In order to determine (1) characteristics of non-returning students, (2) reasons for attrition, and (3) student evaluation of Delaware County Community College (DCCC), questionnaires were mailed to all full and part-time students who attended the winter 1976 term but who did not register for the fall 1976 term. Drawn from 405 responses, characteristics of the survey population included the following: 89.6% were Caucasian; 17.1% were veterans; 34% had not matriculated; 58.8% were working toward an Associate Degree; 70.5% had withdrawn at least 7-12 months prior to the study; 57.8% had been part-time students; 42.7% were employed 36 or more hours weekly; 69.5% received no financial aid; and 90.1% had never been on academic probation. Major reasons for leaving DCCC were transfer to another institution (22.4%), home or work obligations (12.2%), financial problems (10.2%), and moving from the area (9.1%). Asked to choose three factors which, if changed for the better, would encourage respondents to stay at DCCC, the scheduling of classes, course content in major fields, and counseling/guidance services were ranked highest. The majority of respondents expressed satisfaction with their experiences at DCCC and expected to return at some future date. In addition to the narrative summation, response data are presented in graph form for each questionnaire item. (RT)

STUDY TITLE: Non-Returning Students Survey Winter '76 - Fall '76

OBJECTIVES:

1. To determine the reasons for attrition at DCCC between the Winter '76 term and the Fall '76 term. Aimed at identifying reasons for negative attrition.

2. To obtain the non-returning students' evaluation of various aspects of DCCC.

3. To determine the characteristics of a non-returning student at DCCC.

SAMPLE:

Questionnaires were mailed to all full and part-time students who attended the Winter '76 term but did not register for classes for the Fall '76 term. This constituted an original mailing of approximately 1550 students. One hundred (100) questionnaires were returned as unforwardable. A postcard follow-up was mailed on 2/14/77 and the total usable responses received in time for inclusion in the analysis is 403.

PROCEDURES:

A nineteen (19) item questionnaire was developed using the NCHEMS model of an attrition questionnaire with modifications made to suit the population characteristics at DCCC. Questions 1-5 and 7-14 elicited responses which were demographic in nature. Questions 15, 17, and 18 were aimed at identifying aspects and areas of DCCC which need improvement. Question 19 concerned the students' current plans and activities. Question 6 was a short open-ended item aimed at discovering the primary reasons for leaving DCCC in his/her own words. Question 16 was a scaled item rating various reasons for not returning. Items 6, 15, 16, and 17 were most directly concerned with ascertaining negative attrition.

As stated in Objective 1, the primary purpose of this study is to determine reasons for negative attrition. Question 15 asks the respondents to choose their primary goal in attending DCCC and the degree of satisfaction of this goal. To the degree that these goals were not satisfied negative attrition exists.
ORGANIZATION OF THE REPORT:

Part I of the results is purely descriptive with no attempt made at inference, extraction of negative attrition, or comparison of subgroups within the respondents. The chief purpose of Part I is to report frequencies of responses and to suggest avenues for further analysis.

The purpose of Part II is to zero in on negative attrition and to attempt to identify characteristics of those who are likely to leave DCCC without reaching their stated goals.

PART I

A. Demographic Data

Questions 1-5 and 7-14 are designed to elicit demographic information about the non-returning student. The purpose of this information is to provide for future analysis and comparison of the various subgroups of non-returning students.

Figure 1 provides a breakdown of non-returning students based on reported civil rights category. 89.6% of non-returning students reported themselves as white, other than Hispanic and 3% were black/negro. These percentages do not differ significantly from the racial makeup of the entire student body during the Winter term 1976.

80.1% of the respondents were not veterans (Figure 2) and 38.8% were working on their Associate's Degree during the Winter 1976 term. 34% were non-matriculated students and 6.2% were in programs leading to a certificate.

Figure 4 shows that 70.5% of the respondents withdrew from DCCC at least seven months to one year prior to this study.

35% of the non-returning students reported themselves as full-time students for their last two semesters enrolled, while 57.8% indicated that they were part-time during this period (Figure 5).

Figure 6 indicates the employment status of the respondents while they attended DCCC. 42.7% were employed 36 or more hours week and 21.3% were not employed at all while they were students.

69.5% of the respondents reported receiving no financial aid while they were students, while 12.4% received aid under the GI Bill. 8.9% reported receiving "other" aid while at DCCC.
Table 1 lists the type aid indicated by the respondents checking "other".

90.1% indicated that they were never on academic probation while at DCCC.

The responses to question 13 were graphed in Figure 8. 49.6% never changed their major while at DCCC and 39.7% never declared a major. These figures may reflect the fact that most of the respondents were part-time students and perhaps had not completed enough credits to make a decision on a major field of study, or were only interested in selected courses and not in pursuing a degree or certificate.

Over three-fourths (81.9%) of the respondents indicated that the highest degree they currently hold is a high school diploma or GED equivalency (Figure 9).

B. Evaluation of Aspects of Education at DCCC

Question 15 asked the respondents to indicate their primary reason for attending school and to rate their degree of satisfaction of this reason. Table 3 presents the results of this question. Most of the respondents initially enrolled in DCCC to complete the first two years of college in order to transfer. Since none of the respondents achieved this goal, further analysis is indicated to determine why they left prior to completing. It should be noted that only 165 of the 403 responses were usable due to either missing data or incorrect filling out of this item. Future surveys will attempt a different format to remedy this problem.

Item 16 attempted to ascertain all the reasons why a particular student might leave school and the extent that each of these reasons was in operation in the respondent's decision to leave DCCC. These reasons were divided into four major categories: academic, employment, financial, and personal circumstances. A single reason category "other" was included, and the respondent was asked to specify a reason if it was not included in the question. In all, 25 possible reasons were presented from which the respondent could choose. Figures 10-35 graphically represent each of these choices and degree to which each was a reason for those selecting that response. Table 5 is a summary of the self-reported reasons for leaving DCCC elicited by Question 6.

The respondent's evaluation of other aspects of DCCC was elicited by Question 17. Figures 36-60 represent these evaluations.

Item 18 asked the respondents to choose three factors from the list in Question 17 which, if changed for the better, would have most encouraged the respondents to stay at DCCC. Respondents were asked to list these in their order of importance. These
cannot be considered causes of negative attrition but can be identified as possible contributors which warrant further analysis. Table 4 lists the five areas in which students perceive a need for improvement and their ranks.

The final item sought information about the current activities of non-returning students. Figures 61 and Table 6 present the results.

Respondents were urged to make comments and recommendations concerning the survey or any aspect of DCCC on the reverse side of the instrument.

Fifty-nine (59) respondents included comments. The most prevalent comment was that the respondent enjoyed DCCC and would return at some future date.

Recommendations included the suggestion that more night courses be offered and that course offerings both night and day be increased to help working students enroll for more courses and complete degrees at night.

Respondents also felt that scheduling, counseling and Veteran's counseling could be improved.

Only one student felt that instruction was poor; however, many felt that the variety of courses could be increased.

DELAWARE COUNTY COMMUNITY COLLEGE
NON-RETURNING STUDENTS SURVEY
WINTER 1976 - FALL 1976

PART II

Susan J. Wetzel
MSPR
October 1977
NON-RETURNING STUDENTS SURVEY - PART II

PURPOSE:

This part of the Non-Returning Students Survey analyzes the questionnaire responses by curriculum. This analysis gives appropriate staff a profile of the non-returning student for each curriculum.

Part I of the Non-Returning Students Survey reported total frequencies for those non-returning students responding to a mailed questionnaire. In Part I no attempts were made at inference. The purpose was to report demographic data and survey responses.

For detailed descriptions of the sample, procedures, and frequencies, see the Non-Returning Students Survey, Part I, April 1977. Copies of this report are available in the Office of Management Systems, Planning, and Research (MSPR).

PROCEDURES:

SPSS Crosstabs Program was used to analyze both responses to the questionnaire and appropriate data base items for each respondent.

RESULTS:

The results are reported by curriculum with no differentiation made between matriculated and non-matriculated students.

Table I presents the numbers of non-returning students responding to the questionnaire for each curriculum. It also presents the number of total enrolled for that curriculum during Fall 1976. The undeclared majors experienced the highest attrition rate (11.68%), and Nursing, the lowest (1.39%). Other than undeclared majors, Accounting lost most students with a 10.34%. This means that one out of every 10 students enrolled in Accounting did not return for the Fall 1976 semester.

Table II reports the cumulative grade point average by curriculum. For this statistic, those with a GPA of 1.90 are not included. The only curriculum with an average GPA below 2.50 is Nursing. Most GPA's are greater than 3.00, which seems to indicate that the average student does not leave DCCC because of poor grades.
The average age of non-returning students by curriculum is presented in Table III. Since information on the average age of all students enrolled in each curriculum is not readily available, appropriate program directors and chairpersons should decide if the mean age presented here is atypical for his/her curriculum.

The mean number of credit hours completed by the non-returning students is reported in Table IV. With the exception of Executive Secretarial and Hotel/Restaurant Management, most non-returning students completed 20 credits before leaving DCCC. The percent of off-campus students is also listed in Table IV. With the exception of Administration of Justice, the overwhelming majority of non-returning students were on-campus students.

Of the 412 respondents, only three had scores on the DCCC Placement Test recorded in the student data base.
