This is one of three companion volumes that present the theoretical basis, instructional strategies, and participant materials for the Preparing Educational Training Consultants: Organizational Development (PETC-III) program, an instructional system for training school system organizational development (OD) consultants. This particular publication is an instructional manual for use by the senior trainer in charge of the PETC-III program. Besides outlining instructional strategies for use during the workshop activities, it also includes a sample set of memos, work assignments, and additional resources to be mailed to program participants between workshops. The PETC-III program is one of eight instructional systems that together comprise the Providing Organizational Development Skills (PODS) program, which is intended to provide educators with the knowledge, skills, and sensitivities to organize and manage educational systems in more relevant, humane, effective, and efficient ways. The eight component systems of PODS are most effective when taken sequentially; PETC-III is intended to be the last step in that sequence. The training design of PETC-III calls for five separate 3-4 day workshop sessions totaling 17 days, to be held during a period of 6-8 months. (JG)

ACKNOWLEDGMENTS

This set of materials has been under development for four years. Many individuals and organizations have contributed to its creation.

The program is an outgrowth of the Educational Intern program of the National Training Laboratories, Institute of Applied Behavioral Science.

The concepts and basic assumptions underlying the Preparing Educational Training Consultants (PETC) program were the work of Charles C. Jung during his tenure as Program Director of the Improving Teaching Competencies Program of the Northwest Regional Educational Laboratory.

We gratefully acknowledge the phenomenal efforts of Marilyn Rieff and William Ward in securing test sites and preparing participants for PETC-III training. These efforts, in themselves organizational interventions, quite literally made trying out the materials possible.

We simply could not have gotten along without the expert assistance of our secretary, Juanita Holloway, who typed the mountains of manuscript needed to make the system ready for the training sessions.

Finally, we want to thank the 61 people who "endured to the end." This group committed themselves to fulfilling all the prerequisites—comprising at least eight weeks of work—as well as faithfully attending all the PETC-III sessions and performing all the tasks asked of them. We are honored to present their names.

INTRODUCTION:
DEVELOPMENTAL HISTORY OF THE PROGRAM FOR
PREPARING EDUCATIONAL TRAINING CONSULTANTS

A training program developed by the National Training Laboratories (NTL) with the same name was the forerunner to the Northwest Regional Educational Laboratory (NWREL) program, Preparing Educational Training Consultants. This program was intended to provide educators with skills to provide school districts with the capacity to provide skills training, consulting and organizational development. The design was presented in a four-week training workshop. Its content was derived from assessment of the functions lacking in education and the availability of training techniques as well as materials from a history of human relations training and organizational development studies. The program was successfully conducted for three summers, beginning with the year 1966. The training consultant role in the NTL program was initially viewed as a way to provide linking mechanisms among and between subsystems in local districts so that procedures for improving education could be identified and implemented.

The NTL program was considered successful, but it had two major limitations for meeting a national need to provide training in the areas of skills training, consulting and organizational development. The design was exploratory from year to year as the staff changed and provided focus related to their current social science interests. Exciting new additions were experienced in the training design of any given year, but there was no assurance to trainees that they would be provided competencies in the best of what was known at the time. A second limitation had to do with diffusion. Highly skilled trainers were needed to conduct this flexible type of training system. Such trainers are rare.
and cannot be developed rapidly enough to mass diffuse the needed skills for education.

PETC programs—PETC-I, PETC-II and PETC-III—are mass-diffusible training systems for the basic skills which have been mentioned. These training systems take the expertise from the role of the trainer and put it into the training materials. They take the function of instruction from the trainer and put it into the learning activities. The trainees instruct themselves and each other. These systems include diagnostic and objective assessment tools and techniques for achieving behavioral competencies as part of the predesigned training sequence.

The following diagram shows the relationship of the three units in the PETC program and the points at which the prerequisite training is necessary.

The PETC program has been a part of the Basic Program Plans of the NWREL Improving Teaching Competencies Program (Program 100) since 1968. Work on PETC-III began in 1971 with the identification and writing of the central ideas and general objectives for the training. During 1971 the decision to prepare an initial training plan of five two-day meetings spread over a six-month period was made and training activities with materials to support them were prepared.

The first tryout of PETC-III materials was held in Spokane, Washington, from January to April 1972. The participants for this workshop were recruited by the developers and included central-office personnel from the Spokane School District, university professors, and two persons from the Washington State Department of Public Instruction.

A major finding of this tryout was the need for more careful plans for entry into the training. Orientation to the training was prepared;

### Assistance for Client

#### To increase process skills such as goal setting, communicating, influencing or decision making

To move through phases of an improvement effort.

To add and maintain improved functional capability.

To increase those functional capabilities that enable the organization to add new kinds of objectives or use new kinds of resources.

### Competencies of the PETC Consultant

#### Diagnosis for, and provision of, group process skills training exercises

Differential diagnosis and intervention to provide added functions in a temporary relationship.

Application of diagnostic and intervention techniques to facilitate normative and structural changes in the organization which a) maintain improved functions and b) make its identity and decision-making dynamic in response to social change.

### Usual Duration of the Client Relationship

A few hours or days

A few days or weeks

Several months to four or five years

### Prerequisite Competencies

#### Trainer Experience In:

- Action Research
- Research Utilizing Problem Solving (RUPS)
- Interpersonal Influence (INF)
- Interpersonal Communications (IPC)

### Figure 1. Relationships of the Three PETC Systems
procedures for contracting with trainees, clients and installers were instituted; and preworkshop assignments were designed. In addition, revisions and refinements of the training meetings were made. New sets of materials were prepared for the second trial workshop.

The next PETC-III tryout was started in September 1973, concluding in March 1974. This tryout was held at a conference center near Portland and was attended by trainees who had been recruited by the developers. Trainees included school district central office personnel; university professors and administrators; as well as people in church-related professions.

During the tryout the decision was made to integrate the projected PETC-IV unit—Organizational Self-Renewal—into PETC-III. Portions of these concepts were introduced to the trainees. It also became clear that five 2-day training meetings provided inadequate time for the work required. It was decided to extend the number of days of training from 10 to 17 days. Meetings 1 and 5 would each take 4 days. Meetings 2, 3 and 4 would each take 3 days.

The developers then proceeded to make major revisions in the instructional system to incorporate the additional materials and provide training activities and materials for an expanded workshop. When the revisions were complete, the materials included sets of procedures for the trainees to follow and a number of resource papers to enhance and elaborate the central ideas for the instructional system.

Between April and December of 1974 the newly written materials were tested at two sites. In April a workshop was started in Portland and in May another workshop was started in Minneapolis. Participants for both of these workshops were recruited by the Office of Field Relations and
Dissemination for the Program, NWREL. Trainees included school district central office personnel, school building administrators, university professors, classroom teachers, private consultants, a mental health worker, a church worker, NWREL's Improving Teaching Competencies Program personnel and university students.

One of the findings of this trial indicated a significant cognitive overload in Meetings 1 and 2. During these meetings all of the concepts in the book of central ideas are introduced and utilized. The result was a decision to mail the book of central ideas to all participants prior to the first training meeting. Home reading assignments are now made prior to Meetings 1 and 2. During this tryout a format for trainees' progress reports, theory inputs, procedures and organizational development (OD) work plans were designed. Also, further work needed to be done on a preworkshop orientation. Therefore, a decision was made to ask participants in the second of the final pair of workshops to attend a one-day orientation to the training.

The length of the training (six months) allowed the developers to make refinements and revisions meeting by meeting. In this way the developers established some formats for progress reports, resource papers, procedures, exercises and planning for OD work. Revisions and refinements of the sets of materials were well under way so that the first of the final pair of tryouts could start in December 1974.

The final pair of workshops were conducted with two different groups in Seattle, Washington, between December 1974 and July 1975. "Seattle A" group started in December 1974. The additional orientation day for "Seattle B" group was held on February 1, 1975 with the first training session conducted near the end of that month. Participants for this
A pair of workshops were recruited by the Office of Field Relations and Dissemination in close collaboration with Mr. James D. Forneris of the Seattle Public Schools who served as their representative.

The participants included school counselors, building administrators, a university librarian, district central office personnel, classroom teachers, a district superintendent, an assistant superintendent and an individual from a state department of public instruction.

At the end of this pair of tryouts the developers concluded that PETC-III appeared to be a workable instructional system. It is now ready for persons not involved in the development to try out the materials.

Throughout the development of the instructional system information was collected about the experiences of the participants with their client systems. The evaluators asked the participants to keep a record of all their activities between training meetings. At each training meeting they were requested to prepare a report of the current status of their work with their client system. At the conclusion of the six workshops the evaluator, developers and the director of the Office of Field Relations and Dissemination selected seven of these reports as representative of the kinds of experiences the trainees had with their client systems.

The evaluator then conducted a number of interviews and followup data collection to get information for case studies. The result of this work, entitled First Time Out: Case Studies of Neophyte Consultants, is recorded in the Appendix to the Participant Materials.
DESIGN OF THE TRAINING SYSTEM

Installation of PETC-III

The installation of the PETC-III: Organizational Development instructional system is crucial in the whole training design.

This system does not stand alone and independent of its prerequisites. The goals and objectives, the strategies and procedures of the system are dependent on the interpretation and preparation provided by the installation procedures. These procedures include preparing prospective PETC-III trainees in the prerequisite skills for PETC-III and securing from them commitment to fulfilling the time and work requirements to complete the training.

PETC-III is the last step in the installation of the program for Providing Organizational Development Skills (PODS).

PODS is a macro training strategy which aims at providing a large segment of a school district with process skills and with trainer capabilities for a continuous training program. In addition, the PODS program provides training in consulting skills and organizational development (OD) skills to a much smaller segment of educators. The overall purpose is to make available to educational organizations a repertoire of OD competencies to facilitate normative and structural changes. Such competencies allow the organization to build in and maintain improved organizational functions and to make its decision making dynamic in response to social change.

Installation of PODS in an educational organization (a school district, a school building, a university) has a number of requirements. It requires acceptance and authorization by the school district central
office decision makers. It includes making provisions for a large number
of educators and the prospective PETC-III trainees to secure training
in "process" skills as presented in the instructional systems Research
Utilizing Problem Solving (RUPS), Interpersonal Communications (IPC),
Interpersonal Influence (INF) and Social Conflict & Negotiative Problem
Solving (SC&NPS). In addition to these workshops, prospective PETC-III
trainees need to have preparation for skills training and consulting
skills through training in PETC-I: Skills Training and PETC-II:
Consulting. This entire training strategy has two purposes:

1. To provide the organization with a large number
   of persons equipped with a repertoire of skills
2. To create for prospective OD consultants a
   climate of receptivity and readiness for
   performing OD activities

The installation procedure of PODS also provides a screening process
by which persons interested in OD work can be identified and contracted
with to carry out consultation in organizational development.

Once potential participants in PETC-III training have been identified
and selected, the installation process proceeds by securing from the
proper decision makers the authorization of PETC-III training. This
includes the initial contracting and the securing of client systems for
the teams of consultant trainers.

To summarize, installation of the PETC-III system includes:

1. Getting the idea of PODS accepted by an
   educational organization
2. Preparing prospective participants for PETC-III
   training, enabling them to acquire all prerequisite
   skills for PETC-III
3. Screening and identifying PETC-III participants
4. Contracting with the proper authorities for proceeding with PETC-III training

5. Identifying and securing client systems for the consulting teams in the PETC-III training

6. Providing detailed additional information to the proper authorities, potential client system and PETC-III trainees concerning all requirements of the training, including timelines, schedules, costs, practicum OD work, advanced reading, data collection, nature of relationships, accountability, registration forms and statements of agreement to participate in the PETC-III training program

Pretraining Orientation and Contracting

When the installation procedures are complete, the next event is a one-day meeting with the trainees who have decided to proceed with PETC-III. Also asked to attend this meeting are the decision makers in the organization of each participant who authorize and support the training as well as a representative of the client group with whom the participant will be working.

Select the appropriate strategies from Activities 1 and 2 of Meeting 1 to be used during this orientation meeting. For a sample set of strategies, see "PETC-III 'Seattle B' Orientation Meeting," pages 95-96. This meeting is designed to accomplish the following:

1. Examine all requirements and expectations for PETC-III training

2. Form consulting teams of two persons each; during training these teams are referred to as training units (TU)

3. Identify client systems and assign to each team; do preliminary planning for contacting those client systems
4. Distribute preworkshop assignments and materials to trainees; clarify and discuss reading assignments, data collection assignments and guidelines for entry into client systems

5. Sign three-way agreements among trainees, trainers/installers and authorizing persons

6. Reach agreement on dates for the five training meetings during a six- to eight-month period

7. Outline materials for the workshop; participants are expected to purchase three resource reading books (see page 11) as well as the PETC-III Participant Materials (These books should be available for purchase at the first meeting.)

Training Meetings

The training design calls for 5 meetings totaling 17 days. Meeting 1 and 5 are each 4 days in length. The others are each 3 days long. The meetings are held during a period of 6 to 8 months, with 30 to 45 days between meetings to allow consultant teams to carry out their OD plans with a client system.

The format for each of the training meetings includes the following:

1. Reporting progress in OD work
2. Making plans for OD work
3. Considering additional theoretical input, training activities, intervention issues, and professional development issues

The training materials for this system consist of:

A book of central ideas which provides the theoretical framework for OD in educational settings.
A participant manual containing procedural, instructional and theoretical information.

A manual for the senior trainer's use which also includes a sample set of memos, work assignments and additional resources to be mailed to participants between meetings.

The Participant Materials should be distributed during the pretraining and orientation contracting meeting. In addition to these materials, each participant is asked to purchase a copy of:

Multiple copies of these books should be available at the first meeting of each workshop. Although occasional assignments are made in them, they serve primarily as resource information for the participant's use during the months of the training.

Training Design

The PETC-III training design has been prepared on the assumption that the total number of participants does not exceed 12 persons. The participants work in teams of two persons, called training units (TU). The total group is divided into two subgroups, called learning groups (LG).
Each learning group is composed of three training units. PETC-III training requires a trainer for each learning group, so a training unit with two learning groups would require two trainers.

During a practicum experience, each team conducts an OD project with a client system. The client system may be a total organization or a subsystem of the organization. The person or persons directly involved with the OD team are referred to as "direct client."
SOME SIGNIFICANT THINGS ABOUT DEVELOPER EXPERIENCE WITH THE SYSTEM

There are a number of things about the experience of the developers with the PETC-III system that stand out as significant. In some cases the experiences provided them with information for revising the system; in other cases they were interested, sometimes surprised, observers of what they considered significant occurrences. Most of the items in the list below are the result of observations made during training sessions. The developers have selected the following categories to report their observations: Groupings; Learning the Concepts; Doing OD Work; Activities During Training Sessions; Trainer Behaviors; Making Arrangements for Training Sessions. Obviously, the statements that follow do not include all there is to say about the PETC-III system. They are observations that strike the developers as having enough significance to be recorded for consideration by anyone wishing to use this training system. These remarks appear noteworthy as aspects of the developers' experiences in using the training materials in six workshops with a total of sixty people.

Groupings

Formation of Learning Groups. In the formation of learning groups (LG) it appears the option of having the trainees form their own LG is probably the best course of action. It takes longer, may require extended negotiation, may give rise to membership issues, but there seems to be evidence of greater satisfaction by the trainees with the makeup of the self-selected learning groups than when the trainer forms them.

Advantages of LG Members Being From the Same Organization. There are some advantages when the training units (TU) in a learning group are
from the same organization. For example, there is need for less explanation about the organization, more information about the situation is commonly known, informal norms and influence networks are common knowledge.

Advantages of LG Members Being From Different Organizations. The advantages of the training units in the learning group being from different organizations include: less subjective consideration of issues, more reliable perception checks, different perspective from which to view issues, more new ideas about approaching issues.

The Value and Significance of the LG. The learning group makes a contribution to the trainees in at least the following ways:

1. Provides trainees an opportunity to get additional perspectives on organizational development and on the specific issues and tasks of the OD work of the training unit
2. Provides an ongoing and dependable source of new ideas, alternative solutions and a critique of the work done by the training unit
3. Provides a place to exchange information and acquire a repertoire of intervention strategies and techniques in OD work

Size of Training Unit. The experience of conducting six PETC-III workshops convinces the developers that for maximum benefit the TU should be two persons. One person as a TU experiences these difficulties:

1. Receives no perception check during practicum
2. Provides less input for the LG
3. Feels isolated and less supported

Three persons as a TU experience these difficulties:

1. Finding mutually convenient time to get together to plan OD work and carry out plans with client system
2. Less "air-time" during meetings of the TU
3. The real possibility that the client system feels overwhelmed
4. The range of experiences for each individual is greatly reduced

Learning the Concepts

Premeeting Reading Assignments. Advance assignment of reading in the central ideas book, *Organizational Development in Education*, makes trainees feel less pressured during the training meetings and provides more satisfaction in completing tasks which utilize and apply the concepts.

A Condition Which Makes for Quick Use of Concepts. Persons who have OD work as a career goal or whose role in the organization includes dealing with organizational issues view PETC-III training as professional advancement and generally are able to utilize the concepts with greater ease and speed.

Effect of Not Completing a Change Effort with Client System. Participants give evidence of understanding and applying correctly the concepts presented in each training meeting even if most of their practicum is spent in making entry in the client system, finding and losing clients, establishing relationships and so forth.

Doing Organizational Development Work

Data Collection Hazards. Expecting participants to do very much data gathering in their client system prior to the start of the training is unrealistic. Some of the reasons for this are:

1. Participants have not had the chance to establish relationships
2. Client systems are not clear about what is involved in OD work
3. A number of entry issues have not even been identified, much less resolved
Limited Range of Experiences. The limited time of six to eight months for the PETC-III training and practicum reduces the range of experiences possible in OD work with the client system. There is not enough time to implement a full-scale change effort, utilizing all the phases of the planned change model.

Total Organization Change Not Possible. This limited time for the PETC-III training and practicum probably precludes any total organization change taking place. Change efforts within a subsystem may occur and significant organizational data gathering will probably take place.

Effects of a Team Made Up of an External and an Internal Consultant. Training teams composed of one participant external to the client system and one participant internal to the system have difficulties when working with the clients.

1. The external consultant may have difficulty finding time to spend with the client.
2. The external consultant may have difficulty in being "legitimized" by the client system.
3. Time for teamwork for planning and analysis is hard to secure.
4. The internal consultant will be faced with the problem of avoiding or coping with getting ahead of teammate.

Success of Trainee in Being Legitimized in Client System. Persons who already have legitimate or expert power in their client systems appear to have more success in securing legitimization for their practicum than do persons with less legitimate or expert power.

Participants' Role in the Organization Affects Their Legitimization as Consultants. Participants in nonadministrative roles in the organization, or whose roles do not include attending to organizational issues, frequently experience difficulty in being accepted as consultants.
Participants in "Organizational Development" Roles. Participants whose roles are, or include, attending to organizational issues can more readily proceed with consulting activities than others in the training. without such roles.

Effects of Losing a Client System. Losing a client system need not signal a need to leave the training or assume that further learning is short-circuited. This event can be a source for some or all of the following:

1. Learning more about the organization and organizational development work
2. Practicing techniques of terminating a consulting relationship
3. Utilizing and applying the differential diagnostic matrix and other diagnostic tools to increase understanding of OD work.

Activities During Training Sessions

Increased Independence with Learning Styles. The expectation that trainees will manage their own time when presented with sets of procedures requiring large blocks of time results in adaptive use of the procedures, independent learning behaviors and satisfactory completion of tasks.

Acceptance of Trainee Learning Styles by the Trainers. Allowing trainees to proceed with their tasks in their own way and to discover and identify their own learnings tends to produce a free and stimulating environment for discussion of concepts and their application.

Trainer Feedback to Participants. The system places great emphasis on peer feedback and self-evaluation. However, some participants express a need to hear the evaluation of the trainers. It will always be an issue for the trainers to decide when to give feedback, what kind and how much.
Setting Up the Training

Best Time for a PETC-III Workshop. Most school systems are not functioning enough during the summer to allow client system accessibility to trainees. Therefore, PETC-III training within the school year is a more satisfying experience for the participant.

Significance of Prerequisite Training. Completion of the minimum prerequisite training—RUPS, IPC, INF, PETC-I and PETC-II—is crucial to a good PETC-III experience. Without this prerequisite training, participants find it difficult to utilize the concepts, and relate to or respond relevantly to a client system. If there is a loss of client or if there is a crisis in the organization, trainees without the prerequisites have difficulty in finding something to do or learn during the training meetings.

Value of Residence Training. Residence training provides a number of valuable results not possible when the training is in a "commuter" setting. For example, there is greater group cohesiveness, more time for reflection and conversation, more opportunities for consultation with trainers.

Some Areas for Exploration and Strengthening the System

Strengthening Procedures to Assist Participants to Make Entry Into the Client System. It appears that the system is strengthened when the trainers become more active in the orientation and preworkshop phases. They should act on behalf of the participants to assist them in initial client contacts, including activities such as:

1. Helping trainees plan entry
2. Providing orientation for client systems, prior to meeting consultants
3. Providing client system with information about OD and PETC-III training
Enlarge the System By Three Days to Implement Entry Strategies. A way to help trainees plan entry is to enlarge the system by one 3-day meeting to include:

**Day 1:** A trainer meets with the TU to plan for entry

A trainer meets with the client (or their representative) to present OD work, kinds of things the training will include, ways in which they can support the trainee during the practicum.

**Day 2:** TU and client representatives have initial meeting, data gathering interview, etc.

Clarification and signing of three-way agreements, after which the clients could leave.

**Day 3:** Complete orientation and make assignments for next meeting.

Possible Additions to the System. For persons who may be considering using this system, the following activities are recommended as possible additions to PETC-III.

1. Revise Meetings 1 and 2 to give more emphasis to practical issues dealing with entry.

2. Instruct trainers to make more interventions about entry, e.g., giving advice, suggesting alternatives, asking questions, retrieving resources.

3. Provide more information to the client systems dealing with expectations, limitations, anticipated outcomes.

4. Explore advantages and disadvantages of the trainer maintaining contact with the client systems on behalf of the trainee during the entire workshop.

5. Identify more explicitly the difference between contracting by installing agency and the authorizer of the training, and contracting between trainees and their direct clients.
Exit Issues. The system is strong in the last meeting where focus is on the individual learnings and future plans, but more attention needs to be paid to how the trainees close their practicum relationship with their direct client and with its organization.

2. (Cont.)

*Ask trainees to find the Introduction in the book presenting the Central Ideas (CI) for this system.

Review this material with them.

**Conduct a discussion about expectations of the training for any needed clarification, using enough time for both you and the trainees to be satisfied you have achieved clarity.

Tell them to identify and clarify any current or potential issues about how they will relate to each other and to their organization during PETC training. If there are training units which are individuals, ask two or three of them to meet together to identify and share issues of organizational relationship. Ask for reports about issues.

---

**NOTE: At this point call attention to how the trainer role in PETC-III differs from trainer roles in PETC-II. See Instructional Supplement: PETC-III Trainer Roles.
## Activity 1
### First Meeting

<table>
<thead>
<tr>
<th>Time</th>
<th>Steps</th>
<th>Materials</th>
<th>Directions</th>
</tr>
</thead>
<tbody>
<tr>
<td>40 min</td>
<td>4. Forming learning groups</td>
<td>AI, RL, Binders, Participant Materials, <em>ODS</em>, Handbook</td>
<td>4. Distribute copies of <em>Participant Materials</em>. Call attention to the various elements in the materials—color scheme, the listing of materials, purpose of procedure and resource papers. Call attention to purposes and objectives for the first activity. Ask trainees to find Resource 1, <em>Forming Learning Groups</em>. Review the article with the trainees. Tell the trainees to form learning groups (LG) or form the learning groups yourself. If you form the learning groups, you may want to share your rationale with the trainees. See instructional supplement for additional suggestions. Ask learning groups to get acquainted and discuss ways of maximizing learning potential. Call attention to the resource books for sale. Make provision for recording receipt and payment of book, <em>ODS</em>, <em>Handbook</em> and <em>Universal Traveler</em>.</td>
</tr>
</tbody>
</table>

INSTRUCTIONAL SUPPLEMENT: PETC-III TRAINER ROLES

In PETC-I and in PETC-II the roles of the trainer were primarily to manage the training sessions, provide resources and create a learning environment. The roles of the trainer also included critiquing work being done by the trainees in their practicum (the Group Process Skills workshop and in consultation with client systems) by applying criteria provided.

In PETC-III the trainer roles include all of those required for PETC-I and PETC-II. The critiquing role for the PETC-III trainer is expanded. The trainer is expected to be more active with his role, although not so active as to block the processes of the learning group.

In PETC-III the trainer can be expected to function in additional ways, such as:

- **Intervening** in training units or learning groups (especially where long periods of time are provided for group work) if and when it seems appropriate

- **Listening** for information on which to base a retrieval of relevant research or information to present to the trainees at appropriate times

- **Confronting** trainees with perceptions of quality of work being done—applying system criteria

- **Being available** for consultation with training units and learning groups

- **Providing additional** information during discussions, study time and presentations of activities and procedures

In other words, in PETC-III the trainees can expect the trainer to take a more active role during training sessions than was the case in PETC-I and PETC-II.

**Monitoring the projects** is the other major role to be expected of the PETC-III trainer. The details of how this role will be taken by the trainer will be worked out with each training unit as a part of "Planning Organizational Development Work" activities and will be discussed at length at that time.
Instructional Supplement

Activity 1
First Meeting

The purposes of the monitoring role are:

To provide guidance, support and resources to consultants during the period of PETC-III training

To maintain a two-way communication system between trainers and trainees

To fulfill requirements and expectations of mutual accountability established by all parties to the training agreements

To provide the opportunity for trainees to seek resources, help, support and guidance in planning and carrying out their OD work
INSTRUCTIONAL SUPPLEMENT: ALTERNATIVES FOR FORMING LEARNING GROUPS

Risks, values and possible consequences

A. Assigning TU's to LG

Risks: Not many risks

Values: Gets the job done quickly, keeps the schedule on time, may achieve a better possible match of complementary resources

Possible Consequences: People may feel less committed to others in the LG

B. Asking TU's to form LG

Risks: Takes longer, may create extreme ambiguity and uncertainty about deciding, may precipitate hostility and resentment in case a TU experience difficulty joining or not feeling welcome in an LG

Values: Provides greater involvement, greater interaction, more information sharing about clients and goals of TU, enhances chances of greater commitment to working in the LG

Possible Consequences: Creates a norm of dealing with unstructured issues, of wanting to spend more time later on interpersonal issues and personal growth

Senior Trainers should observe the process in Option B to become alerted to possible future incidents and issues in each LG.
Activity 2
First Meeting

INSTRUCTIONAL STRATEGY: PART I OF ANALYZING ORGANIZATIONAL DATA

<table>
<thead>
<tr>
<th>Time</th>

Directions

will be studying concepts, some of which will be new, and applying these concepts to organizational data which they have brought with them.

Stress that every effort should be made to keep both dimensions equally in focus. Ask them to try to hold the study of the concepts as well as their application to own organization in tension.

Emphasize the importance of working quickly with responses that come easily to mind, not trying to manufacture answers. Incomplete, unclear information is to be expected at this point in the training.

Say that the trainers are available for consultation not to exceed 10 minutes at a time.
<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>*5. Announce that this activity will focus on Chapter II of central ideas book. Review Procedure 4 and call attention to the schedule as follows: 30 minutes individual work, 90 minutes TU work, 3 hours LG work. Call attention to specific pages of the reading assignment and emphasize the use of Resource 10. Call attention to Resource 11, saying that later in a game setting the opportunity will be given to see how well they can recall the answers to these questions.</td>
</tr>
</tbody>
</table>

*NOTE: Chapter II, Understanding the Organization as a System, pages 47-54; 69-79 and 109-113*
INSTRUCTIONAL SUPPLEMENT: PROCEDURES FOR THE
THREE ROUNDS IN LEARNING GROUPS

1. Determine the order in which the TU's are to give reports.

2. Decide which TU will take the roles of consultant, observer and
client for each round.

3. Each round will last a maximum of 90 minutes. Approximately 50
minutes for consultation, 15 minutes to hear observer's report, 10
minutes for debriefing and senior trainer input. Allow 15-minutes
between rounds for break and for the TU to review their strategy.

4. During the break between rounds each TU will have time to review its
strategy and procedures as client, consultant and observer. The
consultants can give observers a list of things to watch for.

5. Trainers will manage the rounds.

6. Trainers will keep these questions in mind:
   a. Are statements being made based on information or
      impressions?
   b. Are inferences being made?
   c. Is a picture of the organization being pre~ ?
   d. Are the matrices being used in specific ways?
   e. Are the observers following Procedure 3, "Observers"
      Evaluation?"
   f. Are the consultants active in helping clients to
      stay in focus?

7. Before LG session starts, announce things you are going to be
   watching for.

8. If it doesn't happen in the context of observer's report at the end
   of each round, ask the client how they felt about being helped and
   the way they were helped.
Instructional Supplement

Activity 2
First Meeting

9. If appropriate after the first round make comments about the following:

a. Did the consultant press for what the problem is?

b. Did the consultant press for what kind of help is wanted?

c. Did the consultant take initiative in keeping reporting in focus?

d. Did the consultant use matrices and phases of planned change?
Activity 3
First Meeting.

</tbody>
</table>

*NOTE: Call attention to the significance of the material in Chapter V for applying the differential matrices to self and for determining priorities for personal growth. Reinforce that the work of this activity is basic to the work to be done in Activity 10. Encourage the participants to take the initiative in collecting data from others during Part II of Procedure 17.

### INSTRUCTIONAL STRATEGY

#### Activity 9
Third Meeting.

<table>
<thead>
<tr>
<th>Time</th>
<th>Steps</th>
<th>Materials</th>
<th>Directions</th>
</tr>
</thead>
<tbody>
<tr>
<td>3½ hours</td>
<td>4. Collecting data from self and others</td>
<td>P17</td>
<td>4. Ask participants to carry out the four activities outlined in Procedure 17:</td>
</tr>
<tr>
<td></td>
<td>about consultant self</td>
<td></td>
<td>30 min. Part I: My World as a Consultant</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>60 min. Part II: My Maturity as a Consultant</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>60 min. Part III: A Diagnosis of Me as a Human System</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>30 min. Part IV: Recording Insights and Questions</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Announce that you will call time at the end of each period indicated on Procedure 17.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Place the above four activities on newsprint to serve as a reminder for the time schedule.</td>
</tr>
</tbody>
</table>
INSTRUCTIONAL STRATEGY: GIVING AND RECEIVING FEEDBACK ABOUT CONSULTANT SELF

<table>
<thead>
<tr>
<th>Time</th>
<th>Steps</th>
<th>Materials</th>
<th>Directions</th>
</tr>
</thead>
<tbody>
<tr>
<td>5 min.</td>
<td>1. Introducing Activity 10</td>
<td>A10</td>
<td>*1. Present the agenda for Activity 10.</td>
</tr>
<tr>
<td>15 min.</td>
<td>2. Reading Resource 17</td>
<td>R17</td>
<td>2. Ask participants to read Resource 17, <em>Using the Johari Window Model to Increase Awareness of Self as Consultant.</em></td>
</tr>
<tr>
<td>15 min.</td>
<td>3. Introducing Procedure 18</td>
<td>P18</td>
<td>**3. Read Procedure 18, <em>The Giving and Receiving of Feedback About Consultant Self</em> with participants, taking time to elaborate the instructions carefully. Indicate that the work in Procedure 18 is based on the work of Procedure 17. Place on newsprint the actual clock times for the procedures.</td>
</tr>
<tr>
<td>30 min.</td>
<td>4. Filling in quadrants Part I</td>
<td>P18</td>
<td>4. Direct trainees to get started with Procedure 18, Part I.</td>
</tr>
<tr>
<td>30 min.</td>
<td>5. Making additions to window Part II</td>
<td>P18</td>
<td>5. Announce that it is time to start Part II.</td>
</tr>
</tbody>
</table>

*NOTE: Introduce this activity by referring to the high points in Chapter V. Take time to receive questions about the Johari Window, Resource 17, and to provide elaborations, as needed. In presenting Procedure 18, call attention to the importance of giving and receiving feedback, practicing communication skills of paraphrasing and perception checking. Encourage trainees to give the exercise a good try. Provide encouragement for doing this activity. |

**NOTE: It is important for the trainers to stay out of the entire process in Procedure 18. The material generated in Steps 4 and 5 has the potential for providing the learning groups with ample information and support to conduct a session for giving and receiving feedback.*l
<table>

ADDITIONAL PARTICIPANT MATERIALS

This section contains a sample of all additional materials used with participants in the PETC-III workshop conducted in Seattle between February 1 and July 11, 1975. Included are sample orientation materials and preworkshop assignments which were distributed during a one-day orientation meeting held 30 days prior to the start of the first meeting of PETC-III. The training design calls for each participant to receive a mailing between each of the training meetings. The purpose of these mailings is:

To maintain contact with the participants
To provide information about the next meeting
To make assignments
To provide additional resources and input
ANNOUNCEMENT OF ORIENTATION MEETING

Subject: PETC-III, Organizational Development Training

We are pleased to know that soon you will be ready to participate in the PETC-III training sponsored by the Seattle School District.

The preliminary agreements between the school district and the Northwest Regional Educational Laboratory (NWREL) have been reached and the dates for the five meetings have been confirmed. The list of dates is attached to this letter.

An orientation session has been scheduled to be held at Rainier Beach High School, Pod #3 on February 1 from 9:00 a.m. to 4:00 p.m. At this meeting we will accomplish the following:

1. Discuss and clarify all system's requirements and agreements. See orientation material attached.

2. Form basic training groups.

3. Complete the three-way agreement required to participate in PETC-III, including the identification of possible client systems. The agreement will be signed by you, NWREL, and the District Representative authorizing your participation. A copy of the three-way agreement is attached for your information.

4. Receive and clarify assignments to be completed before the first meeting. These preworkshop assignments will be presented and carefully explained by the PETC-III trainers. The success of the activities in the first four days of training, Meeting 1, depend entirely on your completion of these assignments.

5. Respond to your questions about the training and provide information about books to be purchased.

We are encouraged by the possibility that Wade Haggard and Hal Reasby may be able to spend a couple of hours with the total group on February 1 to clarify the three-way agreement.
If you need any information about participating in PETC-III training before the orientation session on February 1, please call COLLECT Bill Ward at (503) 248-6868. In case Bill is out of the office, ask for either Ruth Emory or René Fino, PETC-III trainers.

We want to express our appreciation for all the work you have done throughout this period of preparation for getting PETC-III training off the ground. We look forward to meeting you personally and working with you.

Sincerely,

William T. Ward
Coordinator
Office of Field Relations and Dissemination

RFP: 10b
PETC-III "SEATTLE B"
Meeting Schedule
1975

First Meeting: Saturday, February 22
Sunday, February 23
Monday, February 24
Tuesday, February 25

Second Meeting: Thursday, March 27
Friday, March 28
Saturday, March 29

Third Meeting: Thursday, May 8
Friday, May 9
Saturday, May 10

Fourth Meeting: Sunday, June 1
Monday, June 2
Tuesday, June 3

Fifth Meeting: Tuesday, July 8
Wednesday, July 9
Thursday, July 10
Friday, July 11
THREE-WAY AGREEMENT

The following are agreements mutually arrived at by the persons signing them. They represent expectations of all concerned and provide the necessary clearances for the trainees to conduct an organizational development project as the practicum for training in the NWREL instructional system Preparing Educational Training Consultants: Organizational Development (PETC-III). These agreements serve the purpose of clarifying expectations and are not legally binding.

A. PETC-III participant agrees to:

1. Complete preworkshop assignments which will be mailed one month prior to the first training meeting and which will take about eight hours.

2. Participate in a total of 17 days of training sessions over a period of six to eight months as follows:
   - First Meeting: Four days, each day 9:00 a.m. to 5:00 p.m.
   - Second, Third, Fourth Meetings: Three days, each day 9:00 a.m. to 5:00 p.m.
   - Fifth Meeting: Four days, each day 9:00 a.m. to 5:00 p.m.

3. Identify broadly a need for change or improvement, or a well-specified area of need in the organization before the training starts.

4. Design and conduct an organizational development project which will require about ten days of work to complete, making plans during the training sessions and implementing them in the time between training meetings (about 45 days).

5. Come to agreements with the organization about how financial requirements are to be met.

__________________________
Name

__________________________
Name
Agreement, PETC-III

B. Official representative of the organization authorizing the training of the PETC-III participants agrees to:

1. Authorize each participant to spend time as follows: 8 hours of preworkshop assignment, 17 days of training meetings and about 10 days conducting the project.

2. Check with participants about arrangements for other expenses, such as the purchase of one or two resource books, clerical expenses necessary to conduct the project, travel and expenses for attendance at the training meetings, etc. (Five trips = 17 days)

3. Provide necessary communication within the organizational unit involved to legitimize the activity of the participant while conducting the project. This communication may take the form of a memo, or a meeting with those affected, or any other means of communication which will make clear the support of the participant by the organization authorizing the organizational development activity and their expectation that cooperation will be given by the organizational unit in which the project is being conducted.

C. The Training Organization agrees to:

1. Negotiate initial organizational entry to establish support for the participant.

2. Conduct the training design, which includes preworkshop assignment, 17 days of training meetings.

3. Provide all training materials.

4. Make arrangements for the place in which training meetings will be conducted.

5. Provide additional resources as appropriate to the training design and as needed by participants.
INTRODUCTION TO PETC-III TRAINING

Objectives and Requirements

This document is written to be used by potential participants in PETC-III: Organizational Development training, by the organization in which the participant will be working, and by the installers of the training. It contains information to be taken into account when reaching agreements with all the parties involved in the training. It sets forth what is expected of all those affected by the training and what is involved in participating in a PETC-III program.

PETC-III: Organizational Development is the third unit in the Preparing Educational Training Consultants program of the Improving Teaching Competencies Program of the Northwest Regional Educational Laboratory (NWREL). Potential participants have met all the prerequisites to be eligible for this training. The prerequisites include completion of PETC-I: Skills Training, PETC-II: Consulting, and participation in the following NWREL programs: Research Utilizing Problem Solving (RUPS), Interpersonal Communications (IPC), Interpersonal Influence (INF), and System Approach for Education (SAFE).

PETC-III Training Plan

PETC-III training is spread over a time period of six to eight months. During this period the trainee will do the equivalent of one day of preworkshop assignment, attend seventeen days of training meetings, and spend a minimum of ten days conducting an organizational development project. It is possible that a trainee may conduct a project in an organization other than his own, although this is not the
preferred route for the training. The time spread for the training is
approximately as follows:

The first meeting will start with an evening session in cases
where a full day of orientation cannot be held, followed by
four days of training sessions from 9:00 a.m. to 5:00 p.m.

<td>3-day workshop meeting</td>
<td>4-day workshop meeting</td>
</tr>
</tbody>
</table>

NOTE: There are approximately 30 to 35 days between workshop meetings
for OD project work with client groups.

PETC-III Costs

The chief costs of PETC-III training are time and energy. The
participant will spend about 38 days in the training. Expenditure of
energy comes with the work required which includes attending all meetings,
studying, planning the project, participating in the critiquing of
the work of other trainees, conducting the project, developing and
maintaining organizational relationships appropriate to the project.

In addition to time and energy there is a moderate cash outlay
needed. The participants will be asked to buy at least two books,
totaling between $20 and $25. Probably there will be expenses involved
in duplicating materials used in conducting the project. If the train-
ing meetings are held in a place away from the residence of the partici-
 pant, expenses will need to be provided for. It is expected that the
trainees and the organization will work these matters out.
The training materials will consist of a theory book of central ideas and the participant materials. The central ideas book contains the major theoretical and knowledge inputs for the training. The participant materials contain procedure sheets needed by the participants during the training as well as resource sheets for designing and conducting the project.

What the Organization Gains for Its Investment in PETC-III Training

The organization gains a new functional capacity through its new OD consultants to diagnose system needs and to produce appropriate OD interventions. The OD consultant is prepared to do the following for the organization:

Involve the organization in the diagnosis of change needs and in the identification of a change effort

Help the organization to stay focused on normative and structural change if the organization so desires

Manage the implementation of plans to bring about an increased functional capacity of the organization

Either bring about an end to the consulting relationship or to involve the organization in the identification of next steps for organizational development

Apply his knowledge to more complex organizational change efforts as he progressively experiences more opportunities for acting in the organizational development consultant role

Use concepts in PETC-III to make statements about the organization's health and maturity

Manage the change efforts, and decide on appropriate interventions, based on data collected

Assume a variety of consulting roles to facilitate movement toward improvement; he will be able to shift between several roles

Analyze his own values and ideological base for consulting, assess his professional growth needs, and establish professional growth goals
In order to help the organization achieve its change objectives the trainee will be able to:

- Use a systematic approach to change by applying the Lippitt model of phases of planned change to manage the change effort.

- Apply a diagnostic matrix and an intervention matrix as taught in PETC-II and PETC-III to help him determine the most accurate and appropriate analysis of the organizational situation and the most relevant interventions for him to take.

- Draw on prior training and experience for help in designing and implementing interventions.

The previous training and experience of the PETC-III trainee will enable him/her to:

- Use and teach others to use Research Utilizing Problem Solving (RUPS) skills.

- Use and teach others to use basic Interpersonal Communication (IPC) skills.

- Use and teach others to use the basic concepts and processes of Interpersonal Influence (INF).

- Conduct Group Process Skills (GPS) workshops and teach others to conduct them.

- Use consulting skills to provide or strengthen a function needed by a client system to achieve a goal or reach an objective.

How well the PETC-III trainee performs will depend upon:

- His/her own desire and motivation to perform well.

- The extent to which he is seen and accepted in his organization as being in the role of organizational development consultant.

- The degree of opportunity available for utilizing his/her skills.

How much the PETC-III trainee will know about organizational development consulting will depend upon:

- The extent to which the training enables him to conceptualize the role of consultant.

- How much practice his organizational development project gives him in applying the PETC-III OD concepts.

- How soon after the completion of the training he can apply his knowledge to another organizational effort.
PETC-III Installation and Training Requirements

Authorization to Participate. An organization must authorize an individual participant or a team of participants, to participate in the five training meetings and to conduct an organizational development project.

An organizational development project focuses on the organization (not individuals, committees, or groups of individuals) with a view toward building into and maintaining improved ways of functioning within the organization. The project is a series of interventions based on data collected and analyzed which aims at structural and normative changes to improve the functioning of the organization. A project may be conducted in one part of the organization or in the organization as a whole. An organizational development project becomes possible when the organization's needs and desires have the potential for providing new or increased areas of functional capability.

Selection of Participants. There are two options for the selection of participants. The options are listed below, in order of their preference for the training.

1. A team of two persons from one organization, as internal consultants

2. A team of two individuals not representing their own organization, but wishing to work as a team of external consultants to an organization, and having contracted with an organization for such work

Each team of two persons will be called a training unit during the PETC-III training.

Conducting an OD Project. Each training unit must design and conduct an organizational development project. The OD project is the practice for PETC-III training, as conducting a Group Process Skills workshop and the consultation with a client system provided practical experience for PETC-I and PETC-II respectively. Here are series of statements which are intended to clarify what a PETC-III OD project is.
The statements should also function as a guideline as plans are made and carried out. It should be noted that the following statements apply to PETC-III and may or may not have relevance for other organizational work done by PETC-III participants.

The concept, "project," is defined as a series of intervention strategies which adhere to the guidelines provided in the Phases of Planned Change and are based on the theoretical framework of a differential diagnostic matrix and differential intervention matrix.

A PETC-III OD project begins with the signing of three-way agreement by the consultant, the person in the organization authorizing the consultant and the training agency. Part of the agreement includes either a broad identification of a need for change or a well-specified area of need.

The project is undertaken with the conviction that the objective of PETC-III for improving the functional capability of the organization is relevant and appropriate to the organization and that the OD work initiated by the consultant is clearly aimed at achieving this objective.

A PETC-III OD project consists of all the activities carried out by the consultant-in-training during the six-month period of PETC-III training. It does not refer to one activity (e.g., a workshop, a laboratory, a confrontation meeting) or a needs assessment. The scope and extent of these activities are determined by the time constraints of the training (17 days training, 10 days minimum project work).

Completing Preworkshop Assignment. In order to be able to start the first meeting of PETC-III it will be necessary for each training unit to complete a preworkshop assignment. This preworkshop assignment will be mailed to the training units one month prior to the first training meeting, and will require approximately eight hours to complete.

The assignment will consist of several tasks, such as: reading to be completed, gathering information about the structure and functions of the organization and of a subsystem in which work may take place, conducting interviews with the key persons.
A Three-Way Agreement

A vital step in recruiting participants for PETC-III training is the achievement of a three-way agreement among the potential trainees, the authorizing organization and the training organization (in this case the Improving Teaching Competencies Program of NWREL). The reasons for achieving such an agreement are:

To achieve clarity about expectations

To assure organizational support for the conduct of an OD project

To reduce misunderstandings during the training period

To ensure that trainees will have the time and resources needed to do their practicum

To legitimize the trainees' efforts at making interventions

With this in mind, agreement forms have been prepared. Signing the forms will indicate that all the parties are satisfied that they understand what is involved and agree to it.
Preparation of Educational Training Consultants: Organizational Development (PETC-III) is one of several instructional systems developed by the Improving Teaching Competencies Program (ITCP) of the Northwest Regional Educational Laboratory (NWREL). The material of this system includes training strategies and procedures plus participant instructional materials for use with educational managers in a workshop setting. PETC-III provides participants with the opportunity to acquire the knowledge, skills and sensitivities that constitute a change process termed Organizational Development (OD).

What is OD?

Organizational development is a strategy for organizational change. It is a set of practices that have evolved in industrial, governmental and (more recently) educational settings. The purpose of organizational development is to improve organizational health and effectiveness.

Organizational development aims to help people increase their competencies so they can more effectively manage the human component of their organizations. The basic strategy of organizational development is to provide training and consultation that involve managers in identifying, diagnosing and modifying the norms, structures and processes of their own organization. Through these normative, procedural and structural changes, it is intended that the organization's effectiveness and health will be improved.

Organizational development is based on pieces of theory emanating from the models of "planned change" (Lippitt, Watson and Westley, 1958;

Beckhard (1969) defines OD as an effort (a) planned, (b) organization-wide, and (c) managed from the top, to (d) increase organization effectiveness and health through (e) planned interventions in the organization's processes using behavioral science knowledge.

Organizational development cases involve such things as (a) problems of communication (particularly upward), (b) intergroup conflict, (c) leadership issues, (d) questions of identity and destination, (e) questions about satisfaction and the ability of an organization to provide adequate and appropriate inducements and (f) questions of organizational effectiveness.

These can be grouped into three categories:

1. Problems of destiny—growth, identity and revitalization
   Problems of human satisfaction and development
2. Problems of organizational effectiveness and organization health

The rationale for preparing organizational development consultants inside organizations (especially schools) includes three current situations:

1. Few school organizations have the financial resources to hire outside organizational consultants over long periods of time
2. The number of available outside organizational consultants is inadequate to meet the need
3. Consultants that belong to the organization are already committed to its improvement, are likely to be accorded trust and respect from their peers, and are already familiar with existing norms, structures and procedures
PETC-III, therefore, is planned as an instructional strategy by which organizations can build their own capacity to carry out organizational development. It utilizes regular staff members on a continuous basis and provides organizational development training and consultation as needed to maintain expected levels of capabilities for all managers, leaders and supervisors or any other change agent role.

Description of Materials and Strategies

The system consists of a set of participant materials, a set of instructional strategies to be used with trainees, some preliminary plans for installing a PETC-III training program, and strategies to help those trained in PETC-III provide organizational training and consultation for client groups.

The immediate population for PETC-III training consists of educators, at any level, who are desirous of acquiring the knowledge and skills that will allow them to provide organizational training and consultation to school groups. The secondary target population consists of client groups who wish to receive organizational development training and consultation from PETC-III consultants.

PETC-III training is spread over a time period of 8 months. During this period, the PETC-III trainees complete a 1-day preworkshop assignment, attend 17 days of workshop meetings, and spend a minimum of 10 days conducting an organizational development project with a predeter- mined client group. The following chart outlines the timeline for major training events.
<table>
<thead>
<tr>
<th>Month 1</th>
<th>Month 2</th>
<th>Month 3</th>
<th>Month 4</th>
<th>Month 5</th>
<th>Month 6</th>
<th>Month 7</th>
<th>Month 8</th>
</tr>
</thead>
<tbody>
<tr>
<td>preworkshop assignment, 1 day</td>
<td>4-day workshop meeting</td>
<td>3-day workshop meeting</td>
<td>3-day workshop meeting</td>
<td>3-day workshop meeting</td>
<td>3-day workshop meeting</td>
<td>4-day workshop meeting</td>
<td></td>
</tr>
</tbody>
</table>

Note: There are approximately 30 to 35 days between workshop meetings for OD project work with client groups.

Strategies require that two persons with considerable organizational development experience and skills conduct the PETC-III workshop. The workshops are structured so that twelve to twenty-seven trainees, divided into two or three teams, go through the training together.

**Goals and Outcome Objectives.** The goals and objectives for PETC-III are divided into two categories, (a) consultant outcome goals and objectives, and (b) goals and objectives for client groups. The consultant outcomes include their satisfaction with the training, their perceptions of its utility, and changes in their behavior such as increased cognitive growth and performance change.

**Consultant Outcome Objectives.** The PETC-III instructional system prepares participants to become educational training consultants. As a result of training, consultants are expected to be able to:

1. Identify and explain the major organizational development conceptualization and intervention strategies that are presented in the PETC-III instructional system
2. Meet with a potential client group and translate this group's difficulties into a specific problem or problems on which the group wishes to work
3. Establish definite and workable relational and contractual association with a client group
4. Collect information from the client group so that the group's problem(s) may be diagnosed and clarified
5. Design, provide and assess the effectiveness of intervention activities that allow the client group to explore and examine alternative norms, processes and structures
6. Design, provide and assess the effectiveness of intervention activities that allow the client group to accomplish normative, procedural or structural changes resulting in increased functional capability in the organization.

7. Achieve a terminal relationship with the client group by gradual withdrawal and by establishing structures and procedures to substitute for the services provided by the consultant.

At another level, however, it is possible to predict observable changes in a client group that receives consultation. Four specific examples follow.

**Improved Problem-Solving Capabilities.** As a result of training in organizational development, client groups may become more adept at problem solving. They may become more able to:

- Sense problem situations
- Differentiate between kinds of problems
- Attend to problem situations with shared and explicit problem solving procedures

**Improved Management of Interpersonal Processes.** As a result of training in organizational development, client groups may become more adept at combining people’s efforts to achieve desired task goals. It is expected that:

- Vertical and horizontal communication may become more open, shared and accurate
- Influence may become more shared and equalized
- Decision making may become more diffused, characterized by explicit procedures and involvement of those who will be affected by or who are responsible for implementation of the decisions
- Coordination may become more explicit and accepted

**Improved Procedures that Support Personal and Professional Growth.** As a result of training in organizational development, client groups
may become more adept at viewing personal and professional development as an ongoing function necessary to the growth of the group. Therefore, it is expected that the group may provide:

- Increased training opportunities for members to meet new organizational needs
- Increased learning resources so members can be continuous learners
- Increased feedback, formally and informally, so members can move toward new ways of understanding

**Improved Ways the Organization Attributes Meaning.** As a result of training in organizational development, client groups may become more adept in the ways they see and explain themselves to the rest of the world. It is, therefore, expected that the group will:

- Have goals which are clear and in which members have a sense of ownership
- Respond appropriately to outside demands

READING ASSIGNMENT FOR FIRST MEETING

Enclosed is the central ideas book for PETC-III, *Organizational Development in Education*:

Please read the following assignments in preparation for the first meeting of PETC-III:

1. Chapter IV of the central ideas book. This is a review of PETC-II concepts.

2. The following sections of Chapter II:

   Definitions and Concepts of Systems, page 47 through Growth, Evolution and Maturation of Human Systems, page 54

   The Concept of Organizational Health, page 68 through The Organization as a Human System, page 79

   Organizational Boundaries of a School System, pages 109-113

3. The following sections of Chapter III:

   The Organization as the Client, page 47 through Recognizing Effects of Values and Biases, page 137

   Identifying and Defining System and Subsystem Boundaries, page 152 through Changing Norms in an Organization, p. 166

Also enclosed is the reference book:

INTRODUCTION TO PREWORKSHOP ASSIGNMENTS

The assignments you are about to complete will undoubtedly have continuing effects as you proceed with your PETC-III project. Since you have not, in fact, attended the first PETC-III Training Meeting it may be difficult or confusing to understand the reasons for and importance of the particular assignments.

Here are two things to keep in mind. They may give you a framework within which to understand the assignments.

You may recall the emphasis placed on a diagnostic orientation in PETC-II. You were asked repeatedly to collect information and apply the dimensions of a diagnostic matrix before selecting an action to take in any practicum event. These assignments continue the information collection aspect of that data-based diagnostic orientation.

Throughout PETC-III you will have fundamental concern for five questions. We offer them here for your information. Although your initial data collection may produce few clues as to their answer, they may be of assistance to help you see where you are heading:

1. Are the learning goals of PETC-III: Organizational Development appropriate to your organizational work?

2. To what extent do the goals relate to improving the effectiveness of the client system?

3. Is the cultural state of the client system ready for organizational development?

4. Are the key people in the client system involved in or informed of the organizational development program?

5. Are members of the client system adequately prepared and oriented to organizational development?

In PETC-III you will be doing your work within the same Phases of Planned Change model you used in PETC-II. Keep in mind that in your preworkshop assignment you are working at Establishing a Client Relationship and at the initial stages of Developing an Awareness of a Need for Change. You can depend on it that neither of these steps will be completed before the First Training Meeting, but will be worked on from time to time as needed in your OD experience.
ASSIGNMENT ONE
CHARTING TOTAL ORGANIZATION

1. Prepare an organization chart. Include the names of all the parts of your organization, for example: divisions, departments, offices, sections.

2. Identify major parts and major functions.

3. Rate your organization on various dimensions related to boundaries.

4. Refer to operational characteristics in PETC-II differential diagnostic matrix.

As you have experienced your organization so far, what would you say are the operational characteristics right now which you would consider as sources of problems in the organization?

Identify these operational characteristics, including problems and issues related to them.

What evidence can you give to support your belief that issues/problems exist?

Papers to help with this activity are attached.
ASSESSING MY ORGANIZATION

At the first meeting you will be asked to depict graphically your total organization, showing the major parts, the systems and subsystems, the major external systems and all major functions and shared functions.

Write as much as you can under each item from your own knowledge or from information you are able to collect before first meeting.

MAJOR PARTS

1. ...a system...has parts functioning: interdependently to provide a purpose.

| Name the MAJOR PARTS of Your Total Organization | Name the Major Functions |

Identify functions which are shared by two or more parts.
Any part of a system, which is itself made of parts, is a system within the larger system. We call it a subsystem of the larger system.

<table>
<thead>
<tr>
<th>Name the Different Levels of Systems and Subsystems</th>
<th>Identify Major Functions</th>
</tr>
</thead>
</table>

Name the major external systems (external to the total organization)
MAJOR CHARACTERISTICS

The uniqueness of its purpose, its structure, its operating procedures and its expected ways of doing things, or norms, define any particular organization. . . .

The corporate charter and/or existing legislation defines, and limits, the purpose for which the organization may exist and its responsibilities for fulfilling that purpose.

Identify the legal basis of your organization

Identify the kinds of purpose of your organization

Identify the kinds of structure

Identify the operating procedures

Identify the predominant norms

Identify the relationship external to the organization
THE BOUNDARIES OF MY ORGANIZATION

Things which keep an idea, a practice, a role, or an individual IN or OUT of a system.

Actions of the system which represent its choosing to be exposed and influenced by external factors.

Behaviors of the human system that control whether or not something is allowed to become part of its internal decision making.

How Would You Rate Your Organization

How permeable is your organization? (Total human system) (in that it exposes itself to many kinds of external influence)

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Low</td>
<td>High</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

For example:

How vulnerable is your organization? (in that other systems can force their influence on its internal operations)

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Not at all</td>
<td>Very</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

For example:
How flexible is your organization? (in being able to selectively open itself to influence or block such influence based on rapid internal decisions)

Not at all  Very

For example:

How rigid is your organization? (in that norms or expectations must be broken in traumatic ways in order to be exposed to something new)

Not at all  Very

For example:

How planful and rewarding does your organization make the opening of its boundaries?

Not at all  Very

For example:
To what extent does your organization understand and acknowledge its own control over its boundaries?

Very little  

Very great

For example:

Who and what act as the gatekeepers of your organization?
A system: A number (two or more) or parts that function individually and in relation to each other to realize a purpose.

A human system: One or more persons whose functions are operating interdependently for the purpose of meeting the hierarchy of human needs of people.
ASSIGNMENT TWO
CHARTING A SUBSYSTEM

1. Prepare an organizational chart for the subsystem in which you are to carry out an organizational development project (if it applies in your case). Include the names of all the parts of this subsystem.

2. Briefly indicate what each part of the SUBSYSTEM does.

3. What is (are) the function(s) of this subsystem?

4. As you have experienced this subsystem what would you say are the operational characteristics right now which you would consider as sources of problems in the subsystem?

   Identify these operational characteristics and related problems.

   Please list evidences to support your judgment that these problems exist.
ASSIGNMENT THREE
COLLECTING INFORMATION

Having information about your organization is essential to proceeding with the training. Doing diagnostic work based on information, which in turn forms interventions, is basic to PETC-III organizational development work. The needed information is secured in a variety of ways.

We recognize the dilemma you face with reference to your need for information. Since you have not yet started the training you perhaps cannot be sure of what you need to know. In addition, collecting information now could produce some unwanted consequences and unnecessarily complicate your relationship with your client later. As a matter of fact, it may affect adversely your entry as an OD consultant. However, we believe that the more information you can bring with you to the first training meeting the better will be your readiness to make plans and take action early in the training.

We suggest that before deciding to collect any kind of data you give careful consideration to any possible effects this activity may have. Since you are asking for permission to do organizational development work and since the organization may not be initiating a request for help, any use of questionnaires or other ways of collecting data may cause confusion. It may become a threat and result in blocking other entry possibilities which could help you and your client establish a relationship.

With this in mind, please consider whether or not it is appropriate or threatening to you and/or your client to collect some kinds of information to bring with you to the first meeting.

If you decide to collect data, two possible ways to proceed are listed below:

1. Conduct interviews with five or six persons in your organization. Get their reactions to the potential benefits of your participation in an OD project. Include the person who authorized your participation in the training.

2. Administer one or more questionnaires to some or all of the persons in your organization. Some examples are attached.

If you decide to use questionnaires, we suggest that you share the questionnaires with the person authorizing your participation in PETC-III, check with this person the appropriateness of the questionnaires and request a memo by this person to accompany their use. See examples.
Examples:

A. A questionnaire which includes the following:

1. What goes on in your organizational unit that makes it easy or difficult for you to do your job?

<table>
<thead>
<tr>
<th>My Job</th>
<th>What makes it easy</th>
<th>What makes it hard</th>
</tr>
</thead>
</table>

2. List two or three things you think are expected of you in this organization.

3. How clear are you about what is expected of you in this organization?

   - Very clear
   - More clear than unclear
   - More unclear than clear
   - Quite clear
   - Quite unclear
   - Very unclear

4. What is the specific thing that your organizational unit is set up to do?

5. If you could change one thing in this organization what would that thing be?
B. Measuring Organizational Climate (Norms)

Organizational Norms

1. Suppose Teacher X feels hurt and "put down" by something another teacher has said to him. In Teacher X's place, would most of the teachers you know in your school be likely to...

...tell the other teacher that they felt hurt and put down?

( ) Yes, I think most would.
( ) Maybe about half would.
( ) No; most would not.
( ) I don't know.

2. ...tell their friends that the other teacher is hard to get along with?

( ) Yes, I think most would do this.
( ) Maybe about half would do this.
( ) No; most would not.
( ) I don't know.

3. Suppose Teacher X strongly disagrees with something B says at a staff meeting. In Teacher X's place, would most of the teachers you know in your school...

...seek out B to discuss the disagreement?

( ) Yes, I think most would do this.
( ) Maybe about half would do this.
( ) No; most would not.
( ) I don't know.

4. ...keep it to themselves and say nothing about it?

( ) Yes, I think most would do this.
( ) Maybe about half would do this.
( ) No; most would not.
( ) I don't know.

C. Determining Management Styles

Preferences of Administrators

There is an old proverb that says, "It may be true what some men say; it must be true what all men say." The problem in applying this to the way people work together in organizations is that all men do not say the same thing. Persons in any organization have different ways of dealing with their work associates in other departments. The proverbs listed in the two questions below can be thought of as descriptions of some of the different possibilities of resolving disagreements as they have been stated in literature and in traditional wisdom.

You are asked to indicate how desirable in your opinion each of the proverbs listed below is as a way of resolving disagreements between members of different departments. Please use the following scores in evaluating the desirability of each proverb.

1. Very desirable
2. Desirable
3. Neither desirable nor undesirable
4. Undesirable
5. Completely undesirable

Indicate your evaluation in the spaces below:

1. You scratch my back, I'll scratch yours.
2. When two quarrel, he who keeps silence first is the most praiseworthy.
4. A man who will not flee will make his foe flee.
5. Come now and let us reason together.
6. It is easier to refrain than to retreat from a quarrel.
7. Better half a loaf than no bread.
8. A question must be decided by knowledge and not by numbers if it is to have a right decision.
9. When one hits you with a stone, hit him with a piece of cotton.
10. The arguments of the strongest always have the most weight.
11. By digging and digging, the truth is discovered.
12. Smooth words make smooth ways.
13. If you cannot make a man think as you do, make him do as you think.
14. He who fights and runs away lives to run another day.
15. A fair exchange brings no quarrel.
16. Might overcomes right.
17. Tit for tat is fair play.
18. Kind words are worth much and cost little.
19. Seek till you find, and you'll not lose your labor.
20. Kill your enemies with kindness.
21. He loses least in a quarrel who keeps his tongue in check.
22. Try and trust will move mountains.
23. Put your foot down where you mean to stand.
24. One gift for another makes good friends.
25. Don't stir up a hornet's nest.

D. Staff Meetings (Openness and Powerlessness)

School districts hold a lot of meetings, and their usefulness depends on their quality. We are thinking specifically of either meetings of the entire faculty of your building (staff meetings) or meetings of only a part of the faculty (committee meetings).

Name of the meeting you are considering __________________________

How often does it usually meet? ___________________________

Length of typical meeting ___________________________

Now please consider what usually or typically happens in this meeting. To each of the items below, assign one of the following numbers.

5 This is very typical of this meeting; it happens repeatedly.
4 This is fairly typical of this meeting; it happens quite often.
3 This is more typical than not, but it doesn't happen a lot.
2 This is more untypical than typical, thought it does happen some.
1 This is quite untypical, though it rarely happens.
0 This is not typical at all; it never happens.

1. When problems come up in the meeting, they are thoroughly explored until everyone understands what the problems is.
2. The first solution proposed is often accepted by the group.
3. People come to the meeting not knowing what is to be presented or discussed.
4. People ask why the problem exists and what the causes are.
5. There are many problems which people are concerned about which never get on the agenda.
6. There is a tendency to propose answers without really having thought the problem and its causes through carefully.
7. The group discusses the pros and cons of several different alternate solutions to a problem.
8. People bring up extraneous or irrelevant matters.
9. The average person in the meeting feels that his ideas have gotten into the discussion.
10. Someone summarizes progress from time to time.
11. Decisions are often left vague--as to what they are, and who will carry them out.
12. Either before the meeting or at its beginning, any group member can easily get items on to the agenda.
13. People are afraid to be openly critical or make good objections.
14. The group discusses and evaluates how decisions from previous meetings worked out.
15. People do not take the time to really study or define the problem they are working on.
16. The same few people seem to do most of the talking during the meeting.
17. People hesitate to give their true feelings about problems which are discussed.
18. When a decision is made, it is clear who should carry it out, and when.
19. There is a good deal of jumping from topic to topic--it's often unclear where the group is on the agenda.
20. From time to time in the meeting, people openly discuss the feelings and working relationships in the group.
21. The same problems seem to keep coming up over and over again from meeting to meeting.
22. People don't seem to care about the meeting, or want to get involved in it.
23. When the group is thinking about a problem, at least two or three different solutions are suggested.
24. When there is disagreement, it tends to be smoothed over or avoided.
25. Some very creative solutions come out of this group.
26. Many people remain silent.
27. When conflicts over decisions come up, the group does not avoid them but really stays with the conflict and works it through.
28. The results of the group's work are not worth the time it takes.
29. People give their real feelings about what is happening during the meeting itself.
30. People feel very committed to carrying out the solutions arrived at by the group.
31. When the group is supposedly working on a problem, it is really working on some other "under the table" problem.
32. People feel antagonistic or negative during the meeting.
33. There is no followup on how decisions reached at earlier meetings worked out in practice.
34. Solutions and decisions are in accord with the chairman's or leader's point of view, but not necessarily with that of the members.
35. There are splits or deadlocks between factions or subgroups.
36. The discussion goes on and on without any decision making reached.
37. People feel satisfied or positive during the meeting.
E. Participation in Decisions

1. This item concerns the *choice of teaching methods* you use. Please mark an X before the one statement below that best describes your part in deciding upon the teaching methods you use.

( ) 1. I choose my own teaching methods without assistance or direction.

( ) 2. The final choice of teaching methods is left to me, but there are others whose job includes making recommendations or suggestions.

( ) 3. Within certain limits I can choose my own teaching methods.

( ) 4. As a member of a group or committee, I share with others the job of deciding the teaching methods to be used.

( ) 5. I do not choose my own teaching methods. They are laid down for me by others.

If you choose answer 2, 3, 4 or 5 in the question just above, you were indicating that some other person or persons were somehow involved in deciding upon the teaching methods to be used in your classroom. If you chose answer 2, 3, 4 or 5, please write below the names and positions of the other persons involved.

<table>

</table>

2. If you choose answer 2, 3, 4 or 5 in the question just above, please write below the names and positions of the other persons involved.

3. This item concerns the *scope and sequence of subject-matter content*. Please mark X before the one statement below that best describes your part in deciding upon the subject-matter content that you teach.

( ) 1. I choose the scope and sequence of subject-matter content without assistance or direction.

( ) 2. The final choice of scope and sequence of subject-matter content is left to me, but there are others whose job includes making recommendations or suggestions.

( ) 3. Within certain limits I can choose the scope and sequence of subject-matter content.

( ) 4. As a member of a group or committee, I share with others the job of deciding the scope and sequence of subject-matter content.

( ) 5. I do not choose the scope and sequence of subject-matter content. They are laid down for me by others.
4. If you chose answer 2, 3, 4 or 5 in the question just above, you were indicating that some other person or persons were somehow involved in deciding upon the subject-matter content to be used in your classroom. If you chose answer 2, 3, 4 or 5, please write below the names and positions of the other persons involved.

</tbody>
</table>

6. Suppose someone on the staff has an idea that he seriously thinks could help the school. What steps should he take to make sure his idea gets a hearing where it counts?
7. Please circle the letters that indicate your best estimate of the influence of teachers and principals on the areas of school life listed at the left.

In general, how much influence...

...do you feel the principal has on how your school is run? Ni Li Si Ci Gd1 Hno

...do you feel the teachers as a group have on how your school is run? Ni Li Si Ci Gd1 Hno

...does the principal of your school have with teachers in your school when it comes to activities and decisions that affect the performance of their classroom activities? Ni Li Si Ci Gd1 Hno

...do the teachers in your school have on the principal when it comes to his activities and decisions that affect the performance of your school? Ni Li Si Ci Gd1 Hno

8. Listed below are five reasons generally given by people when they are asked why they do the things their superiors suggest or want them to do. Please read all five carefully. Then number them according to their importance to you as reasons for doing the things your principal suggests or wants you to do. Give rank "1" to the most important factor, "2" to the next, etc., using numerals 1 through 5 only once.

I do the things my principal suggests or wants me to do because:

--- I admire him for his personal qualities, and I want to act in a way that merits his respect and admiration ---
I respect his competence and good judgment about things with which he is more experienced than I. He can give special help and benefits to those who cooperate with him. He can apply pressure or penalize those who do not cooperate. He has a legitimate right, considering his position, to expect that his suggestions will be carried out.

F. Openness of System or Subsystem

<table>
<thead>
<tr>
<th>Repeatedly</th>

2. Suppose* Teacher X develops a particularly useful and effective method for teaching something. In Teacher X's place, would most of the teachers you know in your school describe it briefly at a faculty meeting and offer to meet with others who wanted to hear more about it?

   ( ) Yes, I think most would do this.
   ( ) Maybe about half would do this.
   ( ) No, most would not.
   ( ) I do not know.

*For making available the original phrasing upon which this item is based, and for the original phrasing of similar items exhibited later on, we are indebted to John Wallen, Ray Jongeward, and Michael Giammetteo of the Northwest Regional Educational Laboratory in Portland, Oregon. We have altered the form and phrasing of the original items.
3. For each of the following items, please indicate the extent of agreement with the item as it applied to you by circling the appropriate numeral.

<table>
<thead>
<tr>
<th>Strongly agree</th>
<th>Agree</th>
<th>Mildly agree</th>
<th>Mildly disagree</th>
<th>Disagree</th>
<th>Strongly disagree</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>5</td>

<td>3</td>
<td>2</td>
<td>1</td>
</tr>
</tbody>
</table>

a. It's easy to talk with my superiors about my job.**

b. I cannot speak my mind to my co-workers.

c. My co-workers welcome opinions different from their own.

d. My superiors keep me informed about what is happening in the school.

4. Suppose someone on the staff has an idea that he seriously thinks could help the school. What steps should he take to make sure his idea gets a hearing where it counts?

5. Suppose Teacher X feels hurt and "put down" by something another teachers has said to him. In Teacher X's place, would most of the teachers you know in your school be likely to...

a. ...tell the other teacher that they felt hurt and put down?

   ( ) Yes, I think most would.
   ( ) Maybe about half would.
   ( ) No, most would not.
   ( ) I do not know.

b. ...tell their friends that the other teacher is hard to get along with?

( ) Yes, I think most would.
( ) Maybe about half would.
( ) No, most would not.
( ) I do not know.

6. Suppose you are in a committee meeting with Teacher X and the other members begin to describe their personal feelings about what goes on in the school. Teacher X then quickly suggests that the committee get back to the topic and keep the discussion objective and impersonal. How would you feel toward X?

( ) I would approve strongly.
( ) I would approve mildly or some.
( ) I would not care one way or the other.
( ) I would disapprove mildly or some.
( ) I would disapprove strongly.

7. Suppose you are in a committee meeting with Teacher X and the other members begin to describe their personal feelings about what goes on in the school. Teacher X listens to them and tells them his own feelings. How would you feel toward X?

( ) I would approve strongly.
( ) I would approve mildly or some.
( ) I would not care one way or the other.
( ) I would disapprove mildly or some.
( ) I would disapprove strongly.

8. Suppose Teacher X strongly disagrees with something B says at a staff meeting. In Teacher X’s place, would most of the teachers you know in your school...

a. ...seek out B to discuss the disagreement?

( ) Yes, I think most would do this.
( ) Maybe about half would do this.
( ) No, most would not.
( ) I do not know.

b. ...keep it to themselves and say nothing about it?

( ) Yes, I think most would do this.
( ) Maybe about half would do this.
( ) No, most would not.
( ) I do not know.
9. Suppose Teacher X were present when two others got into a hot argument about how the school is run. Suppose Teacher X tried to help each one understand the views of the other. How would you feel about the behavior of Teacher X?

( ) I would approve strongly.
( ) I would approve mildly or some.
( ) I would not care one way or the other.
( ) I would disapprove mildly or some.
( ) I would disapprove strongly.

10. Suppose Teacher X were present when two others got into a hot argument about how the school is run. And suppose Teacher X tried to get them to quiet down and stop arguing. How would you feel about the behavior of Teacher X?

( ) I would approve strongly.
( ) I would approve mildly or some.
( ) I would not care one way or the other.
( ) I would disapprove mildly or some.
( ) I would disapprove strongly.

11. To what extent does your principal engage in the following kinds of behavior? In answering, please circle the one number in each row that best describes the behavior of your principal.*

<table>
<thead>
<tr>

</table>

a. Brings to the attention of teachers educational literature that is of value to them in their jobs.  

b. Has the relevant facts before making important decisions.

*Items 11a and 11b, and others of similar form exhibited below, are taken from:

12. How long does it normally take you to find out whether or not you are doing your job successfully? Please circle the words that come closest.**

One One One Six One Five
day week month months year years Longer

13. The purpose of this question is to determine how administrators handle demands from community action groups. We are interested in your current methods for handling such demands and also those that have worked in the recent past. Answer column B only if you held your post at the time or know it well enough historically to make a judgment. Please circle the number below corresponding to the following scale which best represents your perceptions of how you would deal with these groups.

2. Agree 4. Disagree

A  B
At Present Before 1970

a. It is important to try to protect the teacher-learner process of what goes on in the classroom from being disrupted by outside forces.

b. The way to protect the classroom from disruption is to have outside groups deal first with either an associate or assistant superintendent.

c. The way to protect the classroom from disruption is to have outside groups deal with the principal.

**Items 12, 13 and 20 are adapted from:

13. (Continued)

d. It is highly improbable in these times that we are going to be able to protect the classroom from direct outside influences. Therefore, we just have to try to plan for outside demands and give the system some warning.

e. One way to protect the classroom is to be on the offensive instead of the defensive with these groups: to persuade them to do otherwise instead of reacting to them.

f. Maybe we cannot stop these people from disrupting our classroom procedures but there are surely some priorities. We should make changes in some areas before others.

g. Developing public relations to get the support of the larger community is a good way to deal with these kinds of splinter groups.

h. Let them change the classroom procedures if they want. We do not care.

i. This whole change process can be a reasonable one. We should sit down with them and make those changes which are best ones for the kids.

j. These outside groups usually care, not about the education of the children, but only their own power in the community. We should be very careful about dealing with them at all.
14. Is there any important information you need that is very hard to get in this job? (yes, no) 
(If yes,) please describe: 

(If yes,) do you believe the information you want is available from someone in the school district? (yes, no) (If yes,) what would you have to do to get the information? 

15. Have you received any information recently about your work or about the school that you found surprising? (yes, no) (If yes,) please describe one or two such kinds of information: 

16. Do you get any information through formal channels in this school meetings, memos, etc.) that you feel is useless? (yes, no) (If yes,) please describe one or two such kinds of information: 

17. How about the district offices? Do you sometimes get useless information from central office people? (yes, no) (If yes,) would you describe one or two kinds: 

Items 14 through 20 were written to be used by interviewers. Some could be adapted to forms appropriate to a questionnaire.
18. Do you get any information from other professionals that helps you to tell whether you are doing an effective job of teaching? (Do not count information from students, only from other professionals.) (Hand card to respondent.)

(1) No, none.
(2) Yes, once every two or three years.
(3) Yes, about once or twice a year.
(4) Yes, about once a month, maybe.
(5) Yes, more than once a month but not once each week.
(6) Yes, about once a week.
(7) Yes, more than once a week.

19. (If yes,) from whom do you get this information?

20. In what ways has the part of your job which requires you to relate to groups outside the school system (e.g., community groups, universities, governmental agencies, parents) changed in the past five years?
PETC-III SAMPLE MEMO TO INTRODUCE ORGANIZATIONAL DEVELOPMENT CONSULTANT

TO: (All staff)

FROM: (Installer; Supervisor authorizing participation)

_________________________ has volunteered for training in a program developed by the Northwest Regional Educational Laboratory. The program, which meets intermittently throughout the next eight months, is the last in a series of three designed to prepare educational training consultants (PETC-III). It focuses on organizational development (OD).

During her/his training period, __________________________ will be carrying out an organizational development project designed to help us strengthen our organization. She/he will be contacting you from time to time for information as work on the project proceeds. Her/his OD work will be monitored by the program trainers, ______________________ and ______________________.

Because I feel our whole organization will benefit from ______________________'s training in OD, I urge you to give her/him your full cooperation.
MAKING IT PERFECTLY CLEAR

Collecting All Data (to Bring with You to the First Meeting)

About 75 percent of the meeting will be spent in the analysis of the work you do in these preworkshop assignments. The rest of the time will be spent in using your analysis as the basis for diagnostic work and in planning.

It is crucial, therefore, that you do the work and that you bring it with you. The training depends on your having information about your organization.
SAMPLE MEMO FOR MEETING 2

TO: Participants in PETC-III Training
FROM: (Trainers)
RE: Meeting 2 of PETC-III, March 22-24, 1975

Reminder

The next meeting of PETC-III will be held at the
The meeting will start at 9:00 a.m., March 22. The schedule for each day
will be 9:00 a.m. to 5:00 p.m.

Reading Assignment

Chapter I of Organizational Development in Education. The
Meaning and Vulnerability of Educational Evaluation,
page 9, through Current Needs and Changes of Society,
page 45

Chapter II:
Characteristics of Key Functions, page 55, through
The Concept of Organizational Health, page 74
Understanding Any Particular Educational Organization,
page 79 through Organizational Boundaries of a School System, page 113

Chapter III:
Complex Systemic Change, page 138 through Figure 12
and its discussion

Resources

Enclosed are two reprints.*

"An Interview with Roger Harrison." by Noel Tichy. Journal of

"Organizational Crisis and Change." by S. L. Fink and others.
Journal of Applied Behavioral Science. 7: 38-41 and
390-394; 1971.

We hope you will find them useful.

*NOTE: Trainers of PETC-III should obtain multiple copies of these
reprints from the sources indicated.
One thing to remember about the information you are collecting is that
information collecting on one thing may be useful in providing clues to
something else. Remain open to the possibility of learning something
about OD in addition to what you are planning for.

Keep in mind the larger framework of PETC-III as you do your work. Keep
looking for clues for normative and structural change that will improve
the functional capacity of your organization.

If you have a reason for calling either of us, please feel free to do so.
You may call collect at _________.

SAMPLE MEMO FOR MEETING 3

TO: Participants in PETC-III training

FROM: (Trainers)

RE: Meeting 3 of PETC-III

The third meeting of PETC-III will start at 9:00 a.m. on __________ at __________. The training meeting will be over at 5:00 p.m. on __________.

Reading Assignment

Before coming to the meeting please read Chapter V in the central ideas book. Also read:

Resource 18: Models and Their Functions by Gordon Lippitt

Resource 19: The Power of Abstraction—Model Building as a Way of Life by William Cozatt

Meeting 3 will consist of five activities:

Activity 8: Identifying Critical Issues in the Phases of Consultation

Activity 9: Collecting Information from Self and Others About Self as Consultant

Activity 10: Giving and Receiving Feedback About Consultant Self

Activity 11: Creating Models

Activity 12: Planning Organizational Development Work (III)
SAMPLE MEMO FOR MEETING 4

TO: Participants in PETC-III Training
FROM: (Trainers)
RE: Meeting 4 of PETC-III

Enclosed you will find another copy of Procedure 21: Intervention Case Papers. Please do this assignment individually. The work of Activity 13 will be based on your work on Procedure 21. Review Resource 21.

This assignment will involve you personally and separately from others in making an intervention.

This work should contribute to an increased awareness of intervention theory issues. It will also enrich the work of the training unit and the learning group for practice of reconstructing theories.

Meeting 4 will consist of three activities:

Activity 13: Evaluating Intervention Theories
Activity 14: Introducing the Process of Designing
Activity 15: Planning Organizational Development Work (IV)

We will begin Meeting 4 at 9:00 a.m. sharp on...(date and place).

If you need clarification in Procedure 21, please call collect (503) 248-6868.
SAMPLE MEMO FOR MEETING 5

TO: Participants in PETC-III Training

FROM: (Trainers)

RE: Final (imagine!) Training Meeting (Meeting 5 of PETC-III)

The final meeting for the PETC-III Workshop will be:

- Held at Pamela Newcomb’s home, July 8, 9, 10 and 11
- From 9:00 a.m. to 5:00 p.m. daily
- Extended on July 10 to about 7:00 p.m. for purposes of CELEBRATION

Be sure to bring your copies of:

- Organization Development in Schools
- Handbook for Organization Development in Schools
- The Universal Traveler
- Your Activities Records for Meetings 4 and 5

Before coming to the training session:

Read Chapters I, II, III and IV in the central ideas book (sure—go ahead and read the rest!)

Complete the attached assignment, Procedure 28, "Premeeting Assignment for Summarizing PETC-III Organizational Development Work." Note carefully the cover page of the assignment, which will give you important information about the significance of the assignment. Be sure to bring copies as requested on the cover page.

If you have any questions, call (503) 248-6868. Enclosed you will find directions to Pamela’s home.
