FOREWORD

In recent years there has been an increasing amount of interest devoted to understanding different ethnic minority and culturally different students in education institutions. This is particularly true in desegregated public schools where educators are beginning to recognize cultural diversity and the richness of multiethnic traditions.

One resource that educators in desegregated school settings have turned to for increasing their knowledge and understanding of ethnic minority and culturally different students is literature. They are seeking information in an effort to learn what the public schools can do to effectively meet the education needs of a culturally pluralistic student population, learn of the significant variables that influence academic achievement among ethnic minority and culturally different students, learn of new program and education strategies that have been effective and delivering educational services to ethnic minority and culturally different students, learn of ways for modifying traditional education curricula to reflect the many contributions made to American society by ethnic groups other than those of Anglo-Saxon heritage, and learn of the personal and professional attitudes and behavior that are essential for working with ethnic minority and culturally different students.

The proliferation of literature about the ethnic experience has been significant during the past decade, despite the fact that literary historians and scholars have bypassed the contributions of minority writers and have ignored the literature which relates to multiethnic experiences. There is a need to recognize the value of literature that deals with the ethnic experience. There is also a need to compile the literature that has emerged for sharing with individuals and groups who are concerned with increasing their understanding of ethnic and cultural differences in desegregated school settings. This bibliography was developed in response to such a need.

This selected bibliography was prepared for the Racine, Wisconsin School District by the Title VII (Emergency School Aid Act) project for
use by teachers, administrators, counselors, psychologists, social workers, librarians, and other professional and support personnel employed by the district. All of the materials listed in the bibliography - professional articles, books, pamphlets, films, filmstrips, audiotapes and other reference materials, have been obtained by the Title VII project and for use throughout the school district. The project intends to continue to obtain materials similar to those included in this bibliography and will publish another edition in August, 1977.

In collecting the materials and preparing this bibliography, we were guided by the recommendations of a large number of professional colleagues in the fields of multicultural education and human relations, many of whom are also members of the cultures involved.

We wish to convey our sincere thanks to all who assisted us in preparation of this bibliography. We also wish to thank the Racine School District for publishing the bibliography and distributing it to all of the schools in the district. We hope that the materials listed in the bibliography will strengthen your understanding of other ethnic and cultural groups.

Films

"BEYOND BLACK AND WHITE." Motivational Media. 16mm, color, 28 min., sound.
This is a film about prejudice - born out of ignorance; attitudes which are changing; and the progress being made to see to it that no one is denied their right to human dignity. (7 - 12)

BILL COSBY ON PREJUDICE. Pyramid, 1971. 16mm, color, 25 min., sound.
Within the format of a TV talk show, Bill Cosby, as the man on the street, systematically disowns the human race. He gathers all the typical cliches and stereotypes about particular groups of people into one long monologue, creating a super-bigot who doesn't like anyone. The richness of Cosby's film offers several directions for study. (6 - 12)

"EYE OF THE STORM." Xerox. 16mm, color, 25 min., sound.
Documents the Riceville experiment in which a class of third graders in an all-white farming community have a dramatic encounter with prejudice. (7 - 12)

"LITTLE BIGOTS." Aims. 16mm, color, 11 min., sound.
Helps us understand that the differences among people are superficial and that we shouldn't prejudge people. A fun approach to a sensitive problem, via pantomime, music and rhyme. (5 - 12)

A LITTLE FABLE. AEF. 16mm, color, 5 min., sound.
Happy Chollie, the orange blob, finds a new friend who is blue. But Chollie's mother says he can't be invited to dinner. Why? Well you see, he is not orange. A delightful and humorous film which teaches through indirection. (4 - 9)

PREJUDICE: A LESSON TO FORGET. AEF. 16mm, color, 23 min., sound.
A human, honest, direct film that attempts to make us aware of our attitudes and to show us how easily and tragically these attitudes can spread. (5 - 12)

THE PREJUDICE FILM. Motivational Media. 16mm, color, 29 min., sound.
The historical origins and contemporary forms of prejudice in our society are examined. Emphasis is on the individual's role in contributing to or helping to eradicate the attitudes which result in discrimination and other injustices. Patterns of racial, ethnic, religious prejudice (as well as that against other minorities or groups of people) are explored logically...without prejudice. A series of vignettes demonstrates some of the daily events, typical comments, and attitudes which perpetuate prejudice and discrimination. Viewers will recognize the relationship between the seemingly "harmless" joke and the ultimate manifestation of prejudice - violence or even genocide. Narrated by David Hartman. (5 - 12)
"THE BASIS OF OUR BELIEF: WHITE OVER BLACK." Multi-Media. 1fs, 1 cassette.
This is a program about racism. It is a description of the beliefs of Elizabethan Englishmen about the Black Africans they encountered in the late 16th and 17th centuries. It's not a nice program. Many of the ideas are shocking and inhuman. But, men believed in them. And these men settled our country and became its leaders. Their beliefs became a part of the American tradition that all of us have inherited. This program does not attempt to refute those beliefs, but rather to help us understand them as we attempt to resolve the problems of racism. This filmstrip/cassette must be used wisely and carefully. (7 - 12)

THE BLACK AND WHITE STATUE. Schloat, 1970. 1fs, 1 cassette, 1 record.
The Black and White Statue is not meant to teach one specific lesson or idea. Rather, its purpose is to engender discussion, to help bring feelings and thoughts out into the open where they can be examined. These are times of social change and of great social sensitivity as well. The questions that follow the narration in the guide are intended to aid the teacher in eliciting ideas and guiding the students in examining their own feelings. (4 - 12)

EXPLODING THE MYTHS OF PREJUDICE. Schloat. 2fs, 2 cassettes.
Created by a noted anthropologist, this unique program invalidates familiar prejudices with figures and simple explanation. An excellent discussion starter to stimulate students to identify and re-evaluate prejudices of their own. (7 - 10)

PREJUDICE! Guidance Assoc. 2fs, 2 cassettes.
Examines social and personal bigotry through the writings of Plato, Shakespeare, Lord Chesterfield, Henry James and others. (9 - 12)

"PREJUDICE: HARVEST OF HATE." AVNA. 2fs, 2 cassettes.
The stated purposes of this two-part sound filmstrip with cassettes are to: (1) to help young people recognize the many types of prejudice that have been part of the growth and development of the U.S.; (2) help young people realize they are capable of prejudice; and (3) help young people realize the many facets of prejudice and the consequences of negative prejudice upon society.
Part 1: "Sowing the Seeds" describes the patterns of prejudice that appear throughout the history of the western world and our country.
Part 2: "The Bitter Fruit" reflects upon the emotional and psychological price racial prejudice extracts in human misery from those who can least afford to pay it. (7 - 12)

PREJUDICE IN AMERICA: THE JAPANESE AMERICANS. Multi-Media. 4fs, 4 cassettes.
How do the institutions of our society look to an ethnic group that has suffered both legal and institutional racism, as well as social prejudice on every level? What happens to a people who live through such an experience? A view of the U.S. through the eyes of the Japanese American. (7 - 12)
SEEDS OF HATE: AN EXAMINATION OF PREJUDICE. Schloat, 1973. 2 fs, 2 cassettes. Examines prejudice from two angles, those who are prejudiced and those who are victims of prejudice. Beginning with the psychological groundwork of prejudicial decision making, the program stresses the importance of social learning and studies and first-person interviews. The program details prejudice in action - desegregation, discrimination, scapegoating, avoidance, verbal aggression, stereotyping, physical violence and genocide. By enabling students to look into the mechanisms of their own prejudices, this presentation paves the way for alternative views of both themselves and others. (7 - 12)

SCAPEGOATING/IMPACT OF PREJUDICE. Sunburst, 1973. 2 fs, 2 cassettes. Through the study of three specific cases - the Salem witch trials, the Warsaw ghetto and the rise of McCarthyism - the program shows what motivates individuals and societies to employ the mechanism of scapegoating. Actual interviews with people of diverse backgrounds increase student awareness of the personal, social and economic effects of prejudice. Part I - Scapegoating. Part II - Impact of Prejudice. (7 - 12)

STEREOTYPING/MASTER RACE MYTH. Sunburst, 1973. 2 fs, 2 cassettes. Probes the working of prejudice; what it is, how it grows, how it is mutually destructive to all concerned, and how it can be eradicated. Stresses the importance of facts and shows that prejudice has no basis in fact. Part I - Stereotyping. Part II - Master Race Myth. (7 - 12)

WHAT IS PREJUDICE? Minnesota Mining, 1970. Tape & worksheet. To communicate what prejudice is. To trace the underlying causes of prejudice without dealing directly with racial prejudice. To show how prejudice is reflected in language. To define and lead the student to understand "self-fulfilling prophecy." The student should be able to verbalize the principle that most prejudice originates because a person makes up his mind before the facts are found and then selects only those facts which fit what he wants to prove. (7 - 12)

Games

This is a game in which a low mobility, three-tiered "frontier" society is built through the distribution of wealth in the form of chips. In simulated fashion the trading creates a society of haves and have-nots. In subsequent rounds, a triangle or a circle can acquire enough wealth to replace a member of a higher group, but the mobility rate will not be high. As with all simulations, the discussion session following the game is as vital as the game experience itself. (7 - 12)

GROB. Houston Council on Human Relations.
GROB (green, red, orange, blue) is a simulation game examining Black-White-Brown issues in which participants will experience prejudice as senders and receivers and winning and losing by chance or through purposeful efforts. (7 - 12)

STAR POWER. Simile II, 1969.
This is a game in which a low mobility, three-tiered society is built through the distribution of wealth in the form of chips. In simulated fashion, the trading creates a society of haves and have-nots. As with all simulations, the discussion session following the game is as vital as the game experience itself. (7 - 12)

SYSTEMS. UCCM, 1972.
System is a four-round trading game where players find themselves in a society which rewards people according to their wealth; lets those in control write the rules; tempts people with a freedom which may or may not be enjoyable; allows mobility to shrewd players; and sets ownership of the machines. Although some of what happens is the result of luck or circumstance, most is directed by decisions made by the players. Because of this, each game is somewhat different with new dynamics and new results. So the game director must observe the movement of people, emotions, and politics during the game, making sure that these are adequately dealt with during the discussion which follows the game. (7 - 12)

This kit provides a series of experiences to bring into focus the important value dimensions of our lives. To clarify what our values are, to understand how they affect our encounters and relationships with others and with the changing world around us. (7 - 12)

Values is a journey of discovery about yourself and others. As the name implies, the focus of the game is values, what is important, significant, perhaps ultimate for you, and why. During play you will be exploring issues, problems, conflicts, and opportunities. You will be able to clarify your stance on many questions and help others to clarify theirs. What do you think or say about various ideas, and what do you feel and do about them? (5 - 12)
The kit attempts to give participants an introduction to the basic processes of interpersonal relations - getting acquainted, developing trust, disclosing information about oneself, and providing feedback to others. One purpose of these investigations is to prepare the group for participation in the more personally involved activities in following parts. By helping participants learn about one another and creating an atmosphere of trust in which all members are willing to share their thoughts and feelings fairly openly, these investigations seek to transform the groups, so that they can more profitably work together. (6 - 12)

A chief cause of problems in interpersonal relations, as well as conflicts between groups and nations, is discrepancies in perception. All persons have a unique set of past experiences that affects the way they view the world. Perspectives then, deals with the problem of seeing the world through another's eyes, respecting that person's vantage, and accepting differences in frames of reference without rejecting that person. (6 - 12)

Perhaps the most pernicious threat to the dignity of the individual in our society is the process of stereotyping. The investigations in this part provide a systematic exposure to the stereotyping process by deliberately building stereotypes and then destroying them. In the course of building and destroying stereotypes, the participants have an opportunity to examine the basis of stereotypes as well as to learn a stereotype-dis-solution and conflict-reduction model through experience. (6 - 12)

BLACKS & WHITES: Communications, 1970.
The role identity and neighborhood action game. Black people become the agents of change in a game emphasizing the absurdity of living in different worlds while playing on the same board. A black player on welfare ceases to be an abstract factor. Instead he becomes a direct concern to the other players. Nobody pretends to know what it is like to live in another's skin or presumes to be a deadly serious roleplayer, or treats the vagaries of the game as a universal map of race relations. What happens is that the players join with each other in a community spoof on the artificialities of a racist tradition. (7 - 12)

This game is designed to explore personal feelings and some of the variables that affect feelings. It is based on the belief that honest recognition of feelings is one of the first steps to understanding self and improving the quality of relationships. (7 - 12)

A game designed to give more privileged Americans a taste of some of the emotional, physical, and social pressures that work on the poor of an inner city neighborhood. Each player takes the role of a poor person and tries to improve that person's life while coping with the frustrations of the poor. When used in conjunction with other activities, players may be sensitized to why the poor act as they do, why slums continue and why they sometimes change. (5 - 12)
