This handbook is designed to assist teachers, administrators, counselors, and others involved in identifying, assessing, and placing limited English proficient (LEP) students in vocational education programs. The handbook consists of four sections. The first section offers a series of suggested approaches and procedures to use in identifying LEP students. Section 2, describing the referral process, includes steps and suggestions for designing or using referral guidelines in local educational agencies. Section 3 provides suggestions and procedures for assessing LEP students in the following areas: English language proficiency; native language proficiency; vocational interest, vocational aptitude/skills; career awareness; educational achievement; and cultural adjustment. Section 4 describes some major ways of using assessment data, including counseling, placement, instructional planning, student's progress, and administrative planning. Included at the end of this handbook are resource documents (such as a summary report on student cumulative records or home language survey forms), abstracts of tests, references, and a bibliography. **TABLE OF CONTENTS**

**INTRODUCTION**

- Purpose and Target Audiences ........................................... 3
- Organization of the Handbook ......................................... 4
- Definition of Terms .................................................... 6

**SECTION I: IDENTIFICATION**

- Review Local Public School Bilingual Census Data ............. 11
- Review ESL Enrollments ............................................... 12
- Review the Student's Cumulative Record ......................... 13
- Informal Interview With Student .................................... 15
- Survey Key People ..................................................... 16
- Direct Observation of Student Performance ....................... 17
- Screen Student at Registration ...................................... 18

**SECTION II: THE REFERRAL PROCESS**

- Referral Guidelines ................................................... 20
- Referral Process Steps ................................................ 22
- Completing Referral Forms .......................................... 23

**SECTION III: ASSESSMENT**

- Who should be responsible for collecting information and data on the LEP students? ........................................... 26
- What kinds of information and data should be collected to get a comprehensive assessment of the LEP student's performance? ...................................................... 27
- Proficiency in Oral/Listening Comprehension of the English Language .......................................................... 30
- Proficiency in Reading English ...................................... 32
- Proficiency in Writing English ...................................... 36
- Multiple Skills .......................................................... 39
- Proficiency in the Native Language ................................ 41
- Vocational Interest ..................................................... 43
- Vocational Aptitude/Skills ........................................... 48
- Career Awareness ....................................................... 52
- Educational Achievement ............................................. 55
- Cultural Adjustment .................................................... 58

**SECTION IV: USES OF ASSESSMENT INFORMATION**

- Counseling ............................................................... 62
- Placement .................................................................... 63
- Instructional Planning ................................................ 64
- Evaluating Students' Progress ........................................ 65
- Administrative Planning .............................................. 66

Special acknowledgements are extended to several individuals who provided valuable input toward the development of this handbook. Special gratitude and recognition is extended to the panel of 12 authorities in the field of vocational education for limited English proficiency students who served as reviewers for the preliminary draft of this handbook. Their thorough critiques and wise recommendations have been exceedingly helpful in the refinement of this handbook. Special appreciation is expressed to each of the persons below who served on this panel and who each provided invaluable expertise, help and encouragement:

Jerry Crabtree  
Black Hawk College

Sharon Full  
Illinois State Board of Education, Department of Adult, Vocational and Technical Education

Juan Gonzalez  
University of Illinois

Margaret Kang  
Illinois State University

Michael Kelley  
Waubonsee Community College

Jeanne Lopez-Valadez  
Bilingual Education Service Center

Jose Martinez  
Illinois State Board of Education, Bilingual Education Section

Francisco M. Ortiz  
Benito Juarez High School

Ron Pearlman  
Northwest Educational Cooperative

Peter Seidman  
Illinois State Board of Education, Department of Adult, Vocational and Technical Education

Rudolph Troike  
University of Illinois

In order to ensure the appropriateness and usability of this document for the audience for whom it was developed, five local educational agencies (LEAs) in the State of Illinois generously consented to pilot test the handbook. The individuals in these LEAs who participated in the pilot test provided helpful suggestions that have been of great value, and sincere thanks are extended to these individuals from the following LEAs for their professional contribution to this effort:

Black Hawk College  
Moline, Illinois

Senn High School  
Chicago, Illinois

Benito Juarez High School  
Chicago, Illinois

Triton College  
River Grove, Illinois

Danville Area Vocational Center  
Danville, Illinois

Special appreciation is also expressed to the clerical staff, Alicia Bollman and Lilian Del Barco, who have performed so efficiently on the many tasks required in the development of this handbook.
The number of limited English proficiency (LEP) persons in the United States has become a major issue in justifying programs, passing legislation and obtaining funds. The non-English language background (NELB) population is projected to increase from 28 million persons in 1976 to 30 million in 1980, 34.7 million in 1990, and 39.5 million in the year 2000 (Inter-America, 1980).

According to the Survey of Income and Education (SIE) conducted by the U.S. Bureau of the Census, Spring, 1976, persons whose native language is other than English have not experienced a high level of economic or occupational success. Unemployment rates are high for those whose native language is not English.

The improvement of employment opportunities for persons whose native language is other than English should be a major goal of vocational education. In order for vocational education to meet the needs of LEP populations an increase commitment is needed on the part of vocational educators to prepare persons of limited English proficiency to perform adequately in an environment requiring English language skills and to fill the critical need for more and better trained persons in occupational categories vital to both the persons and the economy.

The Vocational Education Amendments of 1976 (P.L. 94-482) specify that vocational education should be made accessible to individuals of all ages in all communities (Federal Register, October 3, 1977). Priority is placed on providing special assistance to persons for whom the need is most acute--the handicapped, disadvantaged, and the limited English proficiency.

Progress has been made, yet many persons with limited English proficiency still need to be served by vocational education. In the State of
of Illinois, vocational education programs at the high school, adult, and community college levels have provided thousands of students with marketable job skills over the past years. However, in spite of these efforts by the State of Illinois, Lopez-Valadez (1979) stated that:

a significant portion of the population remains virtually unserved by vocational education programs. This group consists predominately of persons of limited English speaking ability (LESA), (p. 1)

In its implementation of P.L. 94-482, the Illinois State Board of Education, Department of Adult, Vocational and Technical Education (ISBE/DAVTE) requires that each local educational agency (LEA) requesting additional funding for serving special needs students establish a system to identify these students in their vocational programs. Each local education agency must also indicate annually in its One and Five Year Plan for Vocational Education special assistance to be provided to handicapped, disadvantaged, and limited English proficiency students (Illinois State Board of Education, 1981).

The School Code in Illinois (1976), Article 14C entitled Rules and Regulations for Transitional Bilingual Education requires:

School districts with attendance centers with 20 or more children of limited English speaking fluency who share a common home language to provide and maintain a program of transitional bilingual education. Districts with fewer than 20 may continue to provide bilingual education programs on a voluntary basis.

A transitional bilingual education program includes courses and/or subjects required by law and the LEA, native language arts, English-as-a-Second Language (ESL), the history and culture of the students enrolled in the program, and the history and culture of the United States.

The Illinois State Board of Education requested that LEAs develop standardized procedures to determine student eligibility and program participation Transitional Bilingual Education Programs. Therefore, local edu-
cational agencies in Illinois developed uniformed statewide procedures for
data collection and program administration. The components include:
Public School Bilingual Census; Program Application; Student Cumulative
Record; and Annual Program Report.

Laws requiring that limited English proficiency (LEP) learners be
identified and provided services appropriate to their needs have had a
tremendous effect on vocational education. These laws affect program-
planning, evaluation, reporting and funding, and accountability at federal,
state, and local levels.

Establishing identification and assessment processes has become a
difficult task for local education agencies throughout the state. The
guidelines and criteria established by the State of Illinois are stated in general terms so that schools and community colleges can establish their own systems of identification and assessment.

PURPOSE AND TARGET AUDIENCES

This handbook is designed to assist teachers, administrators,
counselors, and others involved in identifying, assessing, and placing
limited English proficiency (LEP) students in vocational education pro-
grams. For example, ESL, bilingual, and vocational teachers may find
this handbook useful in becoming familiar with the ISBE/DAVTE identifi-
cation criteria for LEP students and in identifying educational achieve-
ment tests that are available to use with LEP students. Counselors may
find this handbook useful in identifying vocational interest tests and
vocational aptitude tests that are available to use with LEP students.
Administrators will find this handbook useful in developing inservice
workshops to improve the identification and assessment of LEP students in their programs. These are only a few examples of how this handbook can be used.
The overall intent of the procedures, techniques, and resources presented in this handbook is to give information which will assist local educational agency personnel in developing and/or improving procedures in the identification and assessment of LEP students in vocational education programs.

ORGANIZATION OF THE HANDBOOK

This handbook consists of four sections. The first section offers a series of suggested approaches and procedures to use in identifying LEP students. This first section includes the following identification activities: A Review of Local Public School Bilingual Census Data, Review of ESL Enrollments, A Review of Student's Cumulative Records, Informal Interview with Student, A Survey of Key People, Direct Observation of Student's Performance, and Screen Student at Registration. Section II describes the referral process. This section includes the referral process steps and suggestions for designing or utilizing referral guidelines in local education agencies. Section III provides suggestions and procedures for assessing LEP students in the following areas: English Language Proficiency, Native Language Proficiency, Vocational Interest, Vocational Aptitude/Skills, Career Awareness, Educational Achievement, and Cultural Adjustment. Section IV describes some major ways of using assessment data. These uses include: Counseling, Placement, Instructional Planning, Student's Progress, and Administrative Planning. Also included at the end of this handbook are Resource Documents, Abstracts of Tests, References, and Bibliography.

The identification and assessment process for LEP persons presented in Figure I, page 5, has been developed for this handbook and includes the four major components listed above. In addition, the organization of the handbook is designed to help follow this process.
Identification and Assessment Process for LEP Persons

Section I
IDENTIFICATION
- Review Local Public School Bilingual Census Data
- Review ESL Enrollments
- Review the Student's Cumulative Record
- Informal Interview with Student
- Survey Key People
- Direct Observation of Student Performance
- Screen Student at Registration

Section II
THE REFERRAL PROCESS
- Referral Guidelines
- Referral Process Steps
- Completing Referral Forms

Section III
ASSESSMENT
- Proficiency in Oral/Listening
  Comprehension of the English Language
- Proficiency in Reading English
- Proficiency in Writing English
- Multiple Skills (Listening, Speaking, Reading, and Writing English)
- Proficiency in the Native Language
- Vocational Interest
- Vocational Aptitude/Skills
- Career Awareness
- Educational Achievement
- Cultural Adjustment

Section IV
USES OF ASSESSMENT INFORMATION
- Counseling
- Placement
- Instructional Planning
- Evaluating Student's Progress
- Administrative Planning
DEFINITION OF TERMS

1. **Limited English Proficiency (LEP)** - refers to any member of a national origin minority who does not speak or understand the English language in an instructional setting well enough to benefit from vocational studies to the same extent as a student whose primary language is English (Illinois State Board of Education/Department of Adult, Vocational and Technical Education, 1981). (Note: LESA and LEP are used interchangeably in this handbook.)

2. **English-as-a-Second Language (ESL)** - refers to the teaching of English to persons whose native language is not English (Bilingual Vocational Education Project, 1979).

3. **Identification** - refers to a preliminary method of distinguishing from the general population students who are from a non-English background and may possibly be limited English proficient.

4. **Assessment** - refers to evaluation using diagnostic tools and techniques to gather pertinent information of the informational, manipulative and/or attitudinal potential or performance of a student. (Gemmill, 1979)

5. **Evaluation** - refers to the collection of information and judgements to facilitate planning, to aid in the improvement of programs, and to meet accountability demands. (Wentling, 1980)

6. **Referral** - refers to part of the process used by LEAs to determine the LEP student's eligibility for services and specific services that may be needed. Depending upon LEA procedures, referral may occur before or following the identification process.
SECTION I: IDENTIFICATION
SECTION I: IDENTIFICATION

The federal definition of Limited English Proficiency (LEP), when used with reference to an individual means:

1. Individuals who were not born in the United States or whose native language is a language other than English; or

2. Individuals who come from environments where a language other than English is dominant or where a language other than English has had a significant impact on their level of English language proficiency and by reason thereof have sufficient difficulty speaking, reading, writing or understanding the English language so that they are denied the opportunity to learn successfully in classrooms where the language of instruction is English. (Federal Register, October 3, 1977).

The Illinois State Board of Education/Department of Adult, Vocational and Technical Education, further specifies that a person with Limited English Proficiency (LEP) means:

Any member of a national origin minority who does not speak and understand the English language in an instructional setting well enough to benefit from vocational studies to the same extent as a student whose primary language is English. Some examples of national origin minorities are Mexican, Portuguese, Vietnamese, Chinese and Puerto-Ricans. The chief administrative official shall determine the method and the staff persons responsible for making the identification. Substantive evidence of Limited English Proficiency (LEP) condition must be kept on file.

Limited English Proficiency persons vary in the degree of English proficiency in the areas of understanding, speaking, reading, and writing. To assist in student identification and in delivery or services, the following levels of English language proficiency, developed by the Illinois State Board of Education, Bilingual Section may be used:

1. The individual does not speak, understand, or write English, but may know a few isolated words or expressions.

2. The individual understands simple sentences in English, especially if spoken slowly, but does not speak English, except isolated words or expressions.

3. The individual speaks and understands English with hesitancy and difficulty. With effort and help, the student can carry on a conversation in English, understand at least parts of lessons, and follow simple directions.
4. The individual speaks and understands English without apparent difficulty but displays low achievement indicating some language or cultural interference with learning. (Illinois State Board of Education/Department of Adult, Vocational and Technical Education, 1981)

To ensure effective vocational programs for limited English proficiency populations, vocational education teachers, counselors, administrators, and program planners must identify and locate them. In this section, we will present a series of suggested approaches and procedures to use in the identification of LEP students.

The identification of limited English proficiency (LEP) students could occur at several points: prior to the student's actual participation in the vocational course, or during the first two to three weeks of student participation, or self-identification by student or during recruitment of students into a vocational program (adult and community college level). Since law requires that LEP learners be identified and provided services appropriate to their needs, and the Illinois State Board of Education/Department of Adult, Vocational and Technical Education (ISBE/DAVTE) requires certain identification information from the education district in order to reimburse the district for serving students with limited English proficiency, your administrator may ask you to identify the number of LEP students presently enrolled in your program. In addition, you will need information on the general LEP population characteristics (e.g., number of LEP students, languages spoken, English proficiency, vocational interest) in order to design support services needed, develop resources, design placement criteria, and refer LEP students for assessment and services. Therefore, you may want to consider the following suggested activities to help you in the identification of LEP students:

A. Review Local Public School Bilingual Census Data. (Appropriate for high school)
B. Review ESL enrollments. (appropriate for high school and community college)

C. Review the student's cumulative record. (appropriate for high school and community college)

D. Informal interview with student. (appropriate for high school and community college)

E. Survey key people, such as previous teachers, parents, counselors and the student being considered. (appropriate for high school and community college)

F. Direct observation of student performance. (appropriate for high school and community college)

G. Screen student at registration. (appropriate for high school and community college).

While each approach and procedure is treated separately in this section in actual practice, a combination of strategies should be used in identifying an LEP student or population.
SUGGESTED IDENTIFICATION ACTIVITY
Review of Local Public School Bilingual Census Data

A. Review of Local Public School Bilingual Census Data

The Public School Bilingual Census which is conducted every year (Resource Document #1) has been designed to identify all non-English language background students (K-12) and to distinguish which of these students are eligible for program participation in transitional bilingual education programs. Students are classified according to language, in one of three columns. (refer to Resource Document #1, Page 69).

Column A is provided for students with non-English language background who are attending classes at the local educational agency. Column B is provided to distinguish those students reported in Column A whose English proficiency level is below average in aural comprehension, speaking, reading or writing in English. Column C is provided to distinguish those students reported in Column A whose English proficiency level in aural comprehension, speaking, reading and writing is equal to or above average. By comparing vocational enrollments with students in Column B, a vocational program can identify students with limited English proficiency.

In addition, the Bilingual Census provides the number of LEP students needing assistance and the different language(s) spoken.

In order to conduct the census, each local educational agency must have developed a written district procedure for the identification of students of limited English proficiency. The procedure details the manner in which students are identified as having a non-English language background. The procedure also details the instruments that are used to determine English language achievement and states the average achievement for students whose first language is English. This is done to establish a local comparison for the non-English background students.

The Public School Bilingual Census information is available at the district superintendent's office and at each local educational agency. This information can be requested from the building principal at anytime to help in the identification of limited English proficiency students enrolled in vocational courses.
SUGGESTED IDENTIFICATION ACTIVITY: Review of ESL Enrollments

B. Review of ESL Enrollments

A vocational education program can identify students with limited English proficiency by obtaining a list of names of students enrolled in ESL classes and then comparing them with students enrolled in vocational education classes. In many instances ESL personnel can also help in identifying which of their students are receiving vocational education.
C. Review of the Student's Cumulative Record

The cumulative file review is an efficient means for obtaining information and data on a student. Student records are usually easy to access since the information is commonly located in a central place and can usually be reviewed in one setting. While the information contained in the student's file will vary among educational districts, two types of information are typically collected:

1. Basic demographic and educational progress data describing:
   - Student's and parent's names and addresses
   - Student's age
   - Student's educational progress (grades completed, transcripts, attendance and achievement evaluations).

2. Other data usually found in a student's folder includes test results and other verified information useful to the school for planning the student's educational program:
   - Hearing and vision screening reports
   - Medical history
   - Results from standardized academic achievement, psychological, language, aptitude and interest tests (See Identification Section for further information and names of tests).
   - Systematic observations and counselor ratings.
   - Competence charts provided by previous teachers.
   - Family background information (e.g. marital status, number of children in family, occupations).

SUGGESTED IDENTIFICATION ACTIVITY:
Review of the Student's Cumulative Record (Cont'd)

3. When reviewing the student's file, answers to the following questions should be sought:

- Has/is the student receiving ESL or bilingual assistance?
- What specific abilities, interests and strengths of the student have been noted?
- What appears to be the most significant problems likely to affect the student's performance in a vocational setting?
- What activities in the past have been conducted to correct these problems and what have been the results?
- What specific needs of the learner can be dealt with by the vocational instructor and which may require special assistance?

Resource Documents #2a, 2b, 2c, and 2d are samples that can be used for recording key information obtained from the record review. It is important that local school district policy on the confidentiality of student records be determined before completing a record review form.

In summary, a review of the student's record may be especially helpful in providing information on language background, detecting existing language problems, determining the length of time in the United States, determining the number of years of schooling the individual has had in the United States, and identifying the services being received. In addition, provide background information on the recently observed problem area(s).

Resource Document #2a:
Summary Report on Student Cumulative Record. (Page 72)

Resource Document #2b:
Summary Report on Student Cumulative Record. (Page 73)

Resource Document #2c:
Summary Report on Student Cumulative Record. (Page 77)

Resource Document #2d:
Summary Report on Student Cumulative Record. (Page 80)
SUGGESTED IDENTIFICATION ACTIVITY:
Informal Interview with Student

D. Informal Interview with Student

The point of the informal interview with the student is to elicit "natural speech" from the speaker (student), and to maintain a brief conversation that will allow the interviewer to form a global evaluation of the participant's language proficiency. Since the purpose of this assessment is to obtain a global measure of language proficiency, the interviewer need not focus on specific aspects of the language, such as mastery of the irregular past tense or subject-verb number agreement, or control of the fricatives. This technique involves orally questioning the student. The following steps may be taken:

1. Put the student at ease
2. Introduce yourself and let the student introduce him/herself.
3. Start by asking questions that require simple answers:
   - How old are you?
   - Where do you live?
4. Proceed by asking the student more open-ended questions:
   - Tell me about your first day in the U.S. (if student is from another country)
   - Do you watch television? Tell me about your favorite T.V. program
   - Do you like American food? How is it different from the food in your country?
   - Why did you choose to study in this area of specialization?

SUGGESTED IDENTIFICATION ACTIVITY: Survey Key People

A paper and pencil survey or questionnaire may also be used to assess the potential LEP student when an interview is not appropriate. Specifically planned questions may be asked and the questionnaire may be mailed or administered to persons most familiar with the student's interest, competence, and educational performance. This may include the student, the parents, the counselor and the student's most recent instructor(s). The following are example questions that can be answered with this kind of survey by the different persons:

1. What language is used most often at home? (Parents)
2. What language do you use most often with your friends? (Students)
3. When spoken to in English, the student responds in what language? (Counselors)
4. When asked questions in class, this student responds in what language? (Instructors)

Resource Document #3a provides sample Home Language Surveys (in 6 different languages) to help identify limited English proficient students. Resource Document #3b provides a sample instrument for identifying limited English proficiency students. These questionnaires are provided as examples of formats that can be adapted by an LEA to help identify students of limited English proficiency. These questionnaires can be used by having the respondents answer the questions orally or in writing, whichever is more appropriate under given situations. It is important to remember that many times the students and/or their parents cannot read English, therefore, the questionnaires will have to be written in and/or translated into their native language. If the questionnaires are translated from English to the student's native language it is important to have a person who is fluent in the student's native language to check for accuracy of the translation.

Resource Document #3a: Home Language Survey Forms. (Page 82)
Resource Document #3b: Sample Instrument for Identifying LEP Students. (Page 89)
**SUGGESTED IDENTIFICATION ACTIVITY:**
Direct Observation of Student Performance

**Resources**

**F. Direct Observation of Student Performance**

Observation of the student in the classroom and/or informal setting can provide highly accurate, detailed and verified information about the student.

During observations the observer (teacher, aide, counselor) simply observes the learner in a given setting and takes notes of the behaviors, characteristics, and personal interaction that appear significant. After recording notes for a period of time, the observer analyzes the information and then draws conclusions. Along with problem areas, the observer should also identify the learner's strengths. This information will later be helpful in developing appropriate instructional programs for the learner. An LEP learner characteristics rating scale is included in Resource Document #4a to assist with describing students that appear to be limited English proficient.

Resource Document #4b provides a form that can be used to write a narrative description of the LEP student using the data collected on the learner characteristics rating scale. The description should recognize the problem area and strengths of LEP students so necessary steps can be taken in planning and implementing effective vocational programs for these students.

---

SECTION II: THE REFERRAL PROCESS
SECTION II: THE REFERRAL PROCESS

Once a limited English proficiency student has been identified by the vocational teacher, counselor, school administrator, and/or other (depending on your LEA), the student should be referred for further assessment including eligibility for support services. This process is called the "referral process".

The referral process consists of the stages and personnel involved in verifying the need for a vocational student to receive special support services such as bilingual tutoring, native language instruction, Vocational English-as-a-Second Language (VESL), etc. A referral should be made after the vocational teacher, counselor, aide, etc. has identified and described the characteristics of the potentially limited English proficiency students not succeeding in class and why. Resource Documents: #5a, 5b, and 5c (page 95) show sample flow charts of referral processes that can be adapted to use for LEP students. Resource Document #6 (page 98) present a step-by-step intake assessment and referral process that can be used for LEP students in a community college setting.

The personnel involved with the student should identify and use the referral process established by the local educational agency (LEA). Occasionally, no guidelines are available. The following paragraphs include suggestions for utilizing or designing referral guidelines for your LEA.

1. Analyze the referral process and decide what specific student information is necessary. Become familiar with any restriction placed on the referring person (i.e., parental permission).

2. Identify the "contact personnel", which are the persons responsible for determining the eligibility of the referred LEP student for special support services. These individuals may include guidance counselors, school administrators, vocational education supervisors, vocational resource teachers, bilingual or special language instructor, a special needs
liaison person, an established review committee composed of representatives from the school and district and a school psychologist depending on your local educational agency.

3. Analyze the referral form for completeness. Resource Documents #7a, 7b, 7c, 7d, and 7e (Page 100) present typical referral forms that can be adapted to use for LEP students.

Acceptable referral forms should include the following:

(a) name, address, age, birthdate, sex, school grade placement and program of student;

(b) name, address(es), occupations and phone number(s) of parents, or guardians;

(c) date on which the referral form is submitted;

(d) name and title or referring person(s), including teachers, parents and community services personnel;

(e) reason for the referral including a detailed description of the student's specific problems;

(f) strengths of the learner;

(g) special services the student is already receiving;

(h) recommendations for special services/programming;

(i) name(s) and title(s) of the contact personnel; and

(j) disposition of the referral.

In adherence with the schools' guidelines, the personnel involved should complete the referral form and route the form to the appropriate contact personnel. The contact personnel generally determines the eligibility of the student for special services, and communicating this information to other appropriate individuals.

Each referred student is assessed using the appropriate techniques. Assessment assists the determination of the student's eligibility for special services and provides information for program planning and implementation.

After assessment, a decision is made about the disposition of the referral. The procedure to be followed may be further specialized.
testing, counseling, or a special instructional plan depending on the LEA and level (e.g., secondary, adult) of students being served.

In summary, the referral process steps include:

1. Identify and describe the potential limited English proficiency student.
2. Review the referral procedure, contact personnel and forms.
3. Complete the referral form.
4. Route the referral form to appropriate personnel.
5. Participate in the decision-making process.
6. Follow up on the disposition of the referral.

COMPLETING REFERRAL FORMS

Directions: Read the Case History on page___ Then complete the referral form below. Fill in all items clearly and concisely. Use your LEA's form, if available.

Student's Name __________________ Age ___ Birthdate ______
Address __________________ Sex ___ Grade Placement ___

____________________________________________________________________
____________________________________________________________________
Chu Li is a sixteen-year-old (7/9/__) Oriental male student who entered the 11th-grade automotive program on September 5, 19__. Chu lives at 902 H. Street, Anytown, Maryland.

Within the first week it became obvious that Chu was experiencing language difficulties. His speaking vocabulary seems limited to "yes, no, here," and he appears to have difficulty understanding classroom instruction. He has failed the first two unit exams, but seems interested in automotives and has good fine motor skills.

A second concern is Chu's social isolation. He is not interacting with other students and keeps to himself through class and lunch periods, though his classmates have tried to include him in their activities.

Chu's parents were contacted on September 19, 19__ (567-7900). The mother, Mrs. Sing Li, explained in broken English that they had arrived in this country from Taiwan in June, 19__ and asked that the father Chou Li, be contacted at his work place, the Bendix Corporation, where he is employed as an assembly line worker (627-9500 x25). The father was contacted on the same day and expressed a concern about Chu's problems in the automotive program. Mr. Li indicated that he would support the school's efforts in any way and confirmed Chu's high interest in the automotive field.

Chu's cumulative folder contained little information about his educational history except that he had attended a technical school in Taiwan. His guidance counselor, Mr. Jones, suggested that a referral be made on Chu for academic and vocational assessment and language development.

A referral was made on September 20, 19__.

Ms. Jane Mann
Automotive Teacher

SECTION III: ASSESSMENT
SECTION III: ASSESSMENT

There may be instances when the vocational instructor will identify and refer the LEP student in need of special assistance. In other instances the LEP student will have been classified as an LEP student long before enrollment in a vocational course. In both situations, however, a comprehensive assessment of the learner's current levels of language proficiency, vocational aptitudes and interests, and educational skills is needed, in order to: 1) help with vocational placement, and 2) determine the instructional and special assistance needs of the LEP student such as language training, vocational support services/tutoring/materials, and ancillary services. Since the student is enrolled or will be enrolled in a vocational course, the vocational instructor should be involved in the assessment planning procedures as well as language/ESL teacher and a bilingual resource person.

The purpose of this section is to suggest and examine several different strategies and approaches for assessing LEP students.

Before a comprehensive assessment of the LEP student performance is conducted, the following decisions will need to be made:

A. Who should be responsible for collecting information and data on the LEP students?

Since the purpose of collecting assessment information and data is to determine the instructional and special assistance needs of the LEP student, the student's instructor(s) should play a key role in this process. If, for example, an LEP student is being considered for, or enrolled in a regular vocational course, the counselor, the bilingual, English-as-a-Second Language, vocational education instructors should be working together to determine the LEP
student's needs. Or, if an LEP student with other known disadvantages and handicaps is enrolled in a regular vocational course, the vocational instructor and the appropriate resource person or persons (e.g., remedial reading instructor, bilingual counselor, special education teacher, special student service counselor, ESL instructor) should be in close communication regarding the learner's needs and progress. The instructors and the resource person(s), along with the help of an administrator and a guidance person, could begin this process by determining the adequacy of existing LEP student performance information. If additional assessments are determined necessary, this team can decide how and when these assessments are to take place and by whom.

One of the most common practices for determining the persons responsible for collecting student performance information is by means of a staffing conference. Once the LEP student has been referred and the student's records reviewed by the appropriate persons (e.g., vocational counselor, vocational teachers) depending on the specific LEA, this person may call a staffing conference with the LEP student's instructors, the specialist(s) concerned with the referred problem and/or the student. The goals of this staffing are: (1) to discuss the student's referred problem(s), (2) review existing student performance information, (3) determine whether further assessments are needed, and if so, (4) identify the strategies for collecting this information, and (5) determine whether existing programs and services will meet the needs of this particular student.

B. What kinds of information and data should be collected to get a comprehensive assessment of the LEP student's performance?

Since the basic purpose of the assessment information and data is to make judgements and determine the instructional and special assistance
needs of the LEP student, information on the performance in the following areas should be considered:

1. Proficiency in Oral/Listening Comprehension of the English Language.
2. Proficiency in Reading English.
3. Proficiency in Writing English.
4. Multiple Skills (Listening, Speaking, Reading and Writing English).
5. Proficiency in the Native Language.
6. Vocational Interest.
7. Vocational Aptitude/Skills.
8. Career Awareness.
10. Cultural Adjustment.

Strategies, tests, and procedures for obtaining information and data for each of the areas of assessment are suggested in this section. While each assessment procedure is treated separately in this section in actual practice, a combination of procedures should be used in assessing and LEP student or population. It is also important not to rely on the results of only one test.
1. AREA OF ASSESSMENT: Proficiency in Oral/Listening Comprehension of English Language:

Purpose for assessing proficiency in oral/listening comprehension of English language:

A. To determine at what oral proficiency level the student is functioning in the English language and to determine if the student comprehends the English language.

B. To determine the extent to which a student's limited oral/listening comprehension of the English language will effect the successful participation in the vocational education program. (To determine if the student's English is adequate to comprehend lectures in the vocational course.)

C. To determine instructional and special assistance needs related to oral English language proficiency of the student.

Suggested assessment activities:

A. Observations.

B. Interviews.

SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Proficiency in Oral/Listening Comprehension of English Language

<th>A. Observations</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>See Identification Section - F. Direct Observation of Student Performance. (Page 17)</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| B. Interviewing    | The point of the oral proficiency interview is to elicit "natural speech" from the speaker (student), and to maintain a brief conversation that will allow the interviewer to form a global evaluation of the participant's language proficiency. The primary purpose of this face-to-face interview is to give the student an opportunity to demonstrate, in a realistic conversation situation, the extent of the student's spoken mastery of the language, as well as his/her ability to understand the spoken language. The interviewer must make every effort to put the student at ease, to engage him/her in the topics of conversation, and to lead him/her in gradual stages up to his/her maximum level of speaking fluency. (See Resource Document #8a):

Since the purpose of this assessment is to obtain a global measure of language proficiency, the interviewer need not focus on specific aspects of the language, such as mastery of the irregular past-tense or subject-verb number agreement, or control of the fricatives. Rather, by carefully following the proficiency descriptions provided in Resource Document #8b, the interviewer can give a global rating on each of the five aspects of language: accent, grammar, vocabulary, fluency, and comprehension. The following steps may be taken:

1. Put the student at ease.
2. Introduce yourself and let the student introduce him/herself.
3. Start by asking questions that require simple answers:
   - How old are you?
   - Where do you live?

Resource Document #8a: Oral Placement Test. (Page 107)
**SUGGESTED ASSESSMENT ACTIVITIES**

**Area of Assessment:** Proficiency in Oral/Listening Comprehension of English Language (Cont'd)

<table>

</tr>
<tr>
<td>- What is your favorite kind of food?</td>
</tr>
<tr>
<td>- Why did you choose to study in this area of specialization?</td>
</tr>
</tbody>
</table>

**C. Use English-as-a-Second Language Oral Tests**

A formal interview using ESL oral tests can be administered to get a meaningful understanding of the student's level of oral language proficiency. These tests are usually individually administered and takes between 10-20 minutes. They not only produce pre-/post-test information, but also can provide useful diagnostic information. If time permits, it is helpful to note and record weaknesses the student may have (i.e., pronunciation, structure) upon completion of the tests. This information is helpful in developing classroom instruction. Also, taping the interview may be helpful.

Another method of obtaining an oral interview score is through the administration of bilingual tests. These tests can be administered quickly and efficiently and provide evaluation of student's performances in accent, vocabulary, grammar, fluency, and listening comprehension.

2. AREA OF ASSESSMENT: Proficiency in Reading English

Purposes for assessing proficiency in reading English:

A. To determine the extent to which the student's reading level will effect his successful participation in the vocational course.

B. To determine instructional and special assistance needs related to the student's reading level.

C. To determine and/or adapt reading materials for the student to successfully participate in the vocational course.

Suggested assessment activities:

A. ESL Reading Tests.

B. Cloze Testing

C. Teacher Developed Tests.
### SUGGESTED ASSESSMENT ACTIVITIES

**Area of Assessment:** Proficiency in Reading English

#### A. English-as-a-Second Language Reading Tests

ESL Reading Tests for native speakers of English are not appropriate or useful for limited English proficient learners until they reach the intermediate level or until their scores on these tests will have some meaning for placement or instructional planning. Reading test for LEP students are virtually non-existent with the exception of tests available for the advanced student. Abstracts of Tests C cites some reading tests which are more commonly used. These tests are mostly designed for native speakers of English. The reading tests for native English speakers included here can be easily adapted for LEP students by reading aloud for the student.

#### B. Cloze Testing

The Cloze testing procedure is commonly used with limited English proficient students in assessing readability of a selection as well as reading ability. This procedure is individually developed and the reported scores (percent or total correct) can be used.

Cloze testing is an easy efficient method of testing readability of a passage. See Resource Document #9.

SUGGESTED ASSESSMENT ACTIVITIES

Area of Assessment: Proficiency in Reading English (Cont'd)

Resource Document #10a provides instructions for a Cloze Test and Resource Document 10b provides a sample of a Cloze Test. An explanation of Cloze testing and the scoring procedures should be given to students before actual testing.

C. Teacher Developed Tests

Teacher developed reading tests are usually constructed by the teacher to evaluate the student's proficiency in reading English (see Resource Document #11 and #12). As noted earlier often times a specific test which is commercially available is not satisfactory to use with limited English proficient students. Furthermore, it is at times desirable to adapt an existing test or developed a new one based on local program goals and/or materials.

Some general suggestions for developing a test to use with LEP students are provided below:

- Test items should be taken from the material used in the classes.

- Materials should be surveyed; a sampling of simple through complex items which are taken from the beginning, middle and end of each instructional textbook and/or instructional material should be included.

- If students have been exposed to any learning situation which has utilized printed materials to reinforce oral work, students can answer orally or in written form, questions they have read in addition to answering questions they have only heard.

- Explicit instructions should be included for the test administrator and/or scorer. Such areas as materials needed to give the test, number of people needed to administer the test, time required to give the test, standards and criteria for scoring individual answers and the complete test, and a scoring key to place at an appropriate instructional level should be covered in the instructions. Other areas may also need to be included.

3. AREA OF ASSESSMENT: "Proficiency in Writing English"

Purposes for assessing proficiency in writing English:

A. To determine the English writing skills of the student.

B. To determine the extent to which the student's English writing skills will effect the successful participation in the vocational course. (To determine if the student will be able to complete written assignments required by the vocational course.)

C. To determine instructional and special assistance needs related to the student's English writing skills.

Suggested assessment activities:

A. ESL Writing Tests.

B. Writing Sample.

C. Filling Out A Registration or Application Form.
SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Proficiency in Writing English

A. English-As-A-Second Language Writing Tests

English-as-a-second language writing tests and written grammar tests can provide valuable infor-
mation concerning the writing skills of an LEP student. The ESL written grammar tests can in
many cases serve as diagnostic tools because specific grammatical structure items can be
analyzed on an individual bases and appropriate instructional techniques can be selected as a
result. Also many of these tests have different English language proficiency levels appropriate
for beginning, intermediate, or advanced.

B. Writing Sample

Writing samples can also provide valuable infor-
mation concerning the writing skills of an LEP
student. Included in the Resource Document #13a
is a procedure for evaluating writing samples.

1. Two procedures for obtaining a writing sample
can be done as follows:

   • Allow students to see a picture or visual
     stimulus of some kind. Use a picture of a
tool or machine related to the student’s
vocational program.

   • Ask students to describe the stimulus in 25
     minutes writing as much as they possibly
can during this time.

5. English Language Skill Assessment in a Reading
   Context (ELSA) (Page 184)

Resource Document #13a: Evaluation of Student Writing. (Page 129)
SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Proficiency in Writing English (Cont'd)

2. Ask students to choose one of the following topics for writing one or two paragraphs:
   - The job I would most like to have five years from now.
   - Jobs that are available in the United States.
   - Benefits that are received by working.

3. Ask students to plan their ideas for five minutes.

4. Ask students to develop their ideas in one or two paragraphs.

5. Ask students to review the paragraph(s) they wrote and correct any mistakes they have.

6. Tell students they have 30 minutes.

7. Tell students their writing will be evaluated for grammar, vocabulary, paragraph organization, logical development, and quantity of writing.

   The composition evaluation procedure presented in Resource Document #13b will elicit a score that can be used as part of the total assessment program. Furthermore, the writing sample remains as a part of the student's permanent record. This information can be later recalled by the classroom instructor for instructional purposes.

   A final writing sample can be administered as a post test to provide a measure of achievement, as well as future placement data.

C. Filling Out A Registration of Application Form

   See Identification Section - G. Screen Student at Registration. (Page 18)
4. AREA OF ASSESSMENT: Multiple Skills (Listening, Speaking, Reading, and Writing English)

Purposes for assessing multiple skills:

A. To determine an overall picture of the student's linguistic ability.

B. To determine the extent to which the student's English speaking, listening, reading, and writing skills will affect the successful participation in the vocational course.

C. To determine instructional and special assistance needs related to the student's English speaking, listening, reading, and writing skills.

Suggested assessment activities:

SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Multiple Skills (Listening, Speaking, Reading, and Writing English)

A. English-As-A-Second Language Multiple Skills Tests

ESL Multiple Skills Tests generally function as "mini" batteries of tests, examining more than one skill area. Listening, speaking, reading, or writing components are generally included. However, careful consideration of the usefulness and appropriateness of each of the components must be given when selecting such tests.

Often times, they are designed for a specified level of students (intermediate minimally) or their individual components have questionable validity. On the other hand, these ESL multiple skills tests may be the choice to produce more comprehensive assessment data.

Resources

Abstracts of Tests

F. TESL Multiple Skill Tests.

1. Language Assessment Scales. (Page 186)
2. Language Assessment Battery. (Page 186)
3. Comprehension English Language Test (CELT). (Page 187)
4. Michigan Test of English Language Proficiency. (Page 188)
5. Orientation in American English Placement Test. (Page 188)
5. AREA OF ASSESSMENT: Proficiency in the Native Language

Purposes for assessing the native language:

A. To determine at what level the student is functioning in the native language and to determine if the student comprehends the native language.

B. To determine if instructional materials in the student's native language are needed in order for the student to successfully participate in the vocational course.

C. To determine in what language (native or English) the student is more proficient.

Suggested assessment activities:

A. Interviews.
B. Observations.
C. Writing Sample.
D. Use Native Language Tests.
SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Proficiency in the Native Language

A. Interviewing

The interviewer may follow the same procedures as stated for conducting an interview for oral/listening comprehension of the English language on page 30. However, the interviewer should be fluent in the student's native language and will need to ask the questions in the student's native language.

B. Observations

The observer may follow the same procedures as stated for conducting observations for oral/listening comprehension of the English language on page 30. However, the observer needs to be fluent in the student's native language in order to be able to draw valid conclusions of the student's oral/listening comprehension of the native language.

C. Writing Sample

A writing sample of the student's native language can be obtained by following the same procedures as stated for obtaining an English writing sample on page 37. However, the person obtaining the writing sample needs to be fluent in the student's native language in order to be able to draw valid conclusions of the student's writing abilities in the native language.

D. Use Native Language Tests

Native language tests can be administered to get a meaningful understanding of the student's proficiency in the native language. These tests can be administered to provide evaluation of the student's performances in vocabulary, grammar, fluency, and listening comprehension, and determine if the student possesses a technical vocabulary in the native language.

4. San Bernardino Language Dominance Survey. (Page 194)
6. AREA OF ASSESSMENT: Vocational Interest

Purposes of assessing vocational interest:
A. To determine the nature of the student's vocational interests.
B. To determine what vocational courses to place the student in.
C. To aid the student in career/vocational planning.

Suggested assessment activities:
A. Interviews.
B. Informal Career Orientation Program.
C. Vocational interest tests.
D. Work samples.
E. Field trips.
SUGGESTED ASSESSMENT ACTIVITIES  
Area of Assessment: Vocational Interest

<table>
<thead>
<tr>
<th>Resources</th>
</tr>
</thead>
</table>

A. Interviews

In order to conduct an adequate assessment of vocational interest of an LEP student, you need to get to know the student on a personal basis. A personal interview is a good way to do this. During the personal interview you can often discover a great deal about the LEP student—his/her interests, values, maturity, self-confidence, family circumstances, etc. All these play a part in the exploration of career interest. With some LEP students an interview may be sufficient (using a bilingual interpreter, if needed). Some LEP students may already have a broad educational and/or work background in a specific occupational area. Others may have no idea what they want to do, and still others may have unrealistic, conflicting or contradictory vocational interests. From interviews with the LEP student you can discover the expressed vocational interests of the student. Resource Document #14 on page 132 provides guidelines and questions for conducting a vocational interest interview with LEP students.

B. Informal Career Orientation Program

Another possible vocational interest assessment procedure is the use of an informal career orientation program. In these programs LEP students "rotate" through several occupational training classes. This allows them to observe and/or "shadow" other students already in training. This will give them a better idea of what is involved and expected in each of the occupational areas.

C. Vocational Interest Tests

Limited English proficient students' vocational interest can be determined through vocational interest tests. Although several commercially available vocational interest tests exists, only a few of these are appropriate for LEP students. The first step is to familiarize yourself with what sort of vocational interest test are available for LEP students. In helping an LEP student plan a program, keep in mind that vocational interest tests are designed to help expand occupational considerations. In using vocational interest tests the focus should not necessarily be on deciding a career. Students will be at different stages in vocational development. Interest tests data can aid in planning or charting possible directions the LEP student can take.

Work-Samples

10. The Singer
Career Systems.
(Page 201)

D. Work Samples

Work samples are developed to assess work potential
or job interest of LEP students. Work samples are
directly applicable to work tasks on various jobs.
While the LEP student does the work sample the
evaluator observes him/her and records the observa-
ations on:
SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Vocational Interest (Cont'd)

- explicit behavior factors
- performance factors related to the Dictionary of Occupational Titles
- indications of interest

When all work samples are completed by the student the evaluator summarizes the results of all work samples in terms of the student's behavior, interest and performance. The evaluator then meets with the student for a feedback interview, in which they discuss:

- the student's reactions to the work sample process
- work samples the student especially liked or disliked
- the student's estimate of his/her own behavior and performance
- the student's actual behavior and performance
- the student's reaction to this information

Synthesizing the work sample records and the feedback interview, the evaluator should prepare a comprehensive work sample evaluation report, to be sent to the student's counselor, vocational teacher, or other appropriate person depending on the local educational agency. The report should include information on:

- communication
- behavior in interpersonal situations
- worker characteristics
- learning and comprehension
- discriminatory abilities
- manipulative skills

and recommendations for:

- appropriate areas of employment and/or training
- supportive services that may be needed

References:

SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Vocational Interest (Cont'd)

E. Field trips

LEP students many times are not aware of the career options available to them. They are also not aware of the tasks and duties required of the different types of jobs and the skills needed to perform different jobs. Field trips to business firms, offices, banks, factories, etc. can be used to facilitate career exploration by providing the LEP student with a realistic observation of the types of jobs that are available and the tasks and duties involved.

Field trips can be useful for expanding the educational and career world of the culturally different; but they must be preceded by careful planning and follow-up with feedback. Arouse the LEP students' interest by class discussion, photographs, bulletin board, and other visual materials. Make clear to the LEP students the purpose of the field trip. Follow-up activities may include individual discussions and/or group discussions regarding the field trip.

In addition, by talking with and observing the LEP student during the field trip, it can help determine in what vocational areas the student's interest are highest and also what vocational areas the student appears to dislike and like.
7. AREA OF ASSESSMENT: Vocational Aptitude/Skills

Purposes for assessing vocational aptitude/skills:

A. To aid students in educational and vocational planning.

B. To determine the students' general knowledge, skills, and aptitude in a given vocational area.

C. To determine the specific vocational skills the student has attained from previous experiences or courses.

D. To determine specific areas where special assistance may be needed.

Suggested assessment activities:

A. Vocational aptitude tests.

B. Work samples.

C. Interview students and instructors.

D. Entry level/performance sampling.
SUGGESTED ASSESSMENT ACTIVITIES

Area of Assessment: Vocational Aptitude/Skills

A. Vocational Aptitude Tests

A method for assessing vocational aptitude of LEP students is through the use of vocational aptitude tests. Few instruments exist which are appropriate for assessing vocational aptitude (ability) of LEP students. Vocational aptitude is an important aspect of career satisfaction and needs to be considered, because an LEP student may have a high interest in a particular vocation but lack the aptitude (ability) for it. Therefore, the LEP student needs to be helped made aware of alternate possibilities.

B. Work Samples

See Area of Assessment: Vocational Interest—D. Work Samples (Page 45).

C. Interview Students and Instructors

Interviewing of students can help you gain further insight into their educational performance and vocational skills. Interviews offer an opportunity to clarify and verify the data found in the student's file. For example, data in the student's file may indicate that the student has participated in a pre-vocational course. However, the only item probably reported in the student's file will be the student's grade. By interviewing the instructor and/or student, information concerning the specific skill taught and the degree to which the student mastered these skills could be located.

Resources

Abstracts of Tests

   1. Differential Aptitude Tests. (page 208)
   2. General Aptitude Test Battery (GATB). (Page 208)
   3. Non-reading Aptitude Test Battery (NATB). (Page 208)
   4. Clerical Aptitudes SRA. (Page 208)

SUGGESTED ASSESSMENT ACTIVITIES.
Area of Assessment: Vocational Aptitude/Skills (Cont'd)

One technique for structuring an interview is through the use of an interview guide. Resource Document #15 provides a complete interview guide for a student who is limited English proficient who finished the first year drafting course and was placed in an architectural-technical drafting course. This guide can be used by the arch-tech drafting instructor to interview the student's previous drafting instructor. Resource Document #16 offers instructions for developing and using the interview guide and Resource Document #17 provides a blank copy of the guide. In addition, Resource Document #18 provides a suggested procedure for interviewing key personnel.

D. Entry Level/Performance Sampling

Entry level performance sampling is basically a general pre-test for vocational instruction. It is to be used following the LEP student's admission into a vocational program, but prior to actual vocational classroom instruction. Its purpose includes:

- To obtain a direct assessment of the LEP student's performance in relation to a particular course, and

- To provide an indication of specific areas where special assistance may be needed.

An example of an entry level performance sample used in a building trades program is presented in Resource Document #19a, 19b, and 19c. Resource Document #20 includes the steps the building trade instructor followed in developing and administering the sample.
A second example of an entry level performance sample for a beginning typing course is provided in Resource Document #21. The intent of the sample is to determine the strengths and weaknesses of students in basic language skills which affect performance in beginning typing.

The entry level performance sample has several attractive features, such as:

- Offering an alternative to traditional forms of pencil and paper testing.
- Having high face validity to both student and instructor.
- Providing an opportunity for direct and immediate feedback to student.
8. AREA OF ASSESSMENT: Career Awareness

Purposes for assessing career awareness:

A. To determine the student's understanding of career opportunities.
B. To aid the student in career planning.
C. To determine students' awareness of different types of occupational roles.

Suggested assessment activities:

A. Field trips.
B. Guest speakers.
C. Films and other audio-visual presentations.
D. Career Development and Maturity Inventories.
### SUGGESTED ASSESSMENT ACTIVITIES

**Area of Assessment:** Career Awareness

<table>
<thead>
<tr>
<th>A. Field Trips</th>
</tr>
</thead>
<tbody>
<tr>
<td>See Area of Assessment: Vocational Interest: E. Field Trips (Page 47)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>B. Guest Speakers</th>
</tr>
</thead>
<tbody>
<tr>
<td>LEP students in many cases lack role models in their lives, therefore it is important to select guest speakers from the same cultural background as the LEP students. The guest speakers can tell what they do, relate the personal meaning of their work-satisfaction, frustrations, and so on. In summary, they can give a complete picture of what they do on the job and help the LEP students understand the occupation which they represent.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>C. Films and Other Audio-Visual Presentations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Limited English proficient students many times benefit the most from audio-visual presentations. Use as many different kinds of media as possible to get occupational information across. For LEP students the following various audio and visual means of disseminating occupational information can be used:</td>
</tr>
<tr>
<td>• Bulletin boards and exhibits.</td>
</tr>
<tr>
<td>• Commercial, educational, and closed-circuit television.</td>
</tr>
<tr>
<td>• Slides.</td>
</tr>
<tr>
<td>• Films.</td>
</tr>
<tr>
<td>• Records.</td>
</tr>
<tr>
<td>• Cassettes.</td>
</tr>
<tr>
<td>• Filmstrips.</td>
</tr>
<tr>
<td>• Microfilm.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Resources</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>References</th>
</tr>
</thead>
</table>
SUGGESTED ASSESSMENT ACTIVITIES

Area of Assessment: Career Awareness (Cont'd)

For LEP students, activities might even include "show and tell" exercises. Perhaps they can "show and tell" about the various careers they have studied. The use of audio aid may also encourage LEP students to seek additional information and career counseling.

Resource Document #22 provides a description of a series of slide-tape presentations entitled Jobs in America, which are designed to present vocational information to LEP students.

D. Career Development and Maturity Inventories

Limited English proficiency students many times are unable to make sound career choices due to lack of experience with and knowledge of work. Therefore, counselors need inventory assistance in assessing the level of an LEP student's career development or maturity for selecting the appropriate guidance materials and in suggesting a vocational program. Knowing the career maturity level of an LEP student can assist the counselor in the selection of measures or experiences that will encourage an appropriate amount of investigation and exploration. When sufficient career maturity and decision making skills are developed, the counselor can suggest to the LEP student a narrowing of interest areas for future vocational program planning.

Abstracts of Tests

J. Career Development and Maturity Inventories.

1. Assessment of Career Development. (Page 210)

2. Career Awareness Inventory (CMI). (Page 210)

3. Career Maturity Inventory (CMI). (Page 211)

4. Comprehensive Career Assessment Scales. (Page 212)

6. New Mexico Career Education Test Series. (Page 213)

7. Vocational Opinion Index. (Page 214)
9. AREA OF ASSESSMENT: Educational Achievement

Purposes for assessing educational achievement:

A. To determine what a student has learned.

B. To determine the students' areas of educational strengths and weaknesses, so the student can be referred to the appropriate resource personnel.

Suggested assessment activities:

A. Achievement tests.

B. Student's records.
SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Educational Achievement

A. Achievement Tests

Achievement testing is beneficial not only to determine what an LEP student has learned, but also to provide teacher, student and program feedback. The tests chosen can be variations or adaptations of those listed in Abstract of Tests K. The testing should be done with caution being taken on not overtesting. The emphasis should be on structuring the achievement tests to provide practical, useful results for not only instructional and programmatic improvement, but also valuable information on growth in language proficiency.

Abstracts of Tests

K. Achievement Tests.

1. California Achievement Tests. (Page 216)

2. Comprehensive Tests of Basic Skills. (Page 218)

4. New York State Mathematic Test: Spanish Language Editions. (Page 221)

7. Inter-American Series Tests of General Ability. (Page 224)

8. Tests of General Ability (TOGA). (Page 224)

9. Short Test of Educational Ability (STEA). (Page 225)
SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Educational Achievement

(Cont'd)

B. Student's Records

For this method the teacher gathers and records data from existing LEP student's records such as tests, cumulative files, interview records, observation records, and work experience records. Information that should be identified is the following:

- Educational History: Student's courses, grades and performance sheets; anecdotal records and observation comments; attendance records; teacher and on-the-job supervisor recommendations; reading and mathematic scores; and support service records.

- Work History: physical stamina, types of work experience, ability to follow directions, manipulate equipment, general coordination and work attitudes (e.g., punctuality, reliability, responsiveness to supervisors and co-workers and performance under stress).

Schools may have regulations regarding access to educational records. The vocational teacher should know the school's policy on the use of all the students' records. High schools may require written permission from the parents before anyone can see the records. Utilizing each method mentioned allows the teacher to form a realistic picture of the "whole" student. The Case History Record in Resource Document #23 will assist you in collecting and recording specific LEP student information according to your needs.

Resource Document #23:
Case History Record.
(Page 162)
10. AREA OF ASSESSMENT: Cultural Adjustment

Purposes for assessing cultural adjustment:

A. To determine if the individual is culturally familiar with the American job market and expected employee behavior and attitudes.

B. To determine if the individual is comfortable in dealing with public transportation and other community resources.

Suggested assessment activities:

A. Observations.

B. Interviews.
SUGGESTED ASSESSMENT ACTIVITIES
Area of Assessment: Cultural Adjustment

<table>
<thead>
<tr>
<th>A. Observations</th>
</tr>
</thead>
<tbody>
<tr>
<td>The observer may follow the same procedures as stated for conducting a direct observation of student performance on page 17. However, the observer should observe the student in several settings (e.g., classroom setting, work setting) and take notes of the behaviors, characteristics, and personal interaction that appear significant to cultural adjustment. After recording notes for a period of time, the observer analyzes the information and then draws conclusions. It is important that the observer be fluent in the student's native language in order to be able to draw valid conclusions of the student's cultural adjustment.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>B. Interviews</th>
</tr>
</thead>
<tbody>
<tr>
<td>The interviewer may follow the same procedures as stated for conducting an informal interview with student on page 15. However, the interviewer should be fluent in the student's native language and ask questions about the following:</td>
</tr>
<tr>
<td>• the community</td>
</tr>
<tr>
<td>• transportation</td>
</tr>
<tr>
<td>• community services available</td>
</tr>
<tr>
<td>• activities they participate in (e.g., religion, social, political)</td>
</tr>
<tr>
<td>• types of jobs in the United States</td>
</tr>
<tr>
<td>• employers expectation of workers</td>
</tr>
<tr>
<td>• length of time in the United States</td>
</tr>
<tr>
<td>• number of years of schooling in the United States</td>
</tr>
</tbody>
</table>
SECTION IV: USES OF ASSESSMENT INFORMATION
SECTION IV: USES OF ASSESSMENT INFORMATION

The persons responsible for collecting assessment information on the identified limited English proficient students must, first of all keep the purpose of their efforts in mind—to obtain current and specific information which is to serve as the foundation for making decisions concerning the following:

1. Counseling
2. Placement
3. Instructional Planning
4. Evaluating Students' Progress
5. Administrative Planning

Several suggested uses of assessment information for each of the five areas are presented in this section.
**SUGGESTED USES OF ASSESSMENT INFORMATION:**

<table>
<thead>
<tr>
<th>Counseling</th>
<th>Resources</th>
</tr>
</thead>
</table>
| A. Help identify need for ancillary services (i.e., transportation, daycare, financial aid) for LEP students. | **References:**
| B. Help identify need for career awareness and career planning activities for LEP students. |
| C. Help identify language supports needed for counseling (i.e., translators, bilingual psychologists) for LEP students. |
| D. Help identify appropriate vocational placement for LEP students. |
| E. Help identify types of counseling needed (i.e., group, family, individual, personal, vocational, career) for LEP students. |

<tr>
<td>B. Help identify language proficiency, career awareness, vocational interest and aptitude, cultural adjustment, and educational achievement of LEP students for appropriate placement in a vocational program.</td>
</tr>
</tbody>
</table>

### Resources:

- **References:**
SUGGESTED USES OF ASSESSMENT INFORMATION:

Instructional Planning

A. Help identify instructional mode (i.e., lecture reading) that is appropriate for LEP students.

B. Help identify appropriate materials (i.e., bilingual vs. ESL; printed vs. audio-visual) needed for LEP students.

C. Help identify appropriate testing techniques (i.e., oral, written) needed for LEP students.

D. Help identify special individual problems (i.e., pronunciation, literacy) that need to be addressed for LEP students.

E. Help identify what skill areas need to be stressed.

F. Help identify additional support services and resources (i.e., bilingual tutors, vocational English-as-a-second language, bilingual instructional materials) needed for instructional planning for LEP students.

G. Help identify appropriate instructional techniques (i.e., individualized, group) needed to adequately serve LEP students.

H. Help identify which programmatic approach is best suited both to the target LEP population and to available resources.

I. Help develop learner profiles for LEP students.

J. Help develop individualized vocational plans for LEP students.

References:

SUGGESTED USES OF ASSESSMENT INFORMATION:
Evaluating Student's Progress

A. Help identify LEP student's progress before vocational instruction has started (pre-assessment).

B. Help identify LEP student's progress after vocational instruction has been completed (post-assessment).

References:

SUGGESTED USES OF ASSESSMENT INFORMATION:
Administrative Planning

A. Help identify the needs for additional support services and resources (i.e., bilingual tutors, vocational English-as-a-second language, bilingual instructional materials) needed to adequately serve LEP students.

B. Help estimate and allocate program resources (i.e., support services, instructional materials) required to fully serve LEP students.

C. Help plan budgets.

D. Help identify staff development (in-service training) needed to adequately serve LEP students.

E. Help identify additional supportive staff (i.e., bilingual aides, bilingual counselors) needed to serve LEP students.

F. Help plan for future program development for LEP students.

References:

CONCLUSION STATEMENT

It is not enough that vocational educators become increasingly responsive to limited English proficiency populations solely on the basis of compliance and accountability. The collection and interpretation of identification and assessment data are vital to planning and delivering all vocational education programs, and especially for English proficiency students. Planning and administering vocational education programs for limited English proficiency learners require accepting them as individuals, recognizing their limitations and potential, understanding their unique needs, knowing how to make programs responsive to their needs, and making an extra effort to encourage their full participation in vocational education programs.

approval by Bilingual Parent Advisory Committee

I certify that the Bilingual Parent Advisory Committee has had an opportunity to review this Application for a Transitional Bilingual Education Program.

Date
Signature of Bilingual Parent Advisory Committee President

DISTRICT PROCEDURE FOR IDENTIFYING STUDENTS OF LIMITED ENGLISH PROFICIENCY (Attach to Application)

This procedure is used to complete the Public School Bilingual Census (PSBC) which was conducted in February. The procedure must minimally be comprised of:

1) a description of the district procedure for the identification of students with a non-English background specifying the instruments or other strategies used including the individuals responsible for implementing the procedure and the training to be received by the persons who will perform the identification
2) a description of the district procedures for evaluating the English proficiency of students whose first, or native language, is English specifying the instruments and/or procedures to be used including the persons responsible for the English proficiency evaluation and the time the evaluation will occur and
3) the average English language proficiency, performance, or achievement level by grade or age equivalent for students whose first, or native, language is English.

Once the testing instruments have been administered to all students, a comparison is made between the English language proficiency level for native English speakers and students for whom English is not the native language. A student is eligible for the program when he/she achieves below the average of students for whom English is the native language at the same grade or age equivalent.

(20) (1982)
DEFINITIONS

1. DISTRICT ASSESSMENT PROCEDURE - The district assessment procedure must be comprised of:
   a) a description of the district procedure for the identification of students with a non-English background specifying the instruments or other assessment strategies used, including the individual(s) responsible for implementing the procedure and the training to be received by the person(s) who will perform the identification;
   b) a description of the district procedures for evaluating the English proficiency of students whose first, or native language, is English, specifying the instruments and/or procedures to be used including the person(s) responsible for the English proficiency evaluation and the time the evaluation will occur, and
   c) the average English language proficiency, performance, or achievement level by grade or age equivalent for students whose first, or native, language is English.

2. STUDENT WITH A NON-ENGLISH BACKGROUND - Student who understands or speaks a language other than English which is learned from his/her family background; or student with a family background where a language other than English is spoken in the home.

3. STUDENTS WITH A NON-ENGLISH BACKGROUND WHOSE PROFICIENCY LEVEL IS BELOW AVERAGE - A student with a non-English background (as defined in 2) above) whose aural comprehension, speaking, reading or writing proficiency in English as determined by district personnel in accordance with the district's assessment procedure is below the average English proficiency level of students of the same age and/or grade whose first, or native language, is English.

DIRECTIONS FOR COMPILING CENSUS COUNT

1. The district superintendent and attendance center principal are responsible for ensuring the completion and submission of the Bilingual Census form (ISBE 87-06).

2. The census must be conducted by a person(s) who has received training in applying the District Assessment Procedure.

3. Students who come from homes where 2 or more languages other than English are spoken should be reported under their predominant non-English language group.

4. Pre-kindergarten students are not to be included in the census count reported on form (ISBE 87-06).

5. Students with a non-English background who are already being served by a special program (e.g., Title I, Special Education, etc.) are to be included in the census count reported on form (ISBE 87-06).

6. Only those students attending classes at the attendance center identified on the form are to be reported in the census count for that attendance center.

7. The bilingual census is not a nationality nor a surname report and students should be reported exclusively on the basis of their language background.

8. If assistance is needed in determining the student's English proficiency level, the district should engage the help and cooperation of all agencies, organizations, and community groups (e.g., Bilingual Section of the Illinois State Board of Education) having access to or information about children residing in the district and possessing limited proficiency in English.

INSTRUCTIONS FOR COMPLETING AND SUBMITTING FORM

1. Column A - Record in column A by language group the number of students with a non-English background (see definition #2) who are attending classes at the attendance center.

2. Column B - Record in column B by language group the number of those students reported in column A whose English proficiency level is below average (see definition #3).

3. Column C - Record in column C by language group the number of those students reported in column A whose English proficiency level is equal to or above average.

4. Verify that column A equals column B plus column C (i.e., A = B + C) for each language group listed on form (ISBE 87-06).

5. The census count is to be conducted as of February 2, 1981. Upon completion of the form, the principal should retain the yellow copy and forward the white, pink, and green copies to the district superintendent. The district superintendent should retain the green copy and forward the pink and white copies to the regional superintendent by February 15, 1981. The regional superintendent should forward the white copy for each attendance center in his/her region to the Illinois State Board of Education, Research and Statistics Section, by no later than March 2, 1981.

RESOURCE DOCUMENT #3a
HOME LANGUAGE SURVEY

Dear Parent,

Your child may be eligible for a bilingual instructional program under the Washington State Bilingual Law. It is important for the school district to determine which children come from homes where the primary language is other than English. This information is essential for schools to provide proper instruction for students. Your co-operation in helping us meet this important requirement is requested.

Thank you for your help.

Sincerely,

Superintendent or Principal

Date

Please answer the following questions and have your son/daughter return this form to his/her teacher. Thank you for your help.

Name of Student ____________________________ (Last) (First) (Middle)

Grade ____________  Age ____________

1. What is the language most often spoken in the home?

2. What is the language most often spoken by the student when communicating in the home?

3. How well does the student understand and speak English in comparison to the home language? (Check one)
   a. The student speaks no English.
   b. The student speaks the home language better than English.

4. In your opinion does your child need special help to function in an English-only classroom? ______ yes ______ no

Signature of Parent or Guardian
Queridos Padres:

Su niño tal vez es elegible para recibir un programa de instrucción bilingüe según la ley bilingüe del estado de Washington. Es importante que su distrito escolar determine cuáles niños vienen de hogares donde el idioma principal no es inglés. Esta información es necesaria para que las escuelas puedan ofrecer la mejor instrucción posible para los alumnos. Agradecemos su co-operación en ayudarnos en este requisito tan importante.

Muchísimas gracias por su ayuda.

Sinceramente,

Superintendente o Director de la Escuela

______________________________
Fecha

Favor de contestar las siguientes preguntas y dirija a su niño(s) que entregue(n) este cuestionario a su maestro. Gracias por su ayuda.

Nombre de Alumna

(Appellido) (Primer Nombre) (Segundo)

Grado__________________________ Edad__________________________

1. ¿Cuál es el idioma más frecuentemente hablado en casa?

2. ¿Cuál es el idioma más frecuentemente hablado por el alumno cuando se comunica en casa?

3. ¿Qué tan bien entiende y habla el inglés el alumno al comparar el idioma usado en casa? (Indique una respuesta)
   a. El alumno habla inglés.
   b. El alumno habla el idioma en casa mejor que el inglés.

4. En su opinión ¿es el caso que su niño necesita ayuda especial para funcionar en un salón escolar donde solamente se habla inglés? _____ sí _____ no

次の質問にお答え下さい。そして、あなたの生徒さんにこの用紙を担当の先生まで提出させて下さい。御協力有難うございます。

生徒氏名（Last）（First）（Middle）

学年年令

1. 家庭においてどちらの言語がよく使用されますが。
2. 家庭において生徒が意思伝達の際に使うのはどちらの言語ですか。
3. 家庭で使用される言語と比較して、あなたの生徒さんはどの程度英語を理解し、話すことができますか。（どちらかに印を付けて下さい）
   a. せんせん英語を話しません。
   b. 英語よりも家庭で使用する言語の方がよく話します。
4. あなたの意見では、あなたの生徒さんは英語のみで授業されるクラスにおいて特別の援助がいりませんか。（いいえ）
本地語言調查

親愛的家長們，

你的孩子可能有資格接受華盛頓州立中的雙語語言教學課程。對學區當局來說，要知道誰是誰非，以及語言在布的語言的來源相當重要，而調查為使學校能夠提供適當的教育和不可少的，會特別感謝您的協助，以應對重要的需要。

謝謝您的協助！

[學生姓名]

年級 ____________ 年齡 ____________

家中最常用的語言是哪一種？

學長在您所會的語言中，最常用的語言是：

與自己方言比較，學生對英語的瞭解及講話情況如何？（任選一項）

a. 學生不會說英語。
b. 學生說本地語言較英語為好。

你認為你的孩子在使用英語教學的教室中是否需要特別的幫助才可跟進？是，不是。

家長簽名

Sample Instrument for Identifying LEP Students

This instrument is provided as an example of the format that can be used to help identify students of limited English ability. The responsibility for identifying these students lies with the local district. The process that is used must be documented and kept on file. This instrument can be used by having the respondents answer the questions orally or in writing, whichever is more appropriate under given situations.

Limited English Proficiency (LEP) Learner Characteristics Rating Scale

Directions: Select and observe a learner that appears to be LEP. Then rate each criterion to indicate the amount of influence on success in the vocational program. Circle a number for each criterion according to the following:

1 = disadvantage that interferes with success in vocational program
2 = disadvantage that does not prevent success in vocational program
3 = not applicable, neither a disadvantage nor a strength
4 = strength that moderately encourages success in vocational program
5 = strength that promotes success in vocational program

Additional comments may be written at the end of the rating scale.

### LEARNING STYLE (Avenues for learning)

1. Attention span  
2. Transfer of knowledge and skills  
3. Responds to structure and organization  
4. Learns through real and concrete experiences  
5. Learns by doing

### MANUAL DEXTERITY (Proficiency in manipulating)

1. Coordination  
2. Manipulation of small objects and tools  
3. Performance of placing and turning movements  
4. Visual and physical orientation

Comments:

Limited English Proficiency (LEP) Learner Description

Directions: Write a brief narrative description of a Limited English Proficiency (LEP) learner using the data collected on the LEP Learner Characteristics Rating Scale. The description should be (a) clear and concise, (b) objective, (c) verifiable through documentation, (d) free of libelous terms and (e) limited to repeatable behaviors.

Description of disadvantages:

ASSESSMENT OF LEP PERSONS

LEP person inquires about LEP Project

- Intake interview assessment of interests and resources

- Interested in Machine Tool or Secretarial Science?
  - YES: Acceptable scores on Ilyin Oral interview and written EPT? English Proficiency
  - NO: Informal assessment
    - LOW: Referral to ESL/ABE courses
    - HIGH: Referral to other vocational courses in area of interest

- Referral to LEP Project vocational and corresponding VESL courses in Machine Tool or in Secretarial Science

Follow-up

On-going assessment of progress; Job development; Follow-up

Referrals to state offices, social service agencies, industry and business, according to needs

RESOURCE DOCUMENT #6

Intake Assessment and Referral Process

I. Identification.

A. College application indicates non-citizen
   1. Student is automatically referred to LEP advisor upon acceptance or at registration.

B. Referral to LEP advisor by agency or individual serving LEP clientele.

II. Intake/Assessment.

A. LEP advisor conducts oral interview.
   1. Gathers personal information for student file (name, address, S.S. # etc...)
   2. Gathers educational and language background.
   5. Assesses listening and speaking skills.
   6. Assesses ability to understand and follow directions.

B. LEP advisor assesses Language Ability.
   1. Major language barriers.
      a) refer to ESL Coordinator for further testing and placement.
      b) prevocational VESL Placement.
   2. Language barriers which might inhibit successful completion of mainstream class.
      a) refer to ILC for further testing and placement in remedial English/Math.
      b) refer to career exploration component.
      c) refer for possible homogeneous vocational/VESL grouping.
      d) refer to special student services.
         1) tutoring
         2) supplementary bilingual materials
         3) counseling.
3. No apparent language barriers.
   a) refer to academic advisor.
   b) refer to mainstream vocational classes.
   c) refer to special student services if needed for counseling.

III. Student File.
   A. Intake/Assessment form.
      1. intake date and personal information (name, age, sex, DOB)
      2. ethnic and cultural background.
      3. language background.
      4. educational background.
      5. Occupational/Vocational information.
      6. Disposition of referrals.
      7. Name and title of contact person.

   B. Medical barriers or handicaps if applicable.
      (suggested that refugees be cleared by the TB clinic)

   C. Testing Information.
      1. English.
         a) listening
         b) speaking
         c) reading
         d) writing
      3. Vocational Interest.

   D. Placement information.
      1. date and area/level placed

   E. Counseling reports.
      1. abilities
      2. interests
      3. strengths and weaknesses.

   F. Assessment of possible barriers to successful completion of Vocational Training.

   G. Services received.

   H. Services planned.

STUDENT'S NAME

DIVISION

VOCATIONAL EDUC. COURSE

TEACHER

REASON FOR REFERRAL:

CHECK APPROPRIATE BOX BELOW:

Student understands little or no instruction in English.
Student understands instructions but cannot respond in English to questions.
Student has difficulty with the concepts of the lessons due to language interference.
Student has difficulty with the basic reading materials of the course.
Student has difficulty with the terminology of the subject matter.
Student is hesitant to participate in class activities due to language interference.
Other

PLEASE CIRCLE ONE OF THE FOLLOWING:

Level 1: The individual does not speak, understand, or write English but may know a few isolated words or expressions.

Level 2: The individual understands simple sentences in English, especially if spoken slowly, but does not speak English, except isolated words or expressions.

Level 3: The individual speaks and understands English with hesitancy and difficulty. With effort and help, the student can carry on a conversation in English, understand at least parts of lessons, and follow simple directions.

Level 4: The individual speaks and understands English without apparent difficulty but displays low achievement indicating some language or cultural interference with learning.

Date Referral Received
by Chairperson
School
Regional
Central
Descriptors

General Health: "Physical or Organic Contraindication, Hearing Acuity, Visual Acuity, Specific Psychiatric Disorders" Includes: Frequent illness, chronic health problems, seizures, congestion in nose and/or throat, general hygiene, overweight, underweight, dental problems, unusually sleepy, apathetic, frequent earaches, frequent urination, frequent requests for water, allergies, headaches, frequent falling, difficulty copying from the blackboard, complains of eyes hurting, red or runny eyes, squints, suspected color blindness, constantly watches teacher's face, speaks in abnormally loud or soft voice, etc.

Motor: "Cross Motor Skills, Fine Motor Skills, Balance and Coordination, Writing" Includes: Has difficulty cutting with scissors, folding paper, writing, appears clumsy, cannot handle self in simple physical education activities, has odd gait, poor sense of balance, poor coordination for self-help skills such as tying shoes, buttoning, etc.

Language: "Auditory Discrimination, Receptive and Expressive Language, Auditory Memory, Speech" Includes: Articulation problems, voice quality, fluency, blocks, stutters, echoes speech, distorts sounds, substitutes, garbles, unintelligible speech, participates rarely in class discussion, slow to respond to questions, difficulty "finding" words for speech, substitutes words like "thing" for nouns, difficulty discriminating between similar sounds, forgets what is heard, difficulty relating sounds to the printed letter, difficulty sequencing syllables or letters (pasta for spaghetti), etc.

Visual Motor: "Visual Discrimination, Receptive and Output Visuo-Motor and Visual Memory" Includes: Reverses, inverts letter and/or word order, draws backwards, makes letters and numbers backwards, difficulty tracking moving objects, slow to recognize letters as looking the same or different, poor memory for what is seen, poor eye-hand coordination, drawings are immature and lacking in detail, etc.

Behavior: "Attending Behavior, Impulse Control, Frustration, Distractibility, Thought Processes" Includes: Difficulty staying on task, must be constantly supervised and/or directed, seems preoccupied, daydreams, seldom completes tasks assigned, easily frustrated, easily distracted by extraneous stimuli, engages in repetitive behaviors, overactive, doesn't maintain eye contact, etc.

Social-Emotional: "Family Relationships, Authority Relationships (School and Home), Peer Relationships, Reality Orientation, Special Life Events" One or more of following characteristics over long period of time and to a degree significantly different from the peer group which interfere with the educational process: Impaired perception of reality, thought process disorder, danger to himself and others, markedly depressed, withdrawn behavior, inability to maintain interpersonal relationships with peers or adults, inappropriate behavior in terms of time or place; a tendency to develop physical symptoms in relationship to school problems, inability to separate from parent (K, 1st grade) and attend class, non-attendance coupled with withdrawn-depressed stay at home behavior, repetitious behavior, self-stimulating behavior (autistic-like), poor impulse control, extreme variability of behavior, wide swings in affect, physically aggressive behavior with peer and adults, verbally aggressive behavior with peers and adults, inability to stay on task, extreme hyperactivity, demands constant one to one attention, fire setting, theft, intimidation, extortion, destruction of property of peers, adults or school, creating a climate of chaos in a classroom which hampers teaching and prevents other students from learning, etc.

Academic Achievement: "Reading, Spelling and Mathematics Proficiency, Writing, and Overall Academic Achievement" Includes: Self-help skills, pre-vocational and vocational skills, and elective subject areas, etc.

TESOL PROGRAM AT SENN HIGH SCHOOL
Oral Placement Test

Level I -- place student in Level I if he can answer ONLY the first (4) questions.

1. Hello. How are you?
2. What's your name?
3. Where are you from?
4. How old are you?

Level II -- place student in Level II if he can answer questions through #13.

5. Are you wearing a jacket now?
6. Do you have any brothers/sisters?
7. Is your father living in Chicago?
8. Were you at home last night?
9. Do you watch television every night?
10. What are you going to do tonight?
11. Were you in school last year?
12. How many days are there in a week?
13. You're a student now, aren't you?

Level III -- place student in Level III if he can answer questions through question #27.

14. Does your brother/sister go to school every day?
15. How did you come to school today?
16. How long did it take you?
17. Where did you buy your shirt/sweater?
18. What did you eat for breakfast this morning?
19. Do you think it'll rain today?
20. If it rains, what will you do after school?
21. What do you want to do after dinner tonight?
22. What is this called? (Hold up a pencil)
23. Whose pencil is this?
24. Is this yellow pencil longer than the brown one?
25. Where were you before you came to the United States?
26. You finished elementary school in your country, didn't you?
27. What do you think you want to be?
Level IV -- place student in a Transitional English class if he can answer questions through #42.

28. Do you have an older brother?
29. Is your brother taller than you?
30. What is the easiest subject for you?
31. What time did you used to eat dinner in your country?
32. What will you do when you graduate from high school?
33. What must a student do every day?
34. Would you rather have a cup of tea or a glass of milk?
35. Can you lift that cabinet? Why not? (to elicit "It's too heavy...")
36. Can you lift this chair? Why? (to elicit "I'm strong enough...")
37. If I gave you $100.00 what would you buy?
38. If you could travel anywhere in the world, where would you go?
39. If you have a toothache, what should you do?
40. Have you been to many restaurants in Chicago?
41. How long have you studied English?
42. Who was this book (Show book with author's name on cover) written by?

Source: Senn High School
Chicago, Illinois
Instructions: For all of the five language areas (Pronunciation, Grammar, Vocabulary, Fluency, Comprehension), choose the Proficiency Descriptions—from 1 to 6—which best represent the competence of the student. Then, in the Weighting Table, find the number corresponding to each of the five descriptions* and add all five numbers. Then determine from the Conversion Table the rating level within which the total score falls. Please bear in mind that this numerical procedure is intended only to supplement the official verbal descriptions and should not be used by itself to determine a rating.

Note also that the numbers 1 through 5 are simply used to designate the different proficiency descriptions for each language area and do not have any direct relationship to the official rating levels of 1 through 5.

*After some practice with this procedure, you may in some cases want to give a score that is "in-between" two of the descriptions. For example, if you feel the student's competence in Grammar is about midway between description 3 ("Frequent errors showing ..." and description 4 ("Occasional errors showing..."), you might give a weighted score of 21 for Grammar, rather than 18 or 24.
Proficiency Descriptions

Accent

1. Pronunciation frequently unintelligible.
2. Frequent gross errors and a very heavy accent make understanding difficult, require frequent repetition.
3. "Foreign accent" requires concentrated listening and mispronunciations lead to occasional misunderstanding and apparent errors in grammar or vocabulary.
4. Marked "foreign accent" and occasional mispronunciations which do not interfere with understanding.
5. No conspicuous mispronunciations, but would not be taken for a native speaker.
6. Native pronunciation, with no trace of "foreign accent".

Grammar

1. Grammar almost entirely inaccurate except in stock phrases.
2. Constant errors showing control of very few major patterns and frequently preventing communication.
3. Frequent errors showing some major patterns uncontrolled and causing occasional irritation and misunderstanding.
4. Occasional errors showing imperfect control of some patterns but no weakness that causes misunderstanding.
5. Few errors, with no patterns of failure.
6. No more than two errors during the interview.

Vocabulary

1. Vocabulary inadequate for even the simplest conversation.
2. Vocabulary limited to basic personal and survival areas (time, food, transportation, family, etc.)
3. Choice of words sometimes inaccurate, limitations of vocabulary prevent discussion of some common professional and social topics.
4. Professional vocabulary adequate to discuss special interests; general vocabulary permits discussion of any non-technical subject with some circumlocutions.
5. Professional vocabulary broad and precise; general vocabulary adequate to cope with complex practical problems and varied social situations.

6. Vocabulary apparently as accurate and extensive as that of an educated native speaker.

**Fluency**

1. Speech is so halting and fragmentary that conversation is virtually impossible.

2. Speech is very slow and uneven except for short or routine sentences.

3. Speech is frequently hesitant and jerky; sentences may be left uncompleted.

4. Speech is occasionally hesitant, with some unevenness caused by rephrasing and grouping words.

5. Speech on all professional and general topics as effortless and smooth as a native speaker's.

**Comprehension**

1. Understands too little for the simplest type of conversation.

2. Understands only slow, very simple speech on common social and touristic topics; requires constant repetition and rephrasing.

3. Understands careful, somewhat simplified speech directed to him, with considerable repetition and rephrasing.

4. Understands quite well normal educated speech directed to him, but requires occasional repetition or rephrasing.

5. Understands everything in normal educated conversation except for very colloquial or low-frequency items, or exceptionally rapid or slurred speech.

6. Understands everything in both formal and colloquial speech to be expected of an educated native speaker.
LINGUISTIC AREAS TO BE RATED

Pronunciation and Accent

A pronunciation which is sufficiently accurate to avoid confusion as to the particular sounds which the student intends is important to effective communication, and this aspect of the student's speech is evaluated in the course of the conversation. Beyond this, the student's degree of command of a phonetically accurate pronunciation (the absence of obviously non-native elements of accent, intonation and phrasing) is also taken into account, though to a lesser degree.

Grammatical Accuracy

In the Peace Corps language training program, considerable emphasis is placed on the development of grammatical accuracy. Since structure is indeed the backbone of the language, entering into each sentence produced regardless of the particular topic of vocabulary involved, it is reasonable and desirable that the Peace Corps program stress the development of an accurate structural command of the language. Given a good structural control of the host country language, the student should be able to develop a broader vocabulary and to increase his level of fluency through practice in the field. It is doubtful, however, that the student will greatly increase his structural accuracy in the field, since the Peace Corps experience has been that extensive practice in a formal and controlled (i.e., classroom) situation is usually required to master grammatical structures, especially those which differ from structures in the student's native language.

To check the student's level of grammatical control, the interviewers will typically attempt to stimulate a discussion of topics which require or suggest the use of various verb moods, tenses, and persons beyond the simple narrative present and and the first person ("I") forms. The accurate use of adjectives, adverbs, prepositions, and other aspects of language structure will also be evaluated in the course of the interview.

Vocabulary

The extent of the student's spoken vocabulary is noted throughout the course of the interview. Emphasis is placed on a wide-ranging vocabulary which allows the student to talk freely and accurately on a number of different topics, including but by no means restricted to vocabulary appropriate to his work assignment. The best preparation for the vocabulary aspect of the interview is not a last-minute study of a word lists but rather the gradual and natural accumulation of vocabulary through classroom work together with extensive outside exposure to the language through films, conversations with native speakers or more advanced students, and so forth.
Fluency

Fluency does not refer here to the absolute speed of delivery, since native speakers of any language often show wide variation in this area. Fluency, for purposes of the interview, refers to the overall smoothness, continuity, and naturalness of the student's speech, as opposed to pauses for rephrasing sentences, groping for words, and so forth.

Listening Comprehension

It is difficult to evaluate listening comprehension in a highly objective manner using a conversational technique. If a student is able to carry out a rather sophisticated conversation on the basis of spoken leads and comments given by the interviewer, it is reasonably certain that the student has acquired a listening comprehension proficiency at least up to the level represented by the general nature of the conversation. It is, however, possible that the student's listening proficiency as such could be quite high, but that limitations in his ability to speak the language would prevent his from responding readily to questions or conversational leads which he understood perfectly well. Plans are currently being made to develop a test of listening comprehension for Peace Corps use which would be administered independently of the language proficiency interview to provide additional information about this area of the student's language competence. In the meanwhile, students' listening comprehension ability will continue to be judged albeit somewhat roughly, on the basis of the face-to-face interview. The interviewers are instructed to give the benefit of the doubt to the student, and to assume as a matter of course that his listening proficiency is at least on a level with his interview performance.

RESOURCE DOCUMENT #9

Cloze Testing: How to Construct a Cloze Test

1. Select a self-contained passage of approximately 150 to 200 words taken from one of the books or materials you wish to use with your students.

2. Go through the passage and systematically delete every 7th word leaving the FIRST AND LAST SENTENCES INTACT. Try to make exactly 25 blanks as this makes scoring much easier. Important! Do not choose the items to be deleted: use every seventh word until you reach 25 blanks.

3. Type up a ditto making a blank for every deleted word. A blank of ten typewriter spaces is a good size, like this: _______. Now you have the test.

HOW TO ADMINISTER A CLOZE TEST

1. Be sure to give clear instructions to the students. They are to fill in one word in each of the blanks. There is no one "proper word" or "correct word" that fits in each blank. Several alternatives may be perfectly satisfactory as long as they make sense. The important thing to remember is that for each blank there is room for only one word.

2. It is sometimes wise to do a few easy sample sentences on the blackboard before students actually take the test. This gives the teacher a chance to clear up any confusions that might arise.

3. Give the test and allow as much time as is needed (within practical limits) for all students to complete it. Don't rush them.

HOW TO SCORE THE TEST

1. Go through the tests and count up the number of words that are right. For our children words are right if they are acceptable in the context.

2. Now calculate the percent of correct answers. If you have 25 blanks you can do this quite easily by merely multiplying the number correct by 4.

3. Compare your percentages against this table to see if the book is appropriate.
### Percent of Correct Answers*

<table>
<thead>
<tr>
<th>Correct Answers</th>
<th>Comprehension Level</th>
<th>Appropriate for your Class?</th>
</tr>
</thead>
<tbody>
<tr>
<td>above 53%</td>
<td>independent</td>
<td>Yes, it will make easy reading. It's especially appropriate for enjoyment, homework or independent activities.</td>
</tr>
<tr>
<td>between 44%-53%</td>
<td>instructional</td>
<td>Yes, it will make challenging reading for work within class.</td>
</tr>
<tr>
<td>below 44%</td>
<td>frustration</td>
<td>No, it is too difficult. It will probably discourage both you and your students.</td>
</tr>
</tbody>
</table>

### Words Deleted from Charlotte's Web:

|   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |
| 1. to | 6. front | 11. a | 16. up | 21. to |
| 2. as | 7. and | 12. was | 17. the | 22. At |
| 3. warmed | 8. another | 13. milk | 18. was | 23. moved |
| 4. and | 9. again | 14. when | 19. near | 24. and |
| 5. afternoon | 10. going | 15. for | 20. when | 25. fixed |

*These percentages are taken from an article by J. Anderson, "Selecting a Suitable 'Reader': Procedures for Teachers to Assess Language Difficulty". RELC Journal, Vol. 2, pp. 35-42. It is probably unwise to interpret these percentages rigidly—you can shift them several points, one way or the other.
I would like you to read this passage and fill in the blanks. This is the story of a mistaken identity. Some of the words have been left out. Read the whole story first, then go back to the beginning and fill each empty space with a word. Remember, you can fill one word in each blank space. There is no one "correct word" that fits each blank. Several alternatives may be satisfactory as long as they make sense. The important thing to remember is that for each blank space there is room for only one word. Make sure that you read the whole story first before you start filling any of the blank spaces.

Let us do one example together. If you see this sentence (write it out on board): The little ________ was eating an ice cream when ________ fell.

You need to fill each blank space with one word that fits. What word fits best in the first blank? Boy. What about the second blank? He. Now, start reading the story.

The Mistaken Identity

My father-in-law, whose name is Paul, was in a restaurant with a group of business associates. Suddenly, a distinguished-looking gentleman hurried to his table. Without being able to contain his question, the man began to take Paul's hand vigorously. As he did so, the stranger called him Joe and he recalled the great times they had together in the Army.

My father-in-law, has never served in the Army, gently told the stranger how he was mistaken. He had evidently confused him with someone else. The stranger was obviously very embarrassed. He waved profusely and left.

A week later, while leaving the same restaurant, Paul bumped into the stranger again. This time, Paul, the stranger hugged him, and to tell everybody around all about the sad story of two friends in the Army who had not seen each other for two years. Before Paul could say a word, the stranger said: "You know, you are going to believe this, I met some guy here last week who just like you!"

**Teacher-Made Stories**

**TITLE**

**TEACHER MADE STORIES FOR ESL LITERACY SCREENING**

(by (to be prepared for your own students))

**DESCRIPTION**

**PURPOSE:** To determine basic literacy (reading and copying) skills. Ongoing. Test of mastery/achievement.

**CONTENT:** Short stories about the students can test eye-hand coordination, letter strokes, and reading for sense.

**PROCEDURES:**
1. Develop language experience stories about your students. (5-7 sentences, with a title).
2. Write the stories than rewrite but as numbered close sentences. (Also see page 4 in this Manuals.)
3. Ask students to complete the numbered sentences for the story. They may look.

**NOTE:** Do not test for grammar skills, just for literacy.

**TARGET:** Students in ESL literacy classes, or students entering the program. Non-literate or pre-literate learners.

**ADMINISTRATION**

**HOW:** Group. Paper and pencil. After developing, teaching, and practicing the stories.

**MATERIALS:** Worksheet/story sheet (specially prepared).

**SCORING:** Individual progress records are kept. Teacher marks correct answers on blackboard. Then collects papers.

**SAMPLE QUESTIONS**

Ying And Her Sister

Ying lives in Elgin. Her sister lives in Hanover Park. Ying wants to visit her sister. Ying does not have a car. What can she do?

1. ___ing lives in ___lgin.
2. Her ___ister lives in Hanover ___ark
3. Ying wants to ___ her sister.

(From Mary Kearney, ESL Literacy Instructor, Elgin YWCA)

Use any small 1/4 inch piece of metal that is in the shop. Burn three holes in the metal. The holes should be about 1/2 inch wide. Then burn two sides of the metal piece. Only 2 holes and 1 side will be tested by your teacher.

1. Make _____ holes.
   a) 1   b) 2   c) 3   d) 4

2. The hole should be _____ wide.
   a) 2 inches   b) 1 inch   c) 1/2 inch   d) 1/4 inch

3. The teacher will test _____ holes.
   a) 1   b) 2   c) 3   d) 4

4. Burn _____ sides.
   a) 1   b) 2   c) 3   d) 4

5. The piece is _____.
   a) plastic   b) shop   c) metal   d) big
1. ___________ and acetylene are the two gases that are mixed.
   a) nitrogen    b) torch    c) oxygen    d) regulator

2. The tanks are controlled by a ___________.
   a) tank    b) torch    c) hose    d) regulator

3. The gases go from the tanks to the torch through a ___________.
   a) hose    b) torch    c) tank    d) tip

4. The gases mix to make a ___________.
   a) torch    b) flame    c) mixing chamber    d) tip

5. The flame reaches a temperature of ___________.
   a) 600    b) 6,000    c) 16,000    d) 60,000
OIL CHANGE STEPS

1. Raise and support the car.
2. Put a drain pan under the engine.
3. Find the drain plug on the engine oil pan.
4. Use socket wrench or box wrench to loosen the drain plug by turning it counter clockwise.
5. Put the plug under the plug and remove the plug.

NOTE: Be careful. Hot engine oil can cause severe burns.
6. After draining the oil, install the drain plug, dispose of the waste oil.
7. Lower the car.
8. Fill the crankcase with the proper amount of oil.
9. Run the engine and check for leaks.

1. Protect your hands from burns when draining _____ oil.
   a) dirty  b) hot  c) old  d) expensive
2. Two wrenches that perform the same job are a socket wrench and a ________.
   a) pan wrench  b) box wrench  c) plumber's wrench  d) oil wrench
3. Used oil should be ____________
   a) re used  b) disposed of  c) filtered  d) saved
4. Fill the crankcase with ______________ of oil.
   a) 4 quarts  b) 5 quarts  c) 6 quarts  d) the correct amount
5. The oil will ______ if the drain plug is not put back in.
   a) get hot  b) get thick  c) level  d) leak out
1. Gas in a can or tank is in the form of:
   a) liquid
   b) vapor
   c) gas
   d) water

2. Gas is vaporized by mixing it with:
   a) vapor
   b) fuel
   c) air
   d) water

3. An average mixture has a ratio of 15 pounds of air to 1 pound of gasoline.
4. The opposite of a rich mixture is a:
   a) poor
   b) vapor
   c) lean
   d) light

5. When a gasoline tank is filled to 20 gallons capacity, the tank:
   a) holds
   b) mixes
   c) burns
   d) sells

1. Gas in a can or tank is in the form of:
   a) liquid
   b) vapor
   c) gas
   d) water

2. Gas is vaporized by mixing it with:
   a) vapor
   b) fuel
   c) air
   d) water

3. An average mixture has a ratio of 15 pounds of air to 1 pound of gasoline.
4. The opposite of a rich mixture is a:
   a) poor
   b) vapor
   c) lean
   d) light

5. When a gasoline tank is filled to 20 gallons capacity, the tank:
   a) holds
   b) mixes
   c) burns
   d) sells
The letter of application expresses interest in a job. Since the letter of application is your first contact with a possible employer, it is important that the letter give a good impression.

A resume includes your education, job experience, and personal information. One page is usually best.

In a reference request letter, you ask someone to send a recommendation. For instance, you might ask a teacher to recommend you for a job. The reference request letter you send to your teacher asks to give the recommendation.

After an interview, you send a follow-up letter to thank the personnel manager for seeing you. Since the follow-up letter is used as a courtesy, you should send one even if you decide not to take the job.

1. When you contact an employer you ______.
   a) touch him  b) con him  c) ask him  d) show interest in a job

2. On a resume this item - welder 1975-77, overhead welder specialist 1977-81 - would come under ______.
   a) education  b) job experience  c) personal information  d) fun

3. The reference request letter asks for a ______.
   a) job  b) raise  c) recommendation  d) teacher

4. The person who hires someone is called the ______ manager.
   a) employer  b) interviewer  c) decider  d) personnel

5. The ______ letter says thank you.
   a) application  b) resume  c) reference  d) follow-up
1. Atoms can have ______ seven orbital paths.
   a) more than b) upper c) lower d) as many as

2. The difference between levels 1 and 2 is ______ electrons.
   a) 2 b) 4 c) 6 d) 8

3. The fifth shell would be called the ______ shell.
   a) 5 b) fifth c) Z d) 0

4. The ______ levels fill up first.
   a) lowest b) middle c) center d) highest

5. The levels fill up with ______
   a) electricity b) electrons c) energy d) shells
VESL PLACEMENT TEST PROCEDURES

1. Have the student fill out the information blanks on the cover page.
2. Make sure the volume is okay on the tape recorder. Show the student how the volume control works.
3. Explain to the student that once the tape is started it cannot be stopped until the test is finished.
4. Explain to the student that all instructions are on the tape.
5. Start the tape. Watch to see that the student understands.
6. Grade the test at the end by marking the number of incorrect answers at the bottom of each page.
7. Conduct a personal interview by asking the student: What class he/she wants and why. What school he/she has attended in the U.S. What job interests he/she has. What job experience he/she has. How much English he/she uses at home, on the job, and with friends.
8. Determine placement by combination of test results and personal interview results.

VESL PLACEMENT TEST BACKGROUND

The VESL Placement Test consists of six parts---

<table>
<thead>
<tr>
<th>Subject Area</th>
<th>Degree of Difficulty</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Welding Reading</td>
<td>EASY</td>
</tr>
<tr>
<td>2) Welding Listening</td>
<td></td>
</tr>
<tr>
<td>3) Automotive Reading</td>
<td>MODERATE (Also tests for Machine Tool)</td>
</tr>
<tr>
<td>4) Automotive Listening</td>
<td></td>
</tr>
<tr>
<td>5) Business Reading</td>
<td>DIFFICULT</td>
</tr>
<tr>
<td>6) Plastics Listening</td>
<td></td>
</tr>
</tbody>
</table>

Each part is based on actual material that the student faces in class. Reading and listening language skills are stressed because these are the areas that vocational instructors at ECC have identified as most important. Placement is based on the student's ability to comprehend at least half of his or her intended subject area as well as some comprehension of the other areas. Placement is also influenced by information obtained in the personal interview (regarding language and academic skills not readily apparent from the testing).

Guidelines for Evaluation of Compositions

Control over English Structure

Excellent: Few, if any noticeable errors of grammar or work order. Frequent use of complex sentences.

Very good: Occasional grammatical and or word-order errors. Some use of complex sentences.

Good: Frequent grammar and word-order errors. General use of simple sentences.

Fair: Many errors in grammar make comprehension difficult. Use of short basic sentences.

Poor: Severe errors in grammar and word order. No apparent knowledge of English.

Compositional Organization

Excellent: Well-developed introduction which engages concern of the reader. Use of internal divisions and transitions. Substantial paragraphs to develop ideas. Conclusion suggests larger significance of central idea.

Very good: Obvious inclusion of an introduction through not smoothly developed. Division of central idea into smaller parts through paragraphs are lean on detail. Conclusion restates the central idea.
Good: Intent to develop central idea is evidenced but only a few points are mentioned. The introduction or conclusion is very simply stated or may be missing. Occasional wandering from topic.

Fair: Limited organization. Thoughts are written down as they come to mind. No introduction or conclusion.

Poor: No organization. No focus. No development. No major consideration of topic.

Quantity of Writing

Excellent: Writing is an easy task. Quantity seems to be no problem.

Very good: Reasonable quantity for the time. Writing flows without much hesitation.

Good: Enough writing to develop the topic somewhat. Evidence of having stopped writing at times.

Fair: Much time spent struggling with the task of putting down thoughts on paper.

Poor: Very little writing during the hour-long assignment.

Appropriateness of Vocabulary

Excellent: Precise and accurate word choice. Obvious knowledge of idioms. Aware of word connotations. No translation from native language apparent. May have attempted a metaphorical use of words.

Very good: Occasional misuse of idioms, but little difficulty in choosing appropriate forms of words. Uses synonyms to avoid repetition. Some vocabulary problems may be due to translations.

Good: Use of the most frequently occurring words in English. Does not use synonyms to avoid repetition. Some inappropriate word choices. Uses circumlocutions or rephrasing when the right word is not available.

Fair: Depends upon a very small vocabulary to convey thoughts. Repetition of words is frequent. Appears to be translating.

Poor: Vocabulary is extremely limited.

Guidelines and Questions for Conducting A Vocational Interest Interview with LEP Students.

The purpose of the vocational interest interview is to maintain a conversation with the LEP student that will allow the interviewer (using a bilingual interpreter, if needed) to determine the vocational interest of the LEP student.

The following steps may be taken:

1. Make every effort to put the student at ease.

2. Show interest in the student by exhibiting patience and establishing rapport with the student.

3. Then proceed by asking the following questions that may be helpful in understanding which job or jobs the student might like to perform best:

- Do you prefer to work alone or with others? Circle One
  - Alone
  - With Others

- Do you prefer a job which would require you to do a lot of standing and walking or one which would allow you to sit? Stand/Walk
  - Stand
  - Walk
  - Sit

- Do you prefer to try new tasks or do the same tasks? New/Same
  - New
  - Same

- Do you enjoy doing a task or telling other people how they should do it? Doing/Telling
  - Doing
  - Telling
  - it
  - others

- Do you prefer to work outdoors or indoors? Out/In
  - Out
  - In

- Do you prefer to work where it is quiet or where it is noisy? Quiet/Noisy
  - Quiet
  - Noisy

- Do you prefer a job where there is little or no change or one where there are many changes? Little/Many Changes
  - Little
  - Changes
  - Many

- Do you like a job which can always be done at the same rate or one which may need to be done very quickly? Same/Soon rate
  - Same
  - rate
  - Soon
  - and fast

- Do you prefer to express your ideas by talking or writing? Talking/Writing
  - Talking
  - Writing
Do you prefer a job which requires a lot of physical energy or one which requires a lot of thinking?

Do you prefer a job where you might get dirty or one where you must stay neat and clean?

Do you keep calm when you have several tasks to do at one time or do you work best when there is only one task to do at a time?

Do you prefer to work with tools or numbers?

Do you prefer regular work hours or work hours that change?

Do you prefer to work the day shift or the night shift?

Would you prefer to work in a formal setting or a casual setting?

Do you prefer to work with people or work with objects?

Would you prefer to make something or to sell something?

Do you prefer to plan how a task is to be done or to have others be responsible for planning and organizing it?

Would you prefer a job which requires a lot of training to develop skills or one that requires little training?

</tbody>
</table>

General Comments on Student's Level of Competence

1. Is neat and has good line work, has a good working relationship with fellow students, follows directions well.
2. Drafting instructor has indicated that he needs to increase speed in completing work. Needs to build confidence in performing basic skills and in the visualization process to keep from wasting time on repeating activity over and over on the same problem.
3. Drafting & CAD Ed. instructors noted that written instruction seems to prevent any breakdown that usually occurs with verbal communication.
4. Even though Chris works well with others, a few students have had a difficult time understanding Chris's language. Since two of these students are now enrolled in drafting, we may need to help them in understanding Chris's language.

Instructions for Developing and Using the Career Competence Interview Guide

This interview guide is to be used by the vocational instructor when interviewing persons most familiar with the student's school and work performance (e.g., parents, former instructor, student). Its purpose is to obtain an initial reading of the student's strengths and weaknesses in relation to particular areas within the vocational course curriculum. This instrument should be most helpful for planning the learner's program when used prior to the student's actual participation in the course. It could be used shortly after the course begins, but, at this time, direct assessment strategies (e.g., entry level performance sampling, systematic observation) can be used and will likely provide as much or more specific planning information.

The following steps are suggested for developing and using the Career Competence Interview Guide:

Identifying Competence Areas

1. When the student is known to have had prior training and/or work experience in the course content area, detailed information on the student's level of competence may be sought. If this is the case, then the instructor could identify and list the major course content areas, or unit topics, on the guide, as was done in Resource Document #17.

2. If, however, the student is known to have had little or no prior training and/or experience in the course content area, or, if the course is, for example, a general work experience program, then a listing of basic job-entry competencies (e.g., job application, interview, following directions, employer-employee relations) may be more applicable.

3. Or, depending on the course content and the student's prior experience and/or training, the instructor may select a mixture of basic entry and specific occupational competence areas (combination of 1 and 2 above).

Constructing the Survey

1. Once the competence areas are identified, the next step is to list them on the competence guide. Place each competence area in the space located at the top of the guide, underneath the title "Areas of Competence."

2. In the example interview guide, the person being interviewed may provide information on student competence at one or more levels. Four levels are listed on the left hand column of the guide and are defined as follows:
A. The student has had instruction related to the particular competence area. This level indicates the person may know the student has had formal instruction in this area, but he or she may or may not be aware of related work experience and the degree of student knowledge and performance in this area.

B. The student has had work experience related to the particular area. The person reporting may know the student has had related work experience and may or may not be able to tell you the student's level of knowledge and performance in each competence area.

C. The student has demonstrated knowledge of concepts related to a given competence area. In this case, the person being interviewed can provide information on the degree to which the student has demonstrated an understanding of the technical or cognitive knowledge associated with the competence area. For instance, the person reporting may indicate the student is able to pronounce and spell the major terms on an application form (cognitive knowledge). However, the student's performance in filling out an application form may or may not be known.

D. The student has performed within the competence area simply means the person reporting is able to indicate the student's performance level in a particular competence area.

3. Once the competence areas are identified and listed, several copies of the instrument should be reproduced. It is recommended that the instructor use one copy per interview and one copy be given to each person interviewed for personal reference.

Using the Interview Guide

1. During the interview, each competence area is to be discussed. The instructor will want to record comments in the appropriate blocks, making more detailed notes of particular areas of student strength and weakness.

2. Resource Document 18 offers additional suggestions for organizing and conducting the interview and for compiling the results of the interviews.

**General Comments on Student's Level of Competence**

Suggested Procedure for Interviewing Key Personnel

Prior to the Interviews

- Determine key persons to be interviewed.
- Determine content and format for an interview guide.
- Construct interview guide, or list general questions to be addressed during the interview.
- Contact key personnel to explain purpose of the interview and to arrange a convenient meeting time and place.

During Each Interview

- Restate the purpose of the meeting.
- Provide a copy of guide or key questions to the person(s) being interviewed. Explain how the interview will proceed.
- If unsure about a person's response, ask for clarification or for additional information.
- Be observant of non-verbal as well as verbal responses.
- Close meeting by sharing how this information will be used.

After the Interviews

- Compare responses of persons interviewed.
- Look for common areas of concern, but also be sensitive to individual responses.
- Determine areas of student's strength and weakness.

Instructions for Administering the Building Trades Performance Sample

The performance sample should be administered by the Building Trades instructor, an Industrial Education teacher or someone trained and/or experienced in the building trades area. For increasing the reliability of observations, it is recommended that more than one person observe and record student performance.

Material Needed:

- 1 piece of 1" x 4" at least 8' long
- 24 6d nails
- Damp or wet sand in container - approximately 18" in diameter
- Instruction sheet

Equipment and Tools Needed:

- Crosscut saw
- Framing square
- Hammer
- Pencil
- Level
- Safety glasses
- Tape measure

Items needed by individual administering performance test:

- Evaluation form
- Timing device
- Pencil or pen

*Adopted from sample used in the Building Trades program, Vermilion Occupational Technical Education Center, Danville, Illinois. This sample was developed by the building trades instructor and the vocational director at this vocational center.
Before starting the student on the performance sample, the administrator should review with the student(s) the material and equipment needed. Also, the administrator should inform the student that she or he may ask questions at any point during this exercise. If a student has difficulty reading the instruction sheet, the individual administering the test should explain the instructions in detail. Likewise, if a student cannot read the drawings, an actual sample should be furnished. The student is now ready to begin the performance test.

The administrator is to observe the student during the performance, while recording on the checklist provided (Example Document #3c). In addition to the items noted on the checklist, the individual administering the test may find it helpful to record the type and frequency of questions asked by the individual(s) taking the test. This could indicate some area of difficulty in the test conditions. After the completion of the performance test, the student's finished product should be checked for accuracy by the individual administering the test.

INSTRUCTIONS FOR STUDENT COMPLETING THE BUILDING TRADES PERFORMANCE SAMPLE

Rationale: As a student recently enrolled in the Building Trades program, you are to read the following directions and complete each step as directed. This test will give you an opportunity to demonstrate the skills you already possess, as well as identify the areas you may need help in while enrolled in Building Trades. The skills used in completing this performance test relate to a great majority of the tasks you will be involved in while completing your Building Trades program.

MATERIAL NEEDED:
- 1 piece of 1" x 4" at least 8' long
- 24 6d nails
- Damp or wet sand in container at least 18" in diameter

EQUIPMENT NEEDED:
- Crosscut saw
- Framing square
- Hammer
- Pencil
- Level
- Safety glasses
- Tape measure

*Adopted from sample developed and used in the Building Trades program, Vermilion Occupational Technical Education Center, Danville, Illinois.
Objective of this Activity:

Upon completion of this activity, you will have demonstrated the following skills:

- Sawing - cut squarely to within 1/8" accuracy
- Measuring - to within 1/8" accuracy
- Squaring - to within 1/8" over 12 inches
- Nailing - securely and without missing the nail
- Leveling - to at least 1/8" of the bubble (1/8" accuracy on a 24" level over 12 inches)

Steps:

First, check to see if all needed material and equipment are available. Second, read each step carefully. Begin working on the performance sample, practicing safety during the entire activity.

Step 1. Review complete procedure sheet.

2. Cut 2 - 1" x 4" boards 12" in length.

3. Cut 2 - 1" x 4" boards to the correct length (12" less the thickness of 2 - 1 x 4).

4. Using 6d nails, assemble the 1 x 4 frame using 3 nails to each corner (drawing #1).
5. Check frame for squareness and measuring accuracy.
6. Cut 4 - 1" x 4" boards to correct length (11" long).
7. Cut points (45° from center line on one end of each stake (drawing #2).
3. Nail stakes to each corner of the 1" x 4" frame using 3 6d nails in each stake (drawing #3).
9. Level the frame in the container of sand (drawing #4).

10. Clean up your work area.

11. Notify the test administrator that you have completed the activity and are ready to discuss your performance.

THANK YOU!

OVERALL COMMENTS AND RECOMMENDATIONS

STATEMENT OF PRESENT LEVEL PERFORMANCE

Steps Followed in Developing and Administering the Building Trades Entry Level Performance Sample

- Identified common knowledge and skills within the vocational course.

After reviewing the course objectives, the instructor concluded that there were some tools, materials and equipment used throughout the course (e.g., crosscut saw, hammer, level, wood, nails). In designing the sample, the instructor decided that an assessment of the actual use of tools and materials (direct performance assessment) would provide a truer picture of the student's competence than would a written or verbal test over the use of these items (indirect performance assessment). Through direct observation of the student constructing a sample, the instructor was able to judge the extent to which the student 1) followed directions, 2) used tools and materials, 3) stayed with the task, and 4) constructed the product.

- Provided instructions to the test administrator or observer.

A written instruction sheet was developed which included: 1) who should administer the sample, 2) material, equipment and tools needed, and 3) items needed and factors to be considered in administering the sample (Resource Document #19a).

- Provided instructions to the student.

Written instructions to the student provided her/him with the rationale for completing the sample, the objective of the sample, the material/equipment and tools needed, and a detailed listing of procedures to follow to complete the task, along with drawings of each major step (Resource Document #19b).

- Developed a Student Performance Rating Form.

A rating form for assessing the student's performance was also provided (Resource Document #19c). Suggestions for using this instrument were stated in the instructions to the administrator (Resource Document #19a).

- Pilot tested and revised the sample.

This sample was administered to one student and revised several times following this try-out. The instructor plans to continue using this sample and, therefore, it is likely to undergo further revision.

Introduction

The purpose of this sample is to determine the strengths of students in basic language skills which might affect performance in beginning typing. The test has been adapted from the Century II Typewriting textbook. It is also suitable for use with 20th Century Typewriting.

Grammar

Directions to the student: Read each sentence. Pay close attention to the underlined part. Decide which sentence is correct, and write the letter of the correct sentence on the answer sheet.

1. a. One of the applicants are here to see you.
b. One of the applicants is here to see you.

2. a. My mother and my father is away this week.
b. My mother and my father are away this week.

3. a. Everyone in the class is typing well.
b. Everyone in the class are typing well.

4. a. The jury have returned its verdict.
b. The jury has returned its verdict.

5. a. All the food has been frozen.
b. All the food have been frozen.

6. a. The cars don't work properly.
b. The cars doesn't work properly.

7. a. Neither of the boys brought their lunch.
b. Neither of the boys brought his lunch.

8. a. The winner of both events were from our school.
b. The winner of both events was from our school.

9. a. Jane, who is a member of the class, has finished its work.
b. Jane, who is a member of the class, has finished her work.

10. a. All of us have completed our project.
b. All of us have completed his project.

*Permission received for use herein from Edwardsville School District, Illinois, and South-Western Publishing Company.
PUNCTUATION

Directions: Read each sentence. Decide which sentence is punctuated correctly. Write the letter of the correct sentence on the answer sheet.

11. a. If you can go we will go swimming.
   b. If you can go, we will go swimming.

12. a. We shall visit Chicago, St. Louis, and Dallas.
   b. We shall visit Chicago St. Louis and Dallas.

13. a. You know, Larry, that your paper is late.
   b. You know Larry that your paper is late.

14. a. Ellen was born on December 6, 1963.
   b. Ellen was born on December 6, 1963.

15. a. She lives in Green Bay, Wisconsin.
   b. She lives in Green Bay Wisconsin.

16. a. He yelled, "Fire."
   b. He yelled, "Fire!"

17. a. When are you leaving for work.
   b. When are you leaving for work?

18. a. He named his three favorites: Dylan, Denver, and Collins.
   b. He named his three favorites Dylan, Denver, and Collins.

19. a. Mr. Jones is a door-to-door salesman.
   b. Mr. Jones is a door-to-door salesman.

20. a. Senator Percy Illinois went to the meeting.
   b. Senator Percy (Illinois) went to the meeting.

21. a. The book Jaws was written by Benchley.
   b. The book Jaws was written by Benchley.

22. a. She asked, When did the shipment arrive?
   b. She asked, "When did the shipment arrive?"

23. a. I read the article The Next Twenty Years.
   b. I read the article "The Next Twenty Years."

24. a. To criticize is easy; to help is not so easy.
   b. To criticize is easy; to help is not so easy.

25. a. Pay Mr. Smith's bill.
   b. Pay Mr. Smith's bill.
CAPITALIZATION

Directions: Read each sentence. Pay close attention to the underlined letters. Decide which sentence is capitalized correctly. Write the letter of the correct sentence on the answer sheet.

26. a. She said, "hard work is needed for success."
   b. She said, "Hard work is needed for success."

27. a. He will see President Carter on Friday.
   b. He will see President Carter on Friday.

28. a. We watched the Canadians play hockey.
   b. We watched the Canadians play hockey.

29. a. We went on a picnic on Labor Day.
   b. We went on a picnic on Labor Day.

30. a. We went to church on Sunday.
   b. We went to church on Sunday.

31. a. My father fought in World War II.
   b. My father fought in World War II.

32. a. Her favorite season is Spring.
   b. Her favorite season is spring.

33. a. The store is on Main Street.
   b. The store is on Main Street.

34. a. The Boy Scouts had a meeting.
   b. The Boy Scouts had a meeting.

35. a. The assignment begins on Page 200.
   b. The assignment begins on Page 200.
Spelling

Directions: Decide which one of the two words is spelled correctly. Write the letter of your answer on the answer sheet.

36. a. receive
   b. reclev

37. a. separate
   b. separate

38. a. dscricb
   b. describe

39. a. dining
   b. dinig

40. a. doesn’t
   b. doesn’t

41. a. February
   b. February

42. a. coming
   b. coming

43. a. stopped
   b. stopped

44. a. disappear
   b. disappear

45. a. embarrass
   b. embarass

WORD DIVISION

Directions: Decide which one of the two words is divided correctly. Write the letter of your answer on the answer sheet.

46. a. fin-m-rlal
    b. fl-nan-cial

47. a. stress-in;
    b. stres-sing

48. a. sum-mer
    b. summ-er

49. a. run-ning
    b. runn-ing

50. a. jump-ing
    b. jum-ping
PROBLEMS

Directions: Follow the instructions for each problem. Write the letter of your answer on the answer sheet. DO NOT WRITE ON THIS TEST.

51. The center of your paper is at 50 on your typewriter. To find the left margin, you subtract 1/2 of your typing line from the center point of your paper. Where do you set your left margin for a 60-space typing line?
   a. 10   b. 20   c. 25   d. 30

52. There are 66 vertical typing lines on a full sheet of typi:ng paper. To find the top margin, subtract the total number of typing lines needed for the problem from 66. Next, divide that number by 2. Finally, add 1, and that answer will be the number of lines needed for your top margin. If you need 30 lines for your typing problem, how many lines will you have in your top margin?
   a. 14   b. 16   c. 18   d. 19

PROOFREADING

Directions: Read sentence. Decide if it is right or wrong. If the sentence is completely right, mark TRUE on the answer sheet. If the sentence has any mistakes in it, mark FALSE on the answer sheet.

53. My carr needs new tires.
   54. The cost of living is rising.
   55. You can paint teh house next week.
   56. How do you know what todo with the mixer?
   57. John wants to save his money for a motorcycle.
   58. Mary is a net dresser.
   59. Business letters should be neatly typed.
   60. Next month I shall be gin my new job.

**Total Score:** 175
Jobs In America is a series of 15 slide-tape shows designed to present vocational information to persons of limited English-speaking ability. Each six- to eight-minute show deals with a specific job and consists of approximately 50 color slides showing persons engaged in the work.

Cassette tapes in English and six other languages accompany each show. The narration describes the nature of the work and gives basic facts about places of employment, tools and equipment used in the work, training required, opportunities for advancement, employment outlook, earnings, and working conditions. Vocabulary sheets explaining difficult or technical English words and phrases are available for discussion prior to viewing the shows.

A complete Jobs In America package includes:

15 sets of approximately 50 color slides each.

Unit 1 - Automobile Mechanics
Unit 2 - Carpenters
Unit 3 - Electronics Assemblers
Unit 4 - Clothing Machine Operators
Unit 5 - Office Workers
Unit 6 - Machinists
Unit 7 - Licensed Practical Nurses
Unit 8 - Welders
Unit 9 - Teacher Aides
Unit 10 - Data Entry Operators
Unit 11 - Cooks
Unit 12 - Beauticians
Unit 13 - Dental Assistants
Unit 14 - Building Maintenance Workers
Unit 15 - Drafters

105 cassette tapes (7 per show) containing narrations in:

- English
- Cambodian
- Hmong
- Mien
- Spanish
- Vietnamese
- Laotian

Written scripts and vocabulary sheets accompany the English narrations.

Price of the complete package of 15 shows is $500. Individual components of the shows are priced as follows:

- 1 complete show (one occupation), including 50 to 60 slides, tapes in 7 languages, English script and vocabulary sheet: $50
- 1 set of slides in carousel (one occupation), without tapes: $25
- 1 individual tape (one occupation, one language): $5

There is a possibility that additional shows will be produced in the future. Any suggestions concerning topics of further shows would be welcomed.

ABSTRACTS OF TESTS

Selected Abstracts in this Section were taken from the following sources:

A. English-as-a-Second Language Oral Tests
1. **Ilyin Oral Interview, Donna Ilyin**

   Grade Range: 7-Adult

   Can be Administered to: Individuals

   Time for Administration: 5-30 minutes

   Language: English

   Source: Newbury House Publishers

   68 Middle Road
   Rowley, MA 01969

   The Ilyin Oral Interview is designed to test a student's ability to use English orally in response to hearing it in a controlled situation. The interview may be used to place incoming students in an appropriate level English as a Second Language class; to show achievement gains in a pre/post-test situation; or to correlate an individual's oral proficiency with his performance on tests that require reading or writing skills. The interview consists of 50 items, progressing from simpler to more difficult. Each item is scored for accuracy of information and accuracy of structure, including word order, verb structure and other structures; pronunciation and fluency are not scored.

2. **The Original John Test**

   Grade Range: 7-Adult

   Can be Administered to: Individuals

   Time for Administration: Variable

   Language: English

   Source: Linc Publications

   2112 Broadway - Suite 515
   New York, NY 10023

   This is an oral language proficiency test. There are two forms of the Original John Test available: short form and long form. The short form consists of two parts. Part I consists of structured questions around accompanying illustrations. Part II consists of open-ended discussion questions. The long form is comprised of three parts: Part I has structured questions from the accompanying illustrations; part II connected discourse rating pronunciation fluency, vocabulary, and structure and part III consists of forming questions from answers given by the teacher or test administrator.
3. English as-a-Second Language Oral Assessment (ESOLA)

- **Grade Range:** 7-Adult
- **Can be Administered to:** Individuals
- **Time for Administration:** 3-15 minutes
- **Language:** English
- **Source:** Literacy Volunteers of America, Inc.
  Sixth Floor
  Midtown Plaza
  700 East Water Street
  Syracuse, NY 13210

This test uses a flip chartbook to measure a student's oral production and aural comprehension. There are four levels, including: (1) no oral response necessary, (2) assesses survival vocabulary, (3) assesses ability to answer information questions, and (4) assesses ability to use English forms accurately.

4. Oral Placement Tests for Adults

- **Grade range:** Beginning to Intermediate
- **Can be Administered to:** Individuals
- **Time for Administration:** 3-15 minutes
- **Language:** English
- **Source:** Southwest Cooperative Educational Laboratory, Inc.
  1414 San Mateo Boulevard, S.E.
  Albuquerque, NM 87108

This is a 46 item test which is divided into 4 parts: (1) social conversation, (2) repetition, (3) more involved conversation, and (4) structural changes. The student responds to questions and responses are evaluated as directed in the test manual. The test will provide a measure of oral production and aural comprehension skills.
5. The Peace Corps Language Proficiency Interview

Grade Range: Beginning to advanced
Can be Administered to: Individuals
Time for Administration: 5-15 minutes
Language: English

"Disruption of the Peace Corps Language Proficiency Interview" (Both available through the Illinois Statewide ESL/AE Service Center.)

This test was developed by the Foreign Service Institute to evaluate language proficiency of Peace Corps members in training. Criteria could be adapted by ESL teachers to develop their own oral interview.

Rates speakers on pronunciation, accent, grammar, vocabulary, fluency, and listening comprehension.

Interview is tape recorded and then rated on a scale from 1 to 5. Score of 1 = speaker able to do simple tasks such as ordering meals, etc. 5 = language proficiency equivalent to a native speaker.

6. The Bilingual Vocational Oral Proficiency Test (BVOPT)

Grade Range: Adults
Can be Administered to: Individuals
Time for Administration: 30 minutes
Language: English
Source: Melton Peninsula Inc.
1949 Stemmons Freeway, Suite 690
Dallas, TX 75207
(214) 651-1703

The Bilingual Vocational Oral Proficiency Test (BVOPT) is the only test that has been developed specifically for use with limited English proficient students in bilingual vocational training programs. This test measures oral proficiency (listening and speaking) rather than reading and writing skills. This test serves a dual function, it assists in the placement of students in vocational training programs,
and then helps in assessing vocational English skills when training is completed.

It is important to note that though this test was designed specifically for one kind of program—bilingual vocational training—this test is appropriate for any program whose students are adolescents, adults, limited speakers of English, and involved in learning either vocational or life skills. Some appropriate programs would include: manpower, adult basic education, special education programs, continuing education programs.

The test consists of the following four parts:

1. Questions and Answers
2. Open-ended Interview
3. Elicited Imitation
4. Imperatives (based on colorful photos)

7. Functional Language Survey

Grade Range: K-12
Can be Administered to: Individuals
Time for Administration: 7-15 minutes, not timed
Language: English
Source: Chicago Public Schools
Department of Research and Evaluation
228 North LaSalle Street
Chicago, IL 60601

The Functional Language Survey is not a test, but rather a survey of students' ability to comprehend and produce English. It consists of a total of 15 questions in 3 sections.

1) Comprehension
2) Production/Repetition
3) Comprehension/Production

The FLS technical manual states that it is imperative that examiners complete an inservice training session. It is important to practice administering and scoring student results on the instrument because of the subjectivity of scoring.
1. **Bilingual Syntax Measure II**

<table>

The bilingual Syntax Measure II (BSM) is designed to measure a student's oral proficiency in English and/or Spanish grammatical structures by using natural speech as a basis for making judgements. The BSM encourages students to express their thoughts and opinions freely. The syntactic structures that the students use to express these thoughts are the important indicators for structural proficiency.

The BSM II is designed primarily for students who are 10 years and older and who are enrolled in classes from grades 3-12. To elicit natural speech, simple questions are used with cartoon-type pictures to provide the framework for a conversation with the child. An analysis of the student's speech in answering these questions yields a numerical indicator and a qualitative description of the child's structural language proficiency range from Level 1 where the student neither speaks nor comprehends the language in which the test is being administered to Level 5 where the student is as proficient as his peers who are native speakers of that language.

The BSM is available in two languages - BSM-E (English) and BSM-S (Spanish). The Picture Booklet contains seven cartoon-type pictures and is used for the administration of either the BSM-E or the BSM-S. Two Manuals - one in English, one in Spanish -- contain directions for administering the tests, scoring procedures, a description of the proficiency levels, and suggestions for instructional uses. There are two response booklets -- each contains specific directions to the examiner, the questions that the student is to be asked, and spaces for recording and scoring the student's responses. The supplementary technical material contains the rationale and various types of technical data of interest to researchers.
2. **Bahia Oral Language Test (BOLT)**

- **Grade Range:** 7-12
- **Can be Administered to:** Individuals
- **Time for Administration:** Variable
- **Language:** English
- **Source:** BAHIA, Inc.
P.O. Box 9337
North Berkeley Station
Berkeley, CA 94709

This oral language test developed and field tested in California consists of 20 items divided into four levels. The test uses syntactical development or proficiency as the foundation to its rating system. The authors state "The BOLT test is a comprehensive, intermediate-and secondary English language proficiency test that assesses oral language skills ranging from understanding simple sentence patterns to using complex syntactical forms of the language."

The test kit consists of the test manual, picture booklet, 30 answer sheets and a class record book. Technical report consisting of reliability and validity data is also available.

3. **Test of Aural Comprehension, Robert Lado**

- **Grade Range:** 7-Adult
- **Can be Administered to:** Groups
- **Time for Administration:** 40 minutes
- **Language:** English
- **Source:**

  English Language Institute
  University of Michigan
  2001 N. University Bldg.
  Ann Arbor, MI 48109

This objective test consists of 60 items available in three forms. The student hears a passage then sees a picture and selects the correct depiction of the item. Also, the student reads a statement then chooses the appropriate response.
C. English-as-a-Second Language Reading Tests
1. **Botel Reading Inventory**, Morton Botel

   - **Grade Range:** 7-Adult
   - **Can be Administered to:** Groups or Individuals
   - **Time for Administration:** 5-10 minutes per test
   - **Language:** English
   - **Source:** Follett Publishing Company
     1010 W. Washington
     Chicago, IL 60607

   This test to diagnose reading skills has four parts, (1) Decoding test to measure awareness of letter sounds and rhyming and spelling patterns, (2) Spelling test to measure ability to spell high frequency words, (3) Word recognition to measure oral reading fluency, and (4) Word opposites to measure vocabulary comprehension skills. There are scoring sheets and a manual included.

2. **An English Reading Test for Students of English as a Foreign Language**, Harold King and Russel Campbell

   - **Grade Range:** Intermediate to advanced
   - **Can be Administered to:** Groups or individuals
   - **Time for Administration:** 30 minutes
   - **Language:** English
   - **Source:** English Language Services
     14350 N.W. Science Park Dr.
     Portland, OR 97229

   This 50 item test has 18 vocabulary and 32 reading comprehension multiple choice questions to measure reading skill. Students select the correct word to complete a sentence in the vocabulary questions and read a short passage and answer questions about the reading in the reading comprehension questions, scores are reported in percentages corresponding to 8 levels.
3. **Slosson Oral Reading Test (SORT)**, Richard Slosson

   **Grade Range:** Beginning to advanced
   **Can be Administered to:** Individuals
   **Time for Administration:** 5-15 minutes
   **Language:** English
   **Source:** Slosson Educational Publishing
   P.O. Box 280-A
   East Aurora, NY 14052

   This test uses 9 word lists spanning first grade to high school (20 words each list) to measure oral reading fluency. The student reads orally from a list of words. Student continues until he/she mispronounces or is unable to read almost all 20 words. The raw score is the total number of words the student can read. This is converted into a grade level score.

4. **Adult Basic Reading Inventory (ABRI)**, Richard Burnett

   **Grade Range:** Beginning and Intermediate
   **Can be Administered to:** Individuals and groups
   **Time for Administration:** Less than 60 minutes
   **Language:** English
   **Source:** Scholastic Testing Service
   480 Meyer Road
   Bensenville, IL 60106

   This test will identify adults' reading abilities from complete illiteracy to fifth grade level. The test has five parts, including (1) Sight words with pictures, (2) Sound and letter discrimination, (3) Word meaning through listening, (4) Word meaning through reading, and (5) Context reading. The test scores can be correlated to ESL levels (reading).
5. **Adult Informal Reading Test (AIRT)**, Robert E. Leibert

- **Grade Range:** 1-10
- **Can be Administered to:** Individuals
- **Time for Administration:** Varied
- **Language:** English
- **Source:** University of Missouri-Kansas City Division of Reading Education Education Building 82nd and Holmes Kansas City, MO 64110

This is a two-part test used to diagnose oral reading ability and reading comprehension. Part I of the test uses word lists from graded readers; Part II requires reading passages and comprehension questions.

6. **Testing for Literacy**, Donna McGee and Cheryl Jibodh

- **Grade Range:** Beginning
- **Can be Administered to:** Individuals
- **Time for Administration:** Varied
- **Language:** English
- **Source:** Handout available on request from the ELS Service Center. Developed at the Vancouver Community College, Vancouver, British Columbia.

This test to determine literacy needs and skills uses materials commonly available at a regular school testing/registration site. The test requires students to fill out basic forms, read words and phrases on signs, repeat letters and words, and hold a book in the proper direction and find a page on request. Problems and abilities are noted on registration form.
7. Inter-American Series - Test of Reading and Prueba de Lectura

Grade Range: Level 3, ages 9-11, grades 4-6
Level 4, ages 12-14, grades 7-9
Level 5, ages 15-18, grades 10-12

Can be Administered to: Groups

Time for Administration: 52 minutes for level 5

Languages: Spanish and English

Source: Guidance Testing Associates
St. Mary's University
One Camino Santa Maria
San Antonio, TX 78284

This is a series of tests in reading which has parallel forms in Spanish and English. The series has pre- and post-test forms so that you measure the same skills but through different items each time. The author of the test believes that the test measures not only achievement in reading itself, but estimates the ability to do school work in other areas.

The test of reading, both in Spanish and English, includes tests in five levels of difficulty.
D. English-as-a-Second Language Writing Tests
1. Test of Ability to Subordinate

Grade Range: High School-Adult

Can be Administered to: Groups

Time for Administration: 35 minutes

Language:

Source: LINC Publications
2112 Broadway
Room 515
New York, NY 10023

This Writing Test is appropriate for students at the intermediate and advanced levels. It is an easily scoreable objective test measuring students' abilities to manipulate particular grammatical structures of subordination among these being participial, gerund, and prepositional phrases and noun, adverbial and relative clauses.

Example: 44. a. We have a doctor. b. We like him very much.

We have a doctor very much.

Answer: that/who/whom/we like

2. Dictation

Grade Range: Varied

Can be Administered to: Groups and individuals

Time for Administration: Variable

Language: English

Source: Various

Dictation tests as an integrative test measure can be administered in various ways. First of all, selection of the passage should be made from general reading selections either used in the class or from general interest materials. The length of the passage should be sufficient to provide enough information to evaluate the student's performance but not too lengthy to become boring and uninteresting to the student.

Suggested administrative procedure of dictation tests from Teaching English as a Second Language Techniques and Procedures by Christina Bratt Paulston and Mary Bruder, 1976, Winthrop Publishers, Cambridge, MA, are as follows:
2. **Dictation (continued)**

A) Read the passage at a normal speed while students listen.

B) Repeat the passage in "meaningful mouthfuls" with pauses for students to write. (Paulston and Bruder suggest varying length of pauses depending on students' proficiency levels.)

C) When finished with the second reading, reread the entire passage at a normal speed so the students can check their work.

Evaluation can focus on spelling, word omissions, grammatical errors and punctuation errors. The final score can be reported as a general score on perhaps a 1-5 scale or on a scale concerned with the number of possible errors that can be made.
E. English-as-a-Second Language Written Grammar Tests
1. Diagnostic Test for Students of English-as-a-Second Language

Grade Range: High School-Adult
Can be Administered to: Groups
Time for Administration: 60 minutes
Language: English
Source: McGraw-Hill International Book Co. 1221 Avenue of the Americas New York, NY 10020

This test is designed to assess knowledge of English structure and idiomatic vocabulary through 150 multiple-choice questions. The test can be used to determine whether special instruction is necessary; to place students in classes of different levels of proficiency; or to aid in the preparation of lesson plans. The instruction sheet which accompanies the test booklets and answer sheets contains a short section on scoring and interpretation.

2. Structure Tests - English Language (STEL), Jeanette Best and Donna Ilyin

Grade Range: 7-Adult
Can be Administered to: Groups
Time for Administration: 30 minutes
Language: English
Source: Newbury House Publishers 68 Middle Road Rowley, MA 01969

The STEL consists of 6 tests of English structure which can be correlated with the Ilyin Interview tests for placement of students. Two forms each of Beginning, Intermediate and Advanced tests are available.
3. Examination in Structure, Robert Lado and Charles Fries

Grade Range: 7-Adult
Can be Administered to: Groups
Time for Administration: 60 minutes
Language: English
Source: English Language Institute
2001 N. University Building
University of Michigan
Ann Arbor, MI 48109

This is a 150 item test on a large number of grammatical points, not identified with any specific test, but limited to the basic structures of English. Approximately 65 per cent of it is multiple-choice; the remaining 35 percent consists of completion items for testing question words, negation, sentence order, etc. No manual or norms exist for this test. It can be very useful to the teacher as a source of diagnostic information on the problem areas in grammar.

4. English-as-a-Second Language Placement Test (EPT)

Grade Range: 7-Adult
Can be Administered to: Groups
Time for Administration: 30 minutes
Language: English
Source: Donna Ilyin
ALEMANY Adult School
750 Eddy Street
San Francisco, CA 94109

This multiple choice grammar test consists of two levels: Level I - 100, 200, 300 and Level II - 400, 500, 600 for advanced students. Each level has 50 multiple choice items. The student is asked to choose the correct response of the three answers written and mark it on an answer sheet.

The tests place students in one of three levels.
5. **English Language Skills Assessment in a Reading Context (ELSA)**, Ilyin, Lee, Levy, and Doherty

- **Grade Range:** Beginning to advanced
- **Can be Administered to:** Groups or individuals
- **Time for Administration:**
- **Language:** English
- **Source:** Newbury House
  69 Middle Road
  Rowley, MA 01969

This test is to evaluate student's understanding of meaning in context and grammatical ability. For placement or achievement.

Five forms of tests spanning beginning to advanced. Multiple cloze format in either a conversation or narrative story, 25 items each form.

Student selects one of four suggested answers to complete each sentence of the story.
F. English-as-a-Second Language Multiple Skills Tests
1. **Language Assessment Scales**, Ed de Avila

Grade Range: Level II, 6-12
Can be Administered to: Individuals
Time for Administration: 15-20 minutes
Languages: Spanish and English
Source: De Avila, Duncan and Associates
P.O. Box 770
Larkspur, CA 94939
(415)525-1844

The LAS, both in Spanish and in English, measures phoneme production, ability to distinguish minimal sound pairs, oral lexical production, aural syntax (sentence) comprehension, oral syntax production, and ability to use language for pragmatic ends. A writing component is an additional component to level II only.

The LAS gives an overall picture of the student's linguistic ability by separately assessing the component parts of the language system.

The test supplement provides games and activities which could be used to help the student learn specific behaviors in areas in which the student is weak according to the test results.

2. **Language Assessment Battery (LAB)**

Grade Range: Level III, 7-12
Can be Administered to: Level III has a total of 92 items. Tests 1, 2 and 3 are group administered and Test 4 is individually administered.
Time for Administration: Test 1, approx. 8 minutes
Test 2, approx. 20 minutes
Test 3, approx. 8 minutes
Test 4, approx. 5 minutes
Languages: Spanish and English
Source: Houghton Mifflin Co.
Geneva, IL
2. Language Assessment Battery (LAB) (continued)

The Language Assessment Battery (LAB) is designed to assess reading, writing, listening comprehension and speaking in English and Spanish of children in Kindergarten through grade twelve (k-12). The areas included in LAB are defined as follows:

1) Reading - the recognition of morphological and syntactical structures and comprehension of English and Spanish in graphic form.

2) Writing - the recognition of the grammatical signals of the language in graphic form.

3. Comprehensive English Language Test (CELT), D.P. Harris and L.A. Palmer

Grade Range: High School-Adults
Can be Administered to: Groups
Time for Administration: About 2 hours
Language: English
Source: McGraw-Hill International Book Co
330 West 42nd Street
New York, NY 10036

Designed to assess the English language proficiency of non-native speakers, the Comprehensive English Language Test (CELT) provides a series of easy-to-administer tests, especially appropriate for intermediate and advanced high school, college, and adult English as a second language programs. The CELT consists of three multiple-choice tests: Listening, Structure, and Vocabulary, which may be used separately or as a complete battery. All the CELT tests use a separate answer sheet and a reusable test booklet. Norms and other data are available in a Technical Manual.

The Listening Test measures the ability to comprehend short statements, questions, and dialogues as spoken by native speakers of English; it contains 50 items and takes about 40 minutes. The Structure Test has a total of 75 items to be answered in 45 minutes, and measures the ability to manipulate the grammatical structures occurring in spoken English. With a total of 75 items and an administration time of 35 minutes, the Vocabulary Test assess the understanding of the kinds of lexical items which occur in advanced English reading.
4. **Michigan Test of English Language Proficiency**

   Grade Range: High School-Adult
   Can be Administered to: Groups
   Time for Administration: 75 minutes
   Language: English
   Source: English Language Institute
           2001 N. University Building
           University of Michigan
           Ann Arbor, MI 48109

   This test consists of three parts: Grammar, Vocabulary and Reading Comprehension. It can be used diagnostically for placement, or as a post-test to see how much the student has learned. The test consists of 100 items: 40 in the grammar sections, 40 in the vocabulary and 20 in reading comprehension.

   It is totally non-verbal. The test may be best suited for intermediate and advanced students.

   Grade Range: 7-Adult
   Can be Administered to: Individuals (oral) Groups (written)
   Time for Administration: Varied
   Language: English
   Source: Institute of Modern Languages, Inc.
           2622 Pittman Drive
           Silver Springs, MD 20910

   This test was designed to place students in one of five levels of the Orientations in American English Series. The questions and structures tested correspond to the various levels of the texts with the series.

   The Aural/Oral Test consists of two parts. In each the student is asked to answer questions in complete sentences. The sentences are evaluated and scored similar to the following written exam. The Written Test administered to groups consists of three parts. In part I students are orally asked 7 questions to which they write responses. Part II uses illustrations with accompanying written questions to which the student must also write answers. Part III is a reading section which consists of a brief passage and 4 or 5 follow-up comprehension questions to which the students must write answers.

   The final rating system suggested by the testing manual places students in one of five levels.
6. New Horizons in English Book 1 & 2, Book 3 & 4, Book 5 & 6

Grade Range: Beginning to advanced
Can be Administered to: Groups
Time for Administration:
  Oral - 30 minutes
  Written - 50 minutes
Language: English
Source: Addison-Wesley Publishing Co.
  1843 Hicks Road
  Rolling Meadows, IL 60008

This test measures ESL learning progress based on the content of the New Horizons series. Each test has two parts: Oral/Aural and Written. There are two test forms for each level, one to be given after the first half of the book is taught and the second after the book is completed.
G. Native Language Tests
Available from Guidance Testing Associates are the Inter-American Tests (New Series) and the Cooperative Inter-American Tests (1950 Series). These instruments include: the Tests of General Ability; the Tests of Reading; Comprehension of Oral Language; Reading and Number; Inventory of Interests; the CIA Tests of General Ability; the CIA Tests of Reading; CIA Language Usage; CIA Natural Sciences; and CIA Social Studies.

All of these tests are published in English and Spanish editions, using "standard" language forms with parallel content. In schools with both English and Spanish-speaking students, the children can be tested in their native language and the scores will be comparable. In addition, the tests can be used to compare the abilities of the same child in the two languages. The latest catalog indicates that a limited number of editions are also available in Italian and French.

Although various norms based on results found by different users of the tests are presented in the Test Manual, the author recommends the use of regional or local norms prepared by the examiner.

TESTS OF GENERAL ABILITY: Designed to estimate academic ability in general, the Tests of General Ability are not measures of general intelligence. There are six different levels, ranging from preschool through high school. The Preschool Level may be individually-administered in two periods of about 20 minutes each, and yields a Verbal-Numerical score, a Nonverbal score, and a Total score. The Level 1 tests, designed to measure readiness for first grade, is recommended for administration to small groups in two periods of about 25 minutes each, and yields a Verbal-Numerical score, a Nonverbal score, and a Total score. The Level 2 Test of General Ability for use in grades 2 and 3 may be administered to groups in about 45 minutes; it also yields a Verbal-Numerical score, a Nonverbal score, and a Total score. Levels 3, 4, and 5, for grades 4-13, may be group-administered in about 52 minutes, and yield Verbal, Nonverbal, Number, and Total scores.

TESTS OF READING: Designed to measure achievement in reading comprehension and vocabulary, the Tests of Reading come in five levels, for administration to groups of children in grades 1-13. The Level 1 test takes about 18 minutes and yields Vocabulary, Comprehension, and Total scores; the children read a word, sentence, or paragraph, and select
one of four pictures in the test booklet. The Level 2 instrument, designed for use in the second semester of grade 2 and in grade 3, can be administered in about 23 minutes, and yields scores for Level of Comprehension, Speed of Comprehension, Vocabulary, and Total; answers are marked directly in the test booklet. Levels 3, 4, and 5, for grades 4-13, take about 41 minutes, and yield Vocabulary, Speed of Comprehension, Level of Comprehension, and Total scores; separate answer sheets are used.

**COMPREHENSION OF ORAL LANGUAGE:** A short test designed to estimate a child's ability to understand simple words or phrases read to him in English or Spanish. The Comprehension of Oral Language Test can be group-administered in about 20 minutes to children in grades K-3. The children simply mark a picture in response to simple expressions read by the teacher. No information on norms is as yet available.

**READING AND NUMBER:** The Test of Reading and Number is designed as an achievement measure of basic skills in reading and simple numerical operations at the end of grade 3 and grade 4. Both the reading and number sections of the test consist of two parts, and group-administration takes about 34 minutes. Psychometric data is not yet available.

**INVENTORY OF INTERESTS:** Designed for use by counselors of adolescents and adults, the Inventory of Interests asks for an expression of the degree of interest in more than 100 occupations and in 56 academic subjects. This instrument is untimed and should be individually-administered.

**CIA TESTS OF GENERAL ABILITY:** Part of the 1950 series, the Cooperative Inter-American Tests of General Ability are available on three levels. The Primary tests, for grades 1-3, may be administered in two periods of about 25 minutes each, and measure Oral Vocabulary as well as Classification and Association. The Intermediate tests, for grades 4-7, yield Nonverbal and Verbal scores; answers are recorded on separate answer sheets and administration takes about 34 minutes. The Advanced tests, for grades 8-13, can be administered in about 34 minutes and yield Nonverbal and Verbal scores.

**CIA TESTS OF READING:** Another part of the 1950 series, the CIA Tests of Reading are available on three levels to measure achievement in reading. The Primary test can be administered to grades 1-3 in about 16 minutes, and yields Vocabulary, Comprehension, and Total scores. The Intermediate test, for grades 4-7, takes about 40 minutes to give, and yields Vocabulary, Comprehension, and Total scores. The Advanced test, for grades 8-13, can be administered in about 40 minutes, resulting in Vocabulary, Comprehension, and Total scores.

**CIA LANGUAGE USAGE:** The CIA Language Usage Test is designed for students of English or Spanish as a Second Language. The testing time is about 35 minutes, and the scores are for Active Vocabulary, Expression, and Total.
CIA NATURAL SCIENCES: VOCABULARY AND INTERPRETATION OF READING MATERIALS: The CIA National Sciences Test is designed to estimate ability to read and understand scientific materials in grades 8-13. This instrument may be administered to groups in about 40 minutes, yielding Vocabulary, Interpretation, and Total scores. Part of the 1950 series, this test may be somewhat dated though still usable.

CIA SOCIAL STUDIES: VOCABULARY AND INTERPRETATION OF READING MATERIALS: Designed to estimate ability to read and understand social studies materials, the CIA Social Studies Test can be used in grades 8-13. Testing time is about 40 minutes, and separate answer sheets are used; three scores result: Vocabulary; Interpretation; and Total.

2. Language Assessment Battery (LAB) - Levels I-III

Grade Range: K-12: Level I, grades K-2; Level II, grades 3-6; Level III, grades 7-12

Can be Administered to: Individuals

Time for Administration: Level I, 5-10 minutes; Level II, approximately 41 minutes

Languages: Spanish, English

Source: Houghton Mifflin Company
Test Department
P.O. Box 1970
Iowa City, IA 52240

This norm-referenced instrument is composed of parallel English and Spanish versions. Level I contains 40 items; Level II contains 92 items. The instrument is first administered in English. The administrator then uses the Spanish version to test students who scored below a designated cutoff point. Students respond orally, by pointing, by writing in the test booklet, and by marking answer sheets (on Level II only). Individual administration is required for Level I and for part of Level II.

3. Language Dominance Survey

Grade Range: K-8

Can be Administered to: Individuals

Time for Administration: 10 minutes

Languages: Spanish, English

Source: Los Nietos School District
Bilingual Program
P.O. Box 2006
Los Nietos, CA 90619
This rating scale is designed to provide a rough estimate of the language dominance of a student whose parents are native Spanish speakers as determined by the LANGUAGE DOMINANCE SURVEY (To Be Completed By Parents). The Spanish and English forms of this scale each contain 10 parallel items. In response to the administrator's oral questions and commands, the student performs specific tasks and answers questions related to daily living situations. Responses are hand scored. Individual administration is required.

4. **San Bernardino Language Dominance Survey**

This survey measures the listening and speaking skills of students in grades K-1 and the listening, speaking, reading, and writing skills of students in grades 2-6. There are 21 items for grades K-1 and 37 for grades 2-6. The test administrator asks parallel but not identical questions first in English and then in Spanish. Students respond orally, in writing, and by pointing to pictures on a chart. Answers are hand scored. Individual administration is required.
H. Vocational Interest Tests
1. **Kuder DD Occupational Interest Survey**

   - **Grade Range:** 11th-Adults
   - **Can be Administered** Individuals and groups
   - **Time for Administration:** 30-40 minutes
   - **Languages:** Spanish, Vietnamese, English
   - **Source:** CHESS and Associates
     - 2759 Steeple Chase Lane
     - Diamont Bar, CA 91765
     - (714) 598-5761

   The Kuder Occupational Interest Survey--Form DD (KOIS) is an empirically keyed interest inventory derived separately from the Kuder A, B, C, and E. Based upon similar responses to the other Kuder instruments, the KOIS then compares the individual's activities report to those of individuals in criterion vocations and college majors rather than worker interest areas. Though this appears analogous to the old Strong Vocational Interest Blank (SVIB), the KOIS compares item responses with responses by criterion group members rather than with differences between criterion group members and an in-general group of men or women as in the SVIB. The KOIS is devised for: "Use with H.S. students in 11th or 12th grade to supply information that may help them in making a vocational choice or a field of study...With college freshmen, in group sessions or individually, to help them in selecting a major field of study."

   The measure consist of 100 triads of activities from which the individual selects the activity liked most and least. The individual is scored on all 114 occupational, 48 college majors, 1 verification, and 8 experimental scales, though separate occupational and college major scores exist for males and females. The ten highest scores in both college majors and occupations for each sex is listed separately in rank order.

2. **Geist Picture Interest Inventory for Men, H. Geist**

   - **Grade Range:** 8-Adults
   - **Can be Administered to:** Groups
   - **Time for Administration:** About 25 minutes
   - **Languages:** English and Spanish
   - **Source:** Psychological Services
     - 12031 Wilshire Blvd.
     - Los Angeles, CA 90025
Standardized on Spanish-speaking and bilingual subjects, the Spanish Edition of the Geist Picture Interest Inventory for Men identifies the vocational and avocational interests of Spanish-speaking and bilingual men and boys. The Geist Inventory consists of 44 sets of three drawings to measure interests in 11 general areas; the subjects circles which of the three drawings illustrates the occupation or avocation he prefers. A Motivation Questionnaire can be administered separately to explore motivations behind occupational choices. The Manual is available both in English and in Spanish.

3. **JOB-0**

   **Grade Range:** 9-Adults  
   **Can be Administered to:** Groups or individuals  
   **Time for Administration:** Varies  
   **Languages:** Spanish and English  
   **Source:** CFKR Career Materials, Inc.  
   P.O. Box 4  
   Belmont, CA  94402  
   (415)593-0616

The primary purpose of JOB-0 is to start the student in the process of self-awareness, career-awareness, and career exploration. After the completion of JOB-0, it is hoped that the student will evaluate interests and personal needs, consider educational goals and reach a tentative career decision.

JOB-0 can be used on all educational levels. The purposes for its use will vary from self and career awareness at the intermediate school level to making final job decisions at the secondary, college, and adult levels. JOB-0 can be given in classes, or as a group activity, or individually.

4. **COPS (California Occupational Preference System)**

   **Grade Range:** 9-Adults  
   **Can be Administered to:** Individuals or groups  
   **Time for Administration:** 30-40 minutes  
   **Language:** English  
   **Source:** Educational and Industrial Testing Service  
   P.O. Box 7234  
   San Diego, CA 92107
The California Occupational Preference System (COPS) is a measure that provides job activity interest scores related to occupational clusters. Its publisher claims that it is particularly appropriate for these applications: 1) classroom group guidance units in exploring the world-of-work, 2) as an introduction to the use of the DOT, OOH, and other sources of information about the world-of-work, 3) assist students in planning their major or training programs and specifying information on occupational opportunities, and 4) for individual counseling. The COPS is based on a factor analysis of occupational interests. The resulting structure divides the world-of-work into nine clusters with some of the clusters divided into two levels (professional and skilled).

The COPS contains 168 items answered on a four-point scale from "like very much to dislike very much." Responses are scored on scales in nine areas with two occupational levels in five of those areas.

5. **Wide Range Interest Opinion Test (WRIOT)**

<table>

</tr>
</tbody>
</table>

The Wide Range Interest-Option Test (WRIOT) was designed to cover as many areas and levels of human activity as possible and at the same time be useful for persons with minimal reading abilities. This instrument has a theoretical base assuming the measurability of a wide range of human traits, attitudes, levels, and areas of integration. The norms are limited and only split-half reliabilities are given to a comparison with the Geist (concurrent validity).

The measure is composed of 450 pictures arranged in 150 combinations of three. There are 18 scales for the interest portion of the measure and 9 for the attitude portion. Norms are provided for adult males and females and for junior and senior high school students, gathered in Delaware in about 1971. The measure takes about 40-60 minutes to administer and requires a very minimal reading level (in fact the descriptions of the pictures in the administrator's manual require only about a 5th grade reading level).

The WRIOT is a broad based interest inventory that can readily be used with the student with minimal reading ability. The appearance is attractive and the pictures are well done. Predictive use, however, will have to be foregone due to the great lack of reliability and validity information. As the author states: "...the WRIOT will have to be validated by those who use it."
6. **General Aptitude Test Battery (GATB)**

   **Grade Range:** High School-Adults
   **Can be Administered to:** Groups
   **Time of Administration:** 2½ hours
   **Language:** English, Spanish
   **Source:** Superintendent of Documents
   Government Printing Office
   Washington, DC 20402

The GATB is composed of 12 tests which measure nine aptitudes. The Manual for the USES General Aptitude Test Battery is composed of four separately bound sections as follows:

1. **Section I - Administration and Scoring, B-1002:** Contains procedures for administration and scoring of the 12 tests comprising the GATB B-1002 and the tables used in converting raw test scores to aptitude scores.

2. **Section II - Occupational Aptitude Pattern Structure:** Contains the GATB Occupational Aptitude Pattern structure used for counseling purposes. Occupational Aptitude Patterns (OAP's) for adults and 9th and 19th graders are shown for 62 occupational families.

3. **Section III - Developmental:** Contains technical information on the development of the GATB.

4. **Section IV - Specific Occupations:** Contains the GATB minimum aptitude requirements for specific occupations. Also includes alphabetical and industrial indexes to the occupations covered.

7. **Non-reading Aptitude Test Battery (NATB)**

   **Grade Range:** High School-Adults
   **Can be Administered to:** Groups
   **Time of Administration:** 3 hours & 10 minutes
   **Language:** English, Spanish
   **Source:** Must be obtained through a State Employment Service Office

The NATB measures the same aptitudes as the more familiar GATB (General Aptitude Test Battery). The NATB is not available to the general public;
however, under certain conditions, authorized personnel at non-profit institutions may administer this test battery. Clearance must be obtained through a State Employment Service Office. Some subtests of the NATB might be administered with a bilingual/bicultural interpreter, or only those subtests which can be administered non-verbally might be given.

The NATB is composed of 14 tests measuring the nine GATB aptitudes. The NATB was developed for use with educationally deficient individuals who do not have sufficient literacy skills to take the GATB. The Manual for the USES Nonreading Aptitude Test Battery is composed of two separately bound sections as follows:

1. **Section 1 - Administration, Scoring and Interpretation:** Contains procedures for administration of scoring of the 14 tests comprising the NATB, tables used in converting raw scores into aptitude scores, and interpretation of aptitude scores using the Occupational Aptitude Pattern (OAP) structure of the GATB and Specific Aptitude Test Batteries (SATB's).

2. **Section 2 - Development:** Contains technical information on the development of the NATB.

The Occupational Aptitude Patterns (OAP's) and Specific Aptitude Test Batteries (SATB's) to be used are those developed for the GATB. Information on OAP's is obtained by reference to the Manual for the USES General Aptitude Pattern Structure. Information on SATB's is obtained by reference to the Manual for the USES General Aptitude Test Battery, Section IV: Norms, Specific Occupations.

8. **The Glen Occupational Scales for Indochinese (GOSI)**

   - **Grade Range:**
   - **Can be Administered to:** Individually self-administered
   - **Time of Administration:** 15-20 minutes
   - **Languages:** English, Vietnamese, Cambodian, and Laotian
   - **Source:** Dr. Chris Glenn
     Indochinese Cultural & Service Center
     1607 N.E. 41st Avenue
     Portland, OR 73232
     (503) 288-6206
This instrument is an individually self-administered test available in English, Vietnamese, Cambodian and Laotian. Tape cassettes are available in all three Indochinese languages for testing illiterate students. The test will access vocational interest and aptitude data; it will take approximately 15 to 20 minutes for completion, and is scorable by monolingual English speakers.

9. The Harrington/O'Shea System for Career Decision-making

Grade Range: 8-Adults
Can be Administered to: Self-administered
Time of Administration: 40 minutes
Languages: Spanish, English
Source: Chronical Guidance
P.O. Box 271
Moravia, NY 13118

This instrument is self-administered and self-interpreted inventory; 6 scores (arts, business, clerical, crafts, scientific, social) used to identify 3 or more occupational areas, for intensive career exploration, from among 18 career clusters (art work, clerical work, customer service, data analysis, education work, entertainment, legal/literacy work, management, manual work, math-science, medical-dental, music work, personal service, sales work, skilled crafts, social services, technical) and questions in 5 areas (abilities, future plans, job values, occupational preferences, school subject preferences).

WORK SAMPLES

10. The Singer Career Systems

Grade Range: High School-Adults
Can be Administered to: Individuals
Time of Administration: 2 hours per module
Languages: English, Spanish, Arabic
Source: Singer Career Systems
80 Commerce Drive
Rochester, NY 14623

The Singer Vocational Evaluation System is comprised of twenty-two work sample modules, each independent in structure and use, that simulate tasks and materials typical of work settings. Each carrel contains a filmstrip and cassette with complete audio-visual directions for performing the series of tasks required in that module. (Reading ability at the third grade level is necessary to complete

218
some of the work samples; cassettes are available in Spanish for Spanish-speaking students/clients.)

The following is a list of the modules that currently available in this system:

Sample Making  
Bench Assembly  
Drafting  
Electrical Wiring  
Plumbing and Pipefitting  
Carpentry and Woodworking  
Refrigeration, Heating & Air Conditioning  
Soldering and Welding  
Sales Processing  
Needle Trades  
Masonry  
Sheet Metal Working  
Cooking and Baking  
Small Engine Service  
Medical Service  
Cosmetology  
Data Calculation and Recording  
Soil Testing  
Photo Lab Technician  
Production Machine Operating  
Household and Industrial Wiring  
Filing, Shipping and Receiving  

Of these modules, the student/client chooses several that he/she would like to experience in career exploration. Each module requires from one to four hours to complete; the average amount of time per module appears to be two hours. Each module is equipped with the necessary expendable/consumable items required for completion of the task or series of tasks in that module; also included in the carrel is the stationary equipment needed for completion of that activity.

Typically, one evaluator will be monitoring the progress of three or four persons at one time. Probably the average student/client will choose two to four of the modules for career exploration and will take a total of five to twelve hours for completion of these modules. Ideally, professional counseling, before and/or after, this career exploration activity, will occur to maximize the utility, self-awareness, and career assessment for the student/client.

The evaluator times the client and rates his/her progress on a five-point scale. Then, this rating is compared to standards set and published by the Singer System. Standardized forms are also provided for the reporting of results; this basic form could be revised to meet the needs of (an)other (Agency) agencies in order to report results in a form that is more individualized and appropriate in terms of the need of the agencies involved.
Probably the greatest assess of this system is in the extensive occupational information available to the student/client in terms of career information, skills, and self-awareness.

There is little data available on the reliability or validity of the system except that it does seem that the system has test-retest reliability and does have predictive validity for training success. This latter point seems to have bearing for the Vocational Center as predictive validity for success in vocational training would be the system's greatest asset for use by Vocational Center staff and for LCAVC students. (It should also be noted that virtually nothing by itself has predictive validity for job success, as there seems to be too many variables involved in job success, including motivation, pay, personality factors, etc.)

11. Jewish Employment and Vocational Service System (JEVS)

Grade Range: High School, Adults
Can be Administered to: Individuals
Time of Administration: Varies
Language: English, Spanish
Source: Jewish Employment and Vocational Service, Inc.
1624 Locust Street
Philadelphia, PA 19103

The Jewish Employment and Vocational Service System (JEVS) consists of a series of twenty-eight work samples, all of which are designed to be completed by each student/client. Sponsored by the U.S. Department of Labor for a target group of disadvantaged persons, the system is based upon the Dictionary of Titles (D.O.T.) (U.S. Department of Labor) in that the work samples are directly applicable to work tasks on various jobs and the reporting of results translates directly to jobs as listed in the D.O.T.

The following is the list of Specific Factors Inherent in the JEVS Work Samples:

- Color Discrimination
- Counting Ability
- Eye-Hand-Foot Coordination
- Following Diagrammatic Instructions
- Following a Model
- Following Written Instructions
- Motor Coordination
- Manual Dexterity
- Measuring Ability
- Numerical Ability
Form Perception
Clerical Perception
Spatial Discrimination
Size Discrimination
Use of Hand Tools

In addition, there are four Global Factors inherent in all work samples but of particular importance in certain work samples:

- Accuracy
- Following Verbal (Oral) Instructions
- Neatness
- Planning and Organizational Ability

The following is a list of the Work Samples of the JEVS:

- Nut, Bolt and Washer Assembly
- Rubber Stamping
- Washer Threading
- Budgette Assembly
- Sign Making
- Tile Sorting
- Nut Packing
- Collating Leather Samples
- Grommet Assembly
- Union Assembly
- Belt Assembly
- Ladder Assembly
- Metal Square Fabrication
  (Soldering)
- Hardware Assembly
- Telephone Assembly
- Lock Assembly
- Filing by Numbers
- Proofreading
- Filing by Three Letters
- Nail and Screw Sorting
- Adding Machine
- Payroll Computation
- Computing Postage
- Resistor Reading
- Pipe Assembly
- Blouse-/Vest-Making
- Condensing Principle

The work samples are ordered so that the tasks proceed from the easiest to the most difficult. The evaluator must be continually present and must observe and record constantly as the student/client goes through the series of tasks involved. The time spent on administration of the JEVS is considerable because of the demand of constant evaluator involvement; it takes approximately five or six entire days for administering the JEVS battery.

A realistic work setting and simulation of real work activities are strengths of the JEVS. Also, it can be said that the battery is self-motivating in that the tasks are varied, some can be seen as fun by the student/client, and the relevance to the work situation is relatively obvious. Both student/client and evaluator can determine exactly what the student/client can and cannot do. Translated to a counseling situation, the results of this battery can be used directly for job placement. In this utility and applicability, the JEVS differs from the Singer; in combination, the two systems would seem to offer both prediction for training success (Singer) and job placement indications (JEVS). Both the Division of Rehabilitation Services (DORS) and Special Education District of Lake County (SEDOL) utilize the JEVS for its utility in job placement information; counselors and placement persons use the information from the JEVS administration to place student/clients into jobs which are most appropriate in view of tested skills and limitations.
Administration procedures are very specific and detailed. Most of these involve oral instructions and demonstration. In scoring, the student/client uses a time clock; the timing interval is determined by the amount of time from the end of the instructions to the completion of the task. The student/client is rated on a three-point scale and then scores are compared to standards set by the JEVS norms. Time and quality are given equal weight in scoring. A standardized format is provided for final reporting, including references to Worker Trait Groups in the D.O.T. for further career exploration.

The Utility of the JEVS seems to be primarily in its use to the counselor or evaluator; it is of limited use to the client in terms of vocational exploration because the tasks involved in the JEVS, though, seems clearly to lie in its immediate applicability in terms of jobs placement. Also, it is optimally useful in terms of placement indicators for special education and handicapped student/client, for whom it is often necessary to isolate and identify specific, basic skills for job placement that promises success for these persons.

Data on the reliability of the battery is lacking; published results on the validity of the system are favorable. It seems, therefore, that the results from the JEVS would tend to predict what types of activities or skills the student/client might be expected to perform successfully on the job.

12. Valpar Component Work Sample Series

<table>

</tr>
</tbody>
</table>

The Assessment Lab has included three of the Valpar Work Sample Systems as a resource for assessment of specific worker traits. The Valpar Component Work Sample Series is keyed to the worker traits arrangement data in the Dictionary of Occupational Titles. The manual accompanying each work sample provides specific occupations and related classifications in a variety of job families as a starting point for vocational exploration. The units which are currently available in the Assessment Lab include:

- Clerical Comprehension and Aptitude
- Simulated Assembly
- Whole Body Range of Motion
The Valpar work samples are extensively normed on a wide range of client populations. This very fact enables the evaluator to assess a particular client's skills in relation to tentative work or training environments.

13. **Project Discovery Career Exploration System**

- **Grade Range:** 12-18 year old students
- **Can be Administered to:** Individuals
- **Time of Administration:** Varies
- **Language:** English
- **Source:** Project Discovery Experience Education 401 Reed Street Red Oak, IA 51566 1-800-831-5886

Project Discovery is a systematic career exploration system consisting of 37 individualized "hands-on" simulated work and guidance activities created for the 12-18 year old student. "Inservice training" is available to ensure that the project is implemented successfully.

Currently, Project Discovery has been successfully implemented in a wide variety of educational settings: regular, Junior and Senior High School, special education facilities, CETA job training sites, correctional institutions, and community-based organizations. No wonder Project Discovery was evaluated and approved by the Joint Dissemination Review Panel (JDRP) of the Department of HEW, and listed as an exemplary and innovative program on the National Diffusion Network (NDN) by the United States Office of Education.

For a free preview and loan of Project Discovery materials, contact the following organizations in your state.

I. Vocational Aptitude Tests

- **Grade Range:** 8-12, Adults
- **Can be Administered to:** Groups
- **Time for Administration:** 6-30 minutes
- **Languages:** English and Spanish
- **Source:** CHESS and Associates
  
  2759 Steeple Chase Lane
  Diamond Bar, CA
  (714)598-5761

An integrated battery of aptitude tests designed for educational and vocational guidance in grades 8-12, the Differential Aptitude Tests measure the abilities of students in 8 areas: Verbal Reasoning (30 min.); Numerical ability (30 min.); Abstract Reasoning (25 min.); Space Relations (25 min.); Mechanical Reasoning (30 min.); Clerical Speed and Accuracy (6 min.); Language Usage-Spelling (10 min.); and Language Usage-Grammar (25 min.). Standardized in 1963, the entire battery of tests can be administered in slightly over three hours, and scored fairly rapidly. The fourth edition of the interpretive manual provides norms for the English version, and information on validity and reliability. The authorized Spanish translation and adaptation of this measure is called "Tests de Aptitud Diferencial".

J. Career Development and Maturity Inventories
1. **Assessment of Career Development**, Dale Predeger, Bert Westbrook, and John Roth.

   - **Grade Range**: 8-12th
   - **Can be Administered to**: Groups
   - **Time of Administration**: 2¼ hours
   - **Language**: English
   - **Source**: Houghton Mifflin
     
     1900 South Batavia Road
     Geneva, Illinois 60134

   The Assessment of Career Development was designed to help gather information to assist in structuring guidance programs to student needs and for evaluating outcomes of career guidance programs. The measure attempts to assess occupational awareness, self-awareness, and career planning and decision making. Reliability studies are sufficient and except for one scale, Occupational Preparation Requirements, reliability is good. Predictive (outcome and change) and content validity are reported.

   The measure consists of 6 scales with 6 subscales for the Experiences Scale (Job Knowledge--72 items, Job Characteristics--7 items, Career Plans--ed. level, job family choice, and certainty, Career Planning Activities--54 items, Career Planning Knowledge--40 items, Exploratory Job Experiences--6 subscales (1 Social, 2 Business Sales and Management, 3 Business Operations, 4 Technologies and Trades, 5 Natural, Social and Medical Sciences, and 6 Applied Arts), 15 items/subscale, 90 items). The inventory is designed for 8th-11th graders, has about an 8th grade reading level, and takes about 2¼ hours to administer. Local items can be added.

   The Assessment of Career Development is a well-constructed measure of career development. It is easy and interesting to take and can provide valuable information on some of the important domains of career development. Additional validity studies would be of value.

2. **Career Awareness Inventory**, LaVerna M. Fadale

   - **Grade Range**: 4-8th
   - **Can be Administered to**: Groups
   - **Time of Administration**: 60-90 minutes
   - **Language**: English
   - **Source**: Scholastic Testing Service
     
     480 Meyer Road
     Bensenville, Illinois 60106
The Career Awareness Inventory is intended as a tool for classroom teachers and other educators interested in assessing the career awareness element as demonstrated by their students. The instrument has a theoretical basis in the Taylor Model (1972) for implementation of career education into school curricula. The measure has only fair reliability (however, this in part is due to its construction) and validity information is not extensive.

The measure is composed of 125 items, which include the identification of occupations from illustrations of workers. Scales include identity, training, models function prestige, clusters, and characteristics. No norms are provided. The measure was developed for use in grades 4-8th (though the publisher suggests use from 4-12th grades) and requires only about a 4th grade reading level. It can be administered orally.

The Career Awareness Inventory is a measure directed more toward the younger student (middle school and junior high school) and seems to be a reasonable tool for assessing their career awareness, an important aspect of career maturity. It has questionable value for high school students due to its format.

3. Career Maturity Inventory (CMI), John O. Crites

<table>
<thead>

</tr>
<tr>
<td>Source:</td>
<td>CBT/McGraw Hill Manchester Road Manchester, Missouri 63011</td>
</tr>
</tbody>
</table>

The Career Maturity Inventory was designed to measure the maturity of attitudes and competencies necessary for realistic career decision making. The instrument, as a measure of career development, combines rational and empirical methods of scale construction. Item content was selected for its theoretical relevance to the construct of career choice. Reliability and validity data do establish the Attitude Scale as a valid and reliable instrument in measuring 5 clusters of attitude maturity. Test-retest reliability data and validity data are becoming available but at present are insufficient for final conclusions on the Competence Scales.

The Attitude Scale includes 50 statements covering 5 areas (involvement in the career choice process, orientation toward work, independence in decision making, preference for career choice factors, and conceptions of the career choice process) in a true-false format. The Competence Scale is composed of 5 areas (knowledge about self, knowledge about jobs, choosing a job, planning, and problem solving) and requires about
2Q minutes per section. Norms are provided for expressing relative career maturity of an individual or group. The measure is developed for the 6th to 12th grade student and the total time for administration is about 2-2½ hours. The CMI requires a 6th grade reading level.

The Career Maturity Inventory is a valuable addition to the field of career guidance. The psychometric data on the attitude measure is quite good, however, though preliminary findings on the competence sections are good, additional analyses are needed.

4. Comprehensive Career Assessment Scales, Stephen Jackson and Peggy Golding

<table>
<thead>
<tr>
<th>Grade Range:</th>
<th>3-12th</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can be Administered to:</td>

<td>English</td>
</tr>
<tr>
<td>Source:</td>
<td>Learning Concepts</td>
</tr>
</tbody>
</table>

The Comprehensive Career Assessment Scales examines student information regarding career choices and how curriculum needs to be designed to enhance each student’s interests. The measure is primarily for use in needs assessment, curriculum planning, and use as a pre-and-post testing device in evaluating career programs. The measure is non-normative and has good internal consistency.

The measure consists of 75 occupational titles from the 15 U.S. Office of Education (USOE) clusters (5 from each cluster). The student indicates the degree of familiarity and interest for each occupation on a seven point scale. The measure is designed for the 8th-12th grades and requires approximately 20 minutes for administration. A Teacher's Scale is also available.

The Comprehensive Career Assessment Scales is a quick measure of career interest and development. Due to the structure of the measure it could be open to halo effects and false stereotypes. Final evaluation must wait until we are able to obtain the technical supplement.

5. Knowledge of Occupations Test (KOT), LeRoy G. Barth

<table>
<thead>
<tr>
<th>Grade Range:</th>
<th>High School</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can be Administered to:</td>

<td>English</td>
</tr>
<tr>
<td>Source:</td>
<td>Psychologists and Educators, Inc.</td>
</tr>
</tbody>
</table>

The Knowledge of Occupations Test (KOT) is a high school assessment designed to measure students' knowledge of occupational fields. The test is administered to groups of students and takes approximately 40 minutes. The test items are written in English and consist of multiple-choice questions. The test is intended for use in high school counseling and career education programs. The test items are derived from a pool of occupational titles from the U.S. Office of Education. The test is designed to assess students' knowledge of occupational fields and their potential interest in specific occupations. The test is non-normative and does not provide normative information or benchmarks for individual students. The test results are intended to be used as a tool for guidance and counseling purposes only. The test is not intended to be used for placement or certification purposes. The test is administered by certified teachers or counselors who are trained to administer and interpret the test results. The test is available in English and is designed for administration in a group setting. The test is available for purchase through the publisher. The publisher's address is 211 West State Street, Suite 212, Jacksonville, Illinois 62650.
The "Knowledge of Occupations Test" was constructed to measure the extent to which high school students have knowledge of occupations. Results can be used in curriculum planning, instruction, and counseling. The items were constructed after a thorough analysis of current literature in the vocational field and of various career materials used in high schools. Most parts included may be justified both in terms of frequency of inclusion in commonly used career materials and on the basis of expert judgement as to importance. When students score low it may indicate that they lack accurate occupational information on which to base career plans. The internal consistency is good; however, validity information is lacking.

The measure is composed of 12 items in question format. Scales are make up of occupational titles. Norms are provided for 318 students in schools from the Southwest (no information on sex differences!), gathered in 1972. The KOT has a 40 minute time limit, and requires and 8th grade reading level; however, a higher cognitive level is necessary.

The KOT is a rather complex measure of broad vocational knowledge and graph reading. Considering its structure and content, it seems to have more value in evaluation of abilities needed in use of career information and as a learning experience is a career education unit than as an assessment device for guidance services. Though more analysis is needed, this limited use seem reasonable.

6. New Mexico Career Education Test Series, Charles C. Healy and Stephen P. Klein

Grade Range: 9-12th
Can be Administered to: Groups
Time of Administration: 3 hours and 35 minutes
Language: English
Source: Monitor
P.O. Box 2337
Hollywood, California 90028

The New Mexico Career Education Test Series is a battery of criterion-referenced tests designed to assess specific learner objectives in the area of career education. The instrument has a theoretical bases. The discussion of the NMCETS scores in the manual are inadequate, since the only meaning given to individual scores is their relative standing in the norm group, with the interpretation section of the manual consisting of only one paragraph. Internal consistency is fair to poor though this is to some degree dictated by test structure. The only validity information is score differences between 9th and 12th graders.
The measure is composed of 70 items in statement format. The manual lists general learner objectives and from 2-5 subobjectives for each of the 6 tests in the series. Norms are provided for 9th and 12th graders throughout the state of New Mexico during the 1972-73 school year. No further information is given on the characteristics of the norm group. The tests are developed for grades 9-12, take about 3 hours and 35 minutes to administer, and require less than an 8th grade reading level.

The New Mexico Career Education Test Series is a new approach combining education and assessment in a broad range of career maturity and decision making areas. Clear and more extensive construction rationale, norming, and psychometric information is needed before endorsement can be given.

7. Vocational Opinion Index, Associates and Research in Behavior, Inc.

Grade Range: 6-12th
Can be Administered to: Groups
Time of Administration: 20 minutes
Language: English
Source: The Science Center
3401 Market Street
Philadelphia, Pennsylvania 19104

The Vocational Opinion Index is a short paper and pencil instrument used to measure an individual's Job Readiness Posture (JRP). JRP is a term used to define an individual's attitudes, perceptions, and motivations as they impact on his/her ability to obtain and maintain a job. The instrument has a theoretical basis, with successful transition of a person from training status to work status seen and dependent upon 3 factors: 1) adequate skill training, 2) adequate placement opportunities, 3) appropriate Job Readiness Posture. The authors claim that psychometric analyses have been conducted; however, only predictive validity information is included in the manuals.

The measure is composed of 58 items in statement format. The JRP assesses 3 psychological dimensions: 1) attractions to work, 2) losses associated with obtaining and maintaining a job, 3) barriers to employment. Norms are provided for over 4,000 males and females from 13 MDTA centers across the country gathered in about 1971. The measure is developed for the disadvantaged population, takes about 20 minutes for administration and requires a 6th grade reading level.

Though the measure is not directed towards a high school clientele and norms are not appropriate, there are a few situations where the counselor might find use for such a measure.
1. **California Achievement Tests (CAT)**, Levels II and III, Form A, E. Tiegs & W. Clark

   **Grande Range:**
   - Level I, grades 1.5 - 2.9
   - Level II, grades 2 - 4.9
   - Level III, grades 4 - 6.9
   - Level IV, grades 6 - 9.9
   - Level V, grades 9 - 12.9
   (reviewed for grades 2 - 6)

   **Can be Administered to:** Groups

   **Time for Administration:**
   - Level II, 123 minutes
   - Level III, 152 minutes timed

   **Languages:**
   - English

   **Source:**
   CTB/McGraw-Hill
   Del Monte Research Park
   Monterey, CA 93940

   **Score Interpretation:**
   This instrument yields percentile rank, grade equivalent, achievement development and stanine scores. "Debiased" norms and scoring key are also available.

   **Target Ethnic Group:**
   General (Reviewed for Cuban, Mexican-American, and Puerto Rican; Chinese and Navajo)

   **Purpose:**
   To assess a student's achievement in reading, mathematics, and language.

This achievement test has 5 overlapping levels with alternate forms, A and B. The batteries at each level measure vocabulary and reading comprehension; mathematics computation, concepts and problems; and language mechanics, usage, structure, and spelling. There are 318 items in Level II and 343 items in Level III. Students respond by marking separate answer sheets. Answers are hand or machine scored.

**Technical Information**

The U.S. Office of Education conducted a restandardization of the reading and mathematics subtests of Levels II and III, Form A, of this instrument with 9000 students, 21% of whom were Hispanic. A panel of 11 judges, including 1 Asian-American, 1 American Indian, and 4 Hispanic educators, located potentially biased items. ERIC Document #101-017 provides a review of the statistical and item content analyses conducted. It also contains an annotated list of potentially biased items, a table converting raw scores to percentile ranks, and a table converting school means to percentile ranks. Both tables are tied to the raw scores on the original CAT and on the debiased instrument. Reviewers felt that the administrator's manual was well written and easy to use.

233
1. California Achievement Tests (CAT) (Continued)

Cultural and Linguistic Information - Hispanic

The reviewers found the directions, item content, vocabulary, illustrations, and procedures to be culturally and linguistically appropriate for Cuban, Mexican-American and Puerto Rican students in grades 2-6. Reviewers recommended that care should be taken to use the CAT only with students who are proficient in English and who have been acculturated to life in the United States. One reviewer commented that children from lower socioeconomic backgrounds may have difficulty relating to the item content in the reading sections, which show no special relevance to Hispanic culture. Reviewers noted that although the general format was acceptable, the spacing was poor in the mathematics section.

Rating Scale: Acceptable Technical Information Unacceptable Cultural Information

Reviews:

1) Donald Ross Green
   Racial and Ethnic Bias in Test Construction
   ERIC Documents: #129928 056090

Found in his study that: The CAT (1970) tests were more biased against minority groups that against middle class white children due to test item selection procedures used in designing the test. He suggests when using the tests that:

- biased items be identified and deselected.
- compensation for bias occur by use of alternate weighting and scoring schemes.
- scores be interpreted according to group membership of examinees.
- the existence of bias and its effects on scores be documented.

2) System Development Corp., Santa Monica, CA
   ERIC Document: #101-017
   Achievement Test Restandardization ESAA Evaluation, Nov. 1, 1974

Found that items in CAT test were biased against children whose experiences differed widely from those in the test item selection group.

Felt test should be restandardized by leaving out biased items, converting raw scores to percentiles based on restandardized tables, and converting school mean to a percentile based on restandardized information.
2. Comprehensive Test of Basic Skills (CTBS - Levels A, C, 1 and 2, Form S) (Reading, Language and Mathematics Sections)

Grade Range: K-12, Level A, K-1.3
Level B, K.6 - 1.9
Level C, 1.6 - 2.9
Level 1, 2.5 - 4.9
Level 2, 4.5 - 6.9
Level 3, 6.5 - 8.9
Level 4, 8.5 - 12.9 (reviewed for K-6)
Level 4 not available in Spanish

Can be Administered to: Groups

Time for Administration: Levels A and B, 3 hours; Level C, 3.75 hrs.
Levels 1 and 2, 4 hrs.

Languages: Spanish and English (excluding Level 4 in Spanish)

Source: McGraw-Hill
Del Monte Research Park
Monterey, CA 93940

Score Interpretation: This instrument yields percentiles, stanines, grade equivalents, and expanded scores.

Target Ethnic Group: General (reviewed for Cuban, Mexican-American and Puerto Rican; Chinese, Navajo, and Tagalog entries)

Purpose: To assess a student's basic skills in reading, language and mathematics.

This achievement instrument consists of overlapping levels designed to assess pre-reading and reading comprehension skills, language mechanics, spelling, and mathematical computation, concepts, and applications. There are 168 items on Level A, 174 items on Level B, 266 items on Level C, 337 items on Level 1, and 336 items on Level 2. Items are read aloud by the administrator or silently by students. For Levels A-C and 1 students respond by marking in machine or hand-scorable booklets. Separate answer sheets are available for Levels 1-4.

Technical Information

The publishers subjected the CTBS Form S to statistical debiasing procedures and to debiasing by a panel of experts. They also standardized this instrument with a national sample which included approximately 7.9% Spanish-speaking students. In Technical Bulletin No. 2 the publisher stated that some items may be unsuitable for measuring the achievement of Spanish-speaking students, although the majority of items are acceptable for this group. The U.S. Office of Education sponsored
Further bias studies on the reading, language, and mathematics sections of this test. For these studies, a panel including Asian, Mexican-American, and American-Indian educators evaluated items which appeared to be statistically biased against certain ethnic groups and concluded that the majority of these items were not biased. Guide reviewers found the administrator's manuals clearly written and easy to use.

Cultural and Linguistic Information - Hispanic

Reviewers found the directions, vocabulary, illustrations, and procedures appropriate only for English-dominant Cuban, Mexican-American, and Puerto Rican students in grades K-6. They commented that the spacing on the spelling, language mechanics, and mathematics computation and concepts subtests was poor and noted that the items did not reflect Hispanic culture. Reviewers felt that the timed-tests would put unusual pressures on students for whom English was a second language. The publishers agree that, for some groups, departures from the time limits may well produce more meaningful scores.

Rating Scale: Acceptable Technical Information Unacceptable Cultural Information

Additional Reviews:

The CTBS Test gives:

- National public school norms, percentiles and stanines
- Large city school district norms, percentiles and stanines
- Catholic school norms, percentiles and stanines.

The CTBS manual encourages use of scores in planning and evaluating instruction as well as identifying individual differences in achievement.

Procedures for constructing local norms are described and local normative data are provided to schools using the publishers scoring services.

1) Robert A. Cervantes
   ERIC Document #ED093951
   "Problems and Alternatives in Testing Mexican-American Students"

   Found that:

   1. Language subtests in particular appear extremely inappropriate to Mexican-American students.
   2. Some instructions are confusing and misleading.
   3. A number of items appear to be biased against students who differ by socioeconomic status and culture from norming populations. Those items should be eliminated or adequate substitutes found.

Additional Reviews (continued)

He feels use of test is maximized by:

1) Developing local norms in terms of ethnic validity.
2) Assessing changes in year to year scores rather than comparing with national norms.
3) Analyzing test items for colloquial language and experiential relevance. Eliminate these items or substitute more appropriate ones.

3. Bilingual Science Tests, Dr. C. Sanufinetti.

| Grade Range: | 5-8 |
| Can be Administered to: | Groups |
| Time for Administration: | 40 minutes |
| Languages: | English and Spanish |
| Source: | Curriculum Bureau, Board of Education 131 Livingston St., Room 610 Brooklyn, NY 11201 |

The Bilingual Science Tests are designed to measure achievement in science. They are available in English and Spanish. The 5th and 6th grade test, a measure of general science knowledge, is a research product of the New York City Study of Closed Circuit Television Cooperative Research Project of the Fund for the Advancement of Education and the N.Y.C. Board of Education. The 7th grade test assesses knowledge of chemistry while the 8th grade test measures more advanced knowledge of general science; both were produced by Science-Spanish Research Project of N.Y.C's Bureau of Educational Research. The test items are all multiple-choice. Also available is a report entitled "Science Instruction in Spanish for Pupils of Spanish-Speaking Background", which contains both the tests and test results for experimental and control group students.
4. **New York State Mathematics Test: Spanish Language Editions**

The New York State Mathematics Tests, in Spanish and English Editions, are designed to measure achievement in mathematics, as well as the general effectiveness of a school's math program. These instruments can also be used by teachers to aid in planning classroom instruction and in evaluating the progress of individual pupils. Three areas of mathematics are assessed: Concepts, computation, and problem solving. In the third grade version, answers are recorded directly in the test booklet. The 6th and 9th versions have separate answer sheets. Norms are provided in the Manual.

The following tests in Spanish and in English are measures of General Ability Readiness, Language and Academic Achievement, and Personality. They are all available from the Evaluation Office with norms for populations in Puerto Rico.
Pruebas de Puerto Rico (continued)

Prueba Colectiva Puertorriqueña de Capacidad Mental (1958), Forms A and B: nonverbal intelligence tests, "La Prueba Colectiva Puertorriqueña de Capacidad Mental" can be administered in about 60 minutes to children in grades 1-12. It consists of three parts: Verbal (20 items); Visual (20 items); and Quantitative (18 items). The children mark their answers directly in the booklets.

Test Puertorriqueño de Habilidad General (1962), Forms A and B: This instrument is designed to measure general ability in grades 4-12. It consists of five subtests: Synonyms (25 items); Antonyms (25 items); Analogies (25 items); Numerical Ability (15 items); and Spatial Relationships (21 items). Administration takes about 70 minutes, and the test booklets are reusable, since pupil responses are recorded on separate answer sheets.

Reading Comprehension Test (1961-62), Intermediate Level: This exam consists of 72 items designed to test reading comprehension in grades 7-9. The test instructions are in Spanish, administration takes about 80 minutes and the students record their answers on a separate answer sheet.

English Language Test (1962), Intermediate Level: This measure for grades 7-9 consists of four subtests: Auditory Discrimination (35 items); Structure (70 items); Vocabulary (45 items); and Writing of Words (20 items). It takes about 77 minutes, instructions are in Spanish, and a separate answer sheet is used.

Prueba de Lectura en Ingles (1968), Forms A and B: This test is designed to test reading ability on four levels of difficulty in grades 3-12. The test consists of two parts, Vocabulary and Reading Comprehension, and takes about 60 minutes. Norms are classified by grade, district, and sex, for all or part of the test. Information on validity and reliability is also included.

Pruebas de Lectura en Espanol (1968), Forms A and B: These tests are designed to measure reading ability in Spanish. There are four levels which cover grades 1-12, each consisting of two parts: Vocabulary and Comprehension. Administration takes about 60 minutes.

Prueba de Aprovechamiento en Matemáticas (1960), Intermediate Level: This instrument is designed to measure mathematical achievement in grades 7-12. There are three subtests: General Knowledge (29 items); Basic Skills (41 items) and Reasoning (20 items). It can be given in about 87 minutes, and uses separate answer sheets.

Prueba de Algebra Elemental (1964), Advanced Level: This instrument consists of 65 items designed to measure a student's knowledge of elemental algebra. It takes about 70 minutes and is applicable to grades 10-12. A separate answer sheet is used.
Prueba de Aprovechamiento en Ciencias (1962), Intermediale Level: This test takes about 105 minutes and consists of 150 items designed to measure achievement in science. It can be used in grades 7-9. A separate answer sheet is used.

Prueba de Biología Moderna (1968), Advanced Level: This test consists of 50 items designed to measure the student's knowledge of biology. It is applicable to grades 10-12, and can be administered in about 50 minutes.

Cuestionario Sobre Personalidad, División de Investigaciones Pedagógicas y Estadísticas (1960): This test is constructed for grades 7-12 to measure personality adjustment in 4 areas: Social; Emotional; Personal; and Home Life. It can be administered in about 50 minutes, and consists of 160 questions, which can be answered "yes", "no" or "not sure". The students can be classified into two groups: With problems or without problems.

Inventario de Intereses Vocacionales, División de Investigaciones Pedagógicas y Estadísticas (1954): This test is designed to determine the vocational interests of students in grades 9-12. It describes activities in 8 areas: Fine Arts; Language; Helping People; Numbers; Mechanics; Science; Controlling People; and Clerical (Church). There are 240 questions to which the students can answer "yes" or "no" on a separate answer sheet. The Inventory is untimed.

6. MLA - Cooperative Foreign Language Tests: Spanish: Modern Language Assoq. of America

Grade Range: High School - College

Can be Administered to: Groups

Time for Administration: About 2 hours

Languages: French, German, Italian, Russian, and Spanish

Source: Educational Testing Service
Box 999
Princeton, NJ 18540

Develop specifically to appraise language learning by the audiolingual approach the MLA-Cooperative Foreign Language Tests measure language skills functionally. Except for the directions, which are in English, the Spanish version is completely in Spanish. The four basic skills, Listening, Speaking, Reading and Writing, are separately tested at two levels of difficulty. A norms booklet provides norms for all tests in this series. Separate answer sheets can be used for Listening and Reading only. Also available are versions in French, German, Italian and Russian.
7. **Inter-American Series - Test of General Ability**

**Grade Range:**
- Preschool, ages 4 and 5
- Level 1, age 6 for end of kinder and beginning of grade 1
- Level 2, age 7-8, grades 2-3
- Level 3, age 9-11, grades 4-6
- Level 4, age 12-14, grades 7-9
- Level 5, age 15-18, grades 10-12

**Can be Administered to:** Groups

**Time for Administration:**
- 25 minutes (preschool) to 52 min. Levels 3-5

**Languages:**
- English and Spanish

**Source:**
- Guidance Testing Associates
- St. Mary's University
- One Camino Santa Maria
- San Antonio, TX 78284
- (512) 436-3304

These tests are designed to estimate the ability to do academic work in general. This series of tests includes six levels of difficulty which are published in Spanish and English in parallel forms (they measure the same skills) and in pre- and post-test form.

8. **Tests of General Ability (TOGA), J.C. Flanagan**

**Grade Range:** K-12

**Can be Administered to:** Groups

**Time for Administration:** About 45 minutes

**Languages:**
- English and Spanish

**Source:** Science Research Associates (SRA)
- 259 E. Erie Street
- Chicago, IL 60611

Designed for use in grades K-12, the Tests of General Ability (TOGA) provide a nonverbal measure of general intelligence and basic learning ability. The scores are said to reflect ability independent of school acquired skills, and therefore the TOGA are particularly useful for students from culturally different backgrounds. A Technical Report, grades K-12, is available for interpretation of the results. An Examiner's Manual translated into Spanish is also available for each grade level.
9. **Short Test of Educational Ability (STEA)**

- **Grade Range:** K-12
- **Can be Administered to:** Groups
- **Time for Administration:** 30 minutes
- **Languages:** English, Spanish
- **Source:** Science Research Associates (SRA)
  259 E. Erie Street
  Chicago, IL 60611

Designed to estimate educational ability in a short, easily-administered format, the Short Test of Educational Ability has parallel editions in English and Spanish. Levels 1 and 2, for grades K-3, are primarily pictorial and are administered orally. Levels 3, 4, and 5 for grades 4-12, are read by the students. The subtests include: What Would If; How Would You; Spatial Relations; Verbal Meaning; Number Series; Arithmetic Reasoning; Letter Series; and Symbol Manipulation. In the Spanish edition, the test directions and items read orally by the teacher are annotated with Southwestern, Cuban, and Puerto Rican Versions. Normative data for the English edition is presented in an Interpretive Manual, which contains recommendations for the use of the Spanish version. In order to determine whether the Spanish edition was equivalent to the English, both versions were administered to bilingual children in the Southwest. In grades K-3, the performances of the children were very similar. As a result, the Manual explains, along with cautionary notes, that the Level 1 and 2 norms developed for the English edition may well be applied to the Spanish edition. Levels 3, 4, and 5, however, should be used only with students who have had at least two years of their formal education in Spanish or who have otherwise demonstrated an ability to read Spanish with some facility.
