This directory lists and describes educational projects developed, under development, and projected for development by the Teacher Corps throughout the United States. Details given for each project include: (1) name and geographic area; (2) use of ERIC descriptors to describe the major subjects; (3) intended audience; (4) brief description of the project; (5) utilization and effectiveness of results; (6) project implementation; (7) costs; (8) project director, and (9) services available to adopters of the projects. INTRODUCTION

This catalog has been prepared by the staff of the Teacher Corps Dissemination Project at the Far West Laboratory for Educational Research and Development. The content, however, has been supplied by the projects which responded to our request for information early in 1980.

That request asked projects to complete information worksheets for each major component of their programs, whether or not it was yet clear that a given component would be disseminated to others. We advised projects that we wanted to test this method of disseminating information about project-developed (or adapted) innovations (products, processes, practices, etc.) that:

- have been developed, evaluated, and institutionalized locally,
- are presently under development in the local project site, or
- are presented projected in local project planning.

Projects were advised that the catalog would provide information about experimental and proven products and practices, and as well, would serve to alert other Teacher Corps project personnel about innovations that would be available for future adoption or adaptation.

The directions for completing the worksheets follow this introduction and precede the data provided by projects.
This worksheet has been designed to collect information about Teacher Corps products and practices—from the early development stages on through to institutionalization—for sharing with other projects and educational audiences. The worksheet organizes data about project-developed products and practices so that they are compatible with several dissemination systems:

- The descriptors of the Educational Resources Information Center (ERIC) are utilized.
- The format is parallel to that of the National Diffusion Network (NDN) catalog Educational Programs That Work.
- The data may be incorporated in computerized data banks such as that provided by ERIC or other text storage and retrieval systems.

Make copies of the worksheet to use in making your preliminary drafts. As you complete the worksheet keep in mind the needs of potential adopters for clear, concise information about your product or practice. Think about the features of your program that have interested other people and jot down a list of the important facts about these features. Then expand on the list and prepare a brief narrative description; try out the description on some people who are familiar with your product or practice to see if it accurately describes the innovation and its effects; then try it out on some people who are not familiar with the program and find out if it provides them with sufficient information to get a sense of what the program is about and if the information needs any clarifications.

When you are ready to prepare the final version please follow the following directions:

- Use a typewriter with 12 picas to the inch.
- Line up the typewriter on the boxed-in portion of the worksheet and type within the boundaries.
- Avoid abbreviations and use phrases instead of sentences if you need to conserve space.

1. **Project Title:** Provide basic information to identify the project.

   - TRINITY COLLEGE (WASHINGTON, DC) AND ARLINGTON (VA) PUBLIC SCHOOLS TEACHER CORPS PROJECT
   - NEW YORK UNIVERSITY AND NEW YORK COMMUNITY SCHOOL DISTRICT 13 (BROOKLYN) PROJECT R.O.O.T.S. TEACHER CORPS
   - MILES COLLEGE (BIRMINGHAM, AL) AND JEFFERSON COUNTY BOARD OF EDUCATION (BIRMINGHAM, AL) TEACHER CORPS PROJECT
Provide at least three descriptors from the Thesaurus of ERIC Descriptors. The first should indicate which of the Teacher Corps' basic outcomes or key program features is addressed by your product or practice:

<table>
<thead>
<tr>
<th>ERIC Descriptors</th>

</tbody>
</table>

Additional indicators should be chosen from the Thesaurus or from the "ERIC Descriptor Index" in Educational Program That Work that describe the nature of the product or practice. If you think that there are more than three descriptors that are appropriate for your innovation add them in a new column on the right as shown below:

1 EDUCATIONAL ENVIRONMENT
2 CROSS CULTURAL TRAINING
3 INSERVICE EDUCATION
4 INDIANS
5 INDIVIDUALIZED INSTRUCTION
Target Audience or Audiences: Tell whether the program is intended for students, teachers, teacher educators, school administrators, community groups, Teacher Corps projects, etc.

Indicate the intended level of use (elementary school, preservice teacher interns, teacher inservice/staff development programs, etc.).

Indicate if the program concentrates on a given subject matter area (modules in questioning skill for teachers, mastery reading units for Spanish speaking students, etc.)

Description of Innovative Product or Practice: Caption and narrative.

First, prepare a brief caption-type descriptive phrase for the product (try to keep it to one line, if possible, and not more than two):

A HIGHLY STRUCTURED APPROACH TO PRIMARY GRADE MATH INSTRUCTION
A PROGRAM GUIDING PRESERVICE TEACHERS IN THEIR MASTERY OF SPECIFIED SETS OF TEACHING SKILLS SEQUENCED TO FORM A DEVELOPMENTAL PATTERN

Then, skip a line and provide a brief narrative of the product or practice in the space provided (if possible); you may add up to two lines of type at the bottom of the worksheet but do not exceed 80 characters (including spaces between words) for each line (there are 80 spaces provided in each of the boxed-in lines of the worksheet).

See Educational Programs That Work for examples of program descriptions.

Evidence of Effectiveness: Information about assurances or claims that the product or practice does what it is supposed to do.

Begin this with information about the developmental stage of the product or practice, evaluation or product assessment process completed:

PRESENTLY BEING IMPLEMENTED IN FOUR INNER CITY SCHOOLS
PLAINS TEACHER CORPS NETWORK ENDORSEMENT, AUG 79
APPROVED BY JDRP 5/8/79

Then, provide additional information about the effectiveness of the product:

STUDENT SUSPENSIONS IN THE PROJECT SCHOOLS DECREASED 34 PERCENT AND PROGRAM WAS EXPANDED TO ALL 8 HIGH SCHOOLS IN THE DISTRICT
PROGRAM PRODUCED LARGE GAINS COMPARED WITH A CONTROL GROUP OF ELEMENTARY STUDENT TEACHERS IN KNOWLEDGE OF TEACHING SKILLS, AND VERBAL INTERACTION WITH CHILDREN
Target Audience-or Audiences: Tell whether the program is intended for students, teachers, teacher educators, school administrators, community groups, Teacher Corps projects, etc.

Indicate the intended level of use (elementary school, preservice teacher interns, teacher inservice/staff development programs, etc.).

Indicate if the program concentrates on a given subject matter area (modules in questioning skill for teachers, mastery reading units for Spanish speaking students, etc.)

Description of Innovative Product or Practice: Caption and narrative.

First, prepare a brief caption-type descriptive phrase for the product (try to keep it to one line, if possible, and not more than two):

A HIGHLY STRUCTURED APPROACH TO PRIMARY GRADE MATH INSTRUCTION

A PROGRAM GUIDING PRESERVICE TEACHERS IN THEIR MASTERY OF SPECIFIED SETS OF TEACHING SKILLS SEQUENCED TO FORM A DEVELOPMENTAL PATTERN

Then, skip a line and provide a brief narrative of the product or practice in the space provided (if possible); you may add up to two lines of type at the bottom of the worksheet but do not exceed 80 characters (including spaces between words) for each line (there are 80 spaces provided in each of the boxed-in lines of the worksheet).

See Educational Programs That Work for examples of program descriptions.

Evidence of Effectiveness: Information about assurances or claims that the product or practice does what it is supposed to do.

Begin this with information about the developmental stage of the product or practice, evaluation or product assessment process completed:

PRESENTLY BEING IMPLEMENTED IN FOUR INNER CITY SCHOOLS

PLAINS TEACHER CORPS NETWORK ENDORSEMENT; AUG 79

APPROVED BY JDRP 5/8/79

Then, provide additional information about the effectiveness of the product:

STUDENT SUSPENSIONS IN THE PROJECT SCHOOLS DECREASED 34 PERCENT AND PROGRAM WAS EXPANDED TO ALL 8 HIGH SCHOOLS IN THE DISTRICT

PROGRAM PRODUCED LARGE GAINS COMPARED WITH A CONTROL GROUP OF ELEMENTARY STUDENT TEACHERS IN KNOWLEDGE OF TEACHING SKILLS, AND VERBAL INTERACTION WITH CHILDREN
Implementation Requirements: Describe what an adopter will have to do to implement the product or practice. Include information on staffing required, training needed, facilities required, and so forth. If different adoption patterns are possible describe the range of situations. Indicate the "unit" of adoption:

THE PROGRAM CAN BE ADOPTED BY AN ENTIRE SCHOOL DISTRICT OR BY ONE SCHOOL. TEACHER PARTICIPATION SHOULD BE ON A VOLUNTARY BASIS. A FACILITATOR IS NEEDED TO TRAIN EXISTING SCHOOL PERSONNEL, SPECIALISTS FROM DISTRICT, ETC., AND PARENTS.

Cost of Adoption: List all of the major program costs.

If your project uses many handbooks, indicate the number of handbooks and the range of costs rather than trying to squeeze in mention of every title.

If you group materials for sale, indicate major groupings with approximate costs, indicating if unit orders are also filled.

If your project uses commercially available materials, use a phrase such as, "A wide variety of commercially available materials already found in most classrooms is used."

For staffing and equipment, give a general idea of what is required; indicate the number of students covered and whether it's a start-up or continuing cost.

The focus here is to provide the reader with an idea of the type of costs involved.

If you feel comfortable with listing a per-pupil cost, do so; but indicate the number of students covered and whether it's a start-up or continuing cost.

Services Available to Adopter: Describe how you can help an adopter.

First, indicate if you are funded to provide technical assistance to adopters (NDN-funded Developer/Demonstrator project; BEI Outreach Project, etc.) or may be able to provide assistance within specific limits (Training may be provided for Teacher Corps Projects in MidSouth Network, etc.).

Then, provide information on materials, training, implementation services, demonstration sites, and awareness sessions that you may offer. Indicate what cost arrangements are involved for particular services:

A THREE DAY TRAINING WORKSHOP AT ADOPTER SITE MAY BE NEGOTIATED.

Contact Persons: List the name, title, agency or district, and phone number (with area code) of the individual(s) to be contacted for information about adoption of product.

DESC  1. Cross-cultural Studies
       2. Preservice Education
       3. Field Experience Programs

AUDS  Alaska native students living in rural Alaskan villages who are working toward a B.Ed. degree and either elementary or secondary state teacher certification.

INOV  Cross-cultural Education Department Program (X-CED): A five-year integrated, field-delivered B.Ed. degree.

This degree program consists of a five-year sequence of integrated courses of study forming a six-credit core for each semester and laying the conceptual foundation for the degree, accompanied by six credits of other university required or elective courses. In some cases, the integrated course of study carries over both semesters in a year. The sequence of conceptual themes for this core course of study is as follows: Concept of Culture, Culture and Learning, Minority Groups and World History, The Pluralistic American Society, Alaska Native History and Culture, Current Alaskan Economic and Political Issues, Sociocultural Context of Classrooms, Sociocultural Organization of Classrooms, Cross-cultural Teaching Methods, and Student Teaching. There are accompanying field experiences and classroom practicums throughout.

EFFT  The program has been offered in several different forms for the past six years; it is currently being revised in described format. There have been about 70 graduates of the program, many currently teaching in rural Alaska. Under a new structure, student attrition rates are down.

IMPL  This program was designed for the unique conditions of field delivery to rural Alaska, but could be adopted by other field-based or campus programs if the staff involved have a variety of areas of expertise in education, social science and humanities, and if the complex issues relating culture to education are understood.

COST  Costs for delivery to rural Alaska are not translatable to other situations. Currently have a staff of 12. Use available published texts, xeroxed articles, specially developed audiotapes, and specially developed course outlines.

SERV  X-CED is not funded to provide technical assistance. Course outlines can be made available for cost of production. Staff assistance on site may be provided if convenient and if cost is paid by other sources.

University of Alaska (Fairbanks) and Alaska Department of Education (Anchorage) Teacher Corps Project

1. Cross-cultural Training
2. Preservice Education
3. Field Experience Programs

Alaska native students living in rural Alaskan villages who are working toward a B.Ed. degree and either elementary or secondary state teacher certification.

Cross-cultural Education Department Program (X-CED): A dispersed, rural delivery system for an integrated five-year B.Ed. degree.

This system was developed for the unique conditions of rural Alaska in order to afford students living in small, isolated villages (population: 50-3,000) the opportunity of acquiring a B.Ed. degree and teacher certification. There are currently seven field centers supported by a central staff at the university campus in Fairbanks. Each field center is operated by a resident faculty member who administers the program for resident students in five to six villages surrounding the field center. In addition to regional tutorial, administrative, and political responsibilities, each field faculty member has statewide instructional responsibilities. Course development and program planning are carried out by the whole staff during the summer months. Courses are delivered by a combination of written correspondence, audiotapes, and face-to-face contacts.

The program has been in existence in several different forms for the past ten years, and it is constantly being adapted to changing circumstances. There have been about 70 graduates of the program, many currently teaching in rural Alaska.

This delivery system was designed for the unique conditions of students in rural Alaska but could be adopted by other field-based programs (possibly on-campus programs too) if the staff have a variety of expertise and are willing to develop courses in cooperation with others.

Costs for delivery to rural Alaska are not translatable to other situations. Currently have a staff of 12. Costs are high in travel and communications but low in capital improvements.

X-CED is not funded to provide technical assistance. Staff assistance on site may be provided if convenient and if cost paid by other sources.

Pat Dubbs
Statewide Academic Coordinator
X-CED Program
University of Alaska
School of Education
Fairbanks, Alaska 99701
(907) 479-7694
PROJ University of Alaska (Fairbanks) and Alaska Department of Education (Anchorage) Teacher Corps Project.

AUDS Alaska native students living in rural Alaskan villages who are working toward a B.Ed. degree and either elementary or secondary state teacher certification.

INOV Cross-Cultural Education Department Program (X-CED): A complex, decentralized decision-making structure to govern field delivery of an integrated, five-year B.Ed. degree.

This structure was developed for the unique conditions of rural Alaska in order to insure continued community input and control of the delivery of the degree program. Each of the seven regions where the program currently operates is governed by an elected regional panel composed of local or regional school board members, other community members, X-CED students, and other educational agency personnel. These panels are responsible for selecting students and monitoring their progress, selecting and annually approving field faculty and general program operation. The entire program is governed by a statewide consortium board composed of regional panel representatives; this body hires and fires the program director who works out of Fairbanks and is responsible for overall program operation.

EFFT This governance structure has made it possible for X-CED to survive political and economic vicissitudes over the past ten years and is responsible for the eminent institutionalization and economic support of the program by the University of Alaska.

IMPL This governance structure was designed for the unique conditions of delivering a statewide program in diverse regions of rural Alaska but could be adopted by other field-based programs if there is a commitment to community control of decision-making in a cross-cultural context.

COST Costs for delivery to rural Alaska are not translatable to other situations. Costs are high in travel and communications but low in capital improvements.

SERV X-CED is not funded to provide technical assistance. Staff assistance on site may be provided if convenient and if cost is paid by other sources.

3. Adoption (Ideas)
4. Diffusion
5. Decision Making
6. Community

Elementary and secondary inservice teachers, school administrators, Teacher Corps project interns, and community groups.

A five-year program to improve school climate, establish a staff development system, promote community involvement, institutionalize innovations, and disseminate useful practices.

The Teacher Corps program is presently being planned for the staffs of an elementary school, a junior high, and a senior high in Vallejo and will be implemented during 1980-1984.

The program can be adopted by a feeder school system consisting of an elementary school, a junior high, and a senior high. A collaborative partnership is needed between an institution of higher education and a feeder school system, with at least one paid full time staff member from each. Community support is also needed in the form of an ongoing volunteer committee and a half-time paid staff member.

Unknown at this time.

Expense reimbursement will enable project personnel to provide assistance to those interested in useful project processes, practices and products.

DESC 1. Staff Improvement
      2. Program Development
      3. Inservice Education

AUDS Administrators and teachers of elementary and secondary schools.

INOV A process for identification of staff development and curriculum needs. This open-ended, site-specific approach to needs assessment is used by local administrators and teachers to identify curriculum and staff development needs, analyze and prioritize these needs, implement programs to meet the identified needs, and evaluate the results. The five-step process is on-going and continuous from year to year. This needs assessment approach does not require the use of outside consultants or packaged instruments after administrators are trained in this needs assessment process.

EFT Presently being implemented in two schools, 1979-80. Over one half of each faculty voluntarily participates in curriculum and staff development. One of the major fringe benefits is the fact that the faculty and staff felt a sense of ownership and commitment in meeting identified needs. The district is so impressed with the results that the superintendent plans district-wide adoption.

IMPL The program can be adopted by an entire district or by one school. A facilitator is needed to train school administrators and teachers.

CST The facilitator with knowledge in the needs assessment approach is the only cost involved in implementation.

SERV A one-day workshop and an on-site demonstration of the process may be negotiated with the Hastings/University of North Florida Teacher Corps Project.

      Jacksonville, Florida 32216
      (904) 646-2940
University of North Florida (Jacksonville) and Saint Johns County School District (Saint Augustine) Teacher Corps Project

1. Teacher Education
2. Field Experience Programs
3. Preservice Education

Teacher educators and administrators of schools and colleges of education at institutions of higher education.

A teacher education program that integrates a site-specific inservice and graduate program.

Based upon needs assessment results for a particular school, an inservice/graduate program is being developed. The program is nontraditional in two respects: 1) content--course selection and content focus upon identified needs of the school site; 2) delivery--a clinical model is used as much as possible to deliver courses in which professors use modeling, team-teaching and coteaching with classroom teachers in delivering course content.

Presently being implemented by the University of North Florida in two rural schools in St. Johns County, Florida. Based upon ethnographic data collected on teachers, professors and interns, course work is impacting actual classroom practice. Participation in courses is high.

The program can be implemented by any institution of higher education that is committed to meeting the needs of educational practitioners. Administrators of these institutions need to show this commitment by altering faculty reward systems to encourage faculty participation in this action research. Colleges of education benefit through increased graduate enrollment and demonstrated commitment to problems of practitioners.

Negotiable.

Through consultation, the administrative structure of an institution can be examined and analyzed. Facilitators may also be needed to assist graduate professors in implementing the clinical model of course delivery. Consultation and facilitation may occur at adopter site.

DESC  1. Community Education
2. Program Coordination
3. Educational Environment

AUDS  Designers of preschool readiness programs, community-based education planners, and Teacher Corps projects.

INOV  An expanding series of concurrent activities designed to improve the home learning environment for preschoolers and increase school/home collaboration for learning improvement.

Preschool Readiness Activities for three-and-four-year-olds and Parenting Skills Workshops are designed and conducted concurrently in the project site school. Sessions currently offered are one daytime hour weekly and one two-hour evening monthly. All sessions are designed and conducted by the Teacher Corps staff, utilizing human and material resources of the IHE, LEA and community service agencies.

EFFT  Participant evaluations are highly positive. Attendance is increasing with each session. Kindergarten performance data from 79-80 control group will be compared to that of program participants entering kindergarten in the 80-81 and 81-82 school years.

IMPL  1) Teacher Corps staff personnel with the time and skill required for design and delivery; 2) Facilities and administrative support at the school; 3) Means and resources to initiate and maintain contact with preschool families; and 4) Availability and cooperation of resource agencies.

COST  Minimal additional cost beyond that already specified for staff salaries and normal program operating expenses. Funds should be made available to employ additional childcare assistance at minimum wage to maintain a child/adult ratio 4:1 for all preschool activity sessions. Duplication of handout materials, refreshments for sessions and nursery facilities will be cost considerations.

SERV  Contact persons will provide further information and program development assistance upon request.

DESC 1. Governance  
2. Community  
3. Educational Environment

AUDS School administrators, teachers, Teacher Corps projects.

INQV Guidelines for a fair and equitable election of a school-community council.

Directions are provided to new Teacher Corps projects and other educational groups for initiating a district-wide election of a school-community council. Guidelines demonstrate ways to assure equal representation of all minority groups. The topics included are: planning and tasks to be accomplished before the election, acquisition of suitable candidates, use of publicity to inform prospective voters, and methods of ballot box and mail-in voting.

EFFT Acceptance by Washington office of Teacher Corps. The videotaping of the procedural components.

IMPL The guidelines can be used by a Teacher Corps project or any school system. A committee made up of two community people, two teachers and two school principals is required to initiate proceedings.

COST It varies. Excluding salary requirements of staff to implement proceedings, the entire costs lay in leaflets and printed material or publication and distribution.

SERV Teacher Corps encourages dissemination of all successful practices, and funding is available for distribution of the videotaping of an actual election (available on request).

       3. Program Development

AUDS: Juvenile justice personnel, teacher interns, teachers, teacher educators, school administrators, students, parents, and university professors (elementary, secondary, university).

INOV: "A highly reality-based curriculum of humane discipline -- managing the educational behaviors of adults and students."

A program designed to aid teachers, school administrators, university professors, students, juvenile justice persons, and parents in internalizing humane practices of discipline.

EFFT: Curriculum developed and tested by parents, university professors, students, classroom teachers and Teacher Corps staff. Module on classroom management being systematically piloted in three public schools and one incarceratory center; will be used in all Atlanta public schools.

IMPL: May be adopted by an entire school district, juvenile justice system, or one school. One or two facilitators can train existing personnel (teachers, administrators, students, others).

COST: One curriculum guide (module collection) may be placed in each school or center. From the three-ring binder, entire modules or sections may be reproduced. Guides available at cost of reproduction and mailing.

Unit price: $5.00 each. Group Price: 10 or more copies - $3.50 each.

SERV: Training is available to other Teacher Corps projects for travel costs only. Training workshops - one, two, or three days. Negotiable for adopter sites.

4. Inservice Education
5. Low Income Groups

AUDS School administrators, teachers, teacher interns, students, parents, adjunct personnel, and juvenile justice personnel.

INOV A prototype designed for district-wide adoption of a program of humane discipline - "Anatomy of a Program of Humane Discipline."

This document outlines the approaches to humane discipline as utilized by a large urban school district (Atlanta, GA). Contents include philosophical foundations, data analysis, and a listing of program materials.

EFFT Presently being utilized in all Atlanta Public Schools. Student suspensions in Atlanta Schools decreased by one-third; school district realized zero expulsions during the first quarter, 1979-80.

IMPL Program may be adopted by entire school district or by one school. Training must begin at administrative level, then include all significant role groups.

COST Will vary. Materials, including all handbooks may be easily modified and reproduced. Consultant costs are minimal.

SERV Training is available for travel costs only to Teacher Corps projects; training workshops at other adopter sites are negotiable.

2. Community Education 5. Community
3. Diffusion 6. Inservice Education

AUDS School administrators, teachers, parents, teacher interns, community agencies, and teacher educators.

INOV "Focus on Community," a program guide to community involvement.

This booklet outlines, in pictures and directions, community involvement in the education process. Demonstrates how all persons with a vested interest in the school and its young people can become actively responsible for meeting community needs. Tells and shows the true meaning of community involvement.

EFFT Presently being utilized as a guide in current and previous Teacher Corps' school sites; documents increased parent involvement in a number of schools.

IMPL Adopter will not need specific training; easily adaptable to any school setting.

COST Unit Price: $2.00; Group price: 10 or more = $1.50 each.

SERV Will assist adopter in planning and training for effective parental involvement.

Available at cost of travel to all Teacher Corps projects. To others negotiable.

DESC  1. Educational Environment  4. Diagnostic Teaching
      2. Diffusion  5. Curriculum

AUDS  School administrators and teachers; early childhood, elementary,
      and secondary.

INOV  "A pictorial and personal essay of a cultural awareness project."

This challenging "album" is a report of one classroom teacher's
"awakening" to the intellectual possibilities within low-income children.
A brief document - "Cultural Awareness..."-contains children's writings
and drawings. The booklet demonstrates what resulted from a classroom
project funded with a Teacher Corps mini-grant.

EFFT  According to one school administrator, the "project had more positive impact
      on total school than any other during 1977-78 academic year."

IMPL  Project may be undertaken by individual class, school, or cycled into
      several schools in district simultaneously.

COST  Will vary according to number of classes, students, and teachers
      Unit price: $3.00 each.  Group Price: 10 or more - $2.50 each.

SERV  Not applicable.  Self-directional.

AUDS  Parents, students, school administrators, and teachers;
       early childhood to secondary education

INOV  Brochures - one for parents and one for students, summarizing school
district discipline guidelines.

These brochures spell out in simple, succinct terminology duties,
responsibilities, roles of parents, and rules and regulations which
govern the behavior of students in the Atlanta Public School system.
Also included are measures which are taken when rules and regulations
are violated.

EFFT  Parent brochure mailed to each household of over 70,000 students in
       school district; student brochure distributed to each student in the
       school district. Suspensions and expulsions show reduction in
       1979-80.

IMPL  Program should be adopted by entire school district. One facilitator
can train entire district.

COST  Major program costs: production of materials and one or two persons
       as consultants (or local task force responsible for program planning
       and adoption).

SERV  Workshops available to Teacher Corps sites at travel costs.
       Other adopters negotiable.

AUDS School administrators, teacher educators, students, parents, teachers, adjunct personnel; and all role groups.

INOV The Atlanta Teacher Corps Youth Advocacy Program.

This program is based upon the assessed need of all significant adults and students to become involved in addressing preparation of teachers for the inner-city. The program addresses issues of parental involvement, discipline, reentry of incarcerated youth, school violence, vandalism, student-initiated activities, oral communications, and minimum behavioral expectations of adults and students in the educative process in Atlanta, Georgia.

The program provides a variety of materials and processes designed to address youth advocacy concerns and issues through preservice and inservice education.

EFFT Project charged with institutionalizing products, processes, and practices within Atlanta public school district. State of Georgia will facilitate program-sharing. Program evaluations (both internal and external have been positive).

IMPL A variety of project materials available: project features are easily replicable; can be adopted or adapted by few personnel.

COST All project materials and services available at minimal costs.

SERV Project materials may be requested. Visitors are welcome; training is negotiable.

PROJECT: Atlanta University, Atlanta (GA) Public Schools and University of Georgia College of Education (Athens) Teacher Corps Project

DESCRIPTION:
1. Educational Environment
2. Diagnostic Teaching
3. Governance
4. Community
5. Staff Improvement
6. Cross-cultural Studies

AUDIENCE:
School administrators, teachers, state education departments, social service agencies, parents, and teacher educators.

INNOVATION:
A training module focusing on key educational issues of classroom management.

Atlanta Teacher Corps Youth Advocacy Project is one of thirteen sites involved in an experimental cluster activity directed by the Center for New Schools. Projects in the cluster — "School/Community Climate: Beyond Discipline" — include Atlantic Teacher Corps, Stanislaus State Teacher Corps, Texas Tech Teacher Corps, Virginia State University Teacher Corps, and Wilmington/Cheney State University Teacher Corps.

EFFECT:
It is possible that the Center for New Schools will package and disseminate the modules. National Teacher Corps endorsement.

IMPLEMENTATION:
Product will be available for adoption by districts and utilization by teacher educators and other individuals.

COST:
To be publicized.

SERVICES:
Awareness materials will be available; visitors are welcome, by appointment, to program and school sites where module will be piloted.

       3. Cross-cultural Studies

AUDS School administrators, classroom teachers, and teacher educators, elementary to secondary.

INOV Classroom management module: Teaching techniques and strategies for dealing with discipline problems.

   A program guide for effecting humane strategies of discipline. Contents include pre/post assessment, students' self-evaluation, teachers' or administrators' evaluation, profile of a typical disruptive student, learning tasks and activities, positive discipline models, control techniques, how to be a good manager, and classroom management in inner-city schools.

EFFT Being systematically piloted in Teacher Corps schools. Developed by teachers, teacher educators, and administrators, for teachers administrators and teacher educators. Sections being disseminated and used in numerous Atlanta schools.

IMPL Can be adopted or adapted for entire school district or by individuals.

COST Unit cost: $1.00 each.
   Group cost: Ten or more copies - 50 cents each.

SERV Training workshops negotiable.

PROJECT: Atlanta University, Atlanta (GA) Public Schools and University of Georgia College of Education (Athens) Teacher Corps Project

DESCRIPTION:
1. Educational Environment
2. Inservice Education
3. Low Income Groups

AUDIENCE:
Students, teachers, teacher educators, parents, and school administrators at the elementary, middle and secondary levels.

INNOVATION:
A high-interest approach to dealing with student behavior with a student involvement focus.

Includes approaches (peer counseling, group counseling, student corps) for dealing with disruptive student behavior which center on the involvement of students. Students themselves acquire skills necessary to make choices regarding their individual roles and responsibilities in relation to school, self, and society.

EFFECT:
The process was implemented in project schools through an interagency effort of Teacher Corps and the Law Enforcement Assistance Administration and resulted in positive changes in students' attitudes and behaviors.

IMPLEMENTATION:
Mini-school components may be adopted by entire school district, several schools, or one school. Facilitators (counselors and psychologists) can train existing school personnel.

COST:
Program summary handbooks available.
Booklet unit cost - $1.50 each; ten or more copies - $1.00 each.
Module (for students) on self-oriented behavior, unit cost - $1.00 each; group - fifty cents each.

SERVICES:
Workshops negotiable.

DESC 1. Educational Environment
2. Low Income Groups
3. Staff Improvement

AUDS Students who have been identified as alienated from the mainstream of school involvement, have low self-concepts, are low achievers and are classified as "disruptive".

INOV A "Clearing-house" - a half-way house - a center. A place of reflection, "time out" for students. A place for students who "lack motivation".

A carefully planned positive place for students who need to reflect and "get in tune with" themselves. The center activities will be guided by a sensitive, reflective listening person who does not hold the power of the red marking pencil; and one who will "outlast" student excuses and inadequacies and "believe" the student into becoming productive. Center will provide the follow-through which neither the regular classroom teacher nor the counselor ordinarily has during the school day.

EFFT Will be implemented and tested in one Teacher Corps high school in spring, 1980.

IMPL Implementation is facilitated by: 1) Consent of school administrators and the regular classroom teacher, or equivalent; 2) Supervisory personnel for designated periods; 3) Parent and community volunteers, optional; and 4) Cooperative and highly supportive teachers and counselors.

COST Program summary brochures available upon request. Unit cost - twenty-five cents.

SERV Visitors will be welcome beginning spring quarter, 1980.

DESC 1. Educational Environment
2. Inservice Education
3. Community-based Education

AUDS School administrators, federal agencies, teacher educators, community agencies, community groups, students, teachers, parents, juvenile justice agencies, and law enforcement agencies.

INOV Model of interagency collaboration (Law Enforcement Assistance Administration and Teacher Corps).

Utilizing the concepts inherent within the joint funding simplification Act, Teacher Corps Youth Advocacy Projects and the Law Enforcement Assistance Administration developed programs which formulated crime intervention models of prevention and reentry of potential juvenile offenders and previously incarcerated youth. Efforts included replication of features of the NIE Safe School Study.

EFFT Model identified three program evaluation indices: 1) class cuts, 2) disruptive behavior, 3) average daily attendance. One year later, class cuts showed 36% reduction; one-third of sample students reduced class cuts by 50%; disruptive behavior declined.

IMPL Adoptable for entire school district or individual school.

COST Program summary handbook available; evaluation report available
Unit cost - twenty-five cents each.

SERV Workshops negotiable.

1. Educational Environment  4. Program Development
2. Diffusion  
3. Inservice Education

AUDS  School administrators, teachers, teacher educators, parents, students, and others concerned with improving the learning environment.

INOV  A resource center composed of extensive collections of discipline and classroom management-related modules, transparencies, books, filmstrips, films, position papers, program evaluation, and other media. The center is well-stocked and well-organized. The purpose of the discipline-related resource center is to provide a place where teachers, administrators, parents and personnel can find ideas, develop instructional materials, explore alternative teaching/learning strategies, and develop and validate materials to use in the classroom with troubled students. Initial steps in setting up this inservice support system included seminars, a retreat, discussions, planning and acquisition of materials for use by participants. The official opening featured visits and "browse-ins" where persons came to view and use materials, resources, and facilities.

EFFT  Center utilized during summer workshops by large numbers of classroom teachers. Regular requests for materials are met through center.

IMPL  A Teacher Corps Project can very easily set up an exploratory resource center utilizing Teacher Corps dissemination materials. Concept of resource center easily replicated by school district or individual school.

COST  One facilitator could be utilized to develop the center around one idea - or one discipline - based upon need. Materials for setting up center may be existing "collectables."

SERV  Description/implementation summary available free on request.

DESC
1. Teacher Education
2. Preservice Education
3. Community-Based Education

AUDS Teacher educators.

INOV An on-site methods course: A perspective.

A 16-page discussion and description of a course in language arts methods which was taught "on site" at the public school, rather than on the university campus. The monograph includes a rationale and description of course objectives, a discussion of the advantages of an on-site methods course and some problems and possible solutions. Appendices included are the course syllabus and objectives.

EFFT The course was pilot-tested and evaluated. Participants in the course evaluated the course very highly, particularly in meeting personal needs and enhancing professional development, and demonstrating overall effectiveness and applicability of course content to classroom.

IMPL The course can be adopted or adapted by any teacher education program.

COST Cost of adoption is minimal; costs would depend on amounts needed for items such as mileage reimbursement of the instructor, materials, and other resources.

SERV Copies of the monograph are available at no cost.

2. Inservice Education
3. Diffusion

AUDS Teachers, teacher educators, and school administrators.

INOV Needs assessment: A model.

A proposal of a model for realistically "getting at" school and teacher needs. The publication discusses needs assessment as an integral part of teachers' professional development, the role of the school in needs assessment, steps and procedures, and possible outcomes. A glossary and sample forms are also included.

EFFT The model has been pilot-tested in two projects. Entire inservice programs of these projects have been based on this needs assessment process.

IMPL The model can be adopted by a school or system of schools, or it can be adapted to almost any needs assessment situation.

COST None or minimal for costs of printing, paper, and other supply materials.

SERV Consultation and training can be negotiated. Copies of the monograph are available.

DESC: 1. Inservice Education
       2. Staff Development
       3. Teacher Education

AUDS: Teachers, teacher educators, and school administrators; teacher in-service/staff development program.

INOV: An inservice course designed by teachers.

A description of a course which was tailored to teachers' expressed needs. The 16-page monograph includes the process used to develop the course, the course content, evaluation of the course, and a list of principles for effective inservice education.

EFFT: The course was pilot-tested in Honolulu and evaluated. The results of the written evaluation of the course were very positive: 100% of the respondents felt that the course was effective.

IMPL: The process can be adopted or adapted in the planning of any similar university inservice course. Assistance and coordination of the university and course instructor are essential.

COST: Costs as needed for instructor(s) and registration fee(s). Also, costs for materials and books as required by the course content and method.

SERV: Complete course description can be provided at no cost.

DESC 1. Inservice Education  
2. Staff Improvement  
3. Diffusion

AUDS Teachers, teacher educators, school administrators; teacher inservice/staff development programs.

INOV A process for planning and developing an inservice program.

A description of a process used for planning and developing the inservice program at the Teacher Corps project school. The 16-page monograph provides an overview of the program as planned and installed at the school and a developmental model (including planning and development, needs assessment, and evaluation).

EFFT The process was pilot-tested in the project and evaluated. The process has been adapted by other schools in Hawaii and has been endorsed by the Hawaii State Department of Education and the Professional Standards and Inservice Improvement Committee of the Hawaii State Teachers Association.

IMPL The process can be adopted or adapted by a single school or department or by an entire school system.

COST Cost of adoption can be limited to amounts needed for paper and duplication of materials. Additional costs would depend on the policy of the school district on compensation for teacher participation.

SERV Consultation and training sessions can be negotiated. Copies of the monograph are available.

DESC 1. Staff Improvement
2. Community
3. Inservice Education

AUDS Teacher educators, school administrators, community groups; elementary school, preservice teacher interns and teacher inservice/staff development programs.

INOV A highly structured approach to educational/staff improvement. A cooperative approach including central office personnel, principals, teachers, and parents for the improvement of a school systems program.

EFFT Presently being implemented in five suburban schools.

IMPL The program is designed for three to five schools, including all grades, K-12. Majority of faculty should agree to participate. Teacher participation should be voluntary. Facilitators for designed focus areas are needed to train teachers, parents, and administrators and to assist program development.

COST Start-up costs: Personnel program coordinator, full-time; facilitators, half to third-time per focus area; secretary full-time: $60,000 - 80,000. A variety of commercially available materials usually found in school systems used. Continuing costs: one staff development coordinator: $15,000 - 25,000.

SERV Training may be provided in midwest and midsouth Teacher Corps projects.

DESC. 1. "Inservice Education
2. Staff Improvement
3. Information Dissemination

AUDS. Teacher educators and Teacher Corps projects.

INOV. The use of multiple research methodologies to evaluate an inservice curriculum.

Six research methodologies are used to evaluate a professional development curriculum in an urban school. These are: 1) quantitative and psychometric analysis, 2) ethnographic analysis, 3) historical analysis, 4) managerial analysis, 5) comparative case study approach, and 6) classroom learning environment studies. Each methodology is analyzed in terms of the data it yields, its generation of research questions, and its contribution to general and specific bodies of knowledge.

IMPL. The program model can be adopted by a teacher training program such as Teacher Corps. Personnel familiar with transactional evaluation are necessary.

COST. A minimum of five university staff are needed to conduct the evaluation.

SERV. Research publications describing the evaluation methodologies are available.

AUDS: Teachers, interns, community council representatives, and Teacher Corps projects.

INOV: A Teacher Corps summer workshop for skill development and program planning.

Teachers, interns, community council representatives and Teacher Corps staff participated in a three week intensive summer workshop. The workshop consisted of small and large group sessions focusing on the following: 1) becoming familiar with the goals and philosophy of Teacher Corps nationally and locally; 2) skill development in the areas of multicultural education, special education, and group dynamics; 3) improvement of reading instruction, school climate, individualizing instruction; 4) program planning to assist teachers to define and develop solutions for school problems.

EFTT: Formative and summative evaluation conducted indicate effectiveness. Summer program has been conducted for the past three years. Recommendations of participants offered at workshop have been carried out.

IMPLEMENT: The program format can be adopted by one or more schools and teacher training programs. It is recommended that a needs assessment be conducted to assist in planning the program.

COST: Teachers were paid $100/week for three weeks to participate. Eight project staff members participated.

SERV: An evaluation and program description report is available from the project.

3. Governance

AUDS
Community representatives, teachers, administrators, university staff, students, parents, project staff, and school board.

INOV
"Compressed Planning Conference." A method for identifying and solving problems involved in the planning of professional development systems and improved school learning climate.

The purpose is to provide all role groups an opportunity to develop plans that are consistent with the needs of the role group within the capabilities of the IHE and LEA to implement. Basically, it allows for: 1) increased community and staff involvement in solving problems, 2) greater acceptance of solutions to problems, 3) a structure for more effective planning, and 4) reduction of the distrust that might exist between the community and school staffs.

EFFT
Conducted fall, 1978 in Drake/Des Moines Teacher Corps Project planning year. Staff presentations have been made at four Teacher Corps National Conference Follow-up Meetings.

IMPL
Can be conducted by any role-group wishing to initiate multirole group planning.

It is recommended that the site of the conference be neutral to all role groups and that at least three full days be set aside for the meetings.

COST
Determined by the number of people involved and the length of time conference is held.

SERV
Demonstration workshop conducted by Drake/Des Moines Teacher Corps staff. Technical assistance is available to assist in conducting Compressed Planning Conference. Graphics artist available to assist in graphically documenting the conference.

A program designed to assist teachers in coping with the stress related to their role in the classroom.

Teachers are trained to cope with stress through the use of two techniques: 1) biofeedback training and 2) cognitive restructuring. The biofeedback training involves learning a relaxation response through the monitoring and feedback of physiological functioning. Cognitive restructuring trains teachers to assess and change their thinking about stressful situations. Both techniques can be implemented in an individual or group situation.

Presently being implemented in urban elementary, middle, and high schools. All teachers report benefit from training and all would recommend training to other teachers. Findings from data analysis available later.

Training can be adapted to any number of teachers from diverse schools. Teacher participation should be on a voluntary basis. A trainer is needed to conduct group or individual sessions.

EMG biofeedback equipment can be leased or purchased, depending on individual needs. A trainer to participant ratio of 1 trainer for every 12 participants is desirable.

A three-hour awareness session with opportunity for intensive individual or group follow up, is possible. Follow up is designed for one hour per week over a five week period.

1. Staff Improvement
2. Teacher Education
3. Preservice Education

Student teachers, teacher educators, educational counselors, student teacher supervisors.

Training procedures intended to reduce stress levels of preservice teachers.

Two treatments for reducing preservice teacher stress were studied. Treatment one was electromyograph (EMG) biofeedback treatment; two was stress inoculation training, a form of cognitive behavior management. The effectiveness of these treatments was measured by comparing four pre- and post-treatment measures (blood pressure, skin temperature, and Teaching Anxiety Scale, and the Taylor Manifest Anxiety Scale) in the treatment groups with a control group.

Project completed, data being analyzed. Preliminary data indicates reductions in systolic and diastolic blood pressures, and anxiety as related specifically to the teaching setting.

The training can be adopted for preservice teacher education. Participation should be on a voluntary basis. A facilitator is needed to train existing personnel who could then conduct stress management training.

Cost is minimal and services can be delivered by program personnel. Purchase of biofeedback equipment is useful though not absolutely necessary.

A two-day training workshop can be provided at adapter site and expense.

AUDS Teacher interns, teachers, and administrators at the site school, the IHE and the community at large.

INOV K-12 articulation: a process for program/inservice design.

The process used for K-12 articulation and program/inservice design is a process/practice used by this project that meets the needs of the LEA by providing continuity of inservice as well as program needs. K-12 articulation was accomplished by organizing a task force for each of the five schools. The task forces are responsible for facilitating the coordination and prioritization of needs for their respective schools. They are also responsible for designing plans of action to address those needs. The task forces meet as individual units as well as collectively to insure coordination and continuity of efforts and programs being designed for the inservice program.

EFFT The project is still in the planning year. However, the project staff has been continuously informed that the process/practice being used to design the inservice program is a direct, pragmatic way of meeting the specific needs of the LEA. The staff suggested that this method of articulation would be most beneficial to other schools with similar needs especially in the Delta region.

IMPL The process/practice of implementation is as follows: 1) select task force in each school to facilitate needs assessment; 2) select chairperson to meet with other task force chairpersons regarding program content, design and continuity; and 3) task forces develop program/inservice plan for the EPDS system of the Humphreys County School District (HCSD).

COST Major program cost would be for materials needed to facilitate program design. The faculty is given release time for all task force activities.

SERV The Mississippi Valley State University/HCSD Teacher Corps project is able to provide limited technical assistance to other school districts interested in implementing the process used to design the HCSD educational personnel development system.

      2. Staff Improvement  
      3. Educational Environment

AUDS Teachers, teacher educators, school administrators; elementary and secondary; preservice and inservice.

INOV A process which trains teachers to be trainers in individualized instruction.

The training program in individualized instruction has been designed for teachers and administrators who desire to initiate an individualized instructional program in their schools. The program, utilizing the Learning Opportunities for Teachers (LOFT) Workshop, provides training in methods of individualization, classroom management systems, and follow-up activities. A few of the goals of the Individualized Instruction Training Program are to develop: a process for continuous personnel development in individualized instruction; an increasingly individualized school program; gradual replacement of traditional educational texts by materials designed for use in individualized setting; increased sharing and teaming of teacher resources. LOFT training enables the participants to experience and evaluate six management systems currently used in education. These systems include a rigidly structured whole class approach through five other levels of instruction until the setting is highly individualized and open.

EFFT PLAINS Teacher Corps Network Validation, Summer 1979. Continuation of process over four years at initial site; positive reaction to program from parents and students.

IMPL 1) Provide training through LOFT Workshop (2 1/2 days); 2) Begin implementation of individualized strategies in classroom; 3) Offer training to new participants - former trainees become assistant trainers; 4) Further implement and assess program; and 5) Repeat steps 1-4 each year.

COST Start-up costs: first workshop - $600; second workshop $350;  
LOFT materials - $500; 
Support materials for workshop - $500; start-up cost per pupil to implement program: $15.00 above cost; current elementary program (350 students).

SERV No special funding available. Descriptive brochure and implementation package available. LOFT workshop at adopter site is available. Cost negotiable.

DESC 1. Inservice Education
2. Educational Environment
3. Diagnostic Teaching

AUDS Elementary teachers.

INOV A comprehensive and systematic method for teaching reading comprehension skills.

The program provides for teaching 21 reading comprehension skills in blocks during regular reading instruction. Reading materials already on hand may be used in the program. Pretesting permits instruction to be given only in skills where students demonstrate weaknesses. Posttesting provides opportunities to chart pupil progress. Inservice training materials are available to provide teachers with knowledge about the reading comprehension skills and strategies for teaching them during the special time blocks.

EFTT 1) Presently being used in the Cycle 12 Target School; 2) research evidence of improved pupil achievement in reading comprehension.

IMPL The program can be adopted by an entire school district or by one school. The cooperation of the teaching staff and the support of the principal are essential. A facilitator knowledgeable about the reading comprehension skills is needed to train the staff. Special reading comprehension pupil learning materials and reading comprehension skills material resource room are optional.

COST Inservice teacher training materials on reading comprehension skills: two audio-slide tapes and simulation and performance kits. A wide variety of commercially available materials already found in most classrooms is also used. A facilitator is needed to provide inservice training - About $800. (If the district has a reading specialist or other staff member knowledgeable about the reading comprehension skills to guide two training sessions, there is no cost).

SERV Teacher training materials are available from the developer. Trainers are also available through the developer, if needed.

Parents and students; elementary school (kindergarten - fifth grade).

Utilization of volunteer adults in an Organized and Expansive Tutoring Program (OVIP).

Project OVIP is a formalized volunteer tutoring program which provides highly structured and systematic training in: 1) understanding children's behavior, 2) communicating with children, 3) applying natural and logical consequences and, 4) implementing a formalized method of instructional assistance (Directive Teaching Instructional-Management System - DTIMS). This training enables program participants to serve as tutors in an elementary school setting. Training provided for the volunteers ensures that they develop not only those skills needed to formally assess and remediate students who are in need of academic assistance, but also interpersonal skills and insights needed to create a positive relationship with the student.

Presently being implemented in two elementary schools. Documentation and evaluation of the program is in progress.

The program can be adopted by an entire school district or by one school. Teachers' as well as parents' participation should be on a voluntary basis. A facilitator may be needed to train adopting school district personnel. This will vary depending on the functional familiarity district implementers possess relative to the basic program components.

(1) Directive Teaching Management System - $260.00 per building;
(2) Parent Handbook - $4.00 per volunteer;
(3) Leaders Manual - $14.00 per group leader;
(4) Organized Volunteer Instructional Handbook - $25.00 per building;
(5) Consultant fee optional, depending on need for consultants.

Program developers are available to conduct awareness sessions. A two-day training workshop at the adopter site may be negotiated.

DESC  1. Educational Environment
2. Governing Boards
3. Cross-cultural Studies

AUDS  Teachers, administrators, and teacher educators; elementary and secondary schools.

INOV  A comprehensive plan for the improved effectiveness of the entire K-12 system.

In 1976, for the first time, the local elected school board had a contract with the BIA to "own" the school. The average student at Little Wound School was three years behind the national averages in math and reading skills. Attendance was by far the most difficult problem the school faced. It was not uncommon on certain days for more than fifty percent of the students to be absent. A comprehensive plan mapped out objectives and goals for the Little Wound School to follow in order to reach a desired level of student outcomes. The comprehensive plan correlates with the goals and objectives of the Teacher Corps Program.

EFFT  Plan developed-Summer of 1977. Reviewed and updated Fall, 1978. Presently being implemented. Under this comprehensive plan, student outcomes were developed. Student and teacher handbooks were also generated.

IMPL  Can be adopted by an entire school district or by one school. A workshop (5-8) days in length will be required. The administrators, school board members, support staff, community council, parents and students should all be actively involved.

COST  The costs will vary with each program. There will be consultant fees $100.00 per day for one or two consultants, plus travel for five to eight days for one or two facilitators. It is an ongoing process rather than a packaged program. There could be discretionary inservice costs: teacher stipends, for example.

SERV  A five to eight day planning session at adopter site may be negotiated.

DESC  1. Inservice Education
2. Decision Making
3. Staff Improvement

AUDS  Teachers, teacher aids, administrators and support staff.

INOV  Establishment and maintenance of a teachers' center.

The purposes of the teachers' center are: 1) promoting individual professional growth, 2) providing a working/relaxing place for the professional staff, and 3) providing a focal point for school wide programs (e.g. staff development activities that involve a large percentage of staff members). The teachers' center is a result of the inservice planning. The inservice was teacher-initiated and designed to follow the comprehensive plan in meeting mutual goals and objectives. Each year a plan is developed for inservice. Each month there is a separate theme that the inservice training follows; language arts, for example. With the elementary (K-6) programs training material is consistent from one level to the next.

EFFT  Ongoing monthly inservice training sessions for all staff. Staff at each grade level is developing a curriculum guide for their level. The staff are receiving training in order to implement the curriculum guidelines.

IMPL  A comprehensive plan needs to be adequately established if it is to be effective. The teachers must feel ownership so that they are not being forced to accept this concept. The administrators and teachers must collaborate on planning and implementing. Other educational resources need to be available (supplies, books, etc.). An area (room) has to be designated.

COST  Minimal - two days consultant fees $100.00 per day plus travel. The major costs of adopting this program will vary with each school.

SERV  A two-day training and planning session at adopter site may be negotiated.

DESC  1. Preservice Education
       2. Field Experience Program
       3. Decision Making

AUDS  Interns.

INOV  Professional growth plans developed by each intern.

This is a competency-based/field-based degree program. Interns write professional development growth plans based upon: 1) their strengths as identified by the selection research incorporated teacher perception instrument; 2) their needs as identified by the competency assessment; 3) Little Wound School students' needs and; 4) personal areas of concern. These plans include a narrative, goals, objectives, rationale for each objective, and activities to meet objectives and evaluations. Activities can include regular college classes, research, workshops, conferences, or whatever the intern feels is needed to complete an objective. Program planners and principals select appropriate teaching experiences for each intern so that he/she: 1) is able to meet his/her professional growth plan and 2) helps the Little Wound staff to meet student needs.

EFFT  This program has graduated approximately 115 undergraduate interns over the past nine years.

IMPL  A comprehensive planning workshop for all interns must be conducted so that they will gain the skills necessary to plan for their own professional growth. The IHE, in collaboration with teachers and teacher interns, will plan individual and group professional development activities designed to meet the needs of interns as identified in their professional growth plan.

COST  Dictated by local college policy and cost.

SERV  A one- to two-day training session at adopter site or this site may be negotiated.

3. Low Income Groups

AUDS Colleges of education, education majors and preservice personnel.

INOV Required education courses offered in a block, on site, in an inner city, low income-area school.

The University, in cooperation with Local Education Agency, offered opportunity to sophomore-level students who had not yet had any of the three required introductory education courses to take all three in a nine hour block Monday and Wednesday mornings from 8:30-12:15 am on site at an elementary school in an inner-city, low income area. The three courses are "Foundations of Education and Developmental Thought and Practice," "Introduction to Exceptional Children," and "Human Growth and Development." This nine-hour block is taught by three instructors and has been designed to: 1) provide an alternative offering of the three core professional courses involving interdisciplinary and team teaching; 2) provide an integrated approach to the introductory courses required of all students seeking teacher certification; 3) merge educational theory with the on-going processes of education provided in an urban educational laboratory; 4) provide reality-based preservice learning experiences related to multicultural educational processes available in the urban educational setting.

EFFT Program being implemented this semester. Pre- and posttests of attitudes are being administered. University faculty who were somewhat skeptical before implementation now, midway into the semester, are very enthusiastic.

IMPL Cooperation of an institution of higher education and Local Education Agency.

COST Cost covered by participants paying tuition and project paying local travel to IHE faculty.

SERV Inquiries welcome.

2. Staff Improvement
3. Low Income Groups

AUDS Colleges of education, universities, school administrators, and teachers.

INOV An interdisciplinary graduate studies program taught by departments of anthropology, geography, and biology.

Provides masters level candidates a well structured collateral program outside the College of Education as well as providing other inservice teachers the opportunity to develop an understanding of environmental concepts and processes; to assess urban resources in the city/county area, and to encourage curriculum directors and teachers to implement environmental education programs in their classrooms. Attention is given to the interaction between ecological, anthropological, and physical factors in our urban area. The initial course is a seminar in urban anthropology, taught on site in an urban low income area school. The class includes visits to many areas of the community. In addition, a variety of resource people will visit the class. This project will demonstrate an effective collaborative model between the College of Education and the Colleges of Art and Sciences, as well as between the institution of higher education and the community it serves.

EFFT First course being taught this semester to capacity (25) enrollment.

IMPL Cooperative effort among four departments of the University with the Department of Curriculum & Instruction taking the lead. Includes Departments of Anthropology, Biology, and Geography.

COST Tuition or cost of instruction plus local travel; selected maps, atlases, and aerial photographs of the impacted area.

SERV Inquiries welcome.

DESC 1. Inservice Education
2. Teacher Education
3. Field Experience Programs

AUDS Faculty in elementary, junior high and secondary schools.

INOV Field-based graduate-level classes on site in public schools.

Three or four graduate-level courses are offered each semester on
site after school from 3:30-6:15 pm in Teacher Corps target schools
by IHE faculty. All courses offered, including "Teaching Reading
in the Content Areas," "Introduction to Exceptional Children and
Adults," "Supervision of Student Teaching," "Treatment of Reading
Problems," "Tests and Measurements for Exceptional Children and
Adults" have direct applicability to the participants' teaching
activities. For instance, as class-projects in "Teaching Reading
in the Content Areas," participants organized paperback book
clubs in their schools, organized peer tutoring groups, did read-
ability studies on texts utilized in the classroom, and developed
instructional materials for classroom use.

EFFT Instructors pre- and posttested attitudes and knowledge levels and
these results are now being analyzed. Participation and attendance
good.

IMPL Cooperation of institution of higher education faculty and Local
Education Agency.

COST Local travel costs are the only expense when tuition is paid by
participants.

SERV Inquiries welcome.

DESC:
1. Diagnostic Teaching
2. Educational Environment
3. Teacher Education

AUDS: Teachers and administrators.

INOV: Prescriptive/diagnostic demonstration model to generate changes in academic environment that will provide more useful patterns for underachievers.

This program is designed to:
1) determine student behavior identified by teachers to be indicative of below normal academic achievement (below normal here refers to what each student ought to achieve based on their capabilities to earn an average "C" rating);
2) identify the predominant instructional strategies used by the teachers in the classroom where low achievement students are in attendance;
3) measure the following in each identified low achiever:
   (a) development level using Piaget levels,
   (b) learning style,
   (c) locus of control, Stanford Pre-school Internal-External Scale and Nowicki-Stickland Locus of Control Scale,
   (d) attendance patterns,
   (e) students' G.P.A.,
   (f) students' perceptions of problems through interviews and,
   (g) students' reading and math scores from current achievement tests;
4) examine curricular materials used in classroom for reading level, concept density, developmental level, graphics, and use patterns of student and teacher. And, finally, to blend all data obtained into a pattern that suggests ways to change academic environment for the student so that achievement will improve.

EFFT: Being implemented in the spring of 1980.

IMPL: A university faculty member is supervising a graduate assistant in data collection and analysis. They together will work with students and teachers. In turn, teachers will learn to collect data and to correlate teaching strategies and curricular materials with learning styles of students. Thus teachers will look at the learning environment they have generated and its effectiveness with underachieving and other students.

COST: Initial cost for university faculty member, graduate assistant, and materials.

SERV: Inquiries welcome.

4. Adoption (Ideas)
5. Program Development

AUDS Teachers, aides, and community persons; inservice and staff development programs.

INOV An intensive, concentrated professional development training session designed to provide content information utilizing a learning center approach.

The Professional Development Center (PDC) is a two- or three-day training program which utilizes a learning center approach for presenting participants with specific content information in a given area. PDC topics are determined from information gathered from project school faculties through a needs assessment conducted at each school. A popular feature of the PDC is the teacher exchange program in which college professors exchange classes with teachers who are participating in the PDC. This program not only enables teachers to receive training, but gives college professors the opportunity to experience firsthand what is involved in teaching in the public schools. After the training session, PDC participants synthesize information gained and plan how they can initiate classroom activities using what they have learned with the support and help of Teacher Corps personnel.

EFFT PDC sessions have been conducted in October and January with the third session scheduled for April; evaluations indicate participants feel the training is extremely effective and beneficial. Levels of use interviews indicate that "transfer" of PDC content is taking place.

IMPL The PDC can be adopted by a school district or by a university. A professional staff person is needed to coordinate the PDC. Other requirements include a department to house the PDC, instructional materials and audio-visual equipment. It is recommended that a needs assessment of the target audience be conducted to identify desired areas of training.

COST Major expenses involved in implementing a PDC include the salary of the PDC staff and instructional materials. It is recommended that equipment for the PDC first be obtained on a loan basis from sources such as the school district, university or educational center, and gradually be purchased later.

SERV All PDC materials are available at reproduction cost. Staff persons are willing to travel and serve as consultants and are available to work with persons who wish to make an on-site visit to observe the PDC.

1. Community Education
2. Field Experience Programs
3. Program Development

Staff working with community, parents, community members, students, and preschool children.

A process for collaboratively developing a community education plan based on identified needs and goals.

The process used for developing this community education plan began with the elected community council members identifying what they believed to be areas of community concern and interest. This group worked with project staff to develop the questionnaire to be used in a community concerns survey. The survey was administered to a random stratified sample of the community, members of the community council, and the faculties of the project schools. Results from this survey were used to plan the various phases of the community education plan. This plan includes a school volunteer program, evening seminars for adults and children, a neighborhood analysis exercise to gather information needed to develop a communications system within the school area, and a parent tutoring project.

Field testing during spring, 1980. The number of persons participating is greater than expected and indicates that the program is offering what the community desires. Formal evaluations conducted thus far indicate participants feel the program is beneficial and that they will continue to participate.

In order to develop a similar community education plan, it is necessary to conduct a community concerns survey. A staff person is needed to work with the community council to coordinate the development and implementation of the plan. Also, suitable facilities must be available to house community education activities.

The major expenses of developing and implementing a community education plan include the cost of conducting a community concerns survey and the salary of staff. Additional expenses are those related to program implementation, including printing and honorariums for instruction.

All materials are available at reproduction cost. Staff persons are willing to travel and serve as consultants and are available to work with persons who wish to make an on-site visit to observe this community education plan in operation.

DESC  1. Community Education
       2. Low Income Groups
       3. Demonstrations

AUDS  Community groups, service agencies, civic groups, and school personnel.

INOV  Networking for interagency collaboration.

   A model plan is being developed to bring community agencies, civic groups, and interested citizens together with school personnel to coordinate services to youth and their families in low income areas. A youth services council of agencies has been established in the Kanawha Valley with Teacher Corps as one of 20 community groups dedicated to promoting advocacy programs for youth. Examples of other organizations are Family Services, the Welfare Department, the Department of Mental Health, Home for Runaways, the court system, and Keep A Child In School Program. Through networking duplication of services is avoided, community workshops are coordinated, and the schools are better informed of agency and community services available to youth and their families.

EFFT  Networking of agencies and the school system is in operation in the Kanawha Valley of West Virginia. Monthly meetings are held through the Kanawha Youth Services Council, a part of the greater community council. Reports of networking activities and accomplishments are on file. A Satellite Conference was prepared and documented by Teacher Corps with nine other Teacher Corps projects. Fifteen agencies and ten school representatives participated from the Kanawha County Project.

IMPL  1) Designate a person to contact all community agencies to obtain commitment to networking; 2) contact key persons in school system to participate; 3) establish regular meeting dates; 4) survey needs of a target area; 5) determine objectives; 6) implement program.

COST  A person to coordinate networking may be a volunteer or may come from an agency with no cost. Ideally, a person could be cooperatively hired (each agency plus school system putting in money for a coordinator and a secretary). Estimate $14,000 for a coordinator, and $5,000 for a secretary.

SERV  A book on networking, documentation of satellite conference, a directory of community agencies, and a video-tape on services of community agencies.

       3. Teacher Education

AUDS Students, 1-12, and teachers (all levels and disciplines).

INOV Microcomputers in the classroom.

This is an innovation which can be used to provide remediation in basic skills in the media center. Microcomputers can also be used to motivate all students regardless of ability level. We have a graduate class for teachers and administrators in "An Introduction to Microcomputers' Use in the Classroom." A second follow-up course will be developed and offered next summer entitled "Microcomputer Programming." Software programs have been developed in mathematics, in music, and in science. There is very little instructional software available on the market, so our project is developing instructional programs mostly in mathematics remediation. We are using the Ohio Scientific Instrument (OSI) machines and have capabilities of programming on cassettes or floppy disks. Ten one-hour video tapes are being developed by the project on "Use of Microcomputers in the Home and in the School." The ten tapes can be used as the first segment of a graduate course or can be aired on educational television. They are being produced in a television studio and will be of excellent quality.

EFFT Our project designed a mathematics research study for high school general mathematics in which 70 students spent 20 minutes three times per week using microcomputers for mathematics reinforcement of basic skills. The data is presently being analyzed, but first approximations are that significant gains have been made by students using micros. Our ten video tapes will be available in the spring of 1981. Other evidence of effectiveness is in observations of teachers' abilities to use micros and to do programming.

IMPL It would be necessary for a project to have access to one or more microcomputers. Microcomputers may be based at or provided by a school system, may be borrowed or "field tested" from a computer company, or may be borrowed from industry.

COST Microcomputers range from $700 - $5,000 by lease or by purchase, depending on the level of sophistication and capability desired by the user.

SERV Available products: a syllabus of microcomputer course, software programs on basic mathematics, and other software programs (presently being developed). Visitors welcome to project site schools: Roosevelt Junior High and Stonewall Jackson High. Ten video training tapes on microcomputers to be available for a nominal fee for reproducing.
CALL Kathryn Maddox

(304) 345-1517

-or-

Maurene Miller
(304) 345-1517
An alternative in-school suspension program is being piloted in Roosevelt Junior High School and Stonewall Jackson High School, two Teacher Corps project sites. Instead of suspending students from school for excessive absences, discipline problems, incorrigibility or other reasons, the program provides an alternative called the "Alternative Learning Center" (ALC). The student, his/her parents and the vice-principal have a conference regarding the seriousness of the offense and all three sign a commitment of understanding. The student is placed in the Alternative Learning Center for five days. During this time, the student loses all his privileges to participate in school functions or to socialize with other students during the school day. There are no more than seven students in the ALC at a time. Teachers send an assignment to the Alternative Learning Center teacher for each student area. Therefore, instead of getting further behind in his studies, the student, while in the Alternative Learning Center, completes his work and has time to reflect upon the reasons he is in the center and to develop a personal improvement plan for the future.

The Alternative Learning Center (in school suspension) has been expanded to seven other junior and senior highs in the county. Data is collected and an annual report of the effectiveness of the Alternative Learning Center is sent to the Kanawha County Board of Education for their review.

A full-time teacher must be assigned to manage the Alternative Learning Center, or rotating teachers (different teacher each period) to insure effectiveness of the program.

Cost will be determined by the school system in implementing the program. A full-time teacher's salary will be necessary, or it may be possible to reassign present staff of a school in order to implement the program.

Visitors welcome.

Report prepared by the Teacher Corps project describing the operation of the Alternative Learning Center and summary of data.

PROJ West Virginia University (Morgantown) and Kanawha County Public Schools (Charlestown) Teacher Corps Project

AUDS Teachers, aides, parents, students as peer tutors, and community groups.

INOV A variety of tutoring programs and training programs are in operation in the project: community volunteers tutoring in a community recreation center, peer tutors in classes and in the media center and in the community. The feature most helpful to others would probably be the thirty-minute video training tape being produced by the project. This tape will be in color, will be animated and will be appropriate for community volunteers, teachers, and students. The main focus will be how to recruit, train, and use tutors effectively in the classroom. A handbook is also being prepared for teachers which will accompany the video training tape. A second 30-minute video training tape will be developed to help teachers or volunteers to improve their communication skills. It is entitled "Communication Critters." The video tapes will be studio produced and will be shown on educational television on WMUL station in Charleston.

EFFT The video training tapes will be available for project schools and for community agencies, for other schools in the county, in the state and out of state. An evaluation will be made each time the tape is used. Data will be made public.

IMPL In order to successfully implement tutoring programs, a coordinator of tutorial services should be designated. Recruitment procedure and training programs should be established for the tutor and for the teacher. Coordination and communication with community agencies are extremely important. The program can be implemented with no money and additional personnel but would take great commitment of volunteers.

COST No money necessarily. Tutors may receive a stipend for training if it is so desired. Also, the trainers either may be volunteers or may receive a stipend. The video tapes will be available for other projects in 1981 for a small reproduction fee.

SERV Three video training tapes will be available in 1981. Booklet to accompany the tapes will be available in 1981. Visitors are welcome.

CALL Kathryn Maddox Director, Kanawha County Schools/ West Virginia University Teacher Corps 200 Elizabeth Street Charleston, West Virginia 25311 (304) 345-1517

PROJ  West Virginia University (Morgantown) and Kanawha County Public Schools (Charlestown) Teacher Corps Project

DESC 1. Staff Improvement
2. Diagnostic Teaching
3. Inservice Education

AUDS Students grades, 7-12, and postsecondary; teachers and administrators.

INOV Minimal competency tests to be given at the 10th grade level are being implemented in the Kanawha County school system in order to determine areas of basic skill deficiencies. Students may retake portions of the test they failed in the 11th and 12th grades. The competency test results are recorded on the diploma but do not prevent a student from graduating. Through Teacher Corps and Title II Basic Skills, a remedial diagnostic/prescriptive math lab is being implemented in both Roosevelt Junior High and Stonewall Jackson High Schools. The laboratory will be used not only for teaching students, but also for training teachers of math, aides, parents, and volunteers. Remedial instructional materials will be developed by teachers and a variety of manipulative mathematics devices will be used in instruction. A variety of teaching techniques will be demonstrated and analyzed in the training programs.

EFFT Student achievement will be measured for students participating in the diagnostic/prescriptive program. The instruments will be the Comprehensive Test of Basic Skills (CTBS) and the Kanawha County Basic Computational Skills (BC) tests. Observation instruments will be used to record teaching styles and teacher effectiveness prior to training. Relationship of teacher training and student achievement will be attempted to be measured.

IMPL Space for a diagnostic/prescriptive secondary math laboratory. Willingness and commitment of staff and administrators. Some scheduling adjustments in order to implement the laboratory with no additional staff. Remedial materials.

COST Kanawha County Remedial Mathematics in Basic Skills are available in four notebooks: 1) addition and subtraction, 2) multiplication and division, 3) decimals and fractions. Skills are sequenced and criterion-referenced tests are available for each level.

SERV Visitors welcome. Materials are available. Training workshops available upon request.

CALL Kathryn Maddox
Director, Kanawha County Schools/

PROJECT: West Virginia University (Morgantown) and Kanawha County Public Schools (Charlestown) Teacher Corps Project

DESCRIPTION:
1. Cross-cultural Studies
2. Educational Environment
3. Low Income Groups
4. Community
5. Inservice Education

AUDIENCE: Teachers, administrators, and community.

INNOVATION: Black Appalachian Culture Study.

Because little information is available on Appalachian culture, particularly Black Appalachian Culture, the Kanawha County Schools/West Virginia University Teacher Corps Projects is surveying the literature, doing ethnographic studies, coordinating interviews, and gathering all available information on this topic. A thirty-minute video-tape, in color, will be produced on "Black Appalachian Culture." Music, dance, the arts, literature, and history will be addressed in the production. A number of community organizations, as well as resource staff from West Virginia State College and West Virginia University along with Teacher Corps staff, will be involved in this extravaganza. The video-tape may be useful in graduate courses and also applicable to secondary school students, inservice teacher training, and community and civic groups. It will be shown on WMUL Educational Television in Charleston, West Virginia, and will be available to other projects. The tape will be produced in 1981 and will be available to other projects in the spring of 1982.

EFFECT: Will be measured by the use of the video tape and by the number of requests from other school systems, other colleges and other projects.

IMPLEMENTATION: In order to show the video tape, other projects would need access to a 3/4 inch video cassette recorder and a monitor.

COST: A small cost for reproducing the tapes (cost of tape approximately $20.00) and technician's time (approximately $10); total cost $30.00.

SERVICE: A syllabus on a graduate class extending a full year on "Education that is Multicultural." A survey instrument on multicultural awareness which may be given on a pre- and posttest basis to accompany the graduate class.

AUDS  Secondary students and administrators.

INOV  Cabell Youth Advocacy Center.

School systems are constantly looking for alternative programs for students who (for behavior or other reasons) cannot "make it" in a normal classroom setting. The Cabell Youth Advocacy Center, through the Teacher Corps, has such an alternative program. To qualify for the program, students may be referred by parents, teachers, counselors, probation officers, or the Office of Exceptional Children. These students have severe behavioral problems. Students may have been incarcerated, on probation, or suspended from several (usually three) schools. The program aids the students in developing positive self-images and in obtaining reentrance into their home schools, by providing individual instruction, career awareness, vocational interest exploration, and work experience. Cabell Youth Advocacy Center is an alternative school within the school system. It serves students throughout the county.

EFFT  Test results show a two to six grade level increase in one year. After vocational counseling, students complete a vocational program and are gainfully employed. Students who graduate or complete GED have gone to college, business training, nurses training, etc. Others have returned to home school, or have become successful in vocational areas. Follow-up continues after schooling (four to five years) until student is settled into training, business, etc.

IMPL  Need a faculty who will: 1) be understanding and firm, 2) accept students with problems, 3) be willing to individualize study and counseling, 4) realize this is not a traditional school setting.

COST  Faculty salary and materials for individualizing the program.
(Cabell receives $960 for the Credit Program and $100 for the Alternative Program in addition to faculty salaries.)

SERV  Visitors welcome.

AUDS Community, migrants, LEA, IHE, and interns

INOV Summer fiesta.

This activity, sponsored and directed by the Berlin/University of
Wisconsin Oshkosh Teacher Corps Project, was the culminating activity
of the Summer Migrant Title I Project in Berlin. The fiesta was
sponsored as a community activity, and both the Anglo and Mexican
populations turned out en-masse. Authentic Mexican food was prepared
by a Mexican cook, and Mexican music and dancing were continuous
throughout the evening. A highlight of the evening was the breaking
of four pinatas (made by the interns under the direction of a UW-O
art instructor) by Anglo and Mexican children. Bus transportation
was provided to and from the migrant camps.

EFT  Attendance by both the Anglo and Mexican communities attested to
the success of the activity. A testimonial by a spokesperson from
the migrant population at the close of the fiesta was an overwhelming
indicator of success.

IMPL Requires coordination of all elements of the fiesta; i.e., place,
publicity, food, music, activities, etc. Coordination with the
migrant camps is also required.

COST Total cost of the fiesta was $500.00

SERV The project can provide cost breakdowns and consultant help, as
desired.

CALL Russell Kapin
Berlin Public Schools
344 Broadway Street
Berlin, Wisconsin 54923
(414) 361-4103
**PROJ**
University of Wisconsin at Oshkosh and Berlin Area Public Schools
Teacher Corps Project

**DESC**
1. Inservice Education
2. Teacher Improvement
3. Educational Environment

**AUDS**
Elementary teachers.

**INOV**
Brown bag seminars.

The Brown bag seminars are informal inservice activities provided for a building staff during the noon hour. University and school system personnel present in topics relevant to teacher needs and a relaxed atmosphere. Thus far presentations have included art techniques, classroom management, T.E.T. orientations, and multicultural awareness. Teachers are provided a salad bar lunch as they participate in these inservice sessions.

**EFT**
The above presentations have been made at all elementary schools. Attendance at all sessions was 100%. Feedback received was positive, both in process and substance. Thus far, the presentors have been university staff. As a result of their presentations, they have been invited into the classrooms by some of the teachers to coteach lessons. In future sessions, teachers will be encouraged to participate as presentors.

**IMPL**
The activity can be adopted by a single building or an entire system. Attempts at the middle school and senior high school were not successful due to the variability of lunch hours for the teaching staff. A person is needed to coordinate efforts of presentors and school staff.

**COST**
Cost is minimal. A consultant fee to the presentor is desirable and may be necessary. Cost of the salad bar is minimal, although it depends on the size of staff participating at a given lesson.

**SERV**
Minimal assistance is necessary, but the project can provide help in planning and implementing such a project. Demonstration of brown bag seminar program is available upon request.

**CALL**

Teacher Corps Project

DESC 1. Educational Environment
2. Low Income Groups
3. Cross-cultural Training

AUDS. Community Council, LEA summer staff, and IHE summer staff.

INOV. Adolescent migrant summer evening program

The purpose of this program, which is being planned for summer, 1980, is to provide semistructured educational and leisure activities for adolescent migrants who work in the fields during the day. It is anticipated that the program will function two evenings per week during the eight-week summer school program. Round trip transportation from migrant camps to LEA and/or IHE sites will be provided, depending on the needs of the activities. Alternative activities will be provided, such as art and ceramics, film and television production, basketball clinics, swimming, ESL. University, LEA and community expertise will be tapped to provide direction for the activities.

EFFT None - still in planning stage.

IMPL Coordination, activity expertise, facilities, and transportation. All are required for implementation.

COST No definite cost figures are available. Anticipated are costs for transportation, consultant fees, and some materials and supplies.

SERV After summer, 1980, this Teacher Corps project will be able to provide information on successes, failures, strategies, etc.

Teacher Corps Project

DESC  1. Inservice Education
       2. Staff Improvement
       3. Educational Environment

AUDS  Elementary staff.

INOV  Training of elementary teachers as counselor facilitators

The purpose of this project is to help elementary teachers become
more sensitive to the affective needs of children. Teachers develop
counseling facilitative skills for use in individual and small
group settings. A counselor "trainer" works with a teacher in a
classroom, demonstrating affective small group techniques, and
eventually has the teacher involved as a cofacilitator. Ideally,
the trainer works with the teacher in the classroom weekly and
meets the teacher prior to the session to discuss objectives and
techniques; and after the session to critique the process.

EFFT  Positive feedback from most elementary teachers; positive feed-
      back from parents and students. (This project has only been
      implemented for one semester thus far.) The guidance counselor
      and trainer have been asked to present the model at the state
      counselor-intern conference in February, 1980.

IMPL  The unit of adoption can be an elementary building or an entire
      elementary system. Needed for adoption is a counselor "trainer"
      who has developed or can develop a positive rapport with elementary
      teachers so as not to appear as a threat in the classroom. Teachers'
      participation should be voluntary.

COST  A counselor "trainer," certified as a counselor, should be available
      for this purpose. Whether or not an additional staff person is
      required is dependent on the staffing pattern of the system and the
      number of teachers/buildings to be provided services. Materials
      for the implementation of the model are desirable.

SERV  While the project is not funded, to provide technical assistance,
      the project can provide reasonable consultative, training, and
demonstration assistance under the fourth outcome of Teacher Corps.
      Materials can be provided at cost.
