Two technical writing courses at a two-year agricultural college were designed to meet the individualized needs of students in various agricultural studies in the animal industries, horticulture, agricultural business, and agricultural mechanics. Offering a technical writing program based upon the writing tasks of the students' intended occupations required consultation with advisory committees of the various agricultural programs. These committees, composed of eight to fifteen people in actual industry positions and farm operations, provided over 200 responses and comments on what they considered necessary in the English courses at an agricultural college. This feedback resulted in the revision of the existing technical writing course and the creation of a second writing course with additional emphasis on business letter writing. Students in these technical writing courses write business letters specific to their field of agricultural study (at times with suggestions from their agricultural studies advisors), prepare seven types of research reports, and develop specific communication skills for meetings, telephone calls, newsletters and brochures, advertising and news articles, interviews, and communication among workers. (Appendixes provide course outlines, course syllabi, and samples of assignments.) (RL)
TECHNICAL WRITING PRACTICALLY UNIFIED THROUGH INDUSTRY

by

LINDA S. HOUSTON

Agricultural Technical Institute
The Ohio State University
Wooster, Ohio

Presented at the Thirty-second Annual Convention,
Conference on College Composition and Communication
March 26-28, 1981
Dallas, Texas
In order to understand how our technical writing program is set up, I feel you need to have some general background concerning the Agricultural Technical Institute (ATI) which is located in Wooster, Ohio. The Institute is a two-year agricultural college, an administrative unit of The Ohio State University's College of Agriculture. ATI opened in 1972 with a beginning class of 198 and is now in its ninth year with an enrollment of about 760. We offer an Associate of Applied Science degree in seventeen technologies, ranging from a traditional dairy science program to a less traditional beekeeping program.

Our student body is diverse, with students from large urban areas and small rural areas; most are from Ohio, though some are from other states and even other countries. Most of the student body is 18-20 years of age and unmarried; of the 766 students, 509 are male and 257 are female. About 33% of the incoming class is placed in a developmental communication skills program and about 50% is placed in a developmental math program. Less than ten percent of our students transfer to baccalaureate-granting institutions.

ATI has four academic divisions under which the seventeen technologies fall, and one academic division, General Studies, under which support courses fall. Below is the breakdown:

Animal Industries Technologies

- Dairy
- Horse
- Livestock--Beef and Swine/Sheep
Technical Writing courses are taught in the Communication Skills area, an arm of the General Studies Division. How we unified these technical writing courses with industry is the topic of today's presentation.

The objectives of the Institute, as set forth in our bulletin, include that of offering a college-level program in selected agricultural technologies so that our graduates possess occupational competence in their technologies. This goal of occupational competence posed a challenge to those of us teaching technical writing. Traditional courses of instruction in technical writing have not been directed to agriculturally based two year colleges. If we were to help fulfill the objectives of the Institute, we had to offer a technical writing program demonstrably based upon the writing tasks of the students' occupations.
Our original technical writing course had already been in existence since the school opened but it became clear that it was not fulfilling the individual needs of the students in the technologies or the needs of the students in the industries once they graduated. Each technology at ATI has an advisory committee composed of eight to fifteen people in actual industry positions including farm operations. The members, according to ATI requirements, are persons who are recognized by their industry as prominent and successful with a thorough understanding of their total industry needs, challenges and trends. An important point of the committee's formation is utilization of the advice and counsel of such a committee once its members have been brought together. The advisory committees meet separately at least annually to review their programs and make recommendations to the technology coordinators in order to strengthen the program they represent. Courses are added, revised and deleted quite often as a result of industry input. I felt the best place to start in our attempt to unite with industry was to go directly to industry. I got in touch with each member of each advisory committee. Letters went out requesting examples of actual writing they required of their employees, if they were managers, or were required of themselves, whether managers or employees. Many of our advisory committee members run farm operations as well as private businesses, some work in government Extension Offices, or in Soil Conservation District Offices, still others do research or run beekeeping operations, while yet others work in fertilizer or grain and feed operations. Our letters, therefore, went out to over 200 people in all major industry areas of agriculture requesting their comments on what they saw as the need for our English courses to incorporate.
I read and scrutinized all the responses they sent. The result was the revision of one course and the creation of a second writing course. Students have a choice; they may take T113 (Appendix A), our new technical writing course, or T114 (Appendix B), our new technical writing course.

I would like to present the two courses you can further see how we unified industries' ideas with our technical writing courses. The syllabus of each course is misleading, for one looks like any technical writing course and the other, like any business communications course. I'd like to begin by describing Technical Writing T113 (Appendix A).

Business letters seemed to be the one constant in every advisory committee members' response, in fact, writing letters seemed to be the major type of writing needed in every area represented. The students, however, must write letters specific to their technology, so that a student in the crops curriculum must deal with letters of sales, complaint, inquiry, and so on, as they pertain to crop production. The students are asked to go to their technology coordinator for actual situations if they need suggestions. The time spent on letter writing is comparatively short in this course for although all industries indicated the need for business communications, some stressed other areas as well. The students who will now take this course are in curriculums where advisory people indicated need for some research and many types of reports. The syllabus indicates seven types of reports—the process report, the proposal, the progress report, the research paper, the technical definition, the summary, and the abstract. All these areas are covered in all sections of T113 but all students are not required to do all reports. A student in the Research curriculum, for instance, might be required to write a research paper and a progress report, for those are two types of reports commonly needed in that industry. Students in the
animal curriculums might be required to write a process report, a progress report and/or a proposal as those three are needed in their fields. For example, a process report would be used for explaining how an animal is to be vaccinated or how artificial insemination is to be done, a progress report would be used to keep records on a particular animal or project on the farm, and a proposal might well be used to apply for a loan from a bank if an individual is expanding his or her farm operation. The major difficulty involved in this "unification" with industry occurs when our technical writing sections are multi-curriculum classes. This is indeed a more difficult but not impossible task for the instructor. The instructor must deal with students on an individual and small group basis. Appendix C indicates a syllabus used in one of my T113 Technical Writing courses. Hopefully it will give you an understanding of the flexibility needed in such a course.

Our second course, T114 Business Communications (Appendix B), is a direct off-shoot of the advisory committee study. The needs of many of our students would still not be met with our initial course, even as revised. Business communication, an occupational communications course, is set up as a less traditional technical writing course. There is a much greater emphasis on letter writing in this course. Students in the Soil and Water program, for example, if employed by a Soil and Water Conservation District will spend a good deal of time corresponding. The section includes, as you can see, a far more detailed list of types of correspondence-informal as well as formal. I have included a copy of one letter writing assignment for Agricultural Business student: (Appendix D).
Several advisory committees indicated the need for filling out forms, as evidenced by the material received from the Ohio Grain, Feed and Fertilizer Association, Inc., to name just one. Forms suggested included order blanks and work schedules. Again, as the quarter begins, an instructor has to see what curriculums are represented and then organize for individualized instruction, working with the technical coordinators and collecting materials from industry. The section dealing with meetings arose from the call by some advisory committee members for the need to organize and take part in such organizations as Farm Bureau. Included in this area might be written announcements for meetings.

Still other responses, those from the horse curriculum, floriculture, turf and wood products just to name a few, called for brochure and newsletter publications as well as media ads and news articles. (A syllabus for T114, Winter 1981, is presented in Appendix E).

Most responses stressed the need for communications in general. One gentleman, a farmer, called to express his hope that writing, that speaking, that dealing with employers and employees be a major part of the English program. He was calling, he said, because he had few communication skills, didn't feel qualified enough to write me a letter and had, indeed, been hampered by the lack of such skills. Such testimony, I might add, is invaluable in motivating students.

The final topic covered in the course is the report. Many advisory committees mentioned the need for progress reports and proposals, though not major research papers, process reports or summaries and abstracts. Horse students, turf students, soil and water curriculum students, to name a few, according to advisory committee responses, indicated the need for progress reports for animal progress or project progress; proposals were indicated as well for drainage construction on golf courses and farm land.
or for enlarging existing facilities. One report of this nature, then, is incorporated in this course. The two types are discussed and the students, depending on their technology, chose one. Therefore, in a class of 25, there may be two types of reports being written at the same time.

William F. Funderbunk, in a paper delivered at the Conference on Technical Writing, 1978 at Southern Illinois University, in Carbondale, said, "Educators can better prepare their students for jobs in industry if they actually seek the advice and counsel of people from industry. Working together, they can study the needs of industry and plan courses and programs that help to meet these needs."

Our two courses are not perfectly divided. Some students who will take T113 will miss out on some material they might need that is covered in T114, and vice versa. But certainly since I undertook the study, I feel ATI has moved forward, as Mr. Funderbunk suggested. With the revision of our original course and the introduction of a new one, we at ATI are better meeting the needs of our students for their future employment in their industries.
APPENDIX A
COURSE DESCRIPTION
COMMUNICATIONS SKILLS T113

I. COURSE ORGANIZATION

A. Title: Technical Reporting
B. Credit: 3 hours
C. Periods Per Week: 3 cl
D. Prerequisites: Old T101, New T101 and T102 or T111
   Not open to students with T103 credit

II. COURSE DESCRIPTION

Training and practical writing for industry, business, and research with
emphasis on special requirements and techniques for the technical report.

III. COURSE OBJECTIVES

The student should be able to:

1. demonstrate in writing a working knowledge of the English language;
2. demonstrate the ability to write tactful, effective business letters in conventional formats;
3. graphically represent the information contained in technical reports and papers;
4. demonstrate a knowledge of how to find information in the library, how to pre-write reports, how to evaluate information, and how to present information in conventional report formats.

IV. COURSE CONTENT

A. Reporting Information
   1. Importance of communication
   2. Definition and role of technical writing
   3. Audience analysis

B. Effective Business Communication
   1. Types of Business Communication
      a. Letters
      b. Reports
   2. Business Letters
      a. Inquiry
      b. Claim, Adjustment
      c. Sales
      d. Order
C. Gathering Information
   1. Sources
      a. Library
      b. Meetings, interviews, etc.
   2. Notetaking
   3. Evaluating and organizing information
      a. Logical analysis
      b. Outlining

D. Presenting Technical Information
   1. Types of reports
      a. Process report
      b. Proposal report
      c. Progress report
      d. Research paper
      e. Definitions/Summaries/Abstracts
   2. Techniques of Exposition
      a. Mechanical elements
      b. Stylistic elements
   3. Illustrating Technical Reports
      a. Usefulness of visual aids
      b. Occasion for use
      c. Types of visual aids
         1. Charts
         2. Diagrams
         3. Tables

V. SUGGESTED TEXT

VII. EVALUATION PROCEDURES

Writing Assignments including letters and formal and informal reports = 80%
Exams = 20%
APPENDIX B
COMMUNICATION SKILLS TECHNOLOGY T114
COURSE DESCRIPTION

I. COURSE ORGANIZATION

A. Title: Business Communication
B. Credits: 3 hours
C. Distribution of class time: 3 cl
D. Prerequisite: T111 or T101 and T102

II. COURSE DESCRIPTION

Training and practical skills for business writing with an emphasis on specific requirements and techniques for all occupational communications.

III. COURSE OBJECTIVES

The student should be able to:

1. demonstrate in writing and speaking a working knowledge of the English language;
2. demonstrate an ability to research, evaluate, organize and present material for various types of written and oral communications (aside from letters) needed in an occupational setting;
3. effectively write various types of personal and business letters using standard English and conventional formats;
4. prepare visual materials found in occupational communications.

IV. COURSE CONTENT

A. Importance of Occupational Communications

B. Effective Occupational Communications for Public Relations
   1. Usage
   2. Appearance
   3. Accuracy
   4. Efficiency
   5. Clarity
   6. Tone

C. Business Letter Writing
   1. Formats
      a. Parts of a letter
      b. Layouts
      c. Envelopes
2. Types of Business Letters
   a. Inquiries/Requests
   b. Informational
      (1) explanations
      (2) instructions
   c. Sales Letters
   d. Credit letters
   e. Collection letters
   f. Goodwill letters
   g. Personal letters
   h. Form letters
   i. Order letters
   j. Remittance letters
3. Informal Messages
   a. Memos
   b. Forms
   c. Applications

D. Interpersonal Occupational Communications
1. Meetings
   a. Organizing/calling
   b. Minutes
2. Newsletters
3. Brochures
4. Media ads - news articles
5. Telephone Use
6. Evaluative Reports
   a. Employee
   b. Employer
7. Interviews
8. Communication among workers
   a. Upward (supervisors)
   b. Downward (subordinates)
   c. Horizontal

E. Visuals for Occupational Communications

F. Informational Reports
1. Progress Report
2. Proposal

Written Assignments and Classwork = 70%
Exams = 30%
COMMUNICATION SKILLS T113
SYLLABUS

Summer, 1980
Linda Houston
Home Phone: 264-9918
Office: 144B
Office Hours: MWF, 9-10, 12-1
Class Meeting: MWF, 11 a.m., Room 212

Course Description:

This course is designed to help you achieve more confidence in extracting, evaluating, and synthesizing information; you will need to have a working knowledge of materials in the library (ATI, OARDC, OSU interlibrary loan facilities, Wayne County Public Library, The College of Wooster, etc.). The course is a course in the processes of writing specific types of papers, many of which you may be called upon to complete for other courses at ATI as well as in the years to come; the emphasis will be upon clear, concise, accurate, conventional, appropriate materials on a worthwhile subject of interest or technical field as specified in the assignment. Technical writing is written communication using specific vocabulary (language) for a specific audience on a particular occasion.

Course Objectives:

To successfully complete the course a student should be able to do the following: 1) show through his work an acceptable knowledge of the English language; 2) demonstrate the ability to write specific types of letters using conventional style and form; 3) demonstrate an ability to prepare, research, and write technical reports in a logical, well-thought-out manner; and 4) show the ability to use and interpret graphic elements in technical reports.

Dictionary (paperback will do)

Materials: Folder(s) for papers
8¼ x 11" non-spiralled paper

Notes:

1. You are expected to prepare and present your own materials and to acknowledge your indebtedness to others. Plagiarists (cheaters) face an F grade in the course—possible dismissal from the University, and/or a note on the permanent record.

2. As a general rule, exams may not be made up. Arrange to complete work before absence. In any event, see the instructor before the next class period.

3. You do not need to type your papers. However, legibility and neatness are essential for a passing grade. Please use pen for all major assignments.
4. Attendance is expected. Field trips are excusable, but you are responsible for all work covered in and out of class. A paper will receive a 5 point penalty for each day late; it may not be turned in later than 5 days after its due date.

5. Exams will be based on textbook readings and lecture notes; lectures may cover extra material than what is found in the text; text material will not always be covered in the lecture; thus, you are required to read the textbook.

6. A report may be written simultaneously for this course and for another course, but previously done work is not acceptable.

7. This course (T113, Summer, 1980) has been set up in conjunction with Dr. Borton's Animal Tech 225, Livestock Disease Prevention. If you are not taking that course, another report may be substituted for the research paper.

8. All papers will be collected on the last day of the quarter.

9. This course is set up for lectures and work sessions. There will be many work days for individualized help. I will announce those ahead of time. The important point is to keep the lines of communication open. Ask questions, come to my office, see me in class—but don't assume—check it out!

Final Paper Due
APPENDIX D

COM SKILL T294/T114
Letter Writing Assignment
Due February 7

Your assignment is to write four business letters and one inter-office memo. You need to choose four of the six assignments given below. Number 7, the memo, must be completed for a total of five different pieces of correspondence. You may substitute any situation you wish for any of the given examples. The substituted situation must be in your area of agricultural study. Be sure you follow directions carefully and use your text as a major guideline/source.

1. These are not rough drafts. The layout of the letters is expected to be complete; these letters could be mailed. You need to provide a return or inside address for the letters, and in all respects - type of stationery, margins, arrangement of parts, legibility, and the like - the letters are to be worthy of being mailed.

2. Your performance should reflect a clear understanding of the principles and practices in our text. In grading, I will deduct for errors in mechanics and grammar; I will expect conventional letter layouts; and I will examine with great interest the tone of your letters. As I will use grading check lists derived from the appropriate sections in the text, it is unlikely that you will do well if you do not scrutinize the text.

3. On your cover sheet, you should list your name, the course name, the hour, and the number exercise you have chosen. Also, please list the type of form you used for each letter.

   Example: Letter 1    Semi block
               Letter 2    Full block

   You may use all one form, but you need to identify it. Be consistent within each letter.

   These are NOT rough drafts. The letters and envelopes should be typed. The memo should be typed but needs no envelope.

4. Plan sheets are attached for each type of letter you are required to do. Complete the plan sheet before writing your letter. It is a good outline, thus basis, for your letter. Keep in mind your text stresses planning the main points of the letter before you begin. These plan sheets help.

   (I have not attached plan sheets for this paper. The sheets are on the order of those found in Technical English, 3rd edition by Pickett & Laster.)

Numbers in parenthesis indicate pages in the text that correspond to the assignment.
You have seen the following ad in Grain Industries Plants and have decided to order feed from this particular dealer. You must make sure and include all the essentials suggested in your text.

2. Transmittal Letter (pp. 267-270)

You received the above letter (number 1) and are filling the order. Write a transmittal letter to the individual. The letter will precede the order, as the order is in bulk.
...BUT

NOBODY EVER

ASKED ME...

Surprisingly, that's one of the most frequent reasons businessmen give for not belonging to their trade or professional association. Maybe it's because there aren't enough people doing the asking.

In any organization, growth is best accomplished through its own members. Sure, there's a place for membership drives and campaigns. But over the long pull, the most effective recruiting is done through quiet, steady work of dedicated members.

If you are now a member of Ohio Grain, Feed & Fertilizer Association, try a little of this friendly persuasion. You know who the best prospects are among your associates, suppliers, customers. Tell them a little about the program and invite them to join.

If you're not a member of Ohio Grain, Feed & Fertilizer Association, you're missing the tremendous benefit of profitable sharing. Don't miss it any longer.

Consider yourself asked!!!

Just fill in the application blank on page 273 or call or write the Association office for complete details.

OHIO GRAIN, FEED & FERTILIZER ASSOCIATION, INC.
98 Years of Service to the Industry
Organized 1880
6377 N. High St., Box 151, Worthington, Ohio 43085
Telephone 614-885-4429

You see this notice or ad in the Ohio Grain Feed & Fertilizer Association Directory.

You do not wish to join as yet, but wish to find out more about the organization. Write a letter of inquiry to the address given requesting materials. Keep in mind that you want to know what benefits you would derive from being a member.
Flavomycin™

Increases weight gains
& improves feed efficiency
in hogs & broilers

Reserved solely for use in animal nutrition, it has a unique chemical structure that differs from any other antibiotic in use today. It’s so safe you can feed it right up to the day of slaughter with no withdrawal restrictions.

Call or write for complete details, extensive commercial trial data, and economic profiles that show the advantages of including Flavomycin in your feeding program.

Flavomycin is the registered trademark of Hoechst AG

You see the following ad in the trade paper Feed Stuffs. As a feed dealer in Wayne County, you do not carry Flavomycin. You are interested in finding out more about this product so you can decide whether or not to carry it for distribution. Write the company a letter inquiring about the product.
4. Claim (pp. 273-276) (pp. 359-377). Do a or b.

a. You are the owner of a grain elevator. Suppose that in the past two months you have been having problems with a grain dryer you had had built less than a year ago. Your investment was substantial, obviously, and you are now disappointed with its results. The company that installed the dryer was Aeroglide Raleigh, N.C. 27611

Mr. Ralph Foster was the gentleman you had dealt with earlier. Write a letter to Mr. Foster explaining your problem. Be specific.

b. You are Mr. Foster. Respond to the above letter.

5. Credit Letter:

You work for Swift Agricultural Chemicals Corp., in East St. Louis, Ill. The address is 2501 N. King's Hwy. George Jeffrey has written requesting a large order of triple super phosphate. He has asked to charge the order. You have checked his credit rating and have decided that for this particular order, you cannot grant the credit. You need to make Mr. Jeffrey understand you welcome his business and will consider future credit orders.

6. Sales - Do a or b

a. You work for Agricultural Testing & Consulting Laboratories, 5011 Decatur Road, Fort Wayne, IN 46806. Some of the services available include soil testing, feed testing, fertilizer analysis, plant analysis, agricultural consulting, seed germination. Choose 1 of the above services and write to one of your clients, Mr. David Jones, a farmer and try and sell him the service.

b. You work as a sales representative for Vistron, a company that makes anhydrous ammonia which is used as a basic fertilizer material. Write to a client, Wooster Equity (who is presently purchasing the product from U.S. Steel). Try to convince them to switch to your company's product.

7. You must do this assignment.

Memo

You are manager for Goodman Grain & Supply Co. in Upper Sandusky, OH. There has been a change in policy concerning credit. Previously, 90 days, same as cash was accepted. Now all accounts unpaid at the end of 30 days from time of purchase will be financed at the rate of 1½% per month (18% annually).

You need to let those in the company working with this policy know that the change is to take place. Write such an interoffice memo.
APPENDIX E

T114 Business Communication Syllabus
Winter, 1981
Linda Houston
Home Phone: 264-9918
Office: 144B
Office Hours: M-W-F By appointment
T-R 9-12, 1-2:30
Class Meeting: M-W-F 12, room 075

Course Description:

This course is designed for training in practical skills for business writing with emphasis on specific requirements and techniques for all occupational communications including letters and memos, business meetings, advertising, employee-employer evaluative reports and informational reports.

Course Objectives:

The student should be able to:

1. demonstrate in writing and speaking a working knowledge of the English language;

2. demonstrate an ability to research, evaluate, organize and present material for various types of written and oral communications needed in an occupational setting;

3. effectively write various types of personal and business letters using standard English and conventional format;

4. prepare visual materials found in occupational communications.

Text: Principles and Techniques of Effective Business Communication, Krey and Retzler
Paperback Dictionary

Materials: Folder(s) for papers
Theme paper

Notes:

1. You are expected to prepare and present your own materials and to acknowledge your indebtedness to others. Plagiarists (cheaters) face an E grade in the course, possible dismissal from the University, and/or a note on the permanent record.

2. As a general rule, exams may not be made up. Arrange to complete work before absence. In any event, see the instructor before the next class period.
3. You do not need to type your papers. However, legibility and neatness are essential for a passing grade. Please use pen for all major assignments.

4. Attendance is expected. Field trips are excusable, but you are responsible for all work covered in and out of class. A paper will receive a 5 point penalty for each day late; it may not be turned in later than 5 days after its due date. If you know ahead of time an assignment will be late, see the instructor before the due date.

5. Exams will be based on textbook readings and lecture notes; lectures may cover extra material than what is found in the text; text material will not always be covered in the lecture; thus, you are required to read the textbook.

6. A report may be written simultaneously for this course and for another course, but previously done work is not acceptable.

7. All papers will be collected on the last day of the quarter.

8. This course is set up for lectures and work sessions. There will be many work days for individualized help. I will announce those ahead of time. The important point is to keep the lines of communication open. Ask questions, come to my office, see me in class—but don't assume—check it out!

Grading Scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90-100</td>
</tr>
<tr>
<td>B+</td>
<td>87-89</td>
</tr>
<tr>
<td>B</td>
<td>84-86</td>
</tr>
<tr>
<td>B-</td>
<td>80-83</td>
</tr>
<tr>
<td>C+</td>
<td>77-79</td>
</tr>
<tr>
<td>C</td>
<td>74-76</td>
</tr>
<tr>
<td>B</td>
<td>70-73</td>
</tr>
<tr>
<td>B-</td>
<td>67-69</td>
</tr>
<tr>
<td>C</td>
<td>60-66</td>
</tr>
<tr>
<td>C-</td>
<td>59-below</td>
</tr>
</tbody>
</table>
