This paper describes and evaluates a pilot project funded under the Emergency School Aid Act (ESAA). The pilot project was subdivided into two parts: the Camp Learning Center program, and the Cultural Adjustment Program. Among the general goals of the Camp Learning Center were to improve mathematics and reading skills through a relevant and interesting program of outdoor education which included the natural, environmental, and social sciences. The overall objective was to improve cognitive and effective skills and development while further reducing minority isolation. It was predicted that the participating students would make gains in the areas of reading, certain camping content areas, and social development. These objectives were met. The Cultural Adjustment Program extended the services provided through general funds for non-English speaking pupils and pupils with first language interferences. It also provided special services for native Spanish-speaking pupils. The major purpose of this project was to reduce isolation and educational problems related to non-English speaking pupils and those pupils who have first language interferences. Among the findings of the evaluation include: (1) pupils studying English as a second language increased their proficiency in English usage skills, (2) pupils studying Spanish as a native language increased their levels of skills in Spanish usage, and (3) the services provided by this project served a definite need of the school system by extending existing services to immigrant pupils. APPENDICES

PART I

Self-Appraisal Inventory .............................................................................. A-1

PART II

Lesson Plans .................................................................................................. B-1
The Atlanta Public Schools received a federal grant of $290,123 for the operation of a pilot project under the Emergency School Aid Act (ESAA) from July 1, 1975 to June 30, 1976. The pilot project was subdivided into two parts as follows: Part I, Camp Learning Center Program, and Part II, Cultural Adjustment Program. The grant award included $111,530 for operation of the Camp Learning Center Program.

It was believed that in integrated schools a lack of understanding of racial and cultural differences and the existence of stereotyped opinions about other ethnic groups hindered the academic learning process. Conversely, it was believed that when human relationships improved, tensions decreased and learning possibilities increased. Accordingly, the Camp Learning Center program provided interdisciplinary educational, interracial, and cultural experiences in a camp setting for approximately 500 sixth grade pupils.

The general goals of the Camp Learning Center were to:

1. Improve mathematics and reading skills through a relevant and interesting program of outdoor education which included the natural, environmental, and social sciences.
2. Improve human relations skills through a program of activities designed to:
   a. Foster knowledge of and appreciation for others of different backgrounds;
   b. Teach the skills necessary to interact successfully with peers, teachers, and parents;
   c. Teach problem-solving and valuing skills which enable the student to deal successfully with a variety of social and personal problems.
3. Improve the pupil's self-concept and his perception of his ability to control the direction of his own life through a program which provides a variety of successful experiences and removes the external cues for failure he may have previously perceived in the regular classroom setting.
4. Assist the students in the acquisition of skills related to four content areas which were emphasized during the Camp Learning experience. These specific content areas were forestry, soil and water, time and space, and manual animal.

In today's world, children need to possess more than academic skills. There is a need for them to know how to interact with people and to have the tools which will enable them to cope with a rapidly changing environment. Children also have a need to understand their own behavior and its causes as well as the behavior of others.

It was predicted that, as a result of participation in the program, the students would make gains in the areas of reading, certain camping content areas, and social development. In addition, it was felt that this experience would open many new fields of interest for the children to pursue at school and at home.

NEED

The need for Federal funds to provide assistance in coping with the problems incident to the further desegregation of the Atlanta Public Schools is especially great during the period required for the implementation of a court-ordered comprehensive plan to settle a long-standing court case involving the School System.

The unitary school has resulted in many problems centering around racial and cultural differences. The problems of lack of understanding of racial and cultural differences and stereotyped opinions about other ethnic groups could be most effectively eliminated by exposing students to other social, cultural, and economic systems in a situation of minimal stress, e.g., a camping situation.

The provision of Federal funds through the Emergency School Aid Act (ESAA) provided a means of fostering meaningful integration of individuals from various ethnic backgrounds in an innovative and interesting program of outdoor education. The intent was to obey the spirit as well as the letter of the law, i.e., to provide experiences leading to true social integration rather than mere school desegregation.
The children attending the Camp Learning Center were presented a program of study in the natural, environmental, and social sciences through a series of interesting and active activities. By stimulating the student's interest in these areas, he or she would be motivated to acquire the necessary reading skills needed to participate more fully in the program and to pursue the interests developed as these areas were studied. Secondly, success in these activities would establish an expectancy for success in future-related activities, thus building the student's self-confidence in his or her own ability to achieve.

By being placed in situations where cooperative group effort was necessary and where there was the time and opportunity to settle differences constructively, the participants in the project would learn many of the necessary social skills to get along with people different from themselves. Also, the program would result in fewer instances of disruptive behavior in the classroom as those skills were easily reinforced and carried over into everyday activities.

The Camp Learning Center Project involved approximately 300 sixth grade children from eight Atlanta schools. The classroom teachers were present at all times but required to assist at the camp only during school hours. Approximately 100 high school students served as camp counselors and were recruited equally from minority high schools and from majority students attending integrated high schools.

The children were divided into four groups of 125 pupils each, with approximately one high school student assigned to every seven elementary students during the camp session. Each group attended camp for five days during the fall quarter and an additional five days in the spring quarter. During the winter quarter, the project staff conducted special activities within the classroom, arranged for appropriate field trips, and generally acted as consultants to the teachers in reinforcing the concepts learned at the Camp Learning Center.

The program was designed and implemented by the project coordinator, a lead teacher, and four released teachers. Operations analysis, evaluation, and liaison activities were carried out by personnel assigned to the Research and Evaluation Division.

The overall objective was to improve cognitive and affective skills and development while further reducing minority isolation.

More specifically, the objectives of the Camp Learning Center were as follows:

1. The Camp Learning Center pupils would achieve gains in reading equal to or greater than the gains in reading of all Atlanta sixth grade pupils.

2. The self-concept of Camp Learning pupils, as measured by the Self Appraisal Inventory (SAI), would improve significantly from the fall of 1975 to the spring of 1976.

3. The Camp Learning pupils would, on the average, respond correctly to seventy-five percent of the questions on a criterion-referenced test which was constructed by the Camp Learning staff. The questions would be derived from the content areas taught during the camp experience.

4. The Camp Learning pupils would average an eighty percent positive response to two student surveys about their attitude toward the camp experience. While the questions were the same, one survey would be administered in the fall and a second survey would be administered in the spring.

5. The regular classroom teachers who attended the two camp sessions with their pupils would respond positively to questions relating to the Camp Learning experience. While the questions were the same, the survey would be administered in the fall and a second survey would be administered in the spring.
The participants in the project were divided into four major groups. Each group attended two five-day sessions, one during the fall quarter and one during the spring quarter. Each student participated for a total of eighteen weeks: (1) two weeks pre-camp preparation in the fall, (2) one-week camp session in the fall and another in the spring, (3) twelve weeks intercamp activities, and (4) two weeks post-camp activities in the spring.

An outline of the project activities is presented below:

1. **Precamp Activities**

   During the weeks immediately prior to the fall camp sessions, the project staff participated in human relations training provided by in-system resource personnel. The project staff conducted a full-day workshop for classroom teachers and principals. The workshop included an orientation of the campsite and general camp program as well as specific instructions in human relations and in conducting camp activities. Also, during this period, high school students in the environmental education programs were recruited and trained to serve as camp counselors. The counselors were also trained to assist them in the use of human relations skills.

   Project staff developed activities and designed activities to meet the particular needs of the pupil and the camp program. Materials and supplies were requisitioned and constructed to be used both at camp and by classroom teachers at school. The coordinator made all arrangements for the camp, travel, etc.

   Prior to going to camp, each participating class was visited by the project staff several times to participate in activities designed to prepare them for the camp experience. The released teachers, assisted by the lead teacher, conducted a variety of science and social studies activities to help the students to learn the new concepts needed for participation in camp activities. The students were presented with those instruments identified for the evaluation component of the project, received instructions as to proper clothing and equipment to take to camp, and were given medical screening examinations.

2. **Fall and Spring Camping Activities**

   The students were divided into teams as they arrived at the campsite and assigned to large cabins where they lived with their high school student counselors, classroom teachers, and released teachers. Throughout the session, the teams were rotated through various activities conducted by teachers and staff. The students participated in a variety of academic, social, and recreational activities throughout the day which were balanced in alternate periods of quiet activity with those of physical activity.

   Each morning the students assembled in front of the dining hall for flag raising and to hear announcements about the special activities of the day. Following breakfast, the students returned to their cabins to make their beds, to clean up, and to prepare for the day's program. The major part of the morning program was devoted to academic activities including soil and water study, social studies, health, science, and language arts. The students were accompanied by their counselors to these activities so that the counselors could assist them later in the day with review and homework assignments. After lunch, the students participated in cultural enrichment activities for about an hour which included presentations of high school art groups, movies, and the like. A second academic session, similar to the morning session, was conducted each afternoon. In the late afternoon, students participated in recreational activities including organized team sports, individual sports, and quiet games. Following this, the students divided into small groups of six or less and worked with their high school counselors on "reflection and reinforcement." This was a period when the students reviewed the concepts learned during the day and prepared for the next day's activities. The students then returned to their cabins for free time which was followed by dinner. After dinner, the students participated in a variety of recreational and cultural evening activities which included performances by a children's theatre group, educational movies, square dancing, talent shows, and the like. The students were then accompanied back to their cabins by the high school staff.
counselors while teachers and staff met to review the day's program and to make plans for the coming day.

3. Intercamp Activities

The camp staff visited each school at least once a week during the winter quarter. The camp staff presented classroom demonstrations, films, speakers, etc., to reinforce concepts presented at camp. The staff conducted field trips relevant to the camping experience and organized detailed projects expanding knowledge obtained at camp.

Project staff also provided the classroom teachers with curriculum materials and guidance in their use in the regular classroom program.

4. Postcamp Activities

Intercamp activities continued to reinforce concepts presented during the camp session.

**EVALUATION**

The evaluation of the Camp Learning Program is directly related to the objectives which the program established prior to the implementation of the activities. Each objective will be discussed separately.

**Objective 1:** The Camp Learning Center pupils would achieve gains in reading equal to or greater than the gains in reading of all Atlanta sixth grade pupils.

Attainment of Objective 1 was measured by comparing the reading gain of the Camp Learning pupils to the reading gain of all Atlanta sixth grade pupils. The data are presented in Table 1. As can be determined by analyzing the data presented, seven of the eight schools involved in the Camp Learning Program attained the objective of achieving reading gains equal to or greater than the average gain of all Atlanta sixth grade pupils.

**Objective 2:** The self-concept of Camp Learning pupils, as measured by the Self-Appraisal Inventory (SAI), would improve significantly from the fall of 1975 to the spring of 1976.

Attainment of Objective 2 was measured by comparing the gains of the Camp Learning pupils on a self-concept test used widely in the Atlanta Public Schools, namely the SAI.

The SAI was administered to the entire student population of the classes participating in the program. The students took the test in the fall before they went to camp and in the spring after they returned from their second camp session, thus enabling a pre-post evaluation of the student's self-concept.

The SAI is a self-concept instrument used to measure the following dimensions pertaining to pupil's self-concept.

1. **Family** — One's self-esteem yielded from family interaction.
2. **Peer** — One's self-esteem associated with peer relations.

3. Scholastic — One's self-esteem derived from success or failure in scholastic endeavors.

4. General — A comprehensive estimate of how the self is esteemed.

5. Total — A combination of the four subscales enumerated above.

The data gathered from the administration of the SAI are presented in Table 2. While the scores of participating schools are subdivided into the four subcategories of self-concept, it is the "Total" with which evaluation of the objective was concerned.

As can be determined by analyzing the data presented in Table 2, the self-concept objective was achieved because there was a statistically significant improvement in the self-concept of the Camp Learning pupils from the fall pretest to the spring posttest.

It is interesting to note that the one subtest for which there was not a statistically significant improvement was the "school" subcategory. Perhaps the transition from the camping situation to the classroom is not as impressive as the Camp Learning staff would wish. It must be noted, however, that there was a slight increase in positive attitude towards school from 13.01 (pretest) to 13.33 (posttest). Thus, while there was no statistically significant increase, there was a slight positive increase.

Objective 3: The Camp Learning pupils would, on the average, respond correctly to the seventy-five per cent of the questions on a criterion-referenced test which was constructed by the Camp Learning staff. The questions would be derived from the content areas taught during the camping experience.

Attainment of Objective 3 was measured by the administration of a forty-item test developed by the Camp Learning staff. Ten items from each of the four content areas were included on the test, and the items were derived from the objectives within each of the four content areas.

Table 3 contains the data gathered as a result of the scoring of the responses of the Camp Learning pupils. The average correct responses are reported for each of the four subtests and for the total forty-item test.

Also, the average correct responses for each of the eight participating schools are listed so the contribution of each school towards attainment of the objective can be evaluated.

Using the criterion of seventy-five per cent correct responses to the forty-item test, pupils in four of the eight schools achieved the objective while pupils in the remaining four did not. Likewise, when the correct responses of the pupils were averaged, the average of twenty-nine on the total test falls just below the criterion level. Thus, when consideration is given to pupils from individual schools, four schools attained the objective but the total group of Camp Learning pupils was, for all practical purposes, able to achieve the stated objective.

Objective 4: The Camp Learning pupils would average an eighty per cent positive response to two student surveys about their attitude in regard to the camping experience. While the questions were the same, the survey would be administered in the fall, and a second survey would be administered in the spring.

As was stated above, the Camp Learning pupils were exposed to two one-week camping sessions — one in the fall and another in the spring. At the end of each of the two sessions, the pupils responded anonymously to a questionnaire which contained six questions.

Attainment of the survey objective must be determined by analyzing the data gathered at the end of each camping session. Table 4 contains the data gathered at the end of the fall camping session, and Table 5 contains the data from the spring camping session.

By reviewing the data presented in Table 4, it is obvious that during the fall camping experience the objective was achieved in six of the seven areas covered by the survey questionnaire. Only in the area of a "positive change in attitude toward school" did the per cent of responses fall below the criterion level of eighty per cent positive. Once again, the transfer of positive attitudes from the camp setting to a structured classroom setting was not achieved.

As can be determined by reviewing the data in Table 5, the spring survey resulted in a very similar pattern. Once again, the eighty per cent criterion level was not attained in the realm of a "positive change in

</table>
attitude toward school." Also, positive responses to question number 5 relating to a "positive change in relationship with teacher" fell below the criterion level of eighty per cent positive response. However, by using all the responses to the student survey to evaluate attainment of this objective, both camping sessions were successful with the fall session the more successful of the two.

**Objective 5:** A majority of regular classroom teachers who attended the two camping sessions with their pupils would respond positively to questions relating to the Camp Learning experience. While the questions were the same, one survey would be administered in the fall and a second survey would be administered in the spring.

The questionnaire which was used to evaluate attainment of this objective contained eight questions with an opportunity for open-ended responses after each question. Table 6 contains the data gathered from the administration of the questionnaire after each of the camping sessions.

For both the fall and spring evaluations, the responses were very positive. While the objective stated that the criterion of attainment would be a majority of positive responses, an analysis of Table 6 indicates that the feelings about the camping experience were almost unanimous in their positiveness.

**COST ANALYSIS**

As of August 31, 1976, the expenditures for the 1975-76 Camp Learning Program totaled $169,743.16. In analyzing the cost of the program, there are four basic calculations which will be made. The four calculations are as follows:

1. Cost per sixth grade pupil in terms of the following services:
   a. A one-week camping session during Fall Quarter 1975.
   b. Weekly classroom visits by the Camp Learning staff during Winter Quarter 1975-76.
   c. A one-week camping session during Spring Quarter 1976.

2. Cost per month's gain in reading for all sixth grade pupils who benefited from the Camp Learning Program (using the cost per pupil derived in Number 1).

3. Cost per pupil (including the sixth grade pupils and the high school counselors).

4. Cost per month's gain in reading for all sixth grade pupils who benefited from the Camp Learning Program (using the cost per pupils derived in Number 3).

Table 7 includes the data for each of the above four calculations.

</tbody>
</table>
In regard to the first cost factor, Number 1 in Table 7, the basic cost per sixth grade pupil, the expenditure was $123.94 per pupil. In several ways, this figure is inflated because one important group of persons is not included in the total of 524 sixth grade pupils. The cost per sixth grade participant does not include the approximately 100 high school student counselors who served a vital role in the execution of the program. For 1975-76, no data were obtained on this group; thus, it was excluded from the first cost per participant. Even with the inflated cost of $321.94 per sixth grade participant, the Camp Learning Program was very economical when one considers the three services enumerated above, especially the weekly classroom visits during Winter Quarter 1975-76. One of the most important elements of the Camp Learning Program, in the opinion of this writer, is the Winter Quarter visitation component. All too often pupils are taken away for a valuable camping experience, returned to the home-based school, and the camping experience is ended. The weekly visits by the Camp Learning staff, during the interim of the two camping experiences, provides a continuity which is often lacking in the camping programs. Thus, $323.94 per pupil is an extremely good "bargain."

In regard to the second cost factor, Number 2 in Table 7, month's gain in reading, the expenditure was $53.99 per month's gain. The inflated cost, described when discussing the first cost factor, is relevant when considering this second factor. Even if the cost of $53.99 per month's gain were not inflated, this cost per month's gain is comparable to other Federal programs in operation in the Atlanta Public Schools, some of which have reading gain as their prime objective. As the reader will recall from the section on "Objectives," the ESAA Camp Learning Program is equally concerned with both the cognitive and affective domains and, more specifically, with the reduction of minority isolation. Thus, $53.99 per month's gain in reading is an impressively low expenditure.

In regard to the third factor, Number 3 in Table 7, the cost per pupil (including the sixth grade and high school counselors), the inclusion of the latter group reduces the cost per pupil to $272.18 which is a more realistic figure than $323.94 per pupil.

The fourth cost calculation, Number 4 in Table 7, cost per month's gain in reading for the sixth grade pupil, is made by using the lower cost per pupil figure. This lower cost per month's gain in reading of $45.36 emphasizes dramatically how a successfully operating camping program, which does not have reading as its prime objective, can make a significant contribution to the normal reading program in the Atlanta Public Schools.

CONCLUSIONS

The ESAA Camp Learning Program operated as planned during the 1975-76 school year. There were no major deviations from the operations in the other four years during which the program has been in existence. While the consensus of those associated with the program was that the camping program was successful, there is tangible, objective evidence that the program was successful in achieving its goals and objectives.

The tangible evidence of a successful ESAA Camp Learning experience is provided by a review of the accomplishments associated with the five objectives of the program. For the purposes of emphasis, the five objectives and the accomplishments of each are restated as follows:

1. The Camp Learning Center pupils would achieve gains in reading equal to or greater than the gains in reading of all Atlanta sixth grade pupils.
   
   Accomplishments: The average system-wide gain of sixth grade pupils in reading as measured by the Iowa Tests of Basic Skills (Spring 1975 and Spring 1976) was 0.4 months while the ESAA Camp Learning pupils averaged a gain of 0.6 months. Thus, the objective was achieved.

2. The self-concept of Camp Learning pupils, as measured by the Self-Appraisal Inventory (SAI), would improve significantly from the fall of 1975 to the spring of 1976.

   Accomplishments: The ESAA Camp Learning pupils improved significantly in self-concept as measured by the gains in the fall 1975 and the spring 1976 administration of the SAI. The improvement was statistically significant at the .05 level.
The Camp Learning pupils would, on the average, respond correctly to seventy-five per cent of the questions on a criterion-referenced test which was constructed by the Camp Learning staff. The questions were derived from the content areas taught during the camp experience.

Accomplishment: On the forty-item test, the average correct response of the ESAA Camp Learning pupils was 29; thus, the objective was, for all purposes, achieved. Also, pupils in four of the eight schools averaged correct responses above the criterion level of seventy-five per cent correct responses.

The Camp Learning pupils would average an eighty per cent positive response to two student surveys about their attitudes in regard to the camping experience. While the questions were the same, one survey would be administered in the fall, and a second survey would be administered in the spring.

Accomplishment: During the fall camping experience, the objective was achieved in six of the seven areas covered by the survey questionnaire. Only in the area of a "positive change in attitude toward school" did the per cent of responses fall below the criterion level of eighty per cent positive.

The spring survey resulted in a very similar pattern. Once again, the eighty per cent criterion level was not attained in the realm of a "positive change in attitude toward school." Also, positive responses to question Number 5 relating to a "positive change in relationship with teacher" fell below the criterion level of eighty per cent positive response. However, by using all the responses to the student survey to evaluate attainment of this objective, both camping sessions were successful, with the fall session being the more successful of the two.

The regular classroom teachers who attended the two camping sessions with their pupils would respond positively to questions relating to the Camp Learning experience. While the questions were the same, one survey would be administered in the fall, and a second survey would be administered in the spring.

Accomplishment: For both the fall and spring evaluations, the responses were very positive. While the objective stated that the criterion of attainment would be a majority of positive responses, an analysis of the data indicated that the feelings of teachers about the camping experience were almost unanimous in their positiveness.

Several aspects of the ESAA Camp Learning Program may account for the significant accomplishments enumerated in the preceding paragraph. First, there is something "special" about a camping experience offered by a school system, and the pupils appeared to be excited about their opportunity to learn away from their own school building. It is a sign of maturity when a sixth grader has an opportunity to be away from home and in structured schooling for five days, twice during a school year. Second, the Winter Quarter interim, when the Camp Learning staff visits the Camp Learning pupils, offers a continuity which is too often missing in other camping programs. Third, the Camp Learning Program provides an opportunity for the pupils to perceive of their teachers as both teachers and human beings. In a regular school setting, pupils often never see teachers other than in their classroom settings. At the camp, teachers are at the same time teachers, learners, and buddies. Fourth, many of the Camp Learning pupils have never been in a noncity environment and are provided with a "back to nature" experience which has to have an impact on those pupils who participate. Finally, the opportunity of "living" for ten days with persons of different races has a potentially positive effect on those persons having the experience. In reality, the positive accomplishments of the Camp Learning Program result from the sum of all the aspects rather than any one which might be singled out.

RECOMMENDATIONS

Based upon an analysis of the 1975-76 data, a review of the Camp Learning Program in previous years, and knowledge of the needs of the Atlanta Public Schools, there are recommendations which the writer, as program evaluator, would implement. The recommendations fall into two categories, one category which is best labeled operational recommendations...
and a second category which is best described as policy recommendations. The former recommendations will be discussed first.

The operational recommendations which, if implemented, should result in even greater accomplishments by the Camp Learning pupils are as follows:

1. The Camp Learning staff should renew its efforts to incorporate reading skills within the content areas taught during the two camping sessions and during Winter Quarter when the Camp Learning staff makes weekly visits to the classrooms. Hopefully, the incorporation of reading skills, when and wherever relevant, will add additional increments to the reading scores of the pupils.

2. During all camping and regular classroom instruction, the Camp Learning staff should involve pupils in units of study which would improve the human relations skills of the pupils.

3. The Camp Learning staff and the participating schools should reassert their efforts to have the sixth grade pupils perceive the Camp Learning experience as an inherent part of the sixth grade curriculum.

4. Changes in attitudes about persons of other races should be measured by instruments designed specifically for that purpose.

5. A renewed effort to involve parents of the sixth grade pupils in camp visits and school activities should be the joint responsibility of the Camp Learning staff and the participating schools.

The second category of recommendations, labeled as policy recommendations, are more global and relate to all Atlanta schools with sixth grade pupils. The recommendations are as follows:

1. A Camp Learning Committee should be established by the Superintendent to observe the Camp Learning Program as it now operates and to investigate other camping programs in other school systems. (Cobb County, for example, operates a camping program for all fifth grade pupils.) Special attention should be directed to the components of the ESAA Camp Learning which do not, in reality, "cost" the School System additional money.

2. The Atlanta Public Schools should investigate the purchase of a camping site which it could use for future camping experiences and which could be leased by other groups when it is not in use by Atlanta Public Schools' personnel.

3. The Camp Learning Program should be the topic of one of the Superintendent's televised reports to the public.
ESAA PILOT — PART II, CULTURAL ADJUSTMENT

INTRODUCTION

The Atlanta Public Schools received a grant in the amount of $98,798 through the Emergency School Aid Act (ESAA) to fund the ESAA Pilot Project, Part II (Cultural Adjustment). This project extended the services provided through general funds for non-English-speaking pupils and pupils with first language interferences. It also provided special services for native Spanish-speaking pupils.

Population Benefited from Assistance

This project was designed to serve pupils whose dominant language was not English. Of these pupils, 123 were pupils whose native language was Spanish. Table 2.1 shows, by languages, the number of non-English-speaking pupils or pupils of foreign descent who were served by the project.

Achievement of Objectives

Prior to the ESAA Pilot, Part II grant, immigrant pupils, non-English speaking, or those with first language interference were assigned to regular classrooms, and limited special opportunities were provided for instruction in English usage. Further, very limited experiences were provided for enabling pupils to maintain their cultural heritage. These factors compounded problems (peer isolation and educational achievement) stemming from communication barriers and lack of understanding of cultural differences.

Based on these facts, the major purpose of the ESAA Pilot Project, Part II (Cultural Adjustment) was to reduce isolation and educational problems related to non-English-speaking pupils and those pupils who have first language interference. Thus, the project proposed to provide many and varied experiences to foster understanding of varying cultures, specifically, American and the cultures represented by the immigrant pupils. Further, the project proposed to enrich and extend existing services designed for the development and improvement of English language skills of these pupils.

Toward the accomplishment of the overall goal, specific objectives and activities were designed. The objectives, related activities, evaluation methods, and findings which report actual accomplishments and reasons for slippage in outcomes were as follows.
Objective I — English Usage

At the conclusion of the 1975-76 school year, pupils studying English as a second language in the ESAA Pilot, Part II project will exhibit one month's gain in English usage (reading vocabulary, grammar, and comprehension) per month of instruction as measured by the Iowa Tests of Basic Skills.

Activities

A project room was established for the overall Cultural Adjustment Project. The lead teacher, working from this project room, coordinated project activities and provided staff development activities for the project staff. Materials such as films, tapes, programmed lessons, and books geared to meet the needs of the pupils were furnished through the project room to the schools serving the project pupils. The project room served as a core for the project system wide.

In the school with a high concentration of non-English-speaking pupils, a resource room was established and an English-to-Speakers-of-Other-Languages (ESOL) teacher was assigned to provide instruction. In other schools, with too few pupils to merit a full-time ESOL teacher, the teacher divided her time among project schools. Again, this project extended regular budget services which operated basically under the same structure of the project.

In either instance, whether part time or full time, the ESOL teacher served as a resource to the regular instructional program. Pupils were cycled into instructional groups for varying periods of time during the regular day. The sizes of the groups varied according to the number of immigrant pupils in the school and their age levels. It was most common for students who speak different languages to be in the same group. This was considered an advantage since (1) the grouping arrangement permitted the students to observe the similarities and differences in languages in addition to broadening understanding of varying cultures and (2) the ESOL teachers, while not being able to speak every language, did possess a practitioner's knowledge of the disciplines taught and an understanding of the importance of each culture represented.

A wide variety of activities were provided to:

1. Introduce various ethnic customs and ideas to the student body through mini-units prepared with the help of foreign members of school and community.
2. Offer newly arrived foreign students and their families a unique opportunity to actively participate in class projects, contributing their cultural heritage and experiences.
3. Enrich Social Studies Program with original artifacts and first-hand input by "teachers" who come from many of the countries being studied.
4. Involve total class or groups of children in learning centers that encourage participation in different cultural projects prepared with the guidance of foreign students and/or community members.
5. Utilize human resources in school and community to familiarize school with many cultures prevented therein through meaningful programs.
6. Instill new sense of pride in American children as they compare and contrast their own heritage with that of their new friends through discussions, programs, learning activities, arts and crafts projects, field trips, etc.
7. Help the newly arrived foreign students and their families feel a very real and important part of their new school community by asking them to share their culture with student body and faculty.

Specific activities to yield the desired learning experiences included the following:

1. A survey was taken of the talents and interests of foreign students and their families. Based on this information and the availability of the persons, activities included the following:
   b. An Indian mother taught a fourth grade class Indian folk songs and folk dance.
   c. An Indian mother helped group of girls make Saris.
   d. Korean students taught their respective classes a Korean song, with the help of their father's phonetic translation of the Korean lyrics to English.
   e. A Chinese couple cooked, in class, a Chinese meal — complete with menu in Chinese, cooking instructions, and a lesson in the fine art of using chopsticks.
A Greek mother worked with the physical education teacher, helping students learn several Greek Christmas and Easter customs and baked for the children some delicious Greek pastries.

Many Latin American families sent the school an assortment of handmade crafts from their countries to be used in a display during Pan American Week for the benefit of the whole school.

A Philippine girl taught a group of students "Tinikling," a native folk dance from her country.

A Zambian father visited a kindergarten class to share pictures, folk tales, and musical instruments from Zambia with excited youngsters.

A Spanish mother provided a class with a comprehensive selection of Spanish folk music from Spain’s different regions for general listening pleasure.

An American missionary to Mexico gave a talk and slide show on the Aztec treasures and ruins.

A Japanese minister visited a class to speak with them about many aspects of life in Japan. He brought many beautiful Japanese costumes to share with children.

Shy and often non-English-speaking parents were most cooperative when invited to accompany children on field trips around the city and vicinity.

Foreign students from other schools were invited to share their talents and/or experiences with class or school.

Panel discussions on topics of interest (school, dating customs, life styles, etc.) were organized, using foreign students along with their peers as panel members.

Students were involved in art projects that focused on different art styles evident in foreign folk art and displayed work in school.

An international Christmas tree was decorated. Each class picked a country to represent and made fitting decorations.

A wide assortment of movies, filmstrips, and books (fact and fiction) were used to broaden pupils' understanding of their foreign classmate's heritage.

Copies of paintings by famous foreign and American artists were checked out from the public library, periodically, and students were encouraged to do research on artist's background, subject matter, and use of art materials.

Children brought in foreign language publications (magazines and newspapers) to supplement unit on communication. Class compared and contrasted foreign publications with Atlanta ones, with the help of built-in translators and commentators. (Focus was placed on format, content, tone, language used, slant on information printed; etc.)

In addition to concepts of cultural differences, English was taught as a second language in order for immigrant pupils to make proper adjustments in their regular American classrooms. These instructional activities basically were designed to teach the students conversational sentence patterns, English vocabulary, and reading skills. Individualization of instruction was imperative because of the varying levels of the pupils.

Test Results

Upon enrollment in the English-to-Speakers-of-Other-Languages (ESOL) activities, each student was given a diagnostic test to determine mastery English usage skills. Also, after the completion of a given level, a posttest in English usage was administered. The data in Table 2.2 show the pretest and the posttest per cent of correct responses for each test administered. These data show that at each level the students performed at a greater level of proficiency on the posttest than on the pretest. The students studying English usage developed more proficient English usage skills.

The Iowa Tests of Basic Skills was administered to immigrant pupils who could read English well enough to take the test. Because of the varying levels of the pupils, instead of using grade levels, age levels were used for comparison purposes. Consequently, an age achievement quotient (AAQ) was used. AAQ is a comparison of the pupil's test performance with the performance of children of his age level. Therefore, rather than gain in months (as indicated in the objective), gain in age achievement quotient was computed.

The data shown in Table 2.3 show the performance of project participants whose English usage facility was sufficient to enable them to take the ITBS. These data show that 16 per cent of the participants who took the test showed a gain of approximately five points in AAQ.

AAQ is the ratio of actual performance to age norm. Therefore, for the AAQ to remain constant, the pupil must make a month-for-month gain. While the gain is not shown by months, the gain in AAQ indicates that 16 per cent of the participants exceeded the objective of a one-month gain for each month of instruction as verified by the fact that the average gain in AAQ for 19 participants was about five points. While all participants did not obtain the objective, the success of the project is supported by the fact that 16 per cent of the participants, despite language barriers, exceeded the objective.

Objective II — Spanish Skills

At the conclusion of the 1975-76 school year, pupils studying Spanish as a native language in the ESEA Pilot, Part II, Cultural Adjustment Project, will exhibit a one-half month's gain in Spanish usage per month of instruction as measured by the Spanish Language Placement Test.

Activities

Many activities were provided for native Spanish-speaking pupils in an effort to develop and/or motivate an awareness of Latin American culture.

The fact that the largest portion of the immigrant pupil population was Spanish-speaking was the basis for providing instruction in Spanish usage. Activities centered around teaching Spanish usage skills as a cultural aspect.

Classes were scheduled daily for approximately 30 minutes per period. The diagnostic-prescriptive methodology was used. Each pupil was given a diagnostic inventory in Spanish to determine his level of usage in the areas of reading, vocabulary, grammar, and comprehension. A prescription for instruction was then formulated and implemented by the teacher of Spanish-to-Spanish.

Test Results

The diagnostic test was used to measure mastery of Spanish usage skills. This test did not yield grade equivalent. Consequently, the objective of one-half month's gain per month of instruction was not assessed per se. The performance of pupils was assessed in terms of increase in level of mastery of skills. (See Table 2.4.) At each level, elementary, middle, and high school, the data show that pupils performed higher on the posttest than on the pretest. The increase made by each group in the per cent of correct responses indicates substantial growth in mastery of Spanish usage skills which leads to the assumption that the equivalence of the objective was met.

Social Adjustment

One underlying goal of the ESAA Pilot, Part II Project was to provide services for immigrant pupils which would aid them in making appropriate adjustment in English-speaking schools. Toward this goal, activities were designed to provide materials and methods for instructional improvement, to enhance the understanding of cultures, to provide some social services for parents of these pupils, and to facilitate community involvement.

Toward this end, a project resource room was established to provide in-service training for teachers of immigrant children and to provide them with materials needed for instruction. Through the resource room, instructional assistance was also provided to teachers in schools with isolated cases of immigrant pupils. Further, the project staff served the community, in many instances, as interpreters in securing needed social services and providing opportunities for exchange of cultures within the community.

CONCLUSIONS

Based on the success of the activities as indicated by the reactions of the staff, teachers, and parents and the performance of the pupils, the following conclusions were drawn:

1. The services provided through ESAA Pilot, Part II (Cultural Adjustment Project) served a definite need of the School System by extending existing services to immigrant pupils. The pupils were involved in varied activities designed to promote social adjustment and to assist them in functioning academically in their English-speaking classroom situations.

2. Pupils studying English as a second language increased their proficiency in English usage skills.
3. Pupils studying Spanish as a native language increased their levels of skills in Spanish usage.

4. Special services were provided to improve the levels of interaction between parents of immigrant pupils and the school. The project staff served as interpreters in PTA meetings and sponsored community activities to promote the exchange of cultural heritage within the community.

RECOMMENDATIONS

In that the participants in this project were pupils who must function in an educational setting where the language is different from theirs and whose parents could easily be alienated from the schools because of language barriers, it is recommended that:

1. Special instructional services be continued and increased.
2. Social services be continued as a vital part of project activities.
3. Staff personnel continue to develop and critique activities, methods, and materials in terms of adaptability to varying situations.
4. Staff personnel continue to develop and revise diagnostic tests to insure appropriate instructional activities to meet specific needs of pupils.

SELF APPRAISAL INVENTORY
Intermediate Level

Directions
Please show whether each statement in this booklet is true or untrue for you by marking one of the spaces by each statement.

For Example:
1. I like cherry pie.  True  Untrue
2. I want to be a movie star.    

There are no right or wrong answers, so respond to each item as honestly as you can. Do not write your name on your booklet.

Self Appraisal Inventory

1. I like to try new things.   True  Untrue
2. I am getting along with my teachers.   True  Untrue
3. Behavior is fairly easy for me.   True  Untrue
4. I am satisfied with what I am.   True  Untrue
5. I wish I got along better with other children.   True  Untrue
6. I often get in trouble at home.   True  Untrue
7. I usually like my teachers.   True  Untrue
8. I am a cheerful person.   True  Untrue
9. Other children are often mean to me.   True  Untrue
10. I do my share of work at home.   True  Untrue
11. I often feel upset in school.   True  Untrue
12. I often let other kids have their way.   True  Untrue
13. Most children have fewer friends than I do.   True  Untrue
14. No one pays much attention to me at home.   True  Untrue
15. I can always get good grades if I want to.   True  Untrue
16. I can always be trusted.   True  Untrue
17. I am easy to like.   True  Untrue
18. There are times when I would like to leave home.   True  Untrue
19. I forget most of what I learn.   True  Untrue
20. I am popular with kids my own age.   True  Untrue
21. I am popular with girls.   True  Untrue
22. My family is glad when I do things with them.   True  Untrue
23. I often volunteer in school.   True  Untrue
24. I am a happy person.   True  Untrue
25. I am lonely very often.   True  Untrue
26. My family regrets my ideas.   True  Untrue
27. I am a good student.   True  Untrue
28. I often do things that I am sorry for later.   True  Untrue
29. Older kids do not like me.   True  Untrue
30. I behave badly at home.   True  Untrue
31. I often get discouraged in school.   True  Untrue
32. I wish I were younger.   True  Untrue
33. I am always friendly toward other people.  
34. I usually treat my family as well as I should.  
35. My teacher takes to feel I am not good enough.  
36. I always live being the way I am.  
37. Most people are much better liked than I am.  
38. I cause trouble to my family.  
39. I am slow in finishing my school work.  
40. I am often unhappy.  
41. I am popular with my own.  
42. I know what is expected of me at home.  
43. I can give a good report in front of the class.  
44. I am not as nice looking as most people.  
45. I don't have many friends.  
46. I sometimes argue with my family.  
47. I am proud of my school work.  
48. If I have something to say, I usually say it.  
49. I am among the last to be chosen for teams.  
50. I feel that my family always trusts me.  
51. I am a good reader.  
52. I don't worry much.  
53. It is hard for me to make friends.  
54. My family could help me in any kind of trouble.  
55. I am not doing as well in school as I would like to.  
56. I have a lot of self control.  
57. Friends usually follow my ideas.  
58. My family usually talks about me.  
59. I tend to nod in front of the class.  
60. I often feel ashamed of myself.  
61. I wish I had more close friends.  
62. My family often expects too much of me.  
63. I am good in school work.  
64. I am a good person.  
65. Sometimes I am hard to be friendly with.  
66. I get upset easily at home.  
67. I like to be called on in class.  
68. I wish I were a different person.  
69. I am fun to be with.  
70. I am an important person to my family.  
71. My classmates think I am a good student.  
72. I am sure of myself.  
73. Often I don't like to be with other children.  
74. My family and I have a lot of fun together.  
75. I would like to drop out of school.  
76. I can always take care of myself.  
77. I would rather be with kids younger than me.  
78. My family usually considers my feelings.  
79. I can disagree with my teacher.  
80. I can't be depended on.

V. INSTRUCTIONAL MATERIALS
A. Textbooks
B. Supplementary Readers
C. Workbooks
D. Audio-Visual Programs
I. ESOL CENTERS

In the past several years the city of Atlanta has acquired an increasing number of international visitors and residents. To deal with this situation, the Atlanta Public Schools offers an ESOL (English to Speakers of Other Languages) program wherein a non-English-speaking child is afforded the opportunity to acquire a meaningful education.

Because of the limited number of ESOL centers, the students who would need this kind of program have the right to attend a school which offers ESOL classes, even if it means crossing area lines.

II. DEFINITION OF AN ESOL STUDENT

The first step to be taken upon enrollment of a non-English-speaking student is a preliminary evaluation by an ESOL teacher of the child's English language proficiency.

If the student has had little or no English instruction in his native country, the teacher will try to place him in as many ESOL classes as are offered in high school. He will also be placed in other classes, such as math, p.e., art, etc., where a large amount of verbalization is not required, and where he will also be obtaining credits.

The student who has had a certain number of years of English instruction in his native country will be placed in one or two ESOL classes, depending on his particular needs. With the advanced student, an ESOL class may only be necessary for a quarter or so, as a means to help the student make the transition in language and culture.

III. IMPORTANCE OF TEACHER-PARENT RELATIONS

After the teacher has acquainted himself with her students and their needs, she will try to visit their homes and meet with their parents. In this meeting she can inform them of the services available to them, such as ESOL classes for adults. If the parents are Korean, Chinese or Spanish-speaking, she will make available to them a handbook, written in their native language, of the rules, regulations, and other important information about the City of Atlanta high schools. If the teacher does not speak the language of a particular family, she will try to find someone who does and is willing to act as interpreter, hopefully throughout the year. The teacher will keep in contact with the family and help out in such situations as a visit to the doctor, filling out immigration papers, etc.

IV. DIAGNOSIS AND CLASSIFICATION OF ESOL STUDENTS

In order for the teacher to select the methods and materials to be used with each student, she will administer a diagnostic test, which will also serve as a pretest and posttest. This will help her determine the particular needs of the students as far as skill development is concerned. For example, will there be an emphasis on listening and speaking only, emphasis on reading, etc.?

Because the first approach to language should be through the ear, the teacher's role with the beginning student will demand a lot of her personal time and attention. At the same time, she has other students in the classroom who are at more advanced levels, but who also require her undivided attention. Even though an ESOL class may have only thirteen students at one time, this constitutes for thirteen different levels because of the varied linguistic and educational backgrounds. Added to this is the fact that the teacher has to divide her time between schools and sometimes cannot meet all of her students' needs.

To try to cope with this situation the ESOL teacher can use some audio-visual equipment available to her, such as tape recorders, flashcard readers, and filmstrips — these give the additional practice needed to reinforce the material she has presented. The teacher can also avail herself of student aides who can help with particular students. Oral practice in pairs can also be used effectively with material already introduced by the teacher. In another situation, a more advanced student can help one with less proficiency and at the same time practice his own skills and gain confidence in himself.

V. THE ESOL TEACHER AS A LIAISON IN THE SCHOOL

The ESOL teacher must also act as a mediator between the students and other teachers and school personnel. In some cases, there is a lack of sensitivity to the problems of the culturally different child, and it is up to the ESOL teacher to try to alleviate the tension, and hopefully open up the channels of communication.

At the same time, the ESOL teacher should make herself available to try to help the students with any difficulties they may have in other subjects. This is sometimes difficult to do because of her limited time at each school.
VI. CONTRASTIVE ANALYSIS IN THE ESOL PROGRAM

It is desirable that the ESOL teacher, who has many different nationalities in one room at one time be well informed about the first language of all her students. Contrastive analysis, which is a technique for organizing the facts of structural congruence between two language systems, provides the teacher with better understanding of the specific needs of her students in struggling to master the patterns and structures of American English.

This understanding can help the teacher who, for instance, is presenting the English post-tonic "t" and "d" in words like "Betty" and "meadow" to Spanish-speaking students. If the teacher knows that the most similar Spanish sound is not "t" or "d," but "r" as in "beriberi" and "mero," and makes the comparison, she can obtain a more acceptable pronunciation. (Note: The Spanish "r" is not equivalent to the English "r.")

Learning problems exist not only in the area of pronunciation, but in the grammar of every language. For example, the Chinese language has no articles. (Although it has many classifiers used before a noun and after a number.) This presents a difficulty for Chinese speakers in dealing with "a," "an," and "the" in simple sentences like "I'm going to the store."

The ESOL teacher, then, through some knowledge of the native tongue of her students, can better understand and even anticipate the kind of difficulty they are most likely to encounter.

VII. THE ESOL TEACHER AS A LIAISON IN THE COMMUNITY

Because English is the language of school instruction and of the surrounding community, it must be learned quickly. Attention and priority are given by the teacher to the structure and vocabulary items needed not only for participation in other classes, but also for making a smoother and faster personal adjustment in their communities.

It is therefore important that through the teaching of the English language, they are also introduced to the cultural similarities and differences. These will not only bring about cross-cultural respect and awareness, but also will facilitate the learning process as it becomes meaningful to them. To reinforce this approach to language learning, the ESOL teacher uses activities such as field trips, informal gatherings with American students, international clubs, and demonstrations of native songs and dances in a most effective and enjoyable manner.

It is very important also that the student retain pride in his own culture as he makes his adjustment to the language and culture of native Americans.
in defining the aims and goals of the ESOL program in the Atlanta secondary schools, we have followed the recommendations given by Mary Finocchiaro in English as a Second Language: From Theory to Practice. The objectives proposed by Ms. Finocchiaro are designed to help the non-English-speaking student recognize and produce language which is not only correct, but also appropriate in the social situation in which it is being used.

I. AIMS

A. The progressive ability to understand the English he/she would use at his age when spoken by a native English speaker.
B. The progressive ability to carry on a conversation with a native English speaker on topics of interest to persons of his age group.
C. The progressive ability to write correctly and perhaps creatively in English.
D. The information, knowledge, attitude, and insight to appreciate the cultural similarities and differences (if such exist) of English-speaking people.

II. LEVELS

The levels we have designated for this program range from I to V, and correspond with the course of study presented in Robert Dixon's Modern American English series.

Level I is designed for the student who has had little or no English instruction in his native country. This is the beginners level.

Level II would fall in the Intermediate category, and Level III in the intermediate—advanced category.

Levels IV and V are for the advanced students who could probably be placed in a regular English class, but who for a number of reasons have been assigned to an ESOL class. In most cases, the students are new arrivals who have completed a few years of English instruction in their native countries, but need reinforcement in using and understanding spoken American English. At the same time, they may need the reassuring and comfortable atmosphere of an ESOL class while making the transition in language and culture.

In this level you will also find students who have previously been enrolled in an ESOL program, and have once again been assigned or chosen to come back to an ESOL class. Some of the reasons for this are: (1) a need to reinforce certain basic skills, (2) heavy teacher loads in regular English classes, and (3) difficulty in adjusting to a regular English class.

III. EACH LEARNING LEVEL SHOULD INCLUDE:

A. An analysis of its aims and goals (the terminal behavior the students will be expected to acquire).
B. A list of the language items to be taught (phonology, structure, and vocabulary).
C. A list of the cultural concepts to be discussed.
D. An analysis of the language skills to be developed (listening, speaking, reading, and writing).
E. A description of the activities and meaningful situations through which the language items will be introduced and practiced.
F. Suggestions for evaluation (testing) of the pupils' language growth.
G. Sources for teacher reference and pupils' texts.

IV. PRIORITY IN THE CURRICULUM SHOULD BE GIVEN TO:

A. All the sounds and the entire phonemic system.
B. The basic word-order structure.
C. The inflections which are most frequent.
D. The function words.
E. The vocabulary which: (1) will help the students practice the structures; (2) is useful in the pupils' immediate lives and environment; and (3) will strengthen their conviction that English can be used to express the same ideas they express in their native tongue.
I. THE SOUND SYSTEM

A. The vowel and consonant sounds in English

1. Vowels — Modern American English recognizes and studies twelve different vowel sounds; five of these the basic vowels and seven other vowel sounds indicated by sounds of the IPA. However, it is recommended that all the vowel sounds in English be taught.

2. Consonants — classification of consonants as voiced or voiceless, and the teaching of the cognates.

B. The two basic intonation patterns

1. Rising-Falling Intonation
2. Rising Intonation

C. The characteristic stress and rhythm of English (reduced and contrasted forms in the grammatical patterns taught.

II. STRUCTURE

A. Verbs and Verb Phrases:

1. Statements with the verb to be:
   This is not a house. This is a chair. What is this?

2. Negative Statements:
   This is not a house. This is a chair. This is a shoe.

3. Question Form:
   Is this a shoe? No, this is not a shoe. This is a house.

4. The Simple Present of BE with contractions and pronouns:
   I am a teacher.
   Mary is a student. She is a student.

5. To Be — Negative Form with Contractions:
   I am not a student. I'm a teacher.
   This is not a window. This is a book.

6. To Be — Question Forms:
   Are we Americans or Mexicans? We are Mexicans.
   This is a box. Is this a box?

7. Simple Present Tense with Other Verbs:
   Every day I walk to school.
   John likes apples.

8. Present Continuous Tense of "Regular" Verbs in Statements:
   I am putting on my hat.
   John and Henry are playing tennis.

9. Present Continuous Tense — Negative Forms:
   I am not studying French now. I am studying English.

10. Present Continuous Tense — Question Form:
    Is it raining now? Is it raining now?

11. Simple Present Tense — Negative Form:
    She does not walk to school with Helen. She walks to school with Kay.

12. Simple Present Tense — Question Forms:
    Do you like to swim?
    They live near the school. Do they live near the school?
LEVEL I

13. Past Tense of TO BE in Statements, Negative and Question Forms:
   - John was absent from class yesterday.
   - John wasn't absent from class yesterday.
   - Was John absent from class yesterday?

14. Past Tense of Regular Verbs:
   - They arrived in Washington last night.

15. Past Tense of Irregular Verbs:
   - She left for school at eight o'clock.

16. Past Tense — Negative and Question Forms:
   - Our team won the game. Our team didn't win the game.
   - The plane left at two o'clock. Did the plane leave at two o'clock?

17. Future Tense with WILL in Statements, Negative and Question Forms:
   - We'll meet you at noon.
   - We won't meet you at noon.
   - Will we meet you at noon?

18. Future Tense with TO BE GOING TO in Statements, Negative and Question Forms:
   - They're going to move soon.
   - They're not going to move soon.
   - Are they going to move soon?

C. Inflections:

1. Plural Forms: regular and irregular forms:
   - One book - two books
   - One man - two men
   - This is a book. These are books.

D. Function Words:

1. Question words (WH) such as: who, what, where, when, how, how much, how many, how long, which, why, what time:
   - When did you arrive in the United States?
   - How much does the dress cost?

2. Prepositions — Modern American English presents a very limited number of prepositions in Level I, but we recommend the following list to be taught at this level:
   - In, on, at, for, from, of, with, by, near, into, in front of, behind, beside, to, up, down, outside, inside, far from, a long way from, above, under, between, about.

3. Determiners (a, an, the, this, that, these, those):
   - a table — an hour
   - a book — this book
   - this car — these cars
LEVEL I

4. Conjunctions (coordinating): and, but, or:
   You can study or read a book.
   He is at school today, but not in class.

5. Personal Pronouns:
   Mary is in the library. She is in the library.

6. IT and THEY with neuter antecedents:
   The book is on the table. It's on the table.
   Classes begin at nine o'clock. They begin at nine o'clock.

7. Possessive Adjectives:
   John studies his English book.
   Possessive form of Nouns:
   The friend of Henry - Henry's friend
   The desks of the students - the students' desks

8. Personal Pronouns - Object Forms:
   I often see Mary on the bus. I often see her on the bus.
   He walks to school with John and Henry. He walks to school with them.

9. Use of THERE IS and THERE ARE:
   A book is on the table. There is a book on the table.

E. Responses:

1. Short Answers — Negative and affirmative forms with verbs taught:
   Are you Mexican? No, I'm not.
   Does she live near you? No, she doesn't.
   Did they go with you? Yes, they did.

   Basic Information Questions:
   Where do you live? Where does your father work? Where do you go to school? What is your name?

2. Formulas of Courtesy, Agreement, Disagreement, Regret, Surprise, Excitement, Pleasure, etc.:
   How do you do? Of course. I'm sorry. Really?

3. Greetings and Leave-takings
   Hello! Good evening. See you tomorrow.

4. Numbers — 1 to 1,000; names and uses; cardinal and ordinal; in addresses, dates, quantities, etc.

5. Days of the Week

6. Months of the Year

7. Seasons of the Year

8. Colors and Clothing (seasonal changes, sizes, kinds, etc.)

9. Parts of the Body

10. Animals — Domestic and Farm (most common ones)

11. Telling Time (using expressions such as, "in the morning," "at night," "P.M."

12. Weight, Sizes, Measurements

13. Money
III. VOCABULARY (CULTURAL) CONTENT
The vocabulary content presented in this curriculum guide corresponds with the guidelines given in Finecocharo's and Bonomo's The Foreign Language Learner: A Guide for Teachers. It is not intended to be an all-inclusive list, and should be adapted by the teacher to her own students' needs.

As with the different items of structure, all the vocabulary around a topic should not be taught at one time. Instead, the "spiral approach" should be used; in this method, the students are gradually introduced to new vocabulary or structure around a topic. Again, it is up to the teacher to decide how much information each student can deal with at one time.

A. Opposites of words taught:
up - down
day - night

B. Introductions and Identifications:
1. Greetings, leave-takings, introductions
2. Identification of self and others
3. Address and age

C. The Classroom:
1. Names and locations of parts of the room
2. Instructional materials
3. Identification of activities (reading, listening, repeating, etc.)
4. The program (hours for various subject areas; activities in and out of class)
5. Common classroom expressions ("Please open your books," etc.)

D. The School:
1. Name of school (and address)
2. Location of rooms and special places in the building (gym, clinic, office, restrooms, etc.)
3. Rules and regulations (fire drills, lunch hour, time of arrival, use of assigned smoking areas, etc.)

E. The Family:
1. Names of immediate family members
2. Relationships and ages
3. Occupations of various members (should know parents' place of work and telephone number, in case of emergency)
4. The home —
   a. Rooms and their uses
   b. Furnishings
   c. Daily activities (I get up at 7 o'clock, etc.)

F. The Immediate Community:
1. Nonresidential buildings (offices, movies, library, stores, etc.)
2. Transportation facilities (bus, taxi)
3. Communication facilities (telephone, mail, newspaper, radio, television)
4. Consumer services (stores, banks, etc.)
5. Places of recreational interest (parks, libraries, community centers, movies, etc.)
I. THE SOUND SYSTEM

Review all the sounds and the two basic intonation patterns. Work on increased fluency in increasingly longer sentences, and on stress and rhythm.

Introduce:

A. Change in stress when noun complements are replaced by pronouns:
   
   He bought the present. He bought them.

B. Pronunciation of S and Z:
   
   bus (s) - his (z)
eats (s) - comes (z)
what's (s) - he's (z)

C. Pronunciation of final voiced consonants:
   
   hurt - heard
   back - bag

D. Pronunciation of past tense of regular verbs:
   
   wait - waited
   ask - asked
   play - played

E. Minimal pairs:
   
   said - shed
   bit - beet
   put - Pete

II. STRUCTURE

A. Verbs and Verb Phrases:

   Review all the verb forms introduced in Level I.

   Introduce:

   1. Imperative form of verbs. Negative and question forms with contractions;
      all the different ways in English to make the imperative form more polite:
      
      Please wait here. Wait here, please.
      Will you please wait here? Wait here, will you, please?
      Don't go. Please, don't go.

   2. Present Perfect form of verbs. Negative and question forms. Different uses, such as:
      
      Helen has written those letters.
      They have lived in the same house for ten years.
      They have lived in the same house since 1963.

   3. Past Perfect Tense. Negative and question forms; contractions with HAVE, HAS, HAD:
      
      They had gone when we arrived.
      He said that he'd not seen that movie.

      Use of SAY and TELL:
      
      Mr. Smith said that he was busy.
      Mr. Smith told us that he was busy.

   4. Past Continuous Tense. Negative and question forms:
      
      It was raining when we got there.
      Mary wasn't working when I called.
      Was he talking to you?
5. Use of TO HAVE TO. Negative and question forms in the present, past, and future tenses:
   He must leave at one o'clock.
   He has to leave at one o'clock.

6. Two-Word Verbs such as take off, put on, get on:
   He is taking off his hat.
   I have to get on the bus at this corner.

B. Inflections:
1. Possessive Pronouns:
   This pen belongs to her. This pen is hers.
   Question form with the use of WHOSE:
   This book is John's. Whose book is this?

2. Reflexive Pronouns: Two forms: Reflexive form:
   The little girl dresses herself every morning.
   Emphatic use:
   Mary herself will do the work.
   Reflexive pronouns used with the preposition BY to give the meaning of alone:
   I like to study by myself.

3. Relative Pronouns WHO and WHICH:
   The boy who studies with me is my brother.
   The book which is on the desk is John's.

4. Count and Mass Nouns: Affirmative and negative uses of some quantity expressions such as: a lot of, some, a long way, too, much, many, any, far, either, few, little:
   Give me the books. I need water.
   I have some pencils in my pocket. I don't have any pencils in my pocket.

5. Comparative and Superlative Form of Adjectives. Regular and irregular forms:
   Helen is a beautiful girl. Helen is more beautiful than Mary.
   Helen is the most beautiful girl in our class.

6. Adjectives and Adverbs: emphasis on GOOD and WELL:
   Joe is a slow speaker. Please speak slowly.
   He is a good student. He speaks English well.

C. Function Words:
1. Use of Auxiliary Verbs. Negative and question forms of CAN, MUST, MAY, and SHOULD: Difference in the use of MAY and CAN.
   May I go outside, please? Henry can drive a car.
   He should go to the doctor soon. Should he go to the doctor soon?
   Use of MAY to show possible future action:
   I may visit you tonight.

2. Verb followed by two complements (objects):
   He gave her a book. He gave it to them.
LEVEL II

D. Responses:

1. Short answer form. Affirmative and negative form with verbs taught:

   Have you seen that movie? No, I haven't.
   Were you listening? Yes, I was.

2. Communication facilities:
   a. The telephone (how to make local and long distance calls; how to take advantage of special rates; how to use yellow pages; etc.)
   b. The mail (location of nearest post office; different kinds of mail and services; etc.)
   c. Television (information on special bilingual programs; discussions of favorite programs; etc.)

III. VOCABULARY (CULTURAL) CONTENT

A. Opposites of words taught at this level

B. The Schools:

1. School activities (clubs, general organization, assembly programs, newspaper, games, etc.)

2. Procedures and requirements (how to join a club or sign up for a sport; hours needed towards graduation, required courses, electives, etc.)

C. The Family:

1. Names of more distant relatives and relationships

2. Activities and likes or dislikes of family members

3. The home —
   a. Meals (items, hours, customs of U.S. and other countries)
   b. Jobs and duties around the household
   c. Rules and regulations around household

D. The Community:

1. Transportation facilities —
   a. Bus schedules and how to read them
   b. How and who to call for taxi service
   c. Orientation of city (with maps, field trips, etc.)

LEVEL II

2. Communication facilities —
   a. The telephone (how to make local and long distance calls; how to take advantage of special rates; how to use yellow pages; etc.)
   b. The mail (location of nearest post office; different kinds of mail and services; etc.)
   c. Television (information on special bilingual programs; discussions of favorite programs; etc.)

3. Consumer Services —
   a. Banks (different kinds of accounts; how to write a check; how to make deposits, withdrawals, etc.)
   b. Stores (kinds and names of products bought at each, etc.)

4. Shopping —
   a. Money
   b. Courteous expressions
   c. Expressions of quantity

5. Local government agencies (post office, police station, courthouse, unemployment office, etc.)
I. THE SOUND SYSTEM

Review all the sounds and the two basic intonation patterns. Work on increased fluency in progressively longer sentences, and on stress and rhythm.

Work on the pronunciation of minimal pairs, such as:

- see and she
- sell and shell
- (s) and (z)
- Sue and zoo
- ship and chip
- sip and zip
- shop and chop
- sing and thing
- sink and think
- those and those
- (w) and (v)
- wet and vet
- ball and bet
- hair and hitch
- where and which
- ill and hill
- will
- (w) and (v)
- (b) and (h)
- (hw)
- (w)
- (Vowel sound)
- (b)
- (w)

II. STRUCTURE

Review the structures taught at Levels I and II, working on greater ease and fluency and for a more sustained response; that is, for more than one statement or question as a response to your question or statement.

A. Verbs and Verb Phrases:

Review all the verb forms introduced in Levels I and II.

Introduce:

1. Present Perfect Continuous: Negative and question forms

   *Hes showed him the school. He's been showing him the school.*

   *Have you been walking? No, I haven't been walking.*

2. Future Continuous with WILL: Negative and question forms

   *They'll play here next week. They'll be playing here next week.*

   *Will they be playing here next week?*

3. Equivalents for modal auxiliaries CAN, SHOULD, MUST, with contractions:

   *I can come tomorrow. I'll be able to come tomorrow.*

   *We should start back soon. We ought to start back soon.*

   *I must finish this homework now. I have to finish this homework now.*

4. Passive Voice with BE: Negative and question forms; present and past tenses

   *John made that box. That box was made by John.*

   *Was that box made by Joe? No, that box wasn't made by Joe.*

5. Passive Voice with Perfect Tenses: Negative and question forms

   *They must hold an assembly on Monday. An assembly must be held on Monday.*

6. The Passive Voice with GET: Negative and question forms

   *They were married in June. They got married in June.*

7. The Past Tense for WILL and CAN (would and could): Negative and question forms

   *They will build a new school. They said they would build a new school.*

   *I can take math some other time. I thought I could take math some other time.*
1. The verbs HAVE, GOT, and MAKE used as causal verbs:
   He had the car repaired.
   They got the gym decorated in time.
   They made us take it, please.

2. Multiple-Word Verbs; verbs that cannot be separated from the word (preposition or adverb) that follows; verbs that can be separated from the following word; and verbs that must be separated when the object is a personal pronoun:
   They're listening to the records.
   He put on his raincoat. He put his raincoat on.
   She turned on the light. She turned it on.

3. Special uses of WON'T and SHALL:
   I won't show Charles the school.
   I won't show him the school.
   Shall we go to that movie tonight?
   Shall I take math again next year?

B. Word Order:

1. Prepositional Phrases as Indirect Objects:
   He's showing Charles his school.
   He's showing his school to him.

2. The Infinitive after Adjectives; the use of IT is with these adjectives; and the use of a prepositional phrase with FOR to give the subject of the infinitive:
   It's easy to find the store.
   It's possible for us to find the store.

3. The Infinitive of Purpose to answer the question WHY:
   Why did she go to the store? To get some milk.

4. Position of ALREADY and YET in sentences with the verb TO BE and other verbs:
   They've already seen the gym.
   They haven't seen the gym yet.

5. Multiple Modifiers before a noun:
   I bought several very pretty white dresses.

6. Position of Noun Adjectives:
   She wore a very expensive winter coat.

7. Prepositional Phrases and Clauses:
   The books on the shelf are overdue.
   The books that I'm putting on the shelf are new.

8. Form and Position of Adverbs of time, place, and manner:
   I leave my book in the locker at night.
   She finished the book quickly.

9. Position of Adverbs of Frequency with the verb to be and other verbs:
   John is always busy.
   I've never seen that classroom.
   Have you ever studied algebra? No, I haven't ever studied algebra.

10. Position of STILL and ANYMORE with TO BE and other verbs:
    He's still talking to the teacher.
    He isn't talking to the teacher anymore.

11. Object Clauses after Present Tense Verbs; kinds of verbs the object clauses follow, and tense to be used with it:
    I hope that she'll wait for me.
    Our school is very different from yours.
    I think that our school is very different from yours.

12. Object Clauses after Past Tense Verbs:
    He took geography. He said that he'd take geography.
    We've seen the auditorium. I thought we'd seen the ....

C. Inflections:

1. Relative Pronouns with and without prepositions:
   The girl that I was talking to works in the library.
   The girl to whom I was talking works in the library.
2. Indefinite or Impersonal Pronouns, such as someone, anyone, no one, everyone, etc.:  
   I saw somebody in the room.
   I didn't see anybody in the room.
   I saw nobody in the room.

3. Affirmative use of the ANY-words in the sense of no matter who, no matter what. Also the NO-words as the negative for the ANY-words used in this sense:
   Anyone (no matter who) can start a club in our school.
   No one should leave school at lunchtime.

4. THEY and YOU as Impersonal Pronouns:
   They require math in the first year.
   You can buy fruit in the supermarket.

5. ONE and ONES as Pronouns:
   There are two girls in my class. The one at the blackboard is a very good student.

D. Miscellaneous Items:
   1. Possessive Form with Time Words:
      Tomorrow's lesson will be very interesting.
   2. Use of OF THE after quantity words, such as some, many, much, etc.:
      Some of the girls are here today.
      A few of the books are torn.
      I was in two of the plays last year.

I. THE SOUND SYSTEM
   Review all the sounds and the two basic intonation patterns. Work on increased fluency in increasingly longer sentences, and on stress and rhythm.

   Introduce:
   A. Pronunciation of the Medial S:
      house (S)  busy (Z)
      nurse (S)  doesn't (Z)
   B. Pronunciation of Contracted Forms as One Syllable or Two:
      I'm (1)  isn't (2)
      he's (1)  didn't (2)
   C. Positive and Negative Stress Patterns:
      We can see him later. (Affirmative)
      We can't see him later. (Negative)
   D. Intonation of Tag Endings:
      1. Confirmation of Some Fact — Falling Intonation
         You can come, can't you?
      2. Asking a Question — Rising Intonation
         You can come, can't you?
II. STRUCTURE

A. Verbs and Verb Phrases:

1. Gerunds: use with verbs that are always followed by gerunds, and verbs that may be followed by either gerunds or infinitives.
   - Do you mind bringing me a menu?
   - He likes to study French. He likes studying French.

2. Gerunds used after prepositions:
   - We are both fond of swimming.
   - He succeeded in talking with her.

3. Idiomatic Verb Phrases (to be supposed to, used to, would rather, had better):
   - Helen is supposed to arrive today.
   - He used to study in our class.
   - I'd rather watch TV than go to movies.
   - You'd better see a doctor immediately.

4. Sequence of Tenses: agreement of main verb in a sentence with all verbs of the dependent clause:
   - She says she can swim. She said she could swim.
   - He says he will return later. He said he would return later.

5. Conditional Sentences: Future-Possible Conditions, Present-Unreal Conditions, Past-Unreal Conditions:
   - If John studies hard, he will pass his tests.
   - If John studied hard, he would pass his tests.
   - If John had studied hard, he would have passed his tests.

6. Tag Enquiries used with varying intonations, to ask a question, or to invite confirmation for some fact already known by the speaker:
   - He can speak English well, can't he?
   - She isn't an American, is she?

7. Auxiliary Verbs OUGHT and SHOULD; Present and Past Tenses:
   - You should see a doctor. You should have seen a doctor.

8. Auxiliary Verbs MUST and MAY used to express strong probability and possibility in the past:
   - Mr. Smith is not in his office. He must have gone home.
   - I don't know where Charles went. He may have gone to a movie, or he may have gone home.

9. Use of Auxiliary Verbs to avoid repetition of some verb or verb phrase used earlier in the sentence. Use of TOO and SO, and EITHER and NEITHER in negative statements:
   - I like New York, and Mary likes N.Y. I like N.Y., and Mary does too.
   - I like N.Y., and Mary likes N.Y. I like N.Y., and so does Mary.
   - I don't like N.Y., and Mary does neither.
   - I don't like N.Y., and neither does Mary.

10. Use of Auxiliary Verbs in so-called balanced sentences:
    - She doesn't speak English, but he does.
    - Mary will attend class, but Helen won't.
B. Word Order:

1. Negative Questions:
   - John didn't see him.
   - Didn't John see him?
   - Why didn't John see him?

2. Question Form using WHO, WHAT, or WHICH as subject of the sentence, or modifier of the subject:
   - Who took my pen?
   - What fell on the floor?
   - Which bus goes to Broad Street?

3. Direct and Indirect Speech; questions and commands:
   - John said, "I'm very busy today." John said that he was very busy today.
   - He asked me, "Where does she live?" He asked me where she lived.
   - I said to John, "Wait for me." I told John to wait for me.

II. Structure

A. Function Words:

1. Adjective Clauses:
   - They work in a factory that makes TV sets.
   - The man to whom I reported is in New York.

2. Time Clauses: adverbial clauses of time introduced by words such as as when, before, after, while, as, since, until, and till:
   - He kept on working until he was seventy years old.
   - Business picked up when the store moved.

3. Clauses of reason or cause; because, since, as, and for used to introduce clauses of reason or cause:
   - He left New York because he wanted to teach in a smaller school.
   - That dress doesn't fit me since I am so heavy.

4. Clauses of result; clauses beginning with SO or AND SO:
   - He didn't like working for women, (and) so he gave up service jobs.

5. Clauses of Result using SO ... THAT to introduce clauses that are the result of an adjective or an adverb:
   - He is so old that he can't work anymore.

   Use of SO ... THAT with quantity words such as much, many, few, little:
   - He was offered so much money for the car that he couldn't refuse.

I. THE SOUND SYSTEM

This level has no specific exercises in the sound and intonation patterns, nor the stress and rhythm of grammatical patterns. It is recommended that individual difficulties in these areas be worked on, as well as a general review of the patterns introduced in Levels I through IV. The goal is to increase fluency in the more complex sentences.
Use of SUCH ... THAT to introduce clauses that are the results of a noun:
There was such a blast that his ears hurt.

6. Clauses of Purpose; use of SO THAT and IN ORDER THAT:
She went to business school so that she could learn typing.
She went to business school in order that she might learn typing.

7. The Infinitive of Purpose used with IN ORDER TO stress the idea of purpose:
She went to business school in order to learn typing.

8. Clauses of Concession; use of ALTHOUGH, EVEN THOUGH, and THROUGH to join contrasting ideas:
Even though he has lived in the town for five years, the people still don't trust him.
Also, the use of BUT to join contrasting ideas:
He has lived in the town for five years, but the people still don't trust him.

9. Shortened Adjective Clauses:
Every publisher in New York turned down the novel that was written by my friend.
Every publisher in New York turned down the novel written by my friend.

10. Omission of THAT used as a connective at the beginning of an object clause:
He said (that) he was thinking of retiring.
Omission of that in adjective clauses where it is the object of the verb in the clause:
The machine (that) they're using is called a harvester.
Omission of THAT in clauses of result after SO or SUCH:
He was so tired (that) he went right to sleep.

11. Shortened Adverb Clauses:
Because he ran for reelection every two years, he had to make a lot of trips back home.
Running for reelection every two years, he had to make a lot of trips back home.

12. Participial Phrases with Subjects:
He went home for the summer because the university was closed.
The university being closed, he went home for the summer.

13. The Perfect Participle:
He has to look for a job because he had stopped taking money from his family.
Having stopped taking money from his family, he had to look for a job.

14. Sentence Connectors; several different groups (addition, warning, result, concession, illustration, etc.):
He was tired. He took some work home with him.
He was tired; nevertheless, he took some work home with him.

15. Idiomatic expressions, such as:
go wrong - d.y off - side benefits -
get married - make a go of it - in charge of -
put through - take on - oversight -
ship out - stopover - framework -
III. VOCABULARY (CULTURAL) CONTENT

A. The School:
1. Educational opportunities for advanced study (College and University orientation)
2. Requirements or admission to institutions of higher learning (physical, educational, financial)
3. Scholarships
4. Training for specialized careers (vocational schools, business schools, medical schools, etc.)
5. Adult education

B. The World of Work:
1. Opportunities for employment after graduation (part-time and summer work also)
2. Requirements for various types of employment
3. Means of finding employment (agencies, letters, newspapers, governmental agencies, friends, etc.)
4. Filling out forms (application for employment, social security, pension, etc.)
5. Getting a job (dress and conduct at interview)
6. Holding a job (punctuality, performance, human relationships)
7. Labor laws, taxes, pension, rights, and responsibilities
8. Specialized vocabulary

C. Leisure-time Activities:
1. Community facilities (YMCA, public pools, etc.)
2. Hobbies—kinds (indoor and outdoor)
3. Arts, crafts, dancing, sports (where to learn, cost, etc.)

16. Use of DESPITE, IN SPITE OF
17. WHICHEVER, WHEREVER, WHATEVER
18. Punctuations
19. Spelling rules

INSTRUCTIONAL MATERIALS

For this program we have chosen to use the Modern American English series by Robert J. Dixon (Regents Publishing Company) as the basic text for classroom presentation. It has also been used as the source in the preparation of the pretest and posttest (diagnostic) in levels I through V. This series has a companion workbook and tapes for the five different levels.

In addition to this series, there are many other series specially prepared for English as a second language, and are available to the teachers in the ESOL program.

Following is a list of additional textbooks, supplementary readers, workbooks, and audio-visual programs available in the project room:

Textbooks
1. English Step by Step with Pictures, Boggs and Dixon; Regents Publishing Co.
2. English in Action, Dixon; Regents Publishing Co.

Workbooks
4. Pronunciation Exercises in English, Clarey and Dixon; Regents Publishing Co.
5. Essential Idioms in English, Dixon; Regents Publishing Co.
