

PRE- AND POST-TEST

To be given orally, but could be used as written or group activity:

1. What would you do if you were babysitting and the baby you were caring for seemed warm, cried and wouldn't go to sleep?
2. What would you do if you were shopping and the person with you fainted?
3. What would you do if your little brother swallowed something such as some of your mother's cleaning liquids?
4. What would you do if someone was drowning?
 - a. close to shore
 - b. far out in the water
5. What would you do for a bee sting? An insect bite?
6. How would you treat a burn?
7. How would you treat a cut?
8. What would you do for someone who was choking?
9. How (or where) would you get help in an emergency?
10. Name any other emergency you might come across and tell how you would handle it?(Example — Animal bite, broken bones, puncture wound)

RESOURCES

FILMS

Note: Please be polite and follow the directions. If people abuse the privilege, these free films will be made unavailable.

The following films are from *The Educator's Guide to Free Films*. It is asked that you follow this procedure when ordering films:

1. Requests should be made on official stationery.
2. Requests should be made by teachers, not students.
3. Requests should mention *The Educator's Guide to Free Films*.
4. Requests should be made well in advance. Two alternate dates should also be given.
5. Requests are to be made to the address given.

Breath of Life

Mouth-to-mouth resuscitation, 16mm, 16 minutes, sound. American Heart Association — obtain from local or state Heart Association. Borrower pays transportation charges. Book three weeks ahead.

Cardiopulmonary Resuscitation, Recent Developments and Emergency Care

16mm, 20 minutes, sound. Ayerst Laboratories, Mr. Robert Clough, Jr., Director of Audiovisual Services, 685 Third Avenue, New York, New York 10017. Borrower pays no postage. Book 8 weeks ahead. Return after three days by U. S. mail.

Chance to Save a Life

Mouth-to-mouth resuscitation, 16mm, 14 minutes, sound. American Heart Association — obtain from local or state Heart Association. Borrower pays transportation charges. Book 3 weeks ahead.

Child Safety Is No Accident

16 mm, 13 minutes, sound (available only to 7th grade and above). Modern Talking Picture Service, 1145 North McCadden Place, Los Angeles, California 90038. Borrower pays only return postage. Book at least 1 month ahead.

In Time to Live

General life support techniques, 16mm, 18 minutes, sound. American Heart Association — obtain from local or state Heart Association. Borrower pays transportation charges. Book 3 weeks ahead.

Life on the Line

Emergency care systems, 16mm, 20 minutes. American Heart Association, obtain from local or state Heart Association. Borrower pays transportation charges. Book 3 weeks ahead.

Standard First Aid Series

16mm, 270 minutes, sound. This is a series of 10 films, 27 minutes each. American National Red Cross. Most can be obtained from the local Red Cross Chapter. If not, contact: General Supply Office, American National Red Cross, 18th and "E" Streets, N.W., Washington, D.C. 20006. Borrower pays return postage. Book 2 months in advance.

That They May Live

16mm, 24 minutes, sound. Artificial respiration. Amalgamated Meat Cutters and Butchers, Workmen of North America, Department of Education, 2800 North Sheridan Road, Chicago, Illinois 60657. Pay return postage (U.S. Mail – Special Handling). Book 6 weeks ahead and give alternate date.

For the following films, mention *Elementary Teachers' Guide to Free Curriculum Materials* and use school stationery.

Mountain and Desert Survival

Desert Survival (TF 5571b). 16mm, 31 minutes, sound. Department of the Air Force, Air Force Central Audio Visual Library, Aerospace Audiovisual Service, Norton Air Force Base, California 92409. Postage is paid by the Department of the Air Force. Book 3 weeks in advance.

Mouth-to-Mouth Resuscitation

(TV 495) 16mm, 28 minutes, sound. Department of the Army, Fort MacArthur, California 90731. Borrower pays transportation charges one way. Book well in advance. Must be ordered with special forms.

Mouth-to-Mouth Resuscitation in J.H.S.

(10566) 16mm, 16 minutes, sound. Ayerst Laboratories, Mr. Robert T. Clough, Jr., Director of Audiovisual Services, 685 Third Avenue, New York, New York 10017. Borrower pays no postage charges. Book 8 weeks in advance. Return 3 days after receipt.

Techniques of Exhaled-Air Artificial Respiration

(FTA 458), 16mm, 11½ minutes, sound. Department of the Air Force, Air Force Central Audio Visual Library, Aerospace Audiovisual Service, Norton Air Force Base, California 92409.

When Seconds Count

16mm, 4 minutes, sound. American National Red Cross, your local Red Cross Chapter or General Supply Office, American National Red Cross, 18th and "E" Streets, N.W., Washington, D.C. 20006. Borrower pays return postage. Book 2 months in advance.

Dysart Film Library, 977-7281, Ext. 45. Use special order forms.

The Life You Save, 5450, 17 minutes.

How to Save a Choking Victim, 320, 11 minutes.

Filmstrips – Dysart Media Center

Safety on the Streets

Living in the Machine Age

Safety in the Home

Safety at School and at Play

Books

First Aid in Illness and Injury, American Red Cross

First Aid in Illness and Injury, Anthony Greenback

Safety Can Be Fun, Lippincott

Health and Safety for You, Harold Diehl, Webster Division of McGraw-Hill

Charts and Pamphlets

Mention *Elementary Teachers' Guide to Free Curriculum Materials* and use school stationery.

First Aid in the Home, 10 copies free, extra—5¢ each. Department P, Council on Family Health, 633 Third Avenue, New York, New York 10017.

First Aid Facts Chart, Classroom supply, fits in medicine cabinet. Johnson and Johnson, Anne Williams, Consumer Services, New Brunswick, New Jersey 08903.

Nard Poison Prevention Kit, 1 free, 2 or more—\$1.00. The National Association of Retail Druggists, One East Wacker Drive, Chicago, Illinois 60601.

Rescue Breathing to Save a Life, English or Spanish, leaflet, American Heart Association, 44 East 23rd Street, New York, New York 10010.

Note: These materials were found in looking through catalogs, but check the catalogs in your own school.

CHILDREN'S PROJECTS

**WEAVING, CREATIVE STITCHERY (EMBROIDERY)
AND SPOOL KNITTING**

**BY
NAN STONER, SOMERTON**

SEVENTH ANNUAL MIGRANT INSTITUTE – 1976

Note: These crafts should be taught separately at first and then once learned, they can be used as interest centers.

I. GOALS

- A. To give the student a deeper knowledge and appreciation of how our clothes are made.
- B. To expose the children to a variety of materials used in weaving.
- C. To expose the children to a variety of simple crafts.
- D. To provide learning situations, so that the high interest student can develop skills for finding reference materials.
- E. In studying Arizona History, the students will become aware of some of the history of weaving through the Indian Crafts, including Basket Weaving.

II. OBJECTIVES

- A. The student will be able to make a cardboard loom and to do some of the basic weaves.
- B. The student will be able to do some simple embroidery stitches on some type of cloth.
- C. The student will be able to learn the procedure for Spool Knitting and make a simple project.
- D. The high interest student will be able to do reference work in the area of weaving.
- E. In studying Arizona History, the interested student might possibly do some simple basket weaving.

III. MOTIVATION

- A. Go to a cotton field and get some raw cotton. Compare with cotton bought in the store and cotton material.
- B. Have a display of different types of cloth, yarns, embroidery threads and weaving materials.
- C. Have bulletin boards showing the different crafts and the possible things to make.
- D. Have charts and pictures around the room of the different crafts.
- E. Bring some Indian Baskets to class. Discuss how they resemble grass. Discuss the types of materials to use in making a basket.
- F. Have a table for looking at books on the crafts.
- G. If you can get some looms — display them.
- H. Show available films, slides and filmstrips.

IV. COMMITTEE AND GROUP WORK

- A. Paper weaving with construction paper.
- B. Make a cardboard loom and do some simple weaves.
- C. Basket weaving
- D. Reference work, as a possible follow-up, for enrichment.
 - 1. History of weaving
 - 2. History of God's Eyes (Ojo de Dios)
 - 3. Kinds of looms
 - 4. Spinning and Dying
 - 5. Basket weaving
- E. Do a creative stitchery project
- F. Do a spool knitting project

V. EVALUATION

- A. Observe the child working on his project.
- B. The child should be able to name the weaves or creative stitches that he used.
- C. The child should be able to describe how he made his project.
- D. The child should be able to name and possibly tell something about the different types of yarns, threads or materials that he used.

VI. CONCLUDING ACTIVITIES

- A. Display the student's work in the school library.
- B. Enter some of the student's work in the County Fair.
- C. Written and oral reports for the students who did some reference work.

VII. FIELD TRIPS

- A. Cotton field
- B. Cotton gin
- C. Clothing factory
- D. Visit someone or a museum that has different types of looms. In Yuma, such places would be: Arizona Western College art department, Museum at the Territorial Prison, Quechan and Cocopah Indian Reservations and Yuma Fine Arts Association.

VIII. RESOURCES:

P=Primary, I=Intermediate, J=Junior High, S=Senior High

- A. Slides are available through Arizona Highways. Must purchase.
- B. Filmstrips:
 - 1. *Where Clothes Come From*
 - 2. *Materials for Clothing*
 - 3. *How Cloth Is Made*
 - 4. *The Clothing Factory*

C. Films:

1. *Textiles In the Making* (G316), 16mm sound, 14½ minutes, Junior High and above, Association—Sterling Films, 7838 San Fernando Road, Sun Valley, California 91452. (Book at least 10 weeks in advance — give two alternate dates)
2. *Cotton Farmer: Our Changing Way of Life*, I, J
3. *Cotton in Today's World*, I, J, S
4. *Fiber in Art*, Churchill, I, J, S
5. *Cloth: Fiber to Fabric*, P
6. *Clothing: A Pair of Blue Jeans*, P, I
7. *Loom*, P, I, J
8. *Colonial Life and Crafts*, I, J, S
9. *Spinning Wheel*, P, I, J, S

D. Bibliography:

1. *Embroidery for Children*, Ann-Mari Kornerup, Van Nostrand Reinhold Company, New York 10001, 1969
2. *McCall's Crafts: Children's Projects*, Volume I, 1976, pp. 50, 51, 52, and 53.
3. *McCall's Needlecraft Magazines*, They usually have two issues a year, Fall-Winter and Spring-Summer
4. *Byways In Handweaving*, Mary Meigs Atwater, Macmillan Company
5. *Everybody's Weaving Book*, Alfred Allen Lewis, Macmillan Publishing Company, Inc., 1976
6. *Finger Weaving: Indian Braiding*, Alta R. Turner, Little Craft Book Series, Sterling Publishing Company, Inc., New York, 1974
7. *Inkle Loom Weaving*, Frances B. Smith, Little Craft Book Series, Sterling Publishing Company, Inc., New York, 1976
8. *McCall's How To Weave It Book*, Editors of McCall's Needlework and Crafts, McCall Pattern Company, New York 10017, 1973
9. *Off-Loom Weaving Book*, Rose Naumann and Raymond Hull, Charles Scribner's Sons, New York, 1973 (Good book for learning the different weaves).
10. *Off Loom Weaving*, Little Craft Book Series, Sterling Publishing Company, Inc., New York
11. *Simple Weaving*, Grete Kroncke, Van Nostrand Company, New York, 1973
12. *Step-by-Step Weaving*, Neil Znamierowski, Golden Press, New York, 1967
13. *Weaving Off Loom*, Donna Z. Meilack and Lee Erlin Snow, Henry Regnery Company
14. *Weaving on Cardboard*, Marthann Alexander, Taplinger Publishing Company, New York, 1976
15. *Weaving Without A Loom*, Sarita R. Rainey, Davis Publishers, Inc., Worcester, Massachusetts, 1966
16. Sunset Publishing Company has a couple of books out on weaving.
17. *The Story of Cotton*, National Cotton Council of America, P. O. Box 12285, Memphis, Tennessee 38112 (This is a pamphlet for the students; they also have other free materials)

Procedures for the Children's Projects

Weaving:

Materials: Materials used in weaving should be a variety, have character and color. Use yarns (especially rug and craft yarns), jute, embroidery floss, cable cord, twine, sisal cord, strips of material (drapery fabric or scraps of material left over from sewing), nylon loopers, plastic bags, beads, shells, spools, etc.

Warp: Warp should be smooth and strong. Stay away from white as it bleeds. Makes weft threads lighter.

Other supplies: Loom of some type, beater (can be a fork.— students use fingers easily), crochet hook, scissors, tapestry needle (hair pin can easily be used in the primary grades).

Procedure:

1. Make a cardboard loom
 2. Dress the loom (put on the warp threads).
 3. Begin weaving with the plain or tabby weave.
 4. Vary the weaves, by learning new ones.
 5. End with several rows of plain or tabby weave.
 6. Take-off loom.
-

Weaving Vocabulary

Basket Weave: Over and under two warp threads.

Beater: Device for pressing down filling, after each row is woven.

Beating: Pressing down filling, after each row is woven.

Bi-Colored Weft: Using two yarns of different colors at the same time.

Bobbin: A spool for holding filling material to be passed through open shed. Also called a shuttle.

Chain: A series of loops made in the warp after it has been wound on the warping device.

Dressing the Loom: Preparing the warp on a loom for weaving.

Filling: Weft.

Frames: Hand-made loom.

Ghiordes Knots (yor-deez): Piece of yarn about 4" — lay across two warp threads, bend the two ends down, under, and bring up between the two warp threads. Slide knot down until it is snug against the previous row of weaving, pull ends to tighten. Go across row. If doing more than one row of Ghiordes Knots, do two rows of tabby between each row. Alternate, one row of knots, then two rows of tabby.

Weaving Vocabulary (continued)

Hand Spun: Yarn spun by hand on a spinning wheel rather than by machine; it is less regular than commercial yarn.

Leno: An open weave in which pairs of warp ends cross each other and thereby lock the weft threads in position.

Loom: The loom is a device that holds the warp ends or threads taut, so that a shed or opening can be formed. Through this shed the filling or weft, is passed and the interlacing process between warp and filling are achieved. There are simple and complex looms.

Pick: A single weft thread.

Plain weave: The simplest order of interlacing: the weft goes under, over, under the warp, reversing the order on the return row. Also called tabby.

Selvage: Side edge of a woven piece of cloth.

Shed: The space created when certain warp ends are raised above certain others, to allow the weft threads to pass through.

Shuttle: Device for holding filling material, to be passed through open shed. Also called a bobbin.

Soumak (soo-mak): Weft over four warp threads and back under two, and so on across the loom. Easiest to do from left to right, although may be done from right to left.

Tabby: Plain weave.

Tapestry needle: A blunt needle with a large eye to hold the yarn in order to weave.

Warp: The lengthwise threads, held taut by the loom, through which the weft is woven.

Warp-faced: A weaving in which the warp yarns are more visible than the weft yarns.

Weave: The interlacing of ends and picks, in a particular order.

Weaving: The interlacing of lengthwise threads (warp) with crosswise threads (weft).

Weaving draft: The draft that indicates the weaving pattern.

Weft: The crosswise threads, woven into the warp.

Weft-faced: A weaving in which the weft yarns are more visible than the warp yarns.

Woof: Weft.

Wrapping: A weaving technique in which the weft thread is passed completely around the warp.

Suggestions for the order in which the children should learn the weaves. Plain or tabby, basket, bi-colored weft, soumak, ghiordes knot, chain, tapestry (laid-in-technique), laces (Leno, Mexican, Spanish), wrap bundles (wrapping).

Stitchery:

Materials:

Yarn or embroidery thread, needles, scissors, embroidery hoop or wooden frames (optional – depends on the type of material you are using) and supplies for transfers.

Transfers:

Iron on, soft lead pencil (free drawing), tracing wheel and dressmakers' carbon, coloring books; pins to pin picture on fabric – can pull off when finished.

Procedure:

Children can create wall hangings of realistic scenes or abstract designs while learning some of the basic embroidery stitches. Using bright-colored yarn on burlap makes the work seem so much less "sissified" to the boys in the class than if the traditional colors were used and the finished results blend well with the modern decor of today's homes.

Spool Knitting:

Materials:

A spool, four short nails, one longer nail, a hammer, and a ball of yarn.

Procedure:

Thinking of the top of the spool as a clock face, drive in the short nails at 12, 3, 6, and 9 O'clock. Thread the end of the yarn through the hole in the spool, letting about four inches of "tail" extend below the spool. Thread this knitting loom as shown in the example below.

Example:

Lay a second strand of yarn on the outside of the first nail. Using the longer nail as a working tool, pick up the lower strand, lift it up over the nail head, and drop it on the inside of the nail.

Example:

Step 1
Pick up bottom strand

Step 2
Lift it over nail head

Step 3
Drop it on other side of nail

Then lay a second strand of yarn around the outside of the second nail, and work as before. Continue knitting in this manner, around and around the spool, until the work reaches the desired length.

To finish, break off yarn, leaving 10-12 inches of unknit yarn extending. Knit the next nail in turn, as usual. Then insert the nail under the loop still remaining on that nail. Pull this loop until the free end of the yarn comes through. Repeat in turn on each of the next three nails. Pull the loose yarn end tight, and cut it off close to the finished knitting. Then pull the knitting down and out of the spool loom.

Example:

"Horse Rein Zoo"

According to the directions, the spool should have six nails. Other materials needed are: chenille pipe cleaners, 12 inches long, four white, one black, one green, and cotton.

Turtle:

For top of shell, make horse rein tube 27" long. Wind into oval dome about 2" high; shape while sewing edges of tubes together. For bottom of shell, work on only three adjacent nails, making a tube 22" long. Wind and sew into oval disk. For legs, make four tubes each, 2" long; sew foot end flat. Cut two white chenille stems in half. Fold each piece in half; insert folded end into open end of each leg. For neck and head, make 4½" tube. Turn under ¾" at one end and sew to make head (this will not be stuffed). Cut chenille stem in half, fold in half. Insert folded end in open end of neck. Fill out head and neck with cotton. To complete head, make two 1" tubes; sew along sides of head. For tail, work only three adjacent nails for 2½". Stuff top of shell. Sew bottom side of shell to edges of top, inserting head, legs, and tail in place. Be sure to catch all pieces securely. Using contrasting color yarn, embroider markings on back, eyes, eyelids, and mouth.

Snail:

Using three adjacent nails, make a 24" tube for shell. Wind and sew into high dome shape about 1½" in diameter at largest coil; stuff. For body, make two 3½" tubes; sew together lengthwise and at ends. Insert 3" length chenille stem through one end of body; bend ends up to make antennae. Wrap antennae ends with yarn. Sew shell to center of body. For shell markings, use contrasting yarn and work a coiling line in outline stitch.

Octopus:

For body, make 21" tube. Coil and sew into dome shape 2¾" tall and 1¼" diameter at bottom, leaving small length of tube free at wider end to form flat base. Stuff dome, then coil flat base to finish. To make tentacles, use three adjacent nails to make eight 6½" tubes; sew one end of each to base. Embroider mouth and eyes.

Ladybug:

Body is made of two tubes, one 4¼", the other 2¾". Sew each into a loop. Sew smaller loops together to form oval. Sew smaller loop into center of larger loop. For bottom of bug, use three adjacent nails to make a 7" tube of black yarn. Coil into oval to fit body top. For legs, cut and bend three 2" chenille pieces; insert evenly-spaced across narrow width of bottom. Stuff top; sew to bottom, keeping legs in place. For head, use four nails to make a 1" tube; sew to one end of body. Using straight stitch and contrasting yarn, embroider eyes on head. Shell division line is one long straight stitch going from back edge almost to head. Add spots.

Green worm:

Make 11" tube, but do not remove from nails. Stuff slightly at bottom end to make head. Insert whole chenille stem almost down to head. Continue working, but decrease one stitch every third round. To decrease, slip two loops to one nail and treat both loops as one. Make three decreases until three loops remain. Work two more rounds using three loops; bind off. To complete head, make two 1" tubes to sew to sides of head. Embroider on mouth and eyes.

Butterfly:

Using four nails, make a 2¾" tube for body. Sew across one end to make flat tail. Make antennae in head end as for Snail. For larger pair of wings, make two 4" tubes and two 1" tubes of contrasting colors. Form 4" tubes into teardrop-shaped loops; loop and sew smaller tubes inside 4" tubes. For smaller pair of wings, make two 2½" tubes; coil and sew each into circle. Sew a small and a large wing on each side of body, placing large wing over edges of small wings. Tack on two 1" chenille for feet.

INTERMEDIATE
FOURTH TO SIXTH GRADE LEVEL

J A P A N

Committee

**Janette Dean – Eloy Junior High School
Shirley Mundell – Eloy Junior High School
Gilbert Bowman – Mohawk Valley Elementary School
Linda Green – Maricopa Elementary School**

FOURTH ANNUAL MIGRANT INSTITUTE – 1973

J A P A N

I. GOALS

Japan is an exciting island country. We would like our students to gain experiences in both Japan's ancient and modern culture. This unit will give the student the basic physical, geographical, and life style of a group.

II. OBJECTIVES

Given a world map, the students will be able to point to Japan with 100 percent accuracy. They will be able to name five cultural differences between U.S. and Japanese people. They will recognize three occupations based on geographic location.

III. MOTIVATION

- A. Karate Exhibition
- B. Film — Choose from list in resource area
- C. Field Trip — Choose from list in resource area

IV. SUGGESTED COMMITTEE AND GROUP WORK

- A. Japanese Art
 - 1. Calligraphy (penmanship)
 - 2. Silk Screening
 - 3. Laquering
 - 4. Oragami
 - 5. Pottery
 - 6. Wood Block Printing
 - 7. Flower Arranging
- B. Writing and Drama
 - 1. Noh — drama with masks
 - 2. Kabuki — Active drama
 - 3. Puppet Theatre

4. Haiku Poetry
 5. Tanka Poetry
 6. Japanese Folk Stories and Legends
- C. Preparing a Japanese Meal
1. Preparing rice
 2. Using a Hibachi
 3. Tea
 4. Table setting
 5. Using recipes from resource page.
- D. Sports
1. Sumo wrestling
 2. Judo
 3. Karate
 4. Baseball
 5. Gymnastics
 6. Skiing
 7. Soccer
- E. Holidays
1. New Year's Festival – January 1
 2. Children's Festival
 - a. Boy's Day – May 5
 - b. Doll's Day – March 3
 3. Feast of Lanterns (BON) – July 13, 14, 15
 4. Flower Festival – February and April
 5. Moon Festival -- October Harvest Moon
 6. Green Week – May
- F. Japanese Home Life
1. Customs

2. Family life

V. RELATED ACTIVITIES

VI. EVALUATION (pre-tests — post-tests) See accompanying page.

VII. CULMINATING ACTIVITY

A. Japanese Dinner

1. Dress
2. Food
3. Decorations
4. Entertainment
5. Low tables

B. Display Projects at Library, Open House, or PTA.

C. Field Trip to Japanese Flower Gardens (February) on Baseline Road, Phoenix.

PRE-TEST

1. Japan is a (island, peninsula).
2. Japan is a (continent, country, state).
3. An important industry of Japan is the manufacturing of (watches, shoes, motorcycles).
4. (Karate, basketball, football) is a popular sport in Japan.
5. To show politeness in Japan, you (shake hands, bow, kiss).
6. The most famous mountain in Japan is (Mt. Everest, Mt. Fuji, Mt. Hood).
7. Japan's largest city is (Tokyo, New York, Sapporo).

SUGGESTED RECIPES

Date Won-Tons

Delicious crunchy little pastries easy to make when you have a blender and the commercial Won-Ton wrappers sold in specialty shops. Recipe for homemade Won-Ton wrappers is included, however.

8 ounces pitted dates
½ cup shelled walnuts
2 tablespoons orange juice, frozen
2 tablespoons grated orange rind
4 to 5 dozen Won-Ton wrappers
3 cups oil
confectioner's sugar

1. Cut dates into chunks about 1 inch square. Place in blender one quarter at a time, with one quarter of the walnuts. At high speed blend into finest particles. Turn into a large bowl, add orange juice and rind, and knead into a large ball. Roll into cylinders about one inch long and fold and seal into Won-Ton wrappers.
2. Swirl in oil (in pan) and heat to 375 or until a day-old cube of bread browns (about 1 minute). Fry Won-Tons 6 to 8 at a time until just golden brown. Drain well on paper towel, cool, sprinkle lightly with confectioner's sugar before serving. Serves 12 to 15.

Won-Ton Wrappers

2 cups sifted all-purpose flour
½ teaspoon salt
1 large egg
½ cup water

1. Combine flour and salt in bowl. Make a well in center of the bowl. Combine egg and water, and pour into the flour. Use your fingers to combine ingredients. It's easier. When well mixed and all the flour is absorbed, cover with a towel and allow to rest 20 minutes to one hour.
2. Divide dough in half. Flour the counter. Roll out the halves giving the dough a half-turn occasionally to keep the bottom well floured. Roll dough into sheets about 12 inches square, and cut these into squares 3½ inches or less for the wrappers. They should be as thin as you can make them without tearing the dough. Don't pile to store, as they will stick together. Makes about three dozen.

ARIZONA CITRUS

**Linda Morrison – Florence Elementary School
Glenda Vetter – Avondale Elementary School I
Lori Lewis – Florence Elementary School
Shirley Dail – Mohawk Valley
Betty Benton – Frank School, Tempe Elementary District**

**Unit Grade Level
Kindergarten – First**

FIFTH ANNUAL MIGRANT INSTITUTE 1974

ARIZONA CITRUS

(Suggested Grades – Kindergarten-First)

I. GOALS

- A. To expose the children to a variety of Arizona citrus fruits.
- B. To explain what a citrus fruit is and how and where it grows.
- C. To compare citrus fruits and other types of fruit.
- D. To show differences and similarities in the citrus fruits.
- E. To develop the concept: in Arizona, citrus is important to people, and people are important to citrus.

II. OBJECTIVES

- A. The child will be able to name six citrus fruits.
- B. The child will be able to describe a citrus fruit, how it grows and where it grows.
- C. The child will be able to tell the difference between a citrus fruit and other fruits.
- D. The child through his sensory experiences will be able to communicate his understanding of the differences and similarities between the citrus fruits.
- E. The child will be able to express the importance of citrus in his diet, and that many people are needed to produce citrus.

III. MOTIVATION

- A. Have children bring one piece of fruit from home.
- B. Display many fruits, including the Arizona citrus.
- C. Show films. (see audiovisual list)

IV. SUGGESTED ACTIVITIES

- A. Sensory Experiences
 - 1. Peel fruits.
 - 2. Separate sections and count.

3. Find seeds, feel and count.
 4. Skin sections and discuss.
 5. Smell and taste fruits.
 6. Discuss sensory observations.
- B. Using Fruits (see attached recipes)**
1. Make juices.
 2. Bake a Mexican Orange Pie.
 3. Cook Mock Orange Pudding.
 4. Make Ginger-Candied Grapefruit Peel.
 5. Make perfume, bottle and use as a gift.
 6. Make pomanders.
 7. Any number of prepared mixes from the grocery store can be used.
- C. Art Activities**
1. Block print with cut fruits.
 2. Model fruits from paper mache, clay, etc.
 3. Finger-paint with citrus colors.
 4. Make a mural of the field trip experiences.
 5. Make a collage of citrus fruits, colors, textures, etc.
 6. Let children make bulletin boards showing what they have learned about citrus.
- D. Reading Enrichment Activities**
1. Show and discuss growth from seeds to fruit.
 2. Take field trip to citrus grove.
 3. Write stories about experiences, feelings after tasting fruits, etc.
 4. Have the children do dramatic play about tree growth.
 5. Role play activities of workers in citrus related jobs.
 6. Reading games (see Teacher References)

V. EVALUATION

Through many of the foregoing activities the children will be able to express the listed objectives.

VI. SUGGESTED PROCEDURES

- A. Unit should be used during the month of January which is the harvest month for citrus. Reinforcement activities can be used when blossoms develop later.
- B. A culminating activity could be the purchase of a citrus tree and planting it during Arbor Day.

VII. RESOURCES

A. Field Trips

1. Tal-Wi-Wi Ranch
North Litchfield Road
Litchfield, Arizona
Phone: 935-9388
2. Central Citrus Company
2929 South Priest Road
Tempe, Arizona
Phone: 967-8693
3. Mesa Citrus Growers Association
254 West Broadway
Mesa, Arizona
Phone: 964-8615
4. Spencer & Spencer Citrus Development
Main Office, Main Canal
Tacna, Arizona
Phone: 785-3369
5. Desert Citrus Packers
P. O. Box 4940, K DFA Station
Yuma, Arizona 85364
Phone: 726-0630

B. Audiovisual Materials

Films:

1. *The Orange Grower.* (16 min.) Dysart Film Library, No. 3610.
2. *The Story of Citrus Fruits.* (11 min.) Dysart Film Library, No. 3607, Somerton Film Library, No. 64.

3. *Secrets of the Plant World*. (15 min.) Disney, Tempe Elementary.
4. *Seeds Grow Into Plants*. (11 min.) Coronet, Tempe Elementary.
5. *Children of the Fields*. (28 min.) Xerox, Tempe Elementary.

E. Teachers Books

1. American Guidance Service, *Peabody Language Development Kits*. Levels P and No. 1 (pictures and simulated fruit).

2. *Home Citrus In Arizona*. Bulletin A62, University of Arizona, Cooperative Extension Service and Agricultural Station.

3. Limburg, Peter, *What's In The Names of Fruit*. Coward, McCann, and Geoghegan, Inc., New York.

F. Free Materials

1. Florida Citrus Commission, Institutional and School Marketing Department, P. O. Box 148, Lakeland, Florida 33802.
Request the following: The Orange Clock, Monthly Calendar, Word Picture Story, Four Seasons.

2. Sunkist Growers, Luhrs Central Building, Phoenix, Arizona.
Telephone: 252-7294.

G. Appropriate Spanish Words

Orange	(naran'ha)	naranja
Lemon	(Lēmōn')	limon
Grapefruit	(tōrōn'ha)	toronja
Lime	(lĕ'ma)	lima
Tangerine	(naranhĕ'tā)	naranjita — madrinos or naranchitos
Tangelo	(tan'gelō)	tangelo
orange	(anaranha'dō)	anaranjado
yellow	(amarĕ'ō)	amarillo
green	(ver'de)	verde

H. Reading Games

1. Kaplan, Madsen and Taylor, *Change For Children*. Goodyear Publishing Company, Inc., Pacific Palisades, California.

2. Lorton, Mary Baratta, *Workjobs*. Addison-Wesley Publishing Co., Menlo Park, California.

CITRUS JOBS ARE VARIED

IT BEGINS as a mere trickle. The picking of one fruit after another. Soon, the trickle becomes a mighty river. As it rolls along it brings benefits to many people . . .

People who sort, pack, and process the fruit.

People who operate trucks, trains, and ocean-spanning vessels that deliver the fruit to markets.

People who harvest the trees, convert them into pulp for the manufacture of millions of shipping cartons.

People who produce the gasoline and oils, the electricity, the fertilizers, and the chemicals bought by citrus growers.

People employed in research . . . for citrus by-products, for better fruit varieties, for better cultural methods, for better fruit quality.

People who build the tractors and the multiplicity of other machines used by the growers, packers, processors, and the shippers.

In Arizona, citrus is important to people. And people are important to citrus.

(Pictures and text can be used as ideas for bulletin boards.)

Mexican Orange Pie

1 cup and 6 tablespoons sugar
 ½ cup boiling water
 3 eggs, separated
 ¼ cup unsifted flour
 tiny pinch of salt
 1½ cups fresh orange juice
 1 tablespoon butter or margarine
 1 teaspoon vanilla
 2/3 cup chopped nuts
 1 (9-inch) pie shell, baked
 ¼ teaspoon cream of tartar

Place the cup of sugar in a heavy skillet and set over low heat, stirring until sugar melts and turns golden: watch carefully, lest it caramelize too much. Stir in the boiling water and blend well. Beat egg yolks until foamy, then beat in flour, salt, and orange juice. Blend gradually with the sugar syrup. Stir over low heat until mixture thickens. Add butter, vanilla, and nuts. Cool slightly, stirring frequently, then turn into the pie shell. Make meringue by beating egg whites and cream of tartar until stiff, adding the 6 tablespoons sugar very gradually. Spread over pie and bake about 12 minutes in a 350 oven. Serve cold. *Makes 8 rich servings.*

Mock Orange Pudding

1 can eagle Brand sweetened condensed milk
 ½ cup mock orange juice
 1 teaspoon grated rind
 1 egg, slightly beaten

In a medium-size bowl, combine sweetened condensed milk, mock orange juice, and rind; blend in egg. Pour into dishes or cups.

Ginger-candied Grapefruit Peel

2 cups prepared grapefruit peel
 2 cups sugar
 2 cups water
 1 teaspoon ground ginger
 ¼ teaspoon salt
 ½ envelope unflavored gelatine
 2 tablespoons cold water

Peel grapefruit and cut peel into strips. Cover with water and boil 15 minutes. Drain. Repeat process twice, with fresh water each time. Measure peel, then combine with sugar, water, ginger, and salt. Place over low heat and cook very slowly until syrup is quite heavy, but *do not* let it caramelize. When peel is tender, remove from heat and add gelatine, which has been softened in the cold water. Stir well to dissolve gelatine. Let stand until cold. Drain peel and roll pieces in sugar. Let dry on waxed paper. This has a different and delicious flavor.

Golden Orange Toast

½ cup undiluted evaporated milk
 6 egg yolks
 1/3 plus ½ cup orange juice
 1 tablespoon plus 2 teaspoons grated orange rind
 small dash of salt
 pinch of nutmeg
 8 standard-size slices bread
 3 tablespoons margarine
 1 cup light brown sugar, firmly packed

Beat milk and egg yolks together well, then beat in the 1/3 cup orange juice. Beat in the 1 tablespoon grated rind, the salt, and the nutmeg. Dip each slice of bread in this mixture and saute in the margarine until golden on each side: *do not* brown the toast. Serve hot with a sauce made by combining the ½ cup orange juice, the 2 teaspoons grated rind, and the brown sugar. Simmer 5 minutes, stirring constantly. *Serves 4 to 6.*

Skills Classifying; observing different forms of food containing common fruits; selecting words; reading.

The child sorts the empty packages onto the appropriate fruit card.

ACTIVITY

The teacher might discuss the activity as follows: "What is the name of this fruit? And this one? And this one? Take one of the boxes here and look at it carefully. Can you tell what flavor of fruit was used? Good. Where do you think the applesauce should go?"

GETTING STARTED

Tell me about all the things with apples in them.

Tell me about the things with cherries in them.

Show me a fruit that is orange and is sweet. Show me another fruit that is sweet. What do we call this? Show me a fruit that is *not* sweet. What is it called? How does it taste? Show me a fruit that looks just like this fruit in shape but it is a different color.

Show me a fruit that grows in Africa. One that grows in California. One that grows in Hawaii.

Name all the fruits that are yellow.

Show me a fruit that comes in a bunch. Another one.

What fruit is spelled "b-a-n-a-n-a"?

IDEAS FOR FOLLOW-UP DISCUSSION

10" X 16" pieces of tagboard.

Pictures of fruits.

Glue.

Clear contact paper to protect tagboard and containers.

Marking pen to write names of fruits.

Plastic fruits to match pictures.

Empty food packages that contained fruit or fruit products.

Apples: applesauce, apple strudel, apple pie, apple juice, baked apples, Applette candy bar.

Pears: pear nectar, canned pears.

Grapes: wine, grape juice, raisins, grape jelly, grape chewing gum.

Oranges: orange juice, orange marmalade, orange Jello, orange cake mix.

Bananas: banana cream pie, banana cake, banana muffins, banana nut bread.

Cherries: cherry Jello, cherry cookies, maraschino cherries, cherry cough drops, cherry pie.

Pineapples: canned pineapple slices, pineapple juice, pineapple upside-down cake.

Strawberries: strawberry jelly, frozen berries, strawberry Jello, strawberry cheese cake, strawberry yogurt.

Lemons: lemonade, lemon juice, lemon cookies, lemon cake.

Peaches: peach pie, peach jam, canned peaches, peach nectar.

Containers for cards.

Large container for empty boxes and boxed cards.

MATERIALS

PINAL COUNTY

**Brenda Mason – Stanfield Elementary School
Johnnie Myers – Maricopa Elementary School
Margaret Templeton – Maricopa Elementary School**

**Unit Grade Level
Intermediate**

FIFTH ANNUAL MIGRANT INSTITUTE – 1974

PINAL COUNTY

(Suggested for Intermediate Grades)

I GOALS

- A. To give the student the opportunity to study various Indian tribes and their cultures.
- B. To provide knowledge of type of industries available in Pinal County and how these industries affect the student.
- C. To have students become aware of the historical background of Pinal County.

II. OBJECTIVES

- A. The student will become more familiar with the history of Pinal County.
- B. The student will be able to identify the major tribes of Indians and the culture of these tribes.
- C. To have students become aware of the historical background of Pinal County.

III. SUGGESTED MOTIVATION

- A. Bring a cotton ball (or use a packaged cotton ball) and a finished piece of cotton material to class to allow the students to feel and see the difference.
- B. Obtain Indian basket or picture of one and ask how this basket resembles grass.
- C. Secure a jar of water, some dirt, and some grass and purchase an adobe brick to show the use of dirt and grass in the making of homes.
- D. Plant some cotton seeds in one-half gallon milk cartons and allow children to plant, water and watch grow.

IV. SUGGESTED GROUPS

- A. Indian tribes.
 - 1. Pima
 - 2. Papago
 - 3. Maricopa
- B. Industry.
 - 1. Agriculture

2. Mining
3. Livestock

V. SUGGESTED ACTIVITIES

- A. Using a large map of Pinal County on the bulletin board, show crops grown and their location, using bright colored yarn from article to location on the map.
- B. Make Indian popovers.
- C. Let children listen and dance to Indian music.
- D. Have students list use of cotton.
- E. Make replica of Indian housing, using clay, grass, small sticks, paints and one-half pint milk cartons.
- F. Using any media available, draw picture showing use of cotton.
- G. Make a mural showing different kinds of crops grown in Pinal County.
- H. Make a pictograph for others to read.
- I. Make a dirt table of early Indian life.
- J. Get samples of pottery made by Pimas, and the baskets made by Papagos.
- K. Using ceramic clay design, paint indian pottery.
- L. Using salt ceramics, make a raised map of Pinal County.
- M. Have a wagon train around the room. Have each child draw his own wagon. (Wagons may be constructed from shoe boxes).
- N. Make a model of open pit mine. (This activity to be used after trip to open pit mine.)

VI. SUGGESTED FIELD TRIPS

A. Mining Related

- | | | |
|-----------|----------|-------------|
| 1. ASARCO | 836-2171 | Casa Grande |
| 2. Hecla | 836-2141 | Casa Grande |

B. Livestock

- | | | |
|--------------------|----------|-------------|
| 1. Red River Farms | 424-3314 | (Stanfield) |
| 2. Benedict's | 424-3411 | (Stanfield) |

Pinal County – Intermediate

C. Cotton

1. Casa Grande Oil Mill 836-7406
2. Eleven Mile Corner 723-5694
3. Best Gin 568-2220 (Maricopa)
4. Eloy Gin 466-7673

D. History

1. Casa Grande Hist. Museum 836-2223 (W-F., & Sun. 2-5)
2. BeDillions Cactus Garden 836-7750 (Casa Grande)
3. Pinal County Hist. Museum 868-4382 (Florence – W-Sat., 1-5)
4. Pinal County Courthouse 868-5801 (Florence – W-Sat., 1-5)
5. Pinal County Tourist Center 868-4331 1012 S. Main–Florence

E. Indians

1. Casa Grande Ruins 723-3172 (Coolidge--7A.M.–6P.M.)
2. Gila River Reservation Sacaton
3. Gila River Arts & Crafts 562-3411 Sacaton
4. HoHoKam Museum 723-4796 1035 S. Az., Blvd., Coolidge)

VII. REFERENCE MATERIALS

A. Teacher Reference Magazines and Newspapers

1. *Arizona Highways*. 2039 West Lewis Avenue, Phoenix.
2. *Arizona Republic*. Friday, March 3, 1972, P. 52, History of Pinal County.
3. *Casa Grande Dispatch*. Wednesday, June 26, 1974, "Cotton Issue."
4. Pamphlets from Chambers of Commerce of Casa Grande, Coolidge, and Florence. (Obtain from City Hall of each town.)

B. Books for Young Readers

1. *Arizona Adventure*. Madelin Pare' and Bert Fireman, Arizona Historical Foundation, 1967.

Pinal County – Intermediate

2. *The American Indian as a Farmer*. Loverne Morris, Melmont Press, 1963.

- D. Films to be Ordered from the Florence Library. These are (I-J)...
1. Indian heading, No. 970, *Maps, Indians, U.S. Reservations*.
 2. Cotton heading, No. 633, *Clothing: A Pair of Blue Jeans*.
 3. Livestock heading, No. 630, *The Cattlemen*.
- E. Films to be Ordered Through Central Arizona Film Cooperative ASU Films
1. *The Cotton Farmer*.
 2. *Cotton-From Fiber to Fabric*.

3. *Cotton-Nature's Wonder Fiber.* 25 min.
 4. *Indian Artists of the Southwest.* 30 min.
 5. *Copper Mining and Smelting.* 30 min.
 6. *Copper the Oldest Modern Metal.* 20 min.
 7. *The Modern Prospector.* 18 min.
 8. *Cattleman – A Rancher's Story.* 15 min.
 9. *Meat from Range to Market.* 12 min.
- F. Filmstrips to be Ordered from the Florence Library
1. No. 454 (P-I), *The Story of Cotton.*
 2. No. 134 (P-I), *Where & How People Work & Live: Clothes from Head to Toe.*
- G. Related Activities
1. Lost Dutchman Day – January, Apache Junction, Arizona.
 2. Mul-Cha-Tha – February, Sacaton, Arizona.
 3. O'Odamtash – February, Casa Grande, Arizona.
 4. Western Days – March, Coolidge, Arizona.
 5. Pioneer Days – April, Kearney, Arizona.
 6. Stagecoach Days – March, Maricopa, Arizona.

VIII. EVALUATION

- A. Have each child pick a section of the unit he enjoyed and write a story and draw a picture about it and discuss with class.
- B. Using the Indian symbols, have class write a message to someone in the class to be read out loud.
- C. Give each student a map of Pinal County and have him locate county seat, major cities, home city, reservations, etc.

SALT CERAMIC

1 cup of table salt

3/4 cup of cold water

½ cup of cornstarch

Mix together in the top part of a double boiler and the whole boiler placed over heat. The mixture is stirred constantly and in about two or three minutes it becomes so thick the whole mixture follows the spoon in the stirring process. It quickly reaches a consistency similar to bread dough, and when it does, it is dumped onto a piece of wax paper or aluminum foil and allowed to cool. When it has cooled sufficiently to be handled, it is kneaded with the hands for several minutes after which it is ready for use. Salt ceramic will harden to a consistency of stone, it does not shrink when drying.

DOUGH RECIPE

3 slices of white bread

3 tablespoons white glue

3 drops of white shoe polish (optional)

3 drops glycerine (optional)

Adding the shoe polish and glycerine makes a better consistency for molding. After trimming off the bread crust, mix other ingredients. Use cooking oil on your hands when you begin to handle the dough, which should have the texture of clay. Bread dough can be stored in the refrigerator for weeks if kept tightly wrapped in plastic. Bread dough may be tinted with food coloring.

INDIAN POPOVERS

3 cups self-rising flour

½ cup lard

1 cup (about) warm water

Lard for frying

Powdered sugar or honey

Combine flour and ½ cup lard. Add water a little bit at a time, mixing until the dough is moist enough to handle. Knead gently, but not too much. Spread a thin layer of lard all over the ball of dough and set in a pan. Cover with a dish towel or foil. Let it rise at least 30 minutes, preferably overnight.

Break off about ½ cup of dough at a time; roll into balls; set on tray. Take one ball at a time, pat and flatten it out between the hands, shaping it into a large circle. It should be as thin as cardboard around the edges.

Have lard for frying at a low boil. Brown popover lightly on one side; turn; brown the other side (about five seconds per side). Serve hot with sugar or honey, or sweets and spread with refried beans.

INDIAN SYMBOLS

The Indians had no written language. They had no alphabet such as we have. The Indians used symbols or signs to send messages to each other. These symbols can be woven into Indian rugs, and hammered into Indian jewelry.

1. Four Ages: baby, youth, man, old man
2. Teepæ: temporary home
3. Cactus Flower: courtship
4. Thunderbird: bearer of happiness
5. Butterfly: everlasting life
6. Lasso: captivity
7. Arrow: protection
8. Sun: happiness
9. Eagle Feathers: chief
10. Arrowhead: alertness
11. Saddlebags: journey
12. Crossed Arrows: friendship
13. Medicine Man's Eye: wise
14. Bird: carefree
15. Buffalo Eye: alertness
16. Rain and Raindrop: plentiful crops
17. Sun's Ray: brightness
18. Running Water: life
19. Broken Arrow: peace
20. Hogan: permanent home
21. Thunderbird Track: good prospects
22. Deer Track: plenty of game
23. Bear Track: good omen
24. Rattlesnake Jaw: strength
25. Mountains: abundance
26. Rain Clouds: good sign

A writer sits down to write a story about a large piece of real estate — a state, county or city — and he tells himself he must resist the old cliché that the area is "a place of contrasts, an interesting blend of the old and the new."

But sometimes the cliché is more apt than other, fresher words. So Pinal County, in South Central Arizona, must be called a place of contrasts, an interesting blend of the old and the new.

It is traversed, from north to south, by Arizona's most modern thoroughfare, Interstate 10. And there are Indian trails on the Gila River and Papago reservations that have their origins in antiquity.

There are mining towns — and maybe old Spanish workings — that have completely vanished from the face of the desert and mountain. There are others — Kearny and San Manuel — that are among the world's newest.

There are cattle ranches along the San Pedro, in the foothills of the Galiuros, the Tortillas, the Dripping Springs, the Mescals, the Pinals and Sombrero Butte, where riders handle cattle, in many ways, as they did in the 1880s. Centered around Stanfield are pen feeding and cattle breeding operations where cattlemen are more familiar with vitamins, vaccines and sophisticated marketing procedures than they are with the branding iron and riata.

Pinal County has more future than many old Arizona hands, who like the wide open spaces as wide and open as possible, care to contemplate. West Central Pinal County lies in the pathway of progress — the corridor between Phoenix and Tucson. The existing towns bustle, and there are other towns that, so far, exist only on the plats of developers. The day may not be too far distant when there will be a big legal rowdy-dow to keep Frank Lloyd Wright houses off the upper slopes of Sawtooth Mountain.

Pinal County's early human history is a partial mystery, explored by the archaeologists and anthropologists. South Central Arizona was the center of the vast Hohokam culture that extended from Tucson to Phoenix, from the San Pedro to the Yuma desert. It was flourishing a thousand years ago, a network of villages, fields and irrigation canals, and its central structure was a four-story granary and watch tower. That structure now is the Casa Grande National Monument, on the northern outskirts of Coolidge and flanked by a museum and staffed by park rangers.

Esteban, the Moorish slave and advance man for Fra Marcos de Niza, traveled the San Pedro River en route to the Zuni Villages of New Mexico in 1538. Maybe de Niza followed him into the Pinal country, maybe not. Melchior Diaz went looking for Esteban along the San Pedro and explored the Gila, east and west. The almost legendary padres, Eusebio Kino and Tomas Garces, passed this way two centuries later, along the Santa Cruz River to the Pima villages.

Pinal County — Intermediate

One of a series . . .

*The Fascinating Fourteen
Arizona Counties*

P I N A L C O U N T Y , A R I Z O N A

Map and story by KEARNEY EGERTON

The storied Gila Trail parallels the Santa Cruz north to its confluence with the Gila and it may have been the most pleasant part of that old route to the West. There was always water in the rivers and the Pimas were generous with food and friendship. It was hot in summer — but not as hot as the California desert that lay ahead. And the warring Apaches had been left behind in Southeastern Arizona.

Garces and de Anza, en route to find San Francisco, traveled the Gila Trail, as did the Mormon Battalion, General Kearny and the Army of the West, the Forty-Niners and Butterfield's Overland Mail. Advance parties of the California Column, marching east, and the First Mounted Texas Rifles, riding west, met near Picacho Peak and fought Arizona's only skirmish of the Civil War.

The natives along the Gila Trail were friendly, but those along the San Pedro were not. They were the Apaches, and the army established posts along the river — Fort Breckenridge, Camp Picket Post, Camp Infantry and Camp Grant. Perhaps there were Indian atrocities, but none matched the savagery of a party of whites, Mexicans and Papagos who marched by night, in April of 1871, to an Indian rancharia near Camp Grant and clubbed to death 108 sleeping Apaches. All but eight of the victims were women.

There were stagecoach stations, too — quaintly romantic in the Western movies but pretty grubby in actuality — at Riverside, Montezuma, Bluewater, Maricopa Wells and Dudleyville.

Old Pinal's cast of characters was as colorful as any created by writers of Western fiction. In addition to the panorama of Indians, leatherjacketed Spanish cavalymen, 19th Century U.S. soldiers, cowboys, miners, gamblers, migrant gunfighters, Spanish priests and runaway eccentrics there were:

Pauline Cushman, the beautiful Union girl spy who operated with flamboyance behind the Confederate lines and who became a celebrity of sorts in Casa Grande. Once she enlivened a dull afternoon on the main street by horsewhipping a guy who had said something unkind about her.

Charles Poston, the "father of Arizona" and one-time alcalde at Tubac who tried to reactivate the ancient Parsee religion of Persia in Florence. He wanted to build a temple to the sun atop Poston Butte near Florence, but nobody else was interested.

Pearl Hart, Arizona's notorious girl bandit. She and a boy friend stuck up the Globe-Riverside stagecoach, a venture that netted her five years in the Yuma pen. She later went into show biz, laid a gigantic egg and faded into obscurity.

James A. Reavis, the "Baron of Arizona" who almost pulled off the biggest land swindle in Southwestern history. A Florence printer named Tom Weedon spotted an anachronism in a forged Spanish document that supposedly supported the Baron's claim to most of Central Arizona. The baron wound up, with a very short haircut, in a federal pen in Santa Fe.

Jim Sam, the Chinese gunfighter. A crowd of rowdies thought it would be great fun to "trash" Jim Sam's Florence restaurant, but Jim Sam appeared in the doorway with a six-gun in each hand and a knife between his teeth. There was a mass, unanimous backdown.

Pinal County's roster of ghosts is impressive, too. Pinal City, where Big Nose Kate went after Doc Holliday, who told her to get lost, and where the second Mrs. Wyatt Earp died of an overdose of drugs and snakehead whiskey. Adamsville, remembered mostly for homicides. Vekol, which banished bars. American Flag, Cochran, Sasco and Copper Creek.

There are wild horses in the San Tan Mountains and artifacts in the ancient mounds of the Hohokam. There are contemporary Indian arts in the new Indian center, just off Interstate 10 near Sacaton, and a new college at Signal Peak. There are javelinas on the outskirts of Florence and historic buildings in town (the state prison is there, too, but it hardly qualifies as a tourist attraction). There are legends of Peralta and Dutchman mines in the Superstitions, gold found and lost, and of Spanish treasure in the Vekol caves. And there is the legend of the Papago Arsenal in the Vaiva Hills of the Papago reservation — a cache of antique weapons hoarded against the day when the Bean People would drive the white man away.

Casa Grande claims some of the best Mexican restaurants in the Southwest — a claim hotly denied by the enchilada builders of Florence. The San Francisco Giants own a winter training base — and a towering motel — near Casa Grande and John Wayne owns a Stanfield bull valued at \$200,000, not to mention his other cattle and cotton holdings there.

There's a botanical garden at Picket Post mountain, the world-famous Boyce Thompson Arboretum, and another, the world's longest, south of Florence. It's a stretch of highway, the Pinal Pioneer Parkway, U.S. 89-29 between Florence and Oracle Junction, where the desert plants are identified by small signs and where man's intrusion is kept to a minimum. A monument marks the spot where Tom Mix, the famous Western star of the silent movies, was killed in an auto crash.

Territorial vintage house, Florence

Casa Grande National Monument

CAREER EDUCATION: BANKING IT

Grade Level: Fourth to Sixth

Committee:

**Rorie Jan Measure
Dollie Cubler
Bob Lawson
Scott A. Mundell
Bill Johnston
Tom Ralls**

FIFTH ANNUAL MIGRANT INSTITUTE — 1974

I. GOAL STATEMENTS

- A. To make students aware of a minimum number of occupations within the banking and finance industry.
- B. To help the students become aware of the relevance of mathematics to various occupations in banking and finance.
- C. To help the students become aware of the relevance of reading in various occupations in banking and finance.
- D. To expose the students to consumer rights and protection information.

II. OBJECTIVES

- A. Each student will be able to list a minimum of six banking occupations.

1. Activities:

- a. The teacher selects one of the pieces of media (film or filmstrip) listed in the resources list. This film or filmstrip should be presented to the class.**

Students should be asked to make a list of as many different jobs as they can discover while watching the media. Students should then be given an opportunity to discuss the different jobs associated with the banking industry in small groups or as a classroom unit.

- b. Teacher invites resource speakers (preferably management level) to give an overview of the banking occupations with which they are familiar.
- c. Students work with the word hunt puzzle provided and discuss.**
- d. Each student or small groups of students are asked to compile lists of as many different banking related occupations as they can. This may be done in a contest format with the individual or group finding the most jobs being declared the winner.**
- e. A vocabulary activity based on the words found (job titles) can be run. This activity should be aimed at assisting the students in recognizing that job titles are often highly descriptive of the jobs they name, i.e., what duties the job entails. Students may be asked to take a job title and analyze to determine what duties are involved in the job it names.
- f. Students may participate in a creative writing activity based on the above activity. Several "different" job titles from those listed in the appendix may be presented to the students. Each student should then be asked to write a story using the "If I were a _____ I would . . ." format. These stories may then be shared with the class and discussed and/or bound into a book.**

- g. Various pieces of banking related tools, equipment and materials are placed in the "bank" along with a list of the occupations that use them. Students are then asked to classify the equipment by the occupation which uses them.**

** Note: Lends to center activity.

2. Evaluation:

Students may be asked to list a specified number of banking related occupations either orally or in writing. Six is a suggested number.

- B. Upon request, the student will be able to describe orally or in writing a minimum of two duties related to each of two occupations of the student's choice, to the teacher's satisfaction.

1. Activities:

- a. Role playing of each occupation in actual simulated banking situation. Each student would then act out role and duties of various occupations.
- b. Pantomime of roles and duties where different groups get an opportunity to participate and guess role and duties.
- c. Charades – Where students will write out a certain occupation and duty performed. Each will choose one of these from the entire class and then proceed to play charades.
- d. Guest speakers to visit class and explain their various duties.
- e. In association with each duty, various office and banking machines must be explained and perhaps demonstrated, exhibited, and used for performance – typewriters, calculators, adding machines, copying machines, telephones, and perhaps dictaphones.
- f. Interviewing members of various local banks through field trips and then reporting to class the results of interview and what was learned about occupations and duties.
- g. Art – drawing, painting, and/or sketching a person depicting a particular duty.
- h. Be interviewed by other students, explain particular duties.

- C. Given a simulated classroom economy utilizing checking accounts to pay for various classroom commodities and services, each student will be able to keep and balance his own checkbook with 100 percent accuracy.

1. Give out checks and checkbooks to pupils. Demonstrate how checks are written and how balance is figured.

2. Give pupils a certain amount of imaginary money to begin their checking account. (This can be done as a reward.) They may spend this money by writing checks for certain privileges (free time, first to go to lunch, etc.). Check their accounts for accuracy.

D. Each student will be able to perform the duties of teller at least once to teacher's satisfaction.

1. A field trip to a local bank.
2. A film or filmstrip.
3. Class speaker — a teller.
4. Student group interview of a teller at work, reported back to class, or videotaped.
5. Class discussion of the duties of the different banking jobs.
6. Class discussion of what the qualities of a good teller are, and how to know if the teller has these qualities.
7. Role Play — a bank officer interviewing for a new teller.
8. The class can rate each applicant on the criterion they developed in discussion, and explore possibilities through discussion for measuring competence in areas not adequately covered in an interview. This can lead to an understanding of the *practical uses of tests*, and the importance of some skills taught in school.
9. Game — Players: Teller and customers.

Materials: A deck of cards, each with a problem that a customer might bring to a teller (such as an unbalanced checkbook, a discrepancy between the statement and his records, a passbook that needs interest posted, overdrawn account, etc.). The teller must then rectify the situation to the customer's satisfaction, using the information presented on the card. If the problem has a definite answer, that can be put on the card for the customer to use to check the teller.

The cards should cover the various operations the class has studied and can be used to show a student's knowledge of these operations.

10. Using the class bank set-up in the classroom, each child can take his/her turn being a teller for a certain length of time. The student will carry on the duties of teller, keeping the necessary records. The teacher can audit the teller's work for evaluation of mastery of the math skills involved.

E. Each student will be able to read and correctly complete a loan application.

1. Mr. Al Rezoli of the Valley National Bank of Nogales and Mr. Phil Cortez of the Southern Arizona Bank of Nogales will explain to 5th and 6th grade students how to procure a bank loan and the procedure to fill out a bank loan application.
 - a. In the evaluation, each student must fill out a loan application.
 2. Students will receive and read loan information pamphlets printed by the Valley National Bank, Southern Arizona Bank, Household Finance Company.
 - a. Each student will write five critical questions to be answered in small groups of six students.
 3. Groups of six students will visit, accompanied by a parent, local businesses which include Grants, Browse Around Furniture Store, Preston Motors, Santa Cruz Motors, and St. Joseph's Hospital, to gain information from the managers on the different kinds of loans and loan application procedures related to the different kinds of businesses. Such matters as interest rates and repossession will be discussed with managers.
 - a. Each group will be responsible to make a presentation on their findings to the group. Each member will fill out an application related to the unique concern which he is researching.
 4. A glossary of new terms will be established by each student.
 - a. Each student will be tested on general terms of the loan application for 85 percent accuracy.
 5. Each small group will tape record their conversations with business and banking personnel. Groups will then select what parts are interesting to the entire group.
 - a. A set of critical questions will be compiled by the group as a whole, to discuss with their resource persons in a return discussion.
- F. Each student will be able to read and interpret a monthly bank statement.
1. Students will visit the First National Bank and Arizona Bank of Nogales to observe methods used to make up a monthly bank statement.
 - a. Students will write their observations of such a visit.
 2. From the observations, a simulated classroom banking situation will be established relating to check cashing and the resulting monthly bank statement.
 - a. Each student will be given a role which he must perform adequately related to this activity.

3. Students will read the Arizona Star and Nogales Herald. They will select 10 items. They will have a \$500 balance in their checkbook. They must keep track of their expenditures in order to reconcile their monthly bank statements.
 - a. Each student must show 100 percent accuracy on expenditures and check register.
 4. In the classroom simulated situation, the bookkeepers in each group will pick up the checks, cancel them, and prepare a monthly bank statement to be returned to the student. Each bank statement will have an error in it.
 - a. Each student will locate the error and bring it to the attention of the bookkeeper for correction.
 5. Mario Gregory, the Branch Bank Manager of the Valley National Bank, will be available to answer all questions about monthly bank statements.
 - a. Students will write a brief procedure of the monthly bank statements.
- G. Each student will complete at least one independent research in regard to some aspect of banking, utilizing some reference work(s), periodicals, library books, resource interviews, or other available materials.
1. Activities:
 - a. The teacher should collect as many resource materials as possible and place them in a central location in the room. A number of materials are listed in the materials list included in this unit but the teacher should collect any other materials that are available as well. A number of small groups should then be formed within the class. Each group should then be assisted in choosing some banking related topic on which to do research. A list of *possible* topics is provided here but students need not be limited to these choices.**
 - (1) What education is required for different careers in the banking industry?
 - (2) What is the history of money?
 - (3) What is the history of banking?
 - (4) What different kinds of banks are there?
 - (5) Who owns banks?
 - (6) What do bank people think of their jobs?
 - (7) What are banks like in other countries?

- (8) Where do banks get their money from?
- (9) What are the different things a bank does?
- (10) How do banks protect their money?

And so on . . .

- b. Students should then be allowed to complete their research. Students should be encouraged to illustrate their subject in whatever ways they consider appropriate (drawings, diagrams, models, diaramas, etc.) and to draw from as many resources as possible. Their findings may be compiled in writing, on tape or in any other way the group feels appropriate.**
- c. After research is completed, the group should be encouraged to share their findings with the class. This sharing may be by oral or written report, panel discussion, skit, book form, student-made filmstrip or so on. Students may even be asked to design their own center around their topic.

** Note: Lends to center activity.

2. Evaluation:

A teacher or group discussion/critique may be conducted to evaluate the above activities.

- H. Students will complete a list of ways reading is used in banking and participate in a discussion based on on-site visitations and resource speakers.

1. Activities:

- a. The students shall fill out an employment application obtained from the First National Bank of Eloy, Wally Bolton, Manager.
- b. The students shall receive and read an employment contract obtained from the First National Bank of Eloy, Wally Bolton, Manager.
- c. In a simulated banking situation, the students will communicate through the use of inter and intra-office memos.
- d. The students shall write and distribute a newsletter describing their activities based on a sample newsletter obtained from the First National Bank, Wally Bolton, Manager.
- e. The students shall be given training pamphlets on several non-executive banking occupations and summarize job duties.
- f. The students shall devise a test, based on above activity, to be used for job placement and promotion.

- g. The students shall be given samples of the various forms used in conducting monetary transactions in a bank (i.e., deposit slips, withdrawal slips, etc.).
- h. The students shall be given several pamphlets describing the services offered by banks in general and any special services offered by particular banks (i.e., a. How Interest Works, b. First National Gold One.).
- I. Students will be aware of various types of loans available from banks and related interest types and rates.
 - 1. Interview a bank manager. (This may be done on tape and played back to pupils.) Ask about the different loans available and the interest rates.
 - 2. Have pupils role-play a situation in which a couple applies for a loan.
 - 3. Give out worksheets with loan situations. Have pupils figure out the interest rates and the type of loan needed.
- J. The student will be made aware of the various types of consumer fraud associated with banking and ways to spot and deal with them.
 - 1. The student will be given several sample loan contracts in which the percentage of interest on the loan is determined in several different manners and the students shall determine which is the least expensive and most expensive way to finance the loan.
 - 2. The students shall participate in a role playing situation in which one or more "Bunko" or "Con Game" schemes are shown and explained.

Ex: A student (claiming to be a policeman) asks another student to withdraw a sum of money to be used to catch a thief. After the money is withdrawn, the latter student gives it to the former student (the phony policeman) who then takes off with the money.

Note: Several schemes of this type may be obtained from the local police who may demonstrate it in the classroom.

III. MOTIVATIONAL ACTIVITY

The teacher will compile as much banking information as possible to stir up interest in the class. Then students will view films and visit a bank to be able to set up an actual banking situation in the classroom.

Available from the Arizona Film Co-op:

Money in the Bank and Out. (Intermediate) Color, (15 minutes)

PROD -- DF DIST -- CF 1965

Very good. Explains terms and procedures: deposits, checks, interest, loans, money flow. Good preparation for a field trip to bank (or substitute for a trip). The film gives an interesting explanation of how loans and interest work, and how this is involved in the community economy.

Your Thrift Habits. (2nd Ed.) Color (11 minutes) Intermediate.

PROD — CORF DIST — CORF 1964

Very good. Planning and budgeting your money, aimed at children. Specifically deals with short range money goals, long range money goals, fixed and flexible expenses, with specific method for planning. Good jumping off place for math activities of keeping a budget. Teacher would do well to preview so that he or she can use same format for budgeting activity.

Fred Meets a Bank. (Intermediate) Black and White.

PROD — WOLPER DIST GGHT 1963

Good. Basic information. Good preparation for unit. Covers checks, checking account, savings account, etc.

Economics — It's Elementary. (Primary — Intermediate)

PROD — CAHILL DIST — A MS 1965

Concept of "consumers," not banking.

Beginning Responsibility — Using Money Wisely. (Primary — Intermediate) Color. (11 minutes).

PROD — CORF DIST — CORF 1967

Covers elementary concepts, how money developed from trading, etc.

Using the Bank. (Intermediate) Black and White. (11 minutes)

PROD — EBF 1947

Factual material on bank but *dated*.

Resource Speakers and Field Trips

1. James H. Ozment — FHA Financing
2. Mrs. Raymond Arzel — Transamerica Title
3. Walter Wosch — Coin Coliection
4. First Federal Savings — Dick Soule Telephone: 836-7429
5. First National Bank — Tom Spies Telephone: 836-8243
6. United Bank — Jere Cook Telephone: 836-8795
7. Valley National Bank — Glenn Ruth Telephone: 836-8271
8. Pacific Finance — Danny Smith Telephone: 466-7344

Adeline Schmitt, Reading teacher, Coolidge
Paul Schwier, Resource teacher, Mohawk Valley

Seventh Annual Migrant Institute – 1976

I. GOALS

Corn has played and presently plays a very important role in the subsistence of the peoples of the American continents. We would like our students to be familiar with the origin and history of corn and to be acquainted with its past and present uses.

II. OBJECTIVES

- A. Students will be able to briefly tell the historical origins of the corn plant.
- B. Students will be able to name four different ways that corn is prepared for eating.
- C. Students will be able to name four different corn-derived products other than food products.
- D. Given a picture of the corn plant, students will be able to identify the parts of the plant.
- E. Students will be able to briefly tell about one story or legend based on corn.

III. MOTIVATION

- A. Students will see film *Corn, The Plant With Ears*.
- B. Students will bring ears of "Indian" corn to class.
- C. Teacher will read story *The Origin of Corn* to the class.
- D. The class will prepare a bulletin board with pictures from magazines, study prints, etc. to illustrate the history, production, and uses of corn.

IV. ACTIVITIES

- A. Language Skills Activities
 - 1. Have children select a book from suggested material and report to class.
 - 2. Have children write to chamber of commerce in various Corn Belt states requesting information on corn (especially Mitchell, South Dakota, regarding the Corn Palace).
 - 3. Have children dramatize a legend or story dealing with corn.
 - 4. Show other films from film list.

B. Art Activities

1. Make cornhusk figures; dolls, bushy-tailed alligators, or flowers (Directions in hobby booklet *More Cornhusk Dolls*).
2. Make mosaic designs or pictures using Indian corn kernels.
3. Have children illustrate the story *The Origin of Corn* in the media of their choice.
4. Have children illustrate one of the legends relating to corn.
5. Make corncob pigs (See materials list).

C. Cooking Activities

1. Have students bring in recipes from home to compile a "Corn Recipe Book" to be distributed to students and teachers.
2. Prepare some recipes in class (May be from included recipes).

D. Reference Skills Activities

1. Have students compile a dictionary of new words relating to the history, production, and uses of corn.
2. Have groups of students research and report on the different technological uses of corn.
3. Have students research and prepare a collection of processed or manufactured items in which corn is a principle ingredient.

The Origin of Corn

A tale told by the Ojibwa Indians

This happened many moons ago. Men did not live where they do now. They lived in the East, on islands in the Great Water. Then enemies drove them from the islands. Enemies drove them to the West. There men lived and built their wigwam again. They made new fires. There, Living Statue came with his people. Living Statue was strong; O-wa-she, the Bear was his manitou, and so Living Statue was strong. When there were feasts, men wrestled each other. No man could throw Living Statue. Men wrestled with Living Statue from the rise of sun until mid-day. Men wrestled with Living Statue until the end of day. Living Statue could not be thrown. O-wa-she, his manitou, made him strong.

At night, Living Statue guarded the village so that no enemies could surprise his people. At sunrise he went out to hunt — no man was a greater hunter. Living Statue hunted and on his path as he walked in the forest, stood a little man.

"These hunting grounds are for my people," Living Statue said.

The little man laid down his bow and arrow. "We shall wrestle," he said, "and if I throw you, then these are my hunting grounds and you shall find a new place for your people. If you throw me, then these will be your hunting grounds."

"First we must smoke together," Living Statue said. And, he took his pipe and lighted it and gave it to the little man.

"We have agreed and smoked together," Living Statue said, "and it shall be as you have said."

The wrestling began -- Living Statue was strong; O-wa-she aided him.

The little man was strong. He was a manitou. He was an evil manitou and evil is strong.

"O-wa-she," Living Statue called, "help me. O-wa-she, help me or I shall be thrown and my people will lose their hunting grounds."

O-wa-she heard the cry of Living Statue. Living Statue grew stronger.

"Wa-ge-me-na," Living Statue said, "I have thrown you, little man." And he laid his enemy on the ground.

Living Statue looked at the evil manitou where he lay. But he was no longer on the ground. There was only an ear of corn on a broken stalk.

"You have won, Living Statue," a voice said. Living Statue saw the red silk at the end of the ear of corn. It was like the red feather the little man had worn in his hair.

"Living Statue," the voice said, "take off the leaves that are wrapped around me. Break me into pieces, scatter me over the ground. Then go away. Tell no one what you have done. But when the summer leaves begin to fall, come back."

Living Statue waited three moons. The leaves colored and began to fall. He went back to the place where he had wrestled with the manitou. There stood a field of corn. It was ready to harvest.

So it was that Living Statue gave corn to his people.

From *The Earth Is On A Fish Back*, by Natalie Beetig. Holt, Rinehart and Winston, 1965.

Cooking With Corn

The following recipes all use cornmeal. They are adapted from original Indian recipes.

Indian Bread

(Makes 10 to 12 servings)

- 3 cups flour
- 1 3/4 cups cornmeal
- 1 teaspoon soda
- 2 teaspoons salt
- 1/4 teaspoon nutmeg
- 3 1/3 cups milk
- 1 cup molasses

1. Sift together the dry ingredients. Combine the milk and molasses.
2. Add the liquid ingredients to the dry ingredients, and beat with a rotary beater until smooth.
3. Pour into a well-greased, 2 quart steam mold, cover, and place on a rack in a deep kettle that has a close-fitting lid.
4. Pour enough boiling water into the kettle to come about halfway up the mold. Cover the kettle and steam the mold for three hours.
5. Remove the mold from the kettle, and let stand 20 minutes. Remove the cover and let stand 10 more minutes. Loosen the edges of the pudding with a spatula, invert the mold on a plate, and let stand until the pudding un molds.
6. Serve with lots of butter.

(Woodman Indians of the East)

Corn Pone

- 1 cup cornmeal
- 1/2 teaspoon salt
- 1 teaspoon baking powder
- 2 tablespoons bacon drippings*

*Shortening may be used, but the bacon gives it a flavor of its own

1. Mix cornmeal, salt, and baking powder. Stir in bacon fat and milk.
2. Grease a large, heavy skillet with bacon drippings. Drop batter from a tablespoon, shaping into 4 pones. Brown on both sides. Serve with lots of hot butter.

Golden Corn Bread
(makes 8 to 10 servings)

- 2 cups milk
- 1 teaspoon salt
- 1 1/2 cups yellow cornmeal.
- 3/4 cup butter or margarine
- 3 eggs, separated

1. Heat milk until just scalding. Stir in salt.
2. Quickly mix in cornmeal beating until smooth. Add butter or margarine, and blend in well.
3. Beat egg yolk with a fork and stir into the cornmeal mixture. Beat whites just until soft peaks form; gently fold into the batter.
4. Bake the bread in a greased 8" X 8" X 2" baking dish for 45 minutes in a moderate oven, 350° F.
5. Serve hot. Cut into squares, top with butter and wild honey or maple syrup.

(From the Planter Indians of the South)

The following are recipes from *Discovering Mexican Cooking*, by Alice Erie Young and Patricia Peters Stephenson, The Naylor Company, San Antonio, Texas, 1968.

Quesadillas
(makes 1 serving)

- 1 uncooked corn tortilla
- 1 slice cheese

Place cheese on tortilla, fold over, and press edge. It looks like a turnover. Cook lightly on a hot, ungreased skillet griddle, or in deep fat, until golden brown and the cheese melts.

For variety, put a tablespoon of filling such as refried beans, chile con carne, or chicken. Add cheese, fold over, press edge, and cook as above.

Tortillas are available almost everywhere and are inexpensive, but the children might enjoy making their own:

Corn Tortillas

2 cups Masa Harina
1 1/2 teaspoon salt
1 tablespoon shortening
2 1/2 cups boiling water

Mix dry ingredients in bowl. Melt shortening in the boiling water and add to the ingredients. Stir to make a stiff dough, using a spoon or a mixer.

Put ball of dough, about 1 inch in size, between damp muslin. Press with a flat surface as a plate....DO NOT ADD FLOUR. The tricky part is to get the tortilla off the muslin. Peel back the top of the muslin from the tortilla, and get it in your hand.

To cook, have slightly greased griddle very hot. Half-cook one side of tortilla (less than a minute), turn it over and cook until it is nicely brown in several spots and turn again. When it puffs up, press it down with a pancake turner.

Fun to make are Tacos:

Children can be grouped to –

Cut lettuce	Fry the meat filling
Chop onions	Chop tomatoes
Shread cheese	

For taco shell: –

Fry tortilla crisp in deep fat, keeping it folded with kitchen tongs

Fill the shell with meat filling, cheese, lettuce, and onions or tomatoes. Hot sauce may be used on top.

Another favorite that is easy to make is enchiladas:

Rolled Enchiladas
(six servings)

12 corn tortillas
1 can red chile sauce (enchilada sauce)
12 1/2 " cubes of cheese or 1 cup of cooked meat
Chopped onions and grated cheese to garnish

Fry tortillas lightly so they stay soft. Dip quickly into hot chile sauce. Fill with cheese or meat filling and roll. Place rolled enchiladas close together on baking dish. Pour some Red Chile Sauce over each roll and top with chopped onion and grated cheese. Place in hot oven, 400° F. Cook until cheese melts.

PRE- AND POST-TESTS

UNDERLINE ONE ANSWER

1. Which of these is probably the most important American crop?
a. oats b. corn c. wheat d. soybeans
2. The part of the corn that is very useful is the:
a. stalk b. tassel c. leaf d. seed e. cob
3. Corn is pollinated by this means:
a. birds b. people c. wind d. water
4. We would probably find this type of corn most often in the store's vegetable section:
a. popcorn b. sweet corn c. flour corn d. waxy corn
5. Who eats most of the corn?
a. cattle b. pigs c. people d. elephants
6. In which one of these products would corn be used?
a. kool-aid b. alcohol c. coca-cola d. alka-seltzer
7. Underline another name for Indian corn:
a. wheat b. cane c. sorghum d. maize
8. Farmers in the Midwest grind up the complete corn plant and store it in this building:
a. barn b. garage c. silo d. shed

UNDERLINE ONE OR MORE WORDS

9. Which of these items may be made partly from corn?
a. cloth b. sugar c. plastics d. medicine e. starch
f. glass g. fertilizer
10. Which of these products made from corn would be manufactured rather than processed?
a. paint b. polish c. starch d. explosives e. corn flakes
f. plastics
11. There is probably no use for the corn's:
a. silk b. cob c. smell d. stalk e. roots
f. tassel g. kernel

METRICS – A “LITER” BIT EASIER

Bea Bempke, Tolleson School District
Dennis Bloomquist, Casa Grande School District
Sylvia Crook, Peoria School District
Adrienne Holtz, Pendergast School District
Mary McCoy, Pendergast School District
Verdun Trich, Somerton School District

Unit Grade Level
Second – Fourth Grades

Seventh Annual Migrant Institute 1976

METRICS – A “LITER” BIT EASIER

(Suggested Grades 2–4)

I. GOALS

- A. To help children to understand the measuring concept
- B. To expose children to the metric system
- C. To show the difference between metrics and other measuring systems
- D. To assist children in applying the metric system to their everyday lives

II. OBJECTIVES

- A. The student will identify the following 7 metric terms:
 - 1. Centimeter
 - 2. Meter
 - 3. Kilogram
 - 4. Liter
 - 5. Celsius
 - 6. Milliliter
 - 7. Millimeter
- B. The student will match the 7 abbreviations to the 7 metric terms.
 - 1. cm = Centimeter
 - 2. m = Meter
 - 3. kg = Kilogram
 - 4. l = Liter
 - 5. C = Celsius
 - 6. ml = Milliliter
 - 7. mm = Millimeter
- C. The student will take some linear and mass measurements in metric terms and compare them to other measuring systems.
- D. The student will record the temperature using the Celsius thermometer.

III. MOTIVATION

- A. There will be a bulletin board containing metric terms applied to objects or pictures.
- B. An introductory film or filmstrip will be shown (if available).
- C. Primary metric coloring and activity books will be on display.
- D. A metric mascot (a puppet, or a character selected and drawn by the teacher) will be on display to introduce the terms.

IV. SUGGESTED GROUPS

- A. Four major areas of development:
 - 1. linear
 - 2. mass (weight)
 - 3. capacity
 - 4. temperature

V. ACTIVITIES IN SMALL GROUPS

- A. Linear
 - 1. length and width of the room
 - 2. body measurements
 - a. Draw yourself on paper and measure yourself
 - 3. draw a map of your school.
- B. Mass (weight)
 - 1. fruit and vegetable day (weigh and eat)
 - 2. consumer finds cans, etc. marked metric
 - 3. weigh yourself on a metric scale
- C. Capacity
 - 1. consumer finds label and bottles (example: Coke and /UP)
 - 2. follow a recipe using metric terms
 - 3. measure the water in the classroom aquarium
- D. Temperature
 - 1. keep a monthly chart using a Celsius thermometer
 - 2. chilling and heating water
 - 3. bake cookies and compare oven temperatures

VI. CHECK-UP PROCEDURES

- A. Have children form their own process-type questions using metric terms.
- B. A summary question sheet entitled "Certificate of Metric Skill Ability" could be used as a culminating unit activity.
 - 1. using body measurements as reference points
- C. Give the class a recipe written only in metric measurement and sample the results

VII. SUGGESTED FIELD TRIPS

- A. Local hospital or clinic
 - 1. Maryvale Samaritan Hospital
5102 West Campbell
Phoenix, Arizona
846-2211
 - 2. Homako Hospital
Casa Grande, Arizona
- B. Mines
 - 1. ASRCO — Casa Grande
 - 2. Hecla — Casa Grande
- C. Local Grocery Store
 - 1. Fry's Food Store
4216 West Bethany Home Road
Phoenix, Arizona
934-0000
 - 2. Food Valley Market
9102 West Washington
Tolleson, Arizona
936-3234
- D. Foreign Car Repair Shop
 - 1. Three Stars Auto Service
7440 West Thomas Road
Phoenix, Arizona
849-4379
 - 2. Westside Toyota
3909 West Indian School Road
Phoenix, Arizona
272-9451

FOURTH MIGRANT INSTITUTE — 1973

PRE AND POST TEST

HOW MUCH DO YOU KNOW ABOUT AFRICA?

1. Africa has three main climate areas. Cross out the one that does not belong:
(a) Grasslands (b) Cold, frozen tundra (c) Hot, tropical rain forests (d) Deserts
2. Africa has three major racial groups. Cross out the one that does not belong:
(a) Negroes (b) Arabs (c) White (d) Oriental
3. Circle the African country in which is found evidence of one of the earliest civilizations:
(a) Rhodesia (b) Union of South Africa (c) Egypt (d) Tanzania
4. The longest river in the world is found in Africa. Circle its name:
(a) Nile (b) Congo (c) Mississippi (d) Amazon.
5. The Union of South Africa is famous for its mining of two minerals. Circle them:
(a) Lead and zinc (b) copper and silver (c) Tin and manganese (d) Gold and diamonds
6. The largest desert in the world is found in Africa. Circle it:
(a) The Sahara Desert (b) The Gobi Desert (c) The Mohave Desert (d) The Great Sandy Desert
7. Three major religions predominate in Africa. Cross out the one that does not belong:
(a) Buddhism (b) Christian (c) Moslem (d) Tribal religion
8. A large oil strike was recently made in Africa. Circle the name of the country in which this oil was discovered:
(a) Chad (b) Kenya (c) Libya (d) Union of South Africa
9. Most of Africa is now independent, but one country still has large colonies there. Circle the name of this country:
(a) Russia (b) Portugal (c) England (d) United States
10. Circle the name of an organized hunting party going after big animals:
(a) Watusi (b) Zulu (c) Safari (d) Ticki-Ticki.

AFRICA, LAND OF CONTRASTS

(Grades six, seven and eight)

I. GOAL

- A. To make the students aware of the tremendous contrasts in:
1. Culture: Arab, Negro and White peoples in Africa.
 2. Climate: Desert, Grassland and Tropical rain forest areas.
 3. Animal life: Herbivorous and Carnivorous types.
- B. Motivation:
1. Display study prints from the Society of Visual Education, *Children of Africa*. (\$8.00), and ask the students, "Which of these pictures are about Africa?"
 2. Administer the pre-test to let the students know how much or how little they already know about Africa. (After the unit work is completed, this same test can be used for a post-test for evaluation purposes.)
 3. Discuss with the students and list things that they would like to know about Africa.
- C. Committee Work Possibilities:
1. Map Work
 - a. Map the three main climatic regions of Africa and illustrate the map with pictures depicting life in these regions.
 - b. Map locations and illustrate the major natural resources: rivers, minerals, lumber, etc.
 - c. Map habitats and illustrate types of wild animals.
 - d. Make comparison maps of Africa during colonial times and in the present.
 2. Committee Activities
 - a. Study one of the three main racial groups of Africa: Arab, Negro or White; make stand-up dolls showing type of dress, followed with oral or written reports.
 - b. Study the wildlife found in one of the three major climatic areas: Desert, Grassland or Rainforest; illustrate through pictures, collages or murals.

- c. Find out about minerals and mining in Africa: Gold, Diamonds, Copper, Oil and Bauxite; where are these found? Students may compare an African copper mine with an Arizona mine. Diagrams of a mine shaft may be made. Exportation of these minerals may be studied in relation to industry in Africa.
- d. The history of Egypt may be studied: a Time Line may be made, or scale models of pyramids, etc.
- e. Life along one of the four major rivers may be studied: Choose the Nile, Congo, Niger or Zambesi River and follow its course; the people, climates, etc., can be included in this study and presented by use of a salt-flour relief map, or by giving a scenic tour of the river.
- f. One of the three major religions may be studied: Choose either Moslem, Christian or tribal religions and relate the religion to the race of peoples it applies to; students may write a skit about a major religious character, or make up a filmstrip type of presentation.
- g. An individual tribe may be studied: The Zulu, Watusi, Bantu or Pigmy people are only a few to be suggested; a diorama, sculptures or customs and types of food and dress may be presented.
- h. An individual country may be studied: The history of the country, or letters from pen-pals, or charts and graphs showing industry or types of people, etc. may be given.
- i. The slave traffic may be studied: travel routes could be mapped, or the African history of slave trade noted.

D. Additional Activities

- 1. African masks made from paper mache.
- 2. Weapons and tools modeled from clay or cardboard.
- 3. Dioramas of dwellings and life styles, animal habitats, etc.
- 4. Bulletin board displays of maps and illustrations.
- 5. Wire sculpture depicting African or primitive art.
- 6. Current events scrapbooks or newspapers about Africa.
- 7. Construction of a general scrapbook about Africa.

(Any of the activities suggested in sections C or D may be interchanged or substituted according to group interest.)

E. Evaluation:

1. Observe participation in group work or individual students.
2. Evaluate product of individual committees.
3. Ask each committee to submit three questions about the most important aspects of their topic. Questions may be used in a group contest.
4. Administer the post-test.

F. Culminating Activities:

1. Prepare a program for presentation over television of reports and demonstrations from various committees.
2. Present a program or open house for interested classes.
3. Display unit products and reports in the school library or other appropriate places.
