This guide, developed by the State Project to Implement Career Education (SPICE) in New York, is intended to serve as a model to assist teachers, guidance counselors, administrators, and project staff in using business and community resources in career education programs. The first section of the guide contains information on ways of updating and gathering new resources. This is followed by suggested guidelines for the use of career education speakers and field trips. The third section presents examples of career choices arranged by cluster. The last five sections present resources which are currently available as either speakers or sites for field trips. These sections are health, communications, construction, public service, and miscellaneous. (TA)

July 1973
The material contained in this, the first edition of the Community Resource Guide, is presented to you by the State Project to Implement Career Education. This information is intended to assist teachers, guidance counselors, administrators and project staff in using business and community resources in career education programs. This edition of the Guide is planned as a first attempt at bringing together information about the use of community-based human resources. In order to continue modifying, updating and improving this material, your help is necessary. We would appreciate hearing from you with comments and reactions.

The first section below contains information on ways of updating and gathering new resources. This is followed by suggested guidelines for the use of career education speakers and field trips. The third section presents some examples of career choices arranged by cluster. The last five sections present resources which are currently available as either speakers or sites for field trips.

We hope you find this Guide of value, and once again we hope to hear from you.
This guide is intended to serve as a model and, as such, will grow with time. There are eight sections to this first edition of the guide:

1. Updating Information
   Ways to gather new resources from parents, community residents, and fellow teachers.

2. Speakers/Trips
   Guides for the effective use of community resources, as speakers and for field trips.

3. Clusters
   Career Education Clusters and sample occupations by cluster.

4. Health
   Sample Health job descriptions and available community resources.

5. Communications
   Sample Communication job descriptions and available community resources.

6. Construction
   Sample Construction job descriptions and available community resources.

7. Public Service
   Sample Public Service job descriptions and available community resources.

8. Miscellaneous
   Additional community resources.
UPDATING

The most effective means of gathering information about possible career education resources is having the time to personally contact various business and community organizations. One-to-one contact is always the best. Since this may be impossible, an alternative method would involve a mailing to all possible resources. A sample letter is attached. For best results, a follow-up telephone call is advisable.

Another valuable pool of possible career speakers is the staff of your school. Most teachers, administrators and support service personnel have held other employment either prior to becoming teachers or during the summer. This important resource file of school staff could be kept in the central office. A sample letter to staff is attached.

The parents of your students are another valuable source of career information. A sample letter to parents is attached. Parents could be contacted either by individual teachers, the principal or through the Parents' Association. Involving the PA or PTA would not only increase the 'range' of your search, but would also involve parents in career education.

The information you will need to know about a possible resource includes the type or organization, the name of the contact person within the organization, and restrictions (if any) on trips. A sample resource file information form is attached. This sample, in a slightly modified, more personal form, would be included with the letters to possible resources.
SAMPLE LETTER FOR PROSPECTIVE RESOURCES

Dear Mr. or Ms. __________________:

Public School 1 is currently engaged in a Career Education program. The program is designed to provide students, from earliest childhood on, with an awareness and understanding of the career choices available in the community. The basic approach being used involves the active participation of community residents like yourself. Your assistance is vitally needed to help make this program a success.

As currently operating, this Career Education program includes the use of community business as career information centers. We would appreciate it if you would let us know, by completing the attached form, if:

- you would come to Public School 1 and talk with a class of students about your job and about career possibilities in your field; and if
- a supervised group of students could visit your place of business.

We feel that maximizing student understanding of the world of work will better enable students to make important decisions about their own lives. We are sincerely looking forward to your participation in this program. Please return the completed form to me at the above address, and if you have any questions or comments about our Career Education program please feel free to call me.

Sincerely,

Principal
Public School 1
Dear Colleague:

We need your help! As you know, our school is developing a Career Education program. Part of the implementation plan for this project involves the use of guest speakers who represent various careers. Most of us have held other positions, either in summer jobs, or prior to becoming a teacher.

A teacher resource file is being developed for the school. This file will include the names of teachers who have worked in other fields. If your class is studying one career cluster and you need a resource, you may check the file and find an appropriate resource within the school. Similar files are being developed of parents, community based business and city-wide organizations.

Won't you please take a few minutes and complete the form below and return it to me. Thank you for your help.

Sincerely yours,

1) Name

2) Positions Held:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

3) Relevant avocational skills (carpentry, art, etc.):

________________________________________________________________________

SAMPLE LETTER TO PARENTS

Dear Mr. and Mrs. _____________:

Public School 1 in its efforts to offer the best education possible to all students is engaged in many new and exciting projects. Career Education is one such program. It is designed to introduce students to career opportunities in the community and to involve students in the planning of their own education.

Parent and community participation is vital in the success of the Career Education Program. We would appreciate it if you would let us know, by completing the attached form if:

- you would come to P.S. 1 and talk with students about your job and about careers in your field, and;

- a supervised group of students could visit your place of business.

We are looking forward to your participation in this program. Please return the completed form to me and if you have any questions or comments about Career Education, please feel free to call me. Once again our thanks.

Sincerely,

Principal or Teacher
Public School 1

Mornings ________
Afternoons ________
Men and women representing different occupations are valuable resources for children to learn about career opportunities. Bringing community residents into the classroom provides students with up-to-date information on careers, insights into the reality of the world of work, and provides possible additional adult models in career choice. The use of community-based resources within the school also fosters greater interaction between schools and the communities they serve.

In order to maximize the effectiveness of career education speakers the teacher or guidance counselor must:

- know precisely what she or he wants from the speaker
- prepare the speaker
- prepare the class

* Determine specific goals

The first question you must ask when thinking about using a community resource is: Why?

- to talk about his specific job
- to talk about a cluster of careers
- to talk about different careers in one company or organization
- to talk about requirements needed to get jobs
- to talk about various skills necessary in different jobs
- to talk about different working environments
- to demonstrate what he does
- to stimulate discussion

You, the inviter, must decide what your main reason is for bringing a speaker to class. Once you have decided you must then locate the appropriate person.

* Prepare the speaker

The more information the speaker has concerning his audience and his expected role the greater the probability of success. You should inform the speaker of:
- the size of the class
- age of students
- if the class is co-ed or not
- your main objectives
- something about the interests of the children,

and of course:

- location of the school
- room where meeting will be held
- date, and time
- telephone number where you can be reached

In addition, you should ask the speaker if he could send you, beforehand, some information about his career such as a job description. This information can help you prepare the class (possible questions, new vocabulary, etc.) and you may wish to distribute it before she or he arrives.

* Prepare the class

The presentation made by a guest speaker should flow naturally from the work being done in the classroom. In addition to this curriculum interface the class should be prepared specifically for this particular speaker:

- explain why the speaker is coming
- show where this occupation fits into the regular course work, career education, career clusters and academic clusters
- distribute sample job descriptions or other available information
- ask students to prepare a list of questions (see example questions attached)

** After the speaker has left

For the students:

- discuss the presentation
- ask them what they learned that is important for their schoolwork
- how was English, math, social studies, sciences used in this job?
- ask them to complete an evaluation form (see example attached)

For the teacher:
- Send the speaker a thank-you note
- ask the speaker to complete an evaluation form (see example attached)
- inform the speaker of the positive results of the students' evaluation

Do

Determine a definite list of alternative times and dates before you contact a resource.

Confirm the agreed upon date, in writing, 4-5 days before.

Make sure the resource knows exactly what he or she is to speak about.

Have someone waiting to meet the speaker when he arrives in the building.

Don't

Ask a speaker to come to a class when students have no interest in that particular career or cluster.
QUESTIONS GENERALLY OF INTEREST TO STUDENTS

1) Name of job.
2) What does worker do?
3) What are the working conditions?
   Do you work alone?
   Do other people help you?
   Do you work in an office, your home, or a factory?
4) What skills do you need for your job?
5) How much education is required?
6) What is the pay?
   How much can be made when you first start?
   How much can you expect to make someday?
7) Is the work interesting?
8) What requirements are necessary to get your job?
9) What opportunities are there for advancement?
10) What do you wear on your job?
11) What don't you like about the job?
12) What is your typical day like?
13) Does the job affect your family life?
14) How did you get this job?
15) How would I go about getting this job?
16) Do you work with the public?
17) If I wanted a job like yours, what should I do about school and training?

SAMPLE EVALUATION FORM FOR GUEST SPEAKERS

Dear Mr. or Ms. __________________:

My class and I sincerely appreciate your having taken the time to talk with us about your occupation. We are most interested in learning some of your impressions of this experience to help us further refine and redevelop our Career Education Program. Would you please answer the following questions and return them to me at your earliest convenience.

1) Did you find this experience to be valuable to you? And why?

________________________________________________________________________

________________________________________________________________________

2) Do you think that the students found the experience to be valuable? And why?

________________________________________________________________________

________________________________________________________________________

3) Was there any information you could have had beforehand that would have made your presentation better?

________________________________________________________________________

________________________________________________________________________

4) Any suggestions for improvement?

________________________________________________________________________

________________________________________________________________________

5) Would you be willing to speak again?

________________________________________________________________________
6) Would it be possible for students to visit your place of business?

7) Any additional comments.

8) Name:
   Telephone Number:
   Address:

   Once again our thanks for your participation.

   Yours truly,

   Teacher
   Public School
As a teacher or guidance counselor you realize that there is a limit to what can be done within the school building. Students can become effectively stimulated if given an opportunity to see a real work situation. The field trip should complement the learning activities of the classroom by enabling students to see the interdependency between the worlds of school and work. In addition, field trips help in integrating the functions of the school with the life of the community.

Before planning a field trip you must first decide if the energy of the students and the staff are a worthwhile expenditure of time, expense and effort. You should determine before making any commitments if this trip will provide the kind of learning experience desired, will help to clarify concepts currently being presented in the classroom, and if a field trip is the best way of accomplishing your goals. After you have decided upon a field trip you must make the necessary arrangements:

1. Select appropriate resource.
2. Gain administrative approval.
3. Gain resource approval.
4. Estimate the length of time involved for traveling and tour.
5. Make transportation arrangements.
6. Get parental approval, if necessary.
7. Get paraprofessional or parental chaperones, if necessary.

You then must prepare the students for the trip:

1. Develop a background for the students by giving them reference materials, films, etc.
2. Cooperatively decide on the value of the trip.
3. Work out with students specific points to observe.

Points of interest in a career education resource field trip:
A. variety of entry level job opportunities.
B. training required for various jobs.
C. employee attitudes.
D. materials or tools used on the job.
E. What do the various people actually do?
F. Working conditions.
G. Relations between different employees.
H. Which employees work alone, and which work in teams.
I. Hazards, safety.
J. How did different workers get interested in their work?
K. What did different workers like to do as children?
L. Salaries.
M. Promotion possibilities.
N. Benefits (union, medical, holidays, sick leave, etc.).
P. Effects of job on personal life.
Q. Cultural and social value of job: aesthetic, economic, or social benefit to the community, community involvement.

4. Develop a questionnaire for students to use in interviewing employees.
5. Discuss possibility of taking pictures (obtain permission).

After the Trip
1. Send a thank-you letter to host.
2. Have a followup lesson: discuss characteristics of different jobs, tools used, environment, educational training needs.
3. Invite host or someone in a similar field to class to answer questions.

Trips for Young Students

Some elementary school classes may be too young to participate in factory or office field trips. Walking tours of the community can be valuable experiences for them to begin to learn about the economic and social life of the neighborhood. Walking tours cost nothing and can be accomplished quickly. A host of tangible and intangible things can be observed on a short walk through the community, such as:
Check list for field trip

- know why you are going
- locate appropriate resource
- confirm arrangements
- get administrative approval
- get parental approval
- prepare students
- obtain necessary additional supervision
- make transportation arrangements
- followup
### CAREERS BY CLUSTER

#### AGRICULTURE AND NATURAL RESOURCES

SAMPLE HEALTH CAREER DESCRIPTIONS

MEDICAL TECHNOLOGISTS
Performs chemical, microscopic, bacteriologic and other laboratory tests which aid physicians in detecting, diagnosing and treating diseases. A bachelor's degree in medical technology from an accredited school, including a year of clinical practice, is required. While New York State does not require a license for this occupation, registration can be obtained by passing an examination given by the Registry of Medical Technologists of the American Society of Clinical Pathologists.

MEDICAL LABORATORY TECHNICIAN
Works with the physician specialist-the pathologist-and performs many of the diagnostic tests in hospitals, research centers, public health agencies and commercial laboratories. This is the middle rung between the laboratory assistant and the registered medical technologist. A two-year degree plus on-job experience are needed for certification.

LABORATORY ASSISTANT
The laboratory assistant performs basic laboratory tasks in such places as hospitals, blood banks, commercial laboratories, public health facilities, research institutions and in industry. A high school diploma or its equivalent is required for admission to an approved course for certification. Some laboratories offer training programs which fulfill requirements of the Board of Certified Laboratory Assistants.

DIETETIC TECHNICIAN
Community college courses and work under the dietitian in a hospital setting are requirements for this career. In some community health agencies the technician works with public health nutritionists and provides nutritional guidance to families.

LICENSED PRACTICAL NURSE
Be sure to pick a state-approved nursing program to be eligible for license after graduation. Practical nurse programs can be entered in high school (part time in 11th and 12th year), or can consist of one year full time. Hospitals and city and state institutions also have programs. Practical nurses function as an integral part of the health team, giving patient care under supervision of physician and registered nurses. Careers can be in public health agencies, nursing homes, physicians' offices, industry, clinics, private homes, and, of course, hospitals.

PROSTHETIST AND ORTHOTIST
The prosthetist makes and fits artificial limbs, and the orthotist makes and fits orthopedic braces to support weakened body parts or to correct physical defects. Both are part of the physical rehabilitation team, and both careers call for an interest in mechanics and the physical sciences. One can train on-job for both careers, and there are formal programs in two-year and four-year colleges.
Downstate Medical Center
450 Clarkson Avenue
Brooklyn, N.Y.

NEWSPAPER REPORTERS

Newspaper reporters gather information on current events and use it to write stories for publication in daily or weekly newspapers. In covering events, they may interview people, review public records, attend news happenings, and do research. As a rule, reporters take notes or use electronic recording devices while collecting the facts, and write their stories upon return to the office. Sometimes, to meet deadlines, they telephone their stories to other staff members known as "rewrite men," who write the stories for them.

Large dailies frequently assign some reporters to "beats," such as police stations or the courts, to cover news originating in these places. Other local news, such as a story about a lost child or an obituary of a community leader, is handled by general assignment reporters. Specialized reporters, who are well-versed in a subject-matter field as well as in writing, increasingly are interpreting and analyzing the news in fields such as medicine, politics, science, education, business, labor, and religion. Reporters on small newspapers get broad experience; they not only cover all aspects of local news, but also may take photographs, write headlines, lay out inside pages, and even write editorials. On the smallest weeklies, they also may solicit advertisements, sell subscriptions, and perform general office work.

LITHOGRAPHIC OCCUPATIONS

The cameraman starts the process of making a lithographic plate by photographing the copy. He generally is classified as a line cameraman (black and white), halftone cameraman (black and white), or color separation photographer. After the negatives have been made, they frequently need retouching to lighten or darken certain parts. Thus, it is often necessary for a lithographic artist to make corrections by sharpening or reshaping images on the negatives. Highly skilled workers perform this work by hand, using chemicals, dyes, and special tools.

A 4- or 5-year apprenticeship covering the basic lithographic process usually is required to become a well-rounded lithographic craftsmen.

RADIO AND TELEVISION ANNOUNCERS

Radio and television staff announcers present news and live commercial messages, introduce programs, describe sporting events, act as masters of ceremonies, conduct interviews, and identify stations. In small stations, they may perform additional duties such as operating the control board, selling time, and writing commercial and news copy. In large stations, their duties are confined to the programming department. Many announcers act as disc jockeys, introducing selections of recorded music and commenting on the music and other matters of interest to the audience.

To succeed as an announcer, one must have a pleasant and well-controlled voice, a good sense of timing, and excellent pronunciation. In addition, a thorough knowledge of correct English usage and a knowledge of dramatics, sports, music, and current events improve chances for success.
The Daily Challenge
1390 Fulton Street
Brooklyn, N.Y. 11216

Tommie Watkins, Jr.

ROOFERS
Roofers apply composition roofing and other materials, such as tile and slate, to the roofs of buildings. They also waterproof and damp-proof walls and other building surfaces.

Most training authorities, including the National Joint Apprenticeship and Training Committee for the Roofing Industry, recommend completion of a 3-year apprenticeship program, covering all types of roofing work, as the best way to learn this trade. A substantial proportion of workers, however, have acquired roofing skills informally, by working as helpers or handymen, observing or being taught by experienced roofers.

CARPENTERS
Carpenters, the largest group of building trades workers, are employed in almost every type of construction activity. They erect the wood framework in buildings, including subflooring, sheathing, partitions, floor joists, studding, and rafters. When the building is ready for trimming, they install molding, wood paneling, cabinets, window sash, doorframes, doors, and hardware. They also build stairs and lay floors. Carpenters, when doing finish work, must concern themselves with the appearance, as well as the structural accuracy, of the work.

Most training authorities, including the National Joint (labor-management) Carpentry Apprenticeship and Training Committee recommend the completion of a 4-year apprenticeship program as the best way to learn carpentry.

DRAFTSMEN
In making a space capsule or an electric iron, a nuclear submarine or a television set, a bridge or a typewriter, detailed drawings are needed that give the exact physical dimensions and specifications of the entire object and each of its parts. The workers who draw these plans are draftsmen.

Draftsmen translate the ideas, rough sketches, specifications, and calculations of engineers, architects, and designers into working plans which are used in making a product. Draftsmen may calculate the strength, reliability, and cost of materials. In their drawings and specifications, they describe exactly what materials and workers are to use on a particular job.

Young persons interested in becoming draftsmen can acquire the necessary training from a number of sources, including technical institutes, junior and community colleges, extension divisions of universities, vocational and technical high schools, and correspondence schools. Others may qualify for draftsmen jobs through on-the-job training programs combined with part-time schooling or through 3- or 4-year apprenticeship programs.

CIVIL ENGINEER
Civil engineers design and supervise the construction of roads, harbors, airfields, tunnels, bridges, water supply and sewage systems, and buildings. Major specialties within civil engineering are structural, hydraulic, sanitary, and transportation.

A bachelor's degree in engineering is the generally accepted educational requirement for entrance into engineering positions.

JHS only - speakers and tours.
SAMPLE PUBLIC SERVICE OCCUPATIONS

BANK CLERK
Bank clerks handle much of the paperwork associated with checking and savings accounts, loans to individuals and business firms, and other bank business. Because of the nature of banking, some of their work differs from the work done by clerks in other kinds of businesses.

The specific duties that must be performed in a particular bank depend on the size of the bank and the nature and scope of the services offered. In a small bank, for example, one clerk may perform a variety of tasks such as sorting checks, totaling debit and credit slips, and preparing monthly statements for mailing to depositors. However, in a large bank, each clerk usually is assigned one kind of work and frequently has a special job title.

High school graduation is adequate preparation for most beginning clerical jobs in banks. For the majority of jobs, courses in bookkeeping, typing, business arithmetic, and office machine operation are desirable.

POLICE OFFICER
Police officers—whether directing traffic at busy intersections or arresting dangerous criminals—are helping to preserve law and order. As local government employees, their job is to prevent criminal activities, to investigate crimes, and to apprehend and assist in the prosecution of offenders. Whether on or off duty, they are expected to exercise their authority whenever necessary.

Local civil service regulations govern the appointment of police officers in practically all large cities and in many small ones. Candidates must be U.S. citizens, usually at least 21 years of age, and be able to meet certain height and weight standards. Eligibility for appointment also is determined by performance on competitive examinations, physical and personal qualifications, and education and experience. The physical examinations often include tests of strength and agility. Because personal characteristics such as honesty, good judgment, and a sense of responsibility are especially important in police work, candidates usually are interviewed by a senior officer at police headquarters, and their character traits and background may be investigated.

SOCIAL SERVICE AIDE
Social service or social welfare aides, by freeing the professional social worker for more creative and supervisory responsibilities, enable the social welfare agency to provide more and better service to its clients. Most work under the close guidance and supervision of a social worker or a counselor.

Aides often greet new applicants, help to fill out eligibility forms, and explain the reason information is needed and the way it will be used. Aides also supply applicants with general information about the agency's services, facilities, and procedures. In some welfare agencies, aides gather data necessary to determine an individual's or family's eligibility for public assistance. This work can involve making home visits, interviewing friends and relatives of the applicant, or obtaining necessary documents such as marriage licenses or birth certificates.
Graduation from high school is not generally a requirement for social service aides. Aides usually are trained on the job from one to several months; in addition, nongraduates often have classroom instruction to help them pass a high school equivalency examination. Employers of social service aides do not always look for the most highly skilled applicants. A person's need for work, as well as his potential for upgrading his skills and making a useful contribution to the agency, is weighed in evaluating prospective applicants.

FBI SPECIAL AGENT
Federal Bureau of Investigation (FBI) Special Agents investigate many types of violations of Federal laws, such as bank robberies, kidnappings, frauds against the Government, thefts of Government property, espionage, and sabotage. The FBI, which is part of the U.S. Department of Justice, has jurisdiction over more than 185 Federal investigative matters. Special Agents may be assigned to any type of case, but those having specialized training in accounting are likely to be assigned chiefly to cases involving complex financial records; for example, frauds involving Federal Reserve Bank records. The FBI is a fact-gathering and fact-reporting agency, and its Special Agents function strictly as investigators.

To be eligible for appointment as an FBI Special Agent, an applicant must have graduated from a State-accredited resident law school or a 4-year resident college with a major in accounting. The law school training must have been preceded by at least 2 years of resident undergraduate college work. Accounting graduates also must have had at least 3 years of experience in accounting or auditing or a combination of both.
U.S. General Post Office
Washington Street
Brooklyn, N.Y.

Mrs. Fischetti or Mrs. Donnery
624-1000 X263

4th Grade and over, 25 students can visit Post Office. Representative can come to school for presentation. Films, slides, zip program (25 to 300) youngsters. Notify at least 2 weeks in advance.
