers to "microcams" (new 8-lb. color cameras for broadcast use). Get it. -re-

WHAT'S NEW IN VIDEO, TV and FILM COMMUNICATION, Vol. 1, No. 1, MPCS Video Industries, Inc., 514 W. 57th St., New York, NY 10019. (212) 586-3690. 1976 $5.00

This catalog of video equipment and accessories is available from the MPCS video center in New York, and is a most comprehensive one-step reference guide to new prices and new goodies for better video production. -re-

Even though information on access and recent FCC rules is not included, the questions asked in this booklet are ones I frequently have had to deal with. The simple answers are amazingly perceptive and clear. Also included is a short glossary, and a list of the top 100 TV markets (no longer important since new access rules rely upon system size, not location in an urban market). -re-

MAJOR MACULA

QUESTION: You say on page 10 of the Jan/Feb '76 Patch Panel that a properly recorded "high density" tape can't be played back on a regular machine. Tell me more? There is some confusion among suppliers as to "high energy," "high output," and "high density," and I must confess I am confused as well.

Ken Winslow, Associate Director
Public Television Library

ANSWER: Well, I can understand your confusion. It was impossible for me to come up with a consistent answer to this one. Information and definitions vary, depending on which videotape engineer you talk to. In fact, I could not find anything called "high output" tape. Otherwise, the story is this: high energy tape is designed to provide improved video recording characteristics (which essentially means a better signal-to-noise (s/n) ratio) for any videotape recorder. High density tape provides even better s/n characteristics, but can be used only on VTRs which have a NORMAL/HIGH DENSITY switch (such as the Sony AV-8650 or Panasonic's similar AV-3160) or on VTRs which have been adjusted so they can use high density tape. Here enters the confusion. Most high density tape manufacturers claim that the required adjustment is necessary only to recording and erasing currents of the VTR, and that properly recorded high density tapes will play back on any (un-adjusted) VTR. But that isn't so. In my experience, such tapes will not play back properly on an unadjusted VTR. There is also a difference of opinion concerning the VTR adjustments. Some engineers say that a standard VTR could be modified with the addition of a switch and some simple circuitry, so that both types of tapes could be used. Others say that such a modification is much more complex than it might seem at first glance, and therefore the user must decide which type of tape the machine will use, or be faced with the prospect of continual adjustment and readjustment. Your best bet, of course, is to get in touch with the senior tape engineer of whatever manufacturer is supplying the tape you're using.
INDEX TO CVRP PATCH PANEL

The following index covers all 10 issues of Volume 1 of the Patch Panel. Videotape titles are ALL CAPITALS (underlined); print titles are Upper and Lower Case (underlined) and periodicals are marked (p); article titles are "In Quotation Marks"; Patch Panel sections are ALL CAPS (no underline). Each entry is followed by the issue number and page number.

INDEXES TO VIDEO TAPE REVIEWS

On the following seven pages are three separate indexes to Videotape Reviews in the CVRP Patch Panel, Issues #1-9. Starting below is the Title Index. Each title is followed by an issue number and a review number (in parentheses). If a title is marked with an asterisk (*) we own it. Each series entry includes titles we have reviewed and/or own in that series.

On page 15 is the Producer/Distributor Index. Again, following each entry is an issue number and review number in parentheses. All distributors are marked as such. We have listed a separate distributor if there was one; otherwise the producer is the distributor.

The Subject Index begins on page 16. If you see a videotape(s) on a subject you’re interested in, you must then check the Title Index on page 13 for the issue and review number to locate the review.
