The final report lists accomplishments of a 3-year federally funded project to identify and serve gifted handicapped preschool children. Procedures and outcomes are set forth for objectives in each of the following areas: services to children, services to families, staff development, and demonstration and dissemination. (CL)

WORKSHOPS AND TRAINING .................................................. 18
I. Introduction

Having completed its third year of functioning, the gifted-handicapped program is one of two such projects in the United States, funded by the Bureau of Education for the Handicapped. The Gifted-Handicapped Preschool Project is funded through the Chapel Hill Training-Outreach Project which for nine years had been dedicated to the development of appropriate educational services for young, handicapped children and their families. The curriculum, methodology and materials developed have been extended to personnel working with young children through a network of training that has "reached out" throughout the United States, as well as to local and state programs and agencies.

Prior to the beginning of the Gifted-Handicapped Project, a comprehensive search of the literature revealed a void in research of services for the gifted-handicapped child. The need for a model demonstration program to serve young, gifted-handicapped children and their families was evidenced by:

* lack of research
* lack of services
* demonstrated effectiveness of early intervention
* contributions of gifted individuals who have overcome physical or experiential handicaps
* lack of assessment procedures appropriate for children with a variety of modality deficits
* lack of curriculum and advocacy for children with special talents or unusual abilities.
In developing the most appropriate model of service delivery to this unique population (young, gifted-handicapped), efforts have focused on the following questions:

* What services are already available for this program?
* What specific needs (related to the young, gifted-handicapped) are present in North Carolina?
* What are the most appropriate strategies for identification of these youngsters?
* What form of service delivery will insure continued maximum impact to the gifted-handicapped in North Carolina?
* What innovative assessment and curriculum materials are most needed for optimal services to the young, gifted-handicapped?
* What are the specific needs of the families of the gifted-handicapped child?
* What are the most effective strategies for evaluating the effectiveness of the program?

The report that follows documents the accomplishments with relationship to the objectives specified in the second year proposal in the areas of services to children, services to families, staff development, and demonstration and dissemination. The Project Summary, a product of three year’s effort to disseminate information to target audiences contains a detailed account of all program components.
<table>
<thead>
<tr>
<th>OBJECTIVE</th>
<th>PROCEDURES</th>
<th>OUTCOME</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. To develop alternative procedures for identifying young gifted-handicapped children.</td>
<td>1.a. A referral form, including a characteristics checklist, was developed for use by teachers. 1.b. A battery of non-discriminatory evaluation procedures were identified for use with preschool handicapped children. 1.c. Appropriateness of referrals was used as an index of the effectiveness of identification procedures.</td>
<td>1.a. Checklist developed in first year was revised and expanded to include 56 items in seven areas (Project Summary p. 18). The five most common behavioral characteristics attributed to children referred were identified. 1.b. Guidelines for identification were developed and are available for dissemination in the Project Summary (p. 25). 1.c. Eighty-eight percent of referrals were identified as gifted-handicapped after further evaluation. (See Project Summary, &quot;Recruitment&quot;, pp. 13-16.)</td>
</tr>
<tr>
<td>2. To develop a replicable model of case-finding procedures.</td>
<td>2.a. In the search for young gifted-handicapped children, the following procedures were employed: a) 10 presentations b) 10 agency visits c) 500 letters d) 150 phone calls e) one public service announcement (radio) f) one television interview g) 4 newspaper articles h) one television news spot 2.b. Teachers in 3 of the consultation sites administered the Child Behavior Inventory to the gifted-handicapped children and a random sample of other children in the same classroom.</td>
<td>2.a. Thirty-five children in North Carolina were identified as gifted-handicapped. 2.b. Gifted-handicapped children identified by the Project achieved a mean score that was 2.7 points higher than the other children in the sample (see Project Summary, pp. 101-102).</td>
</tr>
<tr>

<td>-------------</td>
</tr>
</tbody>
</table>
| 3. To establish replicable criteria for services to young gifted-handicapped children. | 3. Criteria for services were developed with consideration of:  
- a) Children who have already been diagnosed as handicapped  
- b) Parental approval  
- c) General consensus of professionals  
- d) Geographical location  
- e) Type of disability  
- f) Commitment of parents and/or agency. | 3. Criteria for services are established for participation in demonstration classroom and for consultation services. (See Project Summary, pp. 24-27.) |
<p>| 4. To provide multi-disciplinary diagnostic and treatment services for young gifted-handicapped children. | 4. Multi-disciplinary diagnostic and treatment services were provided by the staff of the University of North Carolina Division for Disorders of Development and Learning, a University affiliated training facility, through established collaboration procedures. | 4. One hundred percent of the children enrolled in the Chapel Hill Demonstration Project for young, gifted-handicapped children received appropriate diagnostic and treatment services. Additional gifted-handicapped children in other programs received some services through consultation by D.D.D.L. staff. Three full evaluations were done, one follow-up evaluation, and 30 hours of therapy were delivered. |</p>
<table>
<thead>
<tr>
<th>OBJECTIVE</th>
<th>PROCEDURES</th>
<th>OUTCOME</th>
</tr>
</thead>
<tbody>
<tr>
<td>5. To establish an individualized instructional management system for each child enrolled in the demonstration program.</td>
<td>5. Individual learning objectives and prescriptive programs were developed for each child enrolled in the demonstration program. Use of the Learning Accomplishment Profile, objectives based on Bloom's Taxonomy, and recommendations of interdisciplinary professional prescriptions formed the basis of the individual management system. The units of learning found in the Chapel Hill Project's popular Planning Guide were translated into a curriculum supplement which provides a functional guide for preschool teachers in moving to creative, inquiry, divergent, evaluative learning experiences.</td>
<td>5.a. One hundred percent of the children's individual programs are documented by written objectives prescribed every three months, individual curriculum records, and therapy reports. (See Project Summary, pp. 42-48.)</td>
</tr>
</tbody>
</table>
| 6. To establish procedures for documenting and reporting each child's progress. | 6. Individual pupil progress was documented by the following procedures: 
   a. Pre-post measures on appropriate standardized tests and developmental scale. 
   b. Long-range goals and short-term objectives. 
   c. Pre-post Self-Concept Inventory. 
   d. Pre-post Child Behavior Inventory. 
   e. Periodic filing of samples of individual projects, work papers, art, etc. 
   f. Video-taping 
   g. Design and development of case-study reports on each child. 
   h. I.E.P. conferences held and movement to optimal placement which provides the least restrictive alternative. | 6.a. All children enrolled in the demonstration program have pupil progress records. Individual data and use of it is reported in detail in the Project Summary, pp. 103-117. It is reported in the format developed for looking at individual, rather than group data for this unique population. 
6.b. A minimum of 7 children will be moving into integrated public school placements for the coming school year. |

| 1. To orient families to the children enrolled in the demonstration program to the project's purposes, objectives, staff roles, and parent roles. | 1. Procedures for orientation included:  
   a. coordination of initial contact with collaborating agency  
   b. intake interviews  
   c. classroom observation  
   d. parent manual  
   e. use of multi-media communication (videotape, print and slide-tape presentations). | 1.a. Systematic procedures for orientation of families was developed and are reported in detail in the Project Summary, pp. 77,191-210. |
| 2. The needs assessment included:  
   a. Staff-parent interviews  
   b. Use of a family needs assessment report (parent interest form).  
   c. Statement of parental priorities for services. | 1.b. A parent's Guide to the demonstration program and other resources was developed and distributed to all families. (See Project Summary, Appendix Q, pp. 205-209.) |
<p>| 2. Written needs assessments were completed for 100% of the families of children enrolled in the demonstration program. | 2. The program for individual and group participation was planned based on the results of the needs assessment. Topics for group sessions were based on expressed needs. Individual needs were met as requested. |</p>

| 3. To provide a comprehensive array of services to families of children enrolled in the demonstration class. | 3. The following functions of the family program were developed to provide comprehensive services to families of gifted-handicapped children: 
   - a. supportive counseling 
   - b. liaison with the classroom 
   - c. increase parenting skills 
   - d. referral services 
   - e. advocacy and advocacy training. | 3. All parents participated in some options offered. 
   - a. Of twenty options for parents, no parent participated in fewer than seven, with eighteen being the highest. The mean was 12.8. 
   - b. All parents were given supportive counseling and referral as needed. 
   - c. Advocacy training was provided in three parent sessions. 
   - d. Parents reported changes in their skills (see Project Summary, p. 36). |
| 4. To develop and implement strategies for involvement of families of gifted-handicapped children. | 4. The demonstration project made available the following services to families: 
   - a. individual parent-staff conferences 
   - b. classroom orientation 
   - c. classroom observation 
   - d. parent interest survey 
   - e. participation in planning objectives 
   - f. parent manual 
   - g. volunteer classroom participation 
   - h. use of home activity sheets 
   - i. group parent meetings 
   - j. parent library (lending library with books and toys) 
   - k. parent bulletin board 
   - l. printed materials regarding child's special needs or general parenting 
   - m. location of community resources 
   - n. advisory board participation 
   - o. home visits 
   - p. interdisciplinary evaluation | 4.b. Home visits were made to all homes. 
   - c. All parents participated in the evaluation. |

# Services to Families (continued)

## OBJECTIVE

5. To increase the quality and quantity of community and state resources available to families of gifted-handicapped children.

## PROCEDURES

| q. | participation in materials development |
| r. | evaluation of program |
| s. | home activities with child |
| t. | special workshops |

5. The family services coordinator and other staff served as advocates in increasing resource utilization and identification, including the following resources:

- University student tutors
- University personnel as workshop leaders
- Public school personnel
- TADS
- University personnel as evaluators and therapists
- State Division of Services to the Blind
- Church volunteer for workshops
- Mental Health Clinic Personnel
- Rehabilitation Center of Wake County
- Private Day Care
- Family Service of Winston-Salem
- Direction Services of N. C. State Department of Public Instruction
- North Carolina Advocacy Council on Children and Youth
- BEH Preschool Class
- Private music class
- Frank Porter Graham Child Development Center

## OUTCOME

5. All families received services based on needs assessment and priority of services.

- All children were tutored in group by music student at U.N.C.
- One blind child was given Braille by student volunteer
- Three public school staff members gave workshop to parents
- Technical Assistance in editing parent materials was given by TADS
- Speech, O.T. and P.T. evaluations for children and consultations to parents were given U.N.C. staff.
- Church personnel gave parent workshops
- Mental Health Clinic personnel gave parent workshop
- Rehabilitation center participated with parents in planning I.E.P. for coming year
- Family Services Agency was used as referral for disturbed sibling of one child.
- Direction Services was used as "internal advocate" for consultation case in public schools.
### OBJECTIVE
6. To develop an evaluation system which documents the effectiveness of the family services program.

### PROCEDURES
- Evaluations documented parent needs, attitudes, interest, involvement in program and satisfaction through the use of:
  - a. parent interest form
  - b. child's skill's priority form
  - c. satisfaction evaluation questionnaire
  - d. Parent-Child Interaction Scale

### OUTCOME
1. N. C. Advocacy Council was used to secure support for parental concern over State School for Deaf admission policy.
2. B.E.H. preschool class identified and used for collaborative planning for one child.
3. Private tutor for violin class procured for one student.
4. Frank Porter Graham staff member gave workshop for parents group. F.P.G. invited two parents to attend Parents as Resources Workshop.
5. One hundred percent of the parents responded that there had been enough opportunities for evaluation.
6. Rank ordering by parents of activities revealed those they considered most helpful. The four most helpful activities were identified for each group of parents. They are as follows:
   1. Printed materials regarding child's special needs and/or general parenting.
   2. Parent-staff conferences
   3. Weekly mothers' meetings
   4. Special classroom days
7. All parents stated their child had made improvements or positive changes since entering the program.
8. All parents reported that they had gained from participation in the program and identified in which of the 10 content areas they had pro-

| 1. To orient the demonstration program staff to project goals, objectives, and the roles of personnel. (See Project Summary, "Staff Development," pp. 70-72 for additional information.) | 1. The procedures to be used in orientation of staff will include:  
   a. Use of individual conferences  
   b. Attendance at national and topical conferences  
   c. Staff orientation and planning sessions  
   d. Attendance at BEH Director's Conference  
   e. Weekly supervisory conferences | 1. All staff received written materials and participated in individual and group meetings for the purpose of orientation to general project goals and individual role responsibilities. |
<p>| 2. To assess staff needs and plan for staff development. | 2. In response to project objectives, staff roles were specified competencies required to meet project responsibilities identified. | 2. Review of individual competencies and needs to meet role and project were reassessed periodically to identify staff development needs throughout the project year. |</p>
<table>

</tbody>
</table>
### OBJECTIVE

1. To demonstrate and disseminate the products of the Chapel Hill Model of Services to the Gifted-Handicapped to major target audiences. (See Project Summary, "Dissemination, Training, and Outreach, pp. 65-70.)

### PROCEDURES

1. The development of public awareness of the Chapel Hill Model focused on two major groups:
   a. General Public
      - Strategies for informing the general public of project achievements continued in the following ways:
        * Information releases to area public newspapers
        * Television coverage
        * The Chapel Hill Project newsletters
        * Publications
   b. Individual Interest Groups
      - Professional organizations and agencies throughout the community and state continued to serve as major targets of dissemination. These include:
        * The N. C. State Department of Public Instruction
        * The N. C. Committee on Services to Preschool Children
        * N. C. Head Start
        * N. C. Day Care Association
        * BEH First Chance Network
        * Developmental Disabilities Training Institute
      - Strategies for dissemination with these groups included:
        * Personal conferences

### OUTCOME

1.a. By June 30th the following materials were developed for training and/or dissemination.
   1. Four slide presentations
      - Project Overview
      - Identification of Giftedness in Young Children
      - Audrey, A Case Study
      - Gifted Children in Head Start
   2. Three publications
      - A Planning Guide for Gifted Preschoolers (supplement to Outreach Preschool Planning Guide.)
      - Chapel Hill Services to the Gifted-Handicapped: A Project Summary.
      - Programs for Parents of Preschoolers.
   1.b. Approximately one hundred and fifty visitors observed the demonstration class. Observers included parents and child care personnel from local, state, national and international agencies.
   1.c. 1,750 brochures were distributed.
   1.d. Two articles appeared in Outreach Project newsletters. (Distribution approximately 500.)
