ABSTRACT
The manual provides information on resources for the education of hospitalized/homebound children in Georgia. Sections touch on the following topics (sample subtopics in parentheses): definitions; eligibility criteria; due process (referral, exit criteria); program organization (delivery model, considerations for instructional settings, enrollment); instructional programs (curriculum, professional resources, related services); program evaluation (comprehensive services); and additional resources (national, state, and community organizations). Sample forms are appended. (CL)

Resource Manuals for Program for Exceptional Children

Resource manuals in this series include the following.

Volume I: Severe and Trainable Mentally Retarded
Volume II: Educable Mentally Retarded
Volume III: Behavior Disorders
Volume IV: Specific Learning Disabilities
Volume V: Visually Impaired
Volume VI: Hospital/Home Instruction
Volume VII: Speech and Language Impaired
Volume VIII: Physically and Multiply Handicapped/System
Volume IX: Occupational and Physical Therapists
Volume X: Hearing Impaired
Volume XI: Gifted
Volume XII: Deaf/Blind
Foreword

Georgia is committed to the belief that every exceptional child has a right to receive an education based on his or her individual needs.

The need for developing standards and guidelines for comprehensive programs for exceptional children in our schools has emerged from state and federal legislation. The three major laws affecting the education of exceptional children in Georgia follow.

Adequate Program for Education in Georgia Act (APEG)
Section 32-605a, Special Education

“All children and youth who are eligible for the general education program, preschool education, or who have special educational needs and three and four year old children who are either physically, mentally or emotionally handicapped or perceptually or linguistically deficient shall also be eligible for special education services. Children, ages 0-5 years, whose handicap is so severe as to necessitate early education intervention may be eligible for special education services.”

Effective date: July 1, 1977

P.L. 94-142, Education for All Handicapped Children Act of 1975

The full-services goal in Georgia for implementation of P.L. 94-142 states:

“All handicapped children ages 5-18 will have available to them on or before September 1, 1978, a free appropriate education. Ages 3-4 and 19-21 will be provided services by September 1, 1980, and 0-2 by September 1, 1982, if funds are available.

Effective date: September 1, 1978

Section 504 of P.L. 93-112, The Vocational Rehabilitation Act of 1973

“No otherwise qualified handicapped individual shall solely by reason of his/her handicap be excluded from the participation in, be denied the benefits of, or be subject to discrimination under any program or activity receiving federal financial assistance.”

Effective date: June 1, 1977

The purpose of the Resource Manuals for Programs for Exceptional Children is to help local education agencies implement these laws and provide quality programs for exceptional children.
Acknowledgements

This resource manual is the result of the cooperative efforts of many individuals throughout Georgia who contributed valuable expertise and long hours of work. All assistance to the development of this manual is gratefully acknowledged.

Philosophy

Every student should have the opportunity to be educated to his or her full potential regardless of physical limitations. Hospital/homebound teachers are liaisons between the student and the school. They have the unique responsibility of coordinating and continuing the designed program of study for the hospital/homebound student. Our goal is to provide through the combined efforts of the hospital/homebound teacher, the classroom teacher, the school administration and the parent a continuous educational experience for ill or disabled students.

Chapter I
Definition
The child who has a medically diagnosed physical condition, which is noncommunicable and restricts him or her to his or her home or a hospital for a period of time which will significantly interfere with his or her education (a minimum of 10 school days), is eligible for the services of an itinerant hospital/homebound instructor (Georgia Program for Exceptional Children Regulations and Procedures).
Chapter II
Eligibility Criteria
• For a child to receive hospital or home instruction, a licensed physician must declare the child physically able to profit from education instruction. Children with other handicapping conditions also must meet the medical eligibility requirements.

• Students out of school because of a communicable disease, emotional problems, expulsion, suspension or uncomplicated cases of pregnancy are not eligible.

• The student must be enrolled in the school system.
Chapter III
Due Process
Referral

Each school system should have a standard referral procedure for requesting hospital/homebound services. The following information will help in developing a referral procedure.

1. Referrals for the hospital/homebound program are usually made by the principal, counselor, classroom teacher, school nurse, parent or attending physician.
2. The parent should be provided a hospital/homebound referral form by the appropriate school representative.
3. The parent should have the student's physician complete the medical information section of the form, including a description of the physical condition, any medical implications for instruction and the anticipated duration of absence.
4. The referral form should be returned to the appropriate school official and reviewed for approval.
5. When it is determined that the student meets the eligibility criteria an assignment may be made.
6. For a regular education student, the hospital/homebound teacher should contact the regular classroom teacher and obtain assignments weekly.
7. For a handicapped child receiving special education services, an addendum to the existing Individual Education Program (IEP) should be developed to reflect the hospital/homebound service. This addendum should be developed jointly by the child's special education teacher, the hospital/homebound teacher, the child's parents and IEP committee members as necessary.
8. If hospital/home instruction should be necessary beyond the date indicated on the original referral form, the physician should send a letter requesting extension of service.
9. To reenter the hospital/homebound program after withdrawal for any reason, reapplication must be made by the original procedure.

Exit Criteria

It is important that hospital/homebound services be terminated as soon as they are no longer needed and the student returned to the school-based program. Reasons for dismissal may include the following.

1. The physician recommends that the student return to school.
2. The student is unable to continue in the program because of a relapse.
3. The student's absence extends beyond the estimated length of service stated by the physician. At this point the parent will be required to obtain an updated form from the physician.
4. The student graduates.
5. The student withdraws from the school system.

Additional Information

For further information on due process or other procedural safeguards in effect in Georgia, refer to Program for Exceptional Children Regulations and Procedures, Georgia Department of Education, and Georgia's State Program Plan for P.L. 94-142. Copies of these documents are available in the office of the local school superintendent, director of special education or local Georgia Learning Resource System (GLRS) Center.

Additionally, information on local system procedures is contained in the local system's Special Education Comprehensive Plan available from local school superintendents or special education directors.
Chapter IV
Program Organization
Delivery Model

The nature of the hospital/homebound program necessitates the delivery of educational services to the home or hospital. Children hospitalized for medical reasons either receive instruction through bedside teaching or are allowed to participate in a classroom setting within the medical facility.

Considerations for Instructional Settings

The students who receive hospital/homebound instruction are entitled to the most challenging education they are capable of receiving. Exposure to academic experiences includes a flexible program of educational enrichment opportunities for advancement, remediation, and evaluation. Maintaining grade-level performance is a notable goal. The specific consideration for instructional setting is relative to the provisions available in the hospital or home.

Often the hospital setting is a competitive base for multiple services which may or may not enhance the student's ability to attend to the educational program. This competitive factor is a hindrance to the student's functional level in school activities. The relationship between the physician, hospital personnel, and the teacher is of great importance. A workable solution in scheduling teaching periods is a necessity. The student's work becomes a secondary objective while the efficiency of the hospital routine remains the primary purpose of the services provided.

The home environment offers a more stable schedule of instruction. Educational services may initiate new patterns of study, interest, and creative involvement in schoolwork.

The advantages and disadvantages of the home setting create a need for specific guidelines for the study program. The teacher may find it necessary to ask the parents to cooperate in creating opportunities to meet educational goals. The teacher's frequent communication and association with parents increases maximum benefits from homebound instruction. The following should be taken into consideration:

- A specific place should be provided in the home where the teacher and student can work in a well-lighted, comfortable area away from family activities, noise, and interruptions.
- The parents should plan with the student for a regular time for daily study and encourage him or her to complete all work in advance.
- Other persons should be kept out of the room during the instructional period.
- Another adult must be present in the home during the instructional period.

Enrollment

Teachers should maintain an average case load of eight. A minimum of 20 children should be seen per year (Georgia Regulations and Procedures, page 32).

Personnel

The principal is essential to the effectiveness of the hospital/homebound program. Responsibilities of the principal should include the following:

- Orient the school faculty and staff to the purpose and procedures of the program.
- Inform parents of the hospital/homebound program.
- Aid in the referral process.
- Make provisions for the hospital/homebound teacher to consult with the student's classroom teacher or teachers for planning and evaluation.

The help and cooperation of the regular classroom teacher can assist in assuring continuity to the student's program while receiving hospital/homebound services if he or she

- promptly reports to the principal children who qualify for hospital/homebound services.
- meets with the hospital/homebound teacher to discuss the specific course requirements and assignments.
assists the hospital/homebound teacher in areas of specialized instruction.
- assists in evaluating the work and progress of the homebound child.
- helps the student maintain communication with his or her classmates.

The hospital/homebound teacher serves students with differing educational backgrounds and various disabilities. In providing a program for these students, the hospital/homebound teacher
- works with the school and parents in planning the program.
- provides a supportive instructional program for the student.
- evaluates the student’s educational status, progress and achievements.
- sets up communication with school officials to make reentry as smooth as possible.

The cooperation of parents is a vital factor in the success of the hospital/homebound program. Responsibilities of parents or guardians are
- submit the referral form to the student's physician and return the completed form to the school.
- provide an appropriate area in the home for the student and teacher during instruction.
- have the student ready to begin instruction when the teacher arrives.
- plan with the student regular times for daily study.
- notify the hospital/homebound teacher in advance if the student is unable to receive instruction.

The hospital/homebound student will have a great effect on the success of the program. To receive maximum benefit from the program, the student should
- plan several times during the day when work can be done without interruptions.
- complete assignments.
- be prepared when the instructor arrives.
- study in a well-lighted place.
- be attentive and cooperative during the instruction period.

In-service

Hospital/homebound teachers require appropriate in-service training. In-service for instructional personnel should be based upon identified academic and medical needs of students assigned to the program. Hospital/homebound teachers should participate in regularly scheduled in-service provided by the local education agency (LEA). In-service may also be provided by Cooperative Educational Service Agencies (CESAs), Georgia Learning Resource System (GLRS) centers, and the state educational agencies (SEA).

Planned regional workshops for hospital/homebound teachers are scheduled on an annual basis by SEA personnel. In-service needs are determined by the LEA.

Topics for in-service might include the following.
- Teacher made materials for special needs
- Adaptive materials and equipment
- Sharing and brainstorming
- Related services
- Community resources
- Counseling
- Other topics specific to system or individual needs
Special Considerations

Scheduling

Much consideration must be given to the development of the hospital/homebound teacher’s schedule. Because of constantly changing case loads a homebound teacher’s schedule must be flexible. In addition, time must be provided for traveling to and from students’ homes and the schools. For this reason the hospital/homebound teacher should maximize the use of time that is spent with regular classroom teachers and securing the most appropriate materials for each student. Time must also be set aside for conferencing with the student’s regular teachers and support personnel. Current regulations and procedures require that hospital/homebound students receive a minimum of three hours a week of home instruction. This time is a minimum and in the majority of cases additional instruction time would be desirable. Hospital/homebound teachers should avoid scheduling instructional sessions when students are heavily medicated. To make most effective use of time set aside for instruction, the homebound teacher might call ahead to be sure that the student is ready for the instructional period and able to work.

Weekly schedules for hospital/homebound personnel should be provided to a central office administrator or supervisor so that necessary communication can be directed to the hospital/homebound teacher. Written schedules are extremely important because situations may arise which require immediate communication with the teacher.

Record Keeping

Hospital/homebound teachers are required to maintain schedules, lesson plans, attendance, IEP records (refer to Chapter III for IEP requirements), mileage reimbursement forms and reporting forms. This record keeping is vital to the overall operation of a system’s hospital/homebound program. Records and reports must be accurate. Hospital/homebound referral forms must be completed and copies generated to appropriate personnel within the school district. Accurate record keeping will enhance the organization of the hospital/homebound program; therefore, time must be included in the teacher’s schedule for this purpose.

Academic Credit

Regular instructional personnel and parents should be told that full credit is given for work completed during hospital/home instruction. The hospital/home instructor works closely with the child’s regular classroom teacher to provide continuity to the educational program planned for the child with lesson plans, assignments and tests used in the classroom. Some deviations may be required for the following reasons. Physical limitations may increase the time needed to complete assignments and may require that part or all of the work be done orally with the hospital/home instructor. Classwork may be of a nature that cannot be duplicated and other of equal value should be substituted, such as research for group projects or field trips and textbook and reference work for class lectures. Substitutions may require testing different from that done in the classroom.

On occasion, remedial work may be more beneficial to the child than regular classroom work. If remedial work is substituted, it should be understood and approved by the parents, principal and classroom teacher.

Attendance Credit

Each student with whom the hospital/homebound instructor works is enrolled on the regular classroom teacher’s roll. The student is counted present each day if seen a minimum of three hours per week. The average daily attendance is counted in with the regular classroom teacher’s total just as other students on the roll. The student’s absence from the classroom is legitimate and should be understood and accepted by the school. Children who have never been enrolled in a public school must be enrolled if the system is to serve the student and receive attendance credit. These children should be enrolled in the school they would normally attend.

Report Cards

Report cards should be issued to students receiving hospital/homebound instruction at the same time they are issued in the regular classroom. The classroom teacher prepares and issues the report card. Grades are based upon the performance of students as indicated by their work and tests. Grades are determined by the classroom teacher and the hospital/homebound instructor in conference. Grades are posted on permanent records by the classroom teacher.
Confidentiality

Insuring that confidential information remains confidential involves careful recordkeeping and sharing of information in a professional manner. The teacher should not repeat confidential information about the children or their parents either to other parents or to staff members who are not working with the children. This is an invasion of privacy to which the children and their parents have a right. If there is a need to share confidential information with another staff member to help him or her work better with the child, have the discussion in a private place and limit it to necessary information.
Chapter V
Instructional Program
Curriculum

The primary objective of hospital/home instruction is to enable students with medically diagnosed conditions to continue a planned educational program during the time when regular school attendance is not possible. The educational program provided to the hospital/homebound student should be as close as possible to that provided the regular student. This ensures the homebound or hospitalized student will return to school with limited disruption to his or her educational program.

The teacher must maintain a close working relationship with the student's regular teacher(s) to ensure coordination and appropriateness of the student's educational program. In the development of each student's program, the physical and medical condition of the student will be important considerations. Provisions must be made to accommodate each student's capabilities during confinement.

Professional Resources

- General Information
  

- Working with the Terminally Ill

- Books for Children

Methodology

In many instances no special teaching methods are required in instructing hospital/homebound students. However, some conditions complicate the learning problems to such an extent that special procedures are necessary. Students requiring special procedures may include the physically or mentally handicapped and those students exhibiting learning problems. For a student requiring special procedures the hospital/homebound teacher should work closely with the regular classroom teacher or special education teacher. To better under-
stand the needs and methods used in instructing a severely handicapped child, the hospital/homebound teacher should spend time observing the classroom program, reading appropriate information regarding programming for those students and allowing time to consult with the teacher.

For additional information on special procedures or methods for exceptional children, refer to the Resource Manuals for the Programs for Exceptional Children, volumes I through XI.

Materials/Equipment

The hospital/homebound student will use textbooks issued by the school system or classroom teacher. The school system or classroom teacher should keep the student supplied with the same books issued in the classroom program. Teacher manuals/source books should be provided to the hospital/homebound instructor to insure that the proper skills will be taught and maintained in the manner which the classroom teacher initiated.

Written lesson plans should be provided for the hospital/homebound instructor on a weekly basis or other schedule mutually agreeable to the hospital/homebound instructor and the classroom teacher. The school system also should provide any equipment needed by the hospital/homebound instructor to insure objectives planned by the classroom teacher are met.

Related Services

Related services may be required for children placed in the hospital/homebound program if they are identified as having specific problems. These children should be referred to the appropriate school personnel. School social workers or visiting teachers may be needed to facilitate the relationship between homebound instructional personnel and parents or community agencies. Homebound teachers may find that parents or guardians need help with problems and should refer them to the appropriate service agency.
Chapter VI
Program Evaluation
Program evaluation is useful for determining areas of strength and weakness. A comprehensive program evaluation provides helpful information for administrators, teachers, support personnel and parents.

Feedback from a variety of personnel, including administrators, teachers, therapists, parents, and other staff members, should be an integral part of the evaluation process. The team approach should provide relevant information concerning the effectiveness of general program goals, efficiency in providing comprehensive services and suggestions for improving the program.

The following program assessment checklist suggests areas to consider.

<table>

</tr>
</tbody>
</table>

Referral and Due Process

Referral procedures are outlined and in-service provided to all school system administrators and teachers.

Special education students receiving hospital/homebound services have an addendum to the existing IEP reflecting the hospital/homebound services.

Comprehensive Services

Comprehensive services are available for elementary, middle or high school.

Provisions are made for supervision of the program.

Resources and agencies outside the school system are used when appropriate.

Education Program

Record keeping procedures for hospital/homebound teachers are outlined and in-service provided.

Hospital/homebound teachers coordinate the program with the student's regular classroom teacher.

All students recommended for hospital/home instruction receive at least three hours of instruction per week.

Teachers maintain an average caseload of eight students and a minimum of 20 students are seen per year.
Space is provided in a central location for the hospital/homebound teacher to prepare individual lessons and to store materials not being used.

Appropriate materials and equipment are available to the hospital/homebound teacher.

**Personnel Evaluation**

The hospital/homebound teacher is evaluated by the requirements of the local school system in which the instructor is employed.

Appendix B
Georgia Learning Resources System
Services Provided by GLRS

1. GLRS maintains an instructional materials center where special educators can preview and borrow materials. The collection includes diagnostic materials, teacher training and professional materials and child use instructional materials. Materials are loaned on a short-term basis to provide educational intervention for particular children, to be used by teachers for trial or preview or to aid selection and purchase decisions.

2. GLRS provides in-service training through workshops and conferences on effective use of media and educational equipment, new teaching techniques and methods and innovative instructional materials. Every effort is made to provide workshops which directly relate to the identified needs or interests of each school system.

3. GLRS maintains a video-tape collection of outstanding special education workshops which have been conducted throughout Georgia. In addition, exemplary special classrooms can be videotaped. These tapes may be borrowed for workshops, in-service meetings or individual reviewing.

4. GLRS sponsors various special projects to introduce ideas and materials being used successfully with exceptional children across the nation. The Select-Ed Prescriptive Materials Retrieval System, Computer-based Resource Units (CBRU), Educational Research Information Center (ERIC), Materials Analysis and Retrieval System (MARS) and the Master-Teacher Model are some of the educational innovations which GLRS has introduced to Georgia educators.

5. GLRS acts as an information network. Information is disseminated to special educators about the various areas of exceptionality, about programs and services offered to exceptional children in Georgia and about meetings and conferences of interest to special educators.

6. GLRS provides information and referral for diagnostic services and educational planning for the severely handicapped child.

Centers for Severely Emotionally Disturbed
Centers for Severely Emotionally Disturbed
(Psychoeducational Center Network)

The SED centers are multidistrict programs designed to serve a low-incidence population. The projected population for SED is one half of one percent (.005%) of the population, ages zero through 16. There are currently 24 centers, each with satellite services, providing nonresidential, community-based services including diagnostic educational, psychological and psychiatric assessment, remedial services such as special education classes, individual and group therapy and parent services.

Each center is responsible for serving children, ages zero through 16, who are severely emotionally disturbed or behaviorally disordered. The major admission requirement will be the presence of an emotional or behavioral disorder severe enough to require a special child treatment program or a special education program not available in the public school or community. Children who are mild to moderate behavior problem or discipline problems are not eligible. These children are characterized by

1. severe emotional disturbance such as, but not limited to, childhood schizophrenia, autism, severe emotional deprivation and adjustment reactions,

2. severe behavioral disorders such as, but not limited to, neurological impairment, cultural deprivation and developmental,

3. severe school-related maladjustment such as, but not limited to, behavior, socialization communication and academic skills.

At all centers, referrals will be accepted from; but not limited to, early childhood programs, private day-care programs, community service centers, well baby clinics, kindergartens, public schools, parents and other child-serving agencies and physicians.

For additional information, contact the State Coordinator, Centers for Severely Emotionally Disturbed, Georgia Department of Education, State Office Building, Atlanta, Georgia 30334 or call (404) 656-6317.
Federal law prohibits discrimination on the basis of race, color or national origin (Title VI of the Civil Rights Act of 1964), sex (Title IX of the Education Amendments of 1972 and Title II of the Vocational Education Amendments of 1976); or handicap (Section 504 of the Rehabilitation Act of 1973) in educational programs or activities receiving federal financial assistance.

Employees, students and the general public are hereby notified that the Georgia Department of Education does not discriminate in any educational programs or activities or in employment policies.

The following individuals have been designated as the employees responsible for coordinating the department's effort to implement this nondiscriminatory policy:

Title II — Loydia Webber, Vocational Equity Coordinator
Title VI — Peyton Williams Jr., Associate Superintendent of State Schools and Special Services
Title IX — Evelyn Rowe and Myra Tolbert, Coordinators
Section 504 — Jane Lee, Special Education Coordinator

Inquiries concerning the application of Title II, Title VI, Title IX or Section 504 to the policies and practices of the department may be addressed to the persons listed above at the Georgia Department of Education, State Office Building, Atlanta 30334, to the Regional Office for Civil Rights, Atlanta 30323; or to the Director, Office for Civil Rights, Education Department, Washington, D.C. 20201.
