PRE-ASSESSMENT

Part I: The Cognitive Interpersonal Perception Task

A. Compare in writing (on a separate paper), or on audiotape, three theories of interpersonal perception. Give two differences and two similarities between Theory A and Theory B; between Theory B and Theory C; and between Theory C and Theory A.

B. In writing (on a separate paper) or on audiotape, state the names of three people connected with research in each of the theoretical frameworks you discussed in the previous question. Cite at least one important piece of research in each theoretical approach. Specify two implications of these findings for teaching and learning with special children. Select the theoretical approach you feel is the one you would choose to use and give three reasons for your preference.
C. In writing or on audiotape, use the definition of each of the following and state one difference and one similarity between each pair.

Part IV: Interpersonal Perception Evaluation

Name __________________________ Male _____ Female _____

Age _____ years months  Schooling completed ______________________

Number of siblings in your family older than you _____ younger than you _____

Each of the pictures on pages 00–00 of your Resource Book shows something happening in a family or in school. You will be asked questions about the pictures. Answer the questions about the child the arrow is pointing to.

For each question choose the one answer you think is best. Place a check mark (✓) in the space next to the answer you choose. It is important to say what you think. If you are not sure, guess. Be sure that the number above the question you are looking at is the same as the number on the picture you are looking at.

Here is an example of the way you should answer the question:

Look at Picture A. Now look at the questions for Picture A below:

If you need to do some additional reading, the list of selections begins on page 15 of the module. If you are going to start the module right away, turn to page 17 and begin.
