Directory of Rural Development Researchers in the South

Southern Rural Development Center
SRDC Series Publication No. 43
November 1981
FOREWORD

This publication includes the names of nearly 200 persons involved with research related to the needs of rural development in the Southern region. Although this listing is not all-inclusive, it does provide information about the vast majority of rural development researchers in the South. Some may have been omitted by oversight while others may never have responded to our inquiries. Regardless of possible errors in omission, this publication focuses attention on a significant development of the last decade...the emergence of the rural development researcher as a part of the research program of Southern colleges and universities.

Since the landmark Agricultural Act of 1970 made rural development a major mission of the United States Department of Agriculture, the land-grant college system has taken the lead in research to improve the quality of life in the rural South. Most of the 200 researchers listed here are located at 28 land-grant institutions in 13 Southern states and Puerto Rico.

By providing a listing of names, addresses, and areas of research, the Southern Center hopes to help researchers pinpoint other professionals whose work might relate to their own. If this interaction enhances and encourages the work of one person, it might ultimately benefit the lives of many people who wait for tomorrow's answers to today's problems.
