Instructional materials in the area of food service are presented in nine sections, each containing two or more units of instruction: orientation, equipment, safety, sanitation, production, service, purchasing, menu planning, and supervision. The instructional materials are written in terms of student performance using measurable objectives. Criterion-referenced evaluation instruments are provided to measure student progress. Each unit contains objectives, suggested activities, instructional materials, and references. Information sheets, transparency masters, assignment and/or job sheets, and criterion tests are included. Drawings and photographs of equipment, utensils, processes, and products supplement the units. (MF)

The Mid-America Vocational Curriculum Consortium, Inc. is a group of states striving to provide needed curriculum materials to the vocational instructors within the member states. Because this area of training, Food Service: Production and Service, is such an important and relevant area of instruction at this time, the members of MAVCC are especially pleased to have the opportunity to develop and disseminate this publication.

The purpose of this publication is to assist teachers in improving instruction. As these materials are used, it is hoped that student performance will improve and that students will be better prepared to assume a role in a food service occupation.

Instructional material in this publication is written in terms of student performance using measureable objectives. This is an innovative approach to teaching that accents and augments the teaching-learning process. Criterion referenced evaluation instruments are provided for a uniform measurement of student progress. In addition to evaluating recall information, teachers are encouraged to evaluate the other areas including process and product as indicated at the end of each instructional unit.

Every effort has been made to make this publication basic, readable, and, by all means, useable. Three vital parts of instruction have been intentionally omitted from this publication: motivation, personalization, and localization. These areas are left to the individual instructors and the instructors should capitalize on them. Only then will this publication really become a vital part of the teaching-learning process.

Special gratitude is expressed to Irene Clements and Clifton Braker for supervision during the writing of this manual.

Appreciation goes to the Graphics division: Bob Rea, Manager of Art and Layout, and Mike Adair, Jon Dickey, and Paul Evans, Illustrators, for the illustrations and drawings used in this publication; Cindy Johnson, Karen Bose, and others in Word Processing for typing.

The printing staff of the Oklahoma State Department of Vocational and Technical education are deserving of much credit for printing this publication.
Instructional Units

The Food Service: Production and Service curriculum includes nine areas. Each area consists of one or more units of instruction. Each instructional unit includes some or all of the basic components of a unit of instruction: performance objectives, suggested activities for teacher and students, information sheets, assignment sheets, job sheets, visual aids, tests, and answers to the test. Units are planned for more than one lesson or class period of instruction.

Careful study of each instructional unit by the teacher will help him/her determine:

A. The amount of material that can be covered in each class period
B. The skills which must be demonstrated
   1. Supplies needed
   2. Equipment needed
   3. Amount of practice needed
   4. Amount of class time needed for demonstrations
C. Supplementary materials, such as pamphlets and filmstrips, that must be ordered
D. Resource people that must be contacted

Objectives

Each unit of instruction is based on performance objectives. These objectives state the goals of the course, thus providing a sense of direction and accomplishment for the student.

Performance objectives are stated in two forms: unit objectives, stating the subject matter to be covered in a unit of instruction, and specific objectives, stating the student performance necessary to reach the unit objective.

Since the objectives of the unit provide direction for the teaching-learning process, it is important for the teacher and students to have a common understanding of the intent of the objectives. A limited number of performance terms have been used in the objectives for this curriculum to assist in promoting the effectiveness of the communication among all individuals using the materials.

Following is a list of performance terms and their synonyms which were used in this material:

Reading of the objectives by the student should be followed by a class discussion to answer any questions concerning performance requirements for each instructional unit.

Teachers should feel free to add objectives which will fit the material to the needs of the students and community. When a teacher adds objectives, he/she should remember to supply the needed information, assignment and/or job sheets, and criterion tests.

Suggested Activities

Each unit of instruction has a suggested activities sheet outlining steps to follow in accomplishing specific objectives. The activities are listed according to whether they are the responsibility of the instructor or the student.

Instructor: Duties of the instructor will vary according to the particular unit. However, for best use of the material they should include the following: provide students with objective sheet, information sheet, assignment sheets, and job sheets; preview filmstrips; make transparencies; arrange for resource materials and people; discuss unit and specific objectives and information sheet; give test. Teachers are encouraged to use any additional instructional activities and teaching methods to aid students in accomplishing the objectives.

Student: Student activities are listed which will help the student to achieve the objectives for the unit.
Information Sheet

Information sheets provide content essential for meeting the cognitive (knowledge) objectives of the unit. The teacher will find that information sheets serve as an excellent guide for presenting the background knowledge necessary to develop the skills specified in the unit objective.

Students should read the information sheets before the information is discussed in class. Students may take additional notes on the information sheets.

Transparency Master

Transparency masters provide information in a special way. The students may see as well as hear the material being presented, thus reinforcing the learning process. Transparencies may present new information or they may reinforce information presented in the information sheets. They are particularly effective when identification is necessary.

Transparencies should be made and placed in the notebook where they will be immediately available for use. Transparencies direct the class's attention to the topic of discussion. They should be left on the screen only when topics shown are under discussion. (NOTE: Stand away from the overhead projector when discussing transparency material. The noise of the projector may cause the teacher to speak too loudly.)

Job Sheet

Job sheets are an important segment of each unit. The instructor should be able to and in most situations should demonstrate the skills outlined in the job sheets. Procedures outlined in the job sheets give direction to the skill being taught and allow both student and teacher to check student progress toward the accomplishment of the skill. Job sheets provide a ready outline for a student to follow if he/she has missed a demonstration. Job sheets also furnish potential employers with a picture of the skills being taught and the performances he/she might reasonably expect from a person who has had this training.

Assignment Sheet

Assignment sheets give direction to study and furnish practice for paper and pencil activities to develop the knowledges which are necessary prerequisites to skill development. These may be given to the student for completion in class or used for homework assignments. Answer sheets are provided which may be used by the student and/or teacher for checking student progress.

Test and Evaluation

Paper-pencil and performance tests have been constructed to measure student achievement of each objective listed in the unit of instruction. Individual test items may be pulled out and used as a short test to determine student achievement of a particular objective. This kind of testing may be used as a daily quiz and will help the teacher spot difficulties being encountered by students in their efforts to accomplish the unit objective. Test items for objectives added by the teacher should be constructed and added to the test.
Test Answers

Test answers are provided for each unit. These may be used by the teacher and/or student for checking student achievement of the objectives.

   c. You have no interest in your work.
   d. You do not get along with co-workers.
ASSIGNMENT SHEET #2 - ATTITUDES TOWARD JOB SITUATIONS

The following is a list of behaviors that have come from positive and negative attitudes. Under each behavior list whether a positive or negative attitude has been shown. List under each situation one person who might be affected.

Example: "I am finished with my work and I have 15 minutes before my shift is over. I think I'll find someone who needs some help."

   Attitude--Positive
   Who is affected?--Fellow employees

1. I think I'll leave work five minutes early 'cause I came in five minutes early. Nobody will ever know.
   Attitude--
   Who is affected?--

2. No one is looking. They won't miss just one lousy pencil if I take it. Everyone else does it.
   Attitude--
   Who is affected?--

3. Oh my gosh! I overslept! Guess I'll call the boss and see if I can work the late shift.
   Attitude--
   Who is affected?--

4. It's Friday and, wow, is it ever beautiful outside! I'll leave now and on Monday tell the boss I forgot to clock out. Nobody will ever miss me.
   Attitude--
   Who is affected?--

5. I'm not paid to wash pots. I'm a cook, so wash your own pots!
   Attitude--
   Who is affected?--
ASSIGNMENT SHEET #2

   Attitude--
   Who is affected?

7. The cook just told me off. Man, am I ever gonna get him. He's not my boss.
   Attitude--
   Who is affected?

8. Mary said for me to do this task step by step until I learned the procedure. That will take forever. I'll do it my way. It'll be lots quicker.
   Attitude--
   Who is affected?

   Attitude--
   Who is affected?

10. They hired me as a cook. Now they want me to work in salads until Bob gets out of the hospital. I knew this was a messed up outfit.
    Attitude--
    Who is affected?

11. My doctor needs to run some tests next week. Would it be permissible for me to leave work for the appointment? If it's O.K., which day would be best?
    Attitude--
    Who is affected?

12. The boss is two years younger than me but she really knows a lot about the business. I feel funny being older and more experienced than she is.
    Attitude--
    Who is affected?

ANSWERS TO ASSIGNMENT SHEET

Assignment Sheet #3

Scoring

Give yourself 5 points for every "a" answer, 3 points for every "b" answer, and no points for "c" answers. Add up your score.

Analysis

35 to 50 points: You are very good in your relationships with others because you respect others and greet them with interest and courtesy. You are liked by your friends and those with whom you deal in a casual way.

18 to 34 points: You get along very well with others most of the time, but you are sometimes self-centered and put yourself in the other person's shoes. Try working toward more of those "a" answers, and you will find that living is more pleasant than it is now.

0 to 17 points: You are having trouble, either because you are too shy or too aggressive. You know which. Good human relationships are like anything else in life; they take practice. Select someone you know who is truly gracious. Analyze his or her actions; then adapt those traits to your own personality.

HAZARDOUS AND LESS HAZARDOUS EQUIPMENT
UNIT I

UNIT OBJECTIVE

After completion of this unit, the student should be able to operate and clean hazardous and less hazardous equipment. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Select from a list general operating procedures for equipment.
2. Identify hazardous equipment.
3. Select from a list safety requirements for hazardous equipment.
4. Identify less hazardous equipment.
5. Select from a list safety requirements for less hazardous equipment.
6. Demonstrate the ability to:
   a. Operate donut machine.
   b. Clean donut machine.
   c. Operate dish machine.
   d. Clean dish machine.
   e. Operate waste disposer.
   f. Operate mixer.
   g. Clean mixer.
   h. Operate slicer.
   i. Clean slicer.
   j. Operate VCM.
   k. Clean VCM.
l. Operate food chopper.
m. Clean food chopper.

n. Operate deep fat fryer.
o. Clean deep fat fryer.
p. Clean deep fat fryer (gas).
q. Clean deep fat fryer (electric).
r. Operate tilting brazier or skillet.
s. Clean tilting brazier or skillet.
t. Operate steamer.
u. Clean steamer.
w. Operate steam jacketed kettle.
x. Clean steam jacketed kettle.
y. Operate meat tenderizer.

HAND TOOLS AND UTENSILS

UNIT OBJECTIVE

After completion of this unit, the student should be able to identify kitchen hand tools and utensils. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Identify cutting tools.
2. Identify handling tools.
3. Identify food preparation tools.
4. Identify cooking utensils.
5. Identify baking utensils.
6. Identify measuring devices.
7. Match cutting tools to their uses.
8. Match handling tools to their uses.
9. Match food preparation tools to their uses.
10. Match cooking utensils to their uses.
11. Write the uses of the baking utensils.
12. Write the uses of the measuring devices.
13. Discuss the points to remember in the care of hand tools and utensils.

UNIT OBJECTIVE

After completion of this unit, the student should be able to apply knowledge of the rules for fire prevention through work in the kitchen. This knowledge will evidenced by scoring one hundred percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Define the classes of fires.
2. Match types of fire extinguishers to their uses.
3. Tell how to use fire extinguishers.
5. Discuss what action to take in case of fire.
SUGGESTED ACTIVITIES

I. Instructor:
   A. Provide student with objective sheet.
   B. Provide student with information sheet.
   C. Make transparency.
   D. Discuss unit and specific objectives.
   E. Discuss information sheet.
   F. Contact safety director of a farm bureau or local insurance company for demonstration on fire safety.
   G. Invite someone from the fire department to speak on fire safety and to demonstrate fire safety equipment.
   H. Give test.

II. Student:
   A. Read objective sheet.
   B. Study information sheet.
   C. Take test.

   A. Objective sheet
   B. Information sheet
   C. Transparency master: TM 1-Types of Fire Extinguishers
   D. Test
   E. Answers to test
II. References:

I. Classes of fires

A. Class A - Fires that occur in ordinary combustible materials; identified by a green triangle

Examples: Wood, paper, rags

B. Class B - Fires that occur with flammable liquids; identified by a red square

Examples: Grease, gasoline, oil, paint

C. Class C - Fires that occur in or near electrical equipment; identified by a blue circle
D. Class D: Fires that occur with combustible metals; identified by a green five-pointed star

(NOTE: Do not attempt to use conventional fire extinguishers on Class D fires.)

Example: Aluminum

II. Types of fire extinguishers (Transparency 1)
A. Pressurized water—Used on Class A fires
B. Soda-acid—Used on Class A fires
C. Foam—Used on Class A and B fires
   (NOTE: Never use foam on live electrical fires.)
D. Carbon dioxide—Used on Class B and C fires
E. Multipurpose dry chemical—Used on Class A, B, and C fires

III. How to use fire extinguishers
A. Pressurized water
   1. Carry to fire
   2. Pull pin

   H. Mop left to right using a figure eight motion (Figure 1)
JOB SHEET #1

i. Clean a small area
   (NOTE: This is usually a 4' x 6' area.)

j. Mop corners with mop heel

k. Rinse the cleaned section with a rinse mop

l. Rinse the rinse mop

m. Wring out the rinse mop

n. Dry the rinsed area with the rinse mop

o. Repeat operation until entire floor is clean
   (CAUTION: The water in the rinse bucket should be changed frequently.)

p. Clean equipment

q. Hang mops up to dry

r. Store other equipment properly
1. List eight items on the sanitation facility checklist.
   a. 
   b. 
   c. 
   d. 
   e. 
   f. 
   g. 
   h. 

2. Discuss the homes of common kitchen pests.
   a. Fly
   b. Roach
   c. Ant
   d. Rodent
   e. Mosquito
Discuss methods of pest control.

4. Select from the list below procedures for wet waste disposal. Circle the correct letters.
   a. Use adequate number of containers
   b. Be sure lids are tight
   c. Secure plastic liners
   d. Rinse weekly
   e. Remove only once a day
   f. Wash once every two weeks

5. List two reasons for in-house sanitation under each category.
   a. Front of house (public areas)
      1)  
      2)  
   b. Back of house
      1)  
      2)  

6. Discuss floor sanitation.
7. Select from the list below storage and usage practices for housekeeping supplies. Circle the correct letters.
   a. Store housekeeping supplies next to food for emergency spills
   b. Leave floor brushes in water overnight to soak out dirt
   c. Rinse buckets, pails, and wringers after each use
   d. Wring out mops after each use
   e. Store only wet mops on hooks
   f. Replace mop heads as often as necessary

8. Analyze sanitation violations.

9. Demonstrate the ability to wet mop a floor.

(NOTE: If activities 8 and 9 have not been accomplished prior to the test, ask the instructor when they should be completed.)
ANSWERS TO TEST

1. Any eight of the following:
   a. Hood and filters
   b. Elevator
   c. Light fixture
   d. Sink
   e. Drain
   f. Toilet room
   g. Trash receptacle
   h. Floor
   i. Wall
   j. Ceiling
   k. Window
   l. Screen
   m. Door
   n. Ventilating system
   o. Storage area
   p. Overhead utility pipe
   q. Shelf
   r. Food contact equipment

2. Discussion should include:
   a. Fly
      1) Rotting fruit and vegetables
      2) Garbage can
3) Outside environment
4) Waste

b. Roach
   1) Standing water
   2) Pipe and drain
   3) Dark areas

c. Ant
   1) Sweet food or juice
   2) Meat

d. Rodent
   1) Decaying food
   2) Rubbish pile

e. Mosquito
   1) Drain
   2) Barrel

3. Discussion should include:
   a. Remove spoiled fruit and vegetables from kitchen
   b. Discard all spoiled food
   c. Remove standing water
      1) Floor
      2) Table top
   d. Clean counter tops regularly
   e. Clean drains daily
   f. Keep lids on garbage containers
   g. Keep doors closed and screened
   h. Keep windows closed and screened
   i. Report structure maintenance problems to supervisor
4. a, b, c

5. Any two of the following under each category:
   a. Front of the house (public areas)
      1) Attracts customer
      2) Gains confidence of customer
      3) Provides for safety of customer
      4) Provides for better working conditions for employees
   b. Back of house
      1) Eliminates unsanitary conditions
      2) Eliminates food-diseased materials
      3) Eliminates kitchen pests
      4) Provides for safety of customer
      5) Provides for better working conditions for employees

6. Discussion should include:
   a. Scrub floors
   b. Move equipment away from wall
   c. Scrub or flush floor drains daily
   d. Keep as dry as possible
      1) Remove any food or small equipment on floors
      2) Spot mop as necessary
   c, d, f

7. c, d, f

9. Performance skill evaluated to the satisfaction of the instructor
FOOD HANDLING AND STORAGE
UNIT III

UNIT OBJECTIVE

After completion of this unit, the student should be able to list the common potentially hazardous foods and discuss the handling of these foods. The student should be able to list standards for safeguarding food and to complete a chart on food handling and storage. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Match terms associated with food handling and storage to the correct definitions.
2. List common potentially hazardous foods.
3. Discuss the handling of potentially hazardous foods.
4. Select from a list dry storage regulations.
5. Select from a list refrigerator and freezer storage regulations.
6. Discuss nonfood storage regulations.
7. List standards for safeguarding food.
8. Complete chart on food handling and storage.
FOOD HANDLING AND STORAGE
UNIT III

SUGGESTED ACTIVITIES

I. Instructor:
   A. Arrange for a visit to a commercial food service operation so that students may complete chart.
   B. Provide student with objective sheet.
   C. Provide student with information and assignment sheets.
   D. Discuss unit and specific objectives.
   E. Discuss information and assignment sheets.
   F. Give test.

II. Student:
   A. Read objective sheet.
   B. Study information sheet.
   C. Complete assignment sheet.
   D. Take test.

INSTRUCTIONAL MATERIALS

I. Included in this unit:
   A. Objective sheet
   B. Information sheet
   C. Assignment Sheet #1--Complete Chart on Food Handling and Storage
   D. Test
   E. Answers to test

II. References:
FOOD HANDLING AND STORAGE
UNIT III

INFORMATION SHEET

I. Terms and definitions
   A. Potentially hazardous food—Perishable food that can support quick growth of harmful bacteria.
   B. Danger zone—Temperatures between 45°F and 140°F; bacteria multiply the quickest in this range; food should not be in this zone except for preparation.
   C. Time-temperature control—Control of food storage and handling in the danger zone.
   D. FIFO policy—First-In-First-Out; food received first should be used first.
   E. Batch cookery—To cook food in small quantities to prevent holding food for long periods of time which may result in spoilage.
   F. Dry storage—Storage area for canned goods, staples, and paper goods.

II. Common potentially hazardous foods
   A. Milk and milk products
   B. Eggs
   C. Meat
   D. Poultry
   E. Fish
   F. Shellfish

III. Handling of potentially hazardous foods
   A. Keep foods at temperatures below 45°F or above 140°F as much as possible.
   B. Keep foods in danger zone no longer than necessary.
      1. Thawing
      2. Pre-preparation.
INFORMATION SHEET

3. Preparation
4. Holding
5. Serving
6. Leftovers

(Note: Food should be thawed quickly and in a cooler, not at room temperature.)

C. Cool as quickly as possible
1. Place in shallow containers
2. Place containers on perforated shelves
3. Place containers four inches apart for good air flow to cool food quickly

IV. Dry storage regulations
A. Store food on pallets not on floor
B. Remove food from shipping cases when possible but keep food covered
C. Store foods with the label facing toward the front of pallet
D. Report abnormal cans to supervisor
   Examples: Bulging, rusting, leaking
E. Keep storeroom floors clean and dry
F. Use FIFO policy
G. Throw it out if in doubt
H. Notify supervisor if signs of rodents or insects appear in storeroom

Refrigerator and freezer storage regulations
A. Store food in covered containers
B. Keep food on shelves or racks provided and never on floor
C. Leave four inches for air circulation between pans that contain cooked foods
D. Store raw meats or thawing foods in separate area or on bottom rack
INFORMATION SHEET

E. Label and date all cooked foods
F. Store leftover foods in refrigerator for no more than 24 hours
G. Check temperatures of refrigerator boxes daily
H. Use FIFO policy

(NOTE: One exception may be bananas. If first shipment is not ripe and the second shipment is ripe, use second shipment first.)

VI. Nonfood storage regulations

A. Store nonfoods in separate room from food supply and food stuffs

Examples: Poisons, toxic agents, cleaning supplies, lime products, soaps, stainless steel cleaners

B. Use nonfood items cautiously
C. Use nonfood items when preparation and serving areas are not in use
D. Use these products only with the approval of supervisor
E. Keep nonfood items LABELED
F. Keep nonfood items TIGHTLY sealed

VII. Standards for safeguarding food

A. Use wholesome food from approved sources
B. Protect food from spoilage during preparation, service, and storage
C. Use clean equipment
D. Use refrigeration
E. Store and use toxic agents and poisons away from food
F. Discard questionable food
G. Maintain all potentially hazardous food at safe temperatures except during necessary preparation and service
H. Cook foods to recommended internal temperature
I. Batch cook and serve cooked foods immediately or store in shallow containers in refrigerator
J. Wash all raw fruits and vegetables in running water before using
ASSIGNMENT SHEET #1--COMPLETE CHART ON FOOD HANDLING AND STORAGE

After visiting a food service operation, complete the following chart on food handling and storage. Discuss methods of food handling and storage.

   6. Time-temperature control

2. List the common potentially hazardous foods.
   a.
   b.
   c.
   d.
   e.
   f.

3. Discuss the handling of potentially hazardous foods.
4. Select from the list below dry storage regulations. Circle the letters of the correct answers.
   a. Store food on floor
   b. Remove food from shipping cases when possible but keep food covered
   c. Remove label before placing food in storage area
   d. Report abnormal cans to supervisor
   e. Keep storeroom floors clean and dry
   f. Use FIFO policy
   g. Use food as soon as possible if in doubt as to the quality of product

5. Select from the list below refrigerator and freezer storage regulations. Circle the letters of the correct answers.
   a. Store food in covered containers
   b. Keep food on floor
   c. Store pans closely together
   d. Store raw meats or thawing foods in separate area or on bottom rack
   e. Label and date all cooked foods
   f. Store leftover foods in refrigerator for minimum of 24 days
   g. Check temperatures of refrigerator boxes weekly
   h. Use FIFO policy only on milk and eggs

6. Discuss nonfood storage regulations.
7. List six standards for safeguarding food.
   a. 
   b. 
   c. 
   d. 
   e. 
   f. 

8. Complete chart on food handling and storage.

COMMON FOOD-BORNE ILLNESSES
UNIT IV

UNIT OBJECTIVE

After completion of this unit, the student should be able to state the cause of food-borne illnesses and complete a chart on food-borne illnesses. He/she should be able to discuss the growth and prevention of disease-causing bacteria, food illnesses, and suspect foods on a buffet line. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Define terms associated with food-borne illnesses.
2. Distinguish between food poisoning, chemical food poisoning, and food infection.
3. State the cause of food-borne illnesses.
4. Complete a chart on food-borne illnesses.
5. Discuss the growth and prevention of disease-causing bacteria.
6. Discuss food illnesses.
7. Discuss suspect foods on a buffet line.

SUGGESTED ACTIVITIES

I. Instructor:
   A. Obtain petri cultures for class experiment.
      (NOTE: These may be obtained from your local health department.)
   B. Invite health department worker to lead a class discussion on common food-borne illnesses.
   C. Provide student with objective sheet.
   D. Provide student with information and assignment sheets.
   E. Discuss unit and specific objectives.
   F. Discuss information and assignment sheets.
   G. Give test.

II. Student:
   A. Read objective sheet.
   B. Study information sheet.
   C. Complete assignment sheets.

COMMON FOOD-BORNE ILLNESSES
UNIT IV

ASSIGNMENT SHEET #1--FOOD ILLNESSES

Read the following case studies carefully. Discuss them orally in class, paying special attention to how the problems could have been avoided.

1. Approximately 100 individuals became ill following a dinner at a restaurant located in a department store. Canned hams were opened two days before use, brushed with mustard, brown sugar, and tomato sauce, and placed in a walk-in refrigerator. The day prior to the meal some were removed from the refrigerator, cooked, cooled, and refrigerated. A second batch of 15 hams were cooked and held at room temperature overnight. The morning of the dinner the ham was sliced by machine and held at room temperature until three hours prior to the meal when they were warmed for serving. The slicing machine was dirty with old food particles and was disassembled for cleaning only once a week. Nasal, nail, and stool cultures of two food handlers were positive for coagulase staphylococci and one handler also had a positive throat culture.

2. A large western restaurant prepared box lunches for a group of 26 people. The menu included ham sandwiches. Investigation revealed that the sandwiches had not been refrigerated in the 16 hour period before delivery to the customers. The staph count was extremely high.

3. A local restaurant catered to company picnic. The offending food was potato salad which, after being prepared the previous night, was placed in a single large aluminum tub. Approximately 100 pounds of salad were prepared and put in the tub while still warm and placed in a walk-in refrigerator overnight. The temperature of the refrigerator at the time checked was 50°F. The middle portion of the salad remained at incubating temperature for several hours. The offending organism was salmonella montevidea and a stool culture of one girl who made the potato salad contained the same organism.

4. Nine persons consumed hamburgers at a restaurant in a small town. Seven of these ate the sliced dill pickle served on the hamburger and two did not. The seven became ill after returning home. Five were hospitalized and one of these died. Tests indicated clostridium botulinum as the causative agent. The pickles were home canned by the restaurant proprietor.

(NOTE: The above case studies were used with the permission of the National Restaurant Association.)
A large cafeteria served the following menu items for a buffet. Each menu item was held on the line for a different period of time. Discuss the length of time held for each menu item.

(NOTE: There was no heat for the food while it was on the buffet line.)

1. Roast beef--3 hours

2. Sliced turkey and dressing--2 1/2 hours

3. Baked potatoes with sour cream--2 hours

4. Lime gelatin with cottage cheese--4 hours

5. Gravy--2 hours

6. Sliced ham--3 hours

TEST

1. Define the following terms associated with food-borne illnesses.
   a. Toxin--
   b. Bacteria--
   c. Contaminated--
   d. Vector--

2. Distinguish between food poisoning, chemical food poisoning, and food infection by placing an "X" in front of the statements describing food poisoning.
   _____ a. Caused by toxin
   _____ b. Set up as an infection
   _____ c. Caused by bacteria
   _____ d. Released into the food by bacteria
   _____ e. Caused by chemicals

3. State the cause of food-borne illnesses.

4. Complete the charts on the following pages on food-borne illnesses.

5. Discuss the growth and prevention of disease-causing bacteria.

6. Discuss food illnesses.

7. Discuss suspect foods on a buffet line.

UNIT V

UNIT OBJECTIVE

After completion of this unit, the student should be able to discuss ware washing and procedures for pot and pan washing. The student should be able to list ways to use and care for supplies and to discuss sanitizing solutions. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Discuss ware washing.
2. Discuss procedures for pot and pan washing.
3. Select from a list procedures for washing wooden utensils.
4. Select from a list procedures for washing small preparation utensils.
5. Select from a list procedures for washing brushes.
6. Discuss the care of cleaning cloths.
7. List ways to use and care for supplies.
8. Discuss sanitizing solutions.

I. Ware washing

(NOTE: This term refers to equipment that is washed by hand because it cannot be run through the dish machine satisfactorily.)

A. Equipment
   1. Hand tools
   2. Small equipment and utensils
   3. Pots and pans
   4. Wooden utensils

B. General procedure
   1. Soak
      (NOTE: Do not soak wooden utensils in water.)
   2. Wash
   3. Rinse with sanitizer
   4. Air-dry
   5. Store in proper place

II. Pot and pan washing

A. Preparation for washing
   1. Collect supplies needed
      a. Detergent
      b. Sanitizer
      c. Brush
      d. Scraper
   2. Presoak in water with mild detergent

3. Remove equipment from water
4. Drain
5. Air dry on a clean surface or rack

E. Storing
1. Store upside down or covered
2. Wash, rinse, and sanitize equipment not used often before using

III. Procedure for washing wooden utensils
A. Wash with warm soapy water
   (NOTE: Do not soak wooden utensils.)
B. Scrub utensil with brush
C. Rinse with clean sanitized water
D. Dry thoroughly with cloth
E. Store in covered area
   (NOTE: Discard wooden utensils when handles become loose or when cracked or chipped.)

IV. Procedure for washing small preparation utensils
A. Wash in hot soapy water
   (NOTE: Do not use alkalines or alkaline solutions when washing aluminum utensils.)
B. Remove discoloration of stainless steel with lemon juice
   (NOTE: Do not use scouring powder or steel wool on stainless steel or chromium plated utensils.)
C. Rinse in sanitized water or water of 170°
D. Air dry utensils
   (NOTE: Some small utensils may be sent through the dish machine for cleaning and sanitizing.)

V. Procedure for washing brushes
   A. Wash in hot detergent water after each use
   B. Rinse in hot water
   C. Dip in sanitizing solution
   D. Shake
   E. Hang to dry

VI. Care of cleaning cloths
   A. Rinse to remove excess dirt
   B. Place in bag to be sent to laundry
   C. Discard sour rags

   (NOTE: In some areas the cleaning cloths are washed by each individual employee. Some operations use disposable cloths.)

VII. Use and care of supplies

   (NOTE: Sponges should be sanitized and allowed to dry thoroughly.)
   A. Use according to directions
   B. Store in proper area
   C. Keep covered and labeled
   D. Consult supervisor when in doubt about use

VIII. Sanitizing solutions
   A. Purpose: To sanitize clean surfaces
   B. Proportions
      1. Iodine solution: One teaspoon per one gallon of water
      2. Chlorine solution: 1/4 cup chlorine per three gallons water
      3. Quarts: Follow manufacturer's directions

   (NOTE: Iodine and chlorine solutions are effective for a maximum of two hours.)

UNIT I

UNIT OBJECTIVE

After completion of this unit, the student should be able to define terms related to weights and measures. He/she should be able to complete a chart on equivalents of weights and measures. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Define terms related to weights and measures.
2. Write abbreviations for weights and measures.
3. List reasons for accurate weighing and measuring.
4. Discuss weighing of food.
5. Discuss measuring of food.
6. Complete the chart on equivalents of weights and measures.
7. Select from a list techniques of accurate measuring.

WEIGHTS AND MEASURES
UNIT 1

INFORMATION SHEET

I. Terms and definitions
A. Weigh--To measure food by using scales
B. Measure--To measure food by volume using measuring equipment; most commonly used for liquids, wet foods, and some dry foods

II. Abbreviations for weights and measures
A. Teaspoon--t
B. Tablespoon--T
C. Cup--c
D. Pint--pt
E. Quart--qt
F. Gallon--gal
G. Ounce--oz
H. Pound
   1. #
   2. lb

III. Reasons for accurate weighing and measuring
(NOTE: If the recipe yield is for 50 three-ounce portions, the food items in the recipe should be correctly weighed and measured and the food correctly prepared or the yield will not be 50 three-ounce portions.)
A. Prevents food waste
   (NOTE: This prevents preparing too much or too little of a product.)
B. Controls quality
   (NOTE: This prevents guessing and gives consistency of flavor and taste.)
INFORMATION SHEET

C. Controls quantity—Portion control
   (NOTE: This will insure the proper yield.)

D. Saves time
   (NOTE: It also prevents asking other employees to taste.)

IV. Weighing food
   A. Equipment used—Scales
   B. Measurements used
      1. Pounds
      2. Ounces
   C. Weighed according to directions
      (NOTE: Most dry ingredients are weighed; however, some recipes call for
      liquid ingredients to be weighed. Weighing is the most accurate means of
      calculating ingredients.)

V. Measuring food
   A. Equipment used
      1. Teaspoon measure
      2. Tablespoon measure
      3. Cup measure
         a. Liquid
         b. Dry
      4. Pint measure
      5. Quart measure
      6. Gallon measure
   B. Foods commonly measured
      1. Wet ingredients
      2. Fruits and vegetables when recipe does not state the weight needed...
INFORMATION SHEET

3. Small quantities of dry ingredients

   Examples: One cup mustard
             One quart fruit cocktail
             One teaspoon cornstarch

C. Measurements used

   1. Teaspoon
   2. Tablespoon
   3. Cup

   a. Liquid—For measuring volume liquids
   b. Dry—For measuring volume dry foods

   (NOTE: One side of a cup measure is separated into 1/4, 1/2, 3/4, and 1 cup divisions. The other side of the cup will read 1/3, 2/3, and 1 cup.)
4. Pint

5. Quart

(NOTE: A quart measure has four lines around the outside indicating the four cups.)

6. Gallon

(NOTE: A gallon measure has four lines around the outside. This indicates the four quarts.)
INFORMATION SHEET

VI. Equivalents of weights and measures (Assignment Sheet =1)

| 1 T     | =   | 3 t   |
| 1 c     | =   | 16 T  |
| 1 pt    | =   | 2 c   |
| 1 qt    | =   | 2 pt  |
| 1 gal   | =   | 4 qt  |
| 1 lb    | =   | 16 oz |

(NOTE: There are eight fluid ounces in one cup. This should not be confused with 16 ounces per pound. Conversion tables are used to change weights to measures or measures to weights.)

Examples:
- 8 fluid oz of water = 1 cup water
- 16 fluid oz of tea = 2 cup tea
- 16 weighed oz of flour = 4 cup flour
- One = dry bread crumbs = 4 c dry bread crumbs
- One = brown sugar does not = 4 c brown sugar

Techniques of accurate measuring

A. Dry ingredients

(NOTE: Flour should be sifted before measuring. Brown sugar and fat should be packed before leveling off.)

1. Heap measure with food
2. Level off food using spatula

B. Wet ingredients

1. Place measure on flat surface
2. Pour food or liquid into measure until level reaches desired measure
3. Use largest appropriate measure to prevent error

Example: if the recipe calls for four quarts of water, the water should be measured with a gallon measure once and not with a quart measure four times

UNIT OBJECTIVE

After completion of this unit, the student should be able to select from a list the contents of a standard recipe and arrange in order the steps for following a recipe. The student should be able to complete a chart for temperature guides and convert weights and measures. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Match terms associated with recipe use to the correct definitions.
2. Select from a list the contents of a standard recipe.
3. Arrange in order the steps for following a recipe.
4. Complete a chart for temperature guides.
5. Discuss conversion tables.

   1. Can convert easily from weight to measure or measure to weight when only one is given on a recipe
   2. Provides accuracy for calculations
   3. Saves time
# INFORMATION SHEET

## B. Information given

1. Equal weight and measure
2. AP or EP on raw foods

## VI. Converting weights and measures

### A. Multiply both sides of table for the desired weight or measure

**Example:** 1 oz of ingredient = 2 T

<table>
<thead>
<tr>
<th>Recipe calls for 3 ounces</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1 oz</td>
<td>2 T</td>
</tr>
<tr>
<td>3 x 1 oz</td>
<td>3 x 2 T</td>
</tr>
<tr>
<td>3 oz</td>
<td>6 T</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Recipe calls for 8 T</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 oz</td>
</tr>
<tr>
<td>4 x 1 oz</td>
</tr>
<tr>
<td>4 oz</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Recipe calls for 1 T</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 oz</td>
</tr>
<tr>
<td>1/2 x 1 oz</td>
</tr>
<tr>
<td>1/2 oz</td>
</tr>
</tbody>
</table>

### B. Convert measures or weights to the largest measure or weight possible

**Examples:** Multiply to the desired weight or measure. These figures should then be converted to the largest weight or measure possible.

- **Recipe increased from 100 portions to 300 portions**

<table>
<thead>
<tr>
<th>2 c x 3 = 6 c = 3 pt = 1 qt, 1 pt</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 pt x 3 = 6 pt = 3 qt</td>
</tr>
<tr>
<td>4 qt x 3 = 12 qt = 3 gal</td>
</tr>
<tr>
<td>12 oz x 3 = 36 oz = 2# 4 oz or 2 1/4#</td>
</tr>
</tbody>
</table>
ASSIGNMENT SHEET #1 - CONVERT WEIGHTS AND MEASURES

Solve the problems using the table of equivalents below.

<tr>
<td>1 qt =</td>
<td>2 pt</td>
</tr>
<tr>
<td>1 gal =</td>
<td>4 qt</td>
</tr>
<tr>
<td>1 lb =</td>
<td>16 oz</td>
</tr>
</tbody>
</table>

1. Convert the following weights and measures.
   a. $3\ t = \underline{\hspace{2cm}}$ t
   b. $4\ c = \underline{\hspace{2cm}}$ T
   c. $2\ pt = \underline{\hspace{2cm}}$ c
   d. $8\ qt = \underline{\hspace{2cm}}$ pt
   e. $4\ gal = \underline{\hspace{2cm}}$ qt
   f. $4\ lb = \underline{\hspace{2cm}}$ oz

2. Increase the following recipe yield from 100 portions to 500 portions and convert to the largest weight or measure.

   Example: $3\ t$ sugar $\times 5 = 15\ t$ sugar $= 5\ T$
   a. $8\ oz$ apples $= \underline{\hspace{2cm}}$ $= \underline{\hspace{2cm}}$
   b. $2\ c$ bananas $= \underline{\hspace{2cm}}$ $= \underline{\hspace{2cm}}$
   c. $4\ pt$ oranges $= \underline{\hspace{2cm}}$ $= \underline{\hspace{2cm}}$
   d. $6\ qt$ pears $= \underline{\hspace{2cm}}$ $= \underline{\hspace{2cm}}$
   e. $4\ c$ grapes $= \underline{\hspace{2cm}}$ $= \underline{\hspace{2cm}}$
   f. $4\ oz$ peaches $= \underline{\hspace{2cm}}$ $= \underline{\hspace{2cm}}$
1. a. 9
   b. 64
   c. 4
   d. 16
   e. 16
   f. 64

2. a. 40 oz = 2# 8 oz or 2 1/2 #

RECIPE USE
UNIT II

TEST

1. Match terms on the right to the correct definitions on the left by placing the appropriate numbers in the blanks provided.

   a. Edible portion weight
   1. Dice
   b. As purchased weight
   2. Julienne
   c. To cut into pieces
   3. EP
   d. To divide food into small pieces
   4. Yield
   e. To cut into cubes
   5. AP
   f. To cut into strips
   6. Chop
   g. To cut into very small pieces
   7. Sauté
   h. To brown quickly in a small amount of fat
   8. Cut
   i. Number of servings after preparation
   9. Mince

2. Select from the list below the contents of a standard recipe. Circle the letters of the correct answers.

   a. Name of food being prepared
   b. Amount of ingredients needed
   c. Wide range in number of servings
   d. Wide range in size of servings
   e. Four types of pans that may be used
   f. Clear directions
   g. Cooking temperature
   h. No terms, just directions
3. Arrange in order the steps for following a recipe. Place a "1" in front of the first step, a "2" in front of the second, and so on.
   - a. Recheck calculations
   - b. Assemble and measure needed ingredients
   - c. Read recipe through once carefully
   - d. Follow directions as given on recipe
   - e. Check number of portions being prepared and number of portions on recipe
   - f. Cook according to recipe
   - g. Increase or decrease ingredients if necessary
   - h. Collect needed utensils
   - i. Review terms

4. Complete the following chart for temperature guides.

5. Discuss conversion tables.
6. Convert the following weights and measures.

   a. \( 4 \text{T} = \quad \text{t} \)
   
   b. \( 3 \text{c} = \quad \text{T} \)
   
   c. \( 2 \text{lb} = \quad \text{oz} \)
   
   d. \( 4 \text{gal} = \quad \text{qt} \)

   Increase the following recipe yield from 100 portions to 400 portions and convert to the largest weight or measure.

   e. \( 2 \text{pt} = \quad \text{c} \)
   
   f. \( 4 \text{qt} = \quad \text{g} \)
   
   g. \( 4 \text{c} = \quad \text{qt} \)

5. Discussion should include:

a. Purpose
   1) Can convert easily from weight to measure or measure to weight when only one is given on a recipe
   2) Provides accuracy for calculations
   3) Saves time

b. Information given
   1) Equal weight and measure
   2) AP or EP on raw foods
6.  
   a. 12 t
   b. 48 T
   c. 32 oz
   d. 16 qt
   e. 8 pt = 4 qt = 1 gal
   f. 16 qt = 4 gal
   g. 16 c = 8 pt = 4 qt = 1 gal
   h. 24 qt = 6 gal
PERSONAL ORGANIZATION
UNIT III

UNIT OBJECTIVE

After completion of this unit, the student should be able to arrange in order the steps for organizing work. The student should be able to list procedures in planning for progress of work and to analyze a work situation. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Arrange in order the steps for organizing work.
2. List factors to consider before beginning job assignment.
3. Discuss the reasons for checking recipe calculations.
4. Select from a list procedures for assembling supplies.
5. Discuss how to assemble needed equipment.
6. List procedures used to plan for progress of work.
7. Discuss allotting the time required for preparation.
8. Analyze a work situation.
PERSONAL ORGANIZATION

SUGGESTED ACTIVITIES

I. Instructor:
   A. Provide student with objective sheet.
   B. Provide student with information and assignment sheets.
   C. Discuss unit and specific objectives.
   D. Discuss information and assignment sheets.
   E. Give test.

II. Student:
   A. Read objective sheet.
   B. Study information sheet.
   C. Compléte assignment sheet.
   D. Take test.

14 oz should be changed to 4 oz
1.4 gal should be changed to 1 qt
3.8 qt should be changed to 2 gal

IV. Procedures for assembling supplies

A. Use a tray or cart to assemble supplies
B. Make one trip to storeroom for dry goods
C. Make one trip to market for perishable foods
D. Pull food bins to area of preparation

Examples: Flour, sugar, meal, and powdered milk

NOTE: Always use opened containers before opening new ones.

V. Plan to assemble needed equipment

A. Collect all needed small equipment
B. Arrange for use of large equipment
1. Coordinate with other departments using the same piece of equipment
2. Discuss with other departments the length of time needed for each piece of large equipment

NOTE: Searching for equipment increases the likelihood of breakage and missing items

UNIT OBJECTIVE

After completion of this unit, the student should be able to prepare and evaluate the five mother sauces. He should be able to select the purposes of sauces. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Define terms associated with sauces.
2. Select from a list the purposes of sauces.
3. Name the categories by which sauces are classified.
4. Name the mother sauces.
5. Discuss the ingredients and uses of cream gravy.
6. Select from a list thickening agents used in sauces.
7. Match mother sauces to the food items with which they are most frequently used.
8. Complete a chart on the mother sauces.
9. Evaluate white cream sauce.
10. Evaluate hollandaise sauce.
11. Evaluate tomat sauce.
12. Evaluate espagnole sauce.
13. Evaluate velouté sauce.
14. Demonstrate the ability to:
   a. Prepare white cream sauce.
   b. Prepare hollandaise sauce.
   c. Prepare tomat sauce.
   d. Prepare espagnole sauce.
   e. Prepare velouté sauce.

MEAT IDENTIFICATION
UNIT VI

UNIT OBJECTIVE

After completion of this unit, the student should be able to identify primal and wholesale cuts of beef. The student should be able to select from a list meat specification terms. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Match terms associated with meat identification to the correct definitions.
2. Identify primal cuts of meat.
3. Identify wholesale cuts of meat.
5. Arrange the federal beef grades in order of desirability.
6. Select from a list common meat specification terms.
7. Discuss specs of basic meat specification terms.
8. Select from a list common fabricated meats.
9. Select from a list common preportioned meats.
10. Name the most common boned-rolled-tied roasts.
11. Arrange in order the most common purchasable weight specs.

UNIT VII

UNIT OBJECTIVE

After completion of this unit, the student should be able to discuss dry and moist meat cookery and to distinguish between methods of beef cookery. The student should be able to select from a list factors that make a good quality pork product and describe the doneness of pork. The student should be able to demonstrate the ability to prepare beef steaks, veal cutlet cordon bleu, and lamb chops. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Match terms associated with meat to the correct definitions.
2. Discuss dry meat cookery.
3. Discuss moist meat cookery.
4. Distinguish between common methods of beef cookery.
5. State the degrees of doneness for steaks and roast.
7. List the causes of beef shrinkage.
8. Discuss the reasons for avoiding shrinkage.
9. State the principles of beef cookery.
10. Select from a list factors that determine the method of pork cookery.
11. Select from a list factors that make a good quality pork product.
12. Describe the doneness of pork.
13. Evaluate prepared beef.

Demonstrate the ability to:

a. Prepare beef steak.
b. Prepare veal cutlet cordon bleu.
c. Prepare broiled lamb chops.

Terms and Definitions

A. Extender - General or starch product added to meat to extend flavor or quantity

B. Season - To condition a cooked surface by means of fats

C. Roast - To cook by dry heat, usually in an oven

D. Broil - To cook by radiant or direct heat

E. Pan broil - To cook on hot frying pan or grill, pouring accumulates

F. Steam - To cook in steam with or without pressure

G. Brine - To brown in small amount of fat and then cook slowly covered in small amount of liquid

H. Simmer - To cook in liquid with bubbles forming slowly and heat near surface

I. Slow - To simmer in small amount of liquid of thick consistency

J. Shrivel - Loss of weight due to cooking

K. Marinade - Solution in which meat is soaked to change flavor

L. Marinate - To soak in marinade

M. Sauté - To cook quickly in shallow fat

N. Dry heat cooking

O. Griddle - Grate used to give texture to cooked product

P. Roast -
INFORMATION SHEET

2. Turn only once

(NOTE: The distance of meat from broiler should be maintained. Extra large pieces of meat may need to be turned twice. Use tongs or tongs to determine doneness. Never pierce with fork.)

C. Pan broil
1. Rub pan with small amount of fat
2. Turn meat as often as necessary
3. Pour off fat as it accumulates

D. Grill
1. Rub surface with small amount of fat
2. Turn meat only once
3. Remove fat as it accumulates

1. Cook on hot surface
2. Use small amount of fat
3. Do not cover.

III. Moist meat cookery
A. Steam

Prebrown meat
a. Preheat oven to 375 F
b. Brown all sides evenly
c. Do not sear

2. Place in steamer
3. Do not overcook
INFORMATION SHEET

B. Braise
1. Brown on all sides in small amount of fat
2. Add small amount of water
3. Cook at a low temperature, 300°F

C. Simmer
1. Bring water to a boil
2. Add meat
3. Cover meat
4. Cook with temperature just below boiling point

D. Stew
(NOTE: The liquid in a stew should be thick. Vegetables are usually added.)
1. Use simmer process
2. Use less water

IV. Common methods of beef cookery

A. Dry heat
(NOTE: This method is used for tender cuts of beef.)
1. Tenderloin
2. Sirloin
3. Ground meat
4. Rib roast
5. Beef chops

B. Moist heat
(NOTE: This method is used for tender cuts of beef.)
1. Soup bones
2. Slow meat
INFORMATION SHEET

3. Ribs
4. Chuck
5. Brisket

V. Degrees of doneness

A. Steaks
1. Rare Bright pink
2. Medium Pink brown
3. Well done Light brown

B. Roasts
1. Rare 140° internal temperature
2. Medium 160° internal temperature
3. Well done 175° internal temperature

VI. Common tenderizing agents

A. Mallet
B. Marinate
C. Commercial powder

VII. Causes of beef shrinkage

A. Higher temperature
B. Longer cooking time
C. Cooking too quickly

NOTE: For larger pieces of meat that require longer periods of cooking, the temperature must be reduced.

VIII. Reasons for avoiding shrinkage

A. Loss of moisture
INFORMATION SHEET

B. Cost of weight

1. Looks smaller to customer
2. Looks unappetizing to customer

C. Increase in cost

1. Per ounce of meat

(NOTE: The average shrinkage of beef is a loss of 20% of original weight.)

2. Per portion

Examples:

Beef purchased 100#
Cost of beef per pound = $5.00
Total cost of beef = $500
Cost of 4 oz. portion = $1.25

20% shrinkage Average and acceptable

Beef purchased 100#
Cooked beef with 20% shrinkage = 75#
Total cost of beef purchased = $450
Cost of beef per pound before shrinkage = $1.50
Cost of beef after pound after shrinkage = $2.00
Cost of cooking beef = $2.50
Cost of 4 oz. portion = $0.625

30% shrinkage Higher temperature and longer cooking time

Beef purchased 100#
Cooked beef with 30% shrinkage = 70#
Total cost of beef purchased = $350.00
Cost of beef per pound before shrinkage = $1.50
Cost of beef per pound after shrinkage = $2.00
Cost of cooking beef = $3.00
Cost of 4 oz. portion = $0.625
INFORMATION SHEET

X. Factors that determine the method of pork cookery
   A. Equipment available
   B. Quantity to be prepared
   C. Time available
   D. Fat content around meat

   NOTE: All pork contains a high degree of fat.

XI. Factors that make a good quality pork product
   A. Slash fat edges to prevent curling
   B. Avoid using excess fat in cooking
   C. Cook by dry heat if possible
   D. Cook to well-done stage

XII. Doneness of pork
   A. Well done
      (CAUTION: Pork should ALWAYS be cooked well done. The well doneness
      of pork kills trichinosis common to pork and pork products.)
   B. Grayish white in color
   C. Internal temperature of 170-180°

   (NOTE: Exceptions to this are cured and smoked pork.)

Example: Pork roasts

POULTRY
UNIT VIII

UNIT OBJECTIVE

After completion of this unit, the student should be able to list purchasable forms of poultry and common classes of chicken. The student should be able to prepare deep fat fried chicken, cut up a whole chicken, and prepare a turkey. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. List common types of poultry.
2. List purchasable forms of poultry.
3. Name ways in which poultry may be served.
4. List common classes of chicken.
5. Select from a list common practices for storing poultry.
6. Discuss factors affecting the methods of poultry cookery.
7. List the methods of dry and moist cookery for poultry.
8. Arrange in order the steps to take when cleaning poultry.
9. State the recommended temperatures for three methods of poultry cookery.
10. Discuss tests for doneness for turkey and chicken.
11. Demonstrate the ability to:
   a. Prepare deep fat fried chicken.
   b. Cut up a whole chicken.
   c. Prepare a turkey.

UNIT VIII

SUGGESTED ACTIVITIES

I. Instructor:
   A. Provide student with objective sheet.
   B. Provide student with information and job sheets.
   C. Discuss unit and specific objectives.
   D. Discuss information sheet.
   E. Discuss ways to distinguish between ages of birds.
   F. Demonstrate and discuss procedures outlined in the job sheets.
   G. Give test.

II. Student:
   A. Read objective sheet.
   B. Study information sheet.
   C. Demonstrate the ability to accomplish the procedures outlined in the job sheet.
   D. Take test.

INSTRUCTIONAL MATERIALS

I. Included in this unit:
   A. Objective sheet
   B. Information sheet
   C. Job sheets

INFORMATION SHEET

I. Common types of poultry
   A. Chicken
   B. Duck
   C. Goose
   D. Turkey

II. Purchasable forms of poultry
   A. Whole
   B. Parts
      Examples: Quarters, halves, or eighths
   C. Boneless
      Example: Breast
   D. Roll
   E. Stuffed
      Examples: Breast, leg
   F. Convenience
      Examples: Chicken chow mein, turkey à la king

III. Service of poultry
   A. Main dish
      (NOTE: A main dish is either a single entree or a casserole.)
   B. Salad
      (NOTE: A salad can be served either hot or cold.)
   C. Soup
   D. Sandwich
      (NOTE: A sandwich can be served either hot or cold.)
IV. Common classes of chicken

(NOTE: The class of chicken often indicates the preferred method of cookery.)

A. Broiler
B. Fryer
C. Roaster
D. Stewer

V. Common practices for storing poultry

A. Fresh

1. Requires strict attention because it perishes quickly
2. Refrigerate quickly after receiving
   a. Use ice
   b. Store in coldest part of cooler
3. Keep no longer than one to two days

B. Frozen

(NOTE: Poultry should be kept frozen if possible before using.)

1. Perishes quickly during thawing process
2. Keep frozen one to two days before service
3. Thaw in refrigerator

VI. Better selected methods of poultry cookery

A. Roast

1. Cook older birds with skin on
2. Cook younger birds without skin
INFORMATION SHEET

B. Size of bird

1. Cook larger birds with dry heat

2. Cook smaller birds with moist heat

(NOTE: Younger and larger birds have a high degree of fat; therefore, they should be cooked with dry heat.)

VII. Methods of dry and moist cookery for poultry

(NOTE: All the methods are acceptable for chicken. However, roasting is the most acceptable method of cookery for a turkey.)

A. Dry

1. Roast

2. Broil

3. Barbeque

4. Pan fry

5. Deep fat fry

B. Moist

1. Stew

2. Braise

3. Brust

VIII. Cleaning poultry

A. Pull out feathers not originally removed

B. Wash with COLD running water

C. Drain

D. Refrigerate until ready for use

IX. Recommended temperatures for poultry cookery

A. B.B.Q. 350

B. Oven 325
C. Roasting 325

(NOTE: Larger birds should be cooked at a lower temperature and for a longer period of time to retain moisture and prevent shrinking. However, the time varies from bird to bird. Two birds weighing the same will take different amounts of time to prepare. Follow the suggested temperature on the recipe.)

X. Tests for Doneness

A. Turkey Internal temperature

(NOTE: When cooking whole birds, the thermometer is placed in the breast)

1. Flesh 189
2. Breasts or thighs 175
3. Stuffing 165

B. Chicken Time temperature control
I. Equipment
   A. Poultry shears
   B. Strong sharp knife
   C. Small hacksaw
   D. Cutting board

II. Ingredients
   Whole chicken

III. Procedure
   (NOTE: There are many ways to cut up a chicken. The following is one variation.)
   A. Wash chicken thoroughly
   B. Split chicken in half
      1. Cut through flesh over backbone
      2. Cut through flesh over breastbone
      3. Cut through flesh between backbone and breastbone
   C. Cut lengthwise through breastbone and backbone
   D. Break backbone
   E. Snap cartilage
   F. Cut through flesh at joints
      1. Thigh and leg
      2. Wing
   G. Wiggle joint to get knife between bones

FISH
UNIT IX

UNIT OBJECTIVE

After completion of this unit, the student should be able to discuss methods of fish cookery and select from a list principles of fish cookery. The student should be able to demonstrate the ability to prepare fish fillets and to cut and prepare shrimp. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. List classes of fish.
2. Select from a list purchasable forms of fish.
3. Distinguish fish by fat content.
4. Discuss common methods of fish cookery.
5. Select from a list principles of fish cookery.
6. Demonstrate the ability to:
   a. Prepare fish fillets.
   b. Cut and prepare shrimp.
UNIT IX
SUGGESTED ACTIVITIES

I. Instructor:

A. Provide student with objective sheet.
B. Provide student with information and job sheets.
C. Discuss unit and specific objectives.
D. Discuss information sheet.
E. Explain why moisture in fish must be put back in fish once it is removed.
F. Demonstrate and discuss procedures outlined in job sheet.
G. Give test.

II. Student:

A. Read objective sheet.
B. Study information sheet.
C. Demonstrate the ability to accomplish procedures outlined in the job sheet.
D. Take test.

FISH
UNIT 4X

INFORMATION SHEET

I. Classes of fish

A. Fin fish

Examples: Mackerel, cod, flounder, perch, salmon

B. Shellfish

(NOTE: These are fish without fins.)

Examples: Lobster, clams, oysters, shrimp, scallops

II. Purchasable forms of fish

A. Fresh

B. Frozen

C. Canned

D. Cured

E. Dried

F. Smoked

G. Pickled

III. Fat content of fish

(NOTE: Fat fish are most suitable for dry cookery and lean fish for moist cookery. However, they can be cooked either way.)

A. Lean fish

1. Catfish

2. Cod

3. Flounder

4. Haddock

5. Sole
INFORMATION SHEET

B. Variable fish

(NOTE: Variable fish may be cooked by dry or moist heat and the product will be acceptable.)

1. Halibut
2. Salmon

C. Fat fish

1. Mackerel
2. Trout
3. Tuna

IV Common methods of fish cookery

A. Pan frying

(CAUTION: If the pan smokes, the heat should be reduced.)

1. Bread fish
2. Add small amount of fat to cooking surface
3. Cook on medium heat of 300°-350°
4. Heat cooking surface
5. Place single layer of fish on cooking surface
6. Cook 5-6 minutes or until brown
7. Turn fish
8. Cook 4-5 minutes or until brown
9. Test for doneness
   (NOTE: The meat will flake when pushed aside.)

B. Deep frying

1. Bread fish
2. Shake excess breading from fish
3. Fry fish at 350°-375°
INFORMATION SHEET

4. Cook until golden brown

5. Lift out in basket

6. Drain well

C. Broiling

1. Broil only fish that are 3/4" - 2" thick
   (NOTE: Thinner pieces are too fragile and thicker pieces will not get done.)

2. Paint lean fish with oil

3. Cook on preheated broiler pan with rack

4. Place 2"-4" from heat

5. Broil until half done and brown

6. Turn fish

7. Cook until flaky
   (NOTE: Broiled fish is hard to turn and remove from rack because of the tenderness and flakiness.)

D. Baking

1. Grease pan or use foil to prevent sticking

2. Paint or dot with margarine or butter to prevent drying out

3. Cook at 350°-500°
   (NOTE: Recipes will vary on cooking temperature.)

4. Cook 6-11 minutes per pound of fish

5. Cook frozen fish 9-16 minutes per pound

V. Principles of fish cookery

A. Cook quickly

B. Avoid overcooking

C. Coat all fried fish

1. Breading

2. Batter
INFORMATION SHEET

D. Use gentle heat when possible.

E. Do not depend on fish meat to change color for test of doneness.

JOB SHEET #1: PREPARE FISH FILLETS

I. Equipment
A. Cutting board
B. Knife
C. Scales
D. Spoon
E. Bowl for mixing
F. Pastry brush
G. Spatula

II. Supplies
(NOTE: This will yield 50 3-oz portions.)
A. Fish fillets, 10#
B. Margarine or butter, melted, 3/4#
C. Lemon juice, 6 oz
D. Salt, 1 oz
E. Paprika, 1/2 oz

III. Procedure
A. Cut fish in 3-oz portions
B. Oil sheet pan
C. Place fish on oiled sheet pan
D. Combine margarine or butter, lemon juice, salt, and paprika
E. Mix well
F. Cover fish with sauce
G. Bake at 325° for 25-30 minutes or until fish flakes when tested with a fork.

JOB SHEET #2 - CUT AND PREPARE SHRIMP

I. Equipment
   A. Scale
   B. Pans, 3
   C. Quart measure
   D. Wire whip
   E. Deep fat fryer
   F. Fry baskets
   G. Stainless steel container, 2 qt
   H. Shrimp peeler
   I. Paring knife

II. Supplies
   (NOTE: This will yield 25 servings at six shrimp per serving.)
   A. Shrimp, 150 count
   B. Whole eggs, 9
   C. Milk, 1 1/2 qt
   D. Flour, 1 lb
   E. Bread crumbs, 2 lb
   F. Salt to taste
   G. Pepper to taste

III. Procedure
   A. Break eggs into stainless steel container
   B. Beat slightly with wire whip
   C. Pour in milk
   D. Blend milk and eggs
Preheat deep fat fryer to 350°F

Peel shrimp

1. Remove mud vein
2. Scrape back of each shrimp with tip of paring knife

Cut halfway through each shrimp lengthwise using paring knife

(NOTE: This is how to butterfly cut shrimp.)

Flatten the shrimp with heel of hand

Place flour in pan #1

Season flour with salt and pepper

Add shrimp to flour

Coat thoroughly

Pour egg wash into pan #2

Remove shrimp from flour

Place shrimp in egg wash

Place bread crumbs in pan #3

Dip shrimp in bread crumbs

Press crumbs firmly on shrimp

Shake off excess crumbs

Place shrimp in fry baskets

Fry until golden brown

Drain

Serve.

(NOTE: If the baskets are overloaded, the fat temperature will be reduced too quickly, and the shrimp will not cook evenly.)

EGGS AND CHEESE
UNIT X

UNIT OBJECTIVE

After completion of this unit, the student should be able to name classes of cheese, list principles of cheese cookery, and list purposes of eggs. He/she should be able to prepare a cheese omelet, scrambled eggs, fried eggs, and hard cooked eggs. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Name the main classes of cheese.
2. List the common cheeses.
3. List principles of cheese cookery.
4. List purposes of eggs.

RICE AND PASTA
UNIT XI

UNIT OBJECTIVE

After completion of this unit, the student should be able to arrange in order the steps for pasta cookery, rice cookery, and blanching. He/she should be able to demonstrate the ability to prepare rice pilau and macaroni and cheese. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. List common types of pasta.
2. Select from a list the ratio of products for pasta cookery.
3. Arrange in order the steps for pasta cookery.
4. List tests for doneness of pasta.
5. Arrange in order the steps for blanching.
6. Select from a list the ratio of products for rice cookery.
7. Arrange in order the steps for the oven or steamer method of rice cookery.
8. Arrange in order the steps for stockpot method of rice cookery.
9. List the variations of rice cookery.
10. Discuss ways to achieve a quality rice product.
11. Demonstrate the ability to:
   a. Prepare rice pilau.
   b. Prepare macaroni and cheese.

UNIT XII

UNIT OBJECTIVE

After completion of this unit, the student should be able to list examples of the classifications of vegetables and match the methods of cookery to classifications and purchasable forms of vegetables. He should be able to demonstrate the proper techniques for producing and serving vegetables. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Match terms associated with vegetable cookery to the correct definitions.
2. List examples of each classification of vegetables.
3. List purchasable forms of vegetables.
4. List the steps used when preparing vegetables for cookery.
5. Match methods of cookery to classifications and purchasable forms of vegetables.
6. Discuss the points to consider when determining the method of cookery.
7. List the basic guides for vegetable production.
8. Match the guides for retaining color to the colors of vegetables.
9. Compare the quality of cooked vegetables.
10. Demonstrate ability to:
    a. Prepare frozen carrots.
    b. Prepare canned carrots.
    c. Prepare fresh carrots.

(NOTE: Different recipes call for different methods and variations of cookery. Methods shown below are the best. However, methods may be adjusted to different situations.)

A. Boil

(CAUTION: Add vegetables after water boils; reduce heat when boiling returns; do not cook at a rapid boil.)

1. Strong flavored vegetables
2. Fresh green vegetables
3. Potatoes

B. Simmer to servable temperature Canned vegetables

C. Steam

1. Broccoli
2. Frozen vegetables
3. Non-green vegetables
   Examples: Corn, carrots
4. Mild flavored vegetables

D. Fry

1. Potatoes
2. Enplant
3. Onions

VI. Points to consider when determining method of cookery:

A. Size of vegetable
B. Quantity of vegetables
INFORMATION SHEET

1. Equipment available
2. Time available for cooking
3. Form of vegetable

BASICS FOR VEGETABLE PRODUCTION

1. Cook no longer than necessary for desired texture
2. Cook in small batches
3. Cook in small amount of water
4. Be cautious of vegetables with low servings temperature (150°F)
5. Hold vegetables for only 20 minutes or less

SUGGESTIONS FOR COOKING VEGETABLES

1. Acid
   - Example: Lemon juice
2. Salt
   - Example: Pineapple glazed harvard beets

EVEN VEGETABLES

1. Cook as close to serving time as possible
2. Use little water
3. Cook uncovered
4. Use salt on fresh vegetables

FRESH VEGETABLES ACID

1. Allow vegetables to cool not affected by heat
ASSIGNMENT SHEET #1 COMPARE QUALITY OF COOKED VEGETABLES

Compare the quality of the cooked carrots by using the score sheet. Score each product according to color, texture, taste, appearance, and size before cooking.

(NOTE: This assignment sheet should be done after the job sheets are completed.)

UNIT OBJECTIVE

After completion of this unit, the student should be able to select from a list types of salads and fruits that can be purchased and discuss the types of sandwiches. He should be able to list the parts of salads and sandwiches and to prepare a quality salad and sandwich. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Define terms associated with salads and sandwiches.
2. Select from a list the types of salads.
3. List the parts of a salad.
4. Discuss the essential elements in a quality salad.
5. Discuss types of sandwiches.
6. List the parts of a sandwich.
7. List the essential elements in a quality sandwich.
8. Select from a list types of fruits that can be purchased.
9. List ways that fruit may be served.
10. Discuss ways to prevent discoloration of fruit.
11. Demonstrate the ability to:
    a. Prepare fresh green salad.
    b. Prepare grilled cheese sandwich.
    c. Prepare cheeseburger.

PASTRIES
UNIT XV

UNIT OBJECTIVE

After completion of this unit, the student should be able to list ingredients for pie crusts. He/she should be able to discuss qualities of pie fillings and turnover production. He/she should be able to arrange in order the steps for placing the pie in the pan and tell how to prepare puff pastry. The student should be able to evaluate and prepare a pie crust, cherry pie filling, apple turnovers, cream puffs, and eclairs. This knowledge will be evidenced through demonstration and by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. List ingredients for pie crusts.
2. Tell how to mix the pie crust.
3. Discuss qualities of pie fillings.
4. Arrange in order the steps for preparing canned fruit for pie filling.
5. Arrange in order the steps for placing the pie in the pan.
6. Discuss turnover production.
7. Tell how to prepare puff pastry.
8. Distinguish between methods for preparing cream puff shells and eclair shells.
9. Evaluate pie crust.
10. Evaluate cherry pie filling.
11. Evaluate apple turnovers.
12. Evaluate cream puffs.
13. Evaluate eclairs.
14. Demonstrate the ability to:
   a. Prepare pie crust.
   b. Prepare cherry pie filling.
c. Prepare apple turnovers.
d. Prepare cream puffs.
e. Prepare eclairs.

SUGGESTED ACTIVITIES

I. Instructor:
   A. Invite a guest speaker from a bakery to demonstrate production techniques of pastries.
   B. Use professional guides and recipes for preparation of puff pastry.
   C. Provide student with objective sheet.
   D. Provide student with information, assignment, and job sheets.
   E. Discuss unit and specific objectives.
   F. Discuss information and assignment sheets.
   G. Demonstrate and discuss procedures outlined in job sheets.
   H. Give test.

II. Student:
   A. Read objective sheet.
   B. Study information sheet.
   C. Demonstrate the ability to accomplish the procedures outlined in the job sheets.
   D. Complete assignment sheets and turn in to instructor.
   E. Take test.

INSTRUCTIONAL MATERIALS

I. Included in this unit:
   A. Objective sheet
   B. Information sheet
   C. Assignment sheets

   1. Assignment Sheet #1 Evaluate Pie Crust
2. Assignment Sheet #2--Evaluate Cherry Pie Filling
3. Assignment Sheet #3--Evaluate Apple Turnovers
4. Assignment Sheet #4--Evaluate Cream Puffs
5. Assignment Sheet #5--Evaluate Eclairs

D. Job sheets
1. Job Sheet #1--Prepare Pie Crust
2. Job Sheet #2--Prepare Cherry Pie Filling

INFORMATION SHEET

I. Ingredients for pie crusts
   A. Fat or shortening
   B. Salt
   C. Water
   D. Flour
   E. Sugar

II. How to mix the pie crust
   A. Cut in shortening to flour
   B. Mix gently when adding flour after adding water
   C. Toss flour lightly after adding water
   D. Add extra water and toss gently if dough is too firm or dry

(NOTE: Shrinkage and toughness of pie crust are due to improper handling and overmixing.)

III. Qualities of pie fillings
   A. Soft
   B. Tender
   C. Not runny
   D. Bright in color
   E. Not starchy

IV. Preparing canned fruit for pie filling

(NOTE: Some food service operations use canned or frozen pie fillings and the qualities are the same. Thickening agents may also be purchased to be used in place of cornstarch.)

   A. Drain fruit
   B. Place cornstarch in boiling syrup
INFORMATION SHEET

C. Place fruit in thickened syrup
D. Pour filling in pie shells
E. Bake

5. Placing pie in pan
   A. Divide crust in two parts
   B. Shape each piece in a ball
   C. Roll each piece to even thickness
   D. Place crust in pan
   E. Place filling in crust

F. Place top crust on filling
INFORMATION SHEET

G. Seal edges with fingers or fork

(Note: Slt a few holes in crust to prevent air bubbles from forming. Egg wash may be used to help seal the second or top crust and also for browning purposes.)

VI. Production of turnovers
A. Dough is triangular shaped
B. Dough is baked on sheet pan
C. Dough is folded carefully and sealed

VII. How to prepare puff pastry
A. Roll dough several times
(Note: Shortening is rolled into dough in layers.)
B. Use a firm fat
C. Use ice water to cool the dough
D. Place dough in refrigerator before final rolling
E. Make holes on top of pastry to prevent blisters from forming

VIII. Methods for preparing shells
A. Cream puff
1. Line pan with parchment paper
2. Place batter onto baking pan with spoon
3. Space shells one inch apart
4. Top spoon in milk and run around batter to make round shape
INFORMATION SHEET

1. Line pan with parchment paper
2. Place batter onto baking pan using pastry
3. Move bag in straight line for three inches
4. Make rectangular shape
5. Space one inch apart

ASSIGNMENT SHEET #1--BALANCE A CASH BOX OR CASH REGISTER

After reading the instructions and balance sheet below, complete the balance sheet on the following page.

The cash box or register should have $130.00 in it, and there should be $55.00 worth of totaled customer tickets. The student should count all the cash on hand and record the amount. The student should then total all the tickets or read the sales tape on the cash register and then subtract the amount of sales from the cash on hand. Compare the amount arrived at in your computations with the amount of cash that was in the cash box or register before any sales were received. If the two amounts are the same, the cash box balances.

UNIT OBJECTIVE

After completion of this unit, the student should be able to list reasons for proper receiving, storage, inventory, and issuing. He/she should be able to list types of inventories and discuss inventory information requirements. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. List reasons for proper receiving, storage, inventory, and issuing.
2. State the purpose of inventory.
3. Select from a list methods for controlling inventories.
4. List types of inventories.
5. Discuss inventory information requirements.
6. List the "musts" of inventories.
7. List reasons for checking food delivery with invoice.
8. Complete an inventory chart.

UNIT III

UNIT OBJECTIVE

After completion of this unit, the student should be able to match terms related to catering to definitions and discuss the difference between operating a catering service and operating a restaurant. This knowledge will be evidenced by scoring eighty-five percent on the unit test.

SPECIFIC OBJECTIVES

After completion of this unit, the student should be able to:

1. Match terms related to catering to the correct definitions.
2. Discuss the differences between operating a catering service and operating a restaurant.
3. List the basic characteristics of a banquet hall caterer.
4. Select from a list the basic characteristics of an off-premise caterer.
5. List the basic characteristics of a mobile unit caterer.
6. Discuss specialty catering.

CATERING UNIT III

INFORMATION SHEET

I. Terms and definitions

A. Catering service: Furnishes a wide variety of food for many functions in whatever location is necessary.

B. Restaurant: Eating establishment that sells food in a specific location with set hours and menu.

C. Banquet hall caterer: Facility with banquet hall, other public rooms, kitchen, and office.

D. Off-premise caterer: Facility with only a kitchen and office.

E. Mobile unit caterer: Facility with kitchen and mobile units.

F. Banquet hall: Room large enough to accommodate many people for a meal or meeting.

G. Mobile unit: Specially designed truck in which food can be transported and sold.

(NOTE: Normally refrigeration units, displays, shelves, and coffee urns are built into the mobile unit.)

II. Differences in catering and restaurant operation

A. Catering operation

1. Menu dictated by customer.

2. Time specified by customer.

3. Type of service may vary from hors d'oeuvres to full meal.

4. Food usually served at location specified by customer.

5. Type of service specified by customer.

6. Price per meal will vary with number of people served and the distance food is hauled.

7. Service offered must be flexible enough to serve wide variety of customer needs.
FUNCTION SHEET

B. Restaurant operation

1. Set menu
2. Set number of hours that restaurant serves
3. Food served, only on the premises or carried out by customer
4. Type of service set to match menu
5. Price of each meal is set and does not vary with number of people
6. Restaurant operation normally tries to satisfy only limited portion of customer needs

(NOTE: A restaurant does not vary its menu, serving hours, or location for service like a caterer does)

III. Banquet hall caterer

A. Large rooms in which to serve private parties, wedding receptions, and other large functions
B. Available public address system
C. Dressing rooms for brides and fashion shows
D. Kitchen adequately equipped to serve maximum number of guests
E. Staff large enough to serve maximum number that can be seated
F. Most serving done on the caterer's premises

IV. Off-premise caterer

A. Kitchen without banquet rooms
B. All serving off the caterer's premises
C. Extremely flexible menu to fit variety of serving facilities
D. Highly trained staff that performs well in unfamiliar surroundings
E. Adequate vehicles for transportation of food and supplies
F. Take out and delivery service only

COSTING
UNIT IV

INFORMATION SHEET

I. Terms and definitions

A. Cost of recipe—Total cost of all items in a recipe

B. Item—Unit or a separate thing

C. Market price—Price paid for an item

D. Market unit—Size of an item as it is purchased

Examples: One case of six #10 cans; 1# of hamburger

E. Unit price—Cost of a certain amount

Examples: Price by the pound, price by the case

F. Extension price—Price of the amount used in a recipe

G. Mark-up—Difference between the selling price and the raw food cost

H. Per portion cost—Cost of each serving

I. Menu price—Price charged to the customer

II. Reasons for costing recipes

A. Controls food costs by giving advanced information on costs of dishes prepared

B. Acts as basis for deciding menu price

III. Items included in the cost of a meal

A. Food

B. Labor

C. Supplies other than food

Examples: Paper products, cleaning supplies

D. Overhead

Examples: Rent, maintenance

E. Percentage of profit
INFORMATION SHEET

IV. Costing recipes (Assignment Sheet #1)
   A. Cost each ingredient separately
   B. Total the cost of all ingredients
   C. Divide the total cost by the number of servings for the per portion cost

V. Menu price
   A. Figure total food cost of item
      (NOTE: When standardized recipes are used the per portion cost is the food cost.)
   B. Multiply food costs by percentage of mark-up
   C. Add food cost and mark-up together for menu price
   D. Multiply food by 2.5% to arrive at menu price with 40% food cost
Find the cost of each ingredient separately. Total the cost of all ingredients to get the total recipe cost. Divide the total cost by the number of portions to find the per portion cost.
