Use of the ERIC database is explained in the 1980 edition of the guide. Presented first are the major components of the ERIC document collection and journal index, including the thesaurus, indexes, and source materials. A step-by-step procedure for searching Resources in Education (document index) and Current Index to Journals in Education by subject using the 1980 revision of the thesaurus is described, and a brief explanation of searching by author, institution, or type of publication is provided. The guide also includes general information about computerized ERIC searches, an annotated bibliography of ERIC materials (indexes and thesauri) and guides to ERIC, and a directory of the 16 ERIC clearinghouses. ERIC

The acronym ERIC stands for Educational Resources Information Center. ERIC is a national information system established by the U.S. Office of Education in June 1964.* Currently, it is being administered by the National Institute of Education. Its purpose is to collect, process, and make available a wide range of educational documents.

Included in the system are 16 clearinghouses, each specializing in a particular area of education. (Clearinghouses as of summer 1980 are appended to this guide. A current list of clearinghouses appears in each issue of Resources in Education.)

Documents processed by these clearinghouses are thoroughly indexed in various ERIC publications. The main publications are Resources in Education (RIE) and Current Index to Journals in Education (CIJE). Both are official publications of the ERIC system. RIE is published by the Government Printing Office; CIJE is printed through a contractor, Oryx Press.

RIE and CIJE are sister publications: RIE contains abstracts mainly of unpublished educational literature, while CIJE contains short annotations of published educational journal articles. The Thesaurus of ERIC Descriptors published by Oryx Press is the key to the ERIC indexing system. How to use each of these three publications is described in more detail below.

Most of the documents indexed in RIE are available on microfiche for on-site use in the more than 600 ERIC collections in libraries, universities, and other institutions in the United States and its territories, and 74 collections in other

---

*In 1964 ERIC stood for Educational Research Information Center. The name was changed to Educational Resources Information Center in 1967.
countries. Ask your librarian about the location of the ERIC microfiche collections in your area, or write for the latest Directory of ERIC Microfiche Collections from: ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 303, Bethesda, Maryland 20014.

Photocopies and/or microfiche of many of these documents can be ordered from the ERIC Document Reproduction Service. Prices and instructions are included in each issue of RIE. Reprints of many journal articles indexed in CIJE are available from University Microfilms; check the availability, price, and ordering information in a recent issue of CIJE.

MAJOR COMPONENTS OF THE ERIC COLLECTION

First, let us consider the ERIC collection of documents and reports covered by Resources in Education. There are four major components of this ERIC collection.

1. The Thesaurus of ERIC Descriptors.
2. Educational documents on microfiche.
3. Abstracts of the collection of microfiche with indexes (RIE).
4. Machinery to read and reproduce the microfiche.

Use of the Current Index to Journals in Education is discussed in the next section.

1. Thesaurus of ERIC Descriptors, Completely Revised, 1980. This thesaurus is an authority list of the subject terms ("descriptors") used by ERIC to index educational documents. The main section of the thesaurus lists all terms alphabetically and includes references from terms not used ("use" references).

Desegregated Schools
USE School Desegregation

For some terms, scope notes (SN) are included. Scope notes define how descriptors have been used in the indexes.
INDIVIDUALIZED INSTRUCTION

SN  Adapting instruction to individual needs within the group

The newest edition of the thesaurus (1980) gives "postings" for each descriptor. These postings represent the number of times each term has been used in CIJE and RIE, thereby giving the researcher an indication of how much material is available on his subject.

CREATIVE DRAMATICS

CIJE: 183  RIE: 183

In addition, the thesaurus has references to narrower terms (NT), broader terms (BT), and related terms (RT).

Group Status
  NT Family Status
  BT Status
  RT Groups
    Group Structure
    Group Unity
    Social Stratification

There are some substantial differences between the completely revised thesaurus issued in June 1980 by Oryx Press and the previous editions published by Macmillan.

Descriptors that have been replaced with more current terms are listed in the alphabetical display with two dates following the original term, e.g., Regular Class Placement (1968 1978), as well as a USE reference to the new term (Mainstreaming). This indicates that the original descriptor still needs to be used in searching the printed index between those dates.

Other descriptors could not be replaced by a single term or phrase. The Scope Note for these indicates that they are Invalid Descriptors and no longer in use; however, they must be used both in searching the printed index and for computer searches between the dates indicated, and other terms are suggested for searches conducted after that date.
Descriptors followed by the date Mar80 actually appear for the first time in the August issue of RIE and September issue of CIJE.

Three supplementary lists included in the thesaurus provide additional points of access to the alphabetical display. The "Rotated Descriptor Display" arranges the ERIC descriptors so that each word of each term is entered separately in alphabetical order. This listing can be used as a subject index to the main section.

- Definitions
- External Degree Programs
- Special Degree Programs
- Degree Requirements
- Degrees (Academic)
- Associate Degrees
- Bachelors Degrees
- Doctor of Arts Degrees
- Doctoral Degrees
- Masters Degrees
- Specialist in Education Degrees
- Delay of Gratification

In a standard alphabetical listing, multiword terms with the word "degree" in them would be widely separated.

The "Descriptor Group Display" divides terms into 41 general categories, listing the specific descriptors which apply to each.

THE EDUCATIONAL PROCESS:
CLASSROOM PERSPECTIVES

Ability Grouping
Academic Achievement
Academic Failure
Academic Persistence
Acceleration
Achievement Gains
Advance Organizers
Affective Objectives
Aptitude Treatment Interaction
Assignments
Audiovisual Instruction
Behavioral Objectives
...Writing Exercises

This section can be particularly useful to persons who have determined a broad area of interest and who wish to narrow the scope of their topic to a point suitable for research.

The third supplementary list, the "Two-Way Hierarchical Display," reveals the relationship of each descriptor to broader and narrower concepts.

METHODS
EDUCATIONAL METHODS
TEACHING METHODS
PROGRAMED INSTRUCTION
COMPUTER ASSISTED INSTRUCTION

A system of colons and periods is used to indicate the degree of broadness and narrowness of terms. This list is provided to assist researchers by showing the precise "hierarchical" relationship of concepts.

2. Educational Documents on Microfiche. The ERIC collection at present includes about 156,000 document titles, and it is increased at the rate of approximately 1,200 titles per month. The documents are reproduced on microfiche which are 4 inch x 6 inch sheets of film with the pages of the documents photographed and highly reduced in size. Each microfiche carries up to 98 pages.

The contents of the documents in the ERIC collection cannot be easily summarized. There are many research and project reports as well as a wide range of miscellaneous
writings related to education. The significant common feature of the material included is that most of it has not been published extensively prior to its inclusion in ERIC, so that these documents are not readily available through other sources (i.e., library book and periodical collections). There are, however, many exceptions to this generalization.

Each title has an ED (ERIC document) number, which is used to locate and identify the report. ED numbers reflect merely the sequence in which documents are processed; or to state it differently, the documents are not in a subject or author arrangement. Subject and author access to the microfiche collection are provided through the various ERIC indexes.

3. Abstract/Indexes to the Microfiche. Resources In Education (Research in Education before January 1975) is the major abstract/index to the microfiche collection. The contents of RIE list four main sections: document abstracts, subject index, author index, and institution index. The abstract section is arranged by ED number, and it includes a 100-200 word summary of each document. The abstract section also gives complete bibliographic information, a list of descriptors, the clearinghouse which processed the document, and ordering information for each title.

The subject index lists titles and ED numbers for documents under appropriate descriptors and identifiers. The author and institution indexes also note titles and ED numbers.

There are several other abstract/indexes in addition to RIE available for specialized purposes. Consult the bibliography section of this guide for a listing.

4. Machinery to Read and Reproduce the Microfiche. The following pieces of equipment are commonly available in libraries receiving ERIC documents: readers, reader/printers, and film reproducers. Ask the librarian in charge of the ERIC collection what equipment is available at your institution.

Microfiche reader. This machine enlarges the image printed on the film and projects it onto a screen, permitting the
document to be read page by page. Some libraries have lightweight portable readers which may be lent to ERIC users.

Microfiche reader/printer. This machine is a reader with the added capability of making paper reproductions of individual pages from microfiche documents.

Film reproducers. Film reproducers are machines which duplicate an entire sheet of microfiche on film. This enables users to acquire their own microfiche copies of reports.

REM KARD storage and retrieval system. Similar to a reader/printer in appearance, this machine provides quick access to resumes of ERIC documents. Pushing buttons corresponding to an ED number makes the resume for that document appear on a screen, and paper copy of the resume can be made. Although this equipment is no longer available, it is still in use in some institutions.

Strobe Search reader/printer. Software and COM microfilm for all issues of RIE from 1966 through 1979 are being developed for use with a newly introduced random access microfilm reader/printer manufactured by Information Retrieval Services, Inc., under the name Strobe Search. Entries on this microfilm roll, which will be updated on a quarterly basis, will appear exactly as they do in the monthly RIE.

SEARCHING BY TOPIC IN THE ERIC COLLECTION

1. Consult the Thesaurus of ERIC Descriptors. The first step in researching by topic in the ERIC collection should be to consult the Thesaurus of ERIC Descriptors. The thesaurus enables you to determine what subject terms are used to index your topic in Resources in Education.

If you do not find your subject listed in the thesaurus, try looking under synonymous terms. It should be kept in mind that there are many concepts for which there is no single adequate descriptor. A person wanting material on the application of programmed instruction to the study of music will have to consult
terms relating to both "Programed Instruction" and "Music Education."

NOTE: Identifiers. Proper names of persons, geographical locations, trade names, projects, and the like are frequently useful in looking up information in ERIC. However, these highly specific terms, called "identifiers," are not listed in the ERIC Thesaurus. Identifiers appear in many entries in the abstract section of Resources in Education, and those that are asterisked as major terms appear in the printed subject index section of RIE. If you are looking for material about specific acronyms, coined terminology, equipment names, geographical locations, organizations and the like, then check the subject index section of each issue of RIE (and Current Index to Journals in Education, CIJE--discussed in a following section) and the annual and semi-annual cumulations for these indexes.

Once you have located the descriptors and identifiers which apply to your topic, make a list of all related terms, narrower terms, and broader terms which you feel may be useful to your research. If you want to be very thorough, you should check all key words relating to your topic in the "Rotated Descriptor Display" and you should scan the terms in the "Descriptor Group Display" category under which your topic falls. You may also find it useful to trace your topic in the "Two-Way Hierarchical Display." These three displays are in the back of the thesaurus.

If used correctly, the Thesaurus of ERIC Descriptors can provide you with a list of subject terms under which documents on your topic will be listed in RIE, making this an important step in the research process.

2. Locate descriptor and identifier terms in the subject indexes to Resources in Education. RIE indexes list titles and ED numbers for appropriate documents under each term. To cover all documents processed through 1972, it is necessary to consult only Volume I-II (1966-69), Volume III (1970-71), Volume IV (1972), and Volume V (1973) of ERIC Educational Documents Index. These volumes cumulate all subject indexes for RIE through 1973, and they include earlier material indexed in Office of Educational Research Reports, 1956-1965. To cover
material issued after 1973, consult the annual cumulations and monthly issues of RIE.

From the indexes, compile a list of the titles you desire to study, along with their ED numbers. Abstracts for the titles on your list may be found in several sources and you may wish to review them before actually looking up the reports themselves. They can be found in the monthly issues of RIE where the document was first listed and in cumulative volumes called ERIC Educational Documents Abstracts. The abstract also comprises the first page of each document on microfiche.

3. **Locate the desired reports in the microfiche files.** Documents are arranged in sequence according to their ED numbers. Many longer reports are continued on two or more microfiche. If the note on the upper left hand corner of the film indicates 1 of 2, it is a two part document, 1 of 3, three parts, etc.

Some documents listed in Resources in Education are not available on ERIC microfiche. If you do not find the report you are looking for in the microfiche files, locate its abstract in the appropriate monthly issue of RIE. If the document was not reproduced on ERIC microfiche, the abstract will include the note "Not available from EDRS" (ERIC Document Reproduction Service). Recent issues of Resources in Education designate unavailable documents with a double slash mark (//) after the ED number. When this occurs, the abstract will also include a source from which the document may be obtained. Typically, items not on microfiche are copyrighted, or they are readily available through other channels.

4. **View documents on microfiche reading equipment.** Once the desired reports have been located, they can be viewed and reproduced with the various machines available in your library. If you do not know how to operate the equipment, do not hesitate to ask the library staff member on duty for assistance.
SEARCHING BY AUTHOR, INSTITUTION, OR TYPE OF PUBLICATION IN RESOURCES IN EDUCATION

ERIC materials are indexed by author and by sponsoring institution, in addition to subject terms (descriptors and identifiers). If you wish to discover what articles a certain author has written, or if you wish to see what materials a certain university or institution has sponsored, you can consult the "author" and/or "institution" sections in RIE.

Since July 1979, an index by type of publication has been included in RIE. The code by which publication types are designated appears at the head of the index, which enables the user to scan titles under such headings as research reports, curriculum materials, bibliographies, proceedings, dissertations/theses, information analyses, numerical/quantitative data, and speeches/meeting papers.

SUGGESTED METHODS FOR CITING ERIC MATERIALS

Sample footnote:

16

Sample bibliographical entry:

Since ERIC materials are classified neither as books nor as periodicals, they may be listed under the heading of SPECIAL SERIES in bibliographies that are divided by these formats, i.e., BOOKS, SPECIAL SERIES, PERIODICALS.

SEARCHING BY TOPIC IN EDUCATION JOURNALS

ERIC provides the Current Index to Journals in Education (CIJE) for persons seeking information in the periodical literature of this field. CIJE furnishes subject and author indexes to over 700 periodicals containing materials related to education. Other useful features of CIJE are a "Main Entry Section," which lists subject terms used to describe each article and provides brief annotations for many articles; a "Journal Contents Index," which lists the articles indexed from each journal under the name of the journal; and a "Source Journal Index," which lists the names of all journals indexed in alphabetical order and gives price, address, frequency of publication, and reprint availability for each. The steps for researching a topic in CIJE are described below.

1. Establish your subject terms (descriptors and identifiers). To research a topic using CIJE, begin by establishing the subject terms used to index the desired material. CIJE, like Resources in Education, utilizes the terms listed in the Thesaurus of ERIC Descriptors as well as identifiers. New subject terms are noted in each issue of CIJE and RIE.

2. Locate descriptors and identifiers in the subject indexes to CIJE. Once you have established the descriptors and identifiers for your topic, look them up in the subject index section of CIJE. CIJE was first produced in 1969, and it is issued monthly, with semi-annual and annual cumulations. Consult the annual cumulations for those years which are complete and the monthly and/or semi-annual issues for the current year.

3. Select articles which apply to your project. From the subject section of CIJE, select the articles which apply to your
project, recording all the information needed for locating and citing the articles. If you desire more information about an article before actually locating it, look it up in the main entry section. The main entry provides complete bibliographic information, a list of subjects, and usually, a brief annotation for each article. Trace the main entry through the EJ (educational journal) number which is assigned to each reference.

4. Determine if the desired articles are available in your library. Once articles have been selected and complete bibliographic information has been noted, consult the periodical records of your library to determine if the desired items are available. If you have difficulty interpreting your library's periodical records or finding journals, do not hesitate to seek assistance from the librarian responsible for this area. If the articles you desire are not available at your library, inquire about the possibility of receiving them through inter-library loan or other cooperative arrangements. Reprints of indexed articles may be obtained from University Microfilms International (UMI) for about 65 percent of the journals covered. Consult any recent issue of CIJE for complete information regarding this service.

NOTE: One point to bear in mind is that articles indexed in CIJE are not included in the ERIC microfiche collection. The microfiche collection consists primarily of uncopyrighted materials not readily available through other sources. Periodicals are readily available through well established channels, and most of them are copyrighted.

SEARCHING BY AUTHOR OR JOURNAL IN EDUCATION JOURNALS

You also may search CIJE by author or by journal title. If you want to see what a particular author has written, or if you wish to see what articles a certain journal has printed, simply consult the appropriate index in the back of each monthly CIJE.
NOTE: The Journal Contents Index lists only articles which have been selected for annotation in CIJE; not all journals are indexed cover-to-cover.

COMPUTERIZED ERIC SEARCH

Complete bibliographic information for reports listed in Resources in Education and articles listed in the Current Index to Journals in Education is available for purchase on computer tapes. ERIC TAPES, as they are called, make possible automated searches of all materials included in the system. A complete bibliography of ERIC reports with abstracts and journal articles indexed by CIJE, with annotations, can be produced on a given subject.

Many universities, state departments of education, and research centers receive ERIC TAPES and provide a range of automated bibliographic services, as do some individual clearinghouses. There are also commercial services which sell access to ERIC TAPES via remote terminals fed into a centralized computer. Inquire at your institution regarding the availability of automated ERIC research. A comprehensive listing of such services, complete with telephone numbers, names of contact persons, prices, etc., is available in the following directory:

Directory of ERIC Search Services. Available from: ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 303, Bethesda, Maryland 20014. This same address should be used for all other information regarding ERIC TAPES.

SELECTED BIBLIOGRAPHY OF ERIC MATERIALS

This bibliography is selective. For additional information about the ERIC system consult:

To keep informed of the latest items, check the notices in current issues of RIE and CIJE, and solicit promotional literature from the clearinghouses and publishers which produce ERIC materials.

Abstracts, Indexes, and Thesaurus

Each issue combines AIM and ARM (see entries below) in a single volume. Though merged under one cover, AIM and ARM constitute separate sections, and they are essentially the same as before the merger. The frequency of publication had been increased to six times per year.

This series is now being continued under the new title Resources in Vocational Education (see entry under new title).

A quarterly abstract index to instructional materials in vocational and technical education.

Each issue of AIM is assigned an ED number under which reports listed in that issue are available as a set in the ERIC microfiche collection. Reports within each set are arranged by VT number. Each issue of AIM contains a listing of ED numbers corresponding to all previous issues of AIM.
Contents: abstracts, subject and identifier index, personal and institutional author index.

Starting with volume 7, 1974, individual issues of AIM and ARM were combined under one cover. The indexes to AIM and ARM are cumulated in a combined annual volume, the AIM-ARM Annual Index.

A quarterly abstract/index to research materials in vocational and technical education. Includes a listing of research projects in progress. Otherwise this set is identical to AIM. Starting with volume 7, 1974, combined with AIM under one cover.

Phoenix, AZ: Oryx Press, v.11(3), March 1979-.

Provides detailed indexing to articles in over 700 education and education-related journals. Issued monthly with semi-annual and annual cumulations. Utilizes terms listed in the Thesaurus of ERIC Descriptors.

Contents: source journal index, subject index, author index, journal contents index and main entry section.

Two notable features of this tool are the article annotations which appear in the main entry section and the journal contents index which lists articles indexed under each journal title.

Articles indexed in this source must be located in the journals; they are not included in the ERIC microfiche collection. Reprints of articles from about 65 percent of the journals covered are available from University Microfilms; this availability and information for ordering are included in each monthly issue.

A bibliography of documents and articles dealing with library and information sciences. The contents include: a main entry section, listing ERIC documents with abstracts; a section listing journal articles with annotations; a subject index; an author index; and an availability section, which provides ordering information.

Similar subject bibliographies were produced for career education, early childhood education, educational finance, reading, and social studies/social science education.

Each volume cumulates all report abstracts for the specified year. Abstracts are arranged according to their ED (ERIC document) number in one listing for each year. These volumes make it unnecessary to refer to monthly issues of Resources in Education (Research in Education) for document abstracts. Document abstracts are also available on the microfiche themselves.

A cumulative subject-author index to all issues of Research in Education through 1969. Also included is the material listed in Office of Education Research Reports, 1956-65, and the ERIC Catalog of Selected Documents on the Disadvantaged.

Entries give title and ED number for each report. Volume 1 lists major descriptors, which are terms designating the chief concepts of a document. Volume 2 lists
minor descriptors, which describe documents to a level of specificity beyond that of major descriptors. Volume 2 also contains the cumulative author index.

A continuation of the earlier volume, covering the years 1970 and 1971. The format is identical to the 1966-1969 edition except that all sections are here bound in one volume.

This cumulative list of organizational sources of documents and report literature supplements the two ERIC Educational Documents Indexes for 1966-1971; the institution index is included in subsequent editions.

These one year cumulations provide access to ERIC reports by author, major descriptor, minor descriptor, and institution indexes.

Index to reports ED 000 001 through ED 001 000, all relating to higher education. Contents: part 1, subject index; part 2, list of reports by ED number. Abstracts not included. This index is available only on microfiche.

A cumulative subject-author index to all issues of Research in Education through 1969.
This work provides essentially the same information as ERIC Educational Documents Index, 1966-1969; however, the format differs significantly. The subject index to the Complete Guide... lists only ED numbers. Titles have to be searched in a separate listing. The Complete Guide... combines major and minor descriptors in one listing, distinguishing between them with bold and light face type.

Contents: subject index, author index, clearinghouse index, numerical title list. The preface includes a list which correlates ED numbers to ERIC index issues.

Resources in Vocational Education. Columbus, Ohio: National Center for Research in Vocational Education, Ohio State University, begins with v.10, 1977-.

Continues the AIM/ARM series cited above. Beginning with volume 10, all materials listed have individual ED numbers, making their location in the microfiche files less complicated. There are also changes in design and format. Issued six times per year with annual cumulations.

An abstract/index to bibliographies, review papers, and other related materials published by the individual clearinghouses during the time span indicated. See ED 078 862 for a similar volume covering 1967-1972; ED 087 411 for 1972-1973; and ED 126 856 for 1973-1975.

Indexes 1,740 documents dealing with the special educational needs of the disadvantaged, ED 001 001 through ED 002 740. Does not include document abstracts.

Subject index to reports ED 001 001 through ED 002 740. Includes ED numbers only; no titles.

Indexes reports ED 002 747 through ED 003 960 by author, institution, subject, and report number.

Abstracts of 1,214 research reports received by the Bureau of Research before the start of publication of Research in Education. Lists ED 002 747 through ED 003 960.

A series of literature surveys covering current topics of interest in the field of education. Each issue listed selective periodical citations (with annotations) and ERIC document abstracts on its given topic. Some sample topics are: no. 2 - Early Childhood Programs, no. 7 - Finance and Organizational Change in Education, no. 12 - Instructional Programs and Curriculum Planning in Read-

An abstract/index to manpower research sponsored by various federal agencies.

Reports MP 000 001 through MP 000 946 comprise a separate collection of microfiche. Reports MP 000 947 through MP 001 042 have corresponding ED numbers and are interfiled with the main ERIC collection.

Contents: document abstracts, subject index, institution index, sponsoring agency index, investigator index, report number index, contract and grant number index, cross reference index.

An abstract/index to PACE (Projects to Advance Creativity in Education) approved under TITLE III, Supplementary Centers and Services Program, Elementary and Secondary Education Act of 1965.

Reports listed in these volumes comprise a separate collection of microfiche, ES 000 001 through ES 002 554.

Contents: subject index, local education agency index, project number index, project resumes.

Cumulates projects listed in volumes 1, 2, and 3 which were still in operation as of February 1969. Listed also are 45 new projects which did not appear earlier (ES 002 555 through ES 002 599). These new projects, however, are not available on microfiche, since the original copies were not of reproducible quality. The format is the same as earlier volumes.

An abstract/index to PACE (Title III, ESEA, 1965), the Bilingual Education Program (Title VII, ESEA, 1965), and the Dropout Prevention Program (Title VIII, ESEA, 1965); all funded during the fiscal year 1969. The format is the same as earlier volumes.

Starting with the January 1975 issue, the title changed to Resources in Education to account for the broader scope of the material covered. See entry below for a full annotation.

This volume reprints the report resumes which appeared in the first fourteen issues of RIE. It is an extremely useful tool because it cumulates this material for the first time, and it supplements the ERIC Educational Documents Abstracts series. Contains abstracts ED 010 000 - ED 012 348.

Resources In Education. Washington, D.C.: GPO, v.10, 1975-.

The primary abstract/index to the ERIC microfiche collection. Issued monthly. Index sections cumulated semi-annually and annually until 1975 when the annual cumulations were discontinued. Monthly issues since January 1979 are also available on microfiche.

Contents: document abstracts, subject index, author index, institution index, clearinghouse number/ED number cross reference index.

V.1, 1966-v.9, 1974 used the title Research In Education. V.1 starts with ED 010 000.

An authority list of the subject terms (descriptors) used in various ERIC indexes, notably Resources In Education and Current Index to Journals in Education.

Part 1 -- an alphabetical listing of descriptors with cross references to broader terms (BT), related terms (RT), and narrower terms (NT). Part 2 -- "Rotated Descriptor Display," a list of all descriptors with each element of each term entered separately in alphabetical order. Part 3 -- "Two-Way Hierarchical Term Display," a list revealing the relationship of each descriptor to broader and narrower concepts. Part 4 -- "Descriptor Group Display," terms arranged under 41 general categories.

A number of descriptors have been changed and/or deleted in the most recent (1980) edition of the thesaurus, which lists the discontinued descriptors with cut-off dates to allow searching of the printed indexes prior to August 1980; previous editions of the thesaurus continue to be useful—though not necessary—in manual searching before August 1980. However, computer tapes have been revised to conform to the new thesaurus and computer searchers should use the replacement terms indicated. Terms noted as "invalid descriptors" have simply been discontinued and should be used for retrospective searches both by computer and in the printed indexes.

Provides title access to the ERIC collection. Each entry includes title, number of pages, date, and ED Number. This is an essential volume, since the standard ERIC indexes do not have title sections. Fully cumulated annually, with quarterly supplements.
Guides to ERIC

Current, available materials are listed with evaluative reviews. Formats include computer programs, sound filmstrips, a sound microfiche, slide/tapes, overhead transparencies, videocassettes, and videotapes.

This 20-page pamphlet explains the organization and functions of the ERIC system, describes the ERIC reference tools and how to use them, and outlines procedures for searching the printed indexes. Addresses of the various components of this decentralized system are included. Available from the ERIC Processing and Reference Facility, or for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

This discussion of the basic principles of computer searching is designed for use by the searcher rather than the information user. Topics covered include indexing, Boolean and arithmetic operators, weighted searching, and descriptor and identifier postings.

Traces the development of ERIC from its beginning to 1974 and describes the functions of the various system components. With the exception of some details, e.g., names of contractors and print technology, the description is still basically accurate.

Definitions are oriented for the user who is unfamiliar with the specialized terminology of the ERIC system and computerized information retrieval.

Designed for use by searchers with some experience who wish to improve their skills.

Both of these guides may be requested from the ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 303, Bethesda, MD 20014.

Describes three levels of ERIC collections--minimal, intermediate, and complete--and provides estimates for the expense involved in maintaining each level, as well as information for ordering or subscribing to the various collection components. Available from the ERIC Processing and Reference Facility.

ERIC Newsletters and Other Informational Literature

Most of the ERIC clearinghouses issue newsletters and other miscellaneous publications. These provide current information about ERIC and about the subject specialty of the particular clearinghouse. They also spotlight important upcoming ERIC documents in their respective fields. Persons desiring to receive newsletters and other informational literature should address inquiries to the clearinghouses which relate to their needs. A complete list of clearinghouses with their addresses appears in each monthly issue of Resources in Education.

ERIC Periodicals

Designed to serve as a conversational link between EDRS and ERIC Standing Order Customers, this quarterly newsletter reports happenings at EDRS, including the introduction of new microfiche products, and shares feedback received from subscribers to the microfiche collection.

ERIC Processing and Reference Facility. ERIC Database Users Interchange. Bethesda, MD: ERIC Processing and Reference Facility, November 1972-.

This news bulletin covering current activities of the ERIC system as a whole includes announcements of new products and services, studies of the system, and availability of older materials which have been reprinted.

Published irregularly by the Facility, it is distributed free of charge. To have your name put on the mailing list, write to the Editor, Interchange, ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 303, Bethesda, Maryland 20014.
ERIC Search Aids on Microfiche

A concise cumulative index of descriptors--subject terms which characterize substantive content--and identifiers, i.e., additional identifying terms. ED and EJ numbers are listed for each document or article to which these terms have been assigned during this time span, and whether the term was used as a major descriptor or identifier is indicated.

These two collections contain the Information Analysis Products (IAPs) produced by the 16 ERIC clearinghouses in the years designated. Such publications usually take the form of research reviews, bibliographies, state of the art studies, or interpretive studies on topics of current interest. A paper copy of the appropriate bibliography of IAPs serves as an index to these mini-collections, which are taken from the complete ERIC microfiche collection and may be available in libraries which do not have the ERIC microfiche.

Containing the same information as the paper version of Resources in Education, this microfiche edition is included in the ERIC microfiche collection and shipped to Standing Order Customers each month with the microfiche of documents announced in that issue.

This alphabetical listing includes all authors listed in RIE author indexes from the beginning (1966) through 1978. Each entry provides the document title, availability level, ED number, number of pages, and number of microfiche.

This alphabetical listing of all titles cumulative from the beginning of ERIC in 1966 through 1978 indicates author, availability level, ED number, number of document pages, and number of microfiche for each.

THE ERIC CLEARINGHOUSES

Adult, Career, and Vocational Education/CE
National Center for Research in Vocational Education
The Ohio State University
1960 Kenny Road
Columbus, Ohio 43210
Telephone: (614) 486-3655

Educational, psychological, social, and general development of urban children; special needs of ethnic groups and disadvantaged in urban areas.
Complete information for ordering ERIC documents is provided on the sample order blank from EDRS in every issue of RIE. However, prices listed before August 1979 are obsolete; at that time, price codes were instituted which designate the prices of all documents based on the number of pages or microfiche. Postage and estimated UPS charges are also provided. The table of price codes is also available online through Lockheed DIALOG.

Or write ERIC Document Reproduction Service (EDRS), P.O. Box 190, Arlington, VA 22210, and request an order blank and price information.

For faster service, orders may be placed by computer through Lockheed DIALOG or SDC/ORBIS. Ask your librarian if this service is available in your area.
