ABSTRACT

The three manuals included in this document are the results of a project which revised the student teaching course offered by the Vocational-Technical Education Department at the State University College at Utica/Rome (New York). (Project procedures involved the following: (1) Materials and ideas available in the department regarding student teaching were identified, (2) a search on student teaching materials was conducted, and (3) persons responsible for student teaching in vocational education were identified.) Each of the manuals includes sample assignment sheets covering various aspects of teaching, and teacher-related activities (i.e., relationship to school staff, student activities, preparing quizzes). The manuals are designed for three student types. "VTE 492 Supervised Student Teaching Directions and Assignments" is designed for full-time preservice vocational-technical students in a six-semester hour student teaching course. "VTE 468 Modularized Preservice Student Teaching Directions and Assignments" is designed for part-time preservice vocational-tecnical students in a semester hour student teaching course. "VTE 467 Modularized Student Teaching Directions and Assignments" is designed for part-time inservice vocational-technical teachers who are trying to obtain State certification. (LAS)
SUPERVISED STUDENT TEACHING

BY

EUGENIO A. BASUALDO, D.Ed.
ASSISTANT PROFESSOR
DEPARTMENT OF VOCATIONAL-TECHNICAL EDUCATION

STATE UNIVERSITY COLLEGE AT UTICA/ROME
811 COURT STREET
UTICA, NEW YORK 13502
INTRODUCTION

This writer was assigned with the task of revising the Student Teaching courses offered by the Vocational-Technical Education Department at the State University College at Utica/Rome. In carrying out this assignment, the following strategy was pursued:

1. Materials and ideas available in the department regarding student teaching were identified.

2. Materials available through ERIC regarding student teaching were identified.

3. Letters were sent to 82 persons responsible for student teaching in Vocational Education or Industrial Arts programs as identified in the 1975-76 Industrial Teacher Education Directory (14th edition). These educators were asked to assist by sending materials that they were using in their student teaching endeavors.

4. Letters were sent to 45 vocational education directors of the Boards of Cooperative Education in New York State. These educators were asked to send the materials or ideas that they may have regarding student teaching.

The materials obtained through these means were studied and the three student teaching manuals were developed for the three distinct groups of students that the Vocational-Technical Education Department at the State University College at Utica/Rome serves.

The first manual entitled, "VTE 492 Supervised Student Teaching Directions and Assignments," is designed to guide full-time preservice vocational-technical students through their six semester hour student teaching course. This course is required by the state of New York for those students seeking state certification to teach occupational (vocational or technical) education subjects in secondary schools and correctional programs. This student teaching course is designed to give the student an opportunity to practice and refine his/her teaching and other skills required for a successful teaching career. These skills should have been obtained from the previous series of Professional Education courses required by the Vocational-Technical Education program at the State University College at Utica/Rome. This experience is provided in a vocational or technical program under the guidance and supervision of a senior instructor from the cooperating institution and the faculty member designated by the college to supervise the student-teaching experience.

The second manual entitled, "VTE 468 Modularized Pre-Service Student Teaching Directions and Assignments," is designed to guide part-time preservice vocational-technical students through their two semester hour student teaching course. These students are craftsmen who, on a part-time basis are trying to obtain New York state certification. Since these
individuals' work schedules do not permit them to take the six semester hours of student teaching, the department has divided this experience into three distinct courses: 1) Observation Teaching, 2) Demonstration Teaching, and 3) Student Teaching. This two semester modularized pre-service student teaching course is designed to give the part-time student an opportunity to practice and refine his/her teaching and other skills required for a successful teaching career. These skills should have been obtained from the previous series of Professional Education courses required by the Vocational-Technical Education program at Utica/Rome. This experience is provided in a vocational or technical program under the guidance and supervision of the master teacher from the cooperating institution and the faculty member designated by the college to supervise the student teaching experience.

The third manual entitled, "VTE 467 Modularized In-Service Student Teaching Directions and Assignments," is designed to guide part-time in-service vocational-technical students through their two semester hour student teaching course. These students are vocational-technical teachers who, on a part-time basis, are trying to obtain New York state certification. Since these individuals' work schedules do not permit them to take the six semester hours of student teaching, the department has divided this experience into three distinct courses: 1) Observation Teaching, 2) Demonstration Teaching, and 3) Student Teaching. This two semester modularized in-service student teaching course is designed to give the part-time student an opportunity to refine his/her teaching and other skills required for a successful teaching career. These skills should have been obtained from the previous series of Professional Education courses required by the Vocational-Technical Education program at Utica/Rome. This experience will take place in the student vocational shop and classroom under the guidance and supervision of a representative of the Department of Vocational-Technical Education.
VTE-492
SUPERVISED STUDENT TEACHING

DIRECTIONS AND ASSIGNMENTS

DEPARTMENT OF VOCATIONAL-TECHNICAL EDUCATION
DIRECTIONS

You will be expected to demonstrate your instructional abilities as a vocational-technical instructor during this experience in student teaching. The activities that are a requirement of student teaching will take place in a vocational or technical program under the guidance and supervision of a master teacher from the cooperating institution and the faculty member designated by the college to supervise the student teaching experience. You will be expected to assume several specific assignments which you and the master teacher will plan in complete detail. These assignments are described on the sheets which follow.

You are to use the "Student Teaching Schedule" form found on the next two pages to provide an accurate record of your teaching assignments and experiences. This form can be used to assist you in scheduling your activities in advance with the cooperation of the master teacher and the consultation of your college supervisor if needed.

The number of vocational shop and classroom visitations made by the college supervisor will be at his/her discretion and may vary according to the needs and progress of the student teacher. All visitations will be arranged by the college supervisor in consultation with the master teacher and the student teacher.

The student teacher should be phased in gradually to the teaching responsibilities and should be totally responsible for his/her classes for at least one-third of the student teaching experience. The student teaching experience is not limited only to the assignments contained in this manual. Any other assignments that the master teacher deems necessary should be included in the student teaching experience.

At the end of your student teaching experience, you will be required to compile a final report consisting of all the assignment sheets and eight lesson plans together with their respective instructional sheets. Although you are required to prepare lesson plans for each lesson that you are assigned to present, you are only required to hand in four information and four skill lessons together with their respective instructional sheets and your final report.

Two samples of the lesson plan format appear in Appendix A. Choose one of these formats for your lesson plans. Samples of the instructional sheets are found in Appendix B and a sample of the instrument that will be used to evaluate your lesson presentation is found in Appendix C.

The final grade will be determined by the master teacher's evaluation of your student teaching and the completed final report.

Routine and Discipline

The following questions are to be answered after discussing them with the master teacher.

1. How do you verify that the school is closed because of some emergency (snow storm)?

____________________________________________________________________
____________________________________________________________________
____________________________________________________________________
____________________________________________________________________

2. How do you report an emergency that will keep you from attending school?

____________________________________________________________________
____________________________________________________________________
____________________________________________________________________
____________________________________________________________________

3. How many different classes does the vocational-technical teacher have? How many students are in each class?

____________________________________________________________________
____________________________________________________________________
____________________________________________________________________
____________________________________________________________________
____________________________________________________________________

4. How is attendance taken and what are the recording procedures? To whom are absenteeism and tardiness reported, and when?

____________________________________________________________________
____________________________________________________________________
____________________________________________________________________
____________________________________________________________________
____________________________________________________________________
Routine and Discipline (Cont'd)

5. What are the procedures to follow for completing a report card and what information is contained in it?

6. What deadlines and reports must be met by the vocational-technical teacher during the year?

7. With whom does the vocational-technical teacher associate directly with in order to carry out his duties?

8. How many job related meetings does the vocational-technical teacher have to attend per month and what are the natures of these meetings?

9. What type of public relations is expected from the vocational-technical teacher? What are the shop promotional activities?
Routine and Discipline (Cont'd)

10. With the help of the master teacher, draw an organizational chart.

11. What are some of the "don'ts" that you should be aware of?

12. What procedure is to be followed in case of discipline problems?

13. What are the master teacher's supervisory duties when his/her students are out of the shop but within the school?

14. Ask the master teacher for the faculty handbook. Examine it then describe the type of material that is contained in it.
Rules and Discipline (Cont'd)

15. What type of duplicating facilities are available to the vocational-technical teacher?
Equipment and Physical Conditions

The following questions are to be answered after discussing them with the master teacher.

1. What is the procedure for maintenance, repair and housekeeping of the equipment and machinery?

2. What are the regulatory rules for using the heavy equipment and machinery?

3. What is the procedure to report an adequacy of temperature, ventilation and/or lighting?
Care of Tools, Stock and Supplies

The following questions are to be answered after discussing them with the master teacher.

1. How are the tools, stock and supplies protected from damage, loss and abuse?

2. What precautions are used to avoid loss of tools and supplies and the waste of materials?

3. What method is used to maintain an inventory of tools, materials and supplies?

4. Who has access to the storage of tools, stock and supplies?
Budgeting and Purchasing Procedures

The following questions are to be answered after discussing them with the master teacher.

1. What is budgeting and how is it accomplished? What are some of the limitations when budgeting?

2. What are the procedures to purchase machinery, equipment, tools, materials and supplies?

3. How are machines, equipment, tools, materials and supplies selected?
Safety and Hygiene

The following questions are to be answered after discussing them with the master teacher.

1. What safety rules and regulations have been adopted?

2. How is it determined if a student is permitted to use a given piece of hazardous equipment?

3. What is the procedure employed in case a student is injured in the shop?

4. How many different types of alarm systems are in the shop? What is the significance of each alarm system?

5. In a schematic layout of the school, show the path(s) that your students must follow in case of a fire alarm. Mark with a red pencil the various electrical switches that discontinue the flow of current in your shop and with a green pencil mark where the fire extinguishers are located in your shop.
Shop Records and Reports

The following questions are to be answered after discussing them with the master teacher.

1. What type of records and reports are kept for each of the students?

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

2. What other types of records and reports are kept by the vocational-technical teacher?

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
STATE UNIVERSITY COLLEGE AT UTICA/ROME
DEPARTMENT OF VOCATIONAL-TECHNICAL EDUCATION
VTE 492 - SUPERVISED STUDENT TEACHING

The following questions are to be answered after discussing them with the master teacher.

1. How is the material to be taught selected by the master teacher?

2. What is the procedure that the master teacher used to incorporate or delete materials from his teaching?

3. What system does the master teacher use to select shop jobs or projects?
Meeting with the School Principal and/or the Vocational Director

The following questions are to be answered after discussing them with the master teacher.

1. What does the principal or vocational director expect of you during your student teaching experience?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

2. What does the principal or vocational director expect of his/her vocational technical teachers?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

3. What is the principal's or vocational director's stand on student discipline, drugs, family and financial problems?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

4. How does the principal or vocational director expect the vocational-technical teacher to establish priorities when working in the annual budget?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
Meeting with the School Principal and/or the Vocational Director (Cont'd)

5. What traits does the principal or vocational director look for when selecting a vocational-technical teacher?

6. What professional organizations does the principal or vocational director expect the vocational-technical teacher to belong to:

7. What are the principal's or vocational director's views on student placement?

8. What type of contractual agreement is extended to the teachers? How does the promotion system work?
Meeting with the Counselor

The following questions are to be answered after discussing them with the counselor.

1. What type of assistance can the counselor give to the vocational-technical teacher when dealing with the following student problems:

   a. Discipline:
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________

   b. Career and Education Information:
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________

   c. Drug Abuse:
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________

   d. Finances:
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________

   e. Personal, Family and Social:
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
      ________________________________________________________________
Meeting with the Counselor (Cont'd)

2. How can the counselor assist in redirecting students that have been ill placed in a vocational program?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

3. What community agencies does the counselor use in referring students with problems?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
Meeting Other School Staff.

The following questions are to be answered after discussing them with the other school staff.

1. How does this staff person assist the vocational-technical teacher in carrying out the duties?

_________________________________________________________________________

_________________________________________________________________________

_________________________________________________________________________

2. How do the vocational students in your class benefit from this staff member?

_________________________________________________________________________

_________________________________________________________________________

_________________________________________________________________________

3. Describe the job of this staff member in the school.

Early in your student teaching experience you should ask the master teacher for permission to maintain the bulletin board and shop posters. The master teacher should assist you in determining the themes to be presented and how often they should be rotated. After having been in charge of the bulletin boards and shop posters for three weeks, answer the following questions.

1. How many different central themes were presented in your bulletin board? What were these themes all about?

2. What themes were presented in the shop posters? How many times were these posters changed?

3. What techniques were used to verify that the students read the bulletin board and shop posters?

Training Aid #3 (selection of training aid)

1. Select an appropriate movie, film strip, or set of slides that you will use in presenting one of your lessons.

2. Get the approval of your master teacher and make any necessary instructional sheets. In the space provided, prepare a brief description of the film, the type of material you want to put across with it and the necessary instructional sheets.

3. Proposal:

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

Approved by:

________________________________________________________________________
________________________________________________________________________

Copy of the Training Aid requested: _____YES _____NO
1. Construct a fourth teaching aid (student choice) which you will use as a training aid during one of the assigned lessons which you will teach.

2. Before starting the construction of the training aid, secure the approval of your master teacher. In the space provided below, prepare a brief description of the proposed aid.

3. Proposal:

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

Quiz #1 - (10 matching items)

1. You are to prepare a ten item matching quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your master teacher should "look over" your quiz and initial it before you have it duplicated. Attach a copy of this quiz to this assignment sheet.

3. After doing an item analysis of this quiz answer the following about each item.
   a. What is the difficult factor for each item?
   b. What is the difficult factor for the total quiz?
Quiz #2 - (10 multiple choice items)

1. You are to prepare a ten item multiple choice quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your master teacher should "look over" your quiz and initial it before you have it duplicated. Attach a copy of this quiz to this assignment sheet.

3. After doing an item analysis of this quiz answer the following about each item.
   a. What is the difficult factor for each item?
   b. What is the difficult factor for the total quiz?
Quiz #3 - (10 recall items)

1. You are to prepare a ten item recall quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your master teacher should "look over" your quiz and initial it before you have it duplicated. Attach a copy of this quiz to this assignment sheet.

3. After doing an item analysis of this quiz answer the following about each item.

   a. What is the difficult factor for each item?

   b. What is the difficult factor for the total quiz?
Assessing Students' Skills (projects or jobs)

You are to assess the skills gained by each of the students in one of your classes. Consult your master teacher for guidance and authorization. After you have graded the progress obtained by each student in his or her project or job, answer the following questions or statements:

1. Describe the type of projects or jobs that your students were working on.

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

2. What criteria did you have to measure the students' progress and level of achievement?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

3. What problems did you encounter in grading the students' progress and level of achievement?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
Field Trip

Select a place where you may take one of your classes. Before making the proper arrangements, get the approval of your master teacher. In the space below, prepare a brief description of the company, what you expect the students to gain from the trip and what steps you plan to follow in arranging this trip. Make sure you follow the school's policy regarding field trips and the guidance of your master teacher.

Proposal:

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

Approved by: 47
Guest Speaker

Select a topic in which you may utilize a guest speaker. Before making the proper arrangements, get the approval of your master teacher. In the space below, prepare a brief description of the topic you want the speaker to address himself/herself. Also list the steps you plan to follow in arranging for this speaker. In making the arrangements, follow the school's policy in this matter and consult with the master teacher for assistance.

Proposal:

SAMPLE JOB SHEET ONE

JOB TITLE: Bench Plate

COURSE TITLE: Machine Shop Practice

BLUEPRINT: #9

TOOLS AND EQUIPMENT:

- Shaper
- Shaper tool holder
- Tool bit
- Micrometers
- Brass hammer
- Mill file
- Parallels

MATERIAL:

3 1/4" x 6 1/4" x 12 1/4" cast iron

PROCEDURE:

1. Check machine for proper running condition.
2. Grind tool bit for roughing cast iron (round nose).
3. Clamp work in shaper vise flat side down and parallel to ram travel.
4. Adjust stroke of shaper to proper length.
5. Take rough and finish cut on surface.
6. Repeat for opposite side leaving .012" to .015" grinding stock.
7. Finish all four edges to dimensions plus .010".
8. Remove from shaper vise and break all edges lightly with file.
9. Check all dimensions for accuracy.
10. Route to surface grinder (See Job Sheet #7).
APPENDIX B

1. Select the stock as specified.  
2. Lay out the pattern for the pipe on the metal.  
3. Lay out the allowances for the grooved seam.  
4. Check the pattern for accuracy.  
5. Cut out and notch the metal with combination snips.  
6. Bend the folds for the grooved seam in the bar folder.
APPENDIX B

SAMPLE OPERATION SHEET ONE

HOW TO: Chip with a Cold Chisel  Operation Sheet #18

COURSE TITLE: Beginning Machine Shop Practice  Page 1 of 1 Page

INTRODUCTION:

Chipping is the process of removing metal by means of a cold chisel and hammer. The use of the shaper, milling machine, and planer are more efficient methods of removing metal accurately and rapidly, but the use of a chisel is necessary on many jobs where accuracy is not important and only a small amount of metal is to be removed.

TOOLS AND EQUIPMENT:

Cold chisel  Machinist's hammer
Machinist's vise  Goggles

PROCEDURE:

1. Mount the work firmly in the vise, use soft copper jaws if the work has finished surfaces.

2. Hold the chisel with the thumb and fingers of the left hand, so that the head end extends above the hand.

3. Place the cutting edge of the chisel on the surface of the job where the cut is to be made. The chisel should be held at a cutting angle of approximately 45 degrees.

4. Grasp the hammer near the end of the handle so that it can be swung with an easy forearm movement.

5. Strike the head of the chisel with a firm sharp blow.

6. Reset the cutting edge of the chisel on the work and repeat the above steps.

SAFETY PRECAUTIONS:

1. Goggles should be worn during the chipping process.

2. Make sure that the chisel head is not "mushroomed," as particles may break off and cause a personal injury.

HOW TO USE HAND SNIPS

OBJECTIVES OF UNIT

1. To explain how to make straight cuts with straight, combination, or bulldog snips.
2. To explain how to notch metal.

TOOLS AND EQUIPMENT

- Trojan Snips
- Compound Lever Shears
- Hawk's-Bill Snips
- Open End Wrench
- Hammer, Chisel, Lead Cake
- Aviation Snips, left and right hand
- Circular Snips
- Compound Lever Shears
- Hawk's-Bill Snips
- Open End Wrench
- Hammer, Chisel, Lead Cake
- Aviation Snips, left and right hand
- Trojan Snips
- Combination Snips
- Bulldog Snips
- Aviation Snips, left and right hand
- Trojan Snips
- Combination Snips
- Bulldog Snips
- Aviation Snips, left and right hand
- Trojan Snips
- Combination Snips
- Bulldog Snips
- Aviation Snips, left and right hand

A. MAKING STRAIGHT CUTS WITH STRAIGHT SNIPS, COMBINATION SNIPS OR BULLDOG SNIPS

1. Select the proper snips.

**NOTE:** For mild steel 22 gauge and lighter, use either straight or combination snips. For 16 to 20 gauge mild steel, use bulldog snips.

2. Inspect the snips to see that they are properly adjusted.

**NOTE:** If adjustment is necessary, refer to "Oiling and Adjusting Snips".

3. Grasp the snips in the right hand and the narrowest part of the sheet in left hand. (Fig. 2).

**NOTE:** Rest the snips and sheet on bench if necessary.

4. Open the blades of the snips as far as conveniently possible and start the cut at the edge of the sheet.

**NOTE:** The snips should always be held at right angles to the sheet to be cut.

5. Cut the sheet by closing the blades just short of the full length to prevent leaving jagged edges. (Fig. 2).

**NOTE:** The length of each cut will be determined somewhat by the gage of the sheet.

6. Start the snips at the extreme end of the preceding cut.

7. Finish the cut, keeping the snips on the line by changing the direction of the snips if necessary.

59
The painter must exercise great care in mixing and applying paints containing lead and zinc pigments which may produce lead or zinc poisoning, resulting in skin disease, general discomfort, crippling, and sometimes fatal affliction. The most common symptoms are anemia, upset stomach condition, colic pains, blue line on gums, and wrist drop.

Benzol fumes may produce a "benzine jag" or dizziness and may ultimately result in permanent damage to the eyesight.

Benzol poisoning is the result of the hands or other parts of the body coming in contact with benzol.

Turpentine fumes nauseate some painters and are harmful to the kidneys. Turpentine coming in contact with the skin may result in painful but curable cracking and blistering.

Wood alcohol fumes are exceedingly destructive, especially to the eyes.

Always use rubber gloves when mixing or applying acid. Keep the hands wet when working with hydrochloric acid. Always provide the best possible ventilation in working with hydrochloric (muriatic) acid. The first effect of muriatic acid fumes is nose-bleeding. The cumulative result is hardening of the arteries.

The following suggestions are given as precautions to be observed in mixing or applying paint. Keep the hand out of paint; wear gloves; thoroughly cleanse the hands with soap and running water before eating; take a hot shower after work hours; remove paint from under and around finger nails; frequently change to clean overalls, keep thinners from coming in contact with the skin; never use thinners to remove paint from the skin; provide ample ventilation when mixing or painting indoors, and above all, see a doctor immediately upon the first appearance of any symptoms. Remember, your health, wealth, future, and family are at stake.

Great care must be exercised in the storage of oils, paints, thinners, gasoline, kerosene, alcohol, etc., to prevent the danger of fire. Inflammable materials should be kept in sealed cans at all times. All paint cans should be covered at night. Oily rags should be gathered up and properly disposed of at the close of the day. Too much emphasis cannot be given to the importance of care of using inflammable materials near an open flame or while smoking. Burlap, excelsior, rags, mops, and waste saturated with oils, stains, paints, etc., when placed in a pile or kept in a closed room will sometimes ignite. Spontaneous combustion results in the loss of money, time, and sometimes life.
TOTAL PRESSURE

When air is moving, it creates greater pressure than when standing still. If the manometer leg were placed so that the flow of air through the duct were directly against the instrument, the pressure would be greater than the static pressure alone. This additional pressure is called velocity pressure, and the total pressure is made up of both the static and velocity pressures.

Instead of measuring the static and velocity pressures directly, an instrument called the Pitot tube measures the total pressure and the static pressure. Velocity pressure, then, is obtained by subtracting static from total.

If static pressure alone is to be measured, the total pressure tube of the Pitot is disconnected and the static pressure tube is connected to the cup of the manometer. On the other hand, if a measurement of total pressure alone is desired, the static pressure tube is disconnected from the manometer. Connected in this way, the total pressure will be indicated on the gauge.

FRICTION LOSS

As air flows through the duct, some pressure is lost due to friction of the air against the sides of the duct. This friction loss, as it is called, increases with an increase of air flow.

Pressure losses, which are always present in any duct system, are increased by the following conditions:

1. High air velocities
2. Small diameter ducts
3. Large air flow
4. Long lengths of ducts
5. Changes in direction of air flow
6. Sudden contractions or expansions in air stream

The preceding concepts will be applied in two methods of duct sizing to be discussed later in this unit.
APPENDIX B

SAMPLE ASSIGNMENT SHEET

TITLE: Lathe Cutting Tools

COURSE TITLE: Beginning Machine Shop Practice

PURPOSE:
1. To become familiar with the shapes of the commonly used lathe cutting tools.
2. To learn the correct procedure to follow in grinding lathe cutting tools.
3. To learn the names, uses, and values of the various angles of a cutting tool.

REFERENCES:
South Bend Lathe Works, How To Run A Lathe, Chapter IV.

ASSIGNMENT:
Carefully study the references and write the answers to the following questions:
1. Describe the steel that is generally used in the making of lathe tools.

2. When and why are carbide cutting tools used?

3. Define the term "rake" as applied to lathe cutting tools.
APPENDIX B

4. How should the cutting tool be held during the grinding operation—in the hand or in the tool holder? Why?

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

5. What precautions must be taken when grinding a lathe cutting tool?

__________________________________________________________________________

__________________________________________________________________________

6. In the space below draw a top, side, and end view sketch of (a) a right-hand roughing tool, (b) a left-hand roughing tool, (c) a finishing tool, (d) a facing tool, (e) a V-Thread tool, and (f) a cut-off tool.
APPENDIX C

STATE UNIVERSITY COLLEGE AT UTICA/ROME

STUDENT: ____________________________ TYPE OF LESSON: ____________________________

EVALUATED BY: ____________________________ TITLE OF THE LESSON: ____________________________

LESSON EVALUATION

<table>
<thead>
<tr>
<th>LEVEL OF PERFORMANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOT APPLIC.</td>
</tr>
</tbody>
</table>

1. The physical environment was reasonably comfortable.

2. The physical setting for the lesson was as close to reality as possible.

3. All tools, materials, supplies and visuals were organized and at hand when the teacher needed them.

4. All tools, materials, supplies and visuals were in good condition.

5. The teacher introduced the lesson well.

6. The teacher provided explanations of:
   a. What was going to be presented or demonstrated.
   b. How it fit in with what the class already knew or had experienced.
   c. How it fit in with future activities.

7. The teacher defined any new terms which would be encountered during the lesson.

8. The teacher motivated the class to want to learn the new materials.

9. Each step necessary to the demonstration or steps listed in the lesson plan were followed.

10. Each step was explained as it was demonstrated.

11. Key points or specific techniques essential to perform each step were explained.
APPENDIX C

LESSON EVALUATION (CONT'D)

12. Safety practices specific to the operation were explained.

13. If a step involved small parts or intricate processes, the teacher used visuals for clarification.

14. If a step was time-consuming, the teacher had completed the step ahead of time.

15. The procedure followed for the operation was the one most used in the field.

16. The steps were presented slowly enough that students did not miss key points.

17. Every movement in the demonstration was visible.

18. If direction of movement was of special importance, students were positioned accordingly.

19. The teacher could be clearly heard.

20. The teacher talked to the students, and not to the materials.

21. The teacher performed the lesson with ease.

22. The teacher set up standards of workmanship by doing a thorough job.

23. The teacher encouraged questions.

24. The teacher asked key questions throughout to assure that the students understood the lesson.

25. The teacher included some activity to summarize the steps and key points.

26. The lesson lasted the time allocated.

NOTE: The student must be assisted by his/her supervisor until he/she receives NOT APPLICABLE, AVERAGE, GOOD or EXCELLENT responses in each of the items contained in the Lesson Evaluation Sheet.
STATE UNIVERSITY COLLEGE AT UTICA/ROME
811 COURT STREET
UTICA, NEW YORK 13502

VTE-468
MODULARIZED PRE-SERVICE STUDENT TEACHING
DIRECTIONS AND ASSIGNMENTS

DEPARTMENT OF VOCATIONAL-TECHNICAL EDUCATION

66
DIRECTIONS

You will be expected to demonstrate your instructional abilities as a vocational-technical instructor during this experience in student teaching. The activities that are a requirement of student teaching will take place in a vocational or technical program under the guidance and supervision of a master teacher from the cooperating institution and the faculty member designated by the college to supervise the student teaching experience. You will be expected to assume several specific assignments which you and the master teacher will plan in complete detail. These assignments are described on the sheets which follow.

You are to use the "Student Teaching Schedule" form found on the next two pages to provide an accurate record of your teaching assignments and experiences. This form can be used to assist you in scheduling your activities in advance with the cooperation of the master teacher and the consultation of your college supervisor if needed.

The number of vocational shop and classroom visitations made by the college supervisor will be at his/her discretion and may vary according to the needs and progress of the student teacher. All visitations will be arranged by the college supervisor in consultation with the master teacher and the student teacher.

The student teacher should be phased in gradually to the teaching responsibilities and should be totally responsible for his/her classes for at least one-third of the student teaching experience. The student teaching experience is not limited only to the assignments contained in this manual. Any other assignments that the master teacher deems necessary should be included in the student teaching experience.

At the end of your student teaching experience, you will be required to compile a final report consisting of all the assignment sheets and six lesson plans together with their respective instructional sheets. Although you are required to prepare lesson plans for each lesson that you are assigned to present, you are only required to hand in three information and three skill lessons together with their respective instructional sheets and your final report.

Two samples of the lesson plan format appear in Appendix A. Choose one of these formats for your lesson plans. Samples of the instructional sheets are found in Appendix B and a sample of the instrument that will be used to evaluate your lesson presentation is found in Appendix C.

The final grade will be determined by the master teacher's evaluation of your student teaching and the completed final report.

Routine and Discipline.

The following questions are to be answered after discussing them with the master teacher.

1. How do you verify that the school is closed because of some emergency (snow storm)?

2. How do you report an emergency that will keep you from attending school?

3. How many different classes does the vocational-technical teacher have? How many students are in each class?

4. How is attendance taken and what are the recording procedures? To whom are absenteeism and tardiness reported, and when?
Routine and Discipline (Cont'd)

5. What are the procedures to follow for completing a report card and what information is contained in it?

6. What deadlines and reports must be met by the vocational-technical teacher during the year?

7. With whom does the vocational-technical teacher associate directly with in order to carry out his duties?

8. How many job related meetings does the vocational-technical teacher have to attend per month, and what are the natures of these meetings?

9. What type of public relations is expected from the vocational-technical teacher, and what are the shop promotional activities?
Routine and Discipline (Cont'd)

10. With the help of the master teacher, draw an organizational chart.

11. What are some of the "don'ts" that you should be aware of?

12. What procedure is to be followed in case of discipline problems?

13. What are the master teacher's supervisory duties when his/her students are out of the shop but within the school?

14. Ask the master teacher for the faculty handbook. Examine it then describe the type of material that is contained in it.
Rules and Discipline (Cont'd)

15. What type of duplicating facilities are available to the vocational-technical teacher?
Equipment and Physical Conditions

The following questions are to be answered after discussing them with the master teacher.

1. What is the procedure for maintenance, repair and housekeeping of the equipment and machinery?

________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________

2. What are the regulatory rules for using the heavy equipment and machinery?

________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________

3. What is the procedure to report in adequacy of temperature, ventilation and/or lighting?

________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________
Care of Tools, Stock and Supplies:

The following questions are to be answered after discussing them with the master teacher.

1. How are the tools, stock and supplies protected from damage, loss and abuse?

2. What precautions are used to avoid loss of tools and supplies and the waste of materials?

3. What method is used to maintain an inventory of tools, materials and supplies?

4. Who has access to the storage of tools, stock and supplies?
Budgeting and Purchasing Procedures

The following questions are to be answered after discussing them with the master teacher.

1. What is budgeting and how is it accomplished? What are some of the limitations when budgeting?

2. What are the procedures to purchase machinery, equipment, tools, materials and supplies?

3. How are machines, equipment, tools, materials and supplies selected?
Safety and Hygiene

The following questions are to be answered after discussing them with the master teacher.

1. What safety rules and regulations have been adopted?

2. How is it determined if a student is permitted to use a given piece of hazardous equipment?

3. What is the procedure employed in case a student is injured in the shop?

4. How many different types of alarm systems are in the shop? What is the significance of each alarm system?

5. In a schematic layout of the school, show the path(s) that your students must follow in case of a fire alarm. Mark with a red pencil the various electrical switches that discontinue the flow of current in your shop and with a green pencil mark where the fire extinguishers are located in your shop.
Shop Records and Reports

The following questions are to be answered after discussing them with the master teacher.

1. What type of records and reports are kept for each of the students?

2. What other types of records and reports are kept by the vocational-technical teacher?
Meeting with the School Principal
and/or the Vocational Director

The following questions are to be answered after discussing them with the master teacher.

1. What does the principal or vocational director expect of you during your student teaching experience?

2. What does the principal or vocational director expect of his/her vocational technical teachers?

3. What is the principal's or vocational director's stand on student discipline, drugs, family and financial problems?

4. How does the principal or vocational director expect the vocational-technical teacher to establish priorities when working in the annual budget?
Meeting with the School Principal and/or the Vocational Director (Cont'd)

5. What traits does the principal or vocational director look for when selecting a vocational-technical teacher?

6. What professional organizations does the principal or vocational director expect the vocational-technical teacher to belong to:

7. What are the principal's or vocational director's views on student placement?

8. What type of contractual agreement is extended to the teachers? How does the promotion system work?
Meeting with the Counselor:

The following questions are to be answered after discussing them with the counselor.

1. What type of assistance can the counselor give to the vocational-technical teacher when dealing with the following student problems:

a. Discipline:

b. Career and Education Information:

c. Drug Abuse:

d. Finances:

e. Personal, Family and Social:
Meeting with the Counselor (Cont'd)

2. How can the counselor assist in redirecting students that have been ill placed in a vocational program?

3. What community agencies does the counselor use in referring students with problems?
Information Lesson #1 (lecture)

Prepare a lesson plan and appropriate instructional sheets for an information lesson which you will present. Study the lesson plan and instructional sheets carefully, discuss them with your master teacher and make any necessary corrections, additions or deletions. Under the guidance of your master teacher, present the lesson and hand out the necessary instructional sheets to your class; then answer the following questions:

1. What were some of the difficulties that you encountered in presenting the lesson?

____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________

2. What would you do to improve your presentation if you were given an opportunity to repeat it before another group of students?

____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________

3. How did the improvements suggested by your master teacher help you in this lesson?

Quiz #1 - (10 matching items)

1. You are to prepare a ten item matching quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your master teacher should "look over" your quiz and initial it before you have it duplicated. Attach a copy of this quiz to this assignment sheet.

3. After doing an item analysis of this quiz answer the following about each item.
   a. What is the difficult factor for each item?
   b. What is the difficult factor for the total quiz?
Quiz #2 - (10 multiple choice items)

1. You are to prepare a ten item multiple choice quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your master teacher should "look over" your quiz and initial it before you have it duplicated. Attach a copy of this quiz to this assignment sheet.

3. After doing an item analysis of this quiz answer the following about each item.
   a. What is the difficult factor for each item?
   b. What is the difficult factor for the total quiz?
Assessing Students' Skills (projects or jobs)

You are to assess the skills gained by each of the students in one of your classes. Consult your master teacher for guidance and authorization. After you have graded the progress obtained by each student in his or her project or job, answer the following questions or statements:

1. Describe the type of projects or jobs that your students were working on.

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

2. What criteria did you have to measure the students' progress and level of achievement?

SAMPLE JOB SHEET ONE

JOB TITLE: Bench Plate
COURSE TITLE: Machine Shop Practice
BLUEPRINT: #9
TOOLS AND EQUIPMENT:
- Shaper
- Shaper tool holder
- Tool bit
- Micrometers
- Brass hammer
- Parallels
- Mill file
MATERIAL:
- 3 1/4" x 6 1/4" x 12 1/4" cast iron
PROCEDURE:
1. Check machine for proper running condition.
2. Grind tool bit for roughing cast iron (round nose).
3. Clamp work in shaper vise flat side down and parallel to ram travel.
4. Adjust stroke of shaper to proper length.
5. Take rough and finish cut on surface.
6. Repeat for opposite side leaving .012" to .015" grinding stock.
7. Finish all four edges to dimensions plus .010".
8. Remove from shaper vise and break all edges lightly with file.
9. Check all dimensions for accuracy.
10. Route to surface grinder (See Job Sheet #7).
APPENDIX B

SAMPLE JOB SHEET TWO

SHEET METAL WORK

1. Select the stock as specified.
2. Lay out the pattern for the pipe on the metal.
3. Lay out the allowances for the grooved seam.
4. Check the pattern for accuracy.
5. Cut out and notch the metal with combination snips.
6. Bend the folds for the grooved seam in the bar folder.

CHIPPING is the process of removing metal by means of a cold chisel and hammer. The use of the shaper, milling machine, and planer are more efficient methods of removing metal accurately and rapidly, but the use of a chisel is necessary on many jobs where accuracy is not important and only a small amount of metal is to be removed.

TOOLS AND EQUIPMENT:
- Cold chisel
- Machinist's vise
- Machinist's hammer
- Goggles

PROCEDURE:
1. Mount the work firmly in the vise, use soft copper jaws if the work has finished surfaces.
2. Hold the chisel with the thumb and fingers of the left hand, so that the head end extends above the hand.
3. Place the cutting edge of the chisel on the surface of the job where the cut is to be made. The chisel should be held at a cutting angle of approximately 45 degrees.
4. Grasp the hammer near the end of the handle so that it can be swung with an easy forearm movement.
5. Strike the head of the chisel with a firm sharp blow.
6. Reset the cutting edge of the chisel on the work and repeat the above steps.

SAFETY PRECAUTIONS:
1. Goggles should be worn during the chipping process.
2. Make sure that the chisel head is not "mushroomed," as particles may break off and cause a personal injury.
SAMPLE OPERATION SHEET TWO
COVERING STEP 5 OF PRECEDING JOB SHEET TWO

HAND PROCESSES

Unit 1SMP4
FUNDAMENTAL PROCESS SERIES

HOW TO USE HAND SNIPS

OBJECTIVES OF UNIT

1. To explain how to make straight cuts with straight, combination, or bulldog snips.
2. To explain how to notch metal.

TOOLS AND EQUIPMENT

Straight Snips
Combination Snips
Bulldog Snips
Circular Snips
Aviation Snips, left and right hand

Top Snips
Compound Lever Shears
Hawk's-Bill Snips
Open End Wrench
Hammer, Chisel, Lead Cake

A. MAKING STRAIGHT CUTS WITH STRAIGHT SNIPS, COMBINATION SNIPS OR BULLDOG SNIPS

1. Select the proper snips.

**NOTE:** For mild steel 22 gauge and lighter, use either straight or combination snips. For 16 to 20 gauge mild steel, use bulldog snips.

2. Inspect the snips to see that they are properly adjusted.

**NOTE:** If adjustment is necessary, refer to "Oiling and Adjusting Snips".

3. Grasp the snips in the right hand and the narrowest part of the sheet in the left hand. (Fig. 2).

**NOTE:** Rest the snips and sheet on bench if necessary.

4. Open the blades of the snips as far as conveniently possible and start the cut at the edge of the sheet.

**NOTE:** The snips should always be held at right angles to the sheet to be cut.

5. Cut the sheet by closing the blades just short of the full length to prevent leaving jagged edges. (Fig. 2).

**NOTE:** The length of each cut will be determined somewhat by the gage of the sheet.

6. Start the snips at the extreme end of the preceding cut.

7. Finish the cut, keeping the snips on the line by changing the direction of the snips if necessary.
The painter must exercise great care in mixing and applying paints containing lead and zinc pigments which may produce lead or zinc poisoning, resulting in skin disease, general discomfort, crippling, and sometimes fatal affliction. The most common symptoms are anemia, upset stomach condition, colic pains, blue line on gums, and wrist drop.

Benzol fumes may produce a "benzine jag" or dizziness and may ultimately result in permanent damage to the eyesight.

Benzol poisoning is the result of the hands or other parts of the body coming in contact with benzol.

Turpentine fumes nauseate some painters and are harmful to the kidneys. Turpentine coming in contact with the skin may result in painful but curable cracking and blistering.

Wood alcohol fumes are exceedingly destructive, especially to the eyes.

Always use rubber gloves when mixing or applying acid. Keep the hands wet when using hydrochloric acid. Always provide the best possible ventilation in working with hydrochloric (muriatic) acid. The first effect of muriatic acid fumes is nose bleeding. The cumulative result is hardening of the arteries.

The following suggestions are given as precautions to be observed in mixing or applying paint. Keep the hand out of paint; wear gloves; thoroughly cleanse the hands with soap and running water before eating; take a hot shower after work hours; remove paint from under and around finger nails; frequently change to clean overalls, keep thinners from coming in contact with the skin; never use thinners to remove paint from the skin; provide ample ventilation when mixing or painting indoors, and above all, see a doctor immediately upon the first appearance of any symptoms. Remember, your health, wealth, future, and family are at stake.

Great care must be exercised in the storage of oils, paints, thinners, gasoline, kerosene, alcohol, etc., to prevent the danger of fire. Inflammable materials should be kept in sealed cans at all times. All paint cans should be covered at night. Oily rags should be gathered up and properly disposed of at the close of the day. Too much emphasis cannot be given to the importance of care of using inflammable materials near an open flame or while smoking. Burlap, excelsior, rags, mops, and waste saturated with oils, stains, paints, etc., when placed in a pile or kept in a closed room will sometimes ignite. Spontaneous combustion results in the loss of money, time, and sometimes life.
TOTAL PRESSURE

When air is moving, it creates greater pressure than when standing still. If the manometer leg were placed so that the flow of air through the duct were directly against the instrument, the pressure would be greater than the static pressure alone. This additional pressure is called velocity pressure, and the total pressure is made up of both the static and velocity pressures.

Instead of measuring the static and velocity pressures directly, an instrument called the Pitot tube measures the total pressure and the static pressure. Velocity pressure, then, is obtained by subtracting static from total.

If static pressure alone is to be measured, the total pressure tube of the Pitot is disconnected and the static pressure tube is connected to the cup of the manometer. On the other hand, if a measurement of total pressure alone is desired, the static pressure tube is disconnected from the manometer. Connected in this way, the total pressure will be indicated on the gauge.

FRICTION LOSS

As air flows through the duct, some pressure is lost due to friction of the air against the sides of the duct. This friction loss, as it is called, increases with an increase of air flow.

Pressure losses, which are always present in any duct system, are increased by the following conditions:

1. High air velocities
2. Small diameter ducts
3. Large air flow
4. Long lengths of ducts
5. Changes in direction of air flow
6. Sudden contractions or expansions in air stream

The preceding concepts will be applied in two methods of duct sizing to be discussed later in this unit.
TITLE: Lathe Cutting Tools

COURSE TITLE: Beginning Machine Shop Practice

PURPOSE:
1. To become familiar with the shapes of the commonly used lathe cutting tools.
2. To learn the correct procedure to follow in grinding lathe cutting tools.
3. To learn the names, uses, and values of the various angles of a cutting tool.

REFERENCES:
South Bend Lathe Works, How To Run A Lathe, Chapter IV.

ASSIGNMENT:
Carefully study the references and write the answers to the following questions:
1. Describe the steel that is generally used in the making of lathe tools.

2. When and why are carbide cutting tools used?

3. Define the term "rake" as applied to lathe cutting tools.
4. How should the cutting tool be held during the grinding operation--in the hand or in the tool holder? Why?

5. What precautions must be taken when grinding a lathe cutting tool?

6. In the space below draw a top, side, and end view sketch of (a) a right-hand roughing tool, (b) a left-hand roughing tool, (c) a finishing tool, (d) a facing tool, (e) a V-Thread tool, and (f) a cut-off tool.
1. The physical environment was reasonably comfortable.

2. The physical setting for the lesson was as close to reality as possible.

3. All tools, materials, supplies and visuals were organized and at hand when the teacher needed them.

4. All tools, materials, supplies and visuals were in good condition.

5. The teacher introduced the lesson well.

6. The teacher provided explanations of:
   a. What was going to be presented or demonstrated.
   b. How it fit in with what the class already knew or had experienced.
   c. How it fit in with future activities.

7. The teacher defined any new terms which would be encountered during the lesson.

8. The teacher motivated the class to want to learn the new materials.

9. Each step necessary to the demonstration or steps listed in the lesson plan were followed.

10. Each step was explained as it was demonstrated.

11. Key points or specific techniques essential to perform each step were explained.
12. Safety practices specific to the operation were explained.

13. If a step involved small parts or intricate processes, the teacher used visuals for clarification.

14. If a step was time-consuming, the teacher had completed the step ahead of time.

15. The procedure followed for the operation was the one most used in the field.

16. The steps were presented slowly enough that students did not miss key points.

17. Every movement in the demonstration was visible.

18. If direction of movement was of special importance, students were positioned accordingly.

19. The teacher could be clearly heard.

20. The teacher talked to the students, and not to the materials.

21. The teacher performed the lesson with ease.

22. The teacher set up standards of workmanship by doing a thorough job.

23. The teacher encouraged questions.

24. The teacher asked key questions throughout to assure that the students understood the lesson.

25. The teacher included some activity to summarize the steps and key points.

26. The lesson lasted the time allocated.

NOTE: The student must be assisted by his/her supervisor until he/she receives NOT APPLICABLE, AVERAGE, GOOD or EXCELLENT responses in each of the items contained in the Lesson Evaluation Sheet.

811 COURT STREET
UTICA, NEW YORK 13502

VTE 467
MODULARIZED IN-SERVICE STUDENT TEACHING
DIRECTIONS AND ASSIGNMENTS

DEPARTMENT OF VOCATIONAL-TECHNICAL EDUCATION

iii
DIRECTIONS:

You will be expected to demonstrate your instructional abilities as a vocational or technical education teacher during this experience in student teaching. The activities that are a requirement of student teaching will take place in your own classroom during the regular school day and under the immediate supervision of a representative of the Department of Vocational-Technical Education at Utica/Rome. You will be expected to assume several specific assignments which you will plan in complete detail. These assignments are described on the sheets which follow these directions. Each completed assignment sheet with attached related materials is to be given to your college supervisor after the assignment is fully accomplished.

You are to use the "student teaching schedule" form found on the next page to provide an accurate record of your teaching assignments and experiences. This form can be used to assist you in scheduling your activities in advance with the cooperation and consultation of your college supervisor. You should complete two copies of this schedule and turn one copy in to your college supervisor.

At the end of your student teaching experience you will be required to compile a final report consisting of all assignment sheets, lesson materials prepared in the student teaching experience and other pertinent information relating to the student teaching experience deemed appropriate by your student teaching supervisor.

The number of vocational shop and classroom visitations made by the college supervisor will be at his discretion and may vary according to the needs and progress of the student teacher. All visitations will be arranged by the college supervisor and the student teacher.

Appendix C contains a sample of the instrument that will be used to evaluate your lesson presentation.

The final grade will be determined by the evaluations made by the college supervisor and the completed final report.

Information Lesson #1 (lecture)

1. Prepare a lesson plan following one of the formats for lesson planning given in appendix A. Also make all instruction sheets you deem necessary for this lesson. Examples of instruction sheets can be found in appendix B.

2. Study the lesson plan carefully, discuss it with your supervisor, and then make any necessary corrections or additions.

3. Under the guidance of your supervisor, present the lesson to your class.

4. In your final report, hand in this assignment sheet with the lesson plan and instruction sheets with your final report.

5. What were some of the difficulties that you encountered in presenting the lesson?

6. What would you do to improve your presentation if you were given an opportunity to repeat it before another group of students?

STUDENT: ________________________ SCHOOL: ________________________
TEACHING AREA: ________________________ COLLEGE SUPERVISOR: ________________________

Skill Lesson #3 (demonstration)

1. Prepare a lesson plan following one of the formats for lesson planning given in appendix A. Also make all instruction sheets you deem necessary for this lesson. Examples of instruction sheets can be found in appendix B.

2. Study the lesson plan carefully, discuss it with your supervisor, and then make any necessary corrections or additions.

3. Under the guidance of your supervisor, present the lesson to your class.

4. In your final report, hand in this assignment sheet with the lesson plan and instruction sheets with your final report.

5. What were some of the difficulties that you encountered in presenting the lesson?

6. What would you do to improve your presentation if you were given an opportunity to repeat it before another group of students?

7. How did the improvements indicated in your previous skill lessons help you in this lesson?

Training Aid #1 (chart or graph)

1. Construct a chart or graph which you will use as a training aid during one of the assigned lessons which you will teach.

2. Before starting the construction of the training aid, secure the approval of your college supervisor. In the space provided below, prepare a brief description of the proposed aid.

3. Refer to a text from your personal or school library which deals with the study of visual aids. This text should give you some suggestion for the aid.

4. Proposal:

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

Quiz #1 - (10 matching items)

1. You are to prepare a ten item matching quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your college supervisor should "look over" your quiz and initial it before you have it duplicated. The quiz must be original and written by you, and not taken from your file of tests and examinations.

3. Refer to a text from your personal or school library which deals with the measuring of educational achievement.

4. One copy of your quiz is to be attached to this assignment sheet and given to the college supervisor in the final report.
Quiz #2 - (10 multiple choice)

1. You are to prepare a ten item multiple choice quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your college supervisor should "look over" your quiz and initial it before you have it duplicated. The quiz must be original and written by you, and not taken from your file of tests and examinations.

3. Refer to a text from your personal or school library which deals with the measuring of educational achievement.

4. One copy of your quiz is to be attached to this assignment sheet and given to the college supervisor in the final report.
Quiz #3 - (10 recall items)

1. You are to prepare a ten item recall quiz which you will administer to your students following the presentation of one of the assigned lessons which you will teach.

2. Your college supervisor should "look over" your quiz and initial it before you have it duplicated. The quiz must be original and written by you, and not taken from your file of tests and examinations.

3. Refer to a text from your personal or school library which deals with the measuring of educational achievement.

4. One copy of your quiz is to be attached to this assignment sheet and given to the college supervisor in the final report.
Guest Speaker

1. Select a topic in which you may utilize a guest speaker.

2. Before making proper arrangements to secure the speaker, get the approval of the college supervisor. In the space provided below, prepare a brief description of the topic you want the speaker to address himself/herself.

3. In making the arrangements to secure the guest speaker, follow the school's policy in this matter and consult with the college supervisor for guidance and assistance.

MATERIAL:

3 1/4" x 6 1/4" x 12 1/4" cast iron

PROCEDURE:

1. Check machine for proper running condition.
2. Grind tool bit for roughing cast iron (round nose).
3. Clamp work in shaper vise flat side down and parallel to ram travel.
4. Adjust stroke of shaper to proper length.
5. Take rough and finish cut on surface.
6. Repeat for opposite side leaving .012" to .015" grinding stock.
7. Finish all four edges to dimensions plus .010".
8. Remove from shaper vise and break all edges lightly with file.
9. Check all dimensions for accuracy.
10. Route to surface grinder (See Job Sheet #7).
SAMPLE JOB SHEET TWO

MATERIALS AND SUPPLIES
Black Iron 28 gage 6\(\frac{1}{2}\)" x 10\(\frac{1}{2}\)"

TOOLS AND EQUIPMENT

1. Select the stock as specified.
2. Lay out the pattern for the pipe on the metal.
3. Lay out the allowances for the grooved seam.
4. Check the pattern for accuracy.
5. Cut out and notch the metal with combination snips.
6. Bend the folds for the grooved seam in the bar folder.

133
APPENDIX B

SAMPLE OPERATION SHEET ONE

HOW TO: Chip with a Cold Chisel

COURSE TITLE: Beginning Machine Shop Practice

INTRODUCTION:

Chipping is the process of removing metal by means of a cold chisel and hammer. The use of the shaper, milling machine, and planer are more efficient methods of removing metal accurately and rapidly, but the use of a chisel is necessary on many jobs where accuracy is not important and only a small amount of metal is to be removed.

TOOLS AND EQUIPMENT:

- Cold chisel
- Machinist's vise
- Machinist's hammer
- Goggles

PROCEDURE:

1. Mount the work firmly in the vise, use soft copper jaws if the work has finished surfaces.
2. Hold the chisel with the thumb and fingers of the left hand, so that the head extends above the hand.
3. Place the cutting edge of the chisel on the surface of the job where the cut is to be made. The chisel should be held at a cutting angle of approximately 45 degrees.
4. Grasp the hammer near the end of the handle so that it can be swung with an easy forearm movement.
5. Strike the head of the chisel with a firm sharp blow.
6. Reset the cutting edge of the chisel on the work and repeat the above steps.

SAFETY PRECAUTIONS:

1. Goggles should be worn during the chipping process.
2. Make sure that the chisel head is not "mushroomed," as particles may break off and cause a personal injury.
SAMPLE OPERATION SHEET TWO
COVERING STEP 5 OF PRECEDING JOB SHEET TWO

H.111D PROCESSES
ISM-P4
FUNDAMENTAL PROCESS SERIES

HOW TO USE HAND SNIPS

OBJECTIVES OF UNIT

1. To explain how to make straight cuts with straight, combination, or bulldog snips.
2. To explain how to notch metal.

TOOLS AND EQUIPMENT

Straight Snips
Combination Snips
Bulldog Snips
Circular Snips
Aviation Snips, left and right hand

Trojan Snips
Compound Lever Shears
Hawk's-Bill Snips
Open End Wrench
Hammer, Chisel, Lead Cake

A. MAKING STRAIGHT CUTS WITH STRAIGHT SNIPS, COMBINATION SNIPS OR BULLDOG SNIPS

1. Select the proper snips.

NOTE: For mild steel 22 gauge and lighter, use either straight or combination snips. For 16 to 20 gage mild steel, use bulldog snips.

2. Inspect the snips to see that they are properly adjusted.

NOTE: If adjustment is necessary, refer to "Oiling and Adjusting Snips".

3. Grasp the snips in the right hand and the narrowest part of the sheet in left hand. (Fig. 2).

NOTE: Rest the snips and sheet on bench if necessary.

4. Open the blades of the snips as far as conveniently possible and start the cut at the edge of the sheet.

NOTE: The snips should always be held at right angles to the sheet to be cut.

5. Cut the sheet by closing the blades just short of the full length to prevent leaving jagged edges. (Fig. 2).

NOTE: The length of each cut will be determined somewhat by the gage of the sheet.

6. Start the snips at the extreme end of the preceding cut.

7. Finish the cut, keeping the snips on the line by changing the direction of the snips if necessary.
The painter must exercise great care in mixing and applying paints containing lead and zinc pigments which may produce lead or zinc poisoning, resulting in skin disease, general discomfort, crippling, and sometimes fatal affliction. The most common symptoms are anemia, upset stomach condition, colic pains, blue line on gums, and wrist drop.

Benzol fumes may produce a "benzine jag" or dizziness and may ultimately result in permanent damage to the eyesight.

Benzol poisoning is the result of the hands or other parts of the body coming in contact with benzol.

Turpentine fumes nauseate some painters and are harmful to the kidneys. Turpentine coming in contact with the skin may result in painful but curable cracking and blistering.

Wood alcohol fumes are exceedingly destructive, especially to the eyes.

Always use rubber gloves when mixing or applying acid. Keep the hands wet when using hydrochloric acid. Always provide the best possible ventilation in working with hydrochloric (muriatic) acid. The first effect of muriatic acid fumes is nose bleeding. The cumulative result is hardening of the arteries.

The following suggestions are given as precautions to be observed in mixing or applying paint. Keep the hand out of paint; wear gloves; thoroughly cleanse the hands with soap and running water before eating; take a hot shower after work hours; remove paint from under and around finger nails; frequently change to clean overalls, keep thinners from coming in contact with the skin; never use thinners to remove paint from the skin; provide ample ventilation when mixing or painting indoors, and above all, see a doctor immediately upon the first appearance of any symptoms. Remember, your health, wealth, future, and family are at stake.

Great care must be exercised in the storage of oils, paints, thinners, gasoline, kerosene, alcohol, etc., to prevent the danger of fire. Inflammable materials should be kept in sealed cans at all times. All paint cans should be covered at night. Oily rags should be gathered up and properly disposed of at the close of the day. Too much emphasis cannot be given to the importance of care of using inflammable materials near an open flame or while smoking. Burlap, excelsior, rags, mops, and waste saturated with oils, stains, paints, etc., when placed in a pile or kept in a closed room will sometimes ignite. Spontaneous combustion results in the loss of money, time, and sometimes life.
TOTAL PRESSURE

When air is moving, it creates greater pressure than when standing still. If the manometer leg were placed so that the flow of air through the duct were directly against the instrument, the pressure would be greater than the static pressure alone. This additional pressure is called velocity pressure, and the total pressure is made up of both the static and velocity pressures.

Instead of measuring the static and velocity pressures directly, an instrument called the Pilot tube measures the total pressure and the static pressure. Velocity pressure, then, is obtained by subtracting static from total.

If static pressure alone is to be measured, the total pressure tube of the Pilot is disconnected and the static pressure tube is connected to the cup of the manometer. On the other hand, a measurement of total pressure alone is desired, the static pressure tube is disconnected from the manometer. Connected in this way, the total pressure will be indicated on the gauge.

FRICTION LOSS

As air flows through the duct, some pressure is lost due to friction of the air against the sides of the duct. This friction loss, as it is called, increases with an increase of air flow.

Pressure losses, which are always present in any duct system, are increased by the following conditions:

1. High air velocities
2. Small diameter ducts
3. Large air flow
4. Long lengths of ducts
5. Changes in direction of air flow
6. Sudden contractions or expansions in air stream

The preceding concepts will be applied in two methods of duct sizing to be discussed later in this unit.
APPENDIX B

SAMPLE ASSIGNMENT SHEET

TITLE: Lathe Cutting Tools
COURSE TITLE: Beginning Machine Shop Practice
PURPOSE:
1. To become familiar with the shapes of the commonly used lathe cutting tools.
2. To learn the correct procedure to follow in grinding lathe cutting tools.
3. To learn the names, uses, and values of the various angles of a cutting tool.
South Bend Lathe Works, *How To Run A Lathe*, Chapter IV.
ASSIGNMENT:
Carefully study the references and write the answers to the following questions:
1. Describe the steel that is generally used in the making of lathe tools.

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

2. When and why are carbide cutting tools used?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

3. Define the term "rake" as applied to lathe cutting tools.

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
4. How should the cutting tool be held during the grinding operation—in the hand or in the tool holder? Why?

5. What precautions must be taken when grinding a lathe cutting tool?

6. In the space below draw a top, side, and end view sketch of (a) a right-hand roughing tool, (b) a left-hand roughing tool, (c) a finishing tool, (d) a facing tool, (e) a V-Thread tool, and (f) a cut-off tool.
STUDENT: ___________________________ TYPE OF LESSON: ___________________________
EVALUATED BY: ___________________________ TITLE OF THE LESSON: ___________________________

LESSON EVALUATION

<table>
<thead>
<tr>
<th>LEVEL OF PERFORMANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOT APPLIC.</td>
</tr>
</tbody>
</table>

1. The physical environment was reasonably comfortable.
2. The physical setting for the lesson was as close to reality as possible.
3. All tools, materials, supplies and visuals were organized and at hand when the teacher needed them.
4. All tools, materials, supplies and visuals were in good condition.
5. The teacher introduced the lesson well.
6. The teacher provided explanations of:
   a. What was going to be presented or demonstrated.
   b. How it fit in with what the class already knew or had experienced.
   c. How it fit in with future activities.
7. The teacher defined any new terms which would be encountered during the lesson.
8. The teacher motivated the class to want to learn the new materials.
9. Each step necessary to the demonstration or steps listed in the lesson plan were followed.
10. Each step was explained as it was demonstrated.
11. Key points or specific techniques essential to perform each step were explained.

140
LESSON EVALUATION (CONT'D)

12. Safety practices specific to the operation were explained.

13. If a step involved small parts or intricate processes, the teacher used visuals for clarification.

14. If a step was time-consuming, the teacher had completed the step ahead of time.

15. The procedure followed for the operation was the one most used in the field.

16. The steps were presented slowly enough that students did not miss key points.

17. Every movement in the demonstration was visible.

18. If direction of movement was of special importance, students were positioned accordingly.

19. The teacher could be clearly heard.

20. The teacher talked to the students, and not to the materials.

21. The teacher performed the lesson with ease.

22. The teacher set up standards of workmanship by doing a thorough job.

23. The teacher encouraged questions.

24. The teacher asked key questions throughout to assure that the students understood the lesson.

25. The teacher included some activity to summarize the steps and key points.

26. The lesson lasted the time allocated.

NOTE: The student must be assisted by his/her supervisor until he/she receives NOT APPLICABLE, AVERAGE, GOOD or EXCELLENT responses in each of the items contained in the Lesson Evaluation Sheet.
