Educators have long recognized the need for schools to train students adequately for the world of work. This training includes both the necessary technical skills and employability skills. This document, the Employability Skills Guide, is Duval County Schools' part of such a plan to meet this need. The performance objectives utilized in this guide are designed to aid students in learning ways to become more effective in both work and life situations. More specific objectives of the Work Experience Program are to develop skills in the areas of job finding, job retention, proper attitude, money management, and buying practices. Career exploration is a necessity and is stressed. The course in this guide is designed to involve students in Grades 7, 8 and 9 in the employment-finding procedures, employer-employee relationships, and experiences that will directly benefit the student in choosing a future vocation. During the one hour instruction period that this course runs, the student will learn about the world of work, personality traits, attitudes, appearance, and job information. (Author/JM)

This course is designed to involve students in the employment-finding procedures, employer-employee relationships and experiences that will directly benefit the student in choosing a future vocation. During this one hour instruction period the student will learn about the world of work, personality traits, attitudes, appearance and job information.
Many youngsters may never reach their potential in life for many reasons, two of which are: (1) Leaving school (dropout) prior to receiving life's basic education, (2) Not having a saleable skill or job experience that is necessary to enter the world of work if he or she must leave school.

Educators have long recognized the need of the schools to adequately train students for the world of work. This training includes both the necessary technical skills and employability skills. This Employability Skills Guide is Duval County Schools part of such a plan to meet this need.

The performance objectives utilized in this guide are designed to aid students in learning ways to become more effective in both work and life situations. More specific objectives of the Work Experience Program are to develop skills in the areas of job finding, job retention, proper attitude, money management, and buying practices. Career exploration is a necessity and must be stressed.

However, the enthusiasm with which you approach your students, the involvement with which you approach the subject, and the effort you put into each unit of instruction will determine the effectiveness of your program.
ACKNOWLEDGMENTS

A special expression of gratitude is extended to Mr. Murry Mims, Mr. Paul Presha and Mr. Albert Moss, Teacher/Coordinators Junior High Work Experience Programs, who have worked diligently to develop this guide during the summer workshops.

An acknowledgment and our sincere appreciation is due Mr. James E. McLawhorn for his work in the employability skills area while fulfilling the requirements for a doctoral degree by Nova University.

One of the Best Family Ski Bargains in the World!

Of all big-time ski resorts, Italy's Cervinia is about the only one where inexperienced skiers can ride to the very top with the experts and enjoy coming down. Even children can manage most of the runs. It's an ideal family playground.

Cervinia's cable-car lifts carry you right to the roof of Europe, to a snow-covered glacier on the Swiss border so that the neighboring peaks of the famous Matterhorn seems almost within reach. What's more, the great altitude, combined with surprisingly gentle slopes, makes for some fabulously long runs.
