The first of six sections in this manual outlines a series of steps to be followed when an emergency or problem occurs. These procedures are divided into four categories: (1) behavioral emergencies, i.e., bomb threats, building takeover, problem patrons, or thefts; (2) building emergencies, i.e., elevator failure, fire, flooding of building/water leaks, power failure; (3) medical emergencies, i.e., animal bites, death, drug or psychiatric problems, or fumes (possibly toxic); and (4) weather emergencies, i.e., heavy rain/icy conditions or tornados. Sources of assistance are listed in the second section under emergency organizations, which include emergency medical services, the fire department, hospitals, the infirmary, and security. Library floor plans in the third section indicate the location of fire alarms, fire extinguishers, and fire stairs. The remaining sections provide a listing of members of the Library Executive Council with their home and office telephone numbers, a telephone directory of library administrators and emergency services, and a key word index to the manual. Emergencies and Problems: A Procedures Manual for Trinity University Library consists of six sections:

Section One records a series of steps to be followed when an emergency or problem occurs. Some steps can be carried out simultaneously by several people; others must be completed in sequence. In all cases, common sense should be the deciding factor as to when and by whom any or all steps are to be implemented.

For convenience, this section is subdivided into several emergency areas: Behavioral, Building, Medical, and Weather. Each emergency area has an alphabetical breakdown by subject.

Section Two reports information on those organizations which may become involved with library emergencies or problems.

Section Three presents floor plans of the library, and notes locations of fire alarms, fire extinguishers, and fire stairs.

Section Four lists the permanent members of the library's Executive Council, together with their office and home telephone numbers. These members may be of assistance during an emergency.

Section Five serves as a telephone directory of all persons and organizations referred to in this manual.
Section Six is an index of key words and, as such, a quick guide to pertinent information.

ANIMAL BITES

A. RABIES DANGER

In all cases of animal bites, there may be the danger of rabies. Be aware that rabid animals may have the disease in either the "furious" or the "dumb" form. "Furious" rabies is characterized by agitation and viciousness, followed by paralysis and death. Inability to swallow causes drooling of saliva. In "dumb" rabies, paralytic symptoms predominate and are first manifested by a dropped lower jaw.

FUMES, POSSIBLY TOXIC

A. GENERAL INFORMATION

Carbon monoxide poisoning would be the chief cause for concern in the library. Carbon monoxide is present in manufactured utility gas sometimes used for heating. Natural gas is the type chiefly used by city gas supplies and utility companies. However, on occasion, manufactured gas may be added to the natural gas. As a result of faulty equipment or carelessness, carbon monoxide fumes may escape and create a dangerous situation.

B. KNOW THE SYMPTOMS

The symptoms depend upon the concentration of carbon monoxide in the air. They are as noted:

1. Headache
2. Irritability
3. Shortness of breath
4. Chest pain
5. Dizziness
6. Nausea

MEET SECURITY/EMERGENCY OFFICIALS AT THE MAIN ENTRANCE OF THE LIBRARY
7. Fainting

The lips and skin may be bright red. If exposure is continued, mental deterioration, stupor, unconsciousness, and death will follow.

C. **IMMEDIATELY NOTIFY THE SENIOR MEMBER ON DUTY AND AWAIT ORDERS**

Monday - Friday, 8:00 A.M. - 5:00 P.M., the senior member will most probably be in the Director's office (X-8122); at all other times, in the Reference Department (X-7213 or 7214). If, however, you are that member, follow instructions in D, below.

5. Other pertinent data
6. Your name and telephone number

E. **CLEAR THE AREA**

If ordered by Security, evacuate the building. Sound the
"closing bell", and assist patrons from the library. Be aware of the location of emergency exits. Security will help in removing handicapped persons. If safe, check all areas before leaving.

Include:

1. A.V. Rooms
2. Conference Rooms

4. Name and telephone numbers of those who required medical assistance

5. Officials notified

6. Action taken

7. Other pertinent data

8. Your name and telephone number
A. ACCIDENTS

Do not be lulled into a false sense of security by the impression that accidents do not occur in libraries; they do. Often, these are falls on stairs or on the same level, falls caused by wet floors, loose sections of carpeting, telephone cords, open file drawers. High heels, long hair, jewelry, razor blades, sharp pencils, hot fluids, paper cutters, frayed electrical wires are also potential sources of accidents. In case of an accident, follow instructions below.

B. NOTIFY THE SENIOR MEMBER ON DUTY AND AWAIT INSTRUCTIONS

Monday - Friday, 8:00 A.M. - 5:00 P.M., the senior member will most probably be in the Director's office (X-8122); at all other times, in the Reference Department (X-7213 or 7214). If, however, you are that member, follow instructions in C.

INSECT STINGS

A. WATCH FOR ALLERGIC REACTIONS

1. An acute, often explosive, systemic reaction may occur in a person after an insect sting. Typically, in 1 to 15 minutes, the person complains of a sense of uneasiness and becomes agitated and flushed. Rapid heartbeat, itching, throbbing in the ears, coughing, sneezing, and difficulty in breathing are other significant symptoms. These reactions and signs of shock may develop within another 1 or 2 minutes, and the person may become unresponsive, incontinent, convulse and die.

2. Ask the person if he has had previous reactions. If he carries emergency medicine, be sure he takes it at once.

B. IF AN ALLERGIC REACTION APPEARS TO BE TAKING PLACE, CALL SECURITY (X-3301) IMMEDIATELY

Report the following and await instructions:

1. Nature of the problem
2. Symptoms
3. Location (name of the library, floor, room)

MEET SECURITY/EMERGENCY OFFICIALS AT THE MAIN ENTRANCE OF THE LIBRARY
4. Your name and telephone number

C. NOTIFY THE SENIOR MEMBER ON DUTY AND WAIT FOR ORDERS

5. Officials notified
6. Action taken
7. Other pertinent facts
8. Your name and telephone number
MEDICAL PROBLEMS

A. NONTRAUMATIC ILLNESS

Fainting may occur in persons who have no evidence of any underlying disease—the basic problem being decreased circulating of blood volume caused by increased pooling of blood in dilated peripheral vessels. The person involved will often treat himself since almost invariably he will assume the recumbent position when fainting occurs.

Altered states of consciousness, ranging from mild confusion to profound coma, could also occur in certain conditions. The most likely to be encountered include:

1. Cardiovascular Disease (Heart Attacks)
2. Cerebrovascular Accidents (Strokes)
3. Convulsions (Epilepsy)
4. Diabetic Coma
5. Hypoglycemia (Insulin Shock)
6. Metabolic Coma
Such acute medical emergencies could result in death or disability if no care is provided within the first hour.

If the person is able to speak, ask him his name and whether he has a medical problem. If he is unconscious, check for MedicAlert data—emergency medical identification in the form of a necklace, bracelet, or wallet card. Such identification can alert others to health problems, special conditions, or procedures to follow in case of a medical emergency.

B. NOTIFY SECURITY (X-8301)

If medical assistance is required, contact Security and report the following:

1. Nature of the problem (symptoms)
2. Location (name of the library, floor, room)
3. Other pertinent data
4. Your name and telephone number

C. NOTIFY THE SENIOR MEMBER ON DUTY AND AVOID INSTRUCTIONS

times, in the Reference Department (X-7213 or 7214). If, however, you are that person, follow instructions in B.

D. **FILL IN AN INCIDENT REPORT AS SOON AS POSSIBLE**

Submit the completed report to the Library Director. Note the following:

1. Description of the incident
2. Location (name of the library, floor, room)

EMERGENCY ORGANIZATIONS

At some time in the future, you may have dealings with the organizations noted below. The following information should help you gain an understanding of their various functions and of how they support and complement one another:

A. EMERGENCY MEDICAL SERVICES (EMS)

Emergency Medical Services (EMS) refers to all of the services used in responding to the need for immediate medical care. Many human and physical resources are employed in a predetermined sequence during the medical emergency. These resources and their responses to medical emergencies in a defined geographic area make up a community EMS system.

On campus, do not call the San Antonio EMS; call Security (X-8301) since it is their responsibility to contact EMS, as well as to provide assistance.

B. FIRE DEPARTMENT

Fires should be reported to Security (X-8301). Do not call the San Antonio Fire Department. Security (Trinity University's Department of Security and Traffic Control) will not only contact
the nearest fire station, but will, also, direct the firefighters to the scene.

C. HOSPITALS

Since Trinity's Infirmary is open 24 hours a day, it is, of course, recommended that this service be used for noncritical medical emergencies. Addresses and telephone numbers of the nearest hospitals are provided for general information purposes. These hospitals are:

a. Baptist Memorial Hospital
   111 Dallas
   (9) 222-8431

b. Northeast Baptist Hospital
   8811 Village Drive
   (9) 653-2330

D. INFIRMARY (UNIVERSITY HEALTH SERVICES: X-8111)

As noted in C, above, the Elizabeth Rhea Infirmary will take care of noncritical medical emergencies, but it has been established to deal primarily with students' medical problems on a continuing basis. For noncritical medical emergencies, report the problem
and follow the nurse's instructions. The Infirmary is located on the ground floor of Myrtle Hall.

E. SECURITY (X-8301)

Trinity University's Department of Security and Traffic Control provides 24-hour security coverage for the university. This department has both commissioned peace officers and noncommissioned security personnel on its staff. The Security Office is located in the Cobb-Racey Building, southwest of Trinity University Library. For all emergencies, dial X-8301.

Security is the first line of help in any emergency. This office has contact with the police, the fire department, hospitals, infirmary, and EMS. In addition, the office has oxygen equipment and its personnel can offer assistance in emergency situations.

In summary, Security is the first organization to be contacted! Only when something prevents this office from responding immediately should the other emergency organizations be contacted directly.
