Policy questions regarding activities for which university faculty, administrators, and professional staff might derive additional income were examined in four mail surveys along with the impact of those activities on the individuals, the university, and society. Some of the activities considered include overload teaching, research, consulting, part-time employment, and the rights to intellectual properties that may result from either load or "overload" work. The four mail surveys included the following: (1) the Planning Survey, designed to identify major policy problems; (2) a survey sent to statewide coordinating agencies, university central offices, and community college system offices to determine the responsibility of the agencies for establishing policies, and to evaluate the current status of each policy area; (3) a survey of private foundations that assessed the guidelines given to institutions receiving grants regarding salary and property rights for inventions and educational materials; and (4) a survey sent to higher education associations and professional associations requesting information of the involvement of the organization in establishing ethical codes directly or indirectly for their members or other agencies, and information on their use of and payment for part-time services of faculty or staff. "Ethical and Economic Issues - University Policies for Consulting, Overload Instructional Activities and Intellectual Property"

Support of the Carnegie Corporation of New York is gratefully acknowledged.
INTRODUCTION

The focus of this study is the policy questions regarding activities for which university faculty, administrators and professional staff might derive additional income and the impact of these activities on the individuals, the university and society. Some of the activities considered, both within the university and outside of it, include overload teaching, research, consulting, part-time employment, and the rights to intellectual properties which may result from either load or "overload" work. These activities may also involve conflict-of-interest either in the time commitment to the activity, which may draw energies away from primary university responsibilities, or in causing a real or apparent biasing of intellectual objectivity. The latter possibility could cause an erosion of academic freedom and limit a major role of the university in serving society.

The first step of the project, summarized in this paper, was to make a preliminary assessment of the current status of policy in these areas and to determine what agencies had responsibility for establishing policy. Four different mail surveys were developed. The first survey, the Planning Survey, was designed to identify major policy problems perceived by academicians who had expressed interest by either attending a previous planning conference at USC (January, 1976), or had written for information about the Ethical and Economic Issues Project.* The second survey was sent to three groups: Statewide Coordinating Agencies, University Central Offices, and Community College System Offices. It was designed to determine the responsibility of

The authors wish to express their appreciation to Ellen Stewart and Steve Kesler for their valuable assistance.

*This survey population was primarily academic administrators, many with faculty experience and rank.
these agencies for establishing policies in the study areas and requested the agencies' evaluation of the "current status" of each policy area. The third survey, sent to Private Foundations, assessed the guidelines which foundations give to institutions which receive grants. In this survey, information was requested on foundation policy in the use of their funds for 1) salary (load, overload, consulting, etc.), 2) property rights for inventions and educational materials. A fourth survey was sent to two groups: Higher Education Associations and Professional Associations (selected on the basis of academic discipline base). This survey requested information on the involvement of the organization in establishing ethical codes either directly for their members or indirectly by advising other agencies (e.g. Congress, Government Agency, Study Commission, etc.); in addition, information on their use of and payment for part-time services of university faculty or staff, was requested.
SUMMARY

- University Central Offices have responsibilities for establishing or recommending policies in the areas under study. In contrast, Statewide Coordinating Agencies and Community College Systems Offices have very little responsibility in these areas.

- Higher Education Associations and Professional Associations generally have not established policies, in these areas, to serve as guidelines for their members. They also have rarely provided policy input, in these areas, to external agencies such as government, commissions or others. However both survey groups extensively utilize the part-time services of university faculty and professional staff, with and without expenses or honoraria.

- Private Foundations play a passive role in establishing policies in these areas, usually accepting grantee institution policies and practices. There are a few foundations with policies in areas such as intellectual property rights and summer salary.

- Major policy problem areas were external consulting, production and use of educational material, salary reimbursement/recovery, continuing education and overload teaching, as indicated by the planning survey and the survey of central university offices.
SURVEY 1: The Planning Survey

Background. The purpose of the planning survey was to determine key areas of concern of those individuals who were interested in attending the conference entitled "Ethical and Economic Issues: University Policies for Consulting, Overload Instructional Activities and Intellectual Property". Respondents were asked to assess the current status of policies and practices in nine general areas (Production/Use of Educational Materials, Patents, External Consulting, Overload Teaching, Internal Consulting, Paid Sabbaticals, Salary Reimbursement from Sponsored Projects, Fringe Benefits, and Continuing Education). The survey was sent to a large group of individuals (N = 228) who had attended a previous "Academic Planning Conference: or had expressed interest in future conferences.

Results. Virtually all of the respondents felt that policies were needed in the areas surveyed. Respondents generally indicated one of two types of problems; either a lack of adequate policies or adequate policies which were not followed. Of the nine general areas surveyed, External Consulting was the biggest problem area (problems indicated by 80% of respondents - See Table 1 and Appendix, Survey 1-Planning). Other frequently mentioned problem areas were Overload Teaching (60%), Production/Use of Educational Materials (60%), Continuing Education (59%), and Salary Reimbursement/Recovery (54%). The only policy area surveyed which was apparently not a large problem area was Fringe Benefits on Overload Salary (29%). When asked which areas "pose particular problems at your institution", all areas except Fringe Benefits were mentioned.
Problem areas could be indicative of either a lack of adequate policy, or not following adequate policies which did exist. In each of the areas surveyed, the lack of adequate policy was the most frequently mentioned problem.

SURVEY 2: Statewide Coordinating Agencies, University Central Offices and Community College Systems Offices

Background. The purpose of these surveys (See Appendix, Survey 2) was to determine the level of responsibility respondents had for policy development and the current status of policies in six broad areas: Production/Use of Educational Materials, Patents, Consulting, Continuing Education, Salary Recovery/Reimbursement, and Fringe Benefits on Overload Salary. The survey was sent to three different groups: Statewide Agencies Coordinating Higher Education, University Central Offices, and Community College Systems. The first group, Statewide Coordinating Agencies, consisted of 42 agencies that were established to achieve a more economical deployment of state resources of higher education and to prevent unnecessary duplication. These agencies, identified as statewide coordinating agencies and agencies established in accordance to the Post Secondary Commission, vary considerably in power, structure and composition.* The majority of these agencies (86%) responded to the survey. The second group, University Central Offices, consisted of 48 central offices of statewide systems of colleges/universities (the central office of universities with several different campuses). Fewer surveys (54%) were returned by these respondents. The third group, 48 Community College Systems, also returned 54% of the surveys.

Results - Statewide Agencies. Almost all of the respondents indicated that they had no responsibility at all in the six policy areas (See Table 2 and Appendix, Survey 2-Statewide Coordinating Agencies). Because these agencies did not have any policy responsibility, they did not evaluate the current status of policies and practices.

Results - University Central Offices. Respondents generally (ranging from 65 to 81% for the six areas) indicated that they had the responsibility for establishing policy in these areas; the respondents who had some responsibility for policies in these areas ranged from 88 to 96%. Some written comments indicated that the distinction between setting policy and recommending policy may be too simplistic. Some offices may well "set policy" by default, since the groups to whom they report (faculty sentates, regents, trustees, state legislatures, etc.) may generally accept the recommendations.

Relatively few of the respondents indicated that policies were not needed in any of the areas. However, less than 50% of the responses in each survey area were indicated as problem areas by University Central Offices. (See Table 1 and Appendix, Survey 2-University Central Offices). Largest problem area responses were External Consulting for Non-Government Agencies (52%), Salary Reimbursement/Recovery from Industry Support (50%), Production/Use of Educational Materials consisting of Computer Programs (50%), TV Tapes (46%), and Audio Visuals (42%). Fewest problems were seen in areas of Patent Policies (17%), Internal Consulting/Overload (28%), and Fringe Benefits on Additional Income (ranging from 24 to 32% for different activities).

When problems were reported, they were more likely to consist of a lack of adequate policies rather than not following adequate policies which did exist. This was particularly true for Production/Use of Educational
Materials Consisting of Computer Programs. However, this generalization did not hold for one substantial problem area, External Consulting for Non-Government Organizations, where Central Offices indicated that adequate policies generally existed but were not consistently followed.

Results - Community College Systems. Surprisingly few of the Community College System Offices indicated that they had any responsibility at all for establishing, recommending or even documenting policies in these areas (See Table 3). The responses indicated some responsibilities were as follows: Production/Use of Educational Materials (36%), Patents (28%), Consulting (44%), Continuing Education (52%), Salary Reimbursement for Externally Funded Projects (36%), Fringe Benefits on Additional Income (42%). Those Offices which had no responsibility for these policies generally did not evaluate the current status of policies, so relatively few responses were made to these items. However, problem areas were noted in the Production/Use of Educational Materials and Continuing Education (See Appendix, Survey 2-Community College Systems).

SURVEY 3: Private Foundations

Background. The purpose of this survey was to determine the policy guidelines of major foundations in the use of foundation grant funds given to institutions of higher education. The survey was sent to 50 private foundations who provide significant funding (at least one million dollars annually) to institutes of higher education. Responses were received from 30 (60%) of the foundations.
Results. Most respondents indicated that property rights/royalties were handled entirely according to the grantee institution policies for both educational materials (69%) and patentable inventions (59%). Other respondents indicated that the few instances which arose were handled on an "ad-hoc, case by case" basis. Two foundations did indicate that property rights were required to be put into the public domain for general use and the benefit of society.

Foundations were also asked to indicate policies regarding salary that was paid to University Faculty/Professional Staff for work done on projects which were supported by the foundation. Once again, most foundations (66%) indicated that the policies of the grantee institution would be followed. A few foundations indicated that they place restrictions on the amount of salary faculty could be paid during summer months, during sabbaticals or as consultant fees, but these were the exceptions. Only one respondent indicated that they had a policy of not allowing any salary for regular, full-time faculty. Several foundations telephoned the project director to ask questions about the survey. During these conversations, they indicated current review of their policies (or development of policies where they now had none). One major foundation asked for information about survey results and inquired if any other foundation was concerned about policies in these areas and their tax status. See Appendix, Survey 3-Private Foundations.
SURVEY 4: Higher Education Associations
and Professional Associations

**Background.** The purpose of this survey was to determine the involvement of Higher Education Associations and Professional Organizations in establishing ethical codes and policies, and to survey their part-time use of university faculty for association projects. Surveys were sent to 68 Higher Education Associations and 73 Professional Associations; responses were received from 43 (63%) of the Higher Education Associations and 41 (56%) of the Professional Associations.

These organizations impact the current and future role of higher education in many ways. They provide an important source of information about the general trends in Higher Education and specific trends in different disciplines. Their journals and publications disseminate not only research results but also provide the status of current problems and point the directions for the future. Thus, they could have an important influence on the policy areas which are covered in this research project.

**Results - Higher Education Associations.** Few of the responding Higher Education Associations had either formulated association policies or worked with external agencies in establishing policies related to any of the six areas of inquiry. (See Table 3 and Appendix, Survey 4-Higher Education Associations.) There were only two areas, Part-Time Consulting (12%) and Ethical/Conflict-of-Interest Issues (12%), in which more than 10% of the responding associations had formulated policies.

Most of the Higher Education Associations employed university/college faculty on a part-time basis in one or more capacities. The responses were as follows: Association Officer (74%), Editor (37%), Consultant (67%), Project Director (42%), Committee Member (72%), Instruction/Continuing
Education (26%), Workshop/Conference Speaker (65%). The faculty were generally given at least their expense money, and for positions other than Association Officers and Committee Members, were often given an additional stipend or honoraria. Funds for payment of faculty generally came from the Association budget, but in many cases may have come from other sources as well, most frequently from income earned by fees from the activity.

Almost one third of the Higher Education Associations indicated that faculty may be used on a part-time basis for activities resulting in property rights (33%) or royalties (30%). Property rights and royalties typically went to the Association, or were handled on an "ad hoc" basis.

Results - Professional Associations. Very few of the professional associations had either formulated policies or worked with any external agency in establishing policies related to these areas. (See Table 3 and Appendix, Survey 4-Professional Associations). In only one of the six areas surveyed, Property Rights and Royalties (17%), had as many as 10% of the associations formulated policies.

Nearly all of the Professional Associations employed university/college faculty on a part-time basis for performing association work or projects; Association Officer (73%), Editor (61%), Consultant (65%), Project Director (49%), Committee Member (76%), Instruction/Continuing Education (39%), Workshop/Conference Speaker (78%). Association Officers and Committee Members were typically given only expense money which usually came from association funds. Editors often received a stipend/honorarium in addition to expense money. Consultants were very likely to be paid an honorarium/stipend, but funds for this were derived from other sources as well as association funds; Project Directors are most likely paid from government grants/contracts.
Close to half the professional associations indicated that faculty may be used on a part-time basis for activities resulting in property rights (49%) or royalties (39%). Property rights and royalties were generally retained by the association, but were also negotiated on an ad-hoc basis.
DISCUSSION

The principle goals of the surveys were to 1) identify problem areas related to university policies/practices regarding consulting, overload instructional activities, production/use of intellectual property and related issues and 2) seek information as to where responsibility for these policies was currently assigned. Although these surveys were somewhat different, some comparisons can be made. Generally, university central offices felt that the current status of their policies were much more satisfactory than did respondents to the Planning Survey. However, there was general agreement on the basic topics which were the biggest problem areas. Both groups (See Table 1) indicated that policies related to External Consulting, Production/Use of Educational Materials, Salary Reimbursement/Recovery and Continuing Education were the biggest problem areas, while policies related to Patents, Internal Consulting/Overload, and Fringe Benefits on Additional Income were the smallest problem areas. A related interview survey (reported separately) of academic (and non-academic) administrators and faculty at ten institutions contrasts significantly to the mail survey results of university central offices. The ten university interview study generally provides results similar to the planning survey.

Responsibility for establishing these policies and practices seems to rest with the university central offices. Responses from Statewide Coordinating Agencies indicated that they generally had no responsibility for these policies and that they were perhaps unfamiliar with their current status. Similarly, Community College Offices indicated that they generally did not have major responsibility, although they appear to have more responsibility than State-wide Coordinating Agencies.

A survey sent to Private Foundations indicated that they usually adopted a rather passive role related to these policy issues, generally
accepting whatever policies exist at grantee institutions. It is not clear to what extent foundations have examined what university policies actually exist or whether they know how these policies are being applied to foundation support.

Both Higher Education Associations and Professional Associations actively utilize the part-time services of university faculty and professional staff for a wide variety of activities. In spite of the importance of these relationships, few of either the Educational or Professional associations have developed policies or standards related to these activities, or have provided advice to government agencies, legislatures or others.

PLANNING SURVEY

Survey Population: 228  Responses: 30

Because of your interest and knowledge in academic policy, you could assist the conference director in finalizing a stimulating and useful program by completing this questionnaire. Your cooperation in the return of this questionnaire no later than October 15, 1976, will be greatly appreciated.

Please rate the status for your current policies/practices on the following scale by circling the appropriate number.

1 = An adequate policy exists and is followed
2 = An adequate policy exists but is not always followed
3 = No policy exists and none is needed
4 = No policy exists but one is needed
5 = Current policy is unsatisfactory and needs change

</tr>
</tbody>
</table>

*A policy problem area is indicated by response scale numbers 2, 4 and 5. This column is the sum of these three responses.
8. Fringe Benefits - Policies or practices on payment of fringe benefits on additional income (i.e., above basic AAUP reported contract salary) paid by the institution.

9. Continuing Education/Extension - Participation or regular instructional staff in continuing education, extension or other adult education programs as an on load assignment without additional compensation.

Do any of the above (or closely related) policy-practice areas pose particular problems at your institution? If so, please describe.

- Production/Use of Education Materials
- Patents/Licensing
- External Consulting
- Overload Teaching
- Internal/Overload Research
- Sabbatical (other salary during)
- Salary Reimbursement
- Fringe Benefits
- Continuing Education

If you know of institutions which have developed innovative ways to deal with any of these policy-practice areas, please list the area, the institution and provide appropriate comments.

None of respondents indicated any innovative policies.

If you have relevant policy documents available for your institution, please send copies.

2 of 30 respondents sent documents.
STATEWIDE COORDINATING AGENCIES

Survey Population: 42
Responses: 36

We are interested in knowing the responsibilities of your organization for establishing, coordinating or documenting the policies and practices of your constituents in specific areas related to faculty and professional staff income. In the areas where you have some responsibilities, we would like to know the current status of such policies. Please use the following codes:

Responsibility of your Organization
1. None
2. To establish policy-practice in the area
3. To recommend policy-practice in the area
4. To document existing policy-practice in the area

Current Status of Policy
1. Satisfactory policy exists and is followed
2. Satisfactory policy exists and is inconsistently followed
3. Current policy is unsatisfactory and needs change
4. No policy exists, but one is needed
5. No policy exists and none appears to be needed.

Please keep in mind that the purposes of this survey are 1) to establish the responsibility (if any) of your organization in each of several broad policy areas and 2) to determine the current status of each of those policy areas for which you have some responsibility. If you have no responsibility (responsibility code 1) then you should leave the current status code blank.

I. POLICIES with regard to production and use of various types of educational materials. For example, such policies might include: who produces the material and on what compensation basis (i.e., faculty or staff, on-load or for extra compensation); How are copyrights assigned; if royalties are earned, who receives them; are policies different for internal use compared to external use; etc.?

We are interested in knowing the responsibilities of your organization for establishing, coordinating or documenting the policies and practices of your constituents in specific areas related to faculty and professional staff income. In the areas where you have some responsibilities, we would like to know the current status of such policies. Please use the following codes:

Responsibility of your Organization
1. None
2. To establish policy-practice in the area
3. To recommend policy-practice in the area
4. To document existing policy-practice in the area

Current Status of Policy
1. Satisfactory policy exists and is followed
2. Satisfactory policy exists and is inconsistently followed
3. Current policy is unsatisfactory and needs change
4. No policy exists, but one is needed
5. No policy exists and none appears to be needed.

Please keep in mind that the purposes of this survey are 1) to establish the responsibility (if any) of your organization in each of several broad policy areas and 2) to determine the current status of each of those policy areas for which you have some responsibility. If you have no responsibility (responsibility code 1) then you should leave the current status code blank.

I. POLICIES with regard to production and use of various types of educational materials. For example, such policies might include: who produces the material and on what compensation basis (i.e., faculty or staff, on-load or for extra compensation); How are copyrights assigned; if royalties are earned, who receives them; are policies different for internal use compared to external use; etc.?

PRIVATE FOUNDATIONS

Survey Population: 50  Respondents: 30

We are collecting information on policies and practices of private foundations relating to the use of their grant funds by college or university grantees. The questionnaire was designed to indicate the type of policy information we are interested in obtaining. If you find the items unsatisfactory please do not attempt to complete the survey form, but use as an alternative a letter describing your policies, or if available, appropriate policy documents.

I. Production of education material (TV tapes, cassettes, slides, computer programs and programmed instruction, texts and printed material, etc.) with foundation support. Policy for Assignment of Property Rights and Royalties:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Responses</td>
<td></td>
</tr>
<tr>
<td>1. Property rights and royalties are given by the foundation to the grantee institution to be handled entirely according to the grantee institutions policies and practices.</td>
<td>18</td>
</tr>
<tr>
<td>2. Property rights and royalties are given by the foundation to the grantee institution, with a non-exclusive, royalty-free license to the foundation.</td>
<td>0</td>
</tr>
<tr>
<td>3. Property rights are required to be put in the public domain for general use and benefit of the people.</td>
<td>2</td>
</tr>
<tr>
<td>4. Property rights and royalties are handled on an ad-hoc case by case basis as they arise (please describe policy guidelines, if available).</td>
<td>6</td>
</tr>
<tr>
<td>5. Not appropriate (never deal with this situation)</td>
<td>4</td>
</tr>
</tbody>
</table>

II. Patentable inventions resulting from foundation support. Policy for Assignment of Property Rights and Royalties:

<p>| | |</p>
<table>
<thead>
<tr>

<td>2</td>
</tr>
</tbody>
</table>
4. Property rights and royalties are handled on an ad-hoc case by case basis, as they arise (please describe policy guidelines, if available).

Not appropriate (never deal with this situation).

III. Salary payments for faculty, professional and support staff, working on foundation supported projects. Policies for determining salaries paid:

1. Foundation salary and wage support for projects at colleges and universities is expended in accordance with the grantee institution policies, without restrictions by the foundation.

2. Foundation policy for use of project salary and wage funds generally follows the policies of grantee institutions, with the following exceptions: (Circle all appropriate items):

   a) Summer salary for faculty on Academic Contract (Please specify policy):

   b) Consultant Fees. (Please specify policy for both Internal and External Consultants):

   c) Sabbatical Leave Salary Support. (Please specify):

   d) Overload Salaries and Wages Paid to Grantee Institution Personnel. (Please specify, by type of personnel):

3. Not appropriate (never deal with this situation).

4. Other foundation policy practices, not covered in the above, which relate to payment of salaries and wages to college and university personnel supported in part or entirely by foundation funds. (Please describe briefly and/or attach additional material).
We are collecting information on policies, practices and ethical issues relating to the participation of college and university faculty (and professional staff) in part-time consulting and extra teaching. We are also requesting policy information on assignment or property rights and distribution of royalties on college-university related inventions and copyrighted educational material. This survey has two major components: 1) The participation of your association in studies, preparation of testimony, or other ways, in establishing ethical codes and policies, relevant to these areas and 2) the particular policies and practices which your association has developed for utilizing the part-time services of college and university faculty and professional staff for projects and activities of your association.

I. Participation of your association in development of policy positions.
   
   1. Has your association formulated policies, related to any of the topics below, which serve as standards for your members? (e.g., through your association's ethics committee or other special committee).

   2. Has your association been involved with any external agency (Government Agency, U.S. Congress, National Commission, etc.) related to policy formulation for any of the topics below?

PROFESSIONAL ASSOCIATIONS

Survey Population: 73          Response: 41

We are collecting information on policies, practices and ethical issues relating to the participation of college and university faculty (and professional staff) in part-time consulting and extra teaching. We are also requesting policy information on assignment or property rights and distribution of royalties on college-university related inventions and copyrighted educational material. This survey has two major components: 1) The participation of your association in studies, preparation of testimony, or other ways, in establishing ethical codes and policies, relevant to these areas and 2) the particular policies and practices which your association has developed for utilizing the part-time services of college and university faculty and professional staff for projects and activities of your association.

I. Participation of your association in development of policy positions.

1. Has your association formulated policies, related to any of the topics below, which serve as standards for your members? (e.g., through your association's ethics committee or other special committee).

2. Has your association been involved with any external agency (Government Agency, U.S. Congress, National Commission, etc.) related to policy formulation for any of the topics below?
