Behavioral objectives are set forth, and activities and suggested materials are described for 18 skills: recognizing sight words; arranging words in alphabetical order; using guide words in the dictionary; using consonant blends; recognizing vowel digraphs; reading words containing diphthongs; recognizing prefixes; using prefixes; recognizing and using suffixes; using pronouns and possessives; using irregular verbs; reading words with silent consonants; using homonyms correctly; identifying synonyms; using the abbreviated form of words; and recognizing declarative, interrogative, imperative, and exclamatory sentences. (CL)
It is the policy of the Jefferson County Board of Education in compliance with provisions of Title IX of the Education Amendments of 1972 not to discriminate on the basis of sex in the administration of any educational program or activity.
FOREWORD

The opportunity to restudy the curriculum and to assess it in terms of relevance for the students of today has been the most significant aspect of the year-round plan of school organization.

During the implementation of the Elective Quarter Plan (EQP) our curriculum has been studied, evaluated and rewritten into sixty-day instructional units based on the needs and interests of the students. Many of these courses are still in a preliminary draft and subject to study and review.

The process of curriculum development is continuous. Stated objectives must be tested and evaluated in the classroom to provide the feedback necessary for valid revision. Only through the ongoing assessment of need, with adjustments and redesign based on new input, interaction and tryout, can we reach our goal of maintaining a curriculum sensitive to the ever-changing requirements of the system.

We believe that it is our responsibility as special education teachers to provide experiences that will meet the needs of the individual in the following ways:

Create a program which has purpose, meaning, and utility for children at each stage of their development.

Help each student develop a realistic, positive self-image.

Assist the student in developing the potential to make academic progress and emotional, physical, and social adjustment in society.

By incorporating a "total approach" concept, we seek to meet a wide variety of student needs through a balanced program of affective, cognitive, and psychomotor development.

We believe, furthermore, that we must attempt to provide personal counseling for each student and her/his family in order to enhance the student's own understanding of her/his ability to cope with own limitations. Our counseling includes prevocational and vocational guidance, the promotion of sound mental health, working with social, therapeutic, and mental health agencies in the community, and helping in job placement with follow-up procedures to assure a higher degree of independence, security, success and happiness for each student.

We believe that these objectives can be realized through a curriculum which stresses learning by doing, perceptual knowledge and sensation, the utilitarian character of learning, an emphasis on training for life adjustment, a variety of practical facilitating activities and multi-sensory activities.

Our aim is to provide the practical educational experiences which will produce aware, involved and self-sufficient citizens of our community.
A public school system must take the responsibility of educating all of its pupils. The educational process, however, must be in accord with the student's needs and abilities as an individual. For this reason, public education has provided for special education classrooms in which the students who have been diagnosed as educable mentally handicapped can function in an instructional program that proceeds along lines which are progressive, sequential, and in accordance with the needs and abilities of the individual to be instructed.

The Jefferson County Board of Education recognizes the importance of providing the educable mentally handicapped student with an educational program based upon individual needs, interests, and abilities. This program strives to promote maximum development of each student and attempts to assist her/him in daily living, so that she/he may become a contributing and self-sufficient member of society. Education is planned to enable the student to develop the elementary skills and attitudes which are fundamental to the social and economic adjustment of the mentally handicapped. Each child must be accepted as an individual and given the opportunity to progress to the limits of her/his ability with respect for individual worth.

The educable mentally handicapped student is one who has failed to function successfully in a regular instructional program due to a variety of factors. It must be noted that the educable mentally handicapped student has the same emotions, desires, needs and frustrations as the average student. The EMH student, however, differs as to the rate and the degree of her/his development, particularly in academic areas. Therefore, emphasis should always be placed upon the learner and the academic level at which she/he is presently functioning.

The educable mentally handicapped student has been tested and has attained an intelligence quotient score within the range of 50-75. Although mental retardation is the student's major handicap, he/she has further been diagnosed as having exhibited one or more of the following characteristics:

- **Intellectually** he/she has limited capabilities; difficulty in using symbols in reading, writing, and arithmetic; limited ability to perceive cause and effect; limited ability to solve problems; and difficulty in oral and written expression.

- **Emotionally** he/she has a poor self-image; inability to realistically evaluate own strengths and weaknesses; and a restricted maturity level.

- **Physically** he/she may have additional handicaps such as speech, hearing and visual defects and poor motor coordination.

- **Socially** he/she frequently comes from an environment where education has not been highly valued; has some difficulty in participating, understanding, and meeting everyday problems and/or has limited life experiences upon which to base academic learning; and may have had adjustment problems in school.
Due to class size the EMH program has either been able to meet these individualized needs and provide training in basic academic skills, habits, and social attitudes; or has provided prevocational and vocational training geared to the individual. This does not exclude, however, the possibility of later integrating the EMH student back into the regular program in areas in which he/she can achieve successfully. The ultimate goal of special education is to produce a happy, well-adjusted, socially acceptable, civically responsible individual who can become an involved member of society.

BOOK SELECTION AND REEVALUATION POLICY

Objectives

The primary objective of the school materials center is to implement, enrich and support the educational program of the school.

The school materials center should contribute to the social, intellectual, cultural and spiritual development of the students.

Selection

Materials for the school materials center should be selected by librarians in consultation with administrators, supervisors, faculty members, students and parents.

Reputable, unbiased, professionally prepared selection aids should be consulted as guides.

Criteria for selection

Selection should consider the needs of the individual school based on a knowledge of the curriculum and on requests from administrators and teachers.

Consideration should be given to individual students based on a knowledge of elementary and secondary youth and on requests of parents and students.

Selection should provide for a wide range of materials on all levels of difficulty, with a diversity of appeal and the presentation of different points of view.

The instructional materials should have high literary value.

Materials should have superior format.

BOOK SELECTION AND MATERIAL REEVALUATION PROCEDURES

Revised June 27, 1969

We seek to educate young people in the democratic tradition, to foster a recognition of individual freedom and social responsibility, to inspire meaningful awareness of and respect for the Constitution and the Bill of Rights, and to instill appreciation of the values of individual personality. It is recognized that these democratic values can best be transmitted in an atmosphere which is free from censorship and artificial restraints upon free inquiry and learning and in which academic freedom for teacher and student is encouraged.

It is further recognized that there are areas of such a controversial or questionable nature that some restraints upon complete academic freedom are necessary.

The Jefferson County Board of Education wishes to meet ignorance, hatred and prejudice not with more ignorance, hatred and prejudice; but with understanding, goodness, and reason. Therein no individual will be allowed to impose his personal views in any subject area, and the best professional behavior and individual thought will be expected at all times. When political, moral or social problems arise within the classroom as topics of discussion or study, opportunities for opposing points of view must be provided.

The Board of Education does not advocate a policy of censorship, but a practice of judicious selection of materials to be used with students in the classrooms of Jefferson County Public Schools, and wants only to be helpful to the teachers in providing good learning experiences for boys and girls. Teachers shall use prudent judgment in determining whether materials are of such nature and shall submit items to their principal and supervisors for approval before inclusion in their instructional programs. Should such material be selected for inclusion in a teacher's curriculum guide, and objections to same evolve, the Board insists upon the following.

Individuals involved will be provided an opportunity to discuss the matter fully with local school personnel.

The materials reevaluation procedure will be initiated and conclusions reported to the school and individuals involved. See attached BOOK SELECTION AND MATERIALS REEVALUATION POLICY.

With reference to library books per se and book selection, the form used in 1963-69 and the years before may be used. See attached CITIZEN'S REQUEST FOR REEVALUATION OF MATERIAL.

Furthermore, in recognition of the scope of this problem, the Board encourages the administrations of the local schools to form panels of qualified persons, appointed fairly (e.g., teacher, parents and other school and community representatives) to consider materials to be used in the curriculums that might have an adverse effect on students. In addition, the Board suggests that individual school departments be encouraged to consider, read and review all supplementary curricular inclusions that might be offensive politically, socially or otherwise.

1:5
BOOK SELECTION AND MATERIALS REEVALUATION POLICY

Individuals, organizations, or groups who challenge or criticize instructional materials shall be asked to complete the form Citizen's Request for Reevaluation of Material comparable to that suggested by the National Council of Teachers of English.

After completing the above mentioned form, a school committee composed of the teacher in the subject area, the principal, the supervisor and the librarian shall review with the complainant the written criticisms and attempt to reach a decision concerning the complaint.

If a decision is not reached which is satisfactory to the complainant, the principal shall request the Associate Superintendent for Instruction to delegate a central committee to review and make a final decision concerning the disposition of the complaint. This decision will be reported back to the principal by the Associate Superintendent for Instruction. This central committee shall be composed of an administrator, a supervisor in the subject area under question, a classroom teacher in the subject area, the Coordinator of Library Services and a mature* parent, preferably from the school district from which the complaint originates. No member of the central committee shall have been a member of the local school committee with the exception of the supervisor.

The materials involved shall have been withdrawn from general circulation and use pending a decision in writing by the central committee.

However, in the event the complainant does not concur with the decision, he may request that this child be excused from any contact with the objectionable subject matter. Such requests will be honored.

*The word mature in this context applies to all members of the committee and means highly developed or advanced in intellect, moral qualities and outlook.

The materials center in each school should have on file "Citizen's Request for Reconsideration of a Book" from The Students' Right to Read. Reprinted by permission of the National Council of Teachers of English, October 16, 1963.
