IDENTIFIERS

ABSTRACT Intended for instructors in occupational education programs, this catalog identifies instructional materials found to be successful for teaching specific occupational competencies identified in the Instructional Support System for Occupational Education (ISSOE) in the area of home economics education. Contents include 99 materials reporting forms for materials used in the various program areas of child care and food trades. Forms are arranged first by program area and then by ISSOE task numbers arranged sequentially. (A separate form is provided for each task for which the material is used.) Program areas/units include program activities, health and care of children, and nursery school management in the field of child care and counter person, dietary aide, and fry cook in the field of food trades. The materials reporting form provides this information: course, unit, and module titles; task title and number; school name and address, instructor, and phone number; ISSOE region; V-TECS number; type of instruction materials best suited for: instructional, grade, and ability levels; type of materials used; title of material, author, edition, copyright date, publisher, cost, and pages used; comments; and written teacher comments. (YLB)
Instructional Materials
This catalog of instructional materials was prepared by the Cornell Institute for Occupational Education, a component of the State Research Coordinating Unit, Division of Occupational Education Planning and Information, Research and Evaluation, with funds provided by the Division of Occupational Education Instruction under the terms of grant number 80-3A-1115GS, funded from the Vocational Education Amendments of 1976.

PRINCIPAL INVESTIGATOR

James Dunn
This catalog of instructional materials was gathered in a cooperative effort by members of the New York State Education Department, Division of Occupational and Continuing Education, Cornell Institute for Occupational Education and ISSOE Regional Coordinators. Thanks are extended to all individuals who assisted in this compilation of instructional materials found to be successful for teaching specific occupational competencies. Special thanks are due to Dr. Robert Frank, Institute Coordinator for ISSOE Projects, for his work in directing this project and assembling the catalogs.

Instructors in occupational education programs will find the catalog useful in identifying those materials which support effective teaching. Materials reporting forms are arranged throughout the catalog by program area, followed by ISSOE task numbers, arranged sequentially. It is hoped that these materials will be valuable to occupational teachers.
