This guide proposes a comprehensive, sequential development of a kindergarten through twelfth grade dance education curriculum. A discussion of the role of dance in education is presented in the first section. The second section addresses the major aspects of the teaching and learning modes, of planning for learning, and of concepts, skills, and knowledge basic to dance education. This section emphasizes and details the nonlinear integration of the cognitive, motor, and affective learning domains. Included in this section are models for learning units and a proposal for a retrieval system which makes quick access to dance resources, information, and activities possible. The third section outlines supportive roles and responsibilities of administrators and teachers for the development and implementation of dance education programs. Physical facilities for dance, scheduling, and time allocations are discussed. Recommendations concerning the knowledge and competencies necessary for dance education teachers are also addressed in this section. The guide concludes with a list of various resources for dance educators. (JD)

Photo Contributed by American Alliance for Health, Physical Education, Recreation and Dance
ACKNOWLEDGEMENTS

This publication is one of the first state K-12 dance curriculum guides developed in this nation. Its conceptualization and development was a pioneering effort by the writers. While the format of the guide is one advocated by the Wisconsin Department of Public Instruction, the philosophy and content had to be struggled with and shaped into a comprehensive dance education curriculum. This searching and struggling required considerable dedication and effort on the part of the writing committee members.

The writing of this guide began in 1977 and considerable advice and input was contributed by the following persons:

Virginia Bryant Weller, Dance Education Curriculum Committee Chairperson, Founder of Dance Program—Alverno College, Currently teacher of Special Education in Dance.

Judith Carlson, Elementary Physical Education Specialist Grades 1-8, Richards School, Whitefish Bay.

Susan Hughes Gingrasso, Assistant Professor of Theatre Arts Dance, University of Wisconsin-Stevens Point

Carol La Breck, Aesthetic Education and Director of Project Fiesta, a project for gifted and talented, University of Wisconsin, River Falls

Joan Mills Maas, Dance Specialist, James Madison Memorial High School, Madison.

Evelyn Nirschl, Teacher of Physical Education and Dance, Kaukauna High School, Kaukauna

Miriam Shastad, Modern Dance Teacher, formerly at the University of Arkansas, board member of the Milwaukee Modern Dance Council and a board member of the Wisconsin Dance Council

Photographs contributed by

American Alliance for Health, Physical Education, Recreation and Dance (cover photo and others)

Susan Gingrasso, Assistant, Professor Theatre Arts, U W Stevens Point

This writing project was chaired by Virginia Weller who with wisdom and perseverance provided effective leadership in resolving questions and keeping the project on task. The persons identified below were primarily responsible for the development and writing of this document. Their statements of belief are included in order that the reader may understand that each of these individuals brought their own philosophy and expertise to bear on this publication. Through discussion and resolution they were able to develop a guide which is fundamentally consistent in structure, rich in content and educationally sound.

STATEMENTS OF BELIEFS

Virginia Bryant Weller - Dance is an art form which can provide for persons of all ages, races, sexes, and religions and aesthetic experience through bodily movement. Since it needs no external instrument, it is inexpensive in its basic educational form. The time has come for dance to become an intrinsic part of every person's education as an art form equal to that of music and art.

Judith B. Carlson - My teaching reflects a movement education approach which closely allies the three areas of human development; the motor, affective and cognitive learning domains, and honors a strong commitment to the total education of the child. I believe that the more personally meaningful movement experiences are for children, the greater the effect physical education will have on the education of today's child.

Susan Hughes Gingrasso - I feel that dance can extend the personality, develop the self, and promote a balanced concept of life. Dance should be a part of education from the earliest grades through high school and beyond. Perhaps the best way to describe my contributions to this guide is to say that I have taken ideas and concepts from other committee members, reworked and shaped them into cogent and practical contributions.

Joan Mills Maas - The values of dance education are many, and in-depth dance experiences, taught by qualified instructors, should be offered to all students at all levels of education. Kinesthetic awareness, fundamental movement skills, creative activities, and performance experiences are too often neglected in our schools today. Dance education should be advanced to a status comparable to that of the other arts. This curriculum project is an attempt to show why this should be done and how to accomplish this goal.
While serving as the facilitator of this project I have been impressed with the insights and knowledge of the above individuals and I have found it to be an educational and rewarding experience.

The development of this publication has been a cooperative effort supported by the Wisconsin Department of Public Instruction, the Wisconsin State Supervisor-Art Education, the Wisconsin State Coordinator-Arts and Humanities, and the Dance Council and the College of Fine Arts, UW-Stevens Point.

PREFACE

The Wisconsin Department of Public Instruction has a long history of supporting arts education as an important and basic part of a comprehensive K-12 school program. I believe that learning is most effective when it is integrated and experiential. All aspects of human perception and capability must be involved in the learning process. Dance and creative movement have always been a necessary and important aspect of human function and expression.

Physical movement has been an integral part of Wisconsin schools for many years. Social and ethnic forms of dance have been offered by most of these schools, but dance as creative expression and as an art form is not generally provided. The lack of comprehensive dance education curriculum guidelines has undoubtedly contributed to the lack of a total dance education program.

This publication has been developed in response to the need for K-12 dance education guidelines. It is the first dance curriculum developed and published by the Wisconsin Department of Public Instruction. It encompasses all of the major aspects of dance education and it is based on the Department's advocacy of experiential and conceptual learning. The curriculum committee has developed an outstanding guide which clearly describes the teaching/learning process, content, and needs of dance education. I encourage schools to utilize this guide as the basis for planning and developing their K-12 dance education offerings.

Herbert J. Grover
State Superintendent of Public Instruction
INTRODUCTION
PURPOSE OF THE GUIDE

Seeds sown on dry, hard, rocky ground fail to develop. Seeds sown on moist tender welcoming soil blossom into beautiful plants with the strength to regenerate.

So it is with Dance Education in the public school systems across the country. For years, denied the status of a fine art, dance was plastered with throttling stigmas. Considered as commercial entertainment or relegated to the role of developing physical skills and coordination, dance took a back seat to the other arts and physical education activities. Although most schools had dance activities in the curriculum, they consisted only of imitative, non-exploratory forms like folk, square, and social dance. These activities provided convenient ways to transmit proper social behavior between the sexes and traditional values concerning public physical contact. Rarely were dance activities used or recognized as vital to the total education of the individual. The seeds of dance as a means to integrate the cognitive, motor, affective and spiritual self has struggled for existence in a hostile environment, until very recently, when a significant segment of our society began to turn the tide toward recognizing this necessary integration. Concerned about the loss of self-image and self-esteem in this age of overwhelming technical accomplishments, they have urged educators to incorporate the fine arts into the curriculum, not as fringe activities, but as the core from which traditional academic studies spring.

Dance, as the probable mother of the arts, has gradually shed its stigmas of entertainment, social culturalization, and skill development. It has begun to achieve recognition as a primary means to integrate and expand perceiving, learning, doing, and knowing. This is only right, because our movement patterns and dances reveal us to ourselves and to one another more simultaneously and totally than does our linear, discursive language. The effort, shape, weight, and timing of our movements determine the degree of success, working, and learning. Dance has at last begun to find a receptive environment in education.

The purpose of this guide is to serve as a resource for the development of local school district dance education curriculum guides. The following section contains detailed information for local school district curriculum development.

This guide proposes a comprehensive, sequential development of a K-12 dance education curriculum. In writing the guide, the authors chose to present the ideal model for dance in education in anticipation that quality programs outlined in the present might be realized in the future. The model emphasizes a conceptual, holistic approach rather than the traditional imitative methods used in dance education.

The first section establishes the philosophic position of the committee toward dance in education. Goals derived from this philosophic viewpoint appear in a schema which focuses on individual and societal needs.

The second section thoroughly addresses the major aspects of the teaching/learning modes, of planning for learning, of concepts, skills, and knowledges basic to dance education. It emphasizes and details the nonlinear integration of the cognitive, motor, and affective learning domains. This section includes models for planning/learning units and proposes a retrieval system which makes quick access to dance resources, information, and activities possible. This section concludes with the "nitty gritty" of how to turn conceptual material into practical learning units and lesson plans.

The third section outlines roles of support and responsibilities of administrators and teachers for the development and implementation of dance education programs. Physical facilities for dance, scheduling, and time allocations receive deserved attention. Recommendations concerning the knowledges and competencies necessary for dance education teachers have also been addressed in this section. The guide concludes with a substantial listing of various resources for dance educators.

The schema (figure 1, page 10 on the following page visually focuses the varied aspects of dance into a holistic awareness and comprehensive education.
PHILOSOPHY

Dance is movement elevated to an aesthetic experience. From the first cry of a baby, to the last feeble gesture of life, the human being moves and reveals a personality through movement. Life’s experiences then, supply the source material from which the dance creation springs. Dance provides a universal means of expressing all that cannot be put into words. From the beginning of history, dance has played a dominant role in cultural development, as worship, as ritual, as play, as art. Dance reflects man’s aesthetic need to create and appreciate beauty and form. Since the instrument for that artistic expression is the human body, many conclude that dance ranks as the mother of all other art forms.

Benefits

Persistence and discipline leave their mark on all who actively engage in dance experiences. Those involved in dance seek to become more flexible, to learn finer control of various body parts, to strengthen and coordinate the entire body, to expand the capacity and range of movement vocabulary, and to develop bodies and minds as finely tuned instruments of motion. All of this takes a consistent and prolonged period of time which can only be accomplished by frequent practice.

Dance experiences free the body from inhibitions and tensions, promoting ease and sureness for the development of a more integrated total self. Dance is a joyous, rhythmic expression of the emotional self through movement. It stimulates the imagination and provides a self-satisfying experience. Dance fosters an appreciation for the body’s capacity and potential for movement. Dance offers the opportunity for aesthetic and critical growth and social development.

Choreography

Choreographing a dance requires not only the knowledgable application of learned movement skills, but the ability to integrate form and content. It requires extensive knowledge of self, the understanding of one’s inner feelings, emotions, ideas, and perceptions of the world. Only then can the choreographer make discerning choices for the proper movement symbols with which to reveal the dance intent.

The choreographer learns to look at movement with critical eyes and realizes the pain and joy of self achievement. In the process, he/she also learns to appreciate and respect the inner life and uniqueness of not only the self but of others as well. Most importantly, those engaged in the total dance experience become more receptive to the creative challenges and cognitive functions of the mind.

Role of Dance In Education

The role of dance in education is to provide all students with an opportunity to experience a wide, varied, and in-depth exposure to dance as an art form. Dance educators have a commitment to teach students how to use movement as a medium of expression, to integrate the motor with the cognitive, to explore the bond between personality and movement, and to stretch the traditional boundaries of the educational processes. To be realized as an integral part of education, the dance experience must develop, progress, and grow toward clearly defined goals. Most important in the establishment of these goals is that they be responsive to the needs and interests of each individual student. For reasons such as these, dance should be intrinsically to the education of all students at all grade levels. These goals are defined in figure 2, page...

SECTION II: CURRICULUM, STRUCTURE, CONTENT, PLANNING AND INSTRUCTION

Contributed by AAHPERD
EXPLANATION OF TEACHING/LEARNING MODES
IN DANCE EDUCATION

Feelings, understandings, beliefs, attitudes, and behaviors related to major ideas (generalizations) and concepts about dance are taught and learned in two modes. Use of the creative (problem solving) or divergent teaching mode stimulates conceptual learning processes, while teacher-directed (imitative) or convergent teaching encourages learning by imitative processes. The total picture of learning in dance education consists of a dynamic balance between these two teaching/learning modes.

Cognitive, motor, and affective objectives can be accomplished through either the convergent or divergent teaching mode. The emphasis and choice of mode will shift according to the nature of the concept, the objective and the selection of motivational resources and learning activities. Most important, however, is that one's teaching exemplify consistently one's philosophy of education and view of how students learn and develop.

Divergent Teaching/Conceptual Learning Mode

The creative or divergent method requires that the teacher draw from a rich storehouse of ideas, feelings, emotions, and perceptions which the students transform into movement symbolic of their own feelings, emotions, ideas, and perceptions. The teacher must draw on his/her own creativity to stimulate the students when planning and implementing the lesson.

Convergent Teaching/Imitative Learning Mode

The teacher-directed or convergent teaching mode is most frequently used for the teaching of technique. This method requires that the teacher possess an above average dance technique as well as the ability to build lessons on clear developmental stages and degrees of technical difficulty. This learning process which depends on observation and duplication, should help students refine and master the technical skills of dance. The imitative learning process also provides a basis for learning movements choreographed by others.

Limitations of imitative or convergent teaching suggest that teachers must be cautious not to use this merely as an opportunity for perfecting personal technical skills or ego fulfillment. Secondly, if students are chosen to demonstrate movement because of their advanced skills or because they are quick and agile at demonstrating movements as the teacher verbalizes, care must be exercised lest they get an exaggerated impression of their own self-importance.

Nature of Dance in Education

The nature of dance in education requires that the primary emphasis of the teaching/learning process centers upon perceiving, experiencing, synthesizing, creating, and evaluating. Cognitive knowledges, motor skills, and principles of movement occur simultaneously in the teaching/learning process. Students absorb concepts, ideas, and vocabulary as they move and the dynamics of moving stimulates full comprehension of movement ideas.

Final results, while generally considered less important than processes and experiences, play an important part in personal assessment and overall evaluation. Either covert or overt results appear in relationship and in proportion to the predominant teaching mode used.

Factors of Divergent Teaching/Conceptual Learning

In planning the divergent teaching/conceptual learning mode, the teacher selects and organizes a variety of informational, motivational situations in which students immerse themselves. These experiences should arouse new or heightened awareness and understanding of multiple factors upon which the objectives, concepts, and generalizations are being focused. The teacher guides the student through selected learning activities which spring from the resources, e.g., pictures, colored paper, materials of different textures, sculptured figures, slides, movies, elastic bands, and scarves. Additional motivational situations to observe movement might include: field trips to construction sites, zoos, farms, circuses, lake fronts, rivers, museums, musical concerts, and, of course, dance concerts. These experiences constitute just a fraction of the motivational resources from which to draw excellent movement ideas.

The teacher then selects learning activities to synthesize the wealth of material collected from the motivational experiences. The teacher might pose specific problems or ask pertinent questions which evoke individual movement responses. Students explore, discover, and choose which movements they will do, their quality, timing, sequence, shape, and space. The teacher continues to develop and
shape the conceptual experience with additional questions which guide the learning process through its several stages to completion.

The teacher must be careful in structuring problems and questions. Too much freedom, especially for the beginning student, results only in confusion, chaos, and discouragement. Problems should be short and uncomplicated, have a specific objective, and deal with material to which the students have previously been exposed. At the K-2 level, e.g., this may utilize the basic locomotor movements of walking, running, axial movements of turning, the effort of pushing, referring to animals they have observed for movement ideas, or moving to familiar songs, stories and poems. As students develop and grow in cognitive and motor knowledge and skills, previously learned material can act as a springboard for further exploration, while problems and questions can and should have multiple and more encompassing objectives.

More comprehensive problems might include:

1. Revising a movement phrase originally done in one quality in another quality.

2. Using a particular step pattern previously learned as a basis for developing an interesting movement phrase or dance study, with variations on that step pattern.

3. Using the rhythm of their names on which to construct movements.

4. Changing the spatial patterns of a previously learned sequence.

On the high school level, when a firm foundation in movement education from an aesthetic viewpoint has been established, the various facets of dance which have been studied individually will come together in more advanced and complicated problems. Problems on this level might be:

1. Constructing a dance in ABA forms. Students will previously have read about, discussed, and fully understood this particular form as well as have developed movement vocabularies and understood the difference between a dance study and a dance.

2. Developing a dance which is abstract, based on feelings resulting from various colors.

3. Emphasizing shape as a focal point, build a dance in rondo form.

4. Building a dance around the idea of destruction and despair.

Role of Observation in Dance

Inherent in the conceptual and inductive teaching/learning mode is the necessity for both the teacher and the learner to be keen observers. In addition, the teacher must be sensitive to the high and low points in a learning situation, appreciating the individual as a unique personality, not only in terms of individual movement responses, but also in terms of each student's distinctive learning mode, encouraging each with constructive criticism. These understandings provide the teacher with an aid to determining the content of lessons, gain instructional insights, and assist in the essential evaluation of the student and teacher behavior. The teacher must know dance, be able to observe dance, and be able to articulate what has been seen, in order to facilitate learning. The learner must become aware of the feeling, meaning, significance and joy of dance experiences as a performer and as an observer. What makes the dance experience different from other forms of physical education is the purpose and the way in which the learner uses the content. Movement, as the content of the dance experience, is used for expressive purposes and as a means for communication.

Role of Evaluation in Dance

The process of synthesis and evaluation should help the learner to comprehend the implications of what has been experienced and also permit other members of the group to share their understandings, feelings, and resulting products with one another. This group sharing will broaden each individual's viewpoint and permit "testing" of their beliefs. Evaluation should also permit the teacher to determine to what degree he/she has been effective in organizing and facilitating the learning process.

Covert responses such as valuing, appreciating, and contemplating are personal and difficult to assess. These responses form the basis of self-actualization and educational growth. Progress in these areas will be exhibited through student attitudes such as enthusiasm, commitment, involvement, contemplation, acceptance, and physical changes such as postural improvement, movement efficiency, and increased coordination in the demonstration of original movement. Achievement of covert objectives usually will be based on inference from student behavior.

Overt responses consist of two possible types: immediately observable acts related to the acquisition of specific skills or knowledges; and long range observable acts utilizing and practicing acquired skills and knowledges.
Performance in dance class provides an overt means of sharing with others that which has been synthesized and created. In the earlier grade levels, performance should emphasize sharing of the experience with others of the class. In the later grades, the performance can become more formal in structure and setting. Videotaping class demonstrations, compositions, rehearsals, and performances offers acceptable means for the performer and/or creator to view and evaluate his/her work.

Pre-tests and post-tests provide another means for students and teachers to evaluate cognitive and motor accomplishment. Tests may be written, oral, motor, or aesthetic in nature.

Since dance is a performing art, it does require that students have an opportunity to perform. However, utmost care should be exercised in handling the performance experience. While professional dance rests on and values the product, which is the performance, dance in education places greater emphasis on the process of learning. This process enriches the quality of life and expands personal horizons.

**PREPARING FOR CURRICULUM PLANNING**

Conceptual learning based upon exploration, discovery, and application requires many and varied resources. Imitative learning based on repetition requires different approaches and resources from those used in planning for conceptual learning. However, both modes share certain elements essential for planning a meaningful, individualized learning experience.

**Essential Elements of Conceptual Curriculum Development**

1. Development of a conceptual framework stressing the major ideas in dance education. In this guide, the framework has been broken down to cover areas of learning appropriate to each grade/level. Additional concepts should be developed which reflect the major area of awareness for each level.

2. Development of basic subject matter content (skills, facts, materials, activities) to be used by the learner as a vehicle to form responses, communicate meanings and feelings related to the concepts and major areas of awareness. Skills and knowledges basic to a comprehensive curriculum in dance education should be established for the cognitive, motor, and affective domains of learning for each level. (See Dance Education Content: Cognitive, Motor, Affective Skills and Knowledges on pp. 776)

3. Development of evaluation methods to assist the teacher and student in comprehending the effectiveness and meaning of the learning experience. (See Skills and Knowledges on pp. 776)

4. Development of a retrieval system permitting quick and easy identification of varied resources which will serve as a library for motivations, informations, activities, and processes related to the objectives of learning experience. This may be organized on keysort cards (see Keysort Retrieval System on pp. 739) or listed on index cards or in catalogs.

5. Development of appropriate planning form/s for use by teachers in organizing learning units. (See Learning Unit Organization Form, pp. 739)

**Additional Elements for Imitative Learning**

The choice of informational resources, learning activities and means of evaluation constitute the major differences between planning conceptual learning experiences and imitative learning experiences. Additional considerations in planning for imitative learning experiences should include:

1. accurate, clear demonstration of movement material by teacher or qualified student/s,

2. accurate, clear, imaginative explanation of movement material as necessary by teacher,

3. selection and use of images which might heighten student awareness and feeling of movement material,

4. consideration for the sequential and developmental nature of a technique class. Manuals outlining the various approaches to the organization of technique classes are listed in the bibliography, and

5. careful attention to positive, constructive corrections on alignment, placement, execution, performance for each student in every class session.
CONCEPTUAL FRAMEWORK

The concepts identified under each of nine broad generalizations have been developed sequentially. The format chosen to introduce the concepts for each level is:

- **Level I** (K-2) — Experiencing
- **Level II** (3-4) — Discovering
- **Level III** (5-6) — Understanding
- **Level IV** (7-9) — Knowing
- **Level V** (10-12) — Applying knowledge and skills

This hierarchical structure describes the learning process at any age and provides a framework for organizing the learning experience. The GENERALIZATIONS and variant CONCEPTS should be used as a beginning resource in developing local school curriculum. Additional GENERALIZATIONS and CONCEPTS should be identified as the sensitive teacher selects and organizes learning experiences which are appropriate and stimulating to the unique needs and capabilities of his/her students.
AESTHETICS - Since movement is the medium of expression in dance, it is essential that it be enjoyed as a purely sensory, aesthetic experience, exclusive of a utilitarian goal.

Movement in an open, creative environment can be a joyful, aesthetic experience.

ELEMENTS - The elements of time, space, and energy, in the cognitive as well as affective sense, must be fully understood to come to a full knowledge of dance as an art form. The dancer must develop a movement vocabulary to communicate eloquently.

The human body is capable of locomotor and or axial movement.

KINETICS - The laws of physics, e.g., gravity, centrifugal force, torque, balance, etc., apply directly to any moving body. This kind of understanding enables the developing dancer to perform with the greatest efficiency and economy of energy.

The laws of physics can be experienced in everyday movements.

SELF-AWARENESS - To achieve the greatest personal potential in everyday living, it is necessary to come to know oneself as a moving being by learning one's strengths as well as weaknesses. This includes tapping both physical as well as creative potentialities.

</table>
CONCEPTUAL FRAMEWORK

GENERALIZATION

KINESTHETICS - Our senses provide both pleasurable and purposeful information about ourselves and our environment. The sensory modality of primary importance to movement is the kinesthetic sense. Through this sense and related sensations from the skin and muscles, perceptions of body positions, of directions of movement through space, of speed of the motion, of degrees of tension and relaxation, and of rhythmic movements can become more acute.

SOCIALIZATION - In moving with others, a social sense of unity and cooperation is developed and achieved. This is not only apparent in the performance of a dance, but also in the give and take required for the creative efforts of group composition.

CULTURALIZATION - The study of folk and ethnic dance provides an opportunity for the development of good citizenship because it develops an interest not only in one's own culture, but also in that of others. Our future will depend on greater international understanding and knowledge, and any means of accomplishing this will be important.

CONCEPTS
LEVEL - 1

Body movement is a pleasurable experience.

Movements created and/or performed by one person can stimulate the movement of others.

Participating in dances from different cultures as well as our own is physically, mentally, and emotionally stimulating.
Concepts
Level - II
One can discover through movement the general relationship of body parts, joint angles, speed of motion, and degree of energy.

Concepts
Level - III
Through increasing kinesesthetic awareness, movements can be more accurately directed and controlled.

Concepts
Level - IV
Becoming more aware of postural, spatial, temporal, and energy relationships will result in more coordinated and efficient movement.

Concepts
Level - V
Through the conscious manipulation of body position, speed of motion, and degrees of tensions and relaxations, the expressive nature of dance is realized.

Dance provides an opportunity to discover information about other people.

When a dance is performed, we can understand that every person involved is important to the success of that performance.

Knowing how to create and perform a dance requires both initiative and cooperation.

A total dance production requires the knowledgable application of the contributions and cooperation of choreographers, performers, set designers, lighting designers, stage hands, directors, producers, program and costume designers, publicity directors, and ticket sellers to result in a successful event.

Performance encourages one to become familiar with the cultural setting where the dances originate and to become vicariously acquainted with the people who perform them.

Folk and ethnic dances provide a basis for understanding the philosophical beliefs, social systems, and movement norms of other cultures and for comparing these with our own.

By authenticating the cultural environment in which the performance might occur, one can become a part of the culture where the dances originate.

Choreographic manipulation of traditional styles for study and performance purposes promotes acceptance of other cultures, diminishes intolerances of other peoples and ourselves and opens the door to the development of positive relationships between ourselves and others.
CONCEPTUAL FRAMEWORK

GENERALIZATION

CREATIVITY

Problems confronting society will only be solved through constructive creative thinking. Through the act of creative movement, experimentation, problem solving, improvisation, and composition one is required to make choices, discriminate and be able to form movements into phrases and larger compositions as well as to evaluate individual and group efforts.

CONCEPTS LEVEL - I

ANALYSIS

In an open environment, one experiences movement for movement’s sake and is free to solve movement problems has many solutions.

APPRECIATION

Though becoming a professional dancer will be the goal of only a very few, performing offers every individual the opportunity to better understand dance performance when it is viewed. Educated dance audiences for professional performances are sorely needed. The viewing of the works of great artists in turn gives back understanding and enriches the dance education.

Sharing informal performances with one’s peers provides an enriching learning experience.
CONCEPTS
LEVEL - II

In an open environment one sees discoveries through the creative process that each movement problem has many solutions.

CONCEPTS
LEVEL - III

By manipulating movements, one begins to understand the developmental process in creating a dance study.

CONCEPTS
LEVEL - IV

Knowing the principles of composition provides the necessary formula in which the dance theme idea is defined and developed.

CONCEPTS
LEVEL - V

The application of creative thought to the principles of composition provides the necessary framework by which individual dance statements can be expressed either in a traditional or an original form.

---

CONCEPTS
LEVEL - II

Through observations of performances one becomes aware of a variety of dance forms and activities.

CONCEPTS
LEVEL - III

Opportunities to develop the skills of evaluating dance enables one to improve one's own performance and to appreciate the performances of others.

CONCEPTS
LEVEL - IV

Experiencing and knowing the discipline of performance can contribute to a positive self image.

CONCEPTS
LEVEL - V

The planning and execution of a formal dance program demands a rigorous discipline from all performers.
## DANCE EDUCATION CONTENT:
### COGNITIVE, MOTOR AND AFFECTIVE SKILLS AND KNOWLEDGES

#### LEVEL I | LEVEL II
---|---

### 1. COGNITIVE

#### 1.1 Principles of Movement
- where joints are
- right/left
- inward/outward
- body parts
- leading
- supporting
- receiving
- gravity
- range of joints
- balance
- design for one body
- organization of time

#### 1.2 Locomotor Movement
- walk
- run
- hop
- jump
- leap
- skip
- slide
- gallop
- single turns
- hopsa (step-hop)
- schottische
- simple polka
- prance

#### 1.3 Axial (body) movement
- push, pull
- rise, fall
- turn
- stretch
- swing
- punch, strike
- sway
- twist
- dodge
- shake
- bend
- sit
- kneel
- crawl
- roll
- flexion
- extension
- isolation
- sustained
- collapsing
- percussive

1.7 Form

- singing games
- repetition
- exploration with single elements of time, space, energy
- periodicity

LEVEL I

LEVEL II

- pantomime
- unison movement
- lead/follow
- sequential movement
- antiphonal movement
- variety
- simple folk dances

1.8 Performance Skills

The performing skills listed below are general in nature and apply to showings, demonstrations, or performances at any grade level.

1. concentration while performing
2. learning correct facings in relation to sightlines of viewing audience
3. learning correct focus in relation to audience
4. learning to appear in performing area precisely on time
5. realizing the importance of rehearsals
6. projection
7. learning to work cooperatively with others

1.9 Creative Skills

- explorations
- problem solving

1.10 Dance Heritage/Historical Perspective

- singing games
- artists-in-schools

- simple folk dances of many nations with background information
- artists-in-schools

1.11 Dance Appreciation

- general response to other’s dancing
- facial expression
- applause
- attentiveness

verbal response
- positive stressed
- if negative, must suggest how to improve attendance at dance performances

2. MOTOR:

2.1 Principles of Movement
Experiences with all items listed under “Cognitive.”

2.2 Locomotor movement
Experiences with all items listed under “Cognitive” for each level plus the following under each level.

LEVEL I
- Simple 2 form combinations

LEVEL II
- Heel-toe Polka
- More complex 2 form combinations
- 3 and 4 form combinations

2.3 Axial (body) movement
Experiences with all items listed under “Cognitive” for each level.

2.4 Space
Experiences with all items listed under “Cognitive,” for each level.

AFFECTIVE:

Affective responses to dance experiences at any grade level, in addition to the cognitive and motor development, are a valuable and essential means of evaluating program effectiveness. Such open ended inquiry subjectively elicits one's inner feelings and emotions.

3.1 Possible questions to evoke affective responses might include:

- What is it like to move to music?
- What did you discover about your body and its parts?
- How much space does your body need when you move?
- How do you feel when someone invades your space?
- Do you prefer movements that are strong and forceful or light and soft?
- Tell what it was like to create a dance.
- Did anything happen that made you frustrated or happy? Excited or happy? Elaborate!
- Did you feel like you “belonged” to the group? What is it like to work together to share ideas and create a dance?
- How is dance different from other things in “gym”?
- Do you enjoy dance experiences? Why? Why not?
- How do you feel when you express yourself in dance? Does dance help you to express your “inside” feelings?
- Is rhythm important to you? Why?
- How do you feel about yourself in relation to others? To the environment?

3.2 Possible areas to pursue affective inquiry at the appropriate level of development might include:

- Appreciation for the potential of the human body.
- Enjoyment of dance movement for its own sake.
- Appreciation of the significance of nonverbal communication in all human interaction.
- Increased awareness of qualities of movement and their expressive meanings.
- Respect for dance’s contribution to the development of a positive self-concept.
- Satisfaction of performing for an audience; sharing creative exploration.
- Development of poise and confidence through dance.
- Enjoyment of positive interaction in human relationships through dance experiences.
- Deepened aesthetic perception and appreciation of dance and its relation to other art forms and disciplines.
- Appreciation of one’s own cultural heritage and the unique offerings of others cultures.
- Sensitivity to details of styling in the performance of social, folk, ethnic, historic, stylistic and modern dance forms.
- Enjoyment of experiences in using dance improvisation as a tool to dance movement and form.
- Awareness of performer-audience interaction.
- Enjoyment of participating in solo and group choreography.
- Respect for the enduring qualities of dance.
The conceptual approach to curriculum development requires that the teacher coordinate a variety of resources, informations, learning processes/activities, and evaluation/synthesis procedures which allow for a reasonable variety of individual responses to a problem. In developing curriculum at the local level, the volume of resources and dance processes would become too cumbersome and inflexible when printed, bound, or placed on index cards. The recording of this information on keysort cards (see Keysort Retrieval System, figures 3, 4, 5, 6, pages 58, 59) provides an informational retrieval system which is compact and permits retrieval of all information related to the instructional program according to generalizations or a variety of other categories. Since each piece of information related to the instructional program is placed on a separate card and notched for retrieval according to appropriate categories, the system allows for a curriculum resource bank which is constantly evolving through the modification and elimination of the cards or the inclusion of new information. This system allows for great flexibility, eliminates the need to "plow" through the same ground each time the curriculum is revised, and provides a variety of choices which pertain to a particular situation.

This information retrieval system is not an end in itself but rather a tool which will enable the dance educator to utilize his/her planning and teaching time more effectively and imaginatively. The organization of curriculum information in this manner requires that the user be personally involved in decision-making, which is not always the case when curriculum guides are printed, bound, and placed on the shelf. In addition, a variety of printed statements or guidelines may be developed from this resource bank which may serve such purposes as lesson units for teachers or students working independently.

Categories in the System

The categories indicated on each side of the card correlate with the structure and content presented in this curriculum guide. The organization of the categories and placement on the card seems appropriate and consistent with the contents of the guide. While the categories under "All Generalizations," "All Concepts," and "All Objectives" will remain standard in any curriculum, those listed under "All Resources/Informations," "All Activities/Processes," and "All Synthesis/Evaluation Procedures" are examples of the many possibilities which exist.

The selection of categories, placement on the card, and relative importance should be consistent with the dance curriculum which is developed at the local level.

Materials

1. Keysort Cards K5S-371N-503/W17963CH
   Ordered in lots of 1,000 or 2,500 from McBee Systems
   611 N. Lyndale Dr.
   Appleton, WI 54911
   (414) 793-7671

2. A long tray or drawer to house the cards which is no wider than the horizontal length of the cards.

3. Notching punch to notch the cards. This mechanism can be obtained from McBee Systems.

4. A 12"-14" cylindrical metal rod no larger than the diameter of the holes on the card. Slender knitting needles work well, or IBM makes a metal rod specifically for this kind of retrieval system.

Notching the Cards

Note in Keysort Retrieval System figures (3, 4, 5, 6) that each card is notched according to the nature of the information on the card. Notching several items on a single card acts as a cross-reference system. Notching several categories also means that cards do not have to be grouped in the tray by individual category. Cards of any category can be located anywhere in the tray and still be retrieved quickly.

Step-by-step Procedure

The object will be to find several bits of information to organize a learning unit in aesthetics.

1. To find the generalization on aesthetics:
   a. Refer to Keysort Retrieval System; Aesthetic Generalization figure 4.
   b. Insert rod into all cards in the tray through the notch marked ALL GENERALIZATIONS.
   c. Lift all cards from tray.
d. Cards with category ALL GENERALIZATIONS notched will fall from the rod into the tray.
e. Remove the cards from the tray before replacing the cards remaining on the rod.
f. Since there are only nine generalizations in this guide, one can easily sort through the nine cards which have fallen from the rod to find the Aesthetics Generalization.

2. To find the Level I Concepts for the Aesthetics Generalization:
   a. Refer to Keysort Retrieval System; Aesthetic Concept Level I.
   b. Insert rod into all cards in the tray through the notch under ALL CONCEPTS -BY GENERALIZATION marked AESTHETICS.
   c. Repeat c, d, and e above.
   d. Since there are only five CONCEPTS under each GENERALIZATION in this guide, one can easily find the Level I concept.
   e. This concept could also have been found by inserting the rod through Level I below ALL CONCEPTS BY LEVEL.

3. To find all OBJECTIVES for Level I:
   a. Refer to Keysort Retrieval System; Aesthetic Objectives for Level I.
   b. Insert rod into all cards in tray through either AESTHETICS under ALL OBJECTIVES BY GENERALIZATION or LEVEL I under ALL OBJECTIVES BY LEVEL.
   c. Repeat c, d, and e under #1 above.
   d. By additional sorting one will discover all Objectives for the Level I concept in Aesthetics. Additional objectives should be identified as the need arises and placed in the system.

4. To build the Learning Unit.

   The next steps involve procedures similar to those described above to find appropriate motivations, activities, skills and knowledges, and evaluation procedures. The teacher must then make active choices to determine the most appropriate order and use of the materials to build the Learning Unit and individual lesson plan.

Synthesis/Evaluation Procedures

- Displaying
- Sharing
- Compiling
- Self analysis
- Goal setting
- Testing
- Measuring
- Observing
- Discussing
- Performing
- Attitudinal responses
- Positive interaction

(Open-ended possibilities)

**See Note**

The personal character of learning in Dance Education which embraces the cognitive, motor, and affective phases of learning, does not lend it to a predictable, uniform, immediate, or totally quantifiable outcome. The major part of the S/E process will relate to open rather than closed types of conclusions.
PLANNING FOR LEARNING: The Teacher's Viewpoint

The planning for learning process moves from left to right on the Planning Learning Schema, and necessitates a sequential and developmental evolution of factors related to the categories indicated.

Procedures for Planning Learning Units

1. Select one of the nine GENERALIZATIONS to be the focus for the learning unit. (Conceptual Framework, pp...)

2. Select the CONCEPT appropriate for the grade level. (Concepts for each grade listed with each Generalization, pp...)

3. Establish broad OBJECTIVES for the Learning Unit. These objectives should be based on
   a. interpreting the meaning of the generalization and concept.
   b. examining the values, attitudes, behavior, and feelings related to the generalization and concept.
   c. identifying and developing skills and knowledge basic to learner competencies in subject areas.
   d. reflecting the major goals of dance education.

These objectives become criteria for selecting appropriate motivational/instructional resources, learning processes/activities, and evaluation procedures.

4. Identify and select informational/motivational resources relevant to the generalization, concept, and objectives of the learning unit. These resources should include experiences related to the cognitive, motor, and affective learning domains. The cognitive should include factual information, observations, research, or problem solving. The motor/affective should include movement experiences and explorations, other tactile/kinetic situations, creative experiences, sensory experiences, the unusual and ambiguous.

5. Select and organize learning activities/processes which will provide options for perceiving, examining, and responding to the situation stimulated by the information presented. These activities should encompass the three domains of learning—stressing affective, sensory, and creative experiences. The content and processes may include any of the techniques, materials, skills, facts, and interactions considered to be part of a traditional dance education. However, they are not to be considered as ends in themselves but rather as tools and vehicles for examining, exploring, understanding, and communicating feelings and ideas from a personal and creative point of view.

6. Develop processes which will allow the learner to personally evaluate, understand, and assimilate the learning experience. Devise activities which will permit sharing of feelings, ideas, beliefs, and attitudes resulting from the learning experience.

7. Develop observation and evaluating procedures to help determine the degree of effectiveness provided by the learning unit towards fulfilling its established objectives.

8. Develop lesson plans to implement specific objectives or small portions of several objectives organized around a theme to encompass the three domains of learning. Extrapolate specific resources, processes/activities, and synthesis/evaluation procedures for the lesson plan from those found in the comprehensive learning unit.

9. Factors which affect the teacher's choice of materials from the learning unit in addition to the theme are:
   a. predominant teaching mode to be used:
      1. teacher directed, imitative, convergent.
      2. teacher guided, creative, divergent.
   b. teacher qualifications
   c. class ability and attitude
   d. class time and size
   e. physical facilities
   f. available resources; i.e. books, records, audio tape recording equipment, video-tape, equipment, film projectors, percussion instruments.
Nature of Teaching Dance in Education

Teaching, particularly in dance education, demands vigorous interaction in which both the teacher and student participate in the decision-making process and construct the learning environment. The Teacher-Student Decision-Making Responsibilities figure 8, indicates possible relationships between student and teacher responsibility for creating the learning environment.

Dance teachers who are frustrated performers may do more harm than good in an educational situation. Both teaching and performing are highly refined arts which require extended study and practice. Neither should be accepted as a second choice.

B. Outside of the Classroom

Figure 9
LEARNING UNIT EXAMPLES

What follows presents one way to:

— derive OBJECTIVES from the variant CONCEPTS for a single GENERALIZATION.

— decide on Resources, Activities, and Evaluations appropriate to the objectives.

— key OBJECTIVES with Dance Education Content: cognitive, motor and affective skills and knowledges. Numbers in parenthesis which follow OBJECTIVES correspond to numbered sections in the Dance Education Content.

— organize the learning process by events WITHIN or OUTSIDE of the classroom.

These examples utilize the Learning Unit Organization Form, figure 9, page.

Additional concepts and objectives should be developed for each level. The resources, activities, and evaluations listed represent a small portion of the available possibilities. Individual lesson plans to fulfill single objectives or parts of several objectives for each concept should be derived from these larger learning units.
GENERALIZATION: Since movement is the medium of expression in dance, it is essential that it be enjoyed as a purely sensory aesthetic experience exclusive of a utilitarian goal.

CONCEPT: Movement in an open, creative environment can be a joyful, aesthetic experience.

OBJECTIVES: 1. To move freely and unselfconsciously without interfering with anyone else's freedom of movement.
2. To discover the joy of locomotion. (1.2; 1.4; 1.5; 1.6; 1.7; 2.2; 2.4; 2.5; 2.6)
3. To discover the joy of moving all the various parts of the body. (1.1; 1.3; 1.5; 1.7; 2.1; 2.3; 2.4; 2.5; 2.6; 3.2)
4. To delight in defying gravity. (1.2; 1.3; 1.4; 1.5; 1.6; 1.7; 2.1; 2.2; 2.3; 2.4; 2.5; 2.6; 3.2)
5. To enjoy watching others move. (1.10; 2.9; 3.1)

(13x330)
GENERALIZATION: Since movement is the medium of expression in dance, it is essential that it be enjoyed as a purely sensory aesthetic experience exclusive of a utilitarian goal.

CONCEPT: Discovering one’s ability to perceive the aesthetic elements expands the individual’s aesthetic “response-ability”.

OBJECTIVES:
1. To discover the joy of varying basic movements by changing their speed, rhythmic pattern, and meter. (1.1; 1.2; 1.3; 1.6; 1.8; 2.1; 2.2; 2.3; 2.5; 2.7);
2. To discover the joy of varying basic movements by changing their floor patterns, air patterns, direction, range and level. (1.1; 1.2; 1.3; 1.4; 1.5; 2.1; 2.2; 2.3; 2.4)
3. To discover the joy of varying basic movements by changing their quality and dynamics. (1.1; 1.2; 1.3; 1.7; 2.1; 2.2; 2.6)
4. To expand one’s perceptual capacity to respond openly to the movement of others (1.10; 2.9; 3.1)

RELATED MOTIVATIONAL, INFORMATIONAL PROCESSES/ACTIVITIES RESOURCES

A. WITHIN THE CLASSROOM
1. see 1, 2, 3, 4 under Level I
2. discuss time, space force elements in dance
3. listen to sounds made by different percussion instruments
4. listen to different tonal qualities of musical instruments
5. bring in pictures of people engaged in activity from:
   - newspapers
   - magazines
   - photographs
   - books
6. look at films and video of dance
7. working in theatre spaces
8. working in non-theatre spaces
9. working outdoors
10. artists in residence

1. structured improvisation with emphasis on the individual
2. structured improvisation concentrating on specific time, space, energy elements
3. solving simple time, space, energy problems
4. creating simple movement compositions
5. leading, following
6. working alone, in duets, or small groups, or informally
7. discussing paintings, field trips, sounds, instruments
8. use pictures of people to improvise movement
9. use different sounds to improvise movement
10. accompany self while moving
11. accompany another person while they are moving

B. OUTSIDE THE CLASSROOM
1. observing others everyday movement outside of class
2. observing movement and physical characteristics of different types of people
3. looking at paintings
4. looking at, touching sculpture
5. exploring architectural spaces
6. field trips to museums
7. attendance at dance concerts
8. examining more complicated machines
9. study animal living habit
10. draw people as they are moving
11. paint or sculpt to reflect favorite movements, textures, qualities, designs, shapes, lines
12. make simple percussion instruments

1. concentrating
2. performing
3. observing
4. displaying
5. discussing
6. testing
GENERALIZATION: Since movement is the medium of expression in dance, it is essential that it be enjoyed as a purely sensory aesthetic experience exclusive of a utilitarian goal.

CONCEPT: Experience in all of the arts increases the individual's understanding of the aesthetic elements and enhances the quality of his/her dance experiences.

OBJECTIVES: 1. To understand the common bases between dance and the other fine arts, especially music and dance. (1.2-1.9; 2.1-2.7)  
2. To understand the differences between the other fine arts, especially music and dance. (1.1-1.9, 2.1-2.7)  
3. To understand how the other fine arts, especially music, have been related to dance in the past. (1.9; 1.10; 2.8; 2.9)  
4. To explore and understand the relationship of dance to the other fine arts in the communication of life experiences. (1.8; 1.9; 1.10; 2.7; 2.8; 2.9)

RELATED MOTIVATIONAL, INFORMATIONAL, APPROPRIATE LEARNING SYNTHESIS/EVALUATION RESOURCES PROCESSES/ACTIVITIES PROCEDURES

A. WITHIN THE CLASSROOM
1. see 1.2.3, 4 under Level I  
2. discussion of time, space, energy in dance as related to music and visual arts  
3. discussion of nature and principles of dance accompaniment  
4. discussion of philosophy of art and aesthetics  
5. discussion of relationship of language to the way people move: functionally and artistically  
6. discussion of relationship of language to the way people move: functionally and artistically  
7. discussion of relationship of language to the way people move: functionally and artistically  
8. discussion of how other arts can become stimulus for dance works  
9. discussion of dance as a "theatre art"  
10. discussion of the "art" and skill of performing

1. structured solo improvisations using transferring of time, space, energy elements from other works of art into movement  
2. improvise as above in duets and small groups  
3. compose solos based on the following: - piece of music - "people" observations - painting - static sculpture - kinetic sculpture - outdoor sculpture  
4. create solo based on various dance forms listed in 1.2; 2.7  
5. create percussion accompaniment for own solo works  
6. perform solo dances for class members  
7. perform selected solos for other people  
8. compose musical accompaniment for another student's solo work  
9. accompany solos vocally

B. OUTSIDE OF THE CLASSROOM
1. attendance at dance concerts  
2. attendance at music concerts and other musical events  
3. attendance at poetry readings  
4. attendance at plays  
5. listening to music, reading, poetry, drama  
6. attendance at art galleries

1. attentive listening  
2. attentive observation  
3. creating and performing small dance works which deal with: - emotion - feelings - ideas - shapes - designs - rhythm - different energy qualities  
4. observing others in performance  
5. discussion of own and other's dance works  
6. testing: - orally - skills - performance - written

1. make percussion instrument with several different tones  
2. write a short piece of poetry, short story, or dramatic scenario  
3. paint, sculpt nonliteral forms which embody movement  
4. design an ideal home, work space
**GENERALIZATION:** Since movement is the medium of expression in dance, it is essential that it be imploed as a purely sensory aesthetic experience exclusive of a utilitarian goal.

**CONCEPT:** Knowledge of the formal aesthetic properties, processes expands one's ability to respond to one's surroundings and to create dances which are aesthetically pleasing.

**OBJECTIVES:**
1. To expand one's knowledge of the formal aesthetic properties of dance, other art forms, and the environment, (1.1; 1.5; 1.7, 2.1, 2.3)
2. To expand one's sensory and aesthetic "response-ability" by creating dances which result from sensory input as well as formal aesthetic choices, (1.2, 1.3, 1.4, 1.6, 1.8, 1.9, 2.2, 2.8, 3.2)
3. To develop one's capabilities to create meaningful and aesthetically balanced dances for groups, (1.5; 1.7; 2.6; 2.7; 3.2)
4. To extend the ability to perceive and assess one's affective responses to all facets of living, (3.1, 3.2)
5. To expand one's capacity to synthesize and evaluate sensory and aesthetic processes and experiences, (3.1, 3.2)

GENERALIZATION: Since movement is the medium of expression in dance, it is essential that it be enjoyed as a purely sensory aesthetic experience exclusive of a utilitarian goal

CONCEPT: Knowledge and competent manipulation of the sensory and formal properties of aesthetics enables one to choreograph in a creatively expressive manner relating the dance to other art forms and makes possible the critical evaluation of dance works.

OBJECTIVES:
1. To choose appropriate dance themes and choreograph dances using sensory input, intuitive guidance and applying principles of formal aesthetics. (1, 8, 10, 2, 8, 2, 10; 3, 1, 3, 2)
2. To choose appropriate accompaniment, costumes, properties, and staging for a dance. (1, 6; 1, 9; 2, 6; 2, 9)
3. To participate in the production and performance of a formal dance concert or lecture-demonstration. (3, 1)
4. To extend one's ability to informally critique dances of classmates. (1, 8, 1, 10, 2, 8, 2, 10; 3, 1)
5. To write formal critiques of dance performances. (1, 8, 2, 8, 2, 10; 3, 1)

**A. WITHIN THE CLASSROOM**

1. Technique classes see Level IV for listing of styles
2. Experiment/improvise with a variety of:
   - costumes
   - properties
   - lighting
3. Improvise to contrasting musical and sound scores
4. Choreograph/perform a structured improvisation
5. Compose dances based on multiple elements of time, space, energy
6. Experiment with the use of many facets of large group relationships
7. Write a description of own dance of others' dances
8. Practice projection
9. Practice bows
10. Informal showings/critiques
11. Experiment with lighting, colors, intensities, fades, blackouts
12. Participate on production committees such as:
   - tickets
   - publicity
   - programs
   - house manager
   - stage/light crew
   - costume crew
13. Discuss feelings before, during, after performance
14. Respect ideas of others as ideas and as a mark of growth
15. Sharing comments made by audience members
16. Review video-tape of rehearsal/performance and critique

**B. OUTSIDE OF THE CLASSROOM**

1. Attendance at:
   - dance concerts
   - musical events
   - poetry readings
   - plays
   - art galleries
   - museums
2. Attendance at local/national dance conventions/conferences

---

LEARNING LEVEL V
SECTION III: ADMINISTRATIVE IMPLEMENTATION
IMPLEMENTATION

ROLES AND RESPONSIBILITIES

FOR SUPPORT OF DANCE EDUCATION

Dance is becoming recognized as vital to the total educational experience of all students. Support is provided at the national level for the promotion and development of philosophies and policies to assist expansion of dance education. Local, state, and national dance organizations provide leadership, programs, and resources. These contributions should not go unheeded. If dance is to realize its potential in education, state departments of public instruction, local school boards, teachers, and administrators must fulfill their responsibilities in providing quality dance programs for all students.

Wisconsin Department of Public Instruction

- develop philosophies and practices related to curriculum, professional preparation, and certification.
- plan, promote, and coordinate workshops, demonstrations, and in-services at state and district levels.
- obtain, generate, and distribute informational materials on issues and concerns in dance education.
- promote student involvement in dance activities such as concerts and conferences.
- provide information about and assist with the writing of grant applications for the procurement of dance education funds.
- provide staffing and supervisory leadership for dance education.

Colleges and Universities

- promote and conduct research in curriculum development in dance, motor learning, and related areas.
- promote and exemplify high standards for professional preparation and teacher education.
- act as a consultant for curricular concerns.
- provide guest speakers for in-service programs.
- coordinate and evaluate student/teaching programs.
- provide leadership in curriculum planning and implementation.

School Boards

- allocate adequate number of teaching positions for implementation of dance curricula.
- control student/teacher ratio in dance classes.
- provide in-service education for all teachers who teach dance or desire to integrate dance with classroom learning.
- allocate funds necessary for quality dance programs.

Administrators

- recommend appointment of creative, well-trained, and skillful dance teachers.
- maintain and update facilities.
- assist in planning for and obtaining an adequate budget for dance.
- assist in procuring dance resource/people from within the community and through the Artist-in-Residence program.
- assist in developing public awareness of the dance program.
- schedule dance as a regular part of the total school program.
- schedule classes which provide for the most efficient use of student and teacher time.
- become acquainted with the dance program within the school and district and with national trends in dance education.
- assist and coordinate curriculum development, implementation, evaluation, and revision.
- work for articulation of elementary and secondary curriculums.
- encourage and allow time for interdisciplinary planning.
encourage teacher membership and attendance at meetings, workshops, and conferences of local, state, and national dance organizations.

encourage continuing education and visitation.

visit classrooms to assist in evaluating teachers and developing their potentials in dance education.

assist teachers with instructional or disciplinary problems.

attend special dance events and performances.

**Dance Specialists**

- develop, implement, evaluate, and revise curriculum.
- develop and use resource materials such as slides, handouts, and transparencies.
- provide input into budgeting and purchasing of supplies and equipment.
- identify resource materials for acquisition and use in classrooms and Instructional Materials Centers.
- serve as consultant to classroom and subject area teachers.
- organize and present in-service education programs.
- maintain sensitivity to all students and strive to help them achieve their greatest potential in dance.
- evaluate, keep accurate records, and report student progress as required.
- organize and coordinate student performances and demonstrations.
- organize and supervise appropriate field trips.
- select and/or perform appropriate musical or percussion accompaniment for dance activities.
- assist with extra-curricular activities such as musical productions.
- maintain membership in professional organizations and serve on appropriate committees.
- attend concerts and performances of dance and related events and exhibits.
- bring in artists and other resource people from the community or Artist-in-Residence program for discussions, performances, demonstrations, and master classes.
- update skills, knowledges, and understandings through continued education, reading, participation in technique classes, attendance at professional conferences and workshops.

**Physical Education Teachers**

- recommend adequate time, space, and staff for dance activities at all levels.
- recommend adequate funds for dance programs.
- encourage the hiring of dance specialists and others who have a strong interest and background in dance.
- instill in students a sensitivity for the values of dance education.
- update skills, knowledges, and understandings of dance through continued education, reading, participation in technique classes, attendance at professional conferences and workshops.
- integrate elements of dance and creative movement with other aspects of physical education.

**Art Music, and Drama Teachers**

- present activities that involve movement and dance experiences.
- demonstrate the relationship between dance and other art forms.
- utilize dance resources within the school district and the community.
- serve as a guidance resource for students who want dance experiences beyond those provided by the school.
- update skills, knowledges, and understandings of dance through classes, readings, workshops, and conferences.

**Elementary and Secondary Classroom Teachers**

- consult and cooperate with dance resource people.
- present activities which use movement and dance to augment classroom learning.
become aware of dance literature and career opportunities in dance.

use examples in dance that help teach concepts in the humanities, sciences, mathematics, and languages.

update skills, knowledges, and understandings of dance through classes, readings, workshops, and conferences.

**DANCE COMPONENT OF THE ARTIST-IN-RESIDENCE PROGRAM**

The Artist-in-Residence Program, funded by the National Endowment for the Arts and the Wisconsin Arts Board, places professional artists in public and private elementary and secondary schools. The purpose of the program is to involve professional artists with students, parents, and teachers in the cooperative effort to:

—develop and enrich student sensitivity to and understanding of the arts.
—provide experiences that encourage further arts programming and integration of the arts into regular school activities and into the community.

The National Endowment for the Arts began this program as an experiment in 1969 by placing artists in schools in six states. The experiment was so successful that three years later the Artist-in-Residence Program had reached all fifty states, and artists from a wide range of disciplines were participating. The Dance Component is that branch of the Artist-In-Residence Program which places movement specialists and dance companies in residence in the schools with the following objectives:

—helping students and teachers explore ways in which movement can make a unique and relevant contribution to the classroom and to the physical and emotional lives of students.
—fostering an understanding of dance as an art form.
—working to insure that dance and movement education will continue to be an important part of the school system after the residency is over.

**Sponsorship of Dance Residencies**

All elementary and secondary schools, both public and private, are eligible to become sponsors of residencies. The sponsors are evaluated on the following criteria:

—ability to provide adequate program administration and coordination.
—ability to provide sufficient space.
—ability to provide sufficient funds.

Sponsors select movement specialists and dance companies from a pool of artists available through Charles Reinhart Management, Inc. and through the Wisconsin Arts Board. They have been judged on their professional standards and the quality of their work by screening committees before becoming eligible for the program.

No two residencies will be alike. Some activities offered by movement specialists and dance companies might include: master classes in a variety of styles and techniques such as modern, ballet, jazz, improvisation, composition, ethnic; teacher in-service education programs and integration of dance into regular school activities and into the community; community involvement through classes and demonstrations; workshops in related areas such as technical theater, movement for actors, dance for musical comedy; movement for special groups such as the elderly, developmentally disabled, and gifted students; lectures, seminars, panels; student performances and demonstrations. Most dance companies conclude a residency with a full-scale performance. The impact of a residency depends upon the offerings and abilities of the dance companies and movement specialists, on extensive and imaginative planning by the sponsors of the residency, and on teacher and administrative commitment to the program.

**Funding**

The cost of a residency varies greatly according to its length and to the movement specialist and company chosen. Funding is available through the National Endowment for the Arts and the Wisconsin Arts Board. Although the specific amount of monies available through these organizations may vary from year to year, the general practice is for the Arts Endowment to provide fifty percent of the cost of the residency which is matched by state and local funds. The match may include both cash and in-kind services. Interested schools should contact the Wisconsin Arts Board for further information on available artists, application, and costs.
SCHEDULING, STAFFING AND CLASS SIZE

Dance instruction should be a part of the education of all students from kindergarten through senior high school. The way dance is scheduled into the curriculum and the amount of time devoted to it will vary greatly from one school to another. Providing the optimum amount of time for dance classes may be difficult due to competing demands on time, staff, and facilities. However, schools should allocate sufficient time to adequately implement the dance curriculum. When determining class length and frequency, consideration should be given to providing an amount of time that:

- reflects the need for classes that are of adequate length to assure proper warm-up.
- allows for the repetition necessary for learning motor skills.
- allows for completion of creative projects.
- takes into consideration the skill level, maturity, and interest of students.

Articulation of Scheduling

Careful thought must be given to the articulation of scheduling at all levels in the elementary and secondary schools. Sequential development which builds on previous experiences and provides for continuing and rigorous study in breadth and depth is needed to intelligently integrate the total dance program. This is necessary to provide challenges and to expand individual potentials and abilities at all developmental levels. Coordination, flexibility, and innovation in scheduling are needed to realize the full potential of dance education in the schools.

The Dance Specialist

When possible the dance specialist should be scheduled to teach all or most of the dance classes. No more than five hours of classes per day should be scheduled with at least one hour allowed for planning and preparation. The dance specialist will also serve as a resource to physical education, fine arts, classroom, and subject area teachers.

When the dance specialist cannot teach all of the dance classes, the responsibility for dance education may be shared by other staff members. In this case, the dance specialist would serve a greater resource function and should have more time for planning, coordinating, consulting, and assisting other staff who teach dance. An attempt should be made to schedule the dance specialist to instruct each class of students at least once a week.

Class Size

Class size influences the degree to which curriculum goals are met. The maximum class size recommended for elementary and secondary dance classes is 20 and 25 respectively. However, the nature of some dance activities may better be accommodated in larger or smaller groups and through individualized instruction.

Large group instruction conserves teaching time, makes use of audiovisual aids more efficient, and makes effective use of resource persons possible. Large group instruction includes lectures on dance history, anatomy, accompaniment for dance, lecture/demonstrations, classes in social and folk dance, master classes and performances by guest artists.

When class size remains small, greater student/teacher contact is possible. Teachers have more time to give individual corrections and explanations of anatomical differences necessary for mastery of technique. Some identifiable groups of students such as the gifted or developmentally disabled will benefit from small group environments which provide alternatives from regular classes. Since choreographic projects frequently require a large amount of space, fewer students should be scheduled into classes of this nature. Discussions of such topics as aesthetics, performances, and creativity take advantage of the greater degree of interaction that is possible in small groups.

Independent or individualized study in dance allows motivated students to explore dance and movement in ways not available in the regular curriculum. Working on choreographic or performing projects, historical research, and advanced study at private studios are examples of ways of individualizing instruction.

Additional Recommendations

- Credit for dance classes should be granted in lieu of fine art, elective, or physical education credit.
- Dance classes should be offered to meet the special needs of such groups as the gifted, talented, creative and the developmentally disabled.
Resources for extra-curricular dance activities should be available to accommodate dance clubs, musical productions, and performing groups.

PHYSICAL FACILITIES FOR DANCE - THE DANCE STUDIO

A dance studio is a space designed solely for dance activities. The dance studio should be located away from disturbing factors such as noises, odors, and traffic. It should be located near dressing, locker, and shower rooms and, if possible, near related fine arts areas and performing spaces. A minimum of 100 to 125 feet of space per student should be provided with a ceiling height from 18 to 24 feet.

Floors

A special floor is necessary for the dance studio. A "floating" floor should be constructed to provide an air space between the wood and foundation. Flooring which is adequately suspended above the foundation and the wood selected provide both the resiliency necessary to cushion landings from elevations and aids in the prevention of injuries such as shin splints, hairline fractures, and stiff and torn ligaments and muscles. A hardwood, such as northern maple, of random lengths, tongue-and-grooved, and laid with the grain going in one direction, is a good choice. Tung oil may be applied to the wood to prevent slivering and to give a finish that is neither too sticky nor too slippery.

Walls, Lighting, and Wiring

The walls of a dance studio should be relatively smooth, aesthetically pleasing, and easily maintained. They should be structurally strong enough to support the weight of mounted barres and mirrors. Natural lighting from large windows should be provided when possible along with shades or curtains to provide darkness for performances and use of audio-visual equipment. Because it is desirable to create different or unusual light environments for some dance activities, it is best to have dimmers on light switches so that the instructor can control the intensity of lighting. Heavy duty wiring, capable of meeting safety standards to carry a light board, is desirable if the instructional space is also to be used as a performing space. Numerous electrical outlets should be strategically located throughout the studio.

Office Space

Private office space adequate for the needs of the dance staff should be located in or near the dance studio. Minimal needs include desks, chairs, file cabinets, bookcases, and access to telephones and copy machines. Locked storage space is crucial for storing sound equipment, records, tapes, musical instruments, costumes, props, and scenic equipment.

Sound Equipment

Sound equipment should include a variable speed turntable, tape recorders, both reel-to-reel and cassette, an amplifier, and speakers. This equipment may be built-in or on casters. The speakers should be mounted near the ceiling and be of adequate size and quality for the space. Electrical outlets should be conveniently located for the use of this equipment. Facilities for sound reproduction are highly desirable, and soundproofing of the studio should be considered.

Mirrors and Barres

Mirrors and barres can be either portable or mounted onto the walls of the studio. The following guidelines are recommended.

Mirrors:
- mounted mirrors should be installed flush with the walls.
- portable mirrors should be on castors and be about six by eight feet in size for ease of handling.
- corner mirrors allow for movement analysis from two directions.
- mirrors should be raised six inches from the floor.

Barres:
- mounted barres should be from six to eight inches from the walls.
- portable barres should be constructed of light weight aluminum for easy mobility.
- barres should be from 34 to 48 inches from the floor depending on the height of the students who will use them.
Accessories

Adequate chalk and bulletin boards should be provided, and an area for displaying photographs is highly desirable. Reference books, tapes, and records should be readily available for student and teacher use as well as storage space for them. Racks or shelves for temporary storage of students' books and shoes would be a helpful addition.

Needs of Exceptionally Developed Programs

Although most dance specialists rely heavily on the use of records and percussion instruments for accompaniment of dance classes, well developed dance programs and programs at specialty schools would make use of a piano and accompanist. Dance programs with an emphasis on performing and touring would benefit from having a portable, linoleum floor such as a Marley floor for performances.

ALTERNATIVE SPACE

Dance can be taught in many spaces. In spite of the fact that few schools in Wisconsin have dance studios, dance education should not be neglected due to lack of optimal facilities. As dance programs continue to be developed and expanded, teachers and administrators should look for opportunities to renovate existing facilities to more adequately accommodate the dance education of their students. Existing facilities such as classrooms, multipurpose rooms, gymnasiums, and stages provide reasonable alternative spaces in which to conduct dance classes.

The basic requirements for a dance space are a clean, open, well ventilated, and quiet area. The space should be constructed, decorated, and furnished aesthetically. It should contain the essential elements, equipment and supplies in adequate number and quality for the implementation of the dance curriculum. The alternate space should have a hardwood floor which has not been laid directly over a cement or concrete foundation. Wood, tile, and carpeted surfaces on cement are too hazardous for most kinds of dance activities, especially for landings from elevations. The space should be large enough for executing locomotor movement; 100 to 125 square feet per person is recommended.

Elementary Schools

Through creativity and cooperation on the part of classroom, physical education and music teachers, dance programs at the elementary level can flourish. Classroom teachers can teach students to efficiently rearrange furniture to provide space in the classroom for dance activities. Music teachers can provide accompaniment and percussion instruments for use in dance classes. Physical education departments can allot time for the teaching of dance as part of their program as well as supplying equipment such as mats, ropes, balls, and other items which lend themselves to creative movement activities. Record players and other sound equipment can usually be borrowed from audio-visual departments or shared by several teachers.

Secondary Schools

Gymnasiums are probably the most frequently used alternative space for dance instruction at the secondary level. When this is the case, providing the minimum space recommendation of 100 square feet per person is usually not a problem. In fact, a large gymnasium may be undesirable if it is too large for teacher instructions and sound equipment to be heard. Care should be taken not to schedule other activities in adjacent areas without providing visual and sound barriers. Sound equipment, percussion instruments, portable mirrors and barres, as well as storage space for them, should be available. As in the case of elementary teachers, other departments within the school can be resources for obtaining supportive equipment for dance classes.

Additional Considerations

As dance programs are being developed and establishing their value to the total education program, careful thought must be given to providing the facilities and equipment necessary to best accommodate dance education. School budgets should reflect an awareness of these needs by investing in such items as sound equipment, tapes, records, barres, mirrors, and percussion instruments. Steps can be taken to renovate existing facilities and to construct new facilities to better accommodate the goals of dance education.
SPECIAL NEEDS

Exceptional Education

Dance, like the other arts, can enrich the lives of all students regardless of their special needs. Exceptional education students have even greater need of the rehabilitative potentials of dance and the opportunity to experience beauty in movement and the creative act.

Dance therapy is movement used for rehabilitative purposes and prescribed by a doctor/psychiatrist for physical, psychological or emotional reasons. A dance educator is not, and should not pretend to be, a dance therapist. However, dance can become a therapeutic tool in education for the reason that movement reduces physical and emotional tension. Since dance is a vehicle for the expression of ideas, feelings and emotions, it provides the teacher with a means of removing psychological blocks. It provides students who cannot express themselves effectively in a verbal way with another or an alternative means of expression. Psychiatrists have found that the physical expression of ideas is more primal than the verbal. After physical expression has emerged and a common ground for nonverbal communication between student and teacher has been established, verbal expression will frequently develop. Those students with physical disabilities can also improve their coordination, strength and flexibility through dance experiences.

RECOMMENDED KNOWLEDGES AND COMPETENCIES FOR DANCE EDUCATION TEACHERS

In 1972, the State of Wisconsin adopted a set of knowledges and competencies as criteria for dance certification. It covered undergraduate dance majors and minors, physical education majors teaching dance, dual certification for dance minors, elementary teachers and music teachers who are expected to teach rhythmic activities, dance, or movement education.

Complete certification standards governing teacher preparation and certification at the elementary and secondary level suggest the number of credits and areas of additional academic training necessary. The documents, Wisconsin Certification Standards and the skills and knowledges for dance education certification, are both available from the Wisconsin Department of Public Instruction, 125 South Webster Street, Madison, WI 53702.

In light of developing a comprehensive state-wide curriculum in dance education, former knowledges and competencies need to be re-evaluated. The following is a recommendation of standards, knowledges, and competencies to be considered for future adoption. It addresses standards for:

- Physical education majors teaching dance courses at the secondary and elementary levels should have a minor in dance or equivalent professional and/or educational experience. Preparation for teaching should include:

  1. Music appreciation, elementary music theory, dance accompaniment.
  2. A minimum of two semesters each in ballet technique and modern technique.
  3. A minimum of two semesters in two of the following areas: jazz, folk, square, social, tap.
  4. Dance history.
  5. Teaching methods in ballet, modern, folk, square, social.
  6. Curriculum development.
  7. Improvisation.
  8. Composition.
  9. Dance production or dance production experience.
  10. Interdisciplinary study in the relationship of dance to sports, or dance education to physical education.
  11. Philosophy/aesthetics of art, especially dance.
II. Art, Music, Drama Majors Teaching Dance

Art, music, and drama majors teaching dance education courses at the secondary level (7-12) should have a dance minor or equivalent professional and/or educational experience. Preparation for teaching on the secondary level should include:

1. Music appreciation, elementary music theory, dance accompaniment.
2. A minimum of two semesters each in ballet technique and modern technique.
3. A minimum of two semesters in two of the following areas: jazz, folk, square, social, tap.
4. Dance history.
5. Teaching methods in ballet, modern, folk, square, social.
6. Curriculum development.
7. Improvisation.
8. Composition.
9. Dance production or dance production experience.
10. Anatomy, Kinesiology.
11. Interdisciplinary study in the role of arts in society.
12. Philosophy and aesthetics of the arts.

III. Elementary Education Classroom Teachers In Dance

Elementary Education majors teaching dance education courses or incorporating dance education into the curriculum, K-6, should have a minor in dance or equivalent educational and/or professional experience. Preparation should include the following:

1. Dance accompaniment.
3. Dance history.
4. Improvisation, composition.
5. Teaching methods:
   Creative rhythmic movement.
   Folk and square.
   Social.
6. Curriculum development.
7. Ballet and modern technique.
8. Creative dramatics.
9. Interdisciplinary study of dance in relationship to other fields.
10. Anatomy/Kinesiology.
11. Philosophy/Aesthetics of art, especially dance.

IV. Dance Education Specialists

Dance education specialists should have a strong liberal arts education which should include study in:

- the biological, physical, behavioral, and social sciences.
- the humanities.
- the practical, theoretical, and historical aspects of the arts.
- the role of arts in civilization (society, culture).
- the growth and development of the child and adolescent.
- the nature of the teaching-learning process.
- the procedures for teacher/student evaluation.
- the development of curriculum.

Individuals who desire dance education in either level, elementary (K-6) or secondary (7-12), should have an academic major in Dance Education. Academic minors or areas of emphasis in addition to the professional education sequence are highly suggested. Areas which complement a Dance Education major include, but are not limited to:

1. FINE ARTS: Art, Communication, Drama, Music
2. BEHAVIORAL/SOCIAL SCIENCES: Cultural Anthropology, Sociology, Psychology
3. HEALTH, PHYSICAL EDUCATION, RECREATION
4. HUMANITIES: American Civilization, English, History
5. SPECIAL EDUCATION
6. NATURAL SCIENCES: Biology, Chemistry, Physics

Standards for the Dance Education specialist should include the following knowledges and competencies:

A. KNOWLEDGES:

1. Structure, neuro-muscular, and mechanical functions of the human body.
2. Ideo-kinetic facilitation of movement and bio-feedback.
3. Movement principles and concepts: time, space, energy, axial, locomotor.
5. Content, methods of implementation and evaluation for teaching dance with special emphasis on the elementary level.
6. Curriculum development.
Dance techniques and styles. ballet, modern, tap, jazz, folk, square, social, disco, ethnic.

10. Principles of Dance Production including stage crafts, public relations and advertising, music, coordination, audio manipulation.

11. Historical background and contemporary perspectives in dance.

12. Aesthetic and philosophical bases of dance.

13. Role, function and meaning of the Arts, especially Dance in civilization:

15. Interrelationship between dance and other areas of knowledge, especially the arts.

16. Role and function of media and audio-visual components for dance.

17. Labanotation and effort shape.

B. COMPETENCIES:

1. Performance of a wide variety of dance skills: ballet, modern, jazz, tap, folk, square, social, ethnic, contemporary forms in social.

2. Ability to provide the proper accompaniment for each class.

3. Ability to select and record those accompaniments appropriate to the particular dance form.

4. Use of appropriate teaching techniques in presenting dance as a creative experience as well as a learned sequence of movement.

5. Competence as a choreographer and improvisationalist.

6. Ability to direct and integrate dance into the social experience.

7. Ability to direct some technical aspect of dance production.

8. Ability to communicate the cultural function of dance in its historical and philosophical implications.

9. Demonstration of successful teaching of dance in a student teaching period on the elementary and/or secondary level. Each student should have some experience working with children prior to student teaching.

**Proposed Undergraduate Dance Education Major Curriculum**

This proposed undergraduate dance education major curriculum covers the areas addressed in recommended knowledges and competencies for dance education specialists found in this section. The number of semesters noted next to each area of study or training represents the ideal in the future of dance education training. Current undergraduate major programs in Wisconsin range from 55-90, and cover many but not all the areas listed below. Study at the undergraduate level to prepare dance education majors should have breadth as well as depth.

**SAMPLE CURRICULUM FOR DANCE EDUCATION**

1. Techniques
   a. Ballet—8 semesters
   b. Modern or contemporary concert dance—8 semesters
   c. Tap, jazz, specialty theatre forms—3-4 semesters
   d. Ethnic, folk, square—2-4 semesters
   e. Social: contemporary forms in social dance—1-2 semesters

2. Composition
   a. Creative dramatics—1-2 semesters
   b. Improvisation—1-2 semesters
   c. Choreography—2-4 semesters
   d. Dance production: formal concert preparation and presentation—2-3 semesters

3. History, aesthetics, philosophy—2-4 semesters

4. Stage crafts
   a. Light design, implementation, aesthetics—1-2 semesters
   b. Costume design, implementation, aesthetics—1-2 semesters
   c. Set design, implementation, aesthetics—1 semester
   d. Props for dance—1 semester

5. Theatre history and literature—2 semesters

6. Music theory for dancers, music appreciation—2-4 semesters

7. Dance accompaniment—2 semesters

8. Piano, voice—1-2 semesters

9. Design, 2-D and 3-D—1-4 semesters

10. Music and art history—2-4 semesters
11. Audio-visual aids and resources for dance—1 semester

12. Anatomy, kinesiology for dancers—2-4 semesters

13. Teaching methods—3-4 semesters

14. Curriculum development in dance education for the elementary and/or secondary level—2-4 semesters

15. Interdisciplinary courses relating dance to biological, social, behavioral and physical sciences and humanities—3-6 semesters

16. Effort/shape and Labanotation—4-6 semesters

17. Student teaching at the elementary and/or secondary level—1-2 semesters

Dance Production

Dance Therapy

AUDIO-VISUAL

Films for Rent or Purchase

BEHIND THE SCENES A ballet film suitable for all ages showing the difficult training of the ballet dancer. 16 mm, 24 min., sound, color; cost to be negotiated. Rental or purchase from: Mediavision, Inc., 1709 Bloor Street W., Toronto, Ontario, CANADA M6P 1B2.

BEING ME Creative dance film showing movement exploration which involves the physical, mental, and emotional self. 1969. 13 min., sound, b/w. Sale $75, rental $5. University of California Extension Media Center, Berkeley, CA 94720.

CHILD OF DANCE Little girls dancing. First part conveyed creativity while the last part appeared trite and commonplace. Probably o.k. for preschool and kindergarten though the lack of boys in the film is disturbing. Probably o.k. for teacher’s use as a reinforcement and guide to movement capacity at this age. 1970. 9 min., sound, color. Sale $140, rental $15. Film Images (Division of Radim Films), 17 W. 60th Street, New York, NY 10023, and 1034 Lake Street, Oak Park, IL 60301.

CHILDREN DANCE Boys and girls, K-3 in classroom situations. Dance improvisation filmed during regular class times. Narrated by teachers. Progression seemed confusing but the film intent was to capture spontaneity. The film would be a good reinforcement with the Dimondstein book. Intended to encourage those who want to teach dance to children in the classroom, dancers who want to teach children and educators interested in the arts. It is limited in content, but nevertheless offers a view of a place to begin. Produced and co-directed by Geraldine Dimondstein and Naima Prevots. 16 mm, b/w, sound; Sale $40, rental $5.50. University of California Extension Media Center, 2223 Shattuck Avenue, Berkeley, CA 94720.

CREATIVE SOUND AND MOVEMENT Part 3 of series of four creative dance films "Creative Dance for Children" showing Barbara Mettler’s work with children. Boys and girls ages eight to twelve. 16 mm, 18 min., sound, b/w. Cost for purchase: total series, Creative Dance for Children $350; Part 3 only, Creative Sound and Movement $110. Cost for rental: total series $54, Part 3 only $16.

DANCE ABOUT Modern dance as an educational discipline and as an art form. Nine and ten year olds—in gym, outdoors and in the classroom. Second part shows the work of the Regina Modern Dance Workshop. 16 mm, 30. min., color. Cost for purchase: total series, Creative Dance for Children $350; Part 3 only, Creative Sound and Movement $110. Cost for rental: total series $35, Part 3 only $16.

DANCE AS AN ART FORM Entertaining and instructional. Traces dance from its origins in natural gesture to its use as an art media. Series of 5 films: The Body as an Instrument, Motion, Space, Time, Shape. Dancers filmed out-of-doors and in various life situations promoting dance for everyone. Murray Louis Dancers. 16 mm, sound, color. Each 30 min. Rental $50 per
DANCE INSTRUMENT Beautifully done, highly technical. Content seems to be for the dance specialist or for the dance performer. Could be used as orientation/audience education. Five film series: The Dance Instrument, How to Move Better, Dance Design: Motion, Dance Design: Shape and Time, Dance Design: Space, Sound, Color. First film 17.3 min., 2nd film 19.7 min., 3rd film 19.1 min., 4th film 16.3 min., 5th film 18.8 min. Purchase $190 per film, Super 8 Cassette $140. From The Athletic Institute, 200 N. Castlewood Drive, North Palm Beach, FL 33408.

DANCE WITH JOY Early childhood and elementary level for teachers and psychologists. Shows a racially and socio-economically integrated group of 2½ to 4 year old children responding to the inner stimuli of music and rhythm in an experimental early childhood education program. The film emphasizes the concept that children are natural dancers when given the opportunity and that they need to be quickened from within and allowed to move in their own way. Sound, color, 13 min. Purchase $155. Rental $17.50 per day. Documentary Films, 3217 Trout Gulch Road, Aptos, CA 95003.

DANCERS IN SCHOOL Worth viewing. Gives good survey of the “Artist-in-the-Schools” Program. Shows Murray Louis, Bella Lewitsky and their companies as well as Virginia Tanner and her students in residence in public schools. Shows performances, classes for students, workshops for teachers. 1971. Color, 16 min, 28 min. Rental or purchase from Pennebaker, Inc., 56 West 45th Street, New York, NY 10036. Cost for purchase $250, rental $15.00.

LEARNING THROUGH MOVEMENT A fine film involving both boys and girls in a normal, public school situation. Produced and directed by Ann and Paul Barlin showing the exploration of movement and some large group movement by children in grades 1-6. 1967, 16 mm, b/w, sound, 32 min., rental $20. Sale $165 from SL Film, 5126 Hartwick Street, Los Angeles, CA 90041. (Also available for rental from Alverno College for $5.00. 3401 South 39th Street, Milwaukee, WI 53215 (Multimedia Center).

LOOKING FOR ME A beautiful film written and narrated by Janet Adler, produced and directed by Virginia Bartlett. Excellent for those working with disturbed children. Autism is the focus in this film. Stresses body language. B/W, sound, 30 min., 16 mm. From University of California Extension Media Center, (FN), 2223 Shattuck Avenue, Berkeley, CA 94720, 1970. Also Alverno College.

MOONMONSTER Third of series of films from the Children's Creative Dance Theatre directed by Joyce Boorman. Ages 6 and 7. The viewer sees the finished dance and then a "flashback" to the children involved in its creation, finally the finished dance again. Intended for teacher and parent education with an emphasis on the process of exploration and discovery. Color, 16 mm, 12 min. Cost $184 for purchase from Joyce Boorman, Associate Professor, Department of Movement Education, University of Alberta, G112 Education S., Edmonton, Alberta, CANADA T6G 2G5.

MOONSTARS, SUNDROPS AND RAINBEAMS The first film in the series from the Children's Creative Dance Theatre at the University of Alberta. Children ages 3 and 4. Explains the philosophy underlying the children's work I AM, I CAN, I KNOW, I FEEL, I BELONG. Rain and puddles developed from skips and jumps, small white cloud from growing, turning and sinking, stars from shapes and finally the rainbow from working with colored ribbons. The film is intended for both teacher and parent education to assist them in understanding the role and significance that dance has in the education of the young child. Color, 16 mm, 12 min. Purchase cost: $200, from Joyce Boorman, 'Associate Professor, Department of Movement Education, University of Alberta, G112 Education S., Edmonton, Alberta, CANADA T6G 2G5.

MOVEMENT IN TIME AND SPACE Primary school children in Bristol, England dance their underwater ballet. Reveals a fine sensitivity for many different types of movement. Shows the end product of dance classes rather than the process of learning and teaching, but displays very well-developed body awareness. B/W, 16 mm, 30 min. Cost for purchase $300. Rental $35 from The British Broadcasting Corporation, Film Sales, Manulife Centre, Ste. 510, 55 Bloor Street West, Toronto, Ontario, CANADA M4W 1A6.

MOVEMENT SPEAKS 11 and 12 year old boys from an English mining town who develop expressive aspects of movement under the verbal guidance of the headmaster. Particularly helpful for teachers because of the teaching approach and the fact that not all of the move-
ment results are successful. Rental $4 from Wayne State University, Systems Distribution and Utilization Department, 75440 Cass Ave-
nue, Detroit, MI 48202. 16 mm, b/w, 30 min.

PETER RABBIT A beautiful 90 min. film choreo-
graphed by Frederick Ashton. Peter Rabbit and
Tales of Beatrix Potter was filmed on the rolling
hills of Britain's Lake District and in a special
studio built to scale—from a mouse's point of
view. Color, 16 mm. Rental $100 from Bellevue
Film Distributors, #2, 1019 -417 Avenue S.W.,
Calgary, Alberta, CANADA T2T 0A7.

PREPARATION: DANCE Presents an approach
to teaching dance that embodies both creative
and pre-technical learning for children who may
wish to study ballet or contemporary dance.
Follows a group of 6 to 8 year olds of average
ability through a class. Class includes both the
purely technical method of teaching and the
wholly creative program and show how each of
the two approaches can be used within the class
structure. Uses music and poetry. Color, 16 mm,
12 min. Purchase $225, Rental $15 from Cana-
dian Filhavers Distribution.entre, 406 Jarvis
Street, Toronto, Ontario, CANADA M4Y 2G6.

QUEBEC 4, 5, 6 A beautiful illustration of awaken-
ing the senses of young children. The reactions
and movements of the children to snow, large
styrofoam pieces, percussion objects, paint,
paste, cellophane, bicycle wheels and other
noise makers are sensitively portrayed with
children's sounds without words as a back-
ground. Color, 16 mm, 20 min. Purchase $225,
Rental unknown, from Cine-Media.Ltd., 49
Bathurst Street, Toronto, Ontario, CANADA
M5V 2P2.

RHYTHMETRON Arthur Mitchell, founder of
the Dance Theatre of Harlem, explains ballet to
a group of youngsters while his students demon-
strate at the barre. It is shown to be a part of
everyday experience, neither alien nor out-of-
reach to young people. Three works are per-
formed: "Fete Noire," "Boisfera," and
"Rhythmetron." 1973, Color, 16 mm, 40 min.
rental or purchase from Audio Visual Di-
vision, McGraw-Hill Ryerson Ltd., 330 Progress
Avenue, Scarborough, Ontario, CANADA M1P 2Z5.

SKIP, SKIP, SKIP The second in the series of
films from the Children's Creative Dance The-
atre directed by Joyce Boorman at the Univer-
sity of Alberta. Shows the development of a sim-
ple rhyme: Skip, skip, skip
Curl up small
Spread way out
And roll like a ball.

SLOWLY SLOWLY Fourth film in the series of
five from Children's Creative Dance Theatre at
University of Alberta. Shows one possible way
of combining the art of poetry with the art of
creative dance. Children ages 9 and 10 work
with both Haiku and the poem "Slowly" by
James Reeves.

SURE I CAN DANCE Artists in the
Schools ... Ririe-Woodbury Co. Good over-
all introduction to dance with enthusiastic
dancers, exciting costumes and colors. Adult
dancers. Shows class work in the schools, grades
1-3, 3-4, brief middle school and special educa-
tion work. A good film to arouse interest and ex-
citement in dance and its possibilities. Con-
veyed the idea of dance for everyone. From Film
Images, 1034 Lake Street, Oak' Park, IL 60301.

TOWARDS DANCE Last of the five films in the
series from the Children's Creative Dance The-
atre. Shows two dances created for students
aged 11 to 13 years. First dance deals with the
concept of abstract designs created by the body
and its juxtapositions in and with space. The
second dance deals with the exploration of the
transitory human relationships that come about
in moments of greeting and farewell and the
more stable relationship created by unison
mood and action. Intended for upper ele-
mental and junior high school area both teach-
ers and students. Color, 16 mm, 12 min. Purchase $245 from Joyce Boorman, Associate Professor, Department of Movement Education, University of Alberta, G112 Education B., Edmonton, Alberta, CANADA T6G 2G5.

WHAT IS RHYTHM Natural rhythms in the environments, rhythms made by movements of people, animals, and objects. Animations which explain beats, accents, phrases are shown simply and directly. 16 mm, color, 11 min. From Bailey-Film Associates, 11559 Santa Monica Boulevard, Los Angeles, CA 90025.

Films at No Cost

The following is a list of motivational films which are short and frequently available from local public libraries and state universities at little or no cost. They can be used effectively to motivate creative movement responses through an understanding of the relationships between dance and language arts, visual arts, humanities, and music.

ART AND MOTION 17 min., sound, color. Sale $167.50 from Encyclopedia Britannica Educational Corporation, 425 North Michigan Avenue, Chicago, IL 60611. Rental $8 from University of California, Extension, Media Center, Berkeley, CA 94720.

DANCE SQUARED 1963. 4 min., sound, color. Sale $65, rental $6 from International Film Bureau, 332 South Michigan Avenue, Chicago, IL 60604.

FANTASY OF FEET 1970. 8 min., sound, color. Sale $120 from Encyclopedia Britannica Educational Corporation, 425 North Michigan Avenue, Chicago, IL 60611.

HOO HA 1967. 5 min., sound, color. Rapaport Co. (Monroe), 175 West 72nd Street, New York, NY 10023.

IMAGES FROM NATURE 1962. 7 min., sound, color. Rental $3.60 from Indiana University Audio-visual Center, Bloomington, IN 47401.

LITTLE BLUE AND LITTLE YELLOW 1962. 11 min., sound, color. Sale $125, rental $10 from Contemporary Films/McGraw-Hill, 330 West 42nd Street, New York, NY 10036.

The most complete list of dance films up to 1969 may be found in the April 1969 issue of Dance Magazine.

Recording Companies

The companies listed provide records for folk, ethnic, and children's creative dance. (Send for catalogs.)

BOWMAR, 622 Rodier Drive, Glendale, CA 91201.

DANCER'S SHOP, Children's Music Center, 5373 W. Pico Boulevard, Los Angeles, CA 90019.

EDUCATIONAL ACTIVITIES, INC., P.O. Box 392, Freeport, NY 11520 (Kimbo Educational Records also included.)

FOLKWAYS/SCHOLASTIC RECORDS, 907 Sylvan Avenue, Edgewater Cliffs, NJ 07632.

HOCTOR EDUCATIONAL RECORDS, Waldwick, NJ 07463.

RCA RECORDS, Radio Corporation of America, 1133 Avenue of the Americas, New York, NY 10017.

S & R RECORDS, 1609 Broadway, New York, NY 10017.

YOUNG PEOPLE'S RECORDS, c/o Living Language, 100 6th Avenue, New York, NY 10013.
Recordings for Dance at Elementary Level

CHILDREN’S CORNER SUITE, Debussy. Columbia. Mono and Stereo #MS-6567. Six piano pieces utilizing a variety of rhythmic and melodic qualities.

ELECTRONIC MUSIC, Philips. Stereo #PHS 600-047. Best for upper grades.

ELECTRONIC RECORD FOR CHILDREN, THE, Dimension 5 Records, Box 185, Kingsbridge Station, Bronx, NY 10463. Stereo #E-141. Such selections as “Upside Down” and “Spiders” would be useful for creative movement experience.

FIDDLE FADDLE, RCA. Stereo #LSC-2638. Popular arrangements by Leroy Anderson such as Syncopated Clock and Plink, Plank, Plunk.

IN SOUNDS FROM WAY OUT, Perry-Kingsley. Vanguard Records. #VRS-9222. Short selections with an obvious beat. Could be used for humorous movement exploration which change bodily shapes or isolated use of body parts.

LISTEN AND MOVE SERIES, McDonald 7 Evans, Ltd., 8 John St., London, WC1. Four records (Green label). Percussion rhythms and piano music. Laban approach to movement.

MUSIC FOR RHYTHMS AND DANCE, Vol. #4, Freda Miller Records for Dance, 13 Bayview Avenue, Northport, NY 11768. Former accompanist and composer for Hanya Holm, the late Freda Miller has written these excellent compositions for basic and dramatic movement. Movement ideas are suggested.

MUSIC OF EDGAR VARESE, Columbia. Mono and Stereo #MS-6146. Best suited to upper elementary grades because of the complexity of both sound and rhythmic variations. Selections are long but this music can be used to initiate movement exploration. Wind, brass, and unusual percussion.

P CORN BY HOT BUTTER, Musicor Stereo. #MS-3242. Eleven selections by moog synthesizer and other instruments. Recognizable melodies. Today’s music.

SPACE SONGS, Motivation Records, Division of Argo/Py Music Corp. #MR-0312. Singing science record for elementary level. A good opportunity to integrate science and dance.

Recordings for Dance at the High School Level

AFRO RHYTHMS, Montego Joe. Kimbo. LP 6060.

AFRICAN HERITAGE DANCES, Mary Joyce Strahlenbichler. Activity Record AR 36.

BACH’S GREATEST HITS, Swingle Singers. Philips PHS 600-097.

BALLETT KLASS, Roni Mahler. Statler Records. Pre-ballet No. 1032

BALLETTMELODIES, Mottovani and Orchestra. LL1525 London.

BASIC DANCE TEMPOS, Educational Activities, Inc. LP501-A For floor technique and locomotor movement.

BAREFOOT BALLET, John Klemmer—ABCD—ABC Records 950.

DANCE CLASS WITH PETER GENNARO, Kimbo. LP9065.

FLOATERS, by Floaters. ABC Records. AB1030.

FREDA MILLER RECORDS FOR DANCE, (2, 3, 4) Department A. Box 383, Northport, NY 11768.

Album 2 A Includes: changes in tempo—technique suggested combinations and patterns.

B A technique study “The Fable of the Donkey” may be used as a finishing project.

A “Dance Project” may be used as a concert piece for individuals or group creativity.

Side 1 B Composition and Improvisation. Polonaise, Waltz, Abstraction, Unison, and a Hebraic melody based on the story of Ruth (Alien Corn).

Album 3 A Studies for Composition excellent for all levels. Aids in technique and understanding of tempo and variations. Included: Western Dance. Theme and Variation (of “Three Blind Mice”), American, Antique and Modern Dances.

B A composition to use for choreography and creativity. Music “Time out for a Dream” original, but can be used for other ideas and “stories.”

Album 4 1. Music for Rhythms and Dance

GREEN ONIONS AND BEHAVE YOURSELF, Stax S127. Used for composition.

GWEN VERDON PREPARES TO MOVE, Kimbo LP9091.

HOT SHOT, giant. single. West End Records. WES 12111B

ICARUS, Paul Winter; Winter Consort. Epic Records. KE 31643.

IMPROVISATIONS FOR MODERN DANCE, Sarah Malamente. GB 599.

JAZZ CLASS, Art Stone. Statler No. 1057 & 1058.

JAZZVILLE, Statler No. 1008.

LET THERE BE DRUMS and QUITE A BEAT, Imperial Records 5775. For composition.

LISTEN TO THE CITY, Tim Weisberg. A & M Records. SP 4545.

MISSISSIPPI GAMBLER, Herbie Mann. Atlantic Records. SD 1610.

MODERN INTERPRETIVE, BIRTH OF THE BEAT & DRUMS ARE MY BEAT, Imperial 5809.

MODERN JAZZ EXERCISE MOVEMENTS, London and Harris. LP 3030.

MOVIE SOUNDTRACKS: Wiz, Cabaret, West Side Story, Guys and Dolls, Mame, Bubbling Brown Sugar, Porgy and Bess.

MUSIC FOR MODERN DANCE, Bradshaw Beall. Kimbo LP 6090.

OREGON—IN CONCERT, Vanguard Records. Oregon; VSD 79358.

PATTERNS IN JAZZ, by Robin Hocter. HOP 4200.

RITE OF SPRING, THE; Stravinsky. RCA Victor. LM 2085. (A growing piece of music.)

SONGS IN THE KEY OF LIFE, Stevie Wonder. TAMLA T13-34C2.

SWAN LAKE, Tchaikovsky. RCA LM 1003.

VIRTUOSO GUITAR MUSIC, by John Williams. Columbia ML 6096.

WEATHER REPORT, Columbia Record's: Stereo. C30661. Middle or high school.

WILLIAM TELL OVERTURE, any recording of it.

VIDEOTAPES

ARTS IN EDUCATION, A thirty-minute video program depicting and discussing the value of the arts as an educational process. No fee. Available from the Art Supervisor, Wisconsin Department of Public Instruction.

CREATIVE MOVEMENT FOR CLASSROOM TEACHERS, Part 1, Children ages 5-7 present space and shape concepts and an overview of creative movement for classroom and music teachers. There is a stress on language arts skills to be learned through movement experiences. B/W, 60 min. Available on 3/4” cassette or 1/2” reel-to-reel videotape. Must be specified. Rental $30 per tape, purchase $240 a pair. Parts 1 and 2 from Division of Continuing Education, University of Montana, Missoula, MT 59812.

CREATIVE MOVEMENT FOR CLASSROOM TEACHERS, Part 2, Presents concepts of time and energy with 5-7 year olds in the classroom. See particulars above.

I AM ME, Virginia Tanner's work with children of all ages who are stimulated by rhythms created by the names of vegetables and fruits, colors and the blending of dyes, by music and shapes they observe around them every day. Color, 30 min. Purchase $45 from K.U.E.D. Channel 7 Video, 101 Music Hall, University of Utah, Salt Lake City, UT 84112.

MOVEMENT COLOURS THE WORLD

Move-in Your Own Way   Make a Song
Sing it or Fling It    Working with
Around and About       Film
Watch a Poem            Eat a Poem
Rules Aren't Always Real Act and React

Attempts to show how a total movement understanding, using many senses, affect our whole being and can show children how different aspects of the curriculum interrelate. It should also stimulate an attitude in them to be creative, inventive and arouse their curiosity about many dissimilar ideas. Color, 30 min. each, 3/4” cassettes, rental $5 each, per showing, from Communications Media Distribution Unit, Social Science Building, Room 102, The University of Calgary, Calgary, Alberta, CANADA T2N 1N4.

NOW I AM THREE #1, Shows a group of 3 and 4 year olds in their first dance class with Joyce Boorman establishing a trusting relationship with her to the point that they are released to explore movement in a completely free environment. B/W, 30 min. Purchase $20 plus shipping from Audiovisual Media Department, Faculty of Education, University of Alberta, B117 Education N., Edmonton, Alberta, CANADA T6G 2G5.

NOW I AM THREE #2, Shows children of 3 and 4 years old after having had 12 weeks of classes, each 30 min. in length, and the progress they have made with the same teacher as the #1 videotape. Shows the necessity for breaking down conceptual challenges, circumnavigated and repeated so as to facilitate better learning. See particulars for ordering under NOW I AM THREE #1.

THE PEDDLER AND HIS CAPS, or Creative Dance for Children to Watch. University students in a curriculum and instruction course in Creative Dance by Joyce Boorman are challenged to choreograph dances for a child audience. Assignments include "The Peddler and His Caps," "The Gunny Wolf," "Miss Muffet,"

SUPPOSE YOU MET A WITCH. An ideal videotape for student, teachers and those teachers looking for ideas for integrating creative dance and classroom subjects. It shows a class of 4th grade children working creatively with the story of a witch in movement, language development, and art. Individual parts of the story are explored in movement, then part selected and combined to create the story as a whole. Taught by Jean Cunningham from the University of British Columbia, CANADA. B/W, 20 min. Purchase $24, rental T.B.A., from Faculty of Education, Audio-visual Department, University of British Columbia, Vancouver, B.C., CANADA V6T 1W5.

BOOKS

Aesthetics, Philosophy and Appreciation

Brown, Jean Morrison, editor; The Vision of Modern Dance, Princeton, New Jersey: Princeton Book Company, 1979. Selections of writings from 21 creators of modern dance from Duncan to Limon to Pilobolus. The articles reveal not only how the revolution of modern dance was born and has constantly renewed itself, but gives a feeling for the different stylistic qualities and priorities of each succeeding generation.

Siegel, Marcia B., At the Vanishing Point. A Critic Looks at Dance, New York: Saturday Review Press, 1972. The dance critic herein presents the progress of dance from 1967 to 1971. Her writing is extremely enlightening to the reader and should help the dance teacher to grasp the essence of dance more clearly.

The Shapes of Change: Images of American Dance, Boston: Houghton Mifflin Company, 1979. A look at the development of American dance through the themes major choreographers have chosen to explore and through the forms and styles of movement they have created. Siegel analyzes more than forty landmark dances, relating the works to their social and historical content.

Watching the Dance Go By, Boston: Houghton Mifflin Co., 1977. Valuable from a historical and aesthetic point of view. It is a selected collection of reviews covering the years from 1972-1977. Ms. Siegel is one of the most prominent American dance critics.
Dance for Children

Carroll, Jean and Peter Lofthouse, *Creative Dance for Boys*, London: MacDonald and Evans Ltd., 1969. This book would be particularly helpful to those wishing help in teaching boys.

Dimondstein, Geraldine, *Children Dance in the Classroom*, New York: Macmillan Publishing Co., Inc. 1971. Provides a form which unifies underlying concepts and instructional procedures and at the same time allows for the unpredictable responses from teachers and children that will emerge from the discovery process. It is written for potential elementary classroom teachers, practicing elementary and preschool teachers, and private teachers of dance to young children. Includes lesson plans using concepts dealing with time, space and force.

Fleming, Gladys, editor: *Children's Dance*, Washington, DC: American Association for Health, Physical Education and Recreation, 1973. A significant research project executed by a task force made up of some of the most outstanding dance educators in the country. It includes philosophy, examples of model programs on various levels for boys as well as girls, folk and ethnic dance, dance as art, making dances, and future directions of dance in education.

Fleming, Gladys Andrews, *Creative Rhythmic Movement, Boys and Girls Dancing*, Englewood Cliffs, NJ: Prentice-Hall, Inc., 1976. A very practical and helpful book especially for the beginning teacher. It includes age characteristics of the growing child, the nature of creativity and rhythmic movement, the content of movement, recordings of what the teacher says with the student responses for several grade levels, original songs for use in teaching, how to develop movement from kindergarten on up, how to get started, chants, dance songs, folk dances and how to make dances.

Dance Composition

Hayes, Elizabeth,*Dance Production for High Schools and Colleges*. New York: A.S. Barnes, 1955. Emphasizes the nature of the creative act, various means for increasing aesthetic awareness, creating with form and evaluating the dance composition. It makes suggestions for the teacher for designing the dance experience. Finally, there is a discussion of accompaniment and program planning, illustrations, and an appendix of original piano music for dance composition.

Dance in Secondary School

Turner, Margery J. *Modern Dance for High School and College*. Prentice-Hall, Inc., 1957. Approaches the teaching of modern dance as a required subject to those students disposed to dislike activity. Includes lesson plans that were most successful in capturing their interest. Condensed to show an approach to creative teaching.

**Effort/Shape**

Davis, Martha. *An Effort/Shape Movement Analysis of a Family Therapy Session*. New York: Dance Notation Bureau, 1973. (Formerly titled Methods of Perceiving Small Group Behavior.)

**Film Anthologies**

Programming Aid from Commercial Television, Albany: The State Education Department, Bureau of Mass Communications, 1977. Up-to-date listings of commercial video tapes for sale on dance, art, drama, ethnic culture, film, literature, music, poetry, science. Useful for schools or districts to purchase current items on video. Most of the material presented in the guide has been aired on PBS-TV.

Extension Media Center, University of California, Berkeley, CA Catalogue of dance films for rent or sale.

Film Catalogue, Instructional Media Library, University of California, Los Angeles, Catalogue of dance films and many others for rent or sale.

Folk, Social, Square and Ritual Dance

Ellifeldt, Lois and Virgil L. Morton, This is Ballroom Dance. Palo Alto, CA National Press Books, 1974. "Covers leading, following, styles, short history on each dance, and it is easy to read and follow."

Kraus, Richard, Folk Dancing. New York: The Macmillan Company, 1962. Excellent source book for those who teach folk dancing since it includes a wide variety of dances organized in such a way as to be very helpful. The classified list of dances according to nationality, formation, level, and steps used is most useful in planning learning units and lessons.

Lidster, Miriam D, and Dorothy H. Tamburini, Folk Dance Progressions. Belmont, CA. Wadsworth Publishing Company, Inc., 1965. (Should be a newer edition out.) Gives source and background material for the Philippines, Balkans, Israel, and Scandinavia—as illustrative of four cultures separated by distance yet closely related in the motives from which their folklore arts were developed. Chapter on rhythm and music, dance, descriptions of 120 ethnic dances arranged by 1) walking dances, 2) dances containing grapevine patterns, 3) the schottische and dances based on a similar 4/4 meter sequence and pattern, 4) the two-step and the polka, 5) the three step or running waltz step and other triple meter dances, and 6) pattern and exhibition dances.

Ortegel, Adelaide, A Dancing People, West Lafayette: Indiana Center for Contemporary Celebration, 1976. Spotlights dance as a vital art form, and an authentic faith expression that is accessible to everyone.

History

Cohen, Selma Jeanne, ed., Dance as a Theatre Art, source readings in dance history from 1581 to the present. New York: Dodd, Mead and Company, 1974. Edited by the foremost dance historian in U.S. today: Takes the reader from the court ballet to recent rebels in the evolution of theater dance.

Doris Humphrey: An Artist First, Middletown, CT: Wesleyan University Press, 1972. A fascinating book on the professional and personal
life of Doris Humphrey who made outstanding contributions to the early years of modern dance both as a performer and a teacher, but most especially as a choreographer.

deLaban, Juana, ed., *Institute of Court Dances of the Renaissance and Baroque Periods*, CORD (Committee on Research and Dance), 1972. An extension of *Dance History Research: Perspectives from Related Arts and Disciplines*, a 1970 publication. Labanotation analysis of these dances with their music is stressed along with the dances.

Ellfeldt, Lois, *Dance: From Magic to Art*, Dubuque, IA: W.C. Brown Company, 1976. Cuts across the broad use of the word “dance”, identifying its rise from ceremonies of magic, through its other manifestations, to dance as a performing art. Relevant for dance theory classes, history classes and developing overall sense of what dance is about.

Emery, Lynne Fauley, *Black Dance in the United States from 1619 to 1970*, Palo Alto, CA: National Press Books, 1972. Katherine Dunham says of this book, “... we are acquainted with the history of black dance, but we also know much more about the enslaved and the enslavers, the psychology of colonialism, and the nature of those who have danced their way out of poverty and racial prejudice into the opera houses and concert halls of the world.”

bits and pieces of Martin's aesthetic concepts are to be found throughout. Well illustrated. Not documented.

McDonagh, Don, The Rise and Fall and Rise of Modern Dance. New York: Outerbridge & Dienstfrey (Dutton), 1970. Even if one does not think modern dance "fell," and some of the inaccuracies of fact in this book may annoy one, there is enough on dance theory to reward one for taking the time to read it. Provides sympathetic treatment of experimental dance.

Woodruff, Dianne, Essays in Dance Research, New York: CORD (now Congress on Research in Dance), 1978. The first two chapters are of historical significance. The first dealing with August Bournoiville (ballet), Gertrude Hoffman (1907-1909), and Ruth St. Denis. The second deals with laban analysis and effort/shape in historical research.

Kinesiology, Anatomy, Therapy, Health.

Arnheim, Daniel D., Dance Injuries, Their Prevention and Care, St. Louis: The C.V. Mosby Company, 1975. Is designed to be used as a text for a course in kinesiology and prevention and care of dance injuries. Also provides immediate source of advice on what to do now and what to continue doing for an injury.

Gelabert, Raoul, Anatomy for the Dancer With the Exercises to Improve Technique and Prevent Injuries, 2 vols, New York: Dance Magazine, 1964. Instruction offered to encourage proper use of dancer's body in preventing injury, body conditioning exercises to build strength, elastic-
ity and flexibility are given as preparation for all dance types.

Sweigard, Lulu E., Human Movement Potential: Its Ideokinetic Facilitation, New York: Dodd, Mead & Company, 1974. Focus of book is on interdependence of postural alignment and the performance of movement. Provides an educational method which stresses the inherent capacity of the nervous system to determine the most efficient neuromuscular coordination for each movement.

Music and Dance

Lang, Paul Henry, Music in Western Civilization, New York: W.W. Norton, 1941. One of the most influential music history texts ever produced in America.

Sachs, Curt, Rhythm and Tempo, New York: W.W. Norton, 1953. Discusses history of musical rhythm chronologically and geographically with chapters devoted to music of “primitive” peoples, music of near and far east, early Christian and Medieval periods, Renaissance, Baroque, Classical, Romantic, and Contemporary (up to 1930’s) times, India, ancient Greece and Rome. Excellent introductory remarks on “rhythm”.

Production

Lippincott, Gertrude, ed., *Dance Production*, AAHPER, 1201 16th Street, N.W., Washington 6, DC. A compilation of twelve articles on various aspects of dance production in educational institutions with emphasis on planning and rehearsing a dance program, staging (both arena and proscenium), costumes especially for the stage, music selection, make-up, lighting, decor, notation and photography for publicity.

Stein's *Makeup for the Profession*, 430 Broome Street, New York 13, NY: Stein Cosmetic Co. Helpful booklet describing techniques of applying make-up: Guide to selecting type and shade of foundations, linings, powders. May be had free upon writing to the company.

Cut of Men's Clothes 1600-1900, London: Faber and Faber, Ltd., 1964.

Relating the Arts

Montgomery, Chandler, *Art for Teachers of Children*, Columbus, OH: Charles E. Merrill, 1968. Special section on movement and dance, relates dance and art through space, design, focus and motion.

Porter, Evelyn, *Music through the Dance*, New York: Scribners, 1938. A handbook of dance forms with some emphasis on how musical development has been influenced by dance.
Technique

Hammond, Sandra Noll, Ballet Basics, Palo Alto, CA: National Press Books, 1974. Covers ballet history, how a ballet class is set up, barre work, center work, allegro; very good for thorough definition of terms and how to go about teaching them. Covers basic anatomical considerations.

Schurman, Nona and Sharon Leigh Clark, Modern Dance Fundamentals, New Jersey: Prentice-Hall, Inc., 1964. Book attempts to do three things: 1) to present simple, basic exercises in dance form for the beginner student or teacher; 2) to introduce these exercises with Labanotation; 3) to suggest the possible use of this material in a school situation in planning a well-balanced technique class or a class in improvisation.
