Dentistry: A Select List of U.S. Government Produced Audiovisual Materials

National Archives and Records Service (GSA), Washington, D.C.

77

37p.

National AudioVisual Center, National Archives and Record Service, General Services Administration, Washington, D.C. 20409

MF-$0.83 Plus Postage. HC Not Available from EDRS.

Audiovisual Aids; *Catalogs; *Dentistry; *Filmographies; Films; Filmstrips; *Indexes (Locators); Slides; Video Tape Recordings

The National AudioVisual Center's materials on dentistry are presented in this catalog under 16 subject areas. Most of the materials listed are films; but books (accompanying an audiovisual program), filmstrips, slidesets, and videocassettes are also included. Entries contain all the information pertinent to a particular title, including a physical description of the material, information for purchasing or renting, a brief content description, and additional notes on use or production. (VT)
An Ounce Of Prevention...

You can give your own program a "New Look In Preventive Dentistry" with this comprehensive television course produced by the U.S. National Medical Audiovisual Center. See how patients can be effectively taught to control and prevent their own dental disease and the tremendous improvement possible in a very short time!

The New Look in Preventive Dentistry

165 minutes, ¾ inch Videocassette $168.00

See page 11

Darkrooms & Cameras

An audiovisual lecture series specially designed by the Bureau of Radiological Health to assist dental educators in teaching students how to set up a darkroom and process film. This practical program is suitable for use in dental hygiene and dental assisting programs, and useful for practicing dentists and auxiliaries.

Dental Radiology Lecture Series I and II

$39.50

Available in slide or filmstrip formats—cassettes or reels

See page 21

The Woman's Role In Dentistry

By focusing on successful women in the dental field, from those in general practice to those who specialize in oral surgery, teaching, pedodontics and hypnotism this award winning film shows how women can, and should, fill a vital gap in the ranks of the dental profession.

Ideal for both the first year dental student and the career counselor.

Where I Want To Be: The Story of a Woman Dentist

A CINE Golden Eagle film produced by the U.S. Division of Dental Health

28 minutes, 16mm, color, $127

See page 5

For The Very Young

These sing-along, play-along involvement programs are an invaluable aid in teaching children the meaning of oral hygiene:

Michael and Pedro

$15/series

See pages 11 and 12 for full description and order information.
How to Use the Catalog

The National AudioVisual Center's materials on DENTISTRY are presented in this catalog under the dental subject headings outlined in the Table of Contents. There are 16 areas, from Anatomy to Restorations. For easy access, if the title is known, consult the alphabetical Title Index in the back of the catalog to find the page(s) on which the entry appears.

Example:

<table>
<thead>
<tr>
<th>Title</th>
<th>The National AudioVisual Center</th>
</tr>
</thead>

About Our Services...

The National AudioVisual Center was created in 1969 to serve the public by (1) making audiovisual materials produced by the United States Government available for public use through distribution services and (2) serving as the central clearinghouse for all Federal audiovisual materials.

Through the Center's distribution programs the public has access to over 8,000 audiovisual materials covering a wide range of subjects. Major subject concentrations in the Center's collection include education; medicine, dentistry, and the allied health sciences; aviation and space technology; vocational and management training; safety; and the environmental sciences.

**Distribution Programs**

Federal audiovisual materials are available through the following programs:

**Sales.** Audiovisual formats available for purchase from the Center include motion pictures, video formats, slide sets, audiotapes, and multimedia kits. Conversion to other media formats can be supplied.

Preview prior to purchase is available for 16mm motion pictures.

**Rental.** Only 16mm motion pictures, representing 80 percent of the Center's collection, are available through the rental program.

**Loan Referrals.** Free loan distribution of 16mm motion pictures is often available to the public from commercial distributors and from regional Federal agency offices. The Center refers the user to the closest free loan distributor.

**Information Services**

To keep the public informed about the availability of Federal audiovisual materials, the Center sponsors the following information services:

**Reference.** For questions on Federal audiovisual materials, a trained reference staff will respond quickly to telephone and written requests.

**Printed Materials.** Catalogs and select listings of current titles available for sale or rent are published regularly. Also available are brochures and filmographies on specialized subjects and on materials produced by individual Federal agencies.

**Master Data File.** The Center is responsible for maintaining a master catalog file on audiovisual materials produced by the United States Government.

The National AudioVisual Center is here to serve you, the public. Let us help make your audiovisual program a success.

For more information, write to:

National AudioVisual Center (NAC)

or call: (301) 763-1896
This catalog is a select listing of audiovisual materials distributed by the National AudioVisual Center appropriate for professional dental education. The areas of dentistry covered in this catalog include a wide range of key subjects from anatomy and physiology to technical procedures from career training to patient relations. And many more.

These professional training and continuing education materials have been developed under the auspices of the United States Government over the last few years. The production of these instructional materials is ongoing so this catalog will be supplemented with announcements of new materials on professional dental education.

The National AudioVisual Center also has more than 8,000 titles on topics other than DENTISTRY—use our convenient postage-paid order form in the back of the catalog to request more information.
Anatomy and Physiology

Anatomy of the Head and Neck—A Series
12 16mm films, color, 1969
Title No. 007638/AA
Produced in cooperation with Loyola University School of Dentistry.

- **Boundaries of the Carotid Triangle**
  12 min, 16mm film, color, 1969
  Title No. 183750/AA
  Demonstrates the boundaries of the carotid triangle.

- **The Carotid Triangle**
  12 min, 16mm film, color, 1969
  Title No. 202450/AA
  Demonstrates the deep dissection of the carotid triangle. Uses a series of drawings to show its major structures.

- **Lateral Neck Superficial Structures**
  19 min, 16mm film, color, 1969
  Title No. 002508/AA
  Demonstrates the vessels and nerves transversing the external cervical fascia in this dissection of superficial structures of the anterior and lateral neck. Uses diagrams for clarification.

- **Masseter and Temporal Muscles**
  14 min, 16mm film, color, 1959
  Title No. 134611/AA
  Demonstrates, on a cadaver, an anatomical dissection of the head, neck, temporomandibular joints, masticatory muscles, deep spaces of the face, and the third division of the trigeminal nerve.

- **The Parotid Gland and Facial Nerve**
  14 min, 16mm film, color, 1957
  Title No. 004370/AA
  Demonstrates the structures surrounding, contained in, and related to the parotid gland.

- **The Pharynx—Topographical Anatomy**
  9 min, 16mm film, color, 1969
  Title No. 002342/AA
  Views the topography of the pharynx from the posterior neck. Demonstrates the extent and volume that edema may assume.

- **Pterygoid Muscles and Infrapterygoid Structures**
  17 min, 16mm film, color, 1969
  Title No. 134613/AA
  Illustrates anatomy of the lateral aspect of the head to the pterygoid muscles. Shows nerves and vessels to the base of the skull.

- **Submandibular Triangle**
  14 min, 16mm film, color, 1959
  Title No. 002358/AA
  Uses dissection and drawings to demonstrate the boundaries and the structures of the submandibular triangle.

- **The Submental Triangle**
  8 min, 16mm film, color, 1967
  Title No. 003591/AA
  Presents drawings and a dissection showing the boundaries and relationship of the submental triangle.

- **The Temporomandibular Joint**
  8 min, 16mm film, color, 1969
  Title No. 003646/AA
  Demonstrates, by means of dissection and artist's illustrations, the anatomy and function of the temporomandibular joint.

- **The Thyroid Area**
  6 min, 16mm film, color, 1969
  Title No. 003673/AA
  Demonstrates dissection of the deeper structures of the thyroid area diagrammatically.

- **The Tracheal Triangle**
  8 min, 16mm film, color, 1969
  Title No. 003736/AA
  Sale $36.25
  Demonstrates the boundaries and major structures of the tracheal triangle, also known as the pre- or upper carotid triangle. Uses drawings for clarification.

Management of the Tuberosity Area in Periodontics
12 min, 16mm film, color, 1969
Producer USVADT
Title No. 002342/AA
Sale $54.50
Demonstrates the use of an internal beveled flap procedure in the treatment of an infrabony pocket involving a maxillary molar. Explains the rationale of this procedure and shows postoperative results.

Osteous Surgery in the Maxilla, Part 1
18 min, 16mm film, color, 1969
Producer USVADT
Title No. 002342/AA
Sale $81.75
Demonstrates the surgical elimination of supra- and infra-periodontal bony defects in the maxilla. Shows the osseous contouring to establish physiologic architecture of the soft tissues.

Careers

The Dental Assistant—A Career of Service
13 min, 16mm film, color, 1962
Producer USNMAC
Title No. 264450/AA
Sale $59.00
Discusses the work and training of the dental assistant—explaining what the assistant does, how and where training is received and what the future holds for a person choosing the profession of dental assistant.

That's What We're Here For
32 min, 16mm film, color, 1975
Producer USVADT
Title No. 007718/AA
Sale $145.25
Depicts all phases of Veterans Administration hospital dentistry, including the various residency programs, graduate training, and continuing education. Features a dental personnel at six major hospitals throughout the U.S.

Where I Want To Be—The Story of a Woman Dentist
28 min, 16mm film, color, 1973
Producer USDDH
Title No. 002230/AA
Sale $127.00
Details the assistant role in making alginate impressions. Stresses that the material is used in a prescribed, orderly, standardized manner, the results are uniform and accurate.

Dental Assisting

Alginarte Impression and the Dental Assistant
19 min, 16mm film, color, 1972
Producer USVA
Title No. 005544/AA
Sale $31.75
Demonstrates the assistant's role in making alginate impressions. Stresses that the material is used in a prescribed, orderly, standardized manner, the results are uniform and accurate.

Dental Assistant Utilization—Alginarte Procedure
19 min, 16mm film, color, 1976
Producer USVADT
Title No. 002323/AA
Sale $66.25
Shows how an alginate restorative procedure can be accomplished in an environment which is comfortable for the patient, dentist, and the assistant, by using the principles of motion economy and work simplification. From the initial preparation of instruments, through the anesthetic injection, to the cavity preparation and restoration, the assistant demonstrates the coordinated teamwork which contributes to a smooth functioning operation.
Examination of the Mouth
8 min, 16mm film, color
Producer USPHS
Title No. 310590/AA
Sale $35.25
Demonstrates proper technique for examination.

Modern Operative Dentistry
150 min, ¾ in videocassette, color, 1971
Producer USDHIC Sponsor USNMAC
Sale $154.00
Discusses and demonstrates the principles of operative dentistry, including the examination of the oral cavity, the use of radiographs, diagnostic casts, treatment planning, and development of the surgical field.

Oral Cancer—Detection and Diagnosis
94 x 2 slides, silent, color, 1967
Producer USCDDG
Sale $16.00
Explains techniques used to detect oral cancer. Illustrates normal and abnormal oral and perioral soft tissue and shows biopsy techniques. Accompanied by programmed text.

Oral Cancer—Intra Oral Examination
6 min, 16mm film, color, 1975
Producer USVA
Sale $27.25
Demonstrates an auditory examination for early signs of oral cancer as well as shows where different examinations can be accomplished in an efficient manner.

Oral Cancer—Detection and Diagnosis
94 x 2 slides, silent, color, 1967
Producer USCDDG
Sale $16.00
Explains techniques used to detect oral cancer. Illustrates normal and abnormal oral and perioral soft tissue and shows biopsy techniques. Accompanied by programmed text.

Oral Cancer—Intra Oral Examination
6 min, 16mm film, color, 1975
Producer USVA
Sale $27.25
Demonstrates a methodical procedure for examination of the intra-oral soft tissues. Presents six cases of early cancer in this area and discusses their clinical signs.

An Overdenture Technique, Part 1, Diagnosis
9 min, 16mm film, color, 1975
Producer USVA
Sale $40.75
Shows how the overdenture procedure provides a practical and simple alternative to conventional complete dentures. Emphasizes selection of roots to be retained and demonstrates the advantages of the overdenture technique. Shows how healthy retained roots can help to preserve the residual bone.

Panographic Diagnostic Pathology Radiolucenties, Part 2
9 min, 16mm film, color, 1968
Producer USVA
Sale $40.75

Panographic Diagnostic Pathology Radiolucenties, Part 1
11 min, 16mm film, color, 1968
Producer USVA
Sale $50.00
Illustrates the radiographic findings in a number of cases, showing that few are radiographically diagnostic. Stresses the importance of providing different diagnosis using every means available. Discusses etiology and treatment.

Panographic Diagnostic Pathology Radiolucenties
9 min, 16mm film, color, 1968
Producer USVA
Sale $50.00
Illustrates the radiographic findings in a number of cases, showing that few are radiographically diagnostic. Stresses the importance of providing different diagnosis using every means available. Discusses etiology and treatment.

Precancerous Lesions, Prevention of Oral Cancer, and Oral Cancer Control
96 min, ¾ in videocassette, color, 1972
Producer CADENA Sponsor USNMAC
Sale $116.50
Reviews the prevalence and causes of mouth cancer, the risk factors of tobacco and alcohol, and the methods of diagnosis of early cancer by the dentist. Presents clinical examples of precancerous and cancerous lesions. Demonstrates cytology and biopsy. Discusses treatment, techniques, and problems which fall within the dentist's responsibility. Points out that with the utilization of dental skills and a team approach, patients can be rehabilitated and social problems prevented.
Emergency Care

Dental Office Emergencies

Part 1
14 min, 16mm film, color
Title No. 284625/AA
Sale $63.50
Teaches the emergency procedures to be followed when physical and emotional crises occur. Shows the rendering of emergency treatment based upon a patient's symptoms of anxiety and tension.

Part 2
17 min, 16mm film, color
Title No. 284626/AA
Sale $77.25
Teaches the emergency procedures to be followed when physical and emotional crises occur. Shows the rendering of emergency treatment based upon a patient's symptoms of anxiety and tension.

Part 3
14 min, 16mm film, color
Title No. 284627/AA
Sale $63.50
Teaches the emergency procedures to be followed when physical and emotional crises occur. Shows the rendering of emergency treatment based upon a patient's symptoms of anxiety and tension.

Part 4
14 min, 16mm film, color
Title No. 284628/AA
Sale $63.50
Part four of a four-part, programmed instructional course designed to teach the emergency procedures to be followed when physical and emotional crises occur. Shows the rendering of emergency treatment based upon a patient's symptoms of anxiety and tension. By Dean W. Darby, DDS. Continuing Education Branch, Department of Health, Education, and Welfare, Public Health Service, San Francisco, California.

Emergency Dental Treatment
29 min, 16mm film, color, 1971
Producer USSN
Title No. 020076/AA
Sale $131.75
Teaches medical and para-medical personnel an emergency treatment of toothache, periocoronitis, periodontal abscesses of necrotizing ulcerative gingivitis on isolated sea or shore duty.

Endodontics

Bleaching the Endodontically Treated Discolored Tooth
14 min, 16mm film, color, 1970
Producer USVA
Title No. 002947/AA
Sale $63.50
Demonstrates bleaching the discolored anterior tooth with a powerful oxidizing or reducing agent.

Dental Assistant Utilization—Endodontics—Filling the Root Canal
10 min, 16mm film, color, 1976
Producer USVADT
Title No. 008396/AA
Sale $45.50
Emphasizes the pre-arrangement of instruments, proper positioning, and coordinated 4-handed teamwork. Also demonstrates how the root canal filling procedure can be accomplished in an efficient manner and in a comfortable environment.

Dental Assistant Utilization—Endodontics—Initial Visit
11 min, 16mm film, color, 1976
Producer USVADT
Title No. 008395/AA
Sale $50.00
Explains various procedures which will allow for efficient coordinated functioning by the dentist and the assistant. Emphasizes the principles of motion economy and work simplification.

Endodontic Therapy—Asymptomatic Periapical Pathosis—Non-Surgical Approach
16 min, 16mm film, color, 1969
Producer USVA
Title No. 301656/AA
Sale $57.75

Endodontics—A Series
6 16mm films, color
Producer USN
Title No. 007129/AA
Sale $490.25

Endodontics—Filling the Root Canal
13 min, 16mm film, color, 1970
Title No. 005053/AA
Sale $59.00
Shows how root canal filling obliterates the canal spaces and accomplishes an aseptic seal to protect the tooth against oral irritants.

Endodontics—Preparation of the Root Canal
16 min, 16mm film, color, 1970
Title No. 005002/AA
Sale $72.75
Demonstrates the latest and correct techniques and procedures for accomplishing a thorough endodontic preparation. Stresses the preparation of the upper central incisor root canal.

Endodontics—Pulp Morphology and Effective Access, Diagnosis and Case Selection
28 min, 16mm film, color, 1971
Title No. 002079/AA
Sale $127.00
Discusses the structure of the pulp of the tooth, diagnosis, and case selection.

Endodontics—Pulp Morphology and Effective Access, Part 1, The Anterior Teeth
20 min, 16mm film, color, 1971
Title No. 002080/AA
Sale $90.75
Discusses the structure of the pulp of the tooth and techniques for treating anterior teeth with pulp disease.

Endodontics—Pulp Morphology and Effective Access, Part 2, The Bicuspid Teeth
11 min, 16mm film, color, 1971
Title No. 002081/AA
Sale $59.00
Discusses the structure of the pulp of the tooth and techniques for treating bicuspids teeth with pulp disease.

Endodontics—Pulp Morphology and Effective Access, Part 3, The Molar Teeth
20 min, 16mm film, color, 1971
Title No. 002082/AA
Sale $90.75
Discusses the structure of the pulp of the tooth and techniques for treating molar teeth with pulp disease.

Hemisection of Mandibular Molar
1 min, 16mm film, color, 1974
Producer USVA
Title No. 009304/AA
Sale $36.25
Shows methods used in retaining portions of teeth that might be used as abutments for fixed and removable prostheses.

A Natural Denition—Courtesy Endodontics
169 min, 1/4 in videocassette, color, 1974
Producer CHIDEN Sponsor USNMAC
Title No. 009313/AA
Sale $168.00
Demonstrates one form of endodontic therapy utilizing the multiple silver cone method of obturation. Emphasizes the practical usefulness and broad scope of application or root canal therapy to the practice of general dentistry. Recommended for professional groups.
Placing the Wax Cusp Cones

Title No. 007722/AA

Sale $59.00

Part 2
Forming the Stamp Cusps

13 min, 16mm film, color

Title No. 007722/AA

Sale $59.00

Part 2
Forming the Stamp Cusps

13 min, 16mm film, color

Title No. 007722/AA

Sale $59.00

Shows how the remaining elements of occlusion of the stamp cusps are developed after the wax cusp cones have been placed. Stresses proper formation of the internal triangular ridges and emphasizes their correct shape and direction. The axial walls of the stamp cusps are also completed.

Part 3
Forming the Shear Cusps

12 min, 16mm film, color

Title No. 007724/AA

Sale $54.50

Points out the importance of correct formation of the shear cusps. Their design must complement the previously formed stamp cusps in order to satisfy the demands of the dynamic spiral, the Curve of Spee, and the Curve of Wilson. Shows how the additive wax method facilitates the development of an occlusal morphology which is in harmony with the influence of the temperomandibular joints and the anterior guidance.

C-Osteotomy of the Mandible—Correction of a Class 2 Malocclusion

14 min, 16mm film, color, 1971

Producer USA

Sale $63.50

Part 1
An Introduction

14 min, 16mm film, color

Title No. 007722/AA

Sale $59.00

Part 1
An Introduction

14 min, 16mm film, color

Title No. 007722/AA

Sale $59.00

Presents an overview of the Denar System of Occlusal Treatment. Pantographic recordings are made of the patient's jaw movements, and these are used to set the controls of a fully adjustable articulator. Accurately programming a gnathologic instrument in this manner enables the dentist to fabricate restorations whose occlusal morphology can be harmonized to the patient's anatomic and physiologic requirements.

C-Osteotomy of the Mandible—Correction of a Class 2 Malocclusion

14 min, 16mm film, color, 1971

Producer USA

Sale $63.50

Part 1
An Introduction

14 min, 16mm film, color

Title No. 007722/AA

Sale $59.00

Part 1
An Introduction

14 min, 16mm film, color

Title No. 007722/AA

Sale $59.00

Presents an overview of the Denar System of Occlusal Treatment. Pantographic recordings are made of the patient's jaw movements, and these are used to set the controls of a fully adjustable articulator. Accurately programming a gnathologic instrument in this manner enables the dentist to fabricate restorations whose occlusal morphology can be harmonized to the patient's anatomic and physiologic requirements.

Part 2
Initial Reference and Clutch Construction

12 min, 16mm film, color

Title No. 007700/AA

Sale $54.50

Part 3
Pantographic Recording

16 min, 16mm film, color

Title No. 007701/AA

Sale $72.75

Presents indications and demonstrates procedures for retrograde root canal filling.

Root Amputation of First Maxillary Molar Mesial Buccal Root

9 min, 16mm film, color, 1974

Producer USA

Sale $40.75

Title No. 009302/AA

Sale $45.50

Title No. 008606/AA

Sale $45.50

Title No. 007701/AA

Sale $72.75

Part 3
Pantographic Recording

16 min, 16mm film, color

Title No. 007701/AA

Sale $72.75

Shows how to program the patient, assemble the pantograph, and record the tracings. In order to make a meaningful pantographic recording, the patient must be trained to execute the required jaw movements slowly and on command.
Dynamics of Occlusion
Producer USVA 1973

Part 4: Transfer of Pantograph to Articulator
10 min, 16mm film, color
Title No. 007702/AA  Sale $45.50
Shows how the condylar elements and fossa housings are positioned to the computed intercondylar distance. The pantograph is used initially to attach the maxillary cast to the articulator. Then, the maxillary and mandibular glides of the pantograph are attached to the upper and lower bows of the articulator.

Part 5: Articulator Manipulation
9 min, 16mm film, color
Title No. 007703/AA  Sale $40.75
Demonstrates the various hand grasps, and describes the adjustments of the condylar fossae. Shows how the operator must be familiar with the proper hand grasps for manipulating a fully adjustable articulator. He should also have a knowledge of the controls of the articulator settings.

Part 6: Articulator Adjustment
17 min, 16mm film, color
Title No. 007704/AA  Sale $77.25
Demonstrates a training exercise which assists the operator in practicing sequential adjustments of the condylar controls to a pantographic record. Also shows the adjustment of the anterior guidance to the relationship of the anterior teeth.

Part 7: Field Inspection
11 min, 16mm film, color
Title No. 008397/AA  Sale $50.00
Demonstrates the method of using the field inspection gage to calibrate the fully adjustable articulator. The gage is a precision optical instrument which allows the fully adjustable articulator to be calibrated to a basic reference position. Explains how mounted casts can be transferred between identical calibrated instruments.

Part 8: 2-Instrument System
10 min, 16mm film, color
Title No. 008398/AA  Sale $45.50
Explains how the 2-instrument system, employing identically calibrated instruments, allows the use of the lab relator as a slave unit. Avoids the otherwise customary situation of the dentist requiring multiple articulators, one for each restoration in the process of fabrication.

Dental Esthetics—Tooth Arrangement
Producer USVA 1973

Part 1: Waxing on Mounted Casts
9 min, 16mm film, color
Title No. 003575/AA  Sale $59.00
Shows how the arrangement of teeth is based on a system using accurately contoured occlusal rims. Presents a 3-dimensional guide for laboratory technicians in arriving at the general tooth arrangement and perfecting their rotation.

Part 2: Semi-Direct Waxing
11 min, 16mm film, color
Title No. 003576/AA  Sale $50.00
Describes the application of five positional changes of the anterior teeth and how these changes affect the appearance of edentulous patients.

Part 3: Try-In and Adjustment
11 min, 16mm film, color
Title No. 003577/AA  Sale $50.00
Describes the application of five positional changes of the anterior teeth and how these changes affect the appearance of edentulous patients. Shows how labial titanium and the effect on soft wax forms the basis for arriving at the desired tooth position in this arrangement system.

Dynamics of Occlusion—Mandibular Teeth
16 min, 16mm film, color
Title No. 002875/AA  Sale $72.75
Shows the occluding relationships of posterior mandibular teeth in centric and eccentric contacts by means of negative wax carvings.

Over 8,000 Titles . . .
in medicine, allied health, science, safety, social sciences, education, industrial/vocational, and other subjects produced by the United States Government are also available for sale and rental from the Center.

or call (301) 763-1896

Dynamics of Occlusion—Maxillary Teeth
11 min, 16mm film, color
Title No. 002876/AA  Sale $50.00
Shows the occluding relationship of posterior maxillary teeth in centric and eccentric contacts by reading imprints made in wax by the opposing teeth.

Dynamics of Occlusion—Nomenclature
16 min, 16mm film, color
Title No. 002877/AA  Sale $72.75
Shows the basic contact and functional areas of maxillary and mandibular teeth. Exhibits their application in centric and eccentric occlusion.

Dynamics of Occlusion—Occlusal Adjustment of Natural Dentition by Selective Grinding
15 min, 16mm film, color
Title No. 002878/AA  Sale $68.00
Demonstrates the principles and procedures used to correct occlusal disharmonies. Illustrates articulator-mounted study casts.

Examination of Occlusion
16 min, 16mm film, color, 1970
Producer USVA
Title No. 010541/AA  Sale $81.75
Demonstrates the clinical procedures for examination of the entire masticatory system. Emphasizes the determination of centric relation in a patient with bruxism and tenses jaw muscles. Includes roentgenographic examination related to occlusion.

Fabrication of Biteplane
Producer USVA 1974

Part 1: Waxing on Mounted Casts
9 min, 16mm film, color
Title No. 003508/AA  Sale $40.75
Shows how an acrylic biteplane is fabricated on articulated casts to eliminate a conflict that exists between patient's occlusal and temporomandibular joint guidance.

Part 2: Semi-Direct Waxing
11 min, 16mm film, color
Title No. 003510/AA  Sale $50.00
Shows how an acrylic biteplate is fabricated to eliminate excessive bruxism in a 12-year-old woman. Also shows how the semi-direct waxing method is employed.

Part 3: Try-In and Adjustment
16 min, 16mm film, color
Title No. 003512/AA  Sale $72.75
Demonstrates detailed procedures of seating and adjusting an acrylic biteplate. Shows how occlusal prematurities of teeth implant contact in centric relationship are eliminated until the patient's mandible is able to move freely and without interference in centric, lateral, and protrusive excursions.

Fabrication of Record Bases
17 min, 16mm film, color, 1970
Producer USVADT
Title No. 008106/AA  Sale $77.25
Demonstrates two ways of using activated acrylic resin in making bases—hand molding and the "sprinkle on technique." Also shows the construction of bases using resilient acrylic in conjunction with the conventional acrylic when severe undercuts are present, and the construction of occlusal rims to exact dimensions.
Occlusal Reconstruction and Restoration with Fixed Prostheses

Part 1
Centric
Title No. 561363/AA
Sale $77.25
Shows how the mandibular anteriors are positioned after the maxillary anteriors have been set up. Demonstrates the procedures for handling the occlusal rims, the occlusal plane, and the anterior, vertical, and horizontal overlap of the teeth.

Part 2
Occlusal Radiography
Title No. 561364/AA
Sale $54.50
Demonstrates placing varnish, condensing, carving, burnishing, occlusal adjustment, finishing, and polishing an amalgam restoration in a manikin. Shows 4-handed procedures.

From Project ACORDE (see advertisement p. 23)
Cleared for Educational TV

Restoration of a Class I Occlusal Cavity Preparation with Amalgam
11 min, 16mm film, color
Producer USDEN
Title No. 009196/AA
Rental $7.50
Sale $47.25
Demonstrates placing varnish, condensing, carving, burnishing, occlusal adjustment, finishing, and polishing an amalgam restoration in a manikin. Shows 4-handed procedures.

From Project ACORDE (see advertisement p. 23)
Cleared for Educational TV

Cleared for Educational TV

Setting the Mandibular Anterior Teeth
6 min, 16mm film, color, 1974
Producer USVA
Title No. 009052/AA
Sale $27.25
Shows how the mandibular anteriors are positioned after the maxillary anteriors have been set up. Demonstrates the procedures for handling the occlusal rims, the occlusal plane, and the anterior, vertical, and horizontal overlap of the teeth.

Vertical Relation of Occlusion by the Patient's Neuromuscular Perception
14 min, 16mm film, color
Producer USVA
Title No. 008908/AA
Sale $56.00
Demonstrates placement of a mechanical retainer and matrix band tofflemire, placing and confining the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.

From Project ACORDE (see advertisement p. 23)
Cleared for Educational TV

Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation
11 min, 16mm film, color
Producer USDEN
Title No. 009197/AA
Sale $27.25
Demonstrates the setting and articulating of the posterior anatomic teeth. Shows how the teeth are positioned and arranged to meet the requirements of occlusal balance in both the centric and eccentric positions.

In medicine, allied health, science, safety, social sciences, education, industrial/vocational, and other subjects produced by the United States Government are also available for sale and rental from the Center.

Restoration of a Class II Mesio-Occlusal Cavity Preparation
18 min, 16mm film, color
Producer USDEN
Title No. 009202/AA
Sale $79.25
Demonstrates condensing, carving, burnishing, occlusal adjustment, finishing, and polishing an amalgam restoration in a manikin. Shows 4-handed procedures.

From Project ACORDE (see advertisement p. 23)
Cleared for Educational TV

Restoration of a Class IV Mesio-Incisor Cavity Preparation with Filled Resin
17 min, 16mm film, color
Producer USDEN
Title No. 009192/AA
Rental $10.00
Sale $73.00
Demonstrates placing a dead-soft metal matrix, placing a filled resin with a syringe, finishing, and adjusting occlusion in a manikin. Shows 4-handed procedures.

From Project ACORDE (see advertisement p. 23)
Cleared for Educational TV

Setting the Posterior Teeth
6 min, 16mm film, color, 1974
Producer USVA
Title No. 009053/AA
Sale $27.25
Describes the setting and articulating of the posterior anatomic teeth. Shows how the teeth are positioned and arranged to meet the requirements of occlusal balance in both the centric and eccentric positions.

Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation with Zinc Oxide-Eugenol
10 min, 16mm film, color, 1974
Producer USDEN
Title No. 009199/AA
Sale $43.00
Demonstrates placing a mechanical retainer and matrix band tofflemire, placing and confining the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.

From Project ACORDE (see advertisement p. 23)
Cleared for Educational TV

Vertical Relation of Occlusion by the Patient's Neuromuscular Perception
14 min, 16mm film, color
Producer USVA
Title No. 008906/AA
Sale $59.00
Demonstrates how the bridge assembly uses autopolymerizing acrylic to join the units prior to investing for soldering. Shows the soldering operation. Shows the armamentarium and method for maintaining proper oral hygiene after bridge cementation.

Over 8,000 Titles...

Cleared for Educational TV

Setting the Mandibular Anterior Teeth
6 min, 16mm film, color, 1974
Producer USVA
Title No. 009052/AA
Sale $27.25
Shows how the mandibular anteriors are positioned after the maxillary anteriors have been set up. Demonstrates the procedures for handling the occlusal rims, the occlusal plane, and the anterior, vertical, and horizontal overlap of the teeth.

Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation with Zinc Oxide-Eugenol
11 min, 16mm film, color
Producer USDEN
Title No. 009197/AA
Sale $27.25
Demonstrates the setting and articulating of the posterior anatomic teeth. Shows how the teeth are positioned and arranged to meet the requirements of occlusal balance in both the centric and eccentric positions.

In medicine, allied health, science, safety, social sciences, education, industrial/vocational, and other subjects produced by the United States Government are also available for sale and rental from the Center.

## Oral Hygiene and Patient Education

### Correctable Wax Impressions
14 min, 16mm film, color, 1973
Producer USVA
Title No. 005372/AA
Sale $63.50

A presentation discussing the distal extension removable partial denture, focusing on stress control as a means of maintaining oral health. Shows how this distribution over the edentulous ridges can be achieved through secondary impressions of these areas with fluid wax.

### Dental Floss
17 min, 16mm film, color, 1972
Producer USVA
Title No. 005569/AA
Sale $77.25

Demonstrates methods of using dental floss to remove interproximal plaque, both supra- and subgingivally.

### Dental Health—A Series
5 min, 16mm film, color, 1974
Producer USN
Title No. 009215/AA
Sale $199.75

Discusses reasons for keeping teeth and gums in healthy condition. Gives instruction on proper use of dental floss and brushing techniques. Includes a review and a quiz.

- **Your Teeth Are in Your Hands**
  15 min, 16mm film, color
  Title No. 009216/AA
  Sale $68.00
  Stresses reasons for healthy teeth and gums, and shows how to achieve and maintain good dental health by daily removal of plaque by proper brushing and flossing.

- **Brushing**
  6 min, 16mm film, color
  Title No. 009218/AA
  Sale $27.25
  Shows the proper brushing techniques to remove plaque.

- **Flossing**
  8 min, 16mm film, color
  Title No. 009217/AA
  Sale $36.25
  Gives instructions on the proper use of dental floss to remove plaque.

- **Dental Health and You**
  5 min, 16mm film, color
  Title No. 009219/AA
  Sale $22.75
  Reviews basic oral hygiene principles presented in this series.

- **Dental Health Quiz**
  10 min, 16mm film, color
  Title No. 009220/AA
  Sale $45.50
  Discusses 20 questions based on information in the first four films in this series.

### Diet and Dental Health
17 min, 16mm film, color, 1974
Producer USVA
Title No. 005371/AA
Sale $77.25

Shows some of the less desirable ways to talk to a patient about his diet using a comical approach to diet counseling. Presents a male patient being counseled on plaque formation and control, and tells what foods cause plaque formation in the mouth.

### Experience of Dental Health
22 min, 16mm film, color, 1969
Producer USDDH
Title No. 311580/AA
Sale $100.00

Demonstrates a technique for the self-application of dental prophylaxis paste containing fluoride.

### Oral Hygiene—Because We Care
13 min, 16mm film, color, 1965
Producer USNMAC
Title No. 002472/AA
Sale $168.00

A noted pediatrician, Dr. Benjamin Spock discusses community water fluoridation, its safety, and low-cost in reducing dental caries. A collection of photographs of children and adults in fluoridated and nonfluoridated communities show the facts. Dr. Spock gives advice to parents.

### Gum Trouble—What Is It, Doctor
11 min, 16mm film, color, 1972
Producer USVA
Title No. 005586/AA
Sale $50.00

Introduces the public to preventive procedures that may be used to maintain optimum oral health. Demonstrates plaque identification and its removal with the aid of dental floss and the toothbrush.

### Indian Community Action In Dental Health
29 min, 16mm film, color, 1974
Producer USDHEW
Title No. 009227/AA
Sale $131.75

This film illustrates ways Indian community leaders may organize programs to improve levels of oral health in their communities. Emphasizes actions taken by the Crow Indian tribe in Montana to improve oral hygiene personal practices, to initiate community fluoridation programs, and to train community health representatives.

### It's Up To You
10 min, 16mm film, color, 1969
Producer USNMAC
Title No. 002472/AA
Sale $45.50

Tells why people should take care of their teeth and what steps they should take to have healthy teeth. Among the subjects discussed are periodontal disease, visits to the dentist, and correct methods of toothbrushing.

### Michael and Dental Care
2 color filmstrips, audiocassette, 1970
Producer USDH
Title No. 008697/AA
Sale $15.00

- **Michael Gets a Letter**
  39 fr, 6 min
  Encourages preschool and early elementary school children to make regular dental appointments a habit. Helps prepare children for the experiences they may have in future appointments. Some dental procedures, instruments, and equipment which may be encountered are identified and explained.

- **Michael Likes Good Food**
  36 fr, 6 min
  Presents to preschool and early elementary school children good eating habits that are desirable for dental health. Particular emphasis is placed on eating sweets only with meals and selecting and eating non-sweets for between-meal snacks.

### The New Look in Preventive Dentistry
165 min, ¾ in videocassette, color, 1969
Producer USDHC, Sponsor USNMAC
Title No. 009518/AA
Sale $168.00

Demonstrates a preventive dentistry program in which patients are taught by the dentist and auxiliary personnel how to control their own dental disease. Presents patients who have been involved in this program to show the improvement that is possible in a short period of time.

### Oral Hygiene—Techniques for Maintenance of Dental Health of the Physically Handicapped, Mentally Retarded Resident
35mm color filmstrip, 64 min audiotape, 1969
Producer USNMAC
Title No. 002735/AA
Sale $10.00

Explains the reasons why mentally retarded, physically handicapped residents develop poor mouth conditions. Shows what roles the ward personnel and the dentist play in promoting and maintaining health in the resident's mouth. Shows the quadrants and surfaces of the mouth, and step-by-step procedures for brushing these areas.

### Oral Hygiene for the Total Care Patient
14 min, 16mm film, color, 1970
Producer USVA
Title No. 569898/AA
Sale $53.50

Presents how oral hygiene is a problem for the hospitalized patient who is physically or mentally unable to care for himself. Shows the value of ingestible tooth paste, completely stable stannous fluoride gel, and electric tooth brush in the oral hygiene care of these patients.
Pedro and Dental Care (Spanish and English)
4 color filmstrips, 2 audiodiscs, 1970
Producer USDHC
Title No. 008899/MA
Sale $25.00

Pedro Unit 1
2 color filmstrips, audiodisc
Title No. 008890/AA
Sale $15.00

Pedro the Dentist
25 min, 9 min
Prepares the preschool and primary school child for his first visit to the dentist by introducing him to the sights and sounds of the dental office.

Pedro Learns to Brush his Teeth
29 min, 7 min
Teaches young children a method of toothbrushing.

Pedro Unit 2
2 color filmstrips, audiodisc
Title No. 008898/AA
Sale $15.00

Pedro Gets a Letter
40 fr, 8 min
Encourages preschool and early elementary school children to make regular dental appointments a habit. Helps prepare children for the experiences they may have in future appointments. Some procedures, instruments, and equipment which may be encountered are identified and explained.

Pedro Likes Good Food
36 fr, 5 min
Presents to preschool and early elementary school children good eating habits that are desirable for dental health. Particular emphasis is placed on eating sweets only with meals and selecting and eating non-sweets for between-meal snacks.

Plaque Control by Oral Hygiene and Periodontal Surgery
120 min, 1/4 in videocassette, color, 1970
Producer USDHC Sponsor USNMAC
Title No. 009505/AA
Sale $118.00

Focuses on the importance of plaque control for the treatment and prevention of periodontal disease. Presents two, methods—patient education and instruction—of achieving oral hygiene, and discusses the role of periodontal surgery in plaque control.

The Right Choice
6 min, 16 mm film, color, 1972
Producer USVA
Title No. 649405/AA
Sale $27.25

Shows the relationship between the ingestion of sucrose and its conversion to dextrin and acid by oral bacteria.

Scaling Techniques—A Series
10 1/4 in video-cassettes, color, 1976
Producer UTNIND Sponsor USNMAC
Title No. 008652/AA
Sale $407.00

A series of self-instructional programs for the dental and dental hygiene student.

Introduction to Basic Skills
21 min, 1/4 in videocassette, color
Title No. 008587/AA
Sale $46.00

Sleeps the basic skills required to perform oral prophylaxis. Explains parts of the instrument, use of a modified pen grasp, establishment of a stable fulcrum, and performance of basic motions used with all instruments.

Operator-Patient and Light Positions
9 min, 1/4 in videocassette, color
Title No. 008651/AA
Sale $31.75

Demonstrates operator, patient, and light positioning for maximum vision and comfort while working on upper and lower arches.

Fulcrums and Vision
27 min, 1/4 in videocassette, color
Title No. 008582/AA
Sale $46.00

Demonstrates establishment of fulcums for working in all areas of the mouth: operator positioning; and mirror usage for maximum vision, retraction of tissue, and reflection of light.

Use of the Explorer
15 min, 1/4 in videocassette, color
Title No. 008583/AA
Sale $38.25

Demonstrates use of explorer stroke in detection of calculus and cavities and in examination of texture, contour, and character of tooth surface. Shows sharpening techniques and gives reasons for maintaining a sharp instrument.

Use of Sickle Scalers
21 min, 1/4 in videocassette, color
Title No. 008506/AA
Sale $45.00

Introduces use of straight/hooked sickle scalers on anterior teeth and contra-angle scalers on posterior teeth in removal of calculus from supragingival area. Shows how to sharpen both types of scalers.

Use of the Gracey Curet #7-8
21 min, 1/4 in videocassette, color
Title No. 008588/AA
Sale $46.00

Introduces curet instruments and demonstrates use of Gracey Curet #7-8 in supragingival scaling and root planing. Discusses curette which is not generally practiced by hygiene students. Shows how to sharpen curet instrument #7-8.

Use of the Gracey Curet #11-12
13 min, 1/4 in videocassette, color
Title No. 008586/AA
Sale $38.25

Demonstrates use of Gracey Curet #11-12 in scaling mesial surfaces of posterior teeth. Shows how to sharpen curet instrument #11-12.

Use of the Gracey Curet #13-14
12 min, 1/4 in videocassette, color
Title No. 008589/AA
Sale $38.25

Demonstrates use of Gracey Curet #13-14 in scaling distal surfaces of posterior teeth. Shows how to sharpen curet instrument #13-14.

Use of the Periodontal Probe
11 min, 1/4 in videocassette, color
Title No. 008587/AA
Sale $38.25

Introduces the periodontal probe instrument and demonstrates use in examining the shape and dimensions of the gingival sulcus and periodontal pockets.

Polishing
15 min, 1/4 in videocassette, color
Title No. 008588/AA
Sale $46.00

Introduces the circular motion used for polishing teeth. Discusses instrument speed and pressure used when applying agent to tooth surface. Demonstrates polishing of interproximal surfaces using dental tape.

Toothbrushing
Producer USVA 1972

Part 1
Circular Scrub Method
13 min, 16 mm film, color
Title No. 005385/AA
Sale $9.00

Introduces the circular brush method of toothbrushing with a soft, multi-tufted brush on a typodont and the mouth of a patient.

Part 2
The Base Technique
14 min, 16 mm film, color
Title No. 005386/AA
Sale $53.50

Demonstrates the base, or intracavicular, method of toothbrushing with a soft multi-tufted toothbrush on a typodont and the mouth of a patient.

Why Am I Here
9 min, 16 mm film, color, 1968
Producer USVA
Title No. 003890/AA
Sale $40.75

Demonstrates patient education about the importance of oral exmination for the early detection of cancer in the mouth.

Oral Surgery

Alveolar Ridge Reduction for Pocket Elimination
9 min, 16 mm film, color, 1977
Producer USVA
Title No. 008905/AA
Sale $40.75

Demonstrates surgical correction of a one-wall intrabony defect at the mesial aspect of a tilted mandibular molar. A bone chisel is used to eliminate the defect and correct the bone contour. The flap design and suture placement achieve an overlapping of the flap margins to facilitate primary healing.
Endosseous Mandibular Blade Implant
16 min, 16mm film, color, 1974
Producer USVA
Title No. 009050/AA
Sale $72.75
Demonstrates the surgical procedure on a patient selected for bilateral blade implants using models and radiographs. Presents postoperative results.

Enucleation of a Dentigerous Cyst of the Maxilla
7 min, 16mm film, color, 1968
Producer USVA
Title No. 305240/AA
Sale $31.75
Gives diagnostic and surgical procedures for the treatment of a dentigerous cyst. Describes the histopathological characteristics.

Enucleation of a Mandibular Radicular Cyst
7 min, 16mm film, color, 1974
Producer USVA
Title No. 009055/AA
Sale $31.75
Demonstrates the surgical procedure for gaining access to and enucleating an apical cyst of a lower bicuspid. Shows how a retrograde class I cavity is prepared in the apex of the tooth and filled with silver amalgam. Presents postoperative results.

Extraction of Mandibular Teeth—Surgical Preparation
11 min, 16mm film, color, 1968
Producer USVA
Title No. 009319/AA
Sale $59.00
Demonstrates accepted surgical procedures used in the removal of the mandibular teeth and preparation of the alveolar ridge. Emphasis is placed on maintenance of the denture bearing bone.

Extraction of Maxillary Teeth—Surgical Preparation
14 min, 16mm film, color, 1968
Producer USVA
Title No. 314110/AA
Sale $63.50
Demonstrates accepted procedures for removal of maxillary teeth and shows the surgical preparation of the alveolar ridge. Stresses preservation of gingiva.

Facial Moulage Impressions
11 min, 16mm film, color, 1971
Producer USVA
Title No. 005578/AA
Sale $50.00
Shows how models of the face made excellent preoperative records for the surgeon, oto-laryngologist, and prosthodontist. Demonstrates the technique for the construction of a facial moulage.

Gingival and Osseous Autograft to Correct Intrabony Periodontal Defects
13 min, 16mm film, color, 1974
Producer USVA
Title No. 009314/AA
Sale $59.00
Shows how a deep intrabony periodontal pocket involving a maxillary central incisor is filled with autogenous bone and covered with a split thickness graft. Subsequent post operation radiographs show significant reduction of the original osseous defect.

Videocassette and Super 8mm

Many of the 16mm motion pictures listed in this catalog are also available for purchase in various 8mm formats and in videocassette. Please consult the Center's Order Section for further information and prices.
In Vivo Staining of Intra-Oral Dysplastic Change
9 min, 16mm film, color, 1972
Producer USVA
Title No. 002742/AA
Sale $40.00
Presents a simple in vivo staining test in which toluidine blue dye is used to delineate the distribution of neoplastic epithelium in the intraepithelial intraoral lesion.

Lateral Sliding Flap
15 min, 16mm film, color, 1971
Producer USVADT
Title No. 461855/AA
Sale $68.00
Demonstrates the lateral sliding flap operation for the correction of labial gingival recession on a central incisor. Discusses the rationale for this surgical procedure.

Marsupialization of an Anterior Maxillary Cyst
7 min, 16mm film, color, 1968
Producer CHIDEN
Title No. 002351/AA
Sale $31.75
Illustrates a surgical technique for the marsupialization of a maxillary cyst. Explains the indications for this procedure and its advantages. Uses drawings and radiographs for clarification.

Minor Oral Surgery Technics in Dentistry
135 min, 3/4 in videocassette, color, 1974
Producer USDHC
Title No. 009510/AA
Sale $40.00
Presents the surgical procedure for the correction of central incisor diaстемas, demonstrating the methods and the importance of cooperation between the oral surgeon and orthodontist. Demonstrates the removal of a tooth palatineus by interrupting the circulation, leading to necrosis and the non-traumatic removal of the tooth. Also shows method for uncovering embedded canines. Recommended for professional groups.

Modern Operative Dentistry
150 min, 3/4 in videocassette, color, 1971
Producer USDHC
Title No. 009505/AA
Sale $154.00
Discusses and demonstrates the principles of restorative dentistry, including the examination of the oral cavity, the use of radiographs, diagnostic casts, treatment planning, and development of the surgical field.

More Efficient Operative Dentistry Through the Team Concept
120 min, 3/4 in videocassette, color, 1970
Producer USDHC
Title No. 009526/AA
Sale $118.00
Demonstrates how efficiency can be achieved in the office through organization, standardized techniques, and use of the team concept. Explains the practical use of direct gold as the restorations are placed and finished in the patient's mouth.

Nursing Care of the Oral Surgery Patient
17 min, 16mm film, color, 1974
Producer USVA
Title No. 009300/AA
Sale $77.25
Depicts the special nursing care required for oral surgery patients. Reviews the anatomy of the mouth and face, preoperative work-up, and special postoperative oral hygiene, immediate postoperative consideration, and special supplies required for normal postoperative nursing.

Osseous Surgery in the Maxilla
Producer USVA 1968

Part 1
18 min, 16mm film, color
Title No. 002742/AA
Sale $81.75
Demonstrates the surgical elimination of supra- and infra-periosteal bony defects in the maxilla. Shows the osseous contouring to establish physiologic architecture of the soft tissues.

Part 2
11 min, 16mm film, color
Title No. 002351/AA
Sale $50.00
Illustrates the continuous suture with subcutaneous suture of the buccal flap independently of the lingual or palatal flap.

Periodontal Surgery
180 min, 3/4 in videocassette, color, 1970
Producer USDHC
Title No. 009503/AA
Sale $168.00
Demonstrates a maxillary quadrant of surgery which involves 5 and 6mm deep pockets in premolar and molar areas. Diagrams the differences between buccal and palatal internal bevelled incisions. Discusses tuberosity and presents a new technique.

Plaque Control by Oral Hygiene and Periodontal Surgery
120 min, 3/4 in videocassette, color, 1970
Producer USDHC
Title No. 009505/AA
Sale $118.00
Focuses on the importance of plaque control for the treatment and prevention of periodontal disease. Presents two methods—patient education and instruction—of achieving oral hygiene and discusses the role of periodontal surgery in plaque control.

Reduction and Fixation of Middle Third Fractures of the Face—Lateral Orbital Film Approach
13 min, 16mm film, color, 1969
Producer USVA
Title No. 003241/AA
Sale $31.75
Demonstrates the correction of a fracture of the middle third of the face by the lateral orbital approach.

Reduction of Zygomatic Arch Fracture
7 min, 16mm film, color, 1969
Producer USVA
Title No. 003242/AA
Sale $31.75
Demonstrates reduction of a zygomatic arch fracture. Points out how access to the fracture is gained through an auriculo-temporal incision and reduction is achieved by blind manipulation and touch.

Over 8,000 Titles...

in medicine, allied health, science, safety, social sciences, education, industrial/vocational, and other subjects produced by the United States Government are also available for sale and rental from the Center.

The Removal of Simple Teeth,
23 min, 3/4 in videocassette, color, 1976
Producer EMRYS/D
Title No. 009300/AA
Sale $40.75
Demonstrates procedures for removal of uncomplicated teeth. Student workbook and answer sheets included. From the Curriculum Forum 2 Series. Cleared for Educational TV.

Root Amputation of First Maxillary Molar Mesial Buccal Root
9 min, 16mm film, color, 1974
Producer USVA
Title No. 009300/AA
Sale $40.75
Presents the treatment of a patient with localized periodontal disease of a maxillary first molar by removal of the mesial buccal root. Describes the access, separation of the root from the remaining tooth structure, and contouring of the crown.

Root Amputation of Maxillary Molar Distal Buccal Root
10 min, 16mm film, color, 1974
Producer USVA
Title No. 009302/AA
Sale $45.50
Describes the procedures necessary to treat a molar with advanced periodontal disease by means of surgery, endodontics, and reconstruction with a crown.

Setting an Adjustable Articulator to Positional Records
Producer USVA 1971

Part 1
19 min, 16mm film, color
Title No. 678730/AA
Sale $86.25
Describes the adjustments for the instrument. Demonstrates the methodology of recording the hinge axes on a patient and its transfer to the articulator. Shows how the patient's casts are related to the mandibular cast mounted to the maxillary in the most retruded position.

Part 2
12 min, 16mm film, color
Title No. 678731/AA
Sale $54.50
Shows the methods employed to obtain the patient's lateral and upright records after preparation of the positions on the articulator. Shows how the procedures are helpful in diagnosing occlusal problems and in the fabrication of complicated fixed bridges.
Surgical Correction of Ankyloglossia
5 min, 16mm film, color
Producer USVA
Title No. 009056/AA
Sale $22.75
Shows how a patient's unusually short fibrous lingual frenum is severed to avoid the submaxillary duct and to create adequate space in the ventral surface where the extrinsic musculature is attached.

Soft Tissue Lesions of the Oral Cavity
17 min, 16mm film, color
Producer USVA
Title No. 009058/AA
Sale $77.25
Shows how hyperplastic tissue caused by an ill-fitting denture is excised from the mandibular mucosa-labial area. Shows how a surgical stent is used to maintain the deepened labial sulcus.

Surgical Correction of Ankyloglossia
5 min, 16mm film, color
Producer USVA
Title No. 009056/AA
Sale $22.75
Shows how a patient's unusually short fibrous lingual frenum is severed to avoid the submaxillary duct and to create adequate space in the ventral surface where the extrinsic musculature is attached.

Surgical Endodontics
15 min, 16mm film, color, 1964
Producer USN/ Sponsor USVA
Title No. 003606/AA
Sale $68.00
Explains the process of periapical inflammatory reaction. Demonstrates two surgical corrective procedures—curettage and root resection.

Surgical Excision of Maxillary Torus
10 min, 16mm film, color, 1972
Producer USVA
Title No. 728204/AA
Sale $22.25
Demonstrates surgical procedure encompassing posteriolateral and occlusal aspects. Stress reduction of the maxillary torus and lip injury. Shows the use of a prosthetic implant for correction of these complications.

Surgical Removal of Impacted Mandibular Third Molar
5 min, 16mm film, color, 1968
Producer USVA
Title No. 003777/AA
Sale $22.75
Presents a clinical demonstration of the surgical removal of a disto-angular impacted third molar malocclusion.

Surgical Removal of Mesio-Angular Impacted Third Molar
4 min, 16mm film, color, 1974
Producer USVA
Title No. 009057/AA
Sale $118.00
Demonstrates the importance of obtaining adequate surgical exposure and following prescribed surgical techniques. Shows how a mesio-angular impacted lower third molar is surgically removed without sectioning.

Surgical Removal of Vertically Impacted Upper and Lower Third Molars
5 min, 16mm film, color, 1974
Producer USVA
Title No. 009059/AA
Sale $22.75
Shows an incision on the distal aspect of the maxillary tuberosity and extended anteriorly around the neck of the second molar. Shows how access to a vertically impacted upper third molar is gained.

Surgical Replacement of the Mandible with Stainless Steel Mesh
15 min, 16mm film, color, 1970
Producer USVA
Title No. 728428/AA
Sale $72.75
Demonstrates the use of cast stainless steel mesh to replace segments of the mandible which are frequently lost in intra-oral surgery.

Surgical Treatment for Ankylosis of the Temporomandibular Joint
10 min, 16mm film, color, 1969
Producer USVA
Title No. 003613/AA
Sale $45.50
Demonstrates a surgical corrective procedure using a tyrocinium prosthesis constructed to the measurements of the English penny.

The Thyroid Area
6 min, 16mm film, color, 1969
Producer CHIDEN/ Sponsor USNMAC
Title No. 003673/AA
Sale $27.25
Demonstrates dissection of the deeper structures of the thyroid area. Notes practical surgical applications: Review the entire precthroid area diagrammatically. Produced in cooperation with Loyola University School of Dentistry. From the Anatomy of the Head and Neck series.

Treatment of InfraBony Pocket with Three Osseous Walls
14 min, 16mm film, color, 1968
Producer USVA
Title No. 003775/AA
Sale $83.50
Demonstrates the surgical management of an infra-bony pocket involving the maxillary premolar. Shows the use of periodontal ligament and bone marrow for repair tissue. Discusses immobilizing the teeth with an aid splint which is made of twisted wire imbedded with plastic in a prepared groove.

Unilateral Subperiosteal and Endosteal Blade Implant Procedures as Distal Abutments
110 min, 1/4 in videocassette, color, 1972
Producer USVA/ USNMAC
Title No. 009540/AA
Sale $118.00
Demonstrates the surgical procedures and impression techniques required for the fabrication of a unilateral subperiosteal implant. Shows placement of appropriate set implant on a second patient emphasizing the clinical requirements of correct tissue closure. Includes fabrication of a temporary bridge to adequately span the area. Presents a third patient to show endosseous blade implant procedures.

The Use of Pins in Operative Procedures
163 min, 1/4 in videocassette, color, 1974
Producer CHIDEN/ Sponsor USNMAC
Title No. 009512/AA
Sale $170.50
Shows restoration of a severely damaged vital tooth with pins for support and retention in an amalgam buildup, and restoration of anterior tooth using a pin and compactive filling material. Demonstrates the effectiveness of pins and their ability to retain the restoring material. Gives guidelines and rules for pin hole location and number of pins needed for constructive retention.

Velopharyngeal Closure In Speech and Deglutition
17 min, 16mm film, color, 1972
Producer USVA
Title No. 003536/AA
Sale $77.25
Demonstrates the mechanism of velopharyngeal closure and speech in a patient who had undergone a radical right maxillectomy and orbital exenteration for carcinoma.
Patient Relations

Dental Auxiliary Trigger Situations—Interpersonal Relations
11 min, 16mm film, color, 1975
Producer USDMDC
Title No. 007860/AA
Sale $50.00

Discusses interpersonal problems in a dental practice. Encourages serious thinking about the challenges of managing a dental practice, a personal commitment to better management, and self-assessment in relation to the role of the dentist as a manager of a dental team.

Dental Practice Trigger Situations—Interpersonal Relations
11 min, 16mm film, color, 1975
Producer USDMDC
Title No. 007861/AA
Sale $50.00

Illustrates methods of altering the child's behavior in ways that will develop an acceptance of dental care in his early years and provide a climate for the dentist to treat him efficiently and safely. Uses a programmed instruction approach in presenting introductions and objectives, separation of parent and child, transfer of the child from reception room to operatory and, non-emergency oral examination for the very young child. Reviews and discusses suggested guidelines.

Management of Child Behavior in the Dental Office
38 min, 1/4 in videocassette, B/W, 1970
Producer USDEN Sponsor USMNA
Title No. 002735/AA
Sale $60.00

Indicates methods of altering the child's behavior in ways that will develop an acceptance of dental care in his early years and provide a climate for the dentist to treat him efficiently and safely. Uses a programmed instruction approach in presenting introductions and objectives, separation of parent and child, transfer of the child from reception room to operatory, and non-emergency oral examination for the very young child. Reviews and discusses suggested guidelines.

Teacher's guide included. Produced in cooperation with Purdue University under grant from Division of Dental Health, National Institutes of Health.

Oral Hygiene—Techniques for Maintenance of Dental Health of the Physically Handicapped, Mentally Retarded Resident
64 min, 35mm filmstrip 1/4 in audiotape, color, 1969
Producer USMNA
Title No. 002735/AA
Sale $10.00

Explains the reasons why mentally retarded, physically handicapped residents develop poor mouth conditions. Shows what roles the ward personnel and the dentist play in promoting and maintaining health in the resident's mouth. Shows the quadrants and surfaces of the mouth, and step-by-step procedures for brushing these areas.

Video cassette and Super 8mm
Many of the 16mm motion pictures listed in this catalog are also available for purchase in various 8mm formats and in videocassette. Please contact the Center's Order Section for further information and prices.

Periodontics

Apically Repositioned Partial Thickness Flap to Eliminate Periodontal Pockets
15 min, 16mm film, color, 1968
Producer USVA
Title No. 008907/AA
Sale $68.00

Demonstrates the apically positioned partial thickness flap used to eliminate periodontal pockets that extend apically to the muco-gingival junction.

Current Periodontal Therapy
167 min, 1/4 in videocassette, color, 1974
Producer CHIDEN Sponsor USMNA
Title No. 009509/AA
Sale $172.75

Illustrates the manner in which complete diagnosis should be handled, including case explanation to patient. Shows standard procedures of subgingival curettage and gingivectomy, and demonstrates repsectively procedures for handling muco-gingival and osseous problems with flap repositioning procedures and osseous implants. Also demonstrates preparation and placing of dental dressings and postoperative instructions for the patient.

Distal Wedge—Mandible
15 min, 16mm film, color, 1977
Producer USVA
Title No. 008907/AA
Sale $68.00

Shows the removal of a triangular wedge of bulboflous tissue from the distal aspect of a mandibular second molar during treatment of a deep periodontal pocket. Treatment also includes removal of the epithelial lining, planing the tooth, and trimming of the flap to achieve proper adaptation. This procedure results in a soft tissue relationship to the tooth and bone which is conducive for preventive home care by the patient.

Distal Wedge—Maxilla
15 min, 16mm film, color, 1974
Producer USVA
Title No. 008907/AA
Sale $68.00

Shows how a wedge of bulboflous tissue is removed from the distal of a maxillary molar to gain access to a deep periodontal pocket. Also shows how a wedge pocket is surgically eliminated by removal of the pocket epithelial lining and adequate flap adaptation.

Emergency Dental Treatment
29 min, 16mm film, color, 1971
Producer USN
Title No. 002076/AA
Sale $131.75

Teaches medical and para-medical personnel an emergency treatment of toothache, periocoronitis, periodontal abscesses of necrotizing ulcerative gingivals on isolated sea or shore duty.

Free Gingival Graft
13 min, 16mm film, color, 1972
Producer USVA
Title No. 000444/AA
Sale $59.00

Shows how a split-ﬂap and free gingival graft are used to correct gingival recession on a patient’s two mandibular central incisors. Demonstrates achieving sufficient gain in gingival attachment to avoid muscle pull around these teeth.

Gingival and Osseous Autograft to Correct Intrabony Periodontal Defects
13 min, 16mm film, color, 1974
Producer USVA
Title No. 003139/AA
Sale $59.00

Shows how a deep intrabony periodontal pocket involving a maxillary central incisor is filled with autogenous bone and covered with a split thickness graft. Subsequent post operation radiographs show significant reduction of the original osseous defect.

The Gingival Autograft in Periodontics
14 min, 16mm film, color, 1988
Producer USVA
Title No. 001723/AA
Sale $63.50

Shows how a gingival autograft is used to correct a periodontal pocket which extends to the muco-gingival junction. Emphasizes that a pedical flap cannot be used because of insufficient gingiva adjacent to the involved tooth.

Gingivectomy
16 min, 16mm film, color
Producer USA
Title No. 006069/AA
Sale $90.75

Describes the clinical aspects of a gingival condition of the gums and demonstrates the surgical technique used in performing a gingivectomy. Covers the technique of making the gingival incision, removing incised tissue and debris, planing the root surfaces of the teeth, applying protective packs to the gums, and postoperative care of teeth by the patient.

Gingivectomy Procedure to Eliminate Suprabony Pockets
14 min, 16mm film, color, 1988
Producer USVA
Title No. 001724/AA
Sale $63.50

Examines the rationale of this treatment. Presents technical procedures and shows the use of selected instruments. Discusses postoperative results.

Initial or Hygienic Phase of Periodontal Therapy
18 min, 16mm film, color, 1972
Producer USVA
Title No. 001058/AA
Sale $68.00

Demonstrates the procedures to be included in the initial or hygienic phase of all periodontal therapy. Presents a comparison between the patient’s periodontal status at admission and completion of treatment.
Laterally Positioned Flap in Periodontics
18 min, 16mm film, color, 1968
Producer USVA
Title No. 002509/AA
Sale $68.00
Shows how laterally positioned flaps are used to cover the denuded roots of a mandibular central incisor and maxillary molar. Tells how a partial or split thickness dissection is performed in order to leave periosteum at the donor sites.

Modified Widman Flap
18 min, 16mm film, color, 1972
Producer USVA
Title No. 02650/A
Sale $81.75
Demonstrates the Modified Widman Flap or reverse bevel flap operation on six maxillary periodontically involved teeth.

Occlusal Adjustment
Producer USVA, 1970

Part 1 Centric
17 min, 16mm film, color
Title No. 56135/AA
Sale $79.25
Shows indications, principles, and methods for adjustment of occlusion to optimal freedom and stability in centric relation and centric occlusion. Includes articulation and intra-oral demonstration.

Part 2 Lateral and Protrusive Excursions
12 min, 16mm film, color
Title No. 56136/AA
Sale $54.50
Illustrates the adjustment of occlusal interferences in various excursions by means of mounted casts and by intra-oral recording. Explains to what extent excursive movement patterns should be adjusted. Includes proper finish and testing of the results.

Osseous Surgery in the Maxilla
Producer USVA, 1968

Part 1
18 min, 16mm film, color
Title No. 002742/AA
Sale $81.75
Demonstrates the surgical elimination of supra- and intra-periodontal bony defects in the maxilla. Shows the osseous contouring to establish physiologic architecture of the soft tissues.

Part 2
11 min, 16mm film, color
Title No. 05650/A
Sale $50.00
Illustrates the continuous suture, which permits suturing of the buccal flap independently of the lingual or palatal flap.

An Overdenture Technique
Producer USVADT, 1975

Part 1 - Diagnosis
9 min, 16mm film, color
Title No. 003779/AA
Sale $40.75
Shows how the overdenture procedure provides a practical and simple alternative to conventional complete dentures. Emphasizes selection of roots to be retained and demonstrates the advantages of the overdenture technique. Shows how healthy retained roots beneath an overdenture help to preserve the residual bone.

Part 2 - Treatment Procedures
10 min, 16mm film, color
Title No. 007720/AA
Sale $45.50
Shows how frequently some of the teeth can be selected to be retained beneath an overdenture. The retained teeth are modified by endodontics, periodontal treatment, crown reduction, and an amalgam restoration to seal the root canal orifice. Also shows the making of the final impression using mercaptan rubber base impression material. Demonstrates how the resultant master casts are mounted on an articulator.

Part 3 - Laboratory Procedures, Dental Insertion, and Oral Hygiene
7 min, 16mm film, color
Title No. 007721/AA
Sale $31.75
Demonstrates technical variations which are utilized in adapting the usual laboratory procedures for the fabrication of an overdenture. Shows the use of pressure indicator paste to obtain equalized contacts at the time of delivery. Explains oral hygiene procedures and emphasizes their importance.

The Palatal Flap in Periodontics
13 min, 16mm film, color, 1968
Producer USVA
Title No. 006440/AA
Sale $59.00
Demonstrates the surgical management of osseous deformities involving the palatal and proximal periodontal areas. Shows how a palatal flap is created using an internal bevelled incision preserving the remaining attached gingiva and still permitting access to the underlying alveolar process.

Periodontal Disease—Prevention and Early Treatment
22 min, 16mm film, color, 1963
Producer USN
Title No. 005225/AA
Sale $100.00
Stresses the importance of early diagnosis and treatment of periodontal disease.

Periodontal Examination
Producer USVA, 1970

Part 1 - Examination Procedures
17 min, 16mm film, color
Title No. 009601/AA
Sale $77.25
Illustrates clinical examination of the periodontium, emphasizing gingival color, density, relation of the gingival margin to the cemento-enamel junction, pocket depth, and bleeding tendency. Includes roentgenological examination.

Part 2 - Charting
18 min, 16mm film, color
Title No. 052611/AA
Sale $81.75
Illustrates periodontal examination of single teeth and recording the findings on a chart.

Periodontal Surgery
190 min, 1/4 in videocassette, color, 1970
Producer USVADT Sponsor USNMAC
Title No. 009503/AA
Sale $168.00
Demonstrates a maxillary quadrant of surgery which involves 5 and 6mm deep pockets in premolar and molar areas. Diagrams the differences between buccal and palatal internal bevelled incisions. Discusses tuberosity management and presents a new technique.

Plaque Control by Oral Hygiene and Periodontal Surgery
120 min, 1/4 in videocassette, color, 1970
Producer USVADT Sponsor USNMAC
Title No. 009504/AA
Sale $118.00
Focuses on the importance of plaque control for the treatment and prevention of periodontal disease. Presents two methods—patient education and instruction—and achieving oral hygiene, and discusses the role of periodontal surgery in plaque control.

Reverse Bevel Flap
19 min, 16mm film, color, 1972
Producer USVA
Title No. 005382/AA
Sale $86.25
Shows how a reverse bevel flap is used to remove crevicular epithelium from periodontal pockets and provides adequate access for subsequent scaling root planing.

Root Amputation of First Maxillary Molar Mesial Buccal Root
9 min, 16mm film, color, 1974
Producer USVA
Title No. 009300/AA
Sale $40.75
Prepares the treatment of a patient with localized periodontal disease of a maxillary first molar by removal of the mesial buccal root. Discusses the access, separation of the root from the remaining tooth structure, and the contouring of the crown.

Root Amputation of Maxillary Molar Distal Buccal Root
10 min, 16mm film, color, 1974
Producer USVA
Title No. 003802/AA
Sale $45.50
Describes the procedures necessary to treat a molar with advanced periodontal disease by means of surgery, endodontics, and reconstruction with a crown.

Scaling and Root Planing
Producer USVA, 1974

Part 1 - Maxillary Teeth
13 min, 16mm film, color
Title No. 009505/AA
Sale $59.00
Demonstrates an effective method of scaling and root planing. Uses one representative tooth from each segment of the dental arch. Stresses the necessity for removal of supra- and subgingival calculus deposits and subsequent smoothing of these tooth surfaces.
Part 2 Mandibular Teeth
11 min, 16mm film, color
Title No. 009365/AA
Sale $50.00
shows how the removal of subgingival calculus and planing of the root surface is most advantageously accomplished by employing planned procedures. Shows how the scaling and root planing of the mandibular teeth are accomplished much the same manner as in the maxillary quadrants.

Sliding Flap With Free Graft
16 min, 16mm film, color, 1972
Producer USV
Title No. 000430/AA
Sale $72.75
Shows how a laterally positioned split thickness flap and a free graft are used to correct a periodontal defect on a sixteen-year-old patient's lower central incisor. Presents postoperative results.

Subgingival Curetage
16 min, 16mm film, color
Producer USV
Title No. 729310/AA
Sale $50.00
Demonstrates subgingival curetage and root planing of periodontically involved teeth. Explains the rationale for these therapeutic procedures.

Treatment of Infrabony Pocket with Three Osseous Walls
14 min, 16mm film, color, 1968
Producer USVA
Title No. 003775/AA
Sale $89.50
Demonstrates the surgical management of an infrabony pocket involving the maxillary premolar. Shows the use of periodontal ligament and bone marrow for repair tissue. Discusses immobilizing the teeth with an aid splint which is made of twisted wire imbedded with plastic in a prepared groove.

Prosthodontics

Additive Wax Method of Forming an Harmonious Occlusion
12 min, 16mm film, color
Title No. 007722/AA
Sale $54.50
Shows how these techniques provide a comprehensive understanding of tooth anatomy and occlusion by using easily controlled, precisely placed small increments of wax. This permits better visualization of the relationship between form and function.

Centric Relation for Complete Dentures
10 min, 16mm film, color, 1971
Producer USV
Title No. 005565/AA
Sale $45.00
Explains registration of the centric relation record with wax occlusal rims. Demonstrates methods used to retrace the mandible. Details the three-dimensional character of this record with drawings.

Complete Denture Esthetics—Gingival Contour
8 min, 16mm film, color, 1975
Producer USVA
Title No. 009530/AA
Sale $36.25
Demonstrates the method of contouring the wax around selected teeth to complement the outline form and to simulate gingiva appropriate to the age and health of the patient.

Complete Denture Esthetics—Incisal Edge Contour, Anterior Teeth
11 min, 16mm film, color, 1975
Producer USVA
Title No. 007754/AA
Sale $50.00
Shows how modification of incisal edges of both maxillary and mandibular teeth gives life-like appearance to artificial dentures and makes the age of teeth more closely match the age of the patient.

Construction of Impression Trays for Edentulous Patients
12 min, 16mm film, color, 1976
Producer USVADT
Title No. 209104/AA
Sale $54.50
Describes the procedures necessary to construct impression trays using a light-cured acrylic resin. Also shows the steps from blocking out undercuts through mixing and preparing the tray material to finishing the periphery.

Construction of Space Impression Trays for Edentulous Patients
9 min, 16mm film, color, 1976
Producer USVADT
Title No. 008105/AA
Sale $40.75
Shows the methodology of constructing impression trays in activated acrylic resin, and demonstrates the use of relief or spacing in the completed tray. Describes two ways of providing the spacing required with wax sheets and using melted wax. Also depicts several modifications that can be incorporated into tray construction to fit various impression procedures.
Correctable Wax Impressions
14 min, 16mm film, color, 1973
Producer USVA
Title No. 005372/AA
Sale $63.50

Fabricates a discussion about the distal extension removable partial denture, focusing on stress control as a means of maintaining oral health. Shows how this distribution over the edentulous ridge can be achieved through secondary impressions of these areas with fluid wax.

Fabrication of Biteplane
Producer USVA, 1974
Part 1
Waxing on Mounted Casts
9 min, 16mm film, color
Title No. 009308/AA
Sale $40.75

Part 2
Semi-Direct Waxing
11 min, 16mm film, color
Title No. 009310/AA
Sale $50.00

Part 3
Try-In and Adjustment
16 min, 16mm film, color
Title No. 009312/AA
Sale $72.75

Dental Assistant Utilization—Rubber Base Impression Procedure
16 min, 16mm film, color, 1976
Producer USVADT
Title No. 008393/AA
Sale $87.25

Demonstrates the importance of such procedures as pre-preparation, proper positioning, and impression technique in accomplishing a rubber base impression in a comfortable and efficient manner.

Dental Esthetics—Tooth Arrangement
Producer USVA, 1973
Part 1
12 min, 16mm film, color
Title No. 005375/AA
Sale $59.00

Shows how the arrangement of teeth is based on a system using accurately contoured occlusal rims. Presents a 3-dimensional guide for laboratory technicians in arriving at the general tooth arrangement and perfecting their rotation.

Part 2
11 min, 16mm film, color
Title No. 008594/AA
Sale $72.75

Describes the application of five positional changes of the anterior teeth and how these changes affect the appearance of edentulous patients.

Part 3
11 min, 16mm film, color
Title No. 005376/AA
Sale $72.75

Describes the mandibular impression procedure, the use of fluid wax to obtain al uniformity of contact over the bearing areas. The use of fluid wax to obtain a conflict that exists between the patient’s occlusal and temporomandibular joint guidance.

Fabrication of Mandibular Impressions
Part 1
Correctable Wax Impressions
12 min, 16mm film, color, 1970
Producer USVA
Title No. 005378/AA
Sale $50.00

Correctable Wax Impressions
12 min, 16mm film, color
Title No. 005377/AA
Sale $50.00

Fabrication of Mandibular Impressions
11 min, 16mm film, color, 1971
Producer USVA
Title No. 005379/AA
Sale $63.50

Demonstrates detailed procedures of seating and adjusting an acrylic biteplane. Shows how mandibular prematurities of teeth contact in centric relationship are eliminated until the patient’s mandible is able to move freely and without interference in centric, lateral, and protrusive excursions.

Fabrication of Record Bases
17 min, 16mm film, color, 1974
Producer USVA
Title No. 005378/AA
Sale $77.25

Demonstrates two ways of using activated acrylic resin in making bases—hand molding and the “sprinkler on” technique. Also shows the construction bases using resilient acrylic in conjunction with the conventional acrylic when severe undercuts are present and the construction of occlusal rims to exact dimensions.

Fabrication of Record Bases
11 min, 16mm film, color, 1971
Producer USVA
Title No. 005379/AA
Sale $50.00

Fabrication of Record Bases
16 min, 16mm film, color, 1972
Producer USVA
Title No. 005379/AA
Sale $63.50

Demonstrates the construction of the custom tray which allows more control of the border extensions and permits a functional type of palatal seal to be established. Shows that the edentulous portion of the impression can also be used for the construction of an accurate and stable base plate.

Fabrication of Record Bases
12 min, 16mm film, color, 1969
Producer USVA
Title No. 324585/AA
Sale $63.50

Describes the mandibular impression procedure, covering the maximum bearing area while developing buccal and lingual flanges that provide border sealing without restricting the physiologic activity of the adjacent structures.

Fabrication of Record Bases
12 min, 16mm film, color, 1969
Producer USVA
Title No. 324585/AA
Sale $54.50

The procedures used to finalize the maxillary impression shown, include the use and rationale of border molding, development of functional reliefs, and uniformity of contact over the bearing areas. The use of fluid wax to obtain a physiologic post-palatal seal is also demonstrated.

Fabrication of Record Bases
14 min, 16mm film, color
Producer USVA, 1972
Title No. 005379/AA
Sale $63.50

The procedures used to finalize the maxillary impression shown, include the use and rationale of border molding, development of functional reliefs, and uniformity of contact over the bearing areas. The use of fluid wax to obtain a physiologic post-palatal seal is also demonstrated.

Fabrication of Record Bases
16 min, 16mm film, color, 1970
Producer USVA
Title No. 333420/AA
Sale $80.75

Fabrication of Record Bases
20 min, 16mm film, color, 1970
Producer USVA
Title No. 333420/AA
Sale $80.75

The techniques used to process the dental chair, the selection of the most advantageous position, the postioning of the mold, and recovery of the finished denture.

Free Graft of Palatal Mucosa in Mandibular Vestibuloplasty
16 min, 16mm film, color
Producer USVA
Title No. 343526/AA
Sale $50.00

Surgical procedure for increasing the vestibular and lingual exposure of the mandibular alveolar process in a patient who is unable to wear a lower denture due to insufficient denture bearing area.

Esthetics in Complete Dentures
Producer USVA, 1972
Part 1
Anterior Tooth Size
16 min, 16mm film, color
Title No. 005375/AA
Sale $72.75

Part 2
Anterior Tooth Color
14 min, 16mm film, color
Title No. 005376/AA
Sale $63.50

Exposes the methods for developing harmony between artificial teeth and facial colors. Presents a synthesis of the elements which produce pleasing color harmony.

Extraction of Mandibular Teeth—Surgical Preparation
11 min, 16mm film, color, 1968
Producer USVADT
Title No. 314100/AA
Sale $50.00

Demonstrates accepted surgical procedures used in the removal of the mandibular teeth and preparation of the alveolar ridge. Emphasis is placed on maintenance of the denture-bearing bone.
Occlusal Reconstruction and Restoration with Fixed Prosthesis
Producer USVA, 1974

**Part 1** Occlusal Reconstruction and Restoration of Occlusal Curve
- 14 min, 16mm film, color
Title No. 009064/AA
Sale $63.50

Demonstrates the restoration of the occlusal curve by tooth reduction and tooth preparation for fixed prostheses.

**Part 2** Construction and Insertion of Temporary Bridge and Preparation of Dies
- 9 min, 16mm film, color
Title No. 009065/AA
Sale $40.75

Demonstrates how construction of a temporary bridge uses a hard-formed rectangular block of activated acrylic placed directly on the prepared teeth.

**Part 3** Waxing of Dies and Try-In of Castings
- 12 min, 16mm film, color
Title No. 009066/AA
Sale $54.50

Shows the waxing procedure for the fullcrowns used. Emphasizes the proper anatomical consideration in the formation of contact areas, marginal ridges and alignment of the central grooves, and buccal and lingual cusps.

**Part 4** Bridge Completion, Assembly, and Insertion
- 14 min, 16mm film, color
Title No. 009067/AA
Sale $63.50

Demonstrates how the bridge assembly uses autopolymerizing acrylic to join the units prior to investing for soldering. Shows the soldering operation. Shows the armamentarium and method for maintaining proper oral hygiene after bridge cementation.

### Video Cassette and Super 8mm

Many of the 16mm motion pictures listed in this catalog are also available for purchase in various 8mm formats and in video cassette. Please contact the Center's Order Section for further information and prices.

### Orderly Development of a Partial Denture Design
Producer USVA, 1970

**Part 1** The Mandibular Cast
- 15 min, 16mm film, color
Title No. 16089/AA
Sale $68.00

Illustrates the development of removable partial denture design on maxillary and mandibular casts.

**Part 2** The Maxillary Cast
- 14 min, 16mm film, color
Title No. 007043/AA
Sale $63.50

Illustrates the development of removable partial denture design on maxillary and mandibular casts.

### An Overdenture Technique
Producer USVADT, 1975

**Part 1** Diagnosis
- 9 min, 16mm film, color
Title No. 007771/AA
Sale $40.75

Shows how the overdenture procedure provides a practical and simple alternative to conventional complete dentures. Emphasizes selection of roots to be retained and demonstrates the advantages of the overdenture technique. Shows how healthy retained roots beneath an overdenture help to preserve the residual bone.

**Part 2** Treatment Procedures
- 10 min, 16mm film, color
Title No. 007720/AA
Sale $45.50

Shows how frequently some of the teeth can be selected to be retained beneath an overdenture. The retained teeth are modified by endodontics, periodontal treatment, crown reduction, and an amalgam restoration to seal the root canal orifice. Also shows the making of the final impression using mercapran rubber base impression material. Demonstrates how the resultant master casts are mounted on an articulator.

**Part 3** Laboratory Procedures, Denture Insertion, and Oral Hygiene
- 7 min, 16mm film, color
Title No. 007721/AA
Sale $31.75

Demonstrates technical variations which are utilized in adapting the usual laboratory procedures for the fabrication of an overdenture. The use of pressure indicator paste is shown to obtain equalized contacts at the time of delivery. Explains oral hygiene procedures and emphasizes their importance.

Porcelain-Fused-To-Gold Crowns and Bridges
Producer USVA, 1972

**Part 1** Tooth Preparation
- 13 min, 16mm film, color
Title No. 005620/AA
Sale $59.00

Demonstrates the correct tooth preparation for porcelain-fused-to-gold crowns. Emphasizes careful adherence to the basic principles and techniques. Presents results in the production of an accurately fitting and aesthetically pleasing fixed partial denture.

**Part 2** Gingival Retraction and Die Preparation
- 9 min, 16mm film, color
Title No. 005621/AA
Sale $40.75

Shows the effect on gingival margins which can be achieved by carefully adhering to the principles and details of gingival retraction. Demonstrates the preparation and die preparation.

Porcelain-Fused-To-Gold Fixed Partial Denture—Esthetics Control System
Producer USVA, 1974

**Part 1** Preparation and Temporization
- 17 min, 16mm film, color
Title No. 009060/AA
Sale $77.25

Deals with the examination of the patient, tooth preparation, and an extracural method for constructing a temporary restoration that will provide excellent protection to the involved teeth.

**Part 2** Laboratory Phase—Construction of Framework
- 8 min, 16mm film, color
Title No. 009061/AA
Sale $36.25

Describes the laboratory procedures for developing wax patterns whose dimensions and contours are controlled by preoperative stents.

**Part 3** Veneering With Porcelain
- 8 min, 16mm film, color
Title No. 009062/AA
Sale $36.25

Details the procedures for preparing and veneering the casting for an anterior bridge. Shows the use of the polypropylene stents in the laboratory phase and the final cementation of the bridge.

Preliminary Impressions For Complete Dentures—Alginite Method
Producer USVA

**Part 1** Preparation of the Immediate Denture For Delivery
- 13 min, 16mm film, color, 1971
Title No. 003831/AA
Sale $59.00

Shows how the procedure promotes the continued health of the tissues and reduces postdelivery problems. Demonstrates selective grinding to develop a smooth, free articulation of the teeth. Shows corrections of the periphery and the tissue surface to permit proper seating of the denture.

Restoring Anterior Teeth With Porcelain Fused to Gold
140 min, 16mm film, color, 1971
Producer USHC/SPonsor USNAMC
Title No. 009506/AA
Sale $146.25

Covers complete procedures for restoring anterior teeth, including preparation of the teeth, taking impressions, making temporaries, discussing laboratory procedures, fitting the anterior preparation in the mouth, occlusion, personalizing, staining, glazing, and cementing the final restoration. Stresses the biological demands made of the restoration and the mechanical excellence necessary to make it useful, protective, and esthetic.

Semi-Immediate Anterior Fixed Partial Denture With Reverse Pin Facing—Assembly of Bridge and Delivery to Patient
13 min, 16mm film, color, 1979
Producer USVA
Title No. 004409/AA
Sale $59.00

Demonstrates a direct assembly and finishing procedure to gain optimal appearance and function.
### Extra Oral Radiography—Anterior Lateral Jaw
5 min, 16mm film, color
Title No. 000460/AA
Sale $22.75
Shows the anterior teeth and their supporting structures from the midline back to the bicuspid region by the anterior lateral jaw radiograph. Demonstrates positioning of the patient and the X-ray cone.

### Extra Oral Radiography—Posterior Lateral Jaw Survey
4 min, 16mm film, color
Title No. 000464/AA
Sale $18.25
Shows that the posterior lateral jaw radiograph is useful for investigating fractures, cysts, and neoplasms of the ramus, angle, and posterior body of the mandible. Presents the technique of obtaining this view.

### Extra Oral Radiography—Standard Lateral Jaw Survey
5 min, 16mm film, color
Title No. 000463/AA
Sale $22.75
Shows the maxillary molars and their supporting structures, mandibular molars, and the bicuspid areas by the lateral jaw radiograph. Demonstrates this technique in detail.

### Extra Oral Radiography—The Temporomandibular Joint Survey
6 min, 16mm film, color
Title No. 000462/AA
Sale $27.25
Shows the condylar head, articular fossa, articular eminence, external auditory canal, and the mastoid region in the radiograph. Demonstrates the technique on a skull and a live patient.

### Extra Oral Radiography—The Mandibular Condyle
6 min, 16mm film, color
Title No. 000461/AA
Sale $27.25
Shows how the position of the patient, the head of the X-ray machine, and the cassette are adjusted to radiograph and expose the condylar process of the mandible. Demonstrates how it reveals the structures on both sides but defines only those from one side.

### Interproximal Bite-Wing Radiography
17 min, 16mm film, color, 1972
Producer USVA
Sale $77.25
Shows that interproximal or bite-wing dental radiographs are used to reveal interproximal, occlusal, and secondary caries in posterior teeth, and provides an accurate picture of the alveolar crests.

### Intraoral Reduction of Symphysis Fractures
11 min, 16mm film, color, 1974
Title No. 000963/AA
Sale $50.00
Demonstrates an intraoral approach for the open reduction of a mandibular symphysis fracture. Emphasizes the advantages of this method. Compares preoperative and postoperative radiographs and shows 3-month postoperative results.

### Marsupialization of an Anterior Maxillary Cyst
7 min, 16mm film, color, 1968
Producer USVA
Title No. 002351/AA
Sale $31.75
Uses drawings and radiographs to illustrate a surgical technique for the marsupialization of a maxillary cyst. Explains the indications and advantages for this procedure.

### Modern Operative Dentistry
180 min, 3 in videocassette, color, 1971
Producer USDHC
Sale $154.00
Discusses and demonstrates the principles of restorative dentistry, including the examination of the oral cavity, the use of radiographs, diagnostic casts, treatment planning, and development of the surgical field.

### Occlusal Radiography
Producer USVA, 1972

#### Part 1 Introduction and Maxillary Projections
13 min, 16mm film, color
Title No. 005614/AA
Sale $59.00
Presents five specific types of occlusal radiographic examination of the maxilla. Explains common errors in positioning and demonstrates their correction.

#### Part 2 Mandibular Projections
8 min, 16mm film, color
Title No. 005615/AA
Sale $39.25
Demonstrates an accepted technique for obtaining a mandibular anterior occlusal radiograph. Explains the errors in positioning and their correction.
Class I Occluso-Lingual Cavity Preparation for Amalgam
10 min, 16mm film, color
Title No. 007779/AA
Sale $41.50
Demonstrates the procedure for preparing a Class I occluso-lingual cavity for amalgam in a manikin. Shows 4-handed procedures.

Class II Mesio-Occlusal Cavity Preparation for Amalgam
13 min, 16mm film, color
Title No. 007780/AA
Sale $58.75
Demonstrates the procedure for preparing a Class II mesio-occlusal cavity for amalgam in a manikin. Shows 4-handed procedures.

Class III Mesial Cavity Preparation (Lingual Access) for Tooth-Colored Material
9 min, 16mm film, color
Title No. 007785/AA
Sale $39.25
Demonstrates the procedure for preparing a Class III mesial cavity (lingual access) for tooth-colored material in a manikin. Shows 4-handed procedures.

Class IV Disto-Occclusal Cavity Preparation for Tooth-Colored Material
11 min, 16mm film, color
Title No. 007788/AA
Sale $51.75
Demonstrates the procedure for preparing a Class IV disto-occlusal cavity for tooth-colored material in a manikin. Shows 4-handed procedures.

Class V Facial Cavity Preparation for Tooth-Colored Material
9 min, 16mm film, color
Title No. 007789/AA
Sale $39.25
Demonstrates the procedure for preparing a Class V facial cavity for tooth-colored material in a manikin. Shows 4-handed procedures.

Isolation of a Class V Facial Lesion with a Gingival Retractor
5 min, 16mm film, color
Title No. 009183/AA
Sale $21.25
Demonstrates placing and removing a gingival retractor on the maxillary right canine.

Project ACORDE
A Consortium On Restorative Dentistry Education
Since 1971, representatives from the professional, educational and Federal government fields of dentistry have worked together to develop instructional units on restorative procedures suitable for dental education. American Association of Dental Schools, Section on Operative Dentistry Division of Dentistry, Department of Health, Education, and Welfare National Medical Audiovisual Center, National Library of Medicine

Through Project ACORDE, dental school representatives have met and reached a consensus on the performance of various restorative procedures—an important consensus in the improvement of professional dental education. Now instructional film, video, and textual materials are available in two comprehensive courses:

Cavity Preparations
for Amalgam and Tooth-Colored Materials
See page 22 for full description.

Restoration
of Cavity Preparations with Amalgam and Tooth-Colored Materials
See page 25 for full description.

Class III Distal Cavity Preparation (Facial Access) for Tooth-Colored Material
9 min, 16mm film, color
Title No. 007777/AA
Sale $39.25
Demonstrates the procedure for preparing a Class III distal cavity (facial access) for tooth-colored material in a manikin. Shows 4-handed procedures.

Class IV Disto-Incisal Cavity Preparation for Tooth-Colored Material
14 min, 16mm film, color
Title No. 007780/AA
Sale $61.75
Demonstrates the procedure for preparing a Class IV disto-incisal cavity for tooth-colored material in a manikin. Shows 4-handed procedures.

Class V Distal-Facial Cavity Preparation for Amalgam
12 min, 16mm film, color
Title No. 007782/AA
Sale $42.25
Demonstrates the procedure for preparing a Class V disto-facial cavity for amalgam in a manikin. Shows 4-handed procedures.

Isolation of a Class V Facial Lesion with a Gingival Retractor
5 min, 16mm film, color
Title No. 009183/AA
Sale $21.25
Demonstrates placing and removing a gingival retractor on the maxillary right canine.

Project ACORDE
Cavity Preparations for Amalgam and Tooth-Colored Materials
Combined Videotape Module Format:
The following videotapes contain combinations of modules included in the above basic preclinical skills course. They may be purchased at a reduced cost as single units instead of purchasing the individual-module films or videotapes. (Combined modules are not available on film.)

Combination Module P12
19 min, 3/4 in videocassette, color
Title No. 007775/AA
Sale $42.25
Includes the following titles:
Class I Facial Pit Cavity Preparation for Amalgam P2, 4 min
Class IV Disto-Incisal Cavity Preparation for Tooth-Colored Material P9, 15 min

Combination Module P13
18 min, 3/4 in videocassette, color
Title No. 007786/AA
Sale $42.25
Includes the following titles:
Class V Distal-Facial Cavity Preparation for Amalgam P11, 13 min
Isolation of a Class V Facial Lesion With a Gingival Retractor PR3, 5 min

Combination Module P14
16 min, 3/4 in videocassette, color
Title No. 007787/AA
Sale $42.25
Includes the following titles:
Class I Occlusal Cavity Preparation for Amalgam P6, 5 min
Class III Distal-Lingual Cavity Preparation for Amalgam P10, 11 min

Combination Module P15
57 min, 3/4 in videocassette, color
Title No. 007788/AA
Sale $51.00
Includes the following titles:
Class I Facial Pit Cavity Preparation for Amalgam P2, 4 min
Class I Occlusal Cavity Preparation for Amalgam P6, 5 min
Class III Distal-Lingual Cavity Preparation for Amalgam P7, 14 min
Class IV Disto-Lingual Cavity Preparation for Amalgam P8, 10 min
Class III Distal-Lingual Cavity Preparation for Amalgam P10, 11 min
Class V Distal-Facial Cavity Preparation for Amalgam P11, 13 min
Combination Module P16
47 min, 16mm film, color, 1975
Producer USVA Title No. 007789/AA
Sale $61.00
Includes the following titles:
Part 1 Isolation of a Class V Facial Lesion With Gingival Retractor PR3, 5 min
Part 2 Class V Facial Cavity Preparation for Tooth-Colored Material, PG, 9 min
Part 3 Class III Facial (Facial Access) Cavity Preparation for Tooth-Colored Material, P4, 9 min
Part 4 Class III Medial Cavity Preparation (Lingual Access) for Tooth-Colored Material, P5, 9 min
Part 5 Class IV Disto-Incisal Cavity Preparation for Tooth-Colored Material, P9, 15 min

Composites—Reviewing of Types, Pulp Protection Etchings, and Pin Technique—Placement and Finishing
12 min, 16mm film, color, 1973
Producer USVA Title No. 005371/AA
Sale $54.50
Discusses various composite filling materials. Photomicrographs show the desirability of pulp protection. Advantages of enamel acid etching are demonstrated.

Contoured Amalgam—Matrix, Wedging, Condensating Methods, Carving, and Polishing
9 min, 16mm film, color, 1973
Producer USVA Title No. 005371/AA
Sale $40.75
Describes how newly designed, anatomically contoured matrix bands are used in filling a Class 2 cavity. Shows a variety of wedges to secure interproximal adaptation of the band. Also shows condensing, carving, and polishing the amalgam restoration.

Pantographic Recording

Articulator Adjustment
17 min, 16mm film, color, 1976
Title No. 007702/AA
Sale $45.50
Shows how the condylar elements and fossa housings are positioned to the computed intercondylar distance. The pantograph is used initially to attach the maxillary cast to the articulator. Then, the maxillary and mandibular clutches on the pantograph are attached to the upper and lower bows of the articulator.

More Efficient Operative Dentistry Through the Team Concept
120 min, 16mm film, color, 1971
Producer USDHC Sponsor USNMAC Title No. 008398/AA
Sale $118.00
Demonstrates how efficiency can be achieved in the office through organization, standardized techniques, and use of the team concept. Explains the practical use of direct golds as the restorations are placed and finished in the patient’s mouth.
INSTRUCTOR'S MANUAL—Guides the instructor-in the use of the materials, includes mid-course and final written and practical examinations.

Restoration of Cavity Preparations With Amalgam and Tooth-Colored Materials
62 pp. 9 illus
Title No. 007770/AA
Restoration of Cavity Preparations With Amalgam and Tooth-Colored Materials 409 pp. 376 illus
Title No. 009209/AA

STUDENT SYLLABUS—Describes procedures with narrative, diagrams, and photographs for each course module. Includes background information, procedure descriptions, criteria, procedure summaries, evaluation forms, aramentarium, study questions, and instructions for laboratory practice.

Cavity Preparations for Amalgam and Tooth-Colored Materials
277 pp. 79 illus
Title No. 007771/AA
Restoration of Cavity Preparations With Amalgam and Tooth-Colored Materials 346 pp. 320 illus
Title No. 009209/AA

Project ACORDE

Cavity Preparations for Amalgam and Tooth-Colored Materials
14 16mm films, 1974
Producer USDDEN
Title No. 009179/AA
Price $713.50
Provides dental or dental auxiliary students with basic knowledge and skills in the utilization of amalgam and tooth-colored materials.
Institutional materials include 14 motion pictures, a Student Syllabus, and an Instructor's Manual.
Cleared for Educational TV.

Assembly of a Matrix Band and Mechanical Retainer
4 min, 16mm film, color
Title No. 009200/AA
Sale $19.25
Demonstrates the assembly of a mechanical retainer and matrix band (Tofflemire).

Isolation of a Class V Facial Lesion with a Gingival Retractor
5 min, 16mm film, color
Title No. 009183/AA
Sale $21.25
Demonstrates placing and removing a 212 gingival retractor on the maxillary right canine.

Restoration of a Class I Facial Pit Cavity Preparation With Amalgam
12 min, 16mm film, color
Title No. 009181/AA
Rental $10.00 Sale $55.75
Demonstrates placing copal varnish, condensing, carving, burnishing, finishing, and polishing an amalgam restoration in a manikin. Demosntrates the cavity and its effects of improper and proper technic. Shows 4-handed procedures.

Restoration of a Class I Occlusal Cavity Preparation With Amalgam
11 min, 16mm film, color
Producer USDDEN
Title No. 009196/AA
Rental $7.50 Sale $47.25
Demonstrates placing varnish, condensing, carving, burnishing, occlusal adjustment, finishing, and polishing an amalgam restoration in a manikin. Shows 4-handed procedures.

Restoration of a Class I Occluso-Lingual Cavity Preparation With Amalgam
9 min, 16mm film, color
Title No. 009204/AA
Sale $40.75
Demonstrates placing a secondary metal matrix, condensing, carving, burnishing, and polishing in a manikin. Shows 4-handed procedures.

Restoration of a Class II Mesio-Occlusal Cavity Preparation With Amalgam
18 min, 16mm film, color
Title No. 009202/AA
Sale $79.25
Demonstrates condensing, carving, burnishing, occlusal adjustment, finishing, and polishing an amalgam restoration in a manikin. Shows 4-handed procedures.

Restoration of a Class III Distal Cavity Preparation With Silicate Cement—Facial Access
10 min, 16mm film, color
Title No. 009210/AA
Sale $45.50
Demonstrates placing a calcium hydroxide liner, adapting a plastic matrix strip, placing silicate cement using the bulk pack technic, and finishing in a manikin. Shows 4-handed procedures.

Restoration of a Class III Distal-Lingual Cavity Preparation With Amalgam
18 min, 16mm film, color
Title No. 009194/AA
Sale $79.50
Demonstrates placing varnish, preparing and placing a custom metal matrix strip, condensing, carving, burnishing, finishing, and polishing an amalgam restoration in a manikin. Shows 4-handed procedures.

Restoration of a Class III Mesial Cavity Preparation With Filled Resin—Lingual Access
10 min, 16mm film, color
Title No. 009190/AA
Rental $10.00 Sale $44.75
Demonstrates placing a calcium hydroxide base, placing a filled resin with a syringe, finishing, and adjusting occlusion in a manikin. Shows 4-handed procedures.

Restoration of a Class IV Mesio-Infra Cavity Preparation With Filled Resin
17 min, 16mm film, color
Title No. 009192/AA
Rental $10.00 Sale $73.00
Demonstrates placing a dead-set metal matrix, placing a filled resin with a syringe, finishing, and adjusting occlusion in a manikin. Shows 4-handed procedures.

Restoration of a Class V Distal-Facial Cavity Preparation With Amalgam
15 min, 16mm film, color
Title No. 009206/AA
Rental $12.50 Sale $54.25
Demonstrates placing a calcium hydroxide base, placing an amalgam, placing a custom metal matrix, condensing, carving, burnishing, finishing, and polishing in a manikin. Emphasizes the polishing procedure with proper and improper technic. Shows 4-handed procedures.

Restoration of a Class V Facial Cavity Preparation With Amalgam
12 min, 16mm film, color
Title No. 009185
Rental $10.00 Sale $44.75
Demonstrates placing calcium hydroxide liner, placing unfilled resin with the brush-in technic, finishing, and polishing in a manikin. Shows 4-handed procedures.

Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation With Zinc Oxide-Eugenol
10 min, 16mm film, color
Title No. 009198/AA
Sale $43.00
Demonstrates placing a dental matrix band and matrix band tottering, placing and contouring the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.

Restoring Anterior Teeth with Porcelain Fused to Gold
140 min. in videocassette, color, 1971
Producer USDDEN
Title No. 009506/AA
Sale $146.25
Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation With Zinc Oxide-Eugenol
10 min, 16mm film, color
Title No. 009198/AA
Sale $43.00
Demonstrates placing a dental matrix band and matrix band tottering, placing and contouring the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.

Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation With Zinc Oxide-Eugenol
10 min, 16mm film, color
Title No. 009198/AA
Sale $43.00
Demonstrates placing a dental matrix band and matrix band tottering, placing and contouring the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.

Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation With Zinc Oxide-Eugenol
10 min, 16mm film, color
Title No. 009198/AA
Sale $43.00
Demonstrates placing a dental matrix band and matrix band tottering, placing and contouring the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.

The Use of Pins in Operative Procedures
163 min. in videocassette, color, 1974
Producer CHIDEN
Title No. 0098512
Sale $170.50
Demonstrates placing a secondary metal matrix, condensing, carving, burnishing, and polishing in a manikin. Shows 4-handed procedures.

Restoring Anterior Teeth with Porcelain Fused to Gold
140 min. in videocassette, color, 1971
Producer USDDEN
Title No. 009506/AA
Sale $146.25
Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation With Zinc Oxide-Eugenol
10 min, 16mm film, color
Title No. 009198/AA
Sale $43.00
Demonstrates placing a dental matrix band and matrix band tottering, placing and contouring the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.

Temporary Restoration of a Class II Mesio-Occlusal Cavity Preparation With Zinc Oxide-Eugenol
10 min, 16mm film, color
Title No. 009198/AA
Sale $43.00
Demonstrates placing a dental matrix band and matrix band tottering, placing and contouring the zinc-oxide and eugenol materials, and adjusting occlusion in a manikin. Shows 4-handed procedures.
How to Order
The government films, slide sets, and other audiovisual materials listed in this catalog are distributed by the National AudioVisual Center.

Address all orders to:
National AudioVisual Center (NAC)
General Services Administration
Order Section AA
Washington DC 20409
(301) 763-1891

Please help us fill your order promptly and accurately by providing the title number and title; specify quantities if a purchase, or show dates if a rental.

Also, provide the name and phone number of the individual we can contact if it is necessary for the Center to clarify your order.

For invoicing, an official purchase order or letter on organizational letterhead is required.

For direct payment, make all checks payable to: National Archives Trust Fund (NAC)

Special handling or additional shipping charges must be paid by the user.

Purchase
Price and delivery
All materials listed in this catalog are offered for sale at the net prices indicated, F.O.B. destination. Prices are subject to change without notice.

Acknowledgment
Orders will be shipped as quickly as possible. If delayed, you will be notified of the shipping date and your order identification number. Please use this number in all references to the order.

Returns
Purchased items may not be returned for replacement or credit without the Center's prior approval. Please call or write us for instructions within 30 days from date of receipt.

Rental
16mm films only
Some of the more popular films listed in this catalog are also available for rental from the National AudioVisual Center for preview or use in your programs.

Rental periods and rates
3 days  Indicated rate
1 week  1½ times rate
2 weeks 2 times rate
4 weeks 3 times rate

Booking procedures
Please schedule rentals as far in advance as possible and list alternate play dates; or indicate if you will accept the film on the first available date. Confirmation will be sent with title and booking date. Cancellations must be received a week before our shipping date or the 3-day rental rate will be charged.

Film shipment
We assume the cost of mailing the rental print; if necessary you must pay the return shipping cost and for materials lost or damaged while in your possession. Films should be rewound after use and returned on our reels in our shipping cases.

Rental applies to purchase
The most recent rental fee may be applied to the purchase price within 90 days of the rental invoice date. Please cite the booking notice number or the customer order number on the purchase request.

Orders From Foreign Countries
Purchase
Advance payment in U.S. currency is required for all orders from foreign countries. Sorry, letters of credit are not accepted. Payment must be made by check drawn on an American bank (FDIC member) or by International money order. A proforma invoice can be provided.

Rentals
Subject to the above requirements, rental requests from outside the continental United States will be filled whenever possible.

Shipping
Foreign users must pay all shipping charges. Indicate the method of shipment desired when requesting a proforma invoice.
Preview Prints
Free preview of 16mm motion pictures will be provided to qualified customers when prints are available. If the Center does not have a preview print of the requested title, we will make every effort to refer you to a loan or rental source.

Be fair, please don't ask for preview unless you are authorized to buy and have funds for purchase.

(Preview service is not available for rentals or for materials other than 16mm motion pictures.)

Replacement Footage
Replacement footage may be ordered to replace damaged portions of previously purchased motion pictures. Please specify the exact number of running feet needed. Measure either from the first frame of the main title or from the last frame of the end title, indicating the method used. Most replacement footage will be charged at the following rates:

15¢ per ft. ($15.00 minimum) for color
10¢ per ft. ($10.00 minimum) for b/w

Prices for other replacement materials are available upon request.

Videocassette and Super 8mm
Many of the 16mm motion pictures listed in this catalog are also available for purchase in various 8mm formats and in videocassette. Please contact the Center's Order Section for further information and prices.

User Guides
The National AudioVisual Center provides accompanying materials, such as study guides or teacher manuals, that the producing agency has made available for the films. Requests for additional copies, where available, will be directed to the supplying source.

Restrictions on Use

Commercial use
The U.S. government may not have full rights to the films it produces. Our sales and rental rates are based on use solely within the organization and on the premises of the purchaser or renter, and do not constitute authorization for reproduction, resale, showing for profit, or use of the materials in any manner other than in their original form, or as may otherwise be stated in the catalog.

Television use
Where known, the type of TV clearance is indicated.

Limited use
Titles marked with restrictions such as "recommended for professional use only" have been so designated by the producing agency for your consideration.
The National Audio Visual Center distributes programs produced or sponsored by more than 150 offices or agencies of the United States Government. Listed below are just a few of the Federal divisions whose audiovisual materials are listed in this Dentistry catalog. Use the convenient postage-paid order form in the back of the catalog to request additional information about any agency's programs.

### Title Index

All titles other than 16mm motion pictures are coded as follows:

- **BO**: Book (accompanies an audiovisual program)
- **FS**: Filmstrip
- **SL**: Slide Set
- **VC**: Videocassette

#### A.

- Additive Wax Method of Forming an Harmonious Occlusion, Part 1, Placing the Wax Cusp Cones: 8, 18
- Additive Wax Method of Forming an Harmonious Occlusion, Part 2, Forming the Stamp Cusps: 8, 18
- Additive Wax Method of Forming an Harmonious Occlusion, Part 3, Forming the Shear Cusps: 8, 18
- Alginate Impression and the Dental Assistant: 5
- Alveolar Ridge Reduction for Pocket Elimination: 12
- Amalgam Alloys—Dispensing Systems, Disposable Capsules, and Amalgamator: 23
- Amalgam Cavity Preparation, Modified Outline Form—Placement of Liner, Bases, and Pins: 22
- Anatomic Landmarks in Panoramic Radiography (Rev. Ed.): 21
- Anatomy of the Head and Neck—A Series: 5
- Anterior Maxillary Ostectomy and Closure of Diastema: 13
- Apically Repositioned Partial Thickness Flap to Eliminate Periodontal Pockets: 16
- Assembly of a Matrix Band and Mechanical Retainer: 25

#### B.

- Biopsy Procedures in Oral Diagnosis: 6, 13
- Bisecting Angle Intra-Oral Radiography with Rinn Circular Positioning Indicating Device—Anterior Teeth: 21
- Bisecting Angle Intra-Oral Radiography with Rinn Rectangular Positioning Indicating Device—Anterior Teeth: 21
- Bitewing Radiography with Rinn Rectangular Positioning Indicating Device: 21
- Bleaching the Endodontically Treated Discolor Tooth: 7
- Boundaries of the Carotid Triangle: 5

#### C.

- C-Osteotomy of the Mandible—Correction of a Class 2 Malocclusion: 8
- Carotid Triangle, The: 5
- Cavity Preparation: 22
- Cavity Preparations for Amalgam and Tooth-Colored Materials, Combination Module P12 VC: 23
- Cavity Preparations for Amalgam and Tooth-Colored Materials, Combination Module P13 VC: 23
- Cavity Preparations for Amalgam and Tooth-Colored Materials, Combination Module P14 VC: 23
- Cavity Preparations for Amalgam and Tooth-Colored Materials, Combination Module P15 VC: 23
- Cavity Preparations for Amalgam and Tooth-Colored Materials, Project ACORDE: 22
- Cavity Preparations for Amalgam and Tooth-Colored Materials, Student Syllabus BO: 25
- Cementation—Properties of Luting Cements, Mixing Techniques, Pulp Protection, Casting, Displacement Problems, Etching Technique: 13
- Centric Check Bite Procedure: 8
- Centric Relation for Complete Dentures: 18
- Class I Facial Pit Cavity Preparation for Amalgam: 22
- Class I Occlusal Cavity Preparation for Amalgam: 22
- Class I Ocluso-Lingual Cavity Preparation for Amalgam: 22
- Class II Mesio-Occlusal Cavity Preparation for Amalgam: 23
- Class III Distal Cavity Preparation (Facial Access) for Tooth-Colored Material: 23
- Class III Disto-Lingual Cavity Preparation for Amalgam: 23
- Class III Mesial Cavity Preparation (Lingual Access) for Tooth-Colored Material: 23
- Class IV Disto-Incisel Cavity Preparation for Tooth-Colored Material: 23
- Class V Disto-Facial Cavity Preparation for Amalgam: 23
- Class V Facial Cavity Preparation for Tooth-Colored Material: 23
- Closure of Antral Fistula—Rotation of Pedicle Palatal Flap: 13
- Complete Denture Esthetics—Gingival Contour: 18
- Complete Denture Esthetics—Incisal Edge Contour, Anterior Teeth: 18
- Composites—Reviewing of Types, Pulp Protection, Etching, and Pin Technique—Placement and Finishing: 24
- Construction of Impression Trays for Edentulous Patients: 21
- Construction of Spaced Impression Trays for Edentulous Patients: 18
- Contoured Amalgam—Matrix, Wedging, Condensing Methods, Calving, and Polishing: 24
- Correctable Wax Impressions: 8, 11, 19
- Current Periodontal Therapy VC: 6, 13, 16

#### D.

- Denar System, The—A Series: 8, 24
- Denar System, The, Part 1, An Introduction: 8, 24
- Denar System, The, Part 2, Initial Reference and Clutch Construction: 8, 24
- Denar System, The, Part 3, Pantographic Recording: 8, 24
- Denar System, The, Part 4, Transfer of Pantograph to Articulator: 8, 24
- Denar System, The, Part 5, Articulator Manipulation: 8, 24
- Denar System, The, Part 6, Articulator Adjustment: 8, 24
- Denar System, The, Part 7, Field Inspection: 8, 24
- Denar System, The, Part 8, 2-Instrument System: 9, 24
- Dental Assistant, The—A Career of Service: 5, 8
- Dental Assistant, The—Outpatient Oral Surgery: 6
- Dental Assistant Utilization—Amalgam Procedure: 5, 24
- Dental Assistant Utilization—Endodontics—Filling the Root Canal: 8, 24
- Dental Assistant Utilization—Endodontics—Initial Visit: 8, 24
- Dental Auxiliary Trigger Situations—Interpersonal Relations: 16, 18
- Dental Esthetics—Tooth Arrangement, Part 1: 9, 19
- Dental Esthetics—Tooth Arrangement, Part 2: 9, 19
- Dental Esthetics—Tooth Arrangement, Part 3: 9, 19
- Dental Floss: 11
- Dental Health—A Series: 11
- Dental Health—Brushing: 11
- Dental Health—Dental Health and You: 11
- Dental Health—Dental Health Quiz: 11
- Dental Health—Flossing: 11
- Dental Health—Your Teeth Are in Your Hands: 7
- Dental Office Emergencies, Part 1: 7
- Dental Office Emergencies, Part 2: 7
- Dental Office Emergencies, Part 3: 7
- Dental Office Emergencies, Part 4: 7
- Dental Operating Efficiency—How Do You Score in 4-Handed Dentistry: 6
- Dental Practice Management: 18
- Dental Practice Trigger Situations—Interpersonal Relations: 16, 18
- Dental Radiology Series: 21
